Malik al-Afdal, who had taken over the government in Damascus, very soon jeopardised his authority by stupid measures, al-Ḳāḍī al-Fāḍil went to Egypt to al-Malik al-ʿAziz. War soon afterwards broke out between the two brothers, but in 591 (1195) peace was made through the mediation of al-Ḳāḍī al-Fāḍil. He thereupon retired into private life. He died suddenly on 6 or 7 Rabiʿ ii 596 (26 or 27 Jan. 1200). Of the numerous state documents which al-Ḳāḍī al-Fāḍil composed during his activity in the *Diwān al-Inshāʾ*, many examples are preserved in MSS. and in Abū Shāma. Hclbig gives a complete list (p. 67—75). In addition there is his correspondence with Usāma b. Munqidh concerning the latter's *Kitāb al-ʿAṣā* from the *Khariḍa* of ʿImād al-Dīn in H. Derenbourg, *Nouv. Mém. Orient.*, p. 147—52; *Vie d'Ousāma*, French transl., p. 383—392. During his official career he also edited an official journal, *Mutadjudidūt*, of which al-Maḳrīzī gives many specimens in the *Khitaṭ*. These are not only notes on official letters and the answers to them but reports also on important happenings in the kingdom or on gifts of honour granted by the Sultān.

AL-ḲĀDĪ AL-HARAWĪ. [See AL-ʿABBĀDĪ.]

ḲĀDĪ KHĀN FAKHR AL-DĪN, AL-ḤASAN B. MANṢŪR AL-ʿUḶḶANDĪ AL-FARGHĀNĪ, was a Ḥanafī Muftī and scholar who composed a large number of esteemed juristic works and commentaries on Ḥanafī works. In particular his collection of legal decisions (*Fatāwī ʿĀḍī Khān*, in 4 vols. lith. Calcutta 1835; with the subsidiary title *al-Fatāwī al-Sirāḍiyya*, lith. Lucknow 1293—5; pr. Cairo 1282) has become widely known on account of its convenience. He died in Ramaḍān 592 (1196).

ḲĀDĪM. [See KĪDAM.]

AL-ḲĀDİR, the Mighty, one of the most beautiful names of Allāh; cf. Aḥmad b. al-Ḥusain al-Baiḥaqī, *al-Asmāʾ wal-Sifāt*, Allāhahād 1313, S. 15; Redhouse, *The Most Comely Names*, *Journ. Roy. As. Soc.*, 1880, S. 49.

AL-ḲĀDİR BI'L-LĀH, ABU 'L-ʿABBĀS AḤMAD B. IṢḤĀK. ʿAbbāsīd Caliph. After the deposition of al-Tāʾī, his cousin Abu 'L-ʿAbbās Aḥmad was proclaimed Caliph in Ramaḍān 381 (Nov. 991) with the name al-Ḳādir. The latter was a grandson of al-Muḳtadir; his mother was a slave. During his long reign he was entirely under the influence of the amirs ruling in Baghdād and only once did

he give evidence of having a mind of his own. This was when the Būyid Baha' al-Dawla [q. v.] wished to replace the Sunni chief Ḳāḍī by a Shīʿī but his plan was frustrated by the opposition of al-Ḳādir, whereupon the Shīʿīs were given a superior of their own under the title *naḳīb* "intendant". For the rest, all heretics, notably the Muʿtazilites, were treated with the greatest severity. In this period arose the dynasties of the Marwānids, the ʿUkailids and the Mirdāsids, and the Ghaznawid kingdom attained its greatest prosperity, while the internal disruption under the Būyids increased, and the Ḥamdānids and Sāmānids, which latter had long been a bulwark against the Turks, collapsed. Al-Ḳādir died in Dhū 'l-Ḥijja 422 (Nov.-Dec. 1031) at the age of over 80. He is also mentioned as the author of some theological treatises.

ḲĀDİRĪYA, Order (*ṭarīqa*) of dervishes called after ʿAhd al-Ḳādir al-Djilānī [q. v.].

1. Origin. ʿAhd al-Ḳādir (ob. 561 = 1166) was the principal of a school (*madrasa*) of Ḥanbalite Law and a *ribāʿ* in Baghdād. His sermons (collected in *al-Fatḥ al-Rabbānī*) were delivered sometimes in the one, sometimes in the other; both were notable institutions in the time of Ibn al-Athīr, and Yāḳūt (*Irshād al-Arib*, v. 274) records a bequest of books made to the former by a man who died in 572 (1176-7). Both appear to have come to an end at the sack of Baghdād in 656 (1258), till when it is probable that their headship remained in the family of ʿAbd al-Ḳādir, which was numerous and distinguished. In the *Bahdja* al-Asrār, where an accurate account of his descendants is given (pp. 113—117), it is stated that ʿAbd al-Ḳādir was succeeded in the *madrasa* by his son ʿAbd al-Wahhāb (552—593 = 1157—1196), who was followed by his son ʿAbd al-Salām (ob. 611 = 1214). Another son, ʿAbd al-Razzāk (528—603 = 1134—1206-7), was a notable ascetic. Several members of the family perished during the sack of Baghdād, when it would appear that both these institutions came to an end.

A *ribāʿ* was at this time distinguished from a *zāwiya*, the former being a *coenobium*, the latter a place where an ascetic lived in solitude (al-Suhrawardī, *ʿAwārif al-Maʿārif*, margin of the *Ihyāʾ*, Cairo 1306, i. 217). In the time of Ibn Baṭṭūṭa *zāwiya* had come to be used in the former sense also, and his description of the religious exercises practised at the *zāwiya* (i. 71) would probably suit what went on at ʿAbd al-Ḳādir's *ribāʿ*. The body of rules and doctrines which had his authority was sufficient to constitute a system (*madhhab*; *Bahdja*, p. 101), and by accepting the *khirka* from the *shaikh* the *murid* signified that he subordinated his will to that of the former (al-Suhrawardī, i. 192). A long list is given in the *Bahdja* of men who attained various degrees of distinction who had received the *khirka* from ʿAbd al-Ḳādir, two of them at the age of seven and one at the age of one. These persons were said to "ascribe themselves" (*intasaba* or *intamā* or even *tasammā*) to

‘Abd al-Kādir, and could bestow the *khirka* on others as from him; in doing so they would stipulate that the *murīd* was to regard ‘Abd al-Kādir as his *shaiḫ* and director after the Prophet. In a tradition which is likely to be apocryphal (*Bahja*, p. 101), dated 592 (1196), ‘Abd al-Kādir declared that assumption of his *khirka* was not absolutely necessary for entry into his Order; personal attachment to himself was sufficient. It would appear that during his lifetime several persons carried on propaganda in favour of his system; one ‘Alī b. al-Haddād obtained proselytes in Yemen, and one Muḥammad al-Baṭā’ihī, resident in Baalbek, did likewise in Syria; one Taḳī al-Dīn Muḥammad al-Yūnīnī, also of Baalbek, was another propagandist, and one Muḥammad b. ‘Abd al-Ṣamad in Egypt “ascribed himself to ‘Abd al-Kādir and in treading the Path relied on him after God and His Apostle” (*Bahja*, pp. 109, 110). Since all who ascribed themselves to him were promised Paradise, the Order is likely to have been popular; and even in recent times missionaries in Africa appear to have little difficulty in obtaining fresh adherents to it (cf. O. Lenz, *Timbuktu*, ii. 33).

That ‘Abd al-Kādir’s sons had some share in spreading it is likely, though Ibn Taimiya (ob. 728 = 1328) mentions that he had associated with one of his descendants who was an ordinary Muslim and not a member of it, and so did not agree with those who held fanatical views about him (*Bughyat al-Murtād*, p. 124). The *Bahja* however does not bear out Le Chatelier’s assertion (*Confréries Musulmanes du Hedjaz*, p. 35) that in ‘Abd al-Kādir’s life-time some of his sons had been preaching his doctrine in Morocco, Egypt, Arabia, Turkestan and India. It says much of ‘Abd al-Razzāk, but nothing of the “mo que uow in ruins, whose seven gilded domes have often served as the subject of description by Arabic historians”, which this son is supposed to have built. Indeed this mosque appears to be later than Ḥamd Allāh Mustawfī (740 = 1339-40), the first author later than the *Bahja*, who mentions ‘Abd al-Kādir’s tomb (*Nuzhat al-Ḳulūb*, transl. Le Strange, p. 42). Nor does it confirm the statement that this ‘Abd al-Razzāk introduced the use of music in the ritual, and indeed the employment of this was earlier than ‘Abd al-Kādir’s time, and is discussed by al-Suhrawardī (ii. 116) without allusion to ‘Abd al-Razzāk. E. Mercier (*Histoire de l’Afrique Septentrionale*, iii. 14) asserts that the Order of Kādiriya existed in Berbery in the xiiith century A.D., and was closely connected with the Fātimides (whose rule terminated 567 = 1171), but he gives no authority for these statements.

Al-Suhrawardī holds that the exercises of each *murīd* should be determined by his *shaiḫ* in accordance with his individual needs, whence it is unlikely that ‘Abd al-Kādir instituted any rigid system of *dhikr*, *wird* and *ḥizb*, and indeed those in use among different Kādiri communities differ (Rinn, *Marabouts et Khouan*, p. 183 *sqq.*). The initiation ceremonies given on Turkish authority by J. P. Brown (*The Dervishes*, p. 98) are quite different from those furnished by Rinn on North African authority. In one of these latter there is a tendency to set ‘Alī above Muḥammad and to insist on the importance of Ḥasan and Ḥusain, which cannot well represent the views of the Ḥanbalite ‘Abd al-Kādir. The *wird* of ‘Abd al-Kādir in *al-Fuyūḍāt al-Rabbāniya* is given on the

authority of one ‘Abd Allāh b. Muḥammad al-‘Adjamī, who lived 185 years (536—731), and may be regarded as mythical.

2. Development. Kādirism seems from an early period to have developed on different lines according as ‘Abd al-Kādir was regarded as the founder of a system involving rites and practices, or as a worker of miracles. In the latter direction it meant the deification of ‘Abd al-Kādir, the extremists holding that he was Lord of Creation after God, absolutely, whereas the more moderate supposed that he was so only in his own age (*Bughyat al-Murtād*, l. c.). The latter was the view of Ibn ‘Arabī, who takes him as an example of a *khalīfa* who showed himself and practised sovereignty (*taṣarruf*; *al-Fuṭūḥāt al-Makkiya*, ii. 407); such a *khalīfa* in his system is independent of the revelation to Muḥammad (*Fuṣūṣ al-Ḥikam*, § 16). But there was also a theory that ‘Abd al-Kādir practised in his grave all the activities (*taṣarruf*) of the living (Ibn al-Wardī [ob. 749], *Ta’rīkh*, ii. 70); and Ibn Taimiya (*al-Djawāb al-Ṣāḥih*, i. 323) mentions him among saints who in his time still appeared to people, being in reality impersonated by demoes. In the initiation ceremonies recorded by J. P. Brown, l. c., the candidate for admission to the Order sees ‘Abd al-Kādir in dreams; in one case so often and so clearly that without having seen ‘Abd al-Kādir’s portrait he could recognize him among a thousand. The form of Kādirism which means the worship of ‘Abd al-Kādir seems to prevail in North Africa, where it is called *Djilālism* (for *Djilānism*), and whole communities are called *Djilāla*. Their system has been described as the application of Sūfī mysticism to beliefs that are certainly pre-Islamic, and the materialization of that mysticism under the form of a cult of hidden subterranean powers (E. Michaux-Bellaire in *Archives Marocaines*, xx. 235). Here the word *khalwa* is used for a heap of stones where women attach rags to reeds planted between the stones and where they burn benzoin and styrax in postherds (*ibid.*, xvii. 60). Such *khalwa*’s are to be found in all the Arab villages. Similarly “in the province of Oran on all the roads and on the summits of the chief mountains *qubbah* are to be found in the name of ‘Abd al-Kādir Jilālī” (E. de Neveu, *Ordres Religieux chez les Musulmans d’Algérie*, p. 30). The society of the Genāwah or Negroes of Guinea has placed itself entirely under the protection of Mawlā ‘Abd al-Kādir with all his array of male and female demons; wherein M. Michaux-Bellaire finds traces of the powers which, according to the *Qur’ān* (and even earlier authorities) belonged to Solomon. The cult of ‘Abd al-Kādir is most ardently practised by the women in the *Khloṭ* and *Tliḳ*, who come to the *khalwa* for every sort of object, and to satisfy their loves and hates in all the acts of their existence. The men on the other hand chiefly go to the *khalwa* when they are ill (*Arch. Maroc.*, vi. 329).

That this development is inconsistent with Islamic orthodoxy is evident, and it is attacked by such authorities as Ibn Taimiya and Ibrāhīm al-Shāṭibī (*I’tisām*, i. 348 *sqq.*). The system to which the name Kādiriya is more ordinarily applied differs from other orders mainly in ritual, although, through circumstances connected with its origin, “it has not that homogeneity of statutes which is to be found in other congregations, which seem to form small exclusive churches outside which

there is no salvation" (Rinn, p. 186). Though the founder was a Hanbalite, membership is by no means confined to that school, and the Order is theoretically both tolerant and charitable.

3. Geographical Distribution. Since historical and geographical works rarely distinguish between the different *ṭuruḥ* in their accounts of religious buildings, little can be said with certainty of the date at which the first Kādiri *zāwiya* or *khānqāh* was established in any country save 'Irāq. The Order is said to have been introduced into Fez by the posterity of two of 'Abd al-Kādir's sons, Ibrāhīm (ob. 592 = 1196 in Wāsiṭ) and 'Abd al-'Azīz (who died in Djjāl, a village of Sindjar); they had migrated to Spain and shortly before the fall of Granada (897 = 1492) their descendants fled to Morocco. The full genealogy of the Shurafa' Djlāla of Fez is given in *Arch. Maroc.*, iii. 106—114, on the authority of *al-Durr al-Sanī* of Ibn al-Ṭayyib al-Kādiri (1090 = 1679), who claims to have used a series of authentic documents. The *khātwa* of 'Abd al-Kādir in Fez is mentioned as early as 1104 = 1692/3 (*ibid.*, xi. 319). The order was introduced into Asia Minor and Constantinople by Ismā'il Rūmī, founder of the *khānqāh* known as the Kādirikhānah at the Top-khānah. This personage (ob. 1041 = 1631), who is called *Pir ṭhānī*, "second Shaikh", is said to have founded some 40 *tekiye's* in these regions (*Qamūs al-A'ām*). A Kādiri *ribāṭ* in Meccah is mentioned by Ṣāliḥ b. Maḥdī in *al-'Alam al-Shāmīkh*, p. 381, about 1180 (1669/70), but the assertion that a branch was established there during the lifetime of 'Abd al-Kādir (Le Chatelier, *o. c.*, p. 44) is not improbable, since Meccah has a natural attraction for the Ṣūfis. In the *A'in-i Akbari* (about 1600; transl. Jarett, iii. 357) the Kādiriya Order is mentioned as one that is highly respected but is not included among those recognized in India; nor does there appear to be any allusion to it in the list of Indian Ṣūfis in the *Ma'āzīn-i Kīrām* (1752), though some other Orders are noticed, and 'Abd al-Kādir himself is mentioned. Yet see Khāfi Khān, *Muntakhab al-Lubāb*, ii. 604 and art. INDIA, p. 489.

Some statistics (to be received with caution) of the Kādiris and their *zāwiya's* are given by Depont et Coppolani (*Confréries Religieuses Musulmanes*, pp. 301—318). Much of its development is admittedly recent, and may be due to the fame won by the namesake of 'Abd al-Kādir who for so many years resisted the French occupation of North Africa [see i. 43 sq.]. It is doubtless represented in all Islamic countries, though it would appear that certain derived *ṭuruḥ* enjoy greater popularity in many places. Thus the Kādirism of Touba in Guinea, which has become a distinct sign whereby the Diakanke tribe can be recognized, is derived through the Sidia from the Kādirism of the Kounta of Timbuctu (P. Marty in *Revue du Monde Musulman*, xxvi. 183). These Kounta however form a *filiale* of the Kādiriya, and some of them prefer to call themselves Shādhiliya (*ibid.*, xxxi. 414).

4. Organization. The Kādiri community acknowledges nominal allegiance to the keeper of 'Abd al-Kādir's tomb in Baghdād, and the deeds of investiture published by Rinn, p. 179, and in the *Revue du Monde Musulman*, ii. 513 and ix. 290, are from this source. It would seem however that the actual authority of this per-

sonage is chiefly recognized in Mesopotamia and India. The latter periodically send gifts which form the main source of the revenues of his establishment; the members of this family find it worth while to learn Urdu. The Meccan *zāwiya's* are subject to the *Shaikh al-Ṭuruḥ*, who has the right to nominate their *muḥaddam*. The Egyptian branch is under the control of the Sayyid al-Bakrī, who is also *Shaikh al-Ṭuruḥ*; 'Alī Pasha Mubārak (iii. 129; see also P. Kahle in *Der Islam*, vi. 154) reckons the order as one of the four which go back to a *kuṭb*, but asserts that it has neither *furū'* nor *buyūt*. In Africa, according to Rinn, each *muḥaddam* names his successor; in the event of one dying without having nominated, an election is made by the *ikhwān* at a *ḥaḍra*. The approval of the head of the order in Baghdād is then solicited, and has never been refused. The organization of the Order in North Africa is described somewhat fully by Rinn, Depont et Coppolani, in the works cited. The system appears to be in general congregational, i. e. the *zāwiya's* are independent, and the relation between them and the central institution in Baghdād is very loose. The principle whereby the headship of a *zāwiya* is hereditary is generally recognized.

5. Symbols and Rites. The sign of the Turkish Kādiris is said to be a rose which is green, having been adopted by Ismā'il Rūmī. The candidate for admission to the Order after a year brings an *'araḥiya* or small felt cap, to which if the candidate be accepted the *Shaikh* attaches a rose of 18 sections, with Solomon's Seal in the centre. This cap is called by them *tāḍi*. The symbolism of this is explained by J. P. Brown, *The Dervishes*, p. 98 sqq. (copied by Wilberforce Clarke, transl. of *'Awārif al-Ma'ārif*, p. 159; the Urdu translation *Kāshf Asrār al-Mashāyikh* adds nothing to Brown's information). According to him, they prefer the colour green, though they allow others; in Lane's time the turbans and banners of the Kādiris in Egypt were white; most members of the Order were fishermen, and they in religious processions carried upon poles nets of various colours (*Modern Egyptians*, 1871, i. 306). In India there are festivities in honour of 'Abd al-Kādir on 11 Rabi' II, and pilgrimages are made in many places in Algeria and Morocco to the *zāwiya's* and shrines of the saint (Rinn, p. 177). The *Mawsim* of the Djlāla at Salé is described at length by L. Mercier in *Arch. Maroc.*, viii. 137—139; it commemorates the seventh day of the *Milud (Mawlid)*, i. e. the Feast of the Prophet's Birthday, and lasts four days 17—20 Rabi' I. Sheep and oxen are presented to the descendants of 'Abd al-Kādir. M. Michaux-Bellaire distinguishes in Morocco between the ceremonies of the Kādiriya, who recite the *ḥuṣb*, and the Djlāla, who recite the *dhikr* to the accompaniment of instruments; and again between the Djlāla of the country, whose instruments are the *bender* (a sort of big tambourine without bells) and *'awāda*, and those of the town, whose instruments are the *ṭebila*, *ṭabal* and *ghaita* (*Arch. Maroc.*, vi. 330 and xvii. 60). A description of the *ḥaḍrat al-mallūk*, a performance executed with these last instruments, which leads to ecstasy, is given by him in the first passage cited. He further records some special ceremonies connected with the Awlād Khalifa in the Ḥarb (*ibid.*, xx. 287). All the Hilālī of the Ḥarb are Djlāla, and in all the *ḥaḍra's* (services) of the

Djilāla the presence of at least one Khalīfī is necessary for the direction of ceremonies, and when no actual Khalīfī is present, some one there takes the name in order to perform the priestly duty. The origin of the name Awlād Khalīfa is obscure (p. 284); it may be noticed that the *Bahdja* mentions one Khalīfa b. Musā al-Nahrimalikī as having played a leading part in the propagation of 'Abd al-Kādir's system. "The *ḥadra* of the Djilāla of the country contains neither the *ḥizb* nor the *dhikr* instituted by the Shaikh, but a plain *dhikr* of improvised words in the ceremonial rhythm of the *banādīr* (plur. of *banḍer*). These improvisations always terminate with the words "Thus spake Mawlāy 'Abd al-Kādir" or "O Mawlāy 'Abd al-Kādir!" (Michaux-Bellaire, p. 288).

Various collections of rituals supposed to have been recommended by 'Abd al-Kādir have been published in Egypt, Turkey and India. In *al-Fu-yūdāt al-Rabbāniya* he who is about to enter upon *ḥalwa* (retreat) is advised to fast in the day and keep vigil at night. The *ḥalwa* lasts forty days. "If a figure reveal itself to him saying "I am God", he should say "nay rather thou art in God", and if it be for probation, it will vanish; but if it remain, then it will be a genuine revelation (*tadjiālī*)" (Dihlī 1330, p. 60). Reduction of food during the 40 days should be gradual till for the last three fasting is complete. At the end he returns by degrees to his former diet.

Some practices peculiar to the Djilāla of Tangier are recorded by G. Salmon (*Arch. Maroc.*, ii. 108). Those who make vows to 'Abd al-Kādir are in the habit of depositing in the *zāwiya* white cocks, which are called *muḥarrar* (Sūra iii. 31); they do not kill them, but leave them free to rove about the *zāwiya*, where however they do not long survive; the Sharīf who lives hard by takes them for his food. The four daughters of a deceased Sharīf continued to live on the revenues of the *zāwiya* and carry away the *muḥarrar* fowls. The *muḥaddam* at this *zāwiya* was the Sharīf, who conducted the ceremonies at which the Qur'ān is repeated without the *ḥizb* of 'Abd al-Kādir being pronounced, and where dances similar to those of the 'Isawīs [q. v.] are performed. Circumcisions are performed at the *zāwiya* on the first day of the *mawlid*. A nightly meeting called *laila* is held on the eve of this day, at which the *ḥizb* of 'Abd al-Kādir is recited. At El-Qsar, where there are also some local practices, all the potters belong to the Djilāla, among whom the richer members of the community are to be found (*ibid.*, ii. 163).

The first time that the Kādirīs appear to have played a political part was during the French conquest of Algeria, when the chief of the Kādirīya Muḥyi 'l-Dīn, having been offered the leadership in the war against the infidel, permitted his son 'Abd al-Kādir to accept it. This person was able to utilize the religious organization of his order in order to establish the sovereignty which the French had accorded him, and when his sovereignty was threatened could fall back on his rank as *muḥaddam* of his order to win fresh recruits (H. Garrot, *Histoire générale de l'Algérie*, Algiers 1910, p. 800, 863 etc.). Since the fall and exile of this personage it could appear that the Kādirīs in Africa have lent their support to the French government. "In 1879 when there was a local insurrection in Aurès the *shaikh* of the Kādirīya of Menā'a, Si Muḥammad b. 'Abbās, displayed unim-

peachable loyalty [s. art. AWRĀS, i. 523a]; and the same order helped the French government to extend their influence in the Sahara at Wargla and El-Wad. Their *Nā'ib*, Si Muḥammad b. Tayyib, fell on the French side at the battle of Charouin, March 2, 1901." (Israel Hamet, *Les Musulmans Français du Nord de l'Afrique*, Paris 1906, p. 276). — In the Ottoman revolution of 1908 it is said that their sympathies were with the revolutionists, but that for fear of being outdone in religious zeal by the rival Rifā'i order they joined in Baghdad in the "pogrom" against the Jews (L. Massignon in *Revue du Monde Musulman*, vi. 461).

AL-KĀDISIYA, the name of several places in the 'Irāk and in Mesopotamia:

1. A town in the 'Irāk, on the Eastern bank of the Tigris, 8 miles S. E. of Sāmarrā. With the latter it seems to have been closely connected in its period of prosperity. We do not know what special part al-Kādisiya played at that time. Perhaps, as Herzfeld, (*op. cit.*, p. 107) suggests, it is really identical with the town of al-Kāṭūl which Ilārūn al-Rashīd or the Caliph al-Mu'taṣim began to build before the foundation of Sāmarrā. Yāqūt and other Arab geographers mention the glassworks of al-Kādisiya. In the middle ages the important Dudjail canal left the Tigris opposite the town. The ruins of al-Kādisiya lie in Lat. 34° 5' N., between the two still existing out of the former three Tigris canals, called al-Kāṭūl; they are a short quarter of an hour distant from the bank of the Tigris. The old name has survived and is now popularly pronounced Dīdisiya (occasionally corrupted to Dīāsiya and Dīālisiya). We owe full accounts of these ruins particularly to Ross and Jones; E. Herzfeld also has recently investigated the ruins. Jones gives a plan of the ruins of the town, which Herzfeld says is entirely correct.

The enclosing walls which measure about 6000 paces form a regular octagon. They are flanked by towers at the corners and defended by 16 bastions at intervals. They were built of bricks which in technique, plan and preservation resemble the castra of Sāmarrā. According to all criteria, these ruins belong — in Herzfeld's opinion — to the 'Abbāsīd period, not to an older one. Ten minutes from al-Kādisiya, just on the river bank, are also mounds of ruins, called al-Ṣanam. They mark the site of a mediæval or ancient town, half of which has already been washed by the Tigris. On a remarkable find of statues made here, see Cl. Rich, *Narrative of a Residence in Koordistan*, 1836, ii. 152. Al-Ṣanam perhaps was within the area of al-Kādisiya and is to be regarded as its port.

zum persischen Golf (Berlin 1900), ii. 229; M. Streck, *Babylonien nach den arab. Geographen* (Leiden 1900 sq.), i. 33, 223—4; E. Herzfeld in Sarre-Herzfeld, *Archaeol. Reise im Euphrat- und Tigrisgebiet*, i. (1911), p. 105—7 (where the references to Rich, Ross, Jones are given).

2. A town in the 'Irāk, SSW. from Kūfa, a station on the pilgrim road from Baghdad to Mecca. According to the itineraries of the Arab geographers, it was 15 Arab (= Roman) miles from Kūfa. Al-Ḳādisiyya was situated in the western part of the *Tāff*, that steppe region rising above the Babylonian cultivated country (*al-Rīf*) and characterised by springs (e.g. that of al-'Udhāib), which forms the transition to the high plateau of the Arabian desert. This *Tāff* in the Sāsānian period was protected by a series of watch-houses (*maslaha's*) and a great wall and ditch (*khandaq*) from the raids of Arab tribes. The last village of the *Tāff*, just before entering the desert, was al-'Udhāib, also a station on the Baghdad-Mecca road already mentioned. The distance between it and al-Ḳādisiyya, with which it was connected by two walls was 6 (according to another source, 4) Arab miles. On the geographical conception of the *Tāff* cf. Yāqūt, *op. cit.*, iii. 539 and Seybold in the *Orient. Lit. Zeitung*, vi. (1903), col. 241—4. The breadth of the 'Irāk is usually measured by the Arab geographers by a line which runs from Hulwān in the northeast to al-Ḳādisiyya (or al-'Udhāib) in the southwest; cf. Streck, *op. cit.*, i. 2, 5.

The exact location of al-Ḳādisiyya was unknown until quite recently. An attempt had been made to identify it with the early Muḥammadan ruins of al-Ukhaidir (25 miles S.S.W. of Kūfa) — for example by Ritter, *op. cit.*, xi. 956, Loftus, *Travels in Chaldaea and Susiana* (London 1857), p. 64 note, and Justi in the *Grundriss der Iran. Phil.*, ii. 546. This identification, however, is to be definitely rejected as erroneous. Besides, Ritter, *op. cit.*, x. 186 places al-Ḳādisiyya much too far north, while the locations of al-Ḳādisiyya and al-'Udhāib given by Wagner (*Nachr. d. Gott. Gesellsch. d. Wiss.*, 1902, p. 257—9) are fairly correct. A. Musil, on his journey of exploration in 1912, was the first to rediscover the real site of al-Ḳādisiyya, cf. his report in the *Anzeiger der phil.-hist. Kl. der Wien. Akad. der Wiss.*, 1913, i. 11 (12 of the reprint). Musil there remarks that the spring al-'Odeyḥ rises in the valley of of Mšeyzīz; "on the left bank of that valley, on the edge of a swampy *hār* we were shown the ruins of al-Ḳādisiyye or Dār al-Ḳāzi (= Ḳādisiyya)". According to the map which Musil appends to his essay in the *Wiener Zeitschr. für die Kunde des Morgenl.*, xxix. (1916), p. 461, the ruins mentioned are situated in 31° 45' N. lat. and 44° 8' E. Long. (Greenwich) directly south of Najaf and 19 miles from Kūfa.

The locality of Kaides which Beauchamp in his excursion to the ruins of Babylon in 1760 heard of as the find-spot of a statue some considerable distance away (see the reprint of his account of his journey in the *Revue d'Assyriologie*, x. 190) is perhaps also identical with the remains of al-Ḳādisiyya discovered by Musil. Kaides is probably = Ḳādis, the shorter form of the name, which is occasionally found alongside of Ḳādisiyya, as for example in an old Arab poet (see al-Bakrī, ed. Wüstenfeld, p. 226), in al-Ṭabarī, etc. Firdawsi

writes Ḳādisī and Ḳādisiyya. In the neighbourhood of al-Ḳādisiyya there was a village called al-Ḳudais, "little Ḳādis". The poets give the whole district round al-Ḳādisiyya the collective name al-Ḳawādis.

The Arab geographers of the ixth (xth) century (al-Iṣṭakhri, Ibn Ḥawqāl, al-Muḳaddasī) describe al-Ḳādisiyya as a small town with two gates and a mud fortress, in the midst of cultivated fields and groves of date-palms, watered by a canal led from the Euphrates, the last running water in the 'Irāk. In ancient times the inner arm of the Persian Gulf seems to have stretched up to the region of al-Ḳādisiyya. The main arm of the Euphrates once flowed, as al-Mas'ūdī notes (*Murūdj al-Dhahab*, ed. Paris, i. 215), towards al-Ḥīra, where its ancient bed was still visible and was called al-'Atīḳ "the old (river)". It took its course between al-Ḳādisiyya in the north-east and al-'Udhāib in the southwest; at al-Ḳādisiyya there was a bridge across it called Dīsr al-'Atīḳ or Dīsr al-Ḳādisiyya.

In the Sāsānian period al-Ḳādisiyya played a prominent part as an important frontier town of the Persian empire. It was not till the Muḥammadan period that the town became very famous on account of the decisive battle fought in its vicinity, with which the Arab opened their second campaign against the lands of the Euphrates and Tigris in the most successful fashion. The Muslim army was under the command of Sa'd b. Abī Waḳḳās, while the Persian troops were led by the imperial commander-in-chief Rustam. Statements differ very considerably regarding the numbers on each side; the number given for the Arabs varies from 6 000 to 38 000 and that for the Persians 30 000 to 120 000 men. The latter were undoubtedly superior to the Muslims in strength. The estimate of an almost contemporary Armenian historian may be fairly near the truth when it puts the Persians at 80 000 men and the Arabs at 9—10 000, besides the Syrian reinforcements of 6 000 men who arrived in the last stage of the fight.

It was only after the two sides had stood watching each other for weeks that they joined battle. The battle lasted three (or four) days. These days in the specifically 'Irāk tradition have special names, which are probably to be explained as place-names. In spite of all the heroic courage of the Arabs, the balance would finally have turned in favour of the Persians, if at the critical moment of the decision the troops hurried from Syria had not arrived in time. Their rapid and vigorous intervention decided the victory of the Arab arms. It was, however, not a cheap victory for the Muslims, as about a third of their whole force perished. About the doubtless very heavy Persian losses the accounts are contradictory. The Persian commander in chief Rustam was captured and killed in the heat of battle. Very considerable booty was taken by the victors. The most important trophy was the Persian imperial standard said to date from the early Irānian period (on it see Sarre in *Klio*, iii. 358 sq.), Dirafsh-i Kāwīyan, which was cut in pieces and distributed. In the fighting with the retreating Persians the Arabs also captured the celebrated treasure of Nakhārdjān (properly Nakhwargān) which consisted of valuable ornaments for women; cf. on it Noldcke in the *Zeitschr. d. Deutsch. Morgenl. Ges.*, xxxiii. 523—4.

The glorious day of al-Ḳādisiyya, which made the Arabs masters of the 'Irāk west of the Tigris, is

one of the most celebrated events in the great period of the Muslim conquests. It laid the foundations for the supremacy of the religion of Muḥammad in the nearer east. Of course tradition has woven many legends round the victory; it is frequently mentioned in the older Arab poetry.

The date of the battle is very uncertain. The statements in the different sources vary from the years 14 to 16 (635–637). One thing is certain that the battle was fought in the spring and that Baṣra was founded after it. Wellhausen (*op. cit.*, vi. 72) decides for 15 (636), while Caetani prefers 16 (637) (*op. cit.*, p. 629–633); see also Justi, *Grundr. der Iran. Phil.*, ii. 546.

The Armenian historians call the battle after Hira (Armen. Herthican); see the account by Sebeos in Hubschmann, *Zur Geschichte Armeniens und der ersten Kriege der Araber* (Leipzig 1875), p. 14 and Caetani, *op. cit.*, p. 685).

In addition to the two towns mentioned above, Yāqūt knows three other places called Kādisiya, namely two villages in the district of al-Mawṣil, on the Nahr al-Khāzir between al-Mawṣil and Irbil, and a third near Djazira b. ʿOmar in Mesopotamia; see Yāqūt, *al-Muḥṭarik*, ed. Wustenfeld, p. 337. Ibn al-Aṭhīr also mentions an al-Kādisiya near Baghdād (*op. cit.*, xii. 91). We also find the shorter form al-Kādis beside al-Kādisiya, e. g. for the battlefield (cf. above), for a village near Herāt (see *al-Muḥṭarik*, p. 337; al-Balādhurī, p. 409, 2) and near Marw al-Rūdh (Yāqūt, iv. 7, 7). Probably in all these place-names, as Noldeke suggests (*Zeitschr. der Deutsch. Morgenl. Ges.*, xxxiii. 1623), we have to deal with traces of a lost people of unknown nationality, namely the Kādisīaeans, who appear in Syriac literature of the vith and viith centuries as a wild warlike people in the region of Singjār. The places called al-Kādisiya and al-Kādis in Mesopotamia, Babylonia and on Persian territory are perhaps to be explained as settlements of branches

of this stock, made by the Sāsānian kings. Of the celebrated al-Kādisiya near Kūfa, it is at least definitely stated that its name comes from Kādis near Herāt, from which the garrison of the fort belonging to the military cordon on the frontier had come. Cf. Noldeke, *op. cit.*, p. 157 sq., 162; J. Marquart, *Eränsahr nach der Geographie des Pseudo-Moses Xorenaṣi* (*Abhandlungen der Gott. Ges. der Wiss.*, 1901), p. 77, 78. (M. STRECK.)

KĀDJĀR (*kaḍār* "marching quickly"; cf. Sulaimān Efendi, *Lughat-i Čaghatai*, Stambul 1298, p. 214), the name of the present ruling dynasty of Persia. It takes its origin from the Turkoman tribe of the same name settled in the district of Astarābād [q. v.], but which had not always been there. Persian historians assert that it is a branch of the great tribe of Djalāir [q. v.] and that it takes its name from Kādjār Noyān, son of Sertāk Noyān, who had been the tutor of Ghāzān Khān [q. v.]; this Sertāk is without doubt the same as he who was put to death by Baidū [q. v.], because he was a partisan of Gaiḵhātū [q. v.] in 694 (1295) (Wassāf, Bombay 1269, iii. 282; d'Oshson, *Hist. des Mongols*, iv. 115). This tribe had, it is said, settled on the frontiers of Syria after the reign of Abū Saʿīd [q. v.], in 736 (1335); Timūr is said to have brought it back to Persia and into Turkeṣtān, its native country, in 803 (1200). It was one of the seven Turkoman tribes which placed the Šafawī dynasty on the throne of Persia. To it belonged Šāh Kūli Kurāi (body-guard), who was twice appointed ambassador to treat for peace with the Turks in 962 (1555) and in 975 (1567) (Pečewi, i. 327, 334; v. Hammer, *Hist. de l'Empire Ottoman*, Fr. transl., vi. 69, 320; Riḍā Kūli Khān, ix. 2 is wrong in giving the date 969). In 995 (1587), Šāh ʿAbbās I finding them too numerous divided the tribe into three groups: 1. at Merw against the Uzbegs; 2. at Gandja and Eriwān; 3. at Astarābād in the fortress of Mubārakābād which he had just built; those who established themselves in the high part were given the name *Yokharibash*; those who lived in the lower part adopted the name *Ashak bash*. The object of settling them in this region was to protect it from the inroads of the Turkomans from beyond the frontier.

A member of the Astarābād branch was Faṭḥ ʿAlī Khān, the son of Šāh Kūli b. Maḥdī Khān b. Walī Khān b. Muḥammad Kūli. To avenge the death of his two brothers he seized Astarābād. In 1135 (1723) he went to the defence of Isfahān against the Afghāns at the head of 1000 horsemen; but being denounced to Šāh Ḥusain as dangerously ambitious he returned to his province, abandoning the Šafawī king to his unfortunate destiny. Called to their help by the people of Ray, he fought without success against the Afghāns at Ibrāhīmābād in Warāwin, and returned to Māzandarān to offer his services to Šāh Tahmāsp. During the advance on Meshhed he was executed by order of Tahmāsp's general Nādir (the later Nādir Shah) on 14th Safar 1139 (12th 1139 Oct. 1726) (Maḥdī Khān, *Tarikh-i Nādirī*, Tibriz 1266, p. 21).

His son Muḥammad Ḥasan Khān, pursued by Nādir Shah, took refuge with the Turkomans, collected supporters there and recaptured Astarābād, which he lost a little later again; it was then that the two obelisks of decapitated heads were built (*Kellmanār*) which Ilanway saw (illustration in *Historical Account of British Trade*, London 1753,

vol. 1., reproduced in Sykes, *History of Persia*, 2nd ed., ii. 270). Muḥammad Ḥasan went to the tribe of Dāz, who expelled him under threats from Nādir. He then lived in the desert, where he heard by chance of the assassination of Nādir Shāh. He thereupon retook Astarābād (1166 = 1747). He was next attacked by Karīm Khān Zand, who besieged him for 40 days, then raised the siege and abandoned his camp (1165 = 1752). In 1168 (1755), Aḥmad Shāh Durrāni [q. v.] seized Meshhed and sent Pesend Khān at the head of 15 000 horsemen to attack Muḥammad Ḥasan's possessions, but this army was defeated at Sabzawār. Muḥammad Ḥasan followed up this success by conquering Kāzwin and Gilān. He marched on Isfahān. Karīm Khān lost the battle of Gulnābād, fought four parasangs from this town, and fled to Shirāz. In 1169 (1756) he seized Ādharbaidjān, where the Afghān Azād Khān was in command; he annexed this province in 1170 (1757) and appointed as its governor his son Agha Muḥammad Shāh, then aged 18. Next year he marched on Shirāz but his army melted away owing to scarcity of provisions. He then had to suppress several local revolts. His troops, exhausted by their continual marches, abandoned him; he returned to Astarābād with a body of *Ashakhash* and his own private servants. Defeated in a fight with Shaikh 'Alī Khān in the desert of Kāraḳ, the feet of his horse sank in the mire and in this position he was killed by the Kurd Sabz 'Alī, one of his servants who had gone over to the enemy (1171 = 1758).

Husain Kulī Khān, second son of the preceding, surnamed Djahān-Sūz on account of his courage and fearlessness, entered the service of Karīm Khān who also attached to his court Agha Muḥammad Khān then aged 30. The latter went to Shirāz; his family settled in Kāzwin. Appointed governor of Dāmghān, but carried away by his ambition, Husain Kulī attacked Astarābād and there gave himself up to it to plunder and massacre. He seized Māzandarān and surprised at Bārfuriṣh, the capital of Māzandarān, the governor appointed by Karīm Khān, Mahdī Khān. He was shot in his tent by rebel Yomūt Turkomans at the age of 27. He was the father of Faṭh 'Alī Shāh [q. v.].

Kādjār Dynasty.

Faṭh 'Alī Khān, born 1097 (1685) or 1104 (1693); accession 1133 (1721); died 1139 (1726—27); buried at Khwādja Rābī, near Meshhed.

Muḥammad Ḥasan Khān, born 1127 (1715); accession 1164 (1751); died 1172 (1758—59); buried at Shāh 'Abd al-'Azīm.

Husain Kulī Khān, surnamed Djahān-sūz, born 1164 (1751); accession 1184 (1770); died 1191 (1777); buried at Astarābād.

1. Agha Muḥammad Shāh, born 1155 (1742); accession 1193 (1779); died 1211 (1796—97); buried at Nadjaf (Meshhed 'Alī).

2. Faṭh 'Alī Shāh, born 1185 (1771); accession at Tehcīn 1212 (1797—98); died 1250 (1834) at Kūmm. — 'Abbās Mirzā, *nā'ib al-salṭana*, born 1203 (1788—89); died in Khorāsān before his father (1249 = 1833—34); buried at Meshhed.

3. Muḥammad Shāh, born 1222 (1807); accession 1250 (1834); died 1264 (1848); buried at Kūmm.

4. Nāṣir al-Dīn Shāh, born 1247 (1831—

32); accession 1264 (1848); assassinated in 1896.

5. Muẓaffar al-Dīn, born 1269 (1853); accession June 8, 1896; died 14 January 1907.

6. Muḥammad 'Alī, born 1289 (1872); accession January 19, 1907; abdicated July 16, 1909.

7. Aḥmad Shāh, born 1314 (1898); attained his majority in 1914.

KĀDR (A.) another pronunciation of KĀDAR [q. v.].

KĀDRĪ, a Persian poet who commemorated the capture of the island of Kishm and of the town of Hormūz by 'Abbās I in two short epic poems, *Djāngnāma-i Kishm* and *Djārišnāma*. The former is edited by L. Bonelli in the *Rendicenti della R. Acad. dei Lincei*, vi., Semester 1, fasc. 8. Cf. Ethé in the *Grundriss der iran. Phil.*, ii. 237.

KĀF, the 22nd letter of the usual Arabic alphabet (numeral value 20; cf. the article *ABJAD*). The pronunciation of *kāf* as an unvoiced palatal explosive, found as early as Sibawaihi, has survived in modern academic speech. In the present day popular speech we find some variants (in addition to *k*) notably the affricate *č* (< *c'* < *k'*). Cf. the article ARABIA, ARABIC DIALECTS, i. 396^b; and Schaade, *Sibawaihi's Lautlehre*, Index.

(A. SCHAADÉ.)

KĀF, the 21st letter of the usual Arabic alphabet (numerical value 100; cf. the article *ABJAD*). The form of the character goes back to the Nabataean *kāf* and later in Arabic was assimilated in form to *fā*, so that it had to be distinguished from the latter by pointing (cf. the article ARABIA, ARABIC WRITING, i. 383^b and plate I). In Sibawaihi's time *kāf* was pronounced as a velar *g*. This pronunciation is still frequently found among Beduins and peasants; in the ordinary popular language, however, *kāf* is usually pronounced as *hamza*; for other modern popular pronunciations of *kāf* see the article ARABIA, ARABIC DIALECTS, i. 396^b. The modern academic pronunciation is *k* (i. e. velar *k*). Cf. Schaade, *Sibawaihi's Lautlehre*, Index. — Kāf is also the title of Sūra l. of the Qur'ān. (A. SCHAADÉ.)

KĀF in the cosmology of Islām is the name of the mountain range surrounding the earth. On the shape of the earth there were different opinions among the later Muslims:

cf. al-Kāzwinī, i. 143 sq.; al-Dimashqī, *Nukhbat al-Dahr* (ed. Mehren), p. 9; Ibn al-Wardī, *op. cit.*, p. 9 and thereon Zenker in Lane, *op. cit.*, ii. 229, 231 sq.; Reinaud, *op. cit.*, i. p. clxxxi sq. and Radloff-Hochheim in the *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, xlvii. 220. Like the Hebrews and the Greeks in the period of Homer, Hesiod and the Ionian physicists, the ancient Arabs usually regarded the earth as a quite fiat, circular disc. Muḥammad, to judge by passages in the Qurʾān, entirely agreed with this view. The view held in the sacred revelation as well as in Tradition is still shared in Muslim countries by great masses of believers. The mountain Kāf is separated from the disk of the earth by a region impassable to men. This, according to a statement of the Prophet (see the Persian version of al-Ṭabarī, *op. cit.*), is a dark stretch which it would take four months to cross. Another view connected with Greek and Iranian ideas regards the earth as immediately surrounded by a stinking, unnavigable body of water called *al-Baḥr al-Muḥīt* or *Uḡyānūs* (Okeanos), which in whole or part is veiled in deep darkness and whose shores no one knows (cf. Abu l-Fidāʾ, *op. cit.*, p. 19; al-Kāzwinī, i. 104, 10; Ibn al-Wardī, p. 73; Zenker in Lane, *op. cit.*, p. 232, 234; Reinaud, *op. cit.*, ii. 1., p. 23 sq.). The whole, earth and sea, is then held together by the mountain wall Kāf as by a ring.

From the descriptions given notably by Yāqūt, al-Kāzwinī and Ibn al-Wardī, Kāf is a formation of green emerald, the reflection of which causes the green (to us: blue) of the heavens. Slightly diverging from this, another version says that only the rock (*al-sakḥra*) on which the mountain Kāf proper rests is of a kind of emerald. This rock is also called *al-watal*, the peg, because God created it as a support for the earth. The earth cannot support itself by its own strength — so some think —, it therefore requires a prop like this. If Kāf did not exist, the earth would — as the Persian version of al-Ṭabarī says — be constantly trembling and no creature could live on it.

There were, however, more complicated views regarding the "bearers" of the earth. As the earth — so relates a tradition in al-Kāzwinī, i. 145, 16 sqq.: — at first swayed to and fro unsteadily, God created an angel who took it on his shoulders and held it with his hands (a reminiscence of the heaven-supporting Atlas). This angel stands on a quadrangular block of green jacinth which in its turn is borne by a gigantic bull, which rests on a fish swimming in the water. Ibn al-Wardī (p. 12, 15 sq.) gives a similar account, emphasising that Kāf arises out of the above mentioned block of jacinth. Another variant in Ibn al-Wardī (p. 13, 17 sq.) gives a still larger number of earth-bearers (but leaving out the angel) partly in a different order, for example, the rock supports the bull. For further variants see Wensinek, *The Ocean* etc., p. 18 (and the quotation in note 2), also J. Meyer, *Die Hölle im Islam* (Basel 1901), p. 46. The Muslim Persians describe the animal supporting the earth sometimes as a bull (cf. Ḍjāmī, *Yūsuf u-Zalikhā*, ed. Rosenzweig, Vienna 1824, p. 13, 5 sq., and thereon Rosenzweig, *op. cit.*, p. 190b; Vullers, *Lex. Pers.-Lat.*, ii. 946a), sometimes as a monster, half bull and half fish (*gāwī māhī*; Firdawsī, *Shāhnāma*, ed. Vullers, p. 38, l. 59; 444, l. 190, and cf. Vullers, *Lex.*, ii. 947a). Baghdād folklore also

knows the bull and fish as bearers of the earth; cf. H. Petermann, *Reisen im Orient*, ii. (Leipzig 1861), p. 301. Among the inhabitants of the Red Sea coast, the belief prevails, that the earth rests on the backs of colossal bulls, see E. Ruppel, *Reise in Abyssinien*, 1. (Frankfurt a. M. 1838), p. 256. Al-Kāzwinī gives for the bull and fish the names of the Biblical monsters, Leviathan and Behemoth, and thus shows definitely that the Muslim idea is connected with the old Biblical views, which again can in the last resort be traced to the Babylonian Chaos-tradition. The basic idea of the bull supporting the earth is, as Reinaud (*op. cit.*) has emphasized, also to be found in India. The rock already mentioned as supporting the earth and as the starting point of the mountain Kāf may well be associated with the stone *Shetiyya*, which Jewish legend regards as the navel-stone of the earth sunk by God in the depths of chaos or primeval ocean, and as the support of the world. For the Jewish legend cf. Feuchtwang in the *Monatsschrift für Gesch. u. Wissensch. des Judentums*, liv. (1910), p. 724 sq.; W. H. Roseher, *Neue Omphalos-Studien* (*Abhandl. d. sechs. Gesellsch. d. Wiss.*), xxxi. (1915), p. 73 sq. It may be added that a tradition in al-Kāzwinī (i. 144, 23) also gives the view that God made the world stand without any band or support.

According to a very popular idea, Kāf is the origin of all the mountains of the world. They are connected with it by subterranean branches and veins; if God wants to destroy any region, he simply orders one of these branches to be set in motion, which causes an earthquake. According to a different popular view, an earthquake is caused because the bull supporting the earth sometimes trembles under its burden.

Kāf which is inaccessible to man is regarded as the end of the world; its name is therefore used as a symbol for this; cf. e. g. a verse in Ḍjāmī's *Yūsuf u-Zalikhā* (ed. Rosenzweig), p. 1, 14. This mythical mountain forms the boundary between the visible and the invisible world. No one knows what lies behind; God alone knows the creatures that live there. Many say (cf. Ibn al-Wardī, p. 188) that the arca behind Kāf belongs to the next world, is a land white like silver, 40 days' journey long and is the abode of angels. According to an alleged saying of Muḥammad (see Zenker in Lane, *op. cit.*, p. 236), there are still other lands beyond Kāf: one of gold, 70 of silver, 7 of musk, each 10 000 days' journey long and broad and all inhabited by angels. It is also said that Kāf as well as the region behind it is the abode of the Djinn. Kāf itself is especially known as the abode of the fabulous bird Simurgh, a kind of vulture, which is essentially the same as the *ʿanḳāʾ* [q. v.] of the Arabs. Existing since the beginning of the world, this marvellous bird retired in monastic solitude to Kāf and lives there contented and satisfied, a wise councillor consulted by the kings and heroes of the past. Kāf, his residence, is therefore simply called "Mount of Wisdom" in poetry, symbolically also "Mount of Contentment". In his celebrated work, *Manṭiq al-Tair* ("The Dialogues of the Birds"), the Persian poet Farid al-Dīn ʿAṭṭār [see ʿAṭṭār] describes the wandering of the Ṣūfī through the seven stages which the soul has to pass through till its complete merging into God, in the allegory of a very difficult, adventurous flight by a bird through

the seven valleys' up to Mount Kāf, the throne of its all wise king Simurgh.

Kāf plays a part also in Arab fairy tales; in the *1001 Nights* it is several times mentioned. Oddly enough a number of Kur'ān expositors explain the title of Sūra l., the letter Kāf, as the name of the mountain Kāf.

In a narrower sense and localised on the earth, Kāf means that part of the Asiatic highlands which bounds the Muslim world in the North, especially the Caucasus and its spurs in Northern Persia. For this reason Demāwēnd, the scene, celebrated in the *Shāhnāma*, of the wonderful exploits of old Persian rulers and heroes is represented as the home of the Simurgh [see i. 937^b].

There can hardly be a doubt that the Muslim idea of the mountain Kāf in the wider (mythic) and narrower sense is borrowed in its main features from the Persians. With them Alburz (Alburd), old-Persian Hara-berezaiti ("the high mountain"), is originally the mythical mountain at the end of the earth which, like the Hellenic Olympus, also contains the palaces of the Gods. From the Avestan account one must regard the Hara-berezaiti as the backbone of the mountain system of the earth; for all other mountains of the world have grown out of it by subterranean connections. The Hara-berezaiti was imagined to be a range of mountains enclosing not only the whole earth but also a lake, named Wurukasha, which is likewise at the end of the earth, but according to the *Bundehesh*, does not surround it. In the geography of this Pchlewi work moreover the name of Mount Kāf is actually found; cf. Windischmann, *Zoroastrische Studien* (Berlin 1863), p. 7, 73, 75 Note 1. Alburz was next located on the earth itself and identified with the mountain-wall which encloses the world of Iranian civilization in the north. The name Alburz (Elburs) is thus found in several places to-day as the name of a mountain or range on the borders of the Iranian linguistic area, notably as the name for the chain which culminates in Damāwand. (cf. ALBURZ, i. 251). It should be emphasised that Yāqūt (*op. cit.*) expressly says that Kāf in ancient times was called Alburz; see also Mustawfi, *Nuḥat al-Kulūb* (Gibb Mem., xxiii, i.), p. 191 sq. Geiger (*op. cit.*, p. 51) thinks that Lake Wurukasha originally meant a definite locality (Lake Aral or the Caspian Sea), but as early as the *Avesta* it often appears removed into the region of myth. On Haraberezaiti-Alburz and Wurukasha (Vārukasha) cf. Ritter, *Erdkunde*, viii. 42 sq.; Fr. Spiegel in *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, vi. 85, and in *Iranische Altertumskunde*, i. 191 sq. (Leipzig 1871); W. Geiger, *Ostiran. Kultur im Altertum* (Erlangen 1882), p. 42 sq.; F. v. Andrian, *Der Höhenkultus asiatischer u. europäischer Völker* (Vienna 1891), p. 287 sq.

An idea nearly related to that of the Iranian cosmology is found among the Hindus also. In their literature, especially in the *Purāṇas* mention is made of the fabulous mountain girdle Lokāloka, which separates the visible world from the invisible world and beyond which nothing but darkness reigns. On Lokāloka cf. Spiegel in *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, vi. 86, and J. Dowson, *Classical Dictionary of Hindu Mythology* (London 1879), p. 180. According to the teaching of the Jains, the ring-shaped moun-

tain Mānūṣottara, that lies in the centre of the continent Puṣkaravara, is the limit of mankind; cf. Jacobi in *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, ix. 312.

That the Muslim idea of Mount Kāf possesses its prototypes in the analogous Indian and Iranian ideas of the mountains bounding the world, Lokāloka and Haraberezaiti-Alburz, was previously pointed out by Gesenius (*op. cit.*, p. 317) and Rosenzweig (*op. cit.*, p. 185).

Closely connected with the Muslim view is that of the Mandaeans. According to them (cf. H. Petermann, *Reisen im Orient*, ii. (Leipzig 1861), p. 452), the disk of the earth is surrounded by the ocean except on the north where a great mountain of rock of the purest turquoise cuts off the sea. Immediately adjoining this turquoise mountain, the reflection of which causes the blue of the sky, lies the purc world stretching to the north. Very probably the Mandaeans got their idea from Muslim sources. The contrary view of de Goeje (Tabari, *Annales*, Introd., p. cdxxxvii) that the Arabs got the idea of Kāf from Mandacan mythology, seems less plausible.

The idea of a frontier range to be located in the north, as found in the narrower interpretation of the ideas of Haraberezaiti-Alburz and Kāf (cf. especially the Mandaean legend) was widespread in Asia, notably among the peoples of the ancient East. It probably owed its origin to Babylonian cosmology, which locates its cosmic mount of the gods in the north; on the Babylonian-Assyrian view cf. Fr. Delitzsch, *Wo lag das Paradies?* (Leipzig 1881), p. 29, 117 sq.; Fr. Hommel, *Aufsätze u. Abhandl.*, ii. (Munich 1900), p. 345 sq., and Zimmern in *Die Keilschriften und das Alte Testament* (3rd ed., Berlin 1903), p. 353, 355, 620. The traces of the existence of a similar view among the ancient Hebrews can still be seen in the Biblical books (cf. especially Isaiah xiv. 13); cf. thereon W. Gesenius, *Commentar über den Jesaia*, ii. (Leipzig 1821), p. 316 sq., where the analogous non-Biblical views are fully discussed; Dillmann-Kittel, *Der Prophet Jesaia* (7th ed., Leipzig 1898), p. 134. Among the Hindus Meru which, according to the usual Buddhist view, is the centre and navel of the earth (cf. W. Foy in *Festschrift E. Windisch*, Leipzig 1914, p. 213 sq.; E. W. Hopkins, *Epic Mythology*, Strassburg 1915, p. 253, Index, and Roscher, *Neue Omphalosstudien*, Leipzig 1915, p. 72), is sometimes also interpreted as the Himalaya mountains bounding India on the north. For the Greeks, the mount of the gods, Olympus in Thessaly, marked the north frontier of their home.

(M. STRECK.)

KAFA or **KAFFA**, also written **AL-KAFA**, a mediaeval town on the south shore of the Crimean peninsula, called in ancient times and again at the present day Theodosia (originally a Milesian colony). The name *Kāfz*, *Kāfā* or *Kāfz*, is first found in Konstantinos Porphyrogenetos (*De administr. imperio*, Ch. 53). Sauromates V, king of Bosphorus, is said to have been killed there in the fourth century in single combat with Pharnaces of Chersonesus. The view has been put forward (F. Koppen, *Krimskiy Sbornik*, St. Petersburg 1837, p. 107) that the name may be identical with the *κῆφος* mentioned in Strabo, Ch. 312. With these exceptions, Kafa is never mentioned till the xiiith century. As a harbour on the south coast of the Crimea, for trading-vessels as well as for war-ships, we always find *Sughdāk* (even as late as the reference in *Recueil de Textes rel. à l'Hist. des Seldjoukides*, ed. Houtsma, iii., iv. see, Index), the modern Sudak.

Kafa only rose to prominence in the second half of the xiiith century, when the Genoese established themselves in the Crimea after the republic of Genoa had purchased this place from a Tatar chief. This chief is usually believed to have been the *Ūrān Tīmūr*, mentioned by Abu 'l-*Ghāzī* (ed. Desmaisons, p. 173), son of *Tūkāi Tīmūr*, and grandson of *Djūi*, to whom the *Khān* Mongke *Tīmūr* (1266—1280) had granted Kafa and the Crimea; the name is written by Abu 'l-*Ghāzī* (p. 178), *Ūz-Tīmūr*, by *Rashid al-Dīn* (ed. Blochet, p. 126), *Ūrang Tīmūr*; but a consul of Kafa is mentioned as early as about 1263. It was not till the xvth century that "Gazaria" or "Gazzaria", the colony founded by the Genoese on the Black Sea with Kafa as its capital, became of considerable importance. It was controlled by the "officium Gazariae" in Genoa and its statutes (1316); the administration remained in the hands of the metropolises with a limited participation by the local population. The statutes of 1290 and 1316 expressly forbid the minting of a local currency but in the xvth century this was, in practice at least, allowed; the coins (with Latin and Tatar inscriptions) bear the badge of Genoa (after 1453, when the administration of the colony was placed in the hands of the Bank of St. George, the representation of this saint) as well as the seal (*tamgha*) of the Golden Horde (afterwards the *tamgha* of the *Girāy*; cf. ii. 171^b). After 1318 Kafa appears as the see of a Catholic Archbishop, whose diocese comprised the whole area from Varna to Sarāi on the Volga and from the Black Sea to the Russian dukedoms. Ibn Baṭṭūṭa (about

1330) describes Kafa as "one of the famous ports of the world" (ed. Defrémery and Sanguinetti, ii. 358: *mun marāsi 'l-dunya 'l-shahira*) of his time. In the harbour there were about 200 naval and mercantile ships. The Muhammadans there had their mosque and *kādi*. By the treaty of 1380 however, the Tatars could only live in the suburbs beyond the city walls; this limitation seems to have again been removed later. In the statutes of 1449 it is only laid down that Tatars living in Kafa are not to be subject to the *Titanus seu vicarius* i. e. the *Tudun* of the *Khān* of the Crimea. The fortifications still in existence belong in part to the period 1341—48 (successful wars against the *Khān* of the Golden Horde, *Djānibeg*), in part to the period 1383—86 (building of the city-walls as a protection, not only for the city proper (*burgus*), but for the suburbs (*antiburgi*) also. About 1470 the population is said to have been 80,000. As early as a letter from the Bank of St. George to the Pope Calixtus VI (1455—58), of Nov. 1, 1455, in which attention is drawn to the danger threatening the Black Sea colonies from the Turks, Kafa is described as *non ambitu quidem moenium sed populorum multitudine Constantinopoli facile praeferenda*.

The Turkish conquest, inevitable after the fall of Constantinople (1453) and Trebizond (1461), could not be long averted by the Christians of the Latin East either with their own forces or the oft summoned help of the *Girāy* (to whom Kafa was in some degree dependent from 1434, when a Genoese army was defeated by *Hadjdī Girāy*). In 1475 the whole peninsula had to submit to the Turks; the south shore with Kafa was directly incorporated in the *Sultān's* empire and divided into three *kādi*lik (*Kafa*, *Mankūb* and *Sudāk*) with a *Pasha* in Kafa. Under *Bāyazid II* (1481—1512), at the time of the first Russian embassy (1498), this office was filled by a son of the *Sultān*, *Muḥammad* (this information does not seem to be found in Turkish sources, as it is only given by von Hammer, *Gesch. der Osmanischen Reiches*, 2nd ed., Pest 1834—36, i. 646, from *Karamzin*, *Ist. Gos. Ross.*, 2nd ed. St. Petersburg, 1818—29, vi. 169 sq. = *Gesch. des Russ. Reiches*, transl. from the 2nd edition, Riga 1824, vi. 215). For a short period the revenues of Kafa were occasionally surrendered to the *Girāy*; Kafa appears as a mint of the *Girāy* under *Mengli Girāy* from 899—906 (1493—1501) and again not till the reign of *Shāhin Girāy*, regnal years 5 and 6 i. e. 1195, 1196 (1781—82).

Under Turkish rule Kafa (Turkish pronunciation *Kefe*) gradually assumed the appearance of a Muhammadan town, although many Christian churches remained in existence. The most detailed description is by *Dortelli d'Aseoli* 1634 (Russ. transl. in *Zapiski Odeskago Obshch.*, etc., xxiv.; text publ. by *Dashkewich* in *Čteniya w. istor. obshch. Nestora Ietopisca*, Book 5), who had spent over ten years in the Crimea at the beginning of the xviith century. There were then in Kafa 70 mosques, 2 synagogues (one for Rabbaites and the other for Karaites), 15 Greek, 28 Armenian (according to *Beauplan* [1660], 12 Greek and 32 Armenian) churches and only one Catholic. The principal mosque (*buyuk džami*), later described by *Pallas* in 1794 (*Bemerkungen auf einer Reise in die südliche Statthaltschaften des russ. Reiches i. d. J. 1793 u. 1794*, Leipzig 1801, ii. 262), stood

in the centre of the town; the dome of the main building, over 65 feet in diameter, was surrounded on three sides by eleven smaller cupolas; the two minarets were 115 feet high. A decline in the prosperity of the town under Turkish rule was noticed by Broniewski as early as 1578; as the world's trade had taken other routes, the shores of the Black Sea no longer had their former importance; yet to the end of Turkish rule Kafa remained the most important harbour on the north side of the Black Sea. Chardin (*Voyages*, Amsterdam 1735, i. 46 sq.) says that in his 40 days' stay there (Aug.—Sept. 1672) he saw nearly 400 ships arriving and departing. In the town there were then about 4,000 houses of which 3,200 were Muslim and 800 Christian; there were no stone buildings with the exception of 8 churches in ruins (apparently dating from the Genoese period). Even in the xviiith century Kafa was still compared with Constantinople by the Turks and called Little Stambul (*Kuçük İstambul*).

In 1771 Kafa was taken for the first time by the Russians, but not finally incorporated in the empire till 1783. According to the oldest Russian plan of the city, there were then 29 mosques, 13 Greek and 22 Armenian churches, and 813 houses of which 694 were Turkish. In the description of the journey of the Empress Catherine in 1787 we already find the old Greek name (Russ. Feodosia) reappearing; the town is later called Kafa again and only definitely renamed in 1804. In the very early years after the conquest began the forced migration of the Turks and the voluntary of the Tartars; about 1794 (Pallas) Kafa had already "from a once celebrated and populous town become almost a mound of stones". About 1802 it is said to have had only 200 inhabitants. The Russian harbour of Feodosia, whose prosperity only began in the last decade of the xixth century (railway connections, building of commercial docks, Sebastopol being the naval port), must thus be regarded as a new foundation on the site of the Turkish Kafa. The number of the inhabitants, according to the census of 1899, was 27,238 (in 1894, only 17,000), of whom only 3,200 were Tatars. The Museum (founded in 1811) contains many inscriptions and other antiquities, particularly from the Genoese period.

Bibliography: cf. BAĞIÇE-SARAI [i. 563^a]; the works, mentioned there, by Broniewski, Pallas, etc., as well as the *Zapiski Odesskago Obščestva Istorii i Drevnosti* are indispensable for the study of the history of Kafa. In the *Zapiski* (from Vol. ii. to xxiv) the material from the archives of Genoa published in Italy (*Atti della Società Ligure di storia patria*) is utilised. On the coins: O. Retowski, *Genuesko-tatarskiya moneti goroda Kafki* (Simferopol 1897 and 1898). Cf. also F. Brun, *Černomor'ye*, i. (Odessa 1879), chap. 11 (*O poseleniakh ital'yanskikh v Gazarii*); J. Kulakowski, *Proshlye Tavriidi*, 2nd ed. (Kiev 1914). An attempt at a connected survey is W. K. Minogradov, *Feodosiya (Istoričeskii Očerok)*, 2nd ed. (Jekaterinodar 1902). Cf. also M. G. Canale, *Della Crimea* (Genoa 1855) and Heyd, *Hist. du Commerce du Levant* (Leipzig 1885/6), Ind. s. v. *Caffa*. (W. BARTHOLD)

KAFĀLA (A.), the pledge given by any one (the *kafil*) to a creditor (the *makfūl lahu*) to secure that the debtor (the *makfūl bihi*) will be present at a definite place e. g. to pay his debt

or fine or, in case of retaliation, to undergo punishment.

If the *makfūl bihi* is not there at the time arranged, the guarantor can be kept prisoner till the debtor comes or until it is proved that he cannot come (e. g. because he is dead).

As to the question whether the guarantor is bound to pay for the *makfūl bihi* or to suffer his punishment, the opinions of the different *madhhab*'s vary. According to the *Shāfi*'i school, he is not bound to do so, not even if he has expressly bound himself to do so.

Bibliography: al-Bādjūrī, *Hāshiya 'alā Sharḥ Ibn Kāsim al-Ghazzī* (Bulāḳ 1307), i. 395 sq.; E. Sachau, *Muhammedan. Recht nach schafiitischer Lehre*, p. 405 sqq.; al-Dimashkī, *Rahmat al-Umma fi 'khiṭāf al-A'imma* (Bulāḳ 1300), p. 81; A. Querry, *Droit musulman*, i. 483—486. (TH. W. JUYNBOLL.)

KAFF (A.), a technical term in Arabic prosody. It means the dropping of the seventh, vowelless consonant of a foot, which ends with *sabab khafif* (see the article 'ARŪḌ, i. 463^b). The following feet are liable to *kaff*: 1. *maf'ūlun*, provided that the *z* remains (> *maf'ūlu*); 2. *fā'ilātun* and *mustaf'ilun* (the latter in the *khafif*), provided that the next foot beginning with a *sabab khafif* does not suffer *khafn* (> *fā'ilātu*, *mustaf'ilu*). [In the last mentioned case four short syllables would follow in succession! Editor]. *Kaff* is therefore found in the metres *farwīl*, *madid*, *ramal*, *khafif*, *hazaj mudārī* and *mudjathth*.

Bibliography: See the article 'ARŪḌ. (MOH. BEN CHENEB.)

KAFFĀRA (A.), atonement, expiation, literally, what "covers" the sin. The *kaffāra* has usually to consist in releasing a Muslim slave or — for those who are not sufficiently well off — in a three days' (and in some cases even two months') fast or as a substitute — for those who are not able to fast — in bestowing food or clothes on a definite number of poor people (from 10 to 60).

In some cases the *Qur'an* has already prescribed a definite *kaffāra* for the sinner, e. g. *Qur'an* iv. 94, after killing by accident or by design, *Qur'an* v. 91, to avert the evil consequence of breaking an oath, *Qur'an* lviii. 4 sq., if a man by pronouncing the old Arab *zihar* formula has sworn to refrain from all sexual intercourse with his wife.

These and many other cases (e. g. the breaking of the fast prescribed in the month of Ramaḍān by fornication or marital intercourse during the day) were afterwards more precisely defined by the *faḳih*'s and fully described in the *fiḳh* books of the different *madhhab*'s.

Bibliography: Ibn Kāsim al-Ghazzī, *Fath al-Karib*, ed. L. W. C. van den Berg, p. 262, 266, 500, 568, 662; Th. W. Juynboll, *Handb. des islamischen Gesetzes*, p. 122, 225, 267, 298. (TH. W. JUYNBOLL.)

KAFĪL. [See KAFĀLA.]

KĀFIR (A.), originally "obliterating, covering", then, "concealing benefits received" = "ungrateful"; this meaning is found even in the old Arab poetry and in the *Qur'an*, *Sūra* xxvi. 18. In the *Qur'an* the word is used with reference to God: "concealing God's blessings" = "ungrateful to God", see *Sūra* xvi. 57 and xxx. 33: "That they are ungrateful for our gifts"; cf. also *Sūra*, xvi. 85. The next development — probably under

the influence of the Syriac and Aramaic where the corresponding development took place earlier — is the more general meaning of "infidel" which is first found in Sūra lxxiv. 10 and is henceforth very common; plural *kāfirūn* or *kuffār*, once (Sūra lxxx. 42) *kafara*. The term is first applied to the unbelieving Meccans, who endeavour to refute and revile the Prophet: Sūra i. 2 and elsewhere. The subject of incredulity is sometimes more nearly defined with added *bi-*, e. g. Sūra xxxiv. 33: "We do not believe in your mission"; Sūra vi. 89. In the early Meccan period a waiting attitude towards the unbelievers is still recommended (Sūra lxxxvi. 17; lxxiii. 10 sq.; see also Sūra cix. entitled *al-Kāfirūn*), but later the Muslims are ordered to keep apart from them (Sūra iii. 114, also 27), to defend themselves from their attacks and even to take the offensive against them (Sūra ii. 186 and elsewhere). In most passages the reference is to unbelievers in general, who are threatened with God's punishment and Hell (cf. the article *DAHANNAH*).

In the literature of Tradition also the hadiths — with minute elaboration in details — deal partly with the fate of the *kāfir* on the day of judgement and his punishment in hell, and partly with the believer's attitude towards him. For the rest they reflect the great controversy in early Islām on the question whether a Muslim should be considered a *kāfir* for committing a "major sin" (cf. al-Bukhārī, *Kit. al-Imān*, Bāb 22). Thus we find hadiths such as: "If a Muslim charges a fellow Muslim with *kufir*, he is himself a *kāfir*, if the accusation should prove untrue"; or "The reproach of *kufir* is equivalent to murder" etc. Nevertheless, *kāfir* in theological polemics is a fairly frequent term for the Muslim protagonist of the opposite view.

Eternal damnation for the *kāfir*, has remained an established dogma in Islām. In the dogmatic controversies of the early centuries the reasons were discussed for which a Muslim could be identical with a *kāfir* and have to suffer eternal punishment. The most tolerant is the view of the Murdji'a that all the Ahl al-Kibla, even if they commit a mortal sin (*kabīra*) are to be considered believers and their ultimate fate is to be left to God. The most striking contrast to this is the strict view of Khāridjīs (and Ibādīs) that every Muslim, who dies with a mortal sin — and this means with them every sin which has not been repented of — on his conscience, is to be considered just a *kāfir*. Intermediate is the opinion of the Mu'tazila, who for this special case assume an intermediate between believer and unbeliever, the so-called "rejected" *fāsiq* (cf. the article *IMĀN*. — According to Nallino, in the *Riv. degli Studi orientali*, vii. 436 sqq., the names Mu'tazila, Murdji'a, etc. [q. v.] are probably closely connected with their attitude on this point).

According to the *Lisān al-ʿArab*, vi. 459 sq., the following kinds of unbelief are distinguished 1) *kufir al-inkār* = neither recognising nor acknowledging God; 2) *kufir al-djuhūd* = recognising God, but not acknowledging Him with words, that is remaining an unbeliever in spite of one's better knowledge; 3) *kufir al-mu'ānada* = recognising God and acknowledging Him with words but remaining an unbeliever (obdurate) out of envy or hatred; 4) *kufir al-nifāq* = outwardly acknowledging, but at heart not recognising God

and thus remaining an unbeliever, that is being an hypocrite [cf. *MUNĀFIQ*].

In the systematic Fikḥ books the *kuffār* are discussed in the following passages: 1) in the *Kitāb al-Taḥāra*. For the opinion deduced from Sūra ix. 28 that the unbeliever is unclean, we find all views represented, from the strictest to the most tolerant; just as on all questions of purity, the strictest is the Shī'a which reckons the unbeliever among its *dah nadḡasat*; but on this point al-Nawawī, for example, was particularly lenient; he considers the believer and unbeliever equal as regards purity. The Ahl al-Kitāb [q. v.] are usually regarded more leniently than other *Kuffār*; for their benefit for example the questions of the *ḡhabā'ih* and of *munākaḡa* with Muslims are discussed. — 2) In the *Kitāb al-Djihad* (*wa 'l-Siyar*). The *djihad* [q. v.] against the unbeliever inhabitants of the *Dār al-Ḥarb* [q. v.] is a *farḡ 'ala 'l-kifāya*. The Ahl al-Kitāb again occupy a special position as by paying *djizya* and *ḡharāḡi* [q. v.] they become dhimmī's [see *DHIMMA*] and can receive *amān*. [q. v.]. These categories of unbelievers in the *Dār al-Islām* called *dhimmī* and *musta'min* have a legal claim to protection. Another class also distinguished from the mass of the *kāfirūn* are the renegades [see *MURTADD*] for whom the law prescribes death, with the opportunity first of obeying a demand to return to Islām. The others, the unbelievers proper, who in this sense are also called *kāfirūn aḡliyyūn* (or *mushrikūn*, in the narrower sense) have only to expect death or slavery [see *ABD*] if they fall as prisoners of war into the hands of Muslims; if they are fortunate, they may be exchanged or released. (In many cases, e. g. in the gradual advance of Islām into Africa, the distinction between renegades and pagans was difficult to ascertain and there are writings extant which deal specially with this question, cf. Ibn Ḥaḡjar al-Haitawī, *al-F'tām bi Ḳawāḡi 'al-Islām*, lith. 1293). — 3) In several further points the law discriminates between *kuffār* and believers; the very strict interpretation of the law is however in practice only held by a small minority.

To understand the historical development in the attitude of Islām to the unbeliever, it should be observed that it was settled in the early centuries not so much by religious as by political and social conditions. Even down to the time of the Crusades there prevailed in Islām a tolerance towards the unbeliever, especially the Ahl al-Kitāb, such as is impossible to imagine in contemporary Christendom. We find for example Christians in the highest official positions. In this early period there is no question of any religious fanaticism towards unbelievers. It was only aroused and nourished by the repeated wars with unbelievers (Crusades, wars with the Turks). War-psychology, on the other hand, at the time of the wars between Persia and Turkey could even bring it about that the Persians were called *kuffār* in Turkish *setwās* etc. (see Pečewi, i. 311, 319), a name which the Turks themselves had applied to them in the proclamations of the Mahdī of the Sūdān.

Since at the present day the trend of affairs has apparently been quite in the opposite direction, and Muslims have been more and more impeded in carrying out measures against the *kuffār* by the political decline of Islām and the rise of unbelieving nations (pressure of the Powers, capitulations, etc.), the very feeling of impotence in face

of these facts may have contributed not a little to the strengthening of hatred and to periodical manifestations of it (in massacres etc.). This also explains the grotesque caricature of the *kāfir*, which one sometimes finds in the popular imagination at the present day (see Snouck Hurgronje, *Mekka*, ii. 48 sq.) and which is connected with the ideas of the Arch-Kāfir, Dadjdjal [q. v.] who bears *k-f-r* on his forehead (cf. Goldziher, in *Der Islām*, xi. 178).

It may also be due to the hatred of the Franks (and to dogmatic squabbles) that *kāfir* had developed into a term of abuse, so frequent in the Turkish form *g'awr* (the Persian *geber* [q. v.] is said to be the same), although in theory it is (*Zeitschr. d. Deutsch. Morg. Gesellsch.*, lviii. 562) affirmed that the Muslim commits a punishable offence if he says to the Christian or Jew: "Thou unbeliever". From the Turkish the word *kāfir* has entered into most Slavonic languages. The Spanish *cafre* and the French *cafard* also go back to *kāfir* or *kuffār*. In two cases *kāfir* has actually become a proper name, the name of a people, the Kaffirs, and of a country, Kāfiristān [q. v.].

Kāfir and *kufir* underwent a special development of meaning in the terminology of mysticism. Compare, for example, the well-known verse of Abū Sa'īd [q. v.]: "So long as belief and unbelief are not perfectly equal, no man can be a true Muslim", with the various explanations given in Muḥammad A'īn, *Dict. of Technical Terms* (ed. Sprenger, etc.), s. v., according to one of which *kufir* is just the equivalent of *īmān-i ḥaqīqī*.

KĀFIRISTĀN. The name of a mountainous tract in the Hindū-Kush situated between 35° and 36° N. and 70° and 71° 50' E., with an area of about 5000 sq. m. Till recently independent, but since 1896 a territory of Afghānistān. The northern boundary is roughly the watershed between the drainage of the Oxus and that of the Indus, the valleys to the north being occupied by Ghālā [q. v.] tribes. To the west the spur of the Hindu-Kush which runs southward from the neighbourhood of the Khāwak Pass may be considered the boundary separating it from the Pandjshir and Nidjrāo valleys. To the east and south the range between the Kunar and Bashgal valleys and those to the north of the Kunar and Kābul valleys define its limits. The country consists of numerous valleys much isolated from each other by lofty ranges, the principal rivers draining which fall either into the Kābul or Kunar rivers, and so belong to the Indus basin. The principal are the Alingār or Kāo with its tributary the Alishang, the Pēē (Kāmāh or Prēsun) and the Bashgal. The inhabitants, from their persistent paganism, have long been known as Kāfirs, and from them the name of the country Kāfiristān is derived. The name Siyāh-pōsh or "Black-clad" which properly belongs to one section only, (the others being classed together as Safēd-pōsh or "White-clad") has also been in use from an early period.

This tract was undoubtedly part of the Kushān kingdom in the early part of the Christian era, and has been identified with the mountain country of Kapiśa. The name Katūr applied to the country and its ruling tribe by Taimūr (Timūr) is identical with the title of the rulers of the neighbouring country of Citrāl, and is no doubt the same as Katir, the name of the principal tribe at the present day. It is most probably derived from the title Kidāra used by the later Kushāns. It has been thought by Wood and Yule that the wine-drinking tribes whom Marco Polo met near Casem (i. e. Kishm in the Kōkca valley) are identical with the Kāfirs, who may have at that time extended into the northern valleys of the Hindu-kush, but the first definite mention of them is in the Emperor Timūr's memoirs. On his way to invade India in 800 (1398) he turned aside into their country from the Kbāwak Pass to punish them for their raids on Andarāb. He calls them Katōr and Siyāh-pōsh. In spite of his claims to victory it is clear that a great part of his forces was destroyed in an ambushade, and he returned to Khāwak without any permanent success. Bābur in his autobiography gives a very accurate account of the country and people, many of the rivers and districts being described by names they still bear.

In more recent times Elphinstone from his observations in 1809, Masson (in 1826) and Biddulph (in 1880) collected all the information available without entering the country, and the account given by the first-named is especially valuable. The first European to penetrate Kāfiristān was Lockhart in 1885, followed by Robertson in 1889 and 1890. The last named in his work on the Kāfirs of the Hindu-Kush has given the best account available of the country and people, their customs, beliefs and organization.

In the treaty of 1893 between the Indian Government and Afghānistān, Kāfiristān was definitely left outside the British border, and the Amīr 'Abd al-Rahmān proceeded in 1896 to conquer the whole and to convert its population forcibly to Islām. The Rāmgali tribe, a branch of the Katir, was the last to submit. Robertson classifies the population under two heads, viz. the Siyāh-pōsh tribes all closely related to each other (the principal tribe being the Katir), and the miscellaneous tribes, without any special bond of union, included under the name of Safēd-pōsh. The chief of these are the Waigalis (with the Ashkun who are related to them), and the Prēsungalis or Verōn. All seem to belong to an ancient branch of the Aryan stock, and their languages are of the Pisāta family, which, according to Kuhn and Grierson, have the characteristics of a tongue spoken after the Indian family had branched off, but before the Irānian had been differentiated. The purest dialects are the Bashgali, Wai-alā and Verōn, spoken in the central parts of the country. The Gawar-bati, Kalāshā and Pashai form an outer group; the Pashai in fact being spoken in the Djalalābād valley outside the limits of Kāfiristān proper. There is also another member of the group Ashkund, as to which nothing is as yet known.

The form of paganism followed till lately was much mixed with animism, but there were certain principal gods generally recognized, the chief of which were Imrā, the creator, whose principal shrine was at Prēsungal, Moni, the prophet, Gish the war-god and the goddess Dizanē. In the borderlands however many districts had already accepted Islām before the Afghān conquest. These converts were known as Shaikhhs. Sacrifices of goats and ceremonial dances were very prevalent.

The social system is entirely tribal, each tribe consisting of several clans. The tribal government is carried on by a council composed mainly of the headmen or *djast* who represent the various clans. A number of *urir* or magistrates are elected annually to carry on the actual tribal government. The houses are well built and grouped into strong villages. The Kāfirs generally are acute and clever, but untruthful, intriguing and vain, yet they are hospitable and not generally cruel. They are brave and fond of freedom, and in their own country show a great sense of dignity; very quarrelsome, but always ready to put a stop to fights among others. Theft and assassination are not in any way condemned. Slavery is prevalent, the slaves being partly hereditary and partly obtained by capture in intertribal war or by purchase.

KĀFIYA (A.), a term in prosody meaning rhyme generally. The word seems (according to Goldziher, *Abhandl. zur Arab. Philologie*, i. 83 sqq.) to have originally meant a poetic utterance or a lampoon, then a poem and finally a rhyme. The theory of the *kāfiya* is considered a special science, distinct from *'arūd* (prosody proper). It teaches how verses should end as regards consonants, vowels, etc.

In the narrower sense, *kāfiya*, according to al-Khalil b. Aḥmad [q. v.], is the group of consonants, which begins with the vowelled consonant immediately preceding the last two quiescent consonants of a verse. In the Arab view, of course, a verse ends always with a quiescent letter, whether written or not (the latter is the case with *wāw* and *yā'* of prolongation when they are written defectively): *yaf'al*, *yaf'alū*, *yaf'alī*, *yaf'alā*.

The *kāfiya* may include up to six consonants: 1. the principal one (in the Arab view), the *rawī* or rhyme-letter, the letter which the poet always retains at the end of the line, till he has ended his poem and after which the latter is called: *tām* in the *mu'allafā* of Imru' al-Kais, *dāl* in that of Tamfa, etc. It is to be noted that Arabic poems are all mono-rhymed with the exception of the *radjāz muzdarwīdī*, in which the two hemistichs in a line rhyme. According to some prosodists, it is the rule to allow the two first hemistichs of a poem to rhyme; 2. as an annex to the *rawī*, the *waṣl* or *ṣila*, i. e. a letter of prolongation or a *hā'* (vowelled or not) coming after the vowelled *rawī*; of the letters of prolongation, *alif* is the only one usually written in this capacity; 3. as a possible further complement, the *khurūdj*, the letter of prolongation behind a vowelled *hā'* serving as a *waṣl*; as a preliminary either 4. the *ridf*, the weak letter or letter of prolongation immediately before the *rawī*; *wāw* and *yā'* may interchange with each other in one and the same poem; or 5. *ta'sīs*, an *alif*, placed before the *rawī* and separated from it by a consonant (*dakḥīl*) which may be changed at will but must always have the same vowel; 6. the *dakḥīl* just mentioned.

The *kāfiya* may likewise include up to six vowels: 1. *maḍrā* or *muḍrā*, the vowel of the *rawī*; 2. *naḥdīh*, the vowel of the *hā'* if it serves as *waṣl*; 3. *tawdīh*, the vowel before the quiescent *rawī*; 4. *ḥadhw*, the vowel immediately before the *ridf*; 5. *ishbā'*, the vowel of the *dakḥīl*; 6. *rass*, the vowel immediately before the *alif* of the *ta'sīs* (always *a* of course).

In respect of lengths, five kinds of rhyme are distinguished, viz.: — 1. *mutakāwis*, in which the two last quiescent consonants (which, as explained above, mark the beginning and end of the *kāfiya*) are separated by four vowelled consonants: *faru* [ka *ḥadamih*]; 2. *mutarākīb*, in which three vowelled consonants stand between the two quiescent: *'alā* [*djabali*]; 3. *mutadārik*, in which two vowelled consonants separate the two unvowelled: *ḥad* [*ṣa'al*]; 4. *mutawātir*, in which there is one vowelled consonant between the two quiescent: *bā* [*li*]; 5. *mutarādīf*, in which the two quiescent consonants come in immediate succession: *ḥ* [*āl*].

Finally we have still to note the faults in the

kāfiya: 1. *ikwā*, the substitution of a *ḍamma* for a *kasra* as *maḍjirā*; 2. *iṣrāf* or *isrāf*, the substitution of a *fatḥa* serving as *maḍjirā* for a *kasra* or *ḍamma*; 3. *ikfā*, the use of similar sounding consonants as *rawī* (*mīm* and *nūn*, *ḥā* and *khā*, etc.); 4. *idjāza* which consists in using consonants of essentially different sound as *rawī* (*bā* and *rā*, *kāf* and *lām*, etc.); 5. *tahrid*, the changing of the *darb* (the last foot in the second hemistich) in one and the same poem; 6. *īḥā*, the repetition of one and the same word in the same meaning as a rhyme-word in the same poem; 7. *sinād*, a mistake which occurs before the *rawī*, namely a) *sinād al-ḥadḥu*, changing of the vowel, which precedes the *ridf*; b) *sinād al-ishbā*, changing of the vowel between *rawī* and *dakhlil*; c) *sinād al-tawdijh*, changing of the vowel immediately before the quiescent *rawī*; d) *sinād al-ridf*, the use of *ridf* in one line but not in the other lines; e) *sinād al-ta'sis*, the use of *ta'sis* in one line but not in the others; 8. *taqmīn* or the running of one line into another, in such a way that the end of one line only gives complete sense when we know the beginning of the next verse.

In conclusion it should be noted that it was considered the rule in reciting a poem to lengthen the vowel of the vowelised *rawī*; but this custom was not generally observed. The Banū Tamīm added a quiescent *nūn* to the *maḍjirā* in place of the *waṣl*. Among the Banū Asad the *maḍjirā* was suppressed. Otherwise it was permitted, when a strong quiescent consonant preceded the *rawī*, to transfer to it the vowel of the *rawī* which itself then became quiescent: *fa'lū* > *fa'ul*. Finally, it often happened that, if the *rawī* was quiescent, it was given a *kasra* which was followed by a quiescent *nūn*: *fa'al* > *fa'aln*.

(MOH. BEN CHENEB.)

KAFİZ, an Arab measure of capacity (dry measure) containing from 25—50 litres (5—10 gallons). In the pre-Islāmic period the use of measures of capacity with dry and liquid wares was in general use, as is shown by the usually Arabic names for these measures in contrast to the measures of weight and their names borrowed from the Greeks and Romans. It has still long been the custom to measure these wares by their weight and not by their volume. East and west in this respect have undergone opposite developments. This transition from measures to weights was furthered, on the one hand, by the easier supervision of market business done by weight and, on the other, by the experience early obtained that it is not a matter of indifference whether very large or very small measures are used to measure dry wares. As the weight of the upper layers appreciably compresses the lower, the result is that, other things being equal, larger quantities weigh more per unit of capacity than small quantities. The table of measures of capacity commonly used in the early period is given below. The ratios show that it is not homogeneous. The greatest variations prevail in the theoretical lists of measures; the figures quoted below which — presupposing distilled water at normal temperature etc. — mean so many kilogrammes in weight, are based on an original measure of one *mudd* of the year 571 (1175/6) in the Cairo Museum, which,

according to its inscription, held 337 *dirham kail* of pure water. The measures usual in the early centuries of the Ilīlīra seem however to have been smaller ranging down to the half of the figures here given.

Measures of capacity or dry measure:

<i>mudd</i> (modius)	1	1.15	litres
<i>ṣā</i>	4	1.6
<i>makkūk</i>	6	6.87
<i>kafiz</i>	48	55.0

Two avoidupois weights were tacked on to this system:

<i>wash</i>	.	.	240.	60.	40.	5.	1	.	275.0	kg.
<i>kurr</i>	.	.	1440.	360.	240.	30.	6.	1	.	1650.0

That these measures of capacity are not entirely forgotten is probably due to the fact that they have been retained in the legal literature. They have disappeared from the market-place, at least in the East. In the lands round the Western Mediterranean the *kafiz* has however survived down to the present day, e. g. in Tunis, in Sicily (*cafiso* and *cafisone*, a measure of weight for oil, 11—20 kg.) and in Spain (*cahiz*, plur. *cahiers*, a measure for grain of about 6.6 hectolitre) etc.

KAFTĀN (Turkish form of the Persian *khaftān*, which is found in the *Shāhnāma* — cf. 'Abd al-Kādir Baghdādī, *Lughat-i Shāhnāma*, ed. by Salemann under the title 'Abdulqādiri Baghdādensis *Lexicon Shāhnāmianum*, p. 79 — and Asadī's *Lughat-i Furs*, ed. P. Horn, p. 99; also Arabic *khaftān*), was an upper garment worn in peace time, a kind of long tunic with sleeves, which in time of war was worn over the mail-shirt (tabard). This word as well as the article of dress came quite early among the Arabs under the influence of Persian fashions. Cf. al-Ṭabarī ed. de Goeje, iii. 236, 24 sqq.; 'Arib, p. 177; al-Mas'ūdī (Paris ed.), viii. 52. — Travellers describe the *khaftān* as a long robe, reaching below the knee, sometimes to the calves and sometimes down to the ankles, open in front and having sleeves, which were slit at the wrists or up to the middle of the arms. This garment was introduced into the Barbary States by the Turkish conquest and spread by fashion as far as Morocco (Höst, *Nachrichten von Marokko und Fes*, Copenhagen 1781, p. 115) where it is sometimes found, especially among women, without sleeves (Lempriere, *A Tour to Morocco*, London 1791, p. 385). The amirs and *shaikhs* of the Syrian Bedouins in d'Arvieux's time wore the *kaftān* as a winter garment (d'Arvieux, *Voyage dans la Palestine*, Paris 1717, p. 206). — Among the Ottoman Turks in earlier days *kaftān* was also the name for a robe of honour, which, — less important than the sable-skin —, was granted on the occasion of appointment to an office. The distribution of such robes of honour took place after the two Bairam [q. v.] festivals in the presence of the Grand Vizier under

the direction of the *kaftāndī bashī*, an official whose duty it was to take charge of and keep in condition the fur-tobes of honour. At the present day this garment seems to be very little worn. Hamdibey and Marie de Launay, *Les Costumes populaires de la Turquie en 1873* (Constantinople 1873) only mention it (p. 238) when describing a Kurdish woman from Kharput: A kaftān of fine dark green cloth, open in front and widely cut out in the form of an escutcheon on the breast, leaves the upper part of the shirt quite exposed and does not entirely cover the lower half. . . . The very long sleeves of the kaftān ending in a quadrangular piece are taken in above the wrists so as not to conceal the silver armlets. The sleeves are edged with galloon and notched gold lace.

KĀFÜR (also KĀFÜR and KĀFÜR, cf. *Lisān al-ʿArab*, s. v. *Kfr* and *Kfr*; in Sanskrit *Karpūra*, in Prakrit **Kappūra*, **kāpūra*, Malay *kapur*), camphor, the resin of *Laurus camphora* and *Dryobalanops aromatica*, was an object of commerce with India from the days of the ancient Persians: on the capture of al-Madaʿin, the Arabs found rich stores of this drug, the use of which they did not know; they took it for salt (al-Balādhuri, ed. de Goeje, p. 264; Ibn al-Athīr, ed. Tornberg, ii. 401) Ibn al-Baitār mentions different sorts of camphor, of which *fanṣūrī* and *riyāḥī* were considered the best; all these kinds were purified before being used. Marco Polo (ed. Soc. de Géogr., Paris 1865, i. 447; transl. Yule, revised by H. Cordier, London, 1903, ii. 299 and note 3, p. 302—4) says the camphor of Fansur was the best and most expensive; it was said to be weighed against gold. Fanṣūr — most probably an old name for Barus (cf. *Tijdschr. van het Kon. Nederl. Aardrijkskundig Genootschap*, Series 2, xvii., 1904, p. 18—22, 27—29; *Encycl. van Nederl.-Indië* 2, i. 172 sq.) on the west coast of Sumatra (Residency of Tapanuli) from which the *kapur Barus* came — is frequently mentioned by Arab writers; from the first half of the third (ninth) century we find the name in different historico-geographical reports as the place of origin of an exceptional quality of camphor.

The name of this resin is also found in the *Kurʾān* (lxvi. 5): "The righteous shall drink there (in Paradise) out of a goblet, the contents of which are mixed with *kāfūr*"; according to the Muslim commentators, either to indicate the pleasant flavour of the beverage or perhaps as the name of a spring in Paradise (al-Ṭabari, *Tafsir*, Cairo 1321, xxix. 111 sq.). The latter explanation is based on the fact that at the beginning of verse 6 the word *ʿain* (spring) is found.

(CL. HUART.)

KĀFÜR, ARU ʿL-ALISK AL-IKḤSHID, also AL-LAIḤHĪ or AI-SURĪ, called AL-LĀHĪ in a poem by al-Mutanabbī after a place in Nubia, ruler of Egypt and Syria in the fourth century of the Hijra. Kāfūr was born in Nubia or Abyssinia between the years 291 (904) and 308 (320) (so greatly do the statements of the chronicles vary). The fact that he began life as a horribly ugly slave and rose to be ruler of Egypt and Syria and the celebrated patron of scholars and friend of al-Mutanabbī [q. v.], the greatest poet of his time, has aroused a great interest in him among the Arab historians and given him a greater fame than his importance really deserves. As the Maecenas of poets and scholars, he found kindly biographers who have praised him as a model of fidelity for his devotion — not always maintained — to the Ikḥshidids [q. v.]. His biography is adorned with numerous anecdotes about his humble origin and his rise and about his friendship with al-Mutanabbī. He is only of importance in history because he resisted the advance of the Fāṭimids [q. v.] in the west and of the Arab dynasties in North Syria and maintained by his ability for two decades the kingdom founded by the Ikḥshidids in 323 (935). After his death it soon broke up. As a young slave he is said to have expressed the ambitious wish to become one day ruler of Egypt, to a companion who had said his ideal was to become cook in a cookshop so that he might always eat his fill. As a slave he had the good fortune to be sold to the governor Muḥammad al-Ikḥshid (323—334 = 935—946); that he was almost immediately given away by him on account of a skin disease and again taken back, may well be an embellishment, to contrast his degradation with his all the more marvellous rise. Another narrator says that he was sent with money by his former master to the governor al-Ikḥshid but the latter sent the money back and retained Kāfūr in his service instead. It is also related that he was the only one to remain by his master when his comrades had negligently left the governor's room to see a passing elephant. Both these stories only show that the governor had on some occasion had his attention specially attracted to him. He must certainly have early recognised his merit and put trust in him, for he made this ugly, despised slave the tutor of his children and a general. In the latter capacity he distinguished himself in 329 (940) in a battle near Aleppo which he captured for his master. When al-Ikḥshid felt his end was near at the close of 334 (July 946), he appointed him guardian of his younger son Awnudjūr (the name is very diversely written) whom the Caliph had previously appointed joint-ruler with his father. The real power remained in Kāfūr's hands even after Awnudjūr became of age, although he provided for the preservation of the Ikḥshidid dynasty by getting Awnudjūr's brother ʿAlī recognised as joint-ruler and successor in 338 (949). Later in 343 (854) Awnudjūr, at the instigation of his friends, tried to shake of the tutelage of Kāfūr, as he felt himself restricted in his freedom of action and expenditure — he only received 400,000 dinārs out of Kāfūr's rich revenues. He therefore

went to Ramla in Palestine in order to be able from there to exert real authority over Syria and then on Egypt. But the plan did not come to fulfilment, as his mother and Kāfur, warned in time, were able to appease him. The relationship remained unchanged till Awnudjur died in Dhu 'l-Ka'da 349 (Dec. 960). After the death of Awnudjur, Kāfur had his brother 'Alī confirmed in office as governor by the Caliph towards the end of the year. Kāfur remained his guardian, although 'Alī was 24, and only allowed him an income of 400,000 dinārs. The power of Egypt was again extended over Syria, so that 'Alī was mentioned next to the Caliph in the Friday service in Aleppo and northwards as far as Tarsūs. When 'Alī died six years later in 355 (966), Kāfur himself assumed the government and was confirmed in office by the Caliph, as 'Alī's son Aḥmad was only 9 years old. He did not enjoy his independence long, for he died in 357 (968). His successor was the Aḥmad whom he had superseded.

Kāfur was able to maintain order in Syria and Egypt. Shortly after the death of al-Ikhshīd, he recaptured from Saif al-Dawla, ruler of Aleppo, Damascus which the latter had taken. Kāfur was able skilfully to maintain his position between the Bghdād Caliph and the Fātimid ruler of North Africa. His riches were celebrated; his estate consisted of art-treasures of all kinds rather than of gold. He was a man who loved pomp; like Saif al-Dawla, exceedingly liberal to scholars and poets, so that his court was a popular one and his favour sought. When al-Mutanabbī became estranged from Saif al-Dawla, he came on Kāfur's invitation to Cairo, where he lived for some years. In the first period of his stay there he composed famous panegyric on Kāfur; but the intimacy did not last long, as Kāfur did not give him a position in the administration which he is alleged to have promised him. He excused himself by saying that he could not trust an office to a man who had posed as a prophet. Kāfur also devoted much time to scholarly studies and is said to have written poetry. Many scholars were in his service, of whom the best known is al-Kindī who composed a history of Egypt for him.

(M. SOBERNHEIM.)

KĀGHAD, KAGHID (from the Persian *kāghadh*, perhaps of Chinese origin), paper. In the early period of development of Muslim culture the east was only acquainted with papyrus (*ḳirfās*) as writing-material. It was Chinese prisoners of war brought to Samarkand after the battle of Atlaḳh near Tālas, that first introduced in 134 (751) the industry of paper-making from linen, flax or hemp rags after the method used in China. The various kinds of

paper then made are the following: *fir'awnī* (Pharaoh's paper), a kind which was destined to compete with papyrus even in the land of its origin (the oldest paper with Arabic writing on it found in Egypt dates from 180—200 = 796—815); *sulamānī*, from Sulamān b. Rāshīd, the treasurer of Khorāsān under Hārūn al-Rāshīd; *djāfarī*, called after Djāfar al-Barmakī; *talhī*, from Talha b. Ṭāhir, the second ruler of the Ṭāhidī dynasty; *ṭāhirī*, from Ṭāhir ii., of the same dynasty; *nūḥī*, in allusion to the Sāmānīd Nūḥ I.

Paper mills were erected elsewhere on the plan of those in Samarkand: al-Faḍl, brother of Djāfar al-Barmakī, who had been governor of Khorāsān in 178 (794) probably founded the paper-mill in the Dār al-Kazz quarter in Baghdad. Soon afterwards others arose in Tihāma, Yemen and Egypt, where paper ultimately drove out papyrus, also in Damascus, Tripoli, Hamā, Manbij, Tiberias, the Maghrib, Spain (at Xativa), Persia and India. *Kāghadh-kunān*, the "paper-makers", was the name taken by the people of the village of Khūnādī or Khūnā in Aḡḥarbaiddjān, two days' journey from Zandjān, on account of the excellent paper made there. The place was destroyed by the Mongols, who however founded a colony, Mughuliya, there. (Barbier de Meynard, *Dict. de la Perse*, p. 219; Ḥādjdjī Khalifa, *Djihānumā*, Constantinople 1145, p. 298; transl. by Norberg, i. 365).

On the preparation of paper and the different methods of colouring it, interesting details are given by J. v. Karabacek, *Neue Quellen z. Papiergeschichte in Mitt. aus der Samml. der Papyrus Erzsh. Rainer*, iv. 75 sqq.

According to a statement of al-Maḥrizī (*al-Khiṭaṭ*, ed. Wiet, ii. 34), Djāfar al-Barmakī had parchment replaced by paper in the government offices.

The paper used in the east is now almost entirely of European manufacture. In Persia we still find a Chinese paper, called *Khān Ballāḳ* (Turkish name of Pekin), a scarce paper, sought after for its durability. The Cairo printers prefer a strong yellow-coloured paper called *nabātī* (Pers. *nabāt*, sugar-candy).

A paper-mill long ago destroyed (*Kāghadh-Khāna*, popularly *K'at-Hāne*) has given its name to the Imperial Kiosk and the public promenade of the "Sweet Waters of Europe" in Constantinople.

KAHF, Title of Sūra xviii. of the Qur'ān. — See also AṢḤĀB AL-KAHF.

AL-KAHHĀR, one of the names Allāh, cf. ALLĀH, i. 303a.

KĀHIN (A., plur. *kūhān* or *kahana*; fem. *kāhina*, plur. *kawāhin*, abstract of profession *kihāna*) is the name of the seer or soothsayer (*μάντις*, vates) among the pagan Arabs. It corresponds to the Hebrew *kōhen*, Aramaic, *kāhen*, *kāhnā* (priest); it is not an arabicised form of this however, but belongs to the original stock of the old Arabic

language (otherwise Noldeke, *Neue Beiträge zur semitischen Sprachwissenschaft*, p. 36, note 6), for the Jewish kōhen, kāhin is entirely different in character from the Arab kāhin: the former, although in all probability at one time also a soothsayer, later appears only as a dealer in oracles and particularly as sacrificer and teacher of the Tora, while it cannot be shown that the latter, who is never a priest (which is contradictory to von Kremer — see below in the *Bibliography* — p. 74 *sqq.*, and also to Wellhausen, p. 134 and elsewhere), ever held these functions, neither was he permanently connected at all with worship and places of worship, but seems to have been quite unrestricted in the exercise of his activities.

The kāhins of course have their origin in the shamans, medicine-men, and fetish-priests, but in the form in which we first meet them in the old Arabic tales, in the Ḥadīth and, much more rarely, in the pre-Islamic poetry, they have already passed beyond the ruder forms of shamanism. Their mantic knowledge is based on ecstatic inspiration. They have also, it is true, visions by night which reveal to them future and other events and things hidden from the ordinary mortal (al-Mas'ūdī, iii. 379, 394 *sq.*; Sprenger, i. 176 *sq.* etc.), but they are not really visionaries. Their inspiration is of demoniacal origin: a *djinnī* or *shaitān* "demon" (*δαίμων*) who is called their *tāhib* "companion", *ṣāhib* "comrade", *mawālā* or *wālī*, "friend" ("familiar spirit"), not infrequently also their *ra'ī* or *ri'ī* (probably "seer"), speaks out of them. This personification of their ecstasy, which at once stamps them as connected with the old fashioned *shā'ir* "bard" (literally "knower"), also endowed by djinns with supernatural, magic knowledge (cf. *vates* = *poeta*), is conceived as being so substantial that the *daimonion* regularly appears as the I — his *alter ego*, the kāhin, on the other hand, appears as the "thou" of the prophetic utterance, that the latter clearly notices the approach of the spirit, feels himself struck by his foot, hears his voice from a distance etc. (Sprenger, *loc. cit.*; Holscher, p. 85), indeed, these familiars even have their own names (like the familiar spirits of the poets, see Yāqūt, *Mu'djam*, ed. Wüstenfeld, iv. 914, 14 *sq.* and al-Djāhīz, vi. 69 = van Vloten, viii. 65). The kāhins give their utterances in the form of the *sadq*, short sentences in rhythmic prose, with single or more rarely alternating rhyme, such as had been usual in Arabia from early times for all utterance in the higher and lower branches of divination and magic, etc. (Only very rarely is regular verse also used, e. g. *Aghānī*¹, xi. 161, 13). Besides the *sadq*, the *zamzama* is characteristic of the kāhin's utterances, the mysterious "humming" with which it was delivered (Ibn Hishām, *Sira*, i. 171, 7 and thereon ii. 58). The word *sadq* may in this sense have originally meant nothing more than the "purring" or "chirping" or such like of an alleged demon's voice; the verb *sadja'a* is also used in other connections of "purring" or "chirping" of the djinns, regularly of course, of the "cooing" of pigeons and also of the "groaning" of camels; cf. in the O. T. e. g. *Isaiah*, xxix. 4). The kāhins, the majority of whom are to be considered frauds, of course often express themselves in very obscure and ambiguous language. They give greater emphasis to their utterance by striking oaths, swearing by the earth and sky, sun, moon and stars, light and darkness, evening and morning, plants and animals of all kinds etc.

(For kāhins' utterances, see e. g. Holscher, p. 87 *sq.*, 95 *sqq.*; al-Mas'ūdī, iii. 387 *sqq.*; al-Ibshīhi, Ch. 60; *Aghānī*, xi. 161, 10 *sqq.*).

Kāhins play an extremely important part in public as well as private life. They are interrogated in all important tribal and state occasions — especially before warlike enterprises, razzias, etc. in which they take part themselves as a rule, indeed, they sometimes lead them in person (cf. Deborah in the O. T.). Kings and queens therefore keep their prophet or prophetess (D. H. Muller, *Die Bungen und Schlösser Sudarabiens nach dem Iklil des Hamdāni*, i. 74, and al-Ṭabarī, ed. de Goeje, i. 762, 5), and the tribes have a kāhin or kāhina as well as a *shā'ir* "poet" and *khaṭīb* "orator". In private the kāhins especially act as judges in disputes and points of law of all kinds, so that the conception of *kāhin* is closely connected with that of *hakam* "judge" (al-Ḥuṭai'a, N^o. xvii. 7; al-Ibshīhi, Cairo 1321, ii. 73, 1). Their decision is considered as a kind of divine judgment against which there is no appeal. At the same time they interpret dreams, find lost camels, establish adulteries, clear up other crimes and misdemeanours, particularly thefts and murders, etc. In these proceedings they descend to a somewhat lower scale of divination, viz. to that of the *arrāf* or *mu'arrif* (see above i. 460b and cf. Ibn al-Aṭhīr, *al-Nihāya*, iv. 40, al-Djāhīz, vi. 62, 5 *infra*, and al-Mas'ūdī, iii. 352). For such work they received an honorarium — forbidden in the Ḥadīth — (*hulwān*; al-Bukhārī, ed. Krehl-Juynboll, ii. 43, 55 *et passim*). Of course, people liked to test their mantic abilities before paying them.

The influence of these men and women was naturally great and often stretched far beyond the bounds of their tribes. They were not by any means recruited solely from the lower strata of society, but sometimes belonged to most distinguished families, occasionally even the *saiyid* or chief of a tribe was also its *kāhin* (Lammens, p. 204, 257: al-Djāhīz, vi. 62 = van Vloten, vii. 184; also Wellhausen, p. 134 who, however, says wrongly that such aristocratic kāhins had inherited their office). They were in any case among the leaders or the intellectual aristocracy of their tribe (cf. the chapter *Asmā' al-kuhhān wa 'l-huk-kām wa 'l-khutaḥ wa 'l-ulamā' min Kaḥṭān* "The names of the seers, judges, orators and learned men of Kaḥṭān" in al-Djāhīz, *al-Bayān*, i. 136 *infra*, cf. also 113, 15 *sqq.*, ed. Cairo 1333, i. 192, cf. 159).

Among famous soothsayers of both sexes were Saṭīh al-Dhībī in Syria and Shikḥ b. Ṣa'b of the Baḍjila, (who often appear together but are both quite mythical), the probably equally unhistorical Yemen princess Turaifa, a kind of Cassandra, al-Ma'mūr al-Hārithī of the Maḍhḥidj, 'Amr b. Dju'aid al-Afkal, the chief of the Rabī'a, Sawdā' bint Zuhra among the Quraysh, Zarkā bint Zuhair among the Qurā'a, etc. (Wellhausen, p. 136; al-Mas'ūdī, iii. 352, 364 *et passim*; van Vloten, vii. 172, 174, 180 etc., etc.). The South Arabian soothsayers enjoyed a particularly high reputation (*Aghānī*, viii. 51, 4).

Practically synonymous with *kāhin* is the word *ḥāzī* (plur. *ḥuzāt*, also *ḥāza* and *ḥāzūn*, fem. *ḥāziya*, plur. *ḥawāzī*), which is not uncommonly found. It corresponds of course to the Hebrew *ḥōzā*, but is undoubtedly also a genuine Arabic word. On the other hand, we must sharply distinguish from the

kāhin, who, as above explained, owes his supernatural knowledge to internal inspiration, these practitioners of the lower forms of divination and magic, who employ external, technical means that is, who follow a mere routine that may be acquired by any one, namely the *ʿārif* or *ṣāḍīr* who watches the flight of birds, the *kāʾif*, *hāzīr* and *ḥazzār*, who reads footprints, the *ʿarrāf* or *muʿarrif* (see also above on these terms), the water-diviner, the *munadḍijim*, the astrologer, *al-nāzīr fī asrār al-kuff* or hand-reader, the *khāṭṭ* who tells fortunes from lines on the ground, *al-ḥārib* or *al-ḥārik bi ʾl-ḥāṣa*, who works by casting stones, the enchanter, *sāḥir* or *rāḥi*. These too are sometimes called *kāhin*, but only by an erroneous use of the word, which probably only came into vogue when Islam had put an end to the higher art of the soothsayer, *kihāna*, while external divination and magic survived. I should like here, again to insist (against Wellhausen, p. 134 and elsewhere) that the *kāhin* was not, like the Jewish *kōhen*, also supplier of oracles. It is especially noteworthy that we never find him in connection with divination by arrow (*istiṣām*).

The prophet Muḥammad disclaimed being a *kāhin* (Sūra lii. 29, lix. 42; also passages like lxxi. 22 sqq.). But his earliest appearance as a prophet reminds us strongly of the manner of these soothsayers. He was an ecstatic and had "truc dreams" like them; his *daimonion* (*sāhib*) was the (holy) spirit, whose place was later taken by the angel Gabriel. His revelations are, like the utterance of the *kāhin*, comprised in *saḍḥ* and sometimes begin with the usual abstruse oaths; even the forms which he was still using for administering justice and settling disputes in Medina during the early years of his stay there correspond in their main features to those of the pagan *kāhin* and *ḥakam*.

It is therefore not surprising that his Meccan countrymen regarded him as a *kāhin* and that his protestations that he was nothing of the kind, but a "prophet", a "messenger of God" made little impression on them. The anti-prophets also, Musailima, Ṭulaiḥa, and particularly al-Aswad al-Ansī, no less than Saḍḍāh, a lady member of the faculty, played their parts in the guise of *kāhins*.

Islam with its monotheism, its doctrine of the cessation of all revelation with Muḥammad and its regulation of all social customs through the *fiḥ* wiped out the old soothsayers, only gradually, it is true, for we still hear in 132 A. H. of a *kāhin* (al-Ṭabarī, iii. 21, 9; on *kahana* in modern Arabia, see Landberg, *La langue arabe et ses dialectes*, p. 70; on woman seers in Muslim N. W. Africa, see Doutté, p. 32 sqq.). Muḥammad himself probably never doubted the supernatural nature of the *kāhin*'s utterance. But when he declared the knowledge possessed by the demons, whom he at the same time degraded to devils, to have been stolen from heaven and to be falsified and confused (Sūra lxxii. 8 sqq., xxxiv. 13, vi. 112; Ibn Hishām, *Sūa*, i. 131 sq.), he brought their prophecies into great disrepute, and thus those traditions arose, which warned believers against utilising the services of a *kāhin* (al-Suyūṭī, *al-Djāmiʿ as-ṣaḡīr*, sub *man atā kāhinan*; al-Bukhārī, ii. 43, 55, et *passim*; cf. also the remark of Ibn ʿAbbās *iyākum wa ʾl-kihāna* etc. in al-Zamakhsarī's *Kashshāf*, on Sūra xxxi. 34).

AL-KĀHINA, the prophetess, the seer. Even her name (Damyā, Dihya) — for Kāhina is simply an epithet — is doubtful. According to Ibn Khaldūn, she belonged to the *Djarwa*, a Jewish (?) tribe in the Awrās [q. v.], which gave chiefs to the Berbers descended from al-Abtar. When Ḥassān b. al-Nuʿmān [q. v.], had conquered the Byzantines, he advanced against the Awrās where the Kāhina reigned. The latter inflicted a heavy defeat on him at Miskiyāna (between ʿAin Baiḍā and Tebessa in the modern department of Constantine) or according to other authorities, in the Gabes territory or at the Oasis of Nini, and drove him back beyond the frontier of Ifrikiya. The difficulties in which his wars in the east had involved the caliph ʿAbd al-Malik, delayed the despatch of reinforcements. During this period the Kāhina is said to have extended her sway over the whole country, and to prevent the Arabs from making new inroads, she destroyed the towns, cut down the forests and laid the country waste. At the same time she is said to have adopted as a son a prisoner named Khālid b. Yazid al-Ḳaisī with whom she claimed foster-kinship, which, however, did not prevent her adopted son from afterwards betraying her. Her devastations estranged the people from her and when five years later Ḥassān b. al-Nuʿmān returned with reinforcements, the Kāhina was defeated in a fierce battle at Tabarka (82 or 84 = 701 or 703) and killed in the Awrās at the place called Bir al-Kāhina. By her advice two of her sons had gone over to the Arabs before the battle and even received commands in the Muslim army, which continued the war against the Berbers. In reality we do not even know for certain whether the Kāhina was a queen or simply an inspired woman like Lalla Fāṭima, who was the soul of the resistance of the Kabyls against the French in 1857. Almost all that is told of her is legendary, the voluntary devastation of North Africa, her defence in the castle of el-Djem (the amphitheatre of Thysdrus) and the circumstances of her death. A

Berber genealogist, Hānī² b. Bakūr, even says that she ruled for 65 years and was 137 years old.

(RENÉ BASSET.)

AL-KĀHIR BI 'LLĀH, ABŪ MAṢṢŪR MUḤAMMAD B. AL-MUṬADID, 'Abbāsīd Caliph. While his brother al-Muḥtadir was still reigning he was proclaimed Caliph under the name al-Kāhir, but was deposed again in a few days. After the death of al-Muḥtadir the Amīr al-Umarā' Mu'nis proposed al-Muḥtadir's son Aḥmad, afterwards the Caliph al-Rāḍī as successor; instead of him, however, al-Kāhir at the age of 35 was proclaimed Commander of the Faithful (end of Shawwāl 320 = Nov. 1, 932). Although he wished to be regarded as devout and just, his treacherous and despotic nature was soon revealed. Through torture the mother of al-Muḥtadir was forced to give up her whole fortune, and al-Kāhir also extorted considerable sums from the sons and officials of the late Caliph. On the advice of the vizier Ibn Muḥla [q. v.] Mu'nis had the Caliph carefully watched, which naturally did not please the latter, and when he was intending to dismiss Ibn Muḥla, the latter conspired with several others to overthrow al-Kāhir and put Abū Aḥmad, son of al-Muḥtadir, in his place. But the plot was betrayed. While Ibn Muḥla escaped by flight, Mu'nis was dismissed and when he went to the Caliph, the latter had him arrested and some time afterwards executed. Abū Aḥmad was built into a wall, alive. Ibn Muḥla, however, did not cease in his efforts to incite the populace against al-Kāhir and in Djumādā i. 322 (April 934) an armed crowd broke into the palace. The half-intoxicated Caliph had to surrender; but when he refused to abdicate, he was blinded and thrown into prison. Eleven years later al-Mustakfi restored him to liberty and he lived as a beggar till his death in Djumādā i. 339 (Oct. 950).

AL-KĀHIRA. [See CAIRO.]

KAHRAMĀN-NĀMA (or DĀSTĀN-I KAHRAMĀN), a Persian epic in prose, which, like the *Dārāb-Nāma*, *Kirān-i Habashī*, *Hūshang-Nāma*, *Faghfur-Nāma*, *Tahmūrāth-Nāma* etc. belongs as regards subject matter to the prose epics which form a cycle round Firdawsi's *Shāh-Nāma*; like the two first named it is ascribed to Abū Tāhir Ṭarṭūsī [Ṭarsūsī, q. v.].

The epic which takes us back to the days of the Old Iranian ruler Hūshang and describes the exploits of the hero Kāhramān called Kātil, the "slayer", has attained some importance in the popular literature of the Turks. Among them the very diffuse Persian version occupying eight books is compressed into one volume. The historical background is an effectively developed picture of the struggle between Islām and the Indian fire-worshippers. The legendary and fictitious however occupies a considerable space. In parts the Turkish version with its mixture of prose and poetry shows the favourite technique of the popular chivalrous romances and ballads. In it we also find many burlesque features which remind us very much of the *meddāh* tales and their humorous situations. In many passages the secondary figure of the cunning, sly and covetous paladin, Gerdēn-Keshīn entirely overshadows the main hero Kāhramān. His foolish pugnacity is proverbial; cf. Bāḳī's *Dīwān* (lith. Constantinople 1256), p. 37 (*ḡaṣīda* 1).

The substance of the epic is briefly as follows. Kāhramān, son of the Persian king Ṭahmāsp, is carried off when three years old by a *dīw* and educated as one of their own children by other *dīws* on the mountain Kāf [q. v.]. His cousin and next successor to the throne, Kahtarasp, voluntarily renounces his claim to the throne of Irān after Ṭahmāsp had died prematurely from grief at the loss of his only son, and becomes a paladin in the service of Hūshang, who is chosen Shāh. Through the whole epic runs the idea, freely proclaimed, that heroism is better than a kingdom, for the king's throne is supported by the sword of the hero.

When Hūshang sets out to conquer India, he meets Kāhramān, who has now grown up into a hero of terrible valour, has escaped from the *dīw*, and well armed, is going around as a free lance on the search for home and adventure. In his arrogance and boldness he becomes involved in a series of severe duels with Hūshang's heroes, in all of which he is victorious, until finally his identity is established by Kahtarān. He thereupon readily pays homage to Hūshang and goes to India with him as one of his paladins. There they succeed, after much fighting and many vicissitudes, in taking the capital by a cunning coup, in which the king of the Indians is killed.

Kāhramān to whom the principal exploits fall, mounted on a six-footed, four-eyed, unicorn sea-monster that he has tamed, wins by his heroism as a bride the daughter of the Indian ruler, who has taken part in the fighting, unconquered and

invincible (Amazon episodes are found also elsewhere in the epic). But Kaḥramān has to set out soon again to save the mother of Bahrām, another of Hūshang's heroes, from the power of a *diw* in the inaccessible crystal mountain. He succeeds in gaining the talisman of king Kāiūn, in liberating his bride, who in the meanwhile had been carried off, and in freeing Bahrām's mother. Returning to Persia, he marries the Indian princess and remains in the service of Hūshang's successor, Shāh Tahmūrath.

KAHRUBĀ or **KAHRABĀ** is our amber; the Persian word means attracter or robber of straw. Usually, as in al-Kazwīnī, its peculiar quality is attributed to it without further note; Ibn al-Kabīr, however, observes that it attracts straw quickly and strongly, when it is slightly rubbed. This attraction is used poetically as a metaphor for the attraction of lovers to each other.

Amber was brought partly from the Baltic lands of Bulghār in the region of Kasan and was considered to be the resin of the Greek nut, and partly from Spain. Al-Ghāṣikī, who mentions both kinds, notes that it encloses flies, straw, etc.

Ornaments of amber from the earlier period have not survived in the east; al-Washshā, however, mentions specimens of yellow amber worn as ornaments by women, and the alchemist al-Djildakī signs engraved in amber as talismans. In modern times beads of rosaries and cigar-holders are made of it. It has always been in frequent use as a medicine. Just as we derive the word electricity from *electron* so the Orientals do *kahrabā'īya* from *kahrabā*. Amber is frequently confused with *sandarūs*, which, according to al-Anṭākī, attracts rubbed straw. On the other hand, we find the difference between them emphasized.

(E. WIEDEMANN.)

KAḤṬABA B. **SHABīb AL-ṬĀ'ī**, an Arab general. We find Kaḥṭaba, whose real name was Ziyād, mentioned as early as the year 100 (718/719) among the twelve chiefs of the 'Abbāsīd faction in Khorāsān, who are said to have been chosen by the Kūfan emissary Abū 'Ikrima al-Sairādī to further

the 'Abbāsīd cause. When the long prepared revolution broke out in the summer of 129 (747), Kaḥṭaba was in Mecca to which he had gone in order during the pilgrimage to meet in person the leader of the 'Abbāsīds, Ibrāhīm b. Muḥammad [q. v.]. He did not return to Khorāsān till 130 (747/748) after Ibrāhīm had appointed him his general. Abū Muslim [q. v.] gave him the supreme command in the war against the Umayyads and he defeated Tamīm b. Naṣr, son of the Umayyad governor of Khorāsān, Naṣr b. Saiyār, at Ṭūs. Tamīm fell in the battle and Naṣr had to evacuate Nisābūr and flee to Djurdjān. When the governor of the 'Irāk, Yazīd b. 'Omar b. Hubaira, sent an army under Nubāta b. Ḥanzala al-Kilābī to Djurdjān, Kaḥṭaba took the field against him; on Dhu 'l-Hidjja 1, 130 (Aug. 1, 748) Nubāta was defeated and slain, and Naṣr again took to flight with the object of making his way to Hamadhān, but died on the way in Rabi' i, 131 (Nov. 748). Kaḥṭaba then turned his attention to the west. While his son Ḥasan was besieging Nihāwand, where the remnants of Naṣr's army from Khorāsān had united with the governor of Hamadhān's Syrian troops who had fled from there, Kaḥṭaba gave battle on Radjab 23, 131 (March 18, 749) at Djābalk near Iṣfahān to 'Amir b. Duḥāra al-Murri who was coming with a large Syrian army. The latter fell in the conflict. After Kaḥṭaba had joined his son, the siege of Nihāwand was continued with vigour, and after several months the Syrian garrison capitulated, while their comrades from Khorāsān, who did not know of the capitulation, were all cut to pieces. Thereupon Kaḥṭaba marched against Kūfa via Hulwān and Khānīkīn, sending his son in advance by the direct route. Ibn Hubaira advanced to meet him with a strong army, but Kaḥṭaba succeeded in evading him and in passing the Tigris unscathed, and then camped near Anbār. When Ibn Hubaira followed him and pitched his camp at Fām Furāt Bādaqlā on the east bank of the Euphrates, Kaḥṭaba crossed the river and marched along the west bank to a place opposite the enemy camp. In the night of Muḥarram 8, 132 (Aug. 27, 749) he crossed the river again with a small body of men and surprised Ibn Hubaira who had to seek safety in flight. In the confusion of the fighting, Kaḥṭaba disappeared completely; whether he was drowned or killed in the fight must be left undecided.

(K. V. ZETTERSTÉEN.)

KAḤṬĀN is regarded by the Arabs of the Muhammadan epoch as the "father of (all) Yemen" (Ibn Hishām, *Sira*, i. 4; al-Mas'ūdī, *Murūdj al-Dhahab*, Paris 1861—77, i. 79; *Die auf Südarabien bezüglichen Angaben Naṣwān's im Šams al-'Ulūm*, ed. by 'Azīmuḍdin Aḥmad, p. 83 *et passim*) i. e. as the ancestor of all South Arabians, who therefore are usually described comprehensively as "Banū Kaḥṭān", "Kaḥṭān al-Kaḥṭān" or briefly "Kaḥṭān", when not called simply "Yemenis". Kaḥṭān is thus contrasted with 'Adnān, the symbol of ethnological unity of all the

North Arabians. In this we find agreement not only among the Arab scholars, genealogists, historians, geographers, etc. (cf. e. g. Wüstenfeld, *Genealog. Tabellen der arab. Stämme u. Familien*, and the *Register* and Reiske, *Primae lineae historiae regnerum arabicorum*, ed. Wüstenfeld, p. 132 sq.) but also in the ideas of the people, as they are still to be found in Arabia (see Doughty, *Travels in Arabia Deserta*, i. 282) and as found at an earlier period notably in the poetry (see Abū Ḥanīfa al-Dīnawarī, *al-Akḥbār al-tiwāl*, p. 348; al-Ṭabarī, ed. de Goeje, i. 1087, also ii. 1672, 1985; al-Masʿūdī, *op. cit.*, ii. 142; do., *al-Tanbih wa 'l-Ishrāf* = *Bibl. Geogr. Arab.*, viii. 109, etc. etc.; in the statements, that reflect popular opinions, we indeed find as the counterpart of Kaḥṭān usually not ʿAdnān but his fictitious son Maʿadd, e. g. Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 281; al-Ṭabarī, *op. cit.*, ii. 1056, 1084; and al-Masʿūdī, *al-Tanbih*, p. 88, or his imaginary grandson Nizār, e. g. al-Masʿūdī, *Murūdj*, v. 223, vi. 42 sq., 46, 143, 150, and Ibn al-Aṭṭār, *al-Kāmil*, ed. Tornberg, iv. 273, or even his imaginary great-grandsons Muḍar and Rabʿa, e. g. al-Ṭabarī, *op. cit.*, ii. 1969 *infra*, 1985 sq. Arabic sources usually give Kaḥṭān the following ancestry ʿĀbar (not ʿĀbir, see e. g. *Kāmil*, s. v.) — Shālakh (or Shālāh) — Arfakhshadh (or Arfakhshad) — Sām — Nūḥ; they also give him a brother, Fālagh. (The line Kaḥṭān b. Fālagh b. ʿĀbar b. Shālakh etc. in al-Ṭabarī, *op. cit.*, iii. 2400, and al-Dimashqī, *Nuḥbat al-Dahr*, ed. Mehren, p. 249, 252 is obviously due merely to a slip). These names are of course simply arabicised forms of the Old Testament names ʿĒbār (Eber) — Shālāh (Shelah) — Arpaxshad (Arphaxad) — Shēm (Shem) — Nōah (Noah) and Palāy (Peleg) *Genesis* x. and i. *Chron.* i. Kaḥṭān is therefore identical with the O. T. Yoḳṭān (Ἰεκταν), son of Eber and brother of Peleg and ancestor of various South Arabian peoples (*Genesis* x. 25 sq., and i. *Chron.* i. 19 sq.); Yoḳṭān, probably to be taken as meaning the "smaller", the "younger", i. e. as compared with his brother Peleg, might be a mere ethnological invention with the object of connecting the Arabs with the Hebrews). The Arab genealogists, etc. are quite positive on their identity; they constantly assert: "Yaḳṭān (more rarely Yaḳṭān) is Kaḥṭān" (e. g. al-Masʿūdī, *al-Tanbih*, p. 31; do. *Murūdj*, iii. 143; Ibn al-Aṭṭār, *op. cit.*, i. 57, *Tādj al-ʿArūs*, sub *ḳḥṭ*; see also Doughty, *op. cit.*, i. 229; Yaḳṭān, it is true, appears occasionally through confusion as the brother or son of Kaḥṭān, so Ibn Kuṭāiba, *al-Maʿārif*, ed. Wüstenfeld, p. 14; al-Masʿūdī, *Murūdj*, i. 79 sq.; *Tādj al-ʿArūs*, loc. cit., and al-Ṭabarī, *op. cit.*, i. 217). Indeed, several Arab scholars even assert — and on this they agree with von Kremer, *Altarabische Gedichte über die Volkssage von Jemen*, p. 7 sq. — that Kaḥṭān is only an arabicised form of Yoḳṭān (al-Masʿūdī, *Murūdj*, iii. 143 and *Tādj al-ʿArūs*, loc. cit.). But Yoḳṭān could not possibly become Kaḥṭān by any phonological laws. The equation Yoḳṭān = Kaḥṭān has in all probability rather come to be made because some old Arab — probably a Yemeni — genealogist quite arbitrarily, simply from a certain similarity of the names, identified the Biblical Yoḳṭān with an actually existing South Arabian tribe Kaḥṭān, so that by this artifice, the Yemenis might be linked up to the Biblical genealogical system, which reaches back to Adam, in the same way as had been

done with the North Arabians under the influence of the Qurʾān and the Bible by tracing ʿAdnān back to Ishmael, the son of Abraham (see e. g. Ibn Hishām, *op. cit.*, p. 3 sq.; al-Ṭabarī, *op. cit.*, i. 1113 sq.; etc., etc.). Such a tribe of Kaḥṭān, which would surely have been of a certain degree of importance, cannot actually be proved with certainty to have existed in pre-Muhammadan Arabia. But it seems to me to be at least not impossible that the *Katzviri* of Ptolemy (*Geogr.*, vi. 7, 20, 23) are to be explained as "Kaḥṭānites" (as Knobel has already done, *Die Volkertafel der Genesis*, p. 185, and more recently Moritz in Pauly's *Real-encycl. der klass. Altertumswiss.*, new edition, s. v. *Katanitai*) and not as Katanites" (as von Kremer, *op. cit.*, p. 8, Sprenger, *Die alte Geographie Arabiens*, p. 207 and Glaser, *Skizze der Gesch. u. Geographie Arabiens*, ii. 283, 423). The fact, that of the two or more tribes of Kaṭān in question none could have been important enough to be known outside of Arabia, seems to me to be against the latter interpretation. The town of Kaḥṭān (between Zabīd and Sanʿā) mentioned by al-Muḳaddasī, *Aḥsan al-Taḳāsim*, 2nd ed. = *Bibl. Geogr. Arab.*, iii. 87, 94 seems also to point to an old South Arabian tribe of Kaḥṭān (cf. also the ʿĀl Kaḥṭān mentioned there p. 104 and described as the "oldest princes of Yemen"). Finally, it is not at all improbable that the beginnings of the modern clan Kaḥṭān (see below) reach back to the pre-Muhammadan period.

The great tribal confederation of the Kaḥṭān fell — in the Muhammadan period at least — into two groups, the smaller of the Ḥimyar and the larger of the Kahlān, whom the official genealogy put together as brothers and traced their descent from Kaḥṭān by the following line: Yaʿrub — Yaḥdjub — Sabaʾ — Ḥimyar + Kahlān (Wüstenfeld, *Tabellen*, i; al-Masʿūdī, *al-Tanbih*, p. 80, 6 etc.; other lists, the first of them in connection with *Genesis*, x. 26 sq., are given in Ibn ʿAbd Rabbihi, *al-ʿIkd al-farīd*, Cairo 1305, ii. 57). In the genealogical table in *Genesis*, Sabaʾ (Shəḥḥā) appears as a son of Yoḳṭān. Why the Arab genealogists have inserted Yaʿrub and Yaḥdjub between Kaḥṭān and Sabaʾ (and the two are also found, but in the reverse order, in the genealogy of ʿAdnān, as grandson and great-grandson or as great-grandson and great-great-grandson of Ismāʿīl; see Ibn Hishām, *op. cit.*, p. 3 and al-Masʿūdī, *al-Tanbih*, p. 80), is a question that can hardly be answered with certainty. The Ḥimyar [q. v.], the epigones of the Minaean, Sabaeen and Ḥimyarite kingdom, were presumably for the most part settled, while the Kahlān may have for the most part been nomads or half-nomads; cf. the expressions: "the Ḥimyar and the Arabs among the Yemenis", "the Ḥimyar and the clans (*ḳabā'il*) of Yemen" and similar expressions in Landberg, *Arabica*, v. 116 sqq. The numerous South Arabian tribes which we find in Muḥammad's time in most different parts of Northern Arabia and even in Syria and the ʿIrāk belong principally to the Kahlān.

The Kaḥṭān and the Maʿadd were apparently separated even in the pre-Muhammadan period by a racial hatred, perhaps originally mainly based on the opposition between the desert and the sown. This enmity was intensified by the repeated raids of the Yemenis into the lands of the Ishmaelites [see above, i. 373] as well as later by the anta-

gonism between the Anṣār (Medīnites) and the Kuraish, which came to a head after the death of the Prophet and influenced the history of the first two centuries of Islām in the most baneful fashion. It was perhaps this feud that first linked the Yemeni tribes on the one side and the Ishmailite on the other into closer ethnological unities. One of its more innocuous results was the *mufa-khara*, the struggle for rank and glory, which continually prevailed between the two antipodes (cf. e. g. al-Mas'ūdī, *Murūdj*, vi. 136, ii. 142 etc.). The Kahtān, in view of the splendour of the ancient South Arabian kingdoms, had the more right at first to feel the more distinguished. But Islām with the mission of Muḥammad and the primacy of the Kuraish brought the Ma'add a tremendous superiority. The Yemenis endeavoured to counterbalance this in the most different ways. First of all they created an entirely romantic South Arabian saga, which pictured their past greatness in the most splendid colours (see below in the *Bibliography*). They then made Kahtān son of the Prophet Hūd [q. v.], known from the Qur'ān, whom they next partly identified with 'Ābar (Nashwān, *al-Kaṣida al-Himyarīya*, ed. von Kremer, p. 4; *Die auf Südarabien bezüglichen Angaben Nashwān's*, p. 83; al-Ya'qūbī, *Ta'rikh*, ed. Houtsma, i. 220; Ibn 'Abd Rabbihi, *op. cit.*, ii. 57; al-Mas'ūdī, *al-Tanbih*, p. 81; Doughty, *op. cit.*, ii. 37, etc.). They then tried to connect themselves with the 'Adnān genealogy: perhaps by partly making the ancient Dūrhum [q. v.], the brothers-in-law of Ismā'il, to be direct descendants of Kahtān (Ibn Hishām, *op. cit.*, p. 4; Abu Hanifa al-Dinawari, *op. cit.*, p. 9; Ibn 'Abd Rabbihi, *op. cit.*, ii. 57; al-Mas'ūdī, *al-Tanbih*, p. 185; Abu 'l-Fida', *Mukhtaṣar Ta'rikh al-Bashar*, partly edited by Fleischer as *Historia Anteislamica*, p. 130, etc.), but especially by the fact that some of their genealogists gave Kahtān a genealogy direct from Ismā'il, who thus became "father of all the Arabs" (Ibn Hishām, *op. cit.*, p. 5; al-Tabari, *op. cit.*, iii. 2400; al-Mas'ūdī, *Murūdj*, iii. 142; do., *al-Tanbih*, p. 81; al-Dimashqī, *op. cit.*, p. 246, 252; al-Sam'ānī, *al-Ausāb*, f. 443b, etc.). They may be also responsible for the theory that the Kahtān, together with the 'Ād [q. v.], Thamūd, Tasm, Imlik (Amalek, see 'AMĀLIK), Djadis [q. v.], etc., the so-called "lost Arabs" (*al-'Arab al-bā'idā*) represent the genuine (primary) Arabs (*al-'Arab al-'ariba* or *al-arbā'* etc.), while the Ma'add on the other hand are "arabised (secondary) Arabs" (*al-'Arab al-muta'ariba*; cf. on this theory, as well as on the other, according to which only the 'Ād, Thamūd, etc., are 'Arab 'ariba, the Kahtān on the contrary 'Arab muta'ariba and the Ma'add 'Arab musta'ariba, Lane, *Lexicon*, sub *al-'Arab*; Knobel, *op. cit.*, p. 179 sq.; al-Tahiri, *op. cit.*, i. 215; al-Mas'ūdī, *al-Tanbih*, p. 188; also above i. 372b sq.). Finally, we may here mention the eschatological ḥadīth of South Arabian origin, which prophesies the rule in time to come of a noble, pious Kahtānid; see Muṭahhar b. Ṭāhir al-Makdisī, *al-Baḍ' wa 'l-Ta'rikh*, ed. Huart, ii. 183 sq. and Snouck Hurgronje, *Der Mahdi*, p. 12 (= *Verstreide Geschriften*, i. 156).

The native lexicons (*Lisān al-'Arab*, *Kāmūs*, and *Taḍj al-Awṣ*, sub *kh*), give two nisbas from Kahtān, both "good Arabic": *Kahtānī* and the remarkable form *Akhṭānī*. A tribe Kahtān (more accurately Gēḥatān, sing. Gḥatānī, plur. Gḥatān)

still exists, as was briefly mentioned above. It is exclusively Beduin and pitches its tents in the desert on the eastern borders of the northern Yemen and of the southern Hīdžāz (roughly between 18° and 23° N. Lat.); but little bodies of them penetrate in the summer far into the Nedjd, as far as Washm, and even to the province of Kaṣīm. It is very numerous, rich in cattle and powerful, and also very proud as the "noblest blood of the South Arabians". Its nobility seems, however, to find expression primarily in a fanatical savagery and villainous cruelty, unparalleled elsewhere even among the sons of Arabia's deserts.

A clan, Kahlān, has also survived down to the present day (see i. 373b).

(A. FISCHER)

KAHWA, an Arabic word of uncertain etymology, which is the basis of the usual words for coffee in various languages. Originally a name for wine, found already in the old poetry (see

Landberg, *Etudes*, ii. 1057 and *al-Aghānī*, 1st ed., vi. 110, 77, viii. 79, 16, xx. 180, 3), this word was transferred towards the end of the viiith (xivth) century in the Yemen to the beverage made from the berry of the coffee tree. The assumption of such a transference of meaning is, it is true, not accepted by some who consider *kahwa* — at least in the sense of coffee — as a word of African origin and seek to connect it with the alleged home of the coffee tree, Kaffa, although they also assume contamination with *kahwa* "wine" (see Ritter, *Erkunde*, xiii. 566; Vollers in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.* i. 657; *Hobson-Jobson*; Landberg, *op. cit.*, ii. 1057—66). On the other hand, it should be noted that the holders of this view do not prove that coffee was exported from Kaffa as early as 1400, and do not quote a similar word in the languages of Abyssinia and adjoining lands, while the usual word for coffee there (*būn* for tree, berry and beverage; see Armbruster, *Initia Amharica*, ii. Cambridge 1910, p. 58; Coulbeaux and Schreiber, *Dict. de la langue tigray*, Vienna 1915, p. 408; L. Reinisch, *Die Kafa-Sprache* etc., ii. in *Sitzungsber. der Kais. Akad. der Wiss. zu Wien*, phil.-hist. Cl., 1888, cxvi. 273; see also Landberg, *op. cit.*, ii. 1055 sq.) has passed in the form *bunn* (in rhyme also *būn*) as a name of the tree and berry into Arabic. But as it is probable that the drinking of coffee spread in the Yemen out of Šūfī circles and a special significance was given to wine in the poetical language of the mystics, a transference of the poetic name for wine to the new beverage would not be at all impossible.

The coffee tree was not indigenous to South Arabia and was probably introduced from the highlands of Abyssinia, where it is found in profusion growing wild, notably in Kaffa. But there is no trace of authority for the assertion (Defflers and *Handbook of Arabia*) that the coffee tree was already introduced into Yemen in the period of the Abyssinian conquest and of the fall of the Ḥimyar kingdom, about a century before the Hījra. In this case the older literature would hardly have left it unnoticed.

The earliest mention of coffee so far found is in writings of the xth (xvth) century. According to (Aḥmad) Ibn 'Abd al-Ghaffār, quoted by 'Abd al-Kādir al-Djazīrī in his essay (see below, *Bibliography*), the popularity of *kahwa* as a beverage in the Yemen was first known in Cairo in the beginning of the xth (xvth) century. It was there taken especially in Šūfī circles, as it produced the necessary wakefulness for the nightly devotional exercises. According to this authority, it had been brought to 'Aden by the jurist Muḥammad b. Sa'īd al-Dhabhānī (died 875 = 1470/1) who had become acquainted with it during an involuntary stay on the African coast and on his return devoted himself to mysticism; and it soon became popular.

Another reference in al-Djazīrī, however, ascribes the introduction of the beverage to 'Alī b. 'Omar al-Shādhili. Abu 'l-Ḥasan 'Alī b. 'Omar of the family of Da'sain died in 821 (1418) according to al-Shardjī. He also might have become acquainted with coffee in Abyssinia, for after entering the Shādhiliya order, he lived for a period in the entourage of the king Sa'īd al-Dīn (i. e. between 788 = 1386 and 805 or 807 = 1401/2 or 1404/5, cf. al-Maḥrizī, *al-Ilmām bi-Aḥbār man*

bi-Arḍ al-Ḥabash min Mulūk al-Islām, ed. Rinck, Leiden 1790, p. 24; Paulitschke, *Harar*, Leipzig 1888, p. 504 *infra*), who gave him his sister to wife. Even after he had founded his *sāwiya* in al-Makhā (to follow al-Shardjī) gifts continued to reach him from admirers in Abyssinia.

In the treatise by 'Abd al-Kādir (Ibn) al-'Aidārūs (see below, *Bibliography*) 'Alī b. 'Omar, the saint of al-Makhā, is alone mentioned as the introducer of the beverage *kahwa* (*muhādith al-kahwa*, f. 341^b; *wādī'uhā*, f. 347^b, in a verse by Shaikh b. 'Abd Allāh al-'Aidārūs, died 990 = 1582). His claim to fame is, it is true, qualified by the note "that, before he prepared the beverage, only the kernel of the husk i. e. the *bunn* was used and the husks were thrown on the dung-heaps (f. 342^a). In a verse attributed to him, however, he praises the *kahwat al-bunn* as a dispeller of sleep and aid to devotional exercises (f. 342^b). While al-Shardjī says not a word of his connection with coffee, 'Abd al-Kādir al-'Aidārūs numbers the introduction of the beverage among his miracles (*karāmāt*, f. 342^a).

The legend as given by Ḥādījī Khalifa seems to have made two individuals out of 'Alī b. 'Omar, of whom 'Alī represents the founder of the Shādhiliya order, Abu 'l-Ḥasan 'Alī b. 'Abd Allāh (d. 656 = 1258; see al-Sharānī, *Lawāḥiḥ al-Anwār*, Cairo 1299, ii. 5) and his disciple 'Omar the saint of al-Makhā (Mukhā). The latter was ordered to settle, by command of his teacher who had appeared to him at his own funeral, at the place where a wooden ball which he gave him should come to rest. This is how he came to Mukhā. On the charge of having misconducted himself with the daughter of the king who was staying with him for a cure, he was banished into the mountains of Uṣāb (Wuṣāb, N. E. of Zabīd). He and his disciples, who followed him into exile, are said to have sustained themselves with *kahwa* (here the berry) and finally to have made a decoction from it. His visitors were cured of an itch, epidemic in Mukhā, by taking coffee and this procured the saint an honourable return.

The third person who is given credit for the introduction of coffee is Abū Bakr b. 'Abd Allāh al-'Aidārūs. The recent essay by 'Alawī al-Saḥkāf (see below, *Bibliography*) contains a statement from the *Tārīkh* of al-Nadīm al-Ghazzī (i. e. apparently *al-Kawākib al-sā'ira bi-Manāḥib 'Ulamā' al-Mi'a al-ūshira* by Nadīm al-Dīn al-Ghazzī, Brockelmann, *Gesch. der Arab. Litt.*, ii. 291 sq.), according to which this Šūfī, who is called here a Shādhili, once came upon a coffee tree in his wanderings and ate the berries. As he noticed their stimulating effect he took them as a food and recommended them to his disciples so that they became known in different countries. The reference here is probably to the Šūfī of this name who died in 'Aden in 914 (1508—9) (Abū Makhrāma, Leiden MS. 1956, f. 188; al-Nabḥānī, *Djāmi' Karāmāt al-Awliyā'*, Cairo 1329, i. 263), whose grave is still honoured there. 'Abd al-Kādir (Ibn) al-'Aidārūs only mentions his fondness of coffee and quotes his *ḥaṣida* in praise of it. On the other hand, Abu 'l-Ḥasan Muḥammad al-Bakrī in his tractate *Iṭīfā' al-Safwa li-Taṣḥiyat al-Kahwa*, f. 2^b mentions Abū Bakr al-'Aidārūs as the introducer (*munshi'*) of the *kahwa*.

According to Glaser (*Mitt. der Geogr. Gesellsch. in Wien*, xxx. 25), it is stated in a Turkish source (which he does not give) that in the

xvth century the wālī Ūzdemir (cf. Ahmed Rashid, *Tārīkh*, i. 83 sqq.) transplanted coffee from Africa to Yemen.

This fact, that the merit of introducing coffee as a beverage is given to different individuals suggests that we have to deal with various local traditions. The tradition of Mukhā is the most firmly established and most widely known; therefore 'Alī b. 'Omar al-Shādhilī — who is frequently confused with the founder of the Shādhiliya order (d'Ohsson, von Hammer, Rinn) — has become the patron saint of coffee-growers, coffee-house keepers and coffee-drinkers (cf. Goldziher, *Abhandl. zur arab. Philologie*, ii. p. lxxxviii). In Algeria coffee is also known as *shādīliye* after him (Beaussier, *Dict. pratique arabe-français*, Algiers 1871). He is popularly regarded as the founder of Mukhā, which is, however, already mentioned by al-Hamdānī (*Ṣifāt Djasirat al-'Arab*, ed. D. H. Müller, p. 74, 16, 87, 5, 119, 18), although it owed its rise to coffee. A well, a gate and the mosque over his grave preserve the memory of al-Shādhilī in Mukhā (Niebuhr, *Reisebeschreibung nach Arabien*, I, Kopenhagen 1774, 438—440; cf. also the legend in Hādjdjī Khalifa, and 'Abd al-Karīm Kashmirī, *Bayān-i Wāqī'*, French transl. by Langlès entitled *Voyage de l'Inde à la Mekke par Abdoul Kérym*, Paris 1797, p. 202 sq.).

Al-Shādhilī and al-'Aidarūs (probably not Haidar, as de Sacy, *Chrest. Arabe*², i. 461 thinks) have become Christian monks named Sciadli and Aidrus in the legend given by Naironi. The motif of the camels or goats in which the enlivening effects of coffee were first noticed has so far not been found in Oriental sources. — According to a popular legend, the coffee tree shot up from goat's dung sown by the saint (Snouck Hurgronje, *The Atchinese*, Leiden 1906, i. 260).

The legends are probably correct in saying that the taking of coffee in Arabia first began among Yemeni Šūfis. They were particularly fond of the beverage because its effects facilitated the performance of their religious ceremonies. They therefore considered this as its original destination (*marwāt ašlī*) and found that it incited to good and hastened on the mystical raptures (*fatḥ*) (*Ṣafwat al-Ṣafwa* f. 342^b). The pious intention, with which it was taken, made the drinking of coffee a good work (*tā'a*). It received a ceremonial character, being accompanied by the recitation of a so-called *rātīb*. This *rātīb* consisted in the repetition 116 times of the invocation *yā kawī*. This usage is based — apart from the similarity in sound between *kahwa* and *kawī* — on the fact that the numerical value of *kawī*, i. e. 116, is the same as that of *kawī*, i. e. *kawī*, "strong", one of the most beautiful names of Allāh [cf. above i. 303^a]. According to Shaikh b. 'Abd Allāh al-'Aidarūs, the recitation of the *fātiha* [q. v.] should precede it. Shaikh b. Ismā'il Bā 'Alawī of al-Shihir, however, prescribed the fourfold repetition of the Sūra *Yā-Sin* (Sūra XXXVI) with a hundred-fold *taṣliya* on the Prophet as *rātīb* (*Ṣafwat al-Ṣafwa*, f. 344^b *infra* sq., 345^b, 347^a). Thus when taken with a righteous intention and devotion and genuine religious conviction, coffee-drinking leads to the enjoyment of the *kahwa ma'naviya*, the "ideal *kahwa*", also called *kahwat al-sūfiya*, which is explained as "the enjoyment which the people of God (*ahl Allāh*) feel in beholding the hidden mysteries and attain-

ing the wonderful disclosures (*mukāshafāt*) and the great revelations (*futūḥāt*)" (*op. cit.*, f. 341^b, 345^a *supra*, 345^b *infra* sq.). — 'Alī b. 'Omar al-Shādhilī is reported to have said that coffee, like the water of Zamzam, serves the purpose for which it is drunk (*op. cit.*, f. 348^a, cf. above ii. 588^a *infra*), and the saying has been handed down of Ahmad b. 'Alawī Bā Djaḥdab (d. 973 = 1565/66; cf. al-Nabhānī, *op. cit.*, i. 330) who in his last years is said to have lived on nothing but coffee: — "He who dies with some *kahwa* in his body enters not into hell-fire" (*Ṣafwat al-Ṣafwa*, f. 344^b).

Coffee was probably not known as a beverage in South Arabia much earlier than the turn of the viiith (xivth) century. Whether the tree was introduced long before this is doubtful. Ibn Ḥadjar al-Haitamī [q. v.] speaks in his *Fīb* (commentary on *al-'Uḍab*, probably by 'Alī b. 'Omar al-Saifi; cf. Brockelmann, *op. cit.*, ii. 403 sq.) of a beverage which appeared (viz. in Mecca) shortly before the xth century A. H. (i. e. about the end of the xvth century) and was prepared from the husk of the *bunn*, a tree introduced from the region of Zailā, and called *kahwa* (quotation in 'Alawī al-Sakḥāf, p. 9). Among the jurists who gave an opinion in favour of coffee, the oldest is Djamāl al-Dīn Muḥammad b. Sa'id b. 'Alī b. Muḥammad Kabbīn al-'Adanī (died in 'Aden 842 = 1438, cf. Abū Makḥrama, f. 159^b sq.; according to al-Nabhānī, *op. cit.*, i. 155 sq.: 829 = 1425/26).

An *urduza* of Sharaf al-Dīn al-'Amriṭī gives the year 817 (1414/5) as the date at which coffee became domesticated in Mecca (Pertsch, *Die Arab. Handschr. zu Göttingen*, iv. N^o 2107). According to the '*Umdat al-Ṣafwa*', however, the drinking of a decoction of coffee husks first appeared towards the end of the ixth (xvth) century, while previously only the eating of the fruit as a delicacy (*naḥl*) was known. The drinking of coffee dropped out of use again for a time, indeed, but it finally established itself and soon people drank coffee even in the sacred mosque and regarded it as a welcome tonic at *dhikr* and *marḥid*. Coffee-houses (*buyūt al-kahwa*) were soon opened, where men and women met to music or where they played chess or a similar game for a stake. This and the custom of handing round the coffee on the manner of wine naturally aroused the indignation of the "unco guid" of whom many had from the first set their faces against the beverage as an objectionable innovation. They found a champion in Khā'ir Bey, who was appointed chief of the police in Mecca in 917 (1511) by Kānsūh [q. v.]. He carried through the proclamation of coffee as forbidden (*ḥarām*) in the same year, in an assembly of jurists of the different schools in which the unfavourable judgment of two well-known physicians and the evidence of a number of coffee-drinkers regarding its intoxicating and dangerous effects ultimately decided the issue. The *kādīs* signed the protocol of the assembly. Only the then mufti of Mecca dared to decline his co-operation and became therefore the object of coarse suspicions. By putting the questions in a clever way they were at the same time able to get an opinion condemning coffee from the faḳīhs of Cairo. The rescript which Kānsūh issued in reply to the protocol sent to Cairo did not completely fulfil the hopes of the opponents of coffee as it contained no absolute interdiction but only allowed measures to be taken

against any concomitant features contrary to religion. Ibn Ḥaǧǧar al-Haitami, as late as about 950 (1543), had a vigorous discussion, at a wedding feast (*walimat 'urs*) where coffee was offered to the guests, on the new beverage with a prominent mufti, who declared it intoxicating and forbidden. Ibn Ḥaǧǧar refers to the assembly above mentioned and cannot find words strong enough to condemn its decision and the manner in which it was reached (*Ṣafwat al-Ṣafwa*, f. 352^b — 356^a, quotation from the *Mu'djam Mashā'ikh*).

In accordance with this verdict, Khā'ir Bey forbade the taking and sale of coffee and had a number of vendors punished and their stocks burned, so that coffee husks (*kishr*) disappeared from the market. But Kānṣūh's rescript again gave the coffee-drinkers courage and when in the next year one of the leading opponents of coffee was subjected to disciplinary punishment by a high official from Egypt and Khā'ir Bey was replaced by a successor who was not averse to coffee, they were again able to enjoy with impunity the beverage, to which these measures had only attracted the attention of wider circles. Only occasionally do we still read of action being taken against disgraceful proceedings in coffee-houses. An edict forbidding coffee issued by the Sultan of Turkey during the Ḥaǧǧī in 950 (1544) was hardly respected at all.

In Cairo coffee was first made known in the first decade of the xth (xvth) century in the Azhar quarter by Ṣūfis from Yemen, who held their *dhikr*'s in the mosque with their companions in opinion from Mekka and Madina while partaking of coffee. After it had been publicly sold and drunk there for a time, the faḳīh Aḥmad b. 'Abd al-Ḥaḳḳ al-Sunbātī, famous as a preacher, declared it forbidden in 939 (1532/3). Two years later in a meeting for exhortation in the Azhar mosque he so incited his hearers against the beverage that they fell upon the coffee-houses, made short work of their contents and maltreated the occupiers. The difference of opinion thus emphasised caused the ḳāḍī Muḥammad b. Ilyās al-Ḥanaḳī to take the opinions of prominent scholars; as a result of personal observation of the effects of coffee he confirmed the opinion of those who considered the beverage a permitted one. Although in the years following coffee was from time to time for brief periods forbidden in Cairo, the number of its devotees, even among the religious authorities, steadily increased.

Several notable theologians had given *fatwā*'s in favour of coffee, for example, Zakariyā al-Anṣārī (died 926 = 1520), Aḥmad b. 'Omar al-Saifī (d. 930 = 1523/24), Abu 'l-Ḥasan Muḥammad al-Bakrī al-Ṣiddīqī (died between 950 and 960 = 1543—1553), who in verses in praise of the coffee also gives the advice that the opinion of Ibn 'Abd al-Ḥaḳḳ should be set aside and the *fatwā* of Abu 'l-Ḥasan followed (*Ṣafwat al-Ṣafwa*, f. 349^{a, b}; cf. also al-Ṣiddīqī's verses in Bahā' al-Dīn al-'Āmilī's *al-Kashkūl*, Būlāḳ 1288, i. 19), 'Abd al-Raḥmān b. Ziyād al-Zabīdī (d. 975 = 1567/68) and others (*Ṣafwat al-Ṣafwa*, f. 348^b sq.). — Gradually the view came to prevail that coffee was in general permitted (*mubāḥ*), but that under certain circumstances the other legal categories could be applied to it also.

Intercourse with the holy cities and with Egypt brought coffee to Syria, Persia and Turkey.

Rauwolf in 1573 found the beverage widely known in Syria (Halab). In Constantinople and Rūmī coffee first appeared in the reign of Sulaimān I (926—974 = 1520—1566). In 962 (1554) a man from Halab and another from Damascus opened the first coffee-houses (*kahwe-khāne*) in Constantinople. These soon attracted gentlemen of leisure, wits and literary men seeking distraction and amusement, who spent the time over their coffee reading or playing chess or backgammon, while poets submitted their latest poems for the verdict of their acquaintances. This new institution was by way of joke called also *mekteb-i 'irfān* (school of knowledge). The coffee-house met with such approval that it soon attracted civil servants, ḳāḍis and professors also. Poets like Māmiyā al-Rūmī (cf. Bahā' al-Dīn al-'Āmilī, *op. cit.*, p. 147) and later Belighī sang the praises of coffee, and the opinion expressed in 928 by Sulaimān's court physician, Badr al-Dīn al-Ḳūṣūnī (Leiden MS. 945, f. 58) was not unfavourable. The coffee-houses increased rapidly in number. Among the servants of the upper classes were *kahwedji*, whose special task was the preparation of coffee, and at the court they were subordinate to a *kahwedjibashī*. In religious circles, however, it was found that the coffee-house was prejudicial to the mosque, and the 'ulamā' thought the coffee-house even worse than the wine-room. The preachers were specially eager for the prohibition of coffee and the way was paved for them by the muftis (according to d'Ohsen: Abu 'l-Su'ūd) with an opinion that (roasted) coffee was to be considered coal and therefore forbidden (the same argument is found in the treatise by Muḥammad ('Alī?) Dedeḥ, Leiden MS. 682, i. f. 4^b). The fact that current politics were discussed in the coffee-houses, the government's acts criticised and intrigues woven, was the principal cause for the intervention of the authorities. Edicts issued in the reigns of Murād III (982—1003 = 1574—95) and Aḥmad I (1012—16 = 1613—17) were not strictly enforced and still less obeyed. The religious authorities met public opinion by declaring coffee legal, if it had not reached the degree of being like coal. The grand viziers also benefited as they levied one or two gold pieces a day on the coffee-houses, and were therefore anxious to increase their number.

Murād IV (1032—49 = 1623—40) issued a strict prohibition of coffee (and tobacco). He had all the coffee-houses torn down and many forfeited their lives for the sake of coffee. Under Mehmed IV (1058—99 = 1648—87), while the sale of coffee in the streets was allowed, the prohibition of coffee-houses was at first renewed by the grand vizier Köprülü for political reasons. This prohibition could not possibly be kept in force permanently, and later we even read of measures taken by the government to lower the high price of coffee. From Sulaimān's time a tax was levied on coffee which was at a rate of 8 aspers per *okka* for Muslim buyers and 10 for Christian; in 1109 (1697) there was added a super-tax of 5 paras the *okka*, which was called *bid'at-i kahwe*, for both.

According to von Hammer, *Geschichte* etc., v. 713, the question of the correct spelling of *kahwa* with *h* or *k* has been disputed in Turkey. *Kahwa* is actually found in several manuscripts e. g. in the opinion of al-Ḳūṣūnī above mentioned.

The coffee tree flourishes in south-western Ara-

bia and does best on the western side of the Seiat at a height of 3400—6800 feet, where it finds in the depths of the valleys and on the slopes a fertile, moist soil and the uniform warm temperature necessary for it. The plantations on the slopes arranged in terraces (see the picture in *Handbook of Arabia*, Pl. xiv.), however, need regular watering; in addition, the mist ('*umā*', *sukhaimānī*) that rises in thick clouds out of Tihāma brings them moisture. To protect the trees from the heat of the sun and from locusts they are surrounded by shady trees like carob trees, tamarinds, etc. The tree which is raised from seed (or propagated from layers) reaches a height of 6 to 16 feet with a diameter of 2—2½ inches and yields berries in the fourth year. It is an evergreen and throughout the year bears both blossom and berries in various stages of ripeness so that there is really no fixed harvest-time. The main harvest, however, varying with kind and locality, usually falls in the months from March to June. After the berries have been carefully gathered and allowed to dry they are shelled in a mill. The beans and the husks are then dried in the sun a second time.

The coffee tree is found as far north as 'Asir [q. v.] where it is said to flourish exceedingly on mount *Sh-dh-y* (*Shadhā*) in the land of the Zuhārān (north of the Wādī Dawka, Doka on Stieler's map). (Sharaf 'Abd al-Muhsin al-Barakātī, *al-Rihla al-Yamāniya*, Cairo 1330, p. 16; cf. J. L. Burckhardt, *Travels in Arabia*, London 1829, ii. 377; for other places in 'Asir see *Handbook of Arabia*, p. 136, 137). The most southern areas of coffee cultivation are Bilād al-Hudjriya, Wādī Warazān and Wādī Banā. To the east we find coffee grown in the land of the Yān' and in the Djawf. But it is the Harāz mountains, the valley of al-Farsh belonging to the land of the Banū Maṭar, the Djabal Raima and the district round 'Udain that are particularly celebrated for their excellent coffee. (For further information see Grohmann's book [s. *Bibliography*] where, too, the varieties are detailed).

The cultivation of coffee was and still is of great economic importance for Yemen. In the time of Hādjdjī Khalifa, i. e. about the middle of the xviiith century, the annual export was 80,000 bales. Šan'a and Bait al-Fakih [q. v.] were centres of coffee trade. Mukhā, which the coffee trade brought to great prosperity, declined completely in the sixteenth century and has now lost all importance. Coffee is now exported through al-Hudaida, where already in Niebuhr's time an important traffic was found, and especially 'Aden (for details see von Neimans, *Zeitschr. d. Deutsch. Morgenl. Gesellschaft.*, xii. 397—403. W. Schmidt, and in the *Handbook of Arabia*).

It has always been the custom in Yemen to drink preferably a decoction of the husks, which like the latter is called *kishr*, and is to be obtained in numerous coffee-houses (*miḥkaya*). To *kishr* as well as to the coffee made from beans, flavourings such as cardamom, ginger, cloves, etc., are often added. In the social life of the Arab no ceremony or festival is complete without coffee, and coffee is the first thing offered to a visitor. An invitation to coffee in Mecca means an invitation to a meal. The Arabs drink coffee without sugar; only in South Arabia milk is occasionally taken; sugar has become the vogue among the Turks.

The fresh ripe fruit is pleasing to the taste and nourishing. The eating of the *bunn* — it is not

stated whether fresh or dried — is particularly recommended in a *ḥaṣīda* by Hamza b. 'Abd Allāh al-Nāshiri (*Ṣafwat al-Ṣafwa*, f. 358^b sq.) on account of its various health-giving virtues. We have no information available as to whether the custom usual among the Galla and in Kaffa of eating ground coffee mixed with butter is also usual in South Arabia. In Persia the eating of dry ground coffee is not unusual.

For Arabic and Persian works on coffee in addition to those quoted above and in the *Bibliography*, see Ahlwardt, *Verzeichn. der arab. Handschr. ... zu Berlin*, No. 5476—5480; Pertsch, *Die arab. Handschr. ... zu Gotha*, No. 94(9), 2105—2109, 2777; *Cat. Cod. Orient. Bibl. Acad. Lugduno-Batavae*, iii. No. 1401; Brockelmann, *Gesch. d. arab. Litter.*, iii. 317 and 333, No. 16.

Kahwa is also the name of the room in which coffee is served and thus comes to mean receptionroom and "coffee-house". The word is also used in the sense of "tip" and "present". — On coffeehouses in the East, see the works mentioned below by Olearius, Chardin, Russell, von Hammer, Snouck Hurgronje. — On coffee-vessels see Lane, Snouck Hurgronje, von Oppenheim, Socin, Euting, Landberg.

AL-KĀ'ID (A.). "the leader". From the root-meaning of the word the term may be applied to any one who leads, a horse, for example; indeed, a leading-camel may be called *kā'id*. More prominent is its application to a military leader. In the general significance of "officer", "army commander" the word has been in use from ancient times to the present day wherever the Arabic language is spoken, and in the Maghrib it has further been applied to certain offices. That the east has not kept pace with this development in meaning is probably, in part at least, due to the way in which, as a result of its political history, the military language had been filled with Turkish and Persian titles. In the west *kā'id* means firstly the commander of a tribe liable to service or of a province, wielding both military and civil powers, who usually — in Morocco down to the present day — has a residence in the district jail (*ka'ā*, *kaṣba*). Corresponding conditions among the Arabs in Spain are revealed in the Spanish *alcaide*, commander of a fortress or bailiff (Dozy-Engelmann, *Gloss. des mots espagnols et portugais dérivés de l'Arabe*², Leiden 1869, p. 79). A purely civil governor (in cities for example) is not *kā'id* but *āmīl*; on the other hand, in Morocco the headman of a village, who has another title in his civil capacity, becomes *ipso facto* a *kā'id* when he takes his place at the head of a body of militia. Further titles in the Moroccan army are *kā'id er-rhā* (*rhā* "mill" = the circle of an encampment) = colonel, *kā'id cl-mī'a* = captain, etc. If, then, the word *kā'id* is also used from Morocco to Tunisia with a genitive to describe a number of court, government or public offices, as a rule plainly endowed with authority (harbour-captain, chief of the roadways, etc., cf. Dozy, *Suppl. aux Dictionnaires arabes* and Beaussier, *Dict. arabe-français*), it is either a case of an originally military function or of a coined word like our "commander", "major", etc.

It is probably a case of borrowing from the military language when certain prominent stars, e. g. the last star in the Great Bear, or mountains (landmarks) are called *kā'id* (cf. Lane, *Lexicon*, s. v.). (G. KAMPFFMEYER)

KĀ'IDA, (A.) (lit. "sitting"), basis, foundation, later also rule, principle, etc. Cf. the dictionaries.

KĀ'IF. [See *KIYĀFA*.]

KAI-KĀ'US, a mythical king of Persia of the Kayānid dynasty. Called Kava Uça in the *Avesta*, he is regarded by Firdawsī as the son of Kai-Ķobād and by other sources as his grandson. He was, it is related, a warrior king who undertook a campaign into Māzandarān, which was inhabited by demons and protected by the white *dīw* (*dīw-i safīd*) who caused it to rain stones upon the invading army during the night; Rustam, son of Zāl, set out to deliver the king from his imprisonment and on his way met with seven adventures which have become celebrated in poetry [see *RUSTAM*]. The white *dīw* was overcome in his sleep and the blood from his heart restored their sight to the king and his army. Another war led the king into Hāmāvarān, a land lying to the south of Persia, which might be the Yemen (Hīmyar), for he set sail for it by sea from Makrān. His adventurous spirit took him as far as the mountain of Kāf [q. v.] which was believed to surround the earth. He married Sūdāba, daughter of the king of Hāmāvarān (al-Tha'ālibī: Sūdāna, ar. Su'dā, daughter of Dhu 'l-Adh'ār) and in the course of a visit to his father-in-law was treacherously thrown into prison in a castle on the shore of the sea. It was Rustam who came to deliver him.

Being master of the demons, Kai-Kā'ūs used their forces to make them build castles in Alburj (al-Tha'ālibī, p. 165: the Tower of Babel; do., *Ḥamza al-Isfahānī*, ed. Gottwaldt, p. 35; *Mudjmal al-Tawārikh*, *Journ. Asiat.*, Ser. iii., xi. (1841), p. 325). To revenge themselves for this forced labour one of them suggested to the king the possibility of rising up to heaven. For this purpose the king trained young eagles and attaching four to his throne had himself carried off towards the stars. When the eagles felt tired, they came down again and threw the king on the ground in the neighbourhood of Āmul [q. v.], in the middle of the forest, where he was found by the nobles who had set out to look for him. A son of the king, Siyāwakhsh (Siyāwash, *Çyāvarshāna*), was accused by his step-mother Sūdāba, whose overtures he had resisted, of having attempted her virtue; he cleared himself by the ordeal by fire, by walking unharmed through a narrow space between two blazing piles of wood. The young prince then asked leave to fight the Tūrānians, whom he encountered near Balkh [q. v.]. The death of Siyāwakhsh, now the son-in-law of Afrāsiyāb [q. v.] and victim of the intrigues of Sūdāba, decided Rustam to invade Persia; the hero put the queen to death before the king's eyes and then hurled himself on Tūrān to avenge his country.

Kai-Kā'ūs reigned one hundred and fifty years the latter of which he passed in retirement; he left the throne to his grandson Kai-Khusraw [q. v.], son of Siyāwakhsh.

KAIKĀ'US, the name of two Seldjūq rulers in Asia Minor.

KAIKĀ'US I, al-SULTĀN al-GHĀLIB 'IZZ al-DUNYĀ wa 'l-DĪN K. B. KAIKHUSRAW, BURHĀN AMĪRĪ 'l-MU'MINĪN, reigned from 606–616 (1210–1219). He at once made peace with Theodore Lascaris (see below *KAIKHUSRAW I*) because he had to defend his rights against his uncle Toghrilshāh of Erzerūm and his brother KaiĶobād, who were contesting his succession. The Armenians under Lifun (Leon), who seized the opportunity to capture Heraclea and Larenda and to plunder Ķai-şariya, were temporarily induced to retire on payment of a considerable sum. Toghrilshāh also soon retired to Erzerūm, but KaiĶobād, who had seized the fortress of Anguria, held out for a considerable time and was only forced to surrender after several years' siege. He was thereupon provisionally imprisoned in the fortress of Minghar (*Marāgha*, now Mizere, S. E. of Malatya; cf. Deffrémery, *Hist. des Croisades, Documents Arméniens*, i. 143, note 3). By a lucky coup Kaikā'ūs succeeded in capturing the king of Trebizond, Ķir Aleks, who had to purchase his freedom by ceding the important harbour of Sinope and paying a yearly tribute (611 = 1214). The town of Antālia, which had been taken by KaiKhusrāw shortly before, but had expelled the Turkish garrison with the help of Christian knights, was again reconquered. In 613 (1216) Kaikā'ūs made an inroad into the land of the Armenians and besieged the fortress of Gaban (Ibn Bibī in place of this mentions two citadels, Ķinĉin and Gānĉin). The army sent to raise the siege included the Constable Constantine and several Barons of the Empire; it was completely routed by the Turks and the Constable with many Barons and knights were taken prisoner. Kaikā'ūs then returned to Ķaişariya, without having taken the fortress, after plundering the land and laying it completely waste. There was nothing left for the Armenians but to beg for peace and the release of prisoners. Both appeals were granted but their king had to pledge himself to pay tribute and to cede the important frontier fortresses of Lu'tu'a and Lawzad, which commanded the Cilician passes. When in 613 (1216) Kaikā'ūs's ally, the Aiyūbid of Ḥalab, al-Malik al-Zāhir, died, Kaikā'ūs arranged with the Aiyūbid lord of Sumaisāt, al-Malik al-Afḍal, that the latter should receive Ḥalab with the Sultān as his overlord. This plan seemed at first to be successful; the Turkish troops occupied Marzbān without difficulty (Kamāl al-Dīn, transl. Blochet, p. 158, mentions Burj al-Rasās, as does Yāqūt, ed. Wüstenfeld, ii. 604, and adds Tell Khālid also), Ra'bān, Tell Bāshir and Manbidj, but in place of handing the places over to al-Afḍal, as had been agreed, Kaikā'ūs put Turkish commanders over them. Friction thus arose and the Ḥalabis gained time to appeal for help to al-Malik al-Ashraf (cf. i. 222b) whose troops defeated the

advance-guard of the Turks at Tell Kabbāsīn (Yāqūt, i. 869). Kaikā'ūs then retired on Ablastin, while al-Ashraf drove the Turkish garrisons out of the fortresses they had taken. Furious at this failure, which he attributed to the treachery of his own emirs, Kaikā'ūs had several of them hanged and others imprisoned in a building called Rabaḍ Tartūsh by Yāqūt, which was then set on fire so that they were all burned to death. Soon afterwards he himself fell ill of consumption and died in 616 (1219). His body was buried in a hospital built by him in Siwās, where the inscription on his tomb, incised in 617, can still be read. Cf. v. Berchem, *Matériaux pour un Corpus Inscriptionum Arabicarum*, Part 3, p. 5 sqq.

KAİKĀ'ŪS II, 'IZZ AL-DUNYĀ WA 'L-DĪN B. KAİKHUSRAW II. When Kaikhusrav II [q. v.] died in 643 (1245), according to the arrangements he had made, his son 'Alā' al-Dīn Kaikōbād, whose mother was the Georgian princess Tamar, was to become Sultān, but he was barely 7 years old and had two older brothers — also still quite young — 'Izz al-Dīn and Rukn al-Dīn Kīlīdj Arslān. 'Izz al-Dīn was the eldest. His mother was the daughter of a Greek priest (Frater Simon in Vincent de Beauvais, Book xxxi., Ch. 26, who has, however, confused 'Izz al-Dīn and Rukn al-Dīn). The all-powerful vizier of the late Sultān, Shams al-Dīn Iṣfahānī, declared for him but did not yet dare to set aside the two other brothers, for the decision ultimately lay with the Mongol Khāns. The vizier therefore could not prevent Rukn al-Dīn, accompanied by several Turkish emirs, from travelling to the *urdu* of the Great Khān and being present at the great *kuriltai* at which Kuyuk was proclaimed Great Khān (1246). But in the meanwhile the Vizier (whom Frater Simon refers to as Losyr) was busy getting all power into his own hands and married 'Izz al-Dīn's mother to the great chagrin of the Turkish emirs. To attain his desires, he had several of them put to death, including, according to Vincent, a certain Salefadinus, i. e. Sharaf al-Dīn Maḥmūd, the governor of Arzandjān, a man well-disposed to the Christians, who understood French and German (*ibid.*, chap.

27). The result, however, was that the malcontent emirs laid a complaint against him before Kuyuk, who gave them a *yarlık* appointing Rukn al-Dīn Sultān. In addition, the Khān ordered that the vizier should be handed over to the relatives of the slaughtered emirs. He also laid down definitely the conditions of peace; the Seldjūks were to pay a yearly tribute of 1,200,000 hyperpes (bezants), 500 silk robes with gold brocade, 500 horses, 500 camels and 5,000 head of smaller animals and also presents which doubled the value of the whole. This is Vincent's story (Ch. 28). Cf. thereon Barthold in *Zapiski Wost. Otd. Imp. Arkh. Obshch.*, xviii. 0128; d'Ohsson, *Hist. des Mongols*, iii. 83.

When Rukn al-Dīn then returned to Asia Minor, he was recognized as Sultān, and the vizier, in accordance with the orders of the Great Khān, handed over to his enemies and put to death in 646 (1249); we have therefore coins with the name of Rukn al-Dīn as early as the year 646 (1249). In the meanwhile, however, news arrived of the death of the Great Khān and it was not till 1251 that his successor Mongke assumed full authority. The Turkish emirs therefore worried little about the *yarlık* and agreed with one another that Kaikhusrav's three sons should reign jointly. From 647 to 655 all three names appear on the coins, with the single exception that in 652 (1254) Rukn al-Dīn struck coins with his name in Ḳaṣariya, because he had been proclaimed sole Sultān there by the *ṣubashī* of the town, Şamsām al-Dīn. Long negotiations followed between Rukn al-Dīn and 'Izz al-Dīn, which led to nothing, however, till finally the sword brought a decision and Rukn al-Dīn was taken prisoner and sent to Amasia and later to Burghlu. In the meanwhile Mongke had demanded that 'Izz al-Dīn should come to him, but the latter had little desire to undertake the dangerous journey and therefore sent his brother 'Alā' al-Dīn Kaikōbād with rich presents. On the way, however, the prince was murdered and an enquiry instituted by the Great Khān to find who had a hand in it led to no result. An encounter between 'Izz al-Dīn's troops and those of the Mongol *Noyon* Baidju at Akşara in 654 (1256), in which the former were routed, forced 'Izz al-Dīn at once to seek refuge with Theodore Las-caris. The imprisoned Rukn al-Dīn was thereon liberated and recognized as Sultān (coins of 655). But scarcely had Baidju retired with his Mongols than 'Izz al-Dīn returned to Ḳonya, while Rukn al-Dīn was in Ḳaṣariya. After long negotiations and occasional skirmishes between the troops of the two brothers, a division of the kingdom was decided upon. Rukn al-Dīn was to reign eastwards from the Kızıl İrmak and 'Izz al-Dīn westwards. Both brothers were then to go to Hülāgū, who was then in the neighbourhood of Tibriz, to have the agreement confirmed. This was done, but soon afterwards the Mongols learned that 'Izz al-Dīn had entered into negotiations with their arch-enemies, the Mamlūks of Egypt, and put an end to his rule. 'Izz al-Dīn was still able to escape to Anṭālia and sailed from there with his relatives and a few faithful emirs to Constantinople, which after the fall of the Latin Empire, was again in the hands of the Greeks. There he was sure of a good reception on account of his having a Christian mother. But the presence of these Turks soon became embarrassing to the Emperor. They are

said to have begun a conspiracy to murder him and make 'Izz al-Dīn Emperor. When the Sultān's Christian uncles betrayed this plan, the Greeks lost no time in banishing the Sultān to Ainos, while his servants were incorporated as Turcopols in the Imperial armies, or imprisoned and put to death (662 = 1264). Six years later (668 = winter 1268/1269) 'Izz al-Dīn was liberated by troops sent to Constantinople by Mengü Timur and brought to the Crimea. There he married a daughter of Bereke Khān and died in 678 (1279/1280). On his son Mas'ūd see the separate article.

Bibliography: See that of the preceding article. Specially important here is Vincentius Bellovacensis, *Speculum historiale*, Books xxx. and xxxi., chap. 26, 27. Cf. also the Mongol and Byzantine historians (Nicephorus Gregoras and Georgius Acropolita); W. v. Tiesenhausen, *Recueil de matériaux relatifs à l'histoire de la Horde d'or*, i. 482.

KAI-KHUSRAW, a mythical king of Persia, of the Kayānid dynasty. Son of Siyāwak^{hsh}, who had left his father Kai-Kā'ūs and taken refuge in Tūrān where he had married the daughter of king Afrāsiyāb [q. v.], he was born after his father's death and brought up in this country among the shepherds of the mountains of Kālū (a valley near Bāmiyān), in ignorance of his illustrious origin; but this was soon revealed. At seven years old he was making bows and at ten he feared neither lions nor tigers. Then Pīrān, the vizier of Afrāsiyāb, took him into his house. In a dream Gudarz, an Iranian noble, descendant of the smith Kāwa, learned that the heir to the throne existed in enemy territory and sent his son Gēw to look for him; the latter found him quite by chance and recognized that Kai-Khusraw had on his arm the black mark that distinguished Kayānids; he therefore took him, along with his mother Farīgīs back to Persia.

There he found a rival in his uncle Fāriborz. To settle the question, Kai-Kā'ūs decided that the throne should belong to the one who captured the fortress of Bahmandiz, near Ardabil [q. v.], where Ahriman reigned. It was of course Kai-Khusraw who won, with the aid of celestial forces, and there he built a temple in honour of the sacred fire Ādhargushnasp. A journey through his empire showed him the devastations caused by the Tūrānians and he swore to undertake a war of vengeance against them. Aided by all the nobles, he sent out expeditions of which the first were unfortunate; but fortune soon changed and Kai-Khusraw took over the direction of the campaign. Afrāsiyāb, in spite of the help of the Emperor of China, was finally forced to fly and Kai-Khusraw sought him in vain beyond the seas. He was hidden in a cave in the mountains of Ādharbaidjān [q. v.] and his place of concealment could only be discovered by supernatural means. He was finally taken prisoner and beheaded. Thus was accomplished the vengeance due for the murder of Siyāwak^{hsh}.

Having succeeded his grandfather Kai-Kā'ūs, for whom he wept for 40 days, Kai-Khusraw reigned peacefully without any incident more remarkable than the killing of a dragon which had taken up its abode on the mountain of Kūshid, between Fārs and Iṣfahān (Iḥamza al-Iṣfahānī, ed. Gottwaldt, p. 36). At the end of his life, he asked God to

receive him into heaven and, after naming Luhiāsp as his successor, he undertook a mountain journey in the course of which he disappeared, after having washed in the water of a spring (the spring of eternal life). Those who had accompanied him perished in a snowstorm. It is clear that the figure of Kai-Khusraw corresponds to that of the Avestan hero Haosravan^h, who belongs to Indo-Iranian mythology.

KAIKHUSRAW, the name of three Seldjūk rulers in Asia Minor.

KAIKHUSRAW I, GHIVĀTH AL-DĪN, b. KĪLDĪ ARSLĀN. When the aged and enfeebled KĪLDĪ ARSLĀN II died in 588 (1192), he was staying with his youngest son Kaikhūraw, who governed Burghlū (i. e. Uluburlu) in his father's lifetime. Kaikhūraw concealed his father's death and only made it known, when he had arrived with the body in Konya, in order to have homage paid to himself as Sultān there. His brothers, each of whom ruled over a part of the Seldjūk kingdom, troubled about him just as little as they had done about their father in his later years. It was some time, however, — according to some not till 592 (1196), according to others 595 — before one of them was strong enough to take Konya from him. Finally Rukn al-Dīn Sulaimān [q. v.] succeeded in doing this, so that Kaikhūraw had to take to flight and after several unsuccessful attempts to gain his throne with the help of Leon of Armenia and of the neighbouring princes of Malatya, Haleb and Amid, wandered hither and thither (cf. the poem composed by him in Ibn Bībī, p. 29 sqq.), till he at length found a welcome with Alexius III in Constantinople. At this time he married a daughter of a distinguished Greek named Maurozomes, and the death soon afterwards of his brother in 600 (1204) opened up a good prospect of returning to Konya, because several emirs were dissatisfied with the rule of the latter's son KĪLDĪ ARSLĀN III, who was a minor. The main part in the plot was played by several members of the dynasty of the Dānīshmandiyya [q. v.], which had been deposed by KĪLDĪ ARSLĀN II. He actually succeeded in being proclaimed Sultān in Konya in spite of a *fatwā* of the kādī al-Tirmidhī, who declared him unworthy of the throne because of his Christian mother and his intercourse with the unbelievers, a *fatwā* which cost the issuer's life. According to Ibn al-Athīr, *al-Kāmil*, ed. Tornberg, xii. 160, Kaikhūraw besieged Trebizond in 602 (1206), apparently without much success. In 603 (1207) he took the important seaport of Anṭalia from Aldobrandini. From this capture date the first relations of the Seldjūks with the Venetians, to whom he granted a licence to trade (cf. Heyd, *Gesch. des Levantehandels*, i. 334). In 605

(1208), in alliance with al-Malik al-Zāhir of Ḥalab, he undertook a campaign against the Armenians and took the fortress of Pertus. In the beginning of 607 (1210) he fell in the battle at Khonās, perhaps in single combat with Theodore Lascaris. Cf. Nicephoros Gregoras, ed. Bonn, i. 17—21, and Georg. Acropolita, ed. Bonn, p. 16 and thereon Houtsma, in *Verslagen en Mededeelingen der Kon. Akad. van Wetensch.*, Afd. Letterk., Ser. 3, ix. (1893), p. 138 sqq.

KAIKHUSRAW II, GHIYĀTH AL-DUNYĀ WA 'L-DĪN B. KAIḲOBĀD, ascended the throne after the assassination of his father in 634 (1237), although KaiḲobād had not designated him as his successor but the son 'Izz al-Dīn by the Aiyūbid princess [cf. KAIḲOBĀD I], apparently because KaiḲhusraw, as Vincent says, was the son of a concubine (she was called Māh-peri Khātūn, as the inscription on her tomb at Kaiḡariya tells us) and, besides, was quite an insignificant man. But he had been appointed governor of Arzandjān by his father after the dismissal of Dā'ūd Shāh [see KAIḲOBĀD I] and was the candidate for the throne favoured by the Christian mercenaries.

The latter, with the Emir Sa'd al-Dīn Gobāk, carried through his proclamation as sultān, while the unfortunate 'Izz al-Dīn with his mother and a younger brother was put out of the way. Only the Khwārizmis [see KAIḲOBĀD I] were discontented with this, refused to obey orders and marched out of the Seldjūk kingdom in order to ravage the adjoining Aiyūbid lands. KaiḲhusraw on his side made peace with the Aiyūbids and endeavoured to cement it by a double marriage, at which the famous historian Kamāl al-Dīn officiated as plenipotentiary for the lord of Ḥalab. But as he did not trouble about the business of government, the Emir Sa'd al-Dīn took all the power into his own hands and began a regular reign of terror. He even declared himself an illegitimate son of KaiḲhusraw I, and finally went so far that the Sultān had him treacherously put to death. The Sultān then celebrated his marriage with the beautiful Georgian princess Tamar [see KAIḲOBĀD I], whose portrait he even wished to put on the coins; when he had to give up this idea he chose the emblem of the lion and rising sun, as is still usual in Persia to-day. The internal weakness of the kingdom soon showed itself (638 = 1241) when a Turkoman rising broke out, caused by the appearance of a certain saint Bābā Ishāk, whose messengers traversed the whole country and in their sermons denounced the luxurious life of the Sultān and nobles. Soon armed bands from the district of Sumaisāt and Malatya advanced in the direction of Siwās, Tokāt and Amasia and put to flight the Turkish generals sent against them. The execution of the pious Bābā only increased the number of his followers because he was revered as a messenger of God. Only the summoning of troops stationed on the frontiers in Erzerūm, among whom were the Christian mercenaries, finally put a bloody finish to the rebels' activities. Cf. the report in Vincent de Beauvais, Book xxx. chap. 139, 140. Here the prophet is called Baba Roisssole (= Rasūl Allāh), in al-Makrizi, *Histoire d'Égypte de Makrizi*, transl. Blochet, Paris 1908, p. 474. Il-Bābā (II) is probably a wrong reading for the Arabic article or is for Ilyās, as the name Ilyās Bābā is also found). Cf. Kiöprülüziade Mehmed Fu'ād, *Ilk Mutasavvifler*, p. 232. Scarcely was

this danger passed when in 639 (1241) Baidju Noyon appeared with his Mongols before Erzerūm and took and plundered the city after heavy fighting with the frontier troops. The vizier Muḥaddhib al-Dīn and his Nā'ib Shams al-Dīn Isfahānī hastened to gather a large army, to hire Armenian and Aiyūbid mercenaries and to advance against the Mongols with them; but the incapacity and cowardice of the Turkish troops lost the battle at Kozadagh (Muḥarram 6, 641 = June 26, 1243). Baidju thereupon marched on Siwās, which surrendered and was therefore spared, but Kaiḡariya was taken by force of arms, plundered and its inhabitants massacred. He then went into winter-quarters and the vizier succeeded in concluding a temporary peace, which, however, had still to be confirmed by the Great Khān. But as Ügedei died just then and the next *kuriltai* was not held till 1246 (see above, i. 682^a), the Turks had a few years' peace and the able Shams al-Dīn used the opportunity to seek the intervention of Batu Khān, on a ceremonious embassy with several other prominent Turks. He was entirely successful so that on his return he received the office of vizier rendered vacant by the death of Muḥaddhib al-Dīn. The good for nothing Sultān, who after the battle of Kozadagh, had been about to fly to the Greeks, again gathered some courage and in 1245 began a campaign against the Armenians, against whom he had a grievance because they had handed over to the Mongols his mother, who had taken refuge with their king, with her treasures. The objective of the campaign was Ṭarsūs on this occasion, but soon it had to be abandoned, because the rainy season began, after the land had been ravaged in fearful fashion. The Armenians by the treaty of peace bound themselves to pay tribute and to cede Bragana. When the leaders again appeared at the Sultān's court, the latter had died suddenly a week before.

Bibliography: See above under KAIḲĀ'US; of particular importance are here Vincent de Beauvais and the historians of the Mongols.

KAIKHUSRAW III, GHIYĀTH AL-DĪN, B. RUKN AL-DĪN KILĀDJ ARSLĀN was proclaimed Sultān, immediately on the murder of his father, by the all powerful Perwāna Mu'in al-Dīn Sulaimān [q. v.], although he was still a minor. The events in Asia Minor during his reign will be better discussed in the article SULAIMĀN. After the execution of the Perwāna (676 = 1277) KaiḲhusraw's reign was soon at an end, as his youth rendered him a mere tool in the hands of the Mongol rulers. His nephew Mas'ūd [q. v.], when he returned to Asia Minor after his father's death, was so successful in gaining the favour of the Great Khān Abāḡā [q. v.] that we have coins of his name as early as 681. The unfortunate KaiḲhusraw, who was entirely in the power of the Mongol prince and claimant Ḳunḡuraṭai, became involved in the latter's fall and was put to death in 682 (1283) in Arzandjān by order of the Ilkhān Aḥmad.

KAI-ḲOBĀD, a mythical king of Persia, of the Kayānid dynasty. The *Avesta* knows his name in the form Kavi Kavāta, but nothing more of him; tradition only preserves of him the fact that he was grateful to the Yazatas for having made his empire glorious and for having re-established the legitimate line of kings of Irān. The only source to consult is the *Shāh-nāma* of Firdawsī. To defend Irānian soil against the inva-

sions of the Tūrānian Afrāsiyāb, the Sace Zāl, father of Rustam, after ripe reflection and consultation with the *mōbed*'s decided on Kai-Ḳobād, who was living in the mountains of Alburdj (Hare-berezaiti) and sent his son to look for him. The latter found him in the midst of a banquet surrounded by boon comrades; he greeted him, but already the new king had seen in a dream two white falcons place a golden tiara on his head and was thus informed of the coming of the embassy; the care which he had taken to make himself remote had not prevented destiny from putting the messenger on his track. Becoming commander of the Irānian army, Rustam completely defeated Afrāsiyāb, who would have been made prisoner if the girdle by which he was being carried off had not broken. As a result of this victory, a peace was concluded which gave Persia its former frontier of the Oxus. Kai-Ḳobād spent his time in organizing the empire and traversing it, in founding cities and in lavishing riches on the heroes who had rebuilt the empire: Rustam, Kārin and others. He died at the end of a reign of a hundred years.

The *Mudjmal al-Tawārikh* (*Journ. Asiat.*, Ser. iii., xi. (1841), p. 320) which says that Kai-Ḳobād came from the mountains of Hamadhān, Alwand, and not from Alburdj, and Ḥamza al-Iṣfahānī (ed. Gottwaldt, p. 35) only mention his building cities, notably Ḳobādiyān on the Oxus, and the expansion of Iṣfahān. The *Bundihish* only gives fifteen years to the reign of this king instead of a hundred.

(CL. HUART.)

KAIḲOBĀD, the name of three Seldjūk Sultāns in Asia Minor.

KAIḲOBĀD I, 'ALĀ' AL-DUNYĀ WA 'L-DĪN ABŪ 'L-FATH K. B. KAIḲHUSRAW. How he had been taken prisoner in the reign of his brother has already been told under KAIKĀ'US I. The death of this brother in 616 (1219) opened to him not only the gates of the fortress of Gudharpet, where he was then interned, but also placed him on the Seldjūk throne. All the Turkish emirs do not seem to have been quite agreed about this, as they declared for another brother, Kaiferidūn, but KaiḲobād succeeded in gaining possession of Ḳonya, the capital, and in soon afterwards rendering the malcontent emirs harmless. He probably received valuable help from the Christian auxiliary troops, as Ibn Bibi relates that the Emīr Comnenus played an important part in these events. We know from the account in Vincent de Beauvais (Book xxx. ch. 144), which, however, refers to the reign of his successor, that the Greek emperors of Trebizond and Nicaea as well as the prince of Lampron had pledged themselves to place a number of troops—settled in a treaty—at the disposal of the Seldjūk. It is certain that this agreement was already in force in the reigns

of KaiḲhusraw I and KAIKĀ'US I, perhaps with the single limitation that it was not till the reign of the last named that this pledge held good for the Armenians also, and was renewed under KaiḲobād. At the beginning of his reign the Armenian king Leon II died (1219) and his daughter Isabella married the son of the Catholic prince of Antioch, which aroused a great dispute among the Armenians, the result of which was that the discontented barons under the leadership of Constantine, prince of Lampron, captured the prince, poisoned him and married his widow to Hāithum, the son of Constantine. A war with the prince of Antioch was thereby rendered inevitable; the Templars and Knights of St. John received orders from Rome not to take part in it so that Bohemund could not do much against the Armenians and, according to Ibn al-Athīr, had even to appeal for help to KaiḲobād. In any case, the latter took advantage of the dissensions among the Christians by seizing several Armenian forts on the Mediterranean coast and elsewhere, including the castle of Galonoros (καλὸν ὄρος), Candelor or Scandalor, which he chose for his winter residence and made a considerable seaport by his buildings there, so that the place became called Alaya ('Alā'iya) after him. In these circumstances there was nothing left for the prince of Lampron on his side, but to acknowledge the suzerainty of KaiḲobād and to support him with auxiliaries in his wars.

An attempt by Mas'ūd, the Ortuḳid of Āmi and Hiṣn Kaifa, who succeeded his father as lord of these towns in 619 (1222), to leave KaiḲobād' name out of the *khutba* and to make an alliance with the neighbouring Aiyūbid princes, cost him the fortresses of Kiakhta and Ćemishkezek. The troops sent to his assistance by al-Ashraf (see i., 222b) were scattered by the besieging army, but KaiḲobād hastened to heap tokens of honour on the captured commander and to release him, because much depended for him on the friendship of the Aiyūbids. Indeed he even sought the hand of an Aiyūbid princess. His request was granted and the marriage took place a little later. In 622 (1225), the prince of Arzandjān, Bahramshāh, died after a sixty years' reign, as also did the Seldjūk of Erzerūm, Tuḡhrilshāh. KaiḲobād thought this a good opportunity to seize where possible the lands of these rulers. Dā'ūdshāh, Bahramshāh's successor, did his best to avert the danger by entering into alliances with Djalāl al-Dīn Khwārizmshāh, with 'Alā' al-Dīn, Grand Master of the Assassins and with al-Ashraf, but in vain. KaiḲobād forced him to cede his territory and he was equally successful with another member of the Mengücek family, Muzaḡffar al-Dīn Muḡammad, who ruled over Coghlonia (Shāhin Karahisar). But before he could take Erzerūm too, he had to wage a difficult war with Djalāl al-Dīn, who was an ally of the prince of Erzerūm. After embassies had gone several times to and fro between the two rulers, KaiḲobād made an alliance with al-Ashraf, who then fought with Djalāl al-Dīn for the possession of the town of Khilāt. As soon as the Khwārizmshāh heard of this, he endeavoured by a hurried march to anticipate the union of the two enemy forces, but in the battle of Arzandjān on Ramaḡān 28, 627 (Aug. 10, 1230, cf. *Actes du 10^e Congrès internat. des Orientalistes*, iii. 19) he suffered a terrible defeat. The fate of the prince of Erze-

rūm was thus decided to be sent to the territory was annexed by Kaikobād. A war with the Georgians in 621 = 1232 was probably caused by a treaty of peace in which the Georgians had agreed to the marriage of their daughter with Kaikobād's son Kaikhusrāw. In the meantime the Mongols had again appeared in the regions. Djalāl al-Dīn had met his death and large bands of Khwārizms were coming again down for their own hand. Kaikobād then decided to occupy the district of Khartbart which al-Ashraf had received after the defeat of Djalāl al-Dīn but did not defend, and to take the roving bands of Khwārizms into his service as mercenaries. This brought about a coalition of all the Aiyūbid princes under the leadership of al-Kāmil of Egypt against Kaikobād. Soon their troops were on the Asia Minor frontier but they did not succeed in forcing the passes to enter the land; in addition the Aiyūbid leaders soon began to quarrel among themselves. In the end they had to be content with defending the town of Khartbart against the advancing Turks. But the latter could not be kept back. Al-Muẓaffar, the Aiyūbid of Iḥāmā, on whom the conduct of the defence fell, was captured along with the Ortukid ruling in Khartbart. The town henceforth (from 631 = 1234) belonged to the Seldjūks. Kaikobād next besieged and captured Harrān, Edessa and Raḡḡa (632 = 1235) which, however, were soon lost again to the Aiyūbids. Amid also was unsuccessfully besieged by him and when in 634 (1237) he was about to undertake a new campaign, he was poisoned in Kaṣariya, by order of his son Kaikhusrāw, it is said, because Kaikobād had appointed as his successor not him, but a younger son, borne to him by the Aiyūbid princess.

During Kaikobād's vigorous reign the Seldjūk kingdom attained its greatest extent and highest prosperity, for Kaikobād was not only an indefatigable soldier but also undertook great building operations, the remains of which in Konya, Siwās, 'Alaya and elsewhere keep alive the memory of the great Sultān to this day. He busied himself in opening up his lands to commerce and in developing the natural wealth of the country; with this object he even undertook an expedition to the Crimea, no doubt at the wish of the Italians. As a result his kingdom was at that time considered the richest in the world.

Bibliography: See above under KAIKĀ'US. Cf. also for the war with Djalāl al-Dīn: al-Nasawī, *Sirat al-Sultān Djalāl al-Dīn Mankobirtū* (Publ. de l'Ecole des Langues Or. Viv., Ser. iii., Vol. ix. x.), Arabic text and French transl. by Houdas; for the Banū Menguček: v. Berchem, *Matériaux pour un Corpus Inscript. Arab.*, iii. 55 sqq.; Houtsma in *Keleti Szemle*, 1904, p. 277 sqq.

KAIKOBĀD II, 'ALĀ' AL-DĪN B. KAIKHUSRAW, reigned together with his two brothers, Kaikā'ūs and Kīlīdj Arslān, as was briefly described in the article KAIKĀ'US II. Here we shall only refer to a coin described by Ghālīb Edhem, *Taḡwīm-i Mashūkāt-i Seldjūkiya*, N^o. 113, which bears the date 663 and the name Kaikobād alone, although Kaikobād had died 8 years before.

KAIKOBĀD III, 'ALĀ' AL-DĪN K. B. FARĀMARZ B. KAIKĀ'US was installed as Sultān by Ghazān Khān in 697 (1298). Of his history practically nothing is known with certainty. His name still

occurs on a coin of 701, so that the statement of Muḥammad Bīstī that he was again deposed in 700 seems to be wrong. Cf. v. Berchem, *Matériaux*, iii. 92 sqq. But as there is also a coin of Mas'ūd with the date 700, both princes seem to have borne the title Sultān in this year. That on the other hand Kaikobād was Sultān as early as 683, as has been deduced from the diploma alleged to have been given by him to 'Uthmān Ghāzī (Berchem, *Matériaux*, iii. 48-55) is certainly wrong, as is the calculation in Dhannābī, which gives him a reign of 20 years, 3 months and 13 days.

KAIKOBĀD, Muḥammad al-Dīn, king of Dihlī, was the son of Nāṣir al-Dīn Bughrā, king of Bengal and second son of Ghīyāth al-Dīn Balbān [v. BALBĀN] of Dihlī. On the death of his eldest son, Muḥammad Khān, who was slain by the Mughuls, Balbān made his second son, Bughrā Khān, who was governor of Pēngal, his heir, but the prince could not endure the restraint of his father's court, and was absent in Bengal when, in 1287, the throne became vacant, and the *amirs* made his son, Kaikobād, king. Kaikobād, who was barely eighteen years of age at the time of his accession, had been most strictly educated by his grandfather, and signalized his sudden emancipation by unbridled licentiousness. He put to death his cousin, Kaikhusrāw, son of Muḥammad Khān, and disgraced the minister, Khaṭir al-Dīn, after whose degradation Niẓām al-Dīn, nephew and son-in-law of the *Latā'if* of Dihlī, became supreme in the state. Early in the reign a horde of Mughuls, which had invaded India, was defeated; the prisoners taken were treated with great cruelty, and a large number of Mughuls who had accepted Islām and settled in India were massacred.

In 1288 the king's father, Bughrā Khān, marched from Bengal with the object of asserting his superior claim to the throne of Dihlī, but was met by Kaikobād on the banks of the Ghāgra and changed his attitude. The meeting was affectionate on both sides and the father privately warned his son against his evil courses and against the ambition of Niẓām al-Dīn, and although these counsels effected no improvement in the young king's morals, they induced him to remove his minister by poison. Late in 1288 Kaikobād was struck down with paralysis, the result of his debauchery, and the kingdom was thrown into confusion. Malik Djalāl al-Dīn Firūz Khaldjī, recently appointed governor of Baran, attempted to maintain order in the capital, but was suspected, with good reason, by the Turkish *amirs*, who proclaimed Shams al-Dīn Kayūmarth, the infant son of Kaikobād. The strife of the two factions continued while the king lay helpless, but Firūz Khaldjī at length overcame his opponents and ascended the throne. The wretched Kaikobād was murdered in June, 1290, and his body was thrown into the Djāmna.

Bibliography: Baranī, *Tārīkh-i Firūz Shāhī*; Badā'uni, *Muntakhab al-Tawārīkh*, transl. G. S. A. Ranking; Niẓām al-Dīn Aḥmad, *Tabaqāt-i Akbarī*; Firishṭa, *Gulshan-i Ibrāhīmī* (Bombay 1832); *The Cambridge History of India*, vol. iii. (T. W. HAIG)

KAIL (A.), the most general term for measure. The word next has the special meaning of measure for dry goods such as grain and cereals of all kinds and finally (like *kaila*) means

contents (or weight of the contents) of a definite measure of capacity. Another series of meanings is: measure, correct measure, tested, adjusted or official measure (or weight). In this meaning it is found on the Egyptian glass weights (e. g. *dirham kail*) and in the papyri as *kail al-dimīṣ* (μέτρον δημόσιον) -- a well known official measure for corn in general use for the levying of taxes, to be distinguished from *kanḳal*, which apparently means the varying, local measure.

Kaila is usual as meaning a definite measure, but we also find *kail* used, without any obvious differentiation, as a definite measure of capacity. The *kaila* is not part of the traditional system of capacity-measures of the Arabs (cf. *kaḳīz*) but like many other metrological terms in other languages has entered official language from the marketplace. We therefore nowhere find the *kaila* definitely coordinated with the system of measures. In the reign of the Mongol Il-Khān of Persia, Ghāzān Khān (694—703 = 1295—1304) we already find the attempt being made to make the *kaila* the standard measure of the corn trade. Rashīd al-Dīn tells us that this ruler proclaimed the *kaila* of Tabriz as the official unit of capacity and fixed its weight at 2600 dirhams (8.87 kg. = 19 lbs.). The further regulation that special measures, whose contents were to correspond to the above mentioned weight for the kind of grain in question, were to be prepared for every kind of cereal (oats, wheat, rice, peas, beans, sesame, millet etc.) shows that then as now business was done by weight and not by measure. In the Turkish empire also the *kaila* was the official unit in the corn trade and the *kaila* of Stamboul (*lingua franca* = kilo of Constantinople) of about 35 l. (7½ gallons) was ordered to be the standard measure. But every centre of trade had (and frequently still has) a local *kaila* which often differs considerably from the normal. The same is true of the *kailadja*, dealt with below. (E. VON ZAMBAUR)

KAILADJA, a measure of capacity in local use and varying very much, whose size varies between ½ and 2 l. (or kg. = ¾ to 3½ pints). The term existed as early as the 3rd century A. H.

(E. V. ZAMBAUR)

KĀ'IM (A.), "standing upright", "perpendicular". Hence *kā'im-maḳūm* "standing in place (of another)", "deputy"; *Kā'im al-Zamān* [q. v.]; *zūwiya kā'ima* "right angle". Also: "existing" for example in *kā'im bi-nafsihi* (or *bi-dhātūhi*) "self-existent" (said of God). *Kā'im bi-* also means "executing anything"; hence *al-kā'im bi-amrillāh* "He who executes God's command".

KĀ'IM-MAḲĀM (A.), "deputy"; pronounced and written *kaimaḳam* in Turkish, the name of a rank and office in Turkey. In the period before the *tanẓīmāt* reforms the word meant the officer (*rikābī humāyūn* or *āsītāne kaimaḳamī*), temporarily commissioned to act as deputy at the court or in the capital in the absence of the Grand

Vizier, the so-called *kaimaḳam pasha*. The case is an isolated one in which the Grand Vizier appointed an *ordu kaimaḳamī* to represent him in the camp (Luṭfi, *Tārīkh*, iv. 19); we also find *kaimaḳams* for the Seraskers and the Kapudan Pasha (*Djazā'ir Kaimaḳamī* for the *eyālet* of the Archipelago, which was under the Grand Admiral); for the regular representatives of the lower categories of officials the now obsolete term *yer* (e. g. *kāyā yerī*) was used, for the judicial officials *nāib*.

In the reorganization of the army and the provincial administration on the European model under Mahmūd II and 'Abd al-Madjīd *kaimaḳam* became in the army the equivalent of Lieutenant-Colonel and in the civil service the name of the official entrusted with the administration of a district (*kasā*).

KĀ'IM AL-ZAMĀN (A.) i. e. "Lord of the Age", a Shī'a term. The phrase includes the two theological meanings of "representative of God on earth" and "Deputy" of the Prophet. Among the earlier Shī'is for example the Imām is called "the *kā'im*", "our *kā'im*" or "the *kā'im* of his age", synonymous with *ḥudjdja* or *khalīfa*. The political application of the word brought in the meaning of "rebellious", current among all the seceding sects, e. g. also among the Khāridjīs. Through chiliasm the name is given to the Mahdi as "resurrected" from (apparent) death who is active in the "age" through the *naḳīb* and *dā'i* until as *kā'im al-ḳiyāma* he brings about his kingdom and the judgment. Among the Imāmis the twelfth Imām, and among the Ismā'īlis the seventh is therefore *kā'im al-zamān*. But the more the Imām becomes like to God in the subdivisions of the latter, the more he falls into the background and is only occasionally referred to as "the *kā'im*" simply, with reference to Sūra iii. 16, xiii. 33, while the name and powers are transferred to heads of sects, who are mostly not 'Alids. Gnostic speculation equates the *kā'im al-zamān* to the first emanation, e. g. among the Druses to the *intelligentia prima*, *ʿaql*, i. e. Ḥamza. The term is mystically amplified by the interpretations of the mysteries of the initial letter *kāf*, the symbol of the girdle of the world.

(R. STROTHMANN)

AL-KĀ'IM BI-ʿAMRĪ ʿALLĀH, ABŪ DJĀʿFAR ʿABD-ALLĀH, ʿAbbāsīd Caliph. He is said to have been born in Dhu ʿl-Hijjā 391 (Nov. 1001); his father was the Caliph al-Kādir [q. v.], who had homage paid to him as his successor shortly before his death; his mother was an Armenian or Greek slave. When he ascended the throne (Dhu ʿl-Hijjā 422 = Nov.-Dec. 1031), the Caliphate had almost entirely lost its secular power and anarchy reigned practically supreme in the capital. To make himself obeyed, he ordered in 426 (1034/35) that all judicial offices should temporarily suspend their activities, which was, however, entirely without success. In his reign ended the Buyid dynasty and their place was taken by the Seldjūks. On Ramaḍān 22, 447 (Dec. 15, 1055) the Seldjūk chief Toghrul Beg was officially prayed for and on the 25th the latter entered Baghdād in state, nominally as vassal but in reality as master of the Caliph (see KHUSRAW FIRŪZ), who soon afterwards in 449 (1058) granted him the Sultanate and the title of honour of "King of the East and of the West". In Dhu ʿl-Kāʿda of the following year (Dec. 1058) the Turkish general al-Basāsiri [q. v.] took possession of the capital, while the Caliph took refuge with the ʿUkailid Kuraish h. Badrān [q. v.], and on the 13th (Jan. 1, 1059) prayer was offered in Baghdād for the Fāṭimid al-Mustansir. Al-Kāʿim, however, was soon again recognized as Caliph (end of 451 = 1059/1060) and although he was only a tool in the hands of the Seldjūks, he was treated with respect both by Toghrul Beg and his successors. He died in Shaʿbān 467 (April 1075).

(K. V. ZETTERSTÉEN)

AL-KĀʿIM BI-AMR ALLĀH, ABŪ ʿL-KĀSIM ʿABD AL-RAḤMĀN, the second ruler of the Fāṭimid [q. v.] dynasty, born in 280 (893), succeeded his father ʿUbaid Allāh al-Mahdi in 322 (934) on the throne, assumed the praenomen Muḥammad and at his proclamation took the name of al-Kāʿim bi-Amr Allāh. His father had designated him his successor as early as 298 (911), when after the death of al-Shīʿi [q. v.] he thought his own rule sufficiently secure, and had had his (viz. the prince's) name mentioned in the Friday prayer; the prince commanded the army and conducted most of the campaigns while ʿUbaid Allāh was still on the throne; for his father had never placed himself at the head of his troops nor ever even taken a personal part in any of the numerous wars, but used to entrust his emirs with their con-

duct and after failures, or on particularly difficult expeditions, he used to appoint his eldest son to the supreme command.

Of al-Kāʿim's campaigns, while heir-apparent, may be mentioned the conquest of Constantine and Tripolis as well as his efforts to conquer Egypt. He gained great successes especially in the second expedition against Egypt in 307—309 = 919—921. He had conquered Alexandria and Dīja (Giza) and occupied the Faiyūm and Ushmunain. But disease, deficiencies in the supply of reinforcements and a strengthening of the ʿAbbāsīd governors' troops on the other side and the defeat of his fleet at Rosetta forced him finally to withdraw. He had, however, consolidated Fāṭimid sway as far as Barḳa. In 316 (928) he developed the town of Masīla as his capital and called it al-Muḥammadiya.

When in 322 (934) he succeeded his father, he had at once to turn his attention to an imposter, who gave himself out to be the son of al-Mahdi. After defeating him without difficulty, he turned his attention westwards to secure his authority there. He then devoted himself to various expeditions, sent his fleet to the coast of France, where the crews plundered and took prisoners, to Genoa, which was captured for a short time, and to Calabria. In 323 (935) he sent an army of 10,000 to Egypt, which conquered Alexandria, but was soon afterwards defeated by Muḥammad b. Tughdj al-Ikhshīd, brother of the ʿAhhāsīd governor. At home al-Kāʿim had to wage a continual struggle with rebellious tribes, his most redoubtable opponent being the rebel Ahū Yazid [q. v.]. After heavy fighting and many misfortunes, he succeeded in driving his opponent out of al-Mahdiya hut soon afterwards in 334 (946) he was hard pressed at Sūsa with his army and finally surrounded. During the siege, he fell ill and died in a few weeks.

Al-Kāʿim was a fanatical champion of fāṭimid doctrines. His reign was a period of ceaseless wars, which were waged in the fiercest and most barbarous fashion. Courage, ability and tenacity cannot be denied him. He laid sound foundations for the greatness of his successors. In this period of war-mania, it was impossible for him to attend to the works of peace. The *Bibliography* is found in Wüstenfeld, *Gesch. d. Fatimid. Chaliphen* (*Abh. der Kön. Ges. der Wiss. zu Göttingen*, xxvi., xxvii., 1881) and above ii. p. 92^a, at the end of the article FĀṬIMIDS and i. p. 114^a, article ABŪ YAZID. (SOBERNHEIM)

KAIMAK. [See KIMĀK]

KA'IME (T. originally A.; cf. KĀʿIM), the name for paper-money in Turkey, an abbreviation for *Sehim kâimesi* ("revenue bonds"); the word was originally used of drawings and documents which were written on large, long leaves in such a way that the lines ran parallel to the narrower side, as was the case with the first issues of Turkish paper-money; later the term *ewrākî naḳdiya* took its place.

The first *kāime* appeared in 1840 and were manuscript. They bore interest at the rate of 12%, were to be accepted as money at the public banks and to be current throughout the kingdom. They were replaced in 1842 by printed notes of a primitive style; the smaller notes bore no interest; the rate of interest for the others was reduced to 6% and at the same time the

circulation of paper-money was limited to the capital and its vicinity. The total of this first issue was not to exceed 60,000,000 piastres; but in a very few years, as a result of the wretched condition of Turkish finances, it was swollen enormously and in 1862 calculated at approximately a milliard piastres. In this year, with the help of a foreign loan, the paper money was redeemed for 40% cash and 60% Turkish Consols (so-called *consolidés*) and made no longer legal tender.

In 1876 and 1877 the Porte found itself forced by the bankruptcy of the state and the outbreak of war with Russia to take refuge in paper-money for a second time. *Kā'ime* were issued for 1600 million piastres, which, however, depreciated in a very short time and at the beginning of the 80's of last century were called in along with the depreciated copper-money.

A third issue of a paper currency of a total value of 16,702,106,360 piastres dates from the world-war; it is still (1923) in circulation.

The history of the *kā'ime* has still to be written. (J. H. MORDTMANN)

KAIN. [See HĀMIL]

AL-KĀIN (B. DJASR), usually BANU 'L-KĀIN or, with ellipsis of the syllable *nu*, BALKĀIN, nisba *Kā'ini*, an Arab tribe. The official Arabic genealogy gives as its true name al-No'mān b. Djasr (see Wüstenfeld, *Geneal. Tabellen*, Tab. 2, 20; Ibn Duraid, *al-Ishṭikāḥ*, ed. Wüstenfeld, p. 317; *Tādī al-ʿArūs*, s. v. *kyn*; Ibn Khallikān, *Wafayāt al-Aʿyān*, ed. de Slane, Article *Wathīma b. Mūsā*, about the middle; etc.); it therefore interpreted as originally a nickname — and probably rightly — al-Kāin, which means, as a name, "smith", "metal worker", "swordmaker" etc. (cf. Aram. *kēnāʾ*, *kainūyā*, "smith") and is in a wider application applied to artisans generally (for the meaning "slave", which the native lexicons also give and which Baethgen, *Beiträge zur Semit. Religionsgesch.*, p. 152 uses for his deductions, I have no really certain reference). This might be derived from the Banu 'l-Kāin having been at one time actually metalworkers, perhaps miners. Thus the Farān b. Balī, who worked the celebrated Sulaim or Farān mine were also called *Banu 'l-Kāin*, "sons of the smiths" or *al-Kūyūn* "the smiths"; see Yāqūt, *Muʿdjam* (ed. Wüstenfeld), III. 865 sq.; al-Bakrī, *Muʿdjam* (ed. Wüstenfeld), p. 20 = Wüstenfeld, *Die Wohnsitze u. Wanderungen der Arab. Stämme*, in *Abh. d. Gesellsch. d. Wiss. zu Göttingen*, xiv. 28 (Nöldeke wrongly refers this passage, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xl. 181, note 6 to our Banu 'l-Kāin); Sprenger, *Die alte Geographie Arabiens*, § 419 and 28, 1 and Wüstenfeld, *Register zu den Geneal. Tabellen*, p. 162. Our tribe, however, appears in the old poems and historical references to it to be in every respect a genuine Beduin tribe. The period of

industrial activity of the Banu 'l-Kāin would therefore have to be looked for in the very remote past (cf. Sprenger, *op. cit.*, § 420). Another explanation of the name Banu 'l-Kāin seems to me to be not quite impossible. The names *al-Kāin* and *Banu 'l-Kāin* are used by the Beduin Arabs, who scorn every kind of manual labourer, as terms of contempt; cf. the glossary to the *Nakā'id* *Djāfir wa 'l-Farazdaq*, under *Kāin*, where Bevan gives about 60 references, all from the *Nakā'id*; al-Farazdaq himself appears here 18 times as "Ibn al-Kāin" or "Ibn al-Kūyūn", and his family three times as "Banu 'l-Kāin", cf. also Kāis b. al-Khāṭim, *Diwān* (ed. Kowalski), Nr. 10, 11; Ḥassān b. Thābit, *Diwān* (ed. Hirschfeld), Nr. cxxix, 4; Ḥamāsa of al-Buḥturī (ed. Cheikho), Nr. 1333, 1 and Tirimmālī, *Diwān* (ed. Krenkow, still going through the press), N^o. 19, 5. It is therefore imaginable at least that in our case also, we have an original term of abuse, which has remained attached to the tribe.

The Banu 'l-Kāin formed a branch of the great system of tribes of the Qudā'a, who, in origin probably South Arabian, were settled in the historical period in the upper north, in Syria, in Mesopotamia and in the Iraq and to all appearance had gone over entirely or at least for the most part to Christianity there (see Wüstenfeld, *Tabellen*, *loc. cit.*; Ibn Duraid, *op. cit.*; Ibn Kūtaiba, *Kit. al-Maʿārif*, ed. Wüstenfeld, p. 51; Ibn 'Abd Rabbihi, *al-Ikd al-farid*, Cairo 1305, II. 58, etc.). That the *Shāh* and following it the *Lisān al-ʿArab* and the *Tādī al-ʿArūs* under *kyn* and the scholion to al-Harīrī, *Maḳāmāt*², p. 90 include them in the Banū Asad, is probably due simply to carelessness, to a confusion of Asad, who in the Arab genealogical scheme appears as the great-grandfather of our al-Kāin (cf. again Wüstenfeld, *Tabellen*, Tab. 2) with the eponymous hero of the great Muḍar tribe of the Banū Asad. As foolish as it is isolated is the statement that they had belonged to the Tamīm (*Tādī al-ʿArūs*, *loc. cit.*). Their tribal area — corresponding roughly to Arabia Petraea — extended from the Sinai Peninsula along the Syrian frontiers far into the land east of Jordan (cf. Wüstenfeld, *Register zu den geneal. Tabellen*, p. 371, where all is not quite correct; Sprenger, *op. cit.*, § 420 sq.; Causin de Perceval, *Essai sur l'histoire des Arabes*, II. 232, III. 345, 352; Nöldeke, *Über die Amalekiter u. einige andere Nachbarvölker der Israeliten*, in Benfey's *Orient u. Occident*, II. 635; al-Hamdānī, *Djāzirat al-ʿArab*, ed. Müller, I. 131 sq. = Sprenger, *op. cit.*, § 32; 'Urwa b. al-Ward, ed. Nöldeke, p. 32 = *Ḥamāsa* of Abū Tamnīam, ed. Freytag, I. 228, Schol.; *Aghānī*¹, xiv. 124; al-Yāqūbī, *Kit. al-Buldān*, in *Bibl. Geogr. Arab.*, ed. de Goeje, VII. 326; Yāqūt, *op. cit.*, III. 459, IV. 413; al-Wāḳidī, *al-Maghāzī*, abbrev. transl. by Wellhausen, p. 315; Sprenger, *Das Leben u. die Lehre des Propheten Mohammad*, III. 295; Ibn al-Athīr, *al-Kāmil fi 'l-Ta'rikh* (ed. Tornberg), VI. 87 sq., and the maps in Blau, *Arabien im sechsten Jahrhundert*, in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxiii. 559, and in Caetani, *Annali dell' Islām*, II. 2, at the end of the volume. They can hardly be considered a pure stoek (in Ibn Ishāq they are often called "Mustarība" along with all sorts of neighbouring tribes, see al-Ṭabarī, *Ta'rikh*, ed. de Goeje, I. 1611 and 2347).

History. In the poetry and tales of the

"battles of the Arabs" and of other events in olden times the Banu 'l-Ḳain appear in typical Beduin feuds with the tribes of Kalb (*Ḥamāsa*, loc. cit., p. 77; Yāqūt, loc. cit., iii. 241; Ibn al-Aṭhīr, loc. cit., i. 370; Ibn Sa'd, *Ṭabaḳāt*, ed. Sachau, III/11. 27 sq. = Ibn al-Aṭhīr, *Uṣd al-Ghāba*, ii. 224 = Ibn Ḥaǧǧār, *al-Iṣāba*, ii. 45 = Sprenger, *Das Leben u. die Lehre des Propheten Moḥammad*, i. 401, also Yāqūt, op. cit., iv. 49), Bahra' (al-Balādhurī, *Futūḥ al-Bulḍān*, ed. de Goeje, p. 283 = Ibn al-Fakiḥ, *al-Bulḍān*, in *Bibl. Geogr. Arab.*, v. 182 sq.), Ghassān (Ḥamza al-Iṣbahānī, *Ta'rīkh*, ed. Gottwaldt, p. 121, where *bḥry 'l-ḳyn bn* should be read for *yḥny 'l-ḳbrny*), Ghatafān (*Aghānī*, ii. 194), etc. At Mu'ta, on the Yarmūk (Hieromax) and perhaps also at Fihl, they fought in alliance with other Ḳuḏā'a tribes and the Lakḥm and Djudhām under the banner of the Byzantines, whose authority was recognised more or less by all the Arab tribes camped along the frontiers of Syria (Ibn Hishām, *Sira*, ed. Wustenfeld, p. 792; al-Ṭabarī, op. cit., i. 1611, 2347; (Pseudo-) Abū Ismā'il al-Baṣrī, *Futūḥ al-Shām*, ed. Lees, i. 97, 114; Caussin de Perceval, op. cit., iii. 212; Sprenger, *Das Leben u. die Lehre*, iii. 292, note 2; Caetani, op. cit., II/1. 83, III/1. 206 etc.). In al-Ṭabarī, op. cit., i. 1872 Saif b. 'Omar says that the wave of apostacy which swept over almost all Arabia on the death of the Prophet, also affected the Banu 'l-Ḳain (cf. Caussin de Perceval, op. cit., iii. 345, 352 and Caetani, op. cit., II/1. 583, 585). From this statement it might be deduced that our tribe had become subject to the state of Medina while the Prophet was still alive; but it does not appear to me to be quite credible. In the civil war between Marwān I and 'Abd Allāh b. al-Zubair we naturally find the Banu 'l-Ḳain as South Arabians on the side of the former (al-Ṭabarī, op. cit., ii. 478; al-Mas'ūdī, *al-Tanbih wa 'l-Ishraf*, in *Bibl. Geogr. Arab.*, viii. 308, etc.) and on the occasion of the rising of Bahlūl b. Bishr Kuthāra in 119 = 737 we again find them in the pay of the Umayyads (al-Ṭabarī, op. cit., ii. 1623 sq., and Ibn al-Aṭhīr, *al-Kāmil fi 'l-Ta'rīkh*, v. 156). They again played a very important part in the Damascus troubles of 176 (792) in the reign of Harūn al-Raṣīd, in which they and Ḳaisīs (Nizāris) fought against the other Yemenīs (Ibn al-Aṭhīr, op. cit., vi. 87 sq.). They then disappear from our knowledge.

According to Nashwān's *Shams al-'Ulūm* Luḳmān was a slave of al-Ḳain b. Djaṣr al-Ḳuḏā'i (see *Die auf Südarabien bezüglichen Angaben Nashwān's im Shams al-'Ulūm*, ed. by 'Aẓimuddīn Aḥmad, p. 95).

The best known member of the tribe is the poet Abu 'l-Tamahān al-Ḳainī, who flourished about 600 A. D. (see Guidi, *Tables alphab. du Kitāb al-Aḡānī*, p. 417; Ibn Ḳuṭaiba, *Kitāb al-Shi'r wa 'l-Shu'ara'*, ed. de Goeje, p. 229 sq.; Ibn Duraid, op. cit., p. 317; Ibn Khallikān, *Wafayāt al-A'yān*, Bulāḳ 1299, i. 18 and *Ḥamāsa*, loc. cit., p. 558; — wrongly in Wustenfeld, *Genealog. Tabellen*, Tab. 2, 24 and *Register*, p. 441, who has misunderstood the passage in the *Ḥamāsa*).

H. Ewald (*Gesch. d. Volkes Israel*, i. 337) has with all reserve connected the Old Testament Ḳayin (= Kain) or Ḳēnites (Κεναῖοι, Κ[ε]νῖαι) with our Ḳain. Nöldeke has followed him, at first only as a possible hypothesis but later with more confidence (*Über die Amalekiter*, op. cit., p. 634 sq.,

Zeitschr. d. Deutsch. Morgenl. Gesellsch. xl. 181 and in Cheyne and Black's *Encycl. Biblica*, i. 130. The Ḳēnites were settled in the south of Palestine in the ancient Negeb, the later Idumaea; this would actually be the region where we find the Balḳain. Besides, the Ḳēnites were obviously nomads like the Balḳain (Stade, *Zeitschr. für d. Alttest. Wiss.*, xiv. 287 and Sayce, *Early Israel and the Surrounding Nations*, p. 91 sq., and do. in Hastings' *Dict. of the Bible*, s.v. *Kenites* recognise in them from the name — see above — a tribe of smiths; but they fail to give their readers any proof that they were such in historical times. Stade's identification, following Wellhausen, *Die Composition des Hexateuchs*, p. 305, of the Ḳēnites with Cain, the brother of Abel, op. cit., p. 285 sqq., which Ed. Meyer, *Die Israeliten und ihre Nachbarstämme*, p. 395 sqq., Procksch, *Die Völker Alt-palästinas*, Vol. i. part 2 of *Das Land der Bibel*, p. 37 etc. have adopted, I consider, with Nöldeke, *Encycl. Bibl.*, loc. cit., very problematic). But the two coincidences mentioned do not seem sufficient yet to justify us in identifying the Ḳēnites with the Balḳain. The Ḳēnites disappear from literature with the Exile (with the exception of the Rēkhābites, whose inclusion in the Ḳayin is, however, not absolutely certain). They may nevertheless have continued to exist. But that so small a clan, which never appears as completely autonomous in the Old Testament should have continued to exist for a millenium after the Exile and at the end of this period still possess considerable strength and prosperity, — even as the result of incorporating other tribes — I consider a very daring assumption. The name Ḳain besides was obviously not at all a rare one (see Wustenfeld, *Register zu den Geneal. Tabellen*, p. 371, Lidzbarski, *Handbuch der nordsemitischen Epigraphik*, p. 362, also Likmann, *Zur Entzifferung d. thamud. Inschriften*, p. 45). Cf. thereon Ed. Meyer, op. cit., p. 399.

(A. FISCHER)

ḲAINUKĀ' (BANŪ), one of the three Jewish tribes of Yathrib. The name differs from the usual forms of Arabic proper names but at the same time has nothing Hebrew about its type. Nothing certain is known regarding their immigration into Yathrib. They possessed no land there but lived by trading. That their personal names known to us are for the most part Arabic says as little regarding their origin as the occurrence of Biblical names among them. But there seem to be no valid reasons for doubting their Jewish origin.

In Yathrib they lived in the south-west part of the town, near the *Muṣallā* and close to the bridge over the Wādī Buṭḥān, where they occupied two of the castles (*ḳāṣim*), characteristic of Yathrib. They practised the goldsmith's art among other trades; al-Bukhārī (*Farq al-Ḳhums*, Bāb i.) incidentally mentions a goldsmith of the Ḳainukā'. On their expulsion they left behind them arms and tools, which were divided among the Muslims after Muḥammad had received his fifth share. The number of their fully equipped fighting men varies in the references to it between 400 and 750.

After the dominating power in the old Yathrib had passed from the Jews to the Banū Kaila the Kainukāc were in alliance with the Khazraj [q. v.]. In Muḥammad's settlement of the relations of believers and other sections of the community they are not mentioned by the name of their tribe any more than the Naḍir [q. v.] and Kuraiza [q. v.] but are described as "Jews of the Naḍīdjār, Ḥārith, Sa'ida and Djusham" (articles 26—29) i. e. as allies of different subdivisions of the Khazraj.

After the battle of Badr (Ramaḍān 2 H. = March 624) Muḥammad's relations with the Jews of Medina became troubled. The Jews as a body had adopted an unfriendly attitude to the Prophet. From the religious point of view therefore they became inconvenient; and from the political side, as a powerful foreign body within the just converted town, they were a great danger. When Muḥammad felt his position strengthened by the battle of Badr, the idea of expelling his enemies must soon have entered his head. The Kainukāc, as they lived in the city itself, were those he wished to be rid of first. With this description of the situation, his attack on the Kainukāc (in all probability as early as Shawwāl 2 H. = April 624) is sufficiently explained. What the Muslim writers give as special reasons for the attack has hardly more than anecdotal value. Sometimes it is said to have been a jest that a Muslim made to a Jewish woman, sometimes the Kainukāc are said to have behaved with particular arrogance. Sūra iii. 10 sqq. and viii. 60 sqq. are said to refer to these incidents. Sūra iii. 11 refers to the victory at Badr as an example and warning, and viii. 60 speaks of vengeance against people, from whom treachery is feared.

After a fourteen days' siege, the Kainukāc surrendered without striking a blow; the men were bound and seemed to have to fear the worst. The energetic intervention of 'Abd Allāh b. Ubayy, chief of the Khazraj and leader of the Munāfiḳūn, however, effected an amelioration of their lot. They departed first to the Jewish colonies in the Wādī l-Kurā, north of Medina, and from there they went to Adhri'āt in Syria.

(A. J. WENSINCK)

AL-KAIRAWĀN (French Kairouan) a town in Tunisia, 112 miles south of Tunis and 40 west of Susa to which it is joined by a railway; it lies in 35° 40' N. Lat. and 10° 2' E. Long. (Greenwich). The population in 1910 was 22,000 including 800 foreigners of whom 300 were French.

Kairwan lies 250 feet above sea-level in the middle of a great plain traversed by the Wādī Zerūd and the Wādī Merguelli, which ultimately disappear in sebkhas or salt lakes. These rivers are subject to sudden floods, which sometimes

transform the environs of the town into a lake extending up to the foot of the walls. When the rains have been sufficiently abundant, the soil yields a rich harvest; al-Bakrī mentions that in the western part called "Faḥṣ al-Darrāra", the grain sown is sometimes returned a hundredfold. But usually the ground, lacking trees or herbaceous vegetation, and covered with salt efflorescence, gives the country a desert appearance. The temperature shows considerable variations (24.8° in winter and 120.2° in summer). The rainfall is not heavy (14.5 inches per annum) and therefore running waters and springs are scarce, so that the inhabitants have to use cisterns to collect their drinking-water.

Kairwan really consists of two towns, the city proper surrounded by a battlemented wall of brick, flanked with buttresses and round towers as well as a ḡaṣba, 3350 yards round, and secondly a vast faubourg stretching to N. and N. W., the faubourg of the Zlas (Djlās) so called from the popular name of the tribe occupying the neighbouring country. To the south finally there has grown up a little European quarter. The interior of the town is a network of narrow and tortuous streets. Commerce and industry are fairly busy, although Kairwan has lost much of its economic importance. The principal industries, which, it may be added, are of the nature of home-industries, are the manufacture of carpets, which occupies a thousand looms and that of woollen blankets. The working of leather (saddle-making, shoe-making) for which the artisans of Kairwan were at one time very famous, and that of copper, are still followed by several hundred workers. The importance of Kairwan in the past is particularly shown by the number of religious edifices to be seen in it. The principal is the great mosque of Sidi 'Okba, one of the largest buildings in North Africa, the foundation of which dates back to that of the city itself. Among the others may be mentioned the Mosque of Sidi Ṣāhib (vulgo Ṣāḡab, Mosque of the Barber) dating from the first century A. H., but rebuilt and extended in the xvth century A. D., the mosque of the Three Gates (Djāmi' Tlāta Bibān), contemporary with the preceding, the Madrasa Sidi 'Abid al-Gharyānī (xvth cent. A. D.) and the Mosque of the Sabres (Djāmi' 'Amar 'Abbāda), finished in 1871. The oldest mosques, for the building of which were used materials from Hadrumentum (Susa) and even from Carthage, show an interesting mixture of Byzantine and Oriental influences. The latter are clearly seen in the decorative motifs (faïences, woodwork) analogous to those of 'Irāḳ and Baghdād. The more recent buildings show examples, sometimes remarkable, of wooden ceilings in compartments, arabesques cut in plaster showing Hispano-Moorish inspiration. We may add that the buildings of the xvth and xviih centuries often reveal the intervention of European architects and workmen, especially Italians.

History. The foundation of Kairwan dates from the Arab conquest. The town was in fact built by 'Okba b. Nāfi' in 50 (670) to give his troops a base of operations and depot for supplies and also to keep in awe the Berber tribes. "I intend", the historian al-Nuwairi makes him say, "to build a town which can serve as a depot of arms (Kairawān) for Islām to the end of time" (al-Nuwairi in Ibn Khaldūn, *Hist. des Berbères*, transl.

de Slane, i. 327). Kairwan was built on — or very near — the site of a small Roman town called *Ķamūdāh* or *Ķamūnia*, the materials of which were used by the Arabs. The site of the new town, two days' journey from the shore, had been chosen to put the Muslims out of danger from an attack by the Byzantines, who still held the towns on the coast. 'Oḳba first of all built a mosque, the palace of the government, then houses for his soldiers as well as a wall 2750 yards long. Legend was not long in embellishing this foundation with marvellous tales. The site of Kairwan was, it was related, covered with impenetrable thickets inhabited by deer and reptiles which disappeared at 'Oḳba's command. A vision revealed to the conqueror the exact position of the *ḳibla* and of the *miḥrāb* of the mosque, and the existence of a spring indispensable for the inhabitants, etc. The buildings were hardly completed when 'Oḳba was disgraced and called back to the East (55 = 675). His successor Dīnār Abu 'l-Muḥādjir hastened to destroy Kairwan and built a new town called Takrouan or Takrūn two miles to the North. Restored to the favour of the Caliph and sent back to Africa, 'Oḳba rebuilt Kairwan on the original site.

Kairwan was henceforth the capital of Muslim Africa and the residence of the Arab governors, but during the century which followed the death of 'Oḳba it had to submit to numerous vicissitudes. After the rising of Kusaila it was occupied by the Berbers and remained for four years in their power (64—68 = 684—688). During the *Khāridjī* rising it was taken and pillaged by the *Wafardjūma* (139 = 756—757), who committed such excesses there that the population scattered over the surrounding country. At the end of fourteen months, the *Abādī* Abu 'l-*Ḳhaṭṭāb* [q. v.], chief of the *Huwāra* [q. v.], drove out the *Wafardjūma* and entrusted the government of the town to 'Abd al-Raḥmān b. Rustam [q. v.] (141 = 758/9). In 145 = 762/3 Ibn *Ash'ath* was victorious over the *Khāridjīs* and re-established the seat of the government at Kairwan. He endeavoured to repair the damage done by the Berbers, and to protect the town from a new attack he surrounded it with a wall of brick, 12 cubits thick. These precautions did not, however, prevent the *Abādī* tribes under the command of *Abū Ḥātim* [q. v.] from laying siege to Kairwan (154 = 771) in which the governor 'Omar b. *Ḥafṣ*, who had escaped from *Ṭobna*, was shut up. After the death of 'Omar, who had been killed during the siege, his successor *Djamil* (or *Ḥamid*) b. *Ṣaḳr* capitulated and opened the gates to the enemy. There were, however, no massacres. The inhabitants were allowed to go freely and the victor was content to demolish the fortifications. The *Khāridjī* occupation was of short duration. By 155 = 772, Yazid b. *Ḥātim*, victorious over the heretics, had taken Kairwan again. He rebuilt the great mosque, had bazaars built for each trade-guild and earned the title of second founder of the city (*al-Nuwairi*).

Under the *Aghlabids* (800—909 A. D.) Kairwan underwent considerable expansion and reached the zenith of its prosperity. The princes of the dynasty vied with each other in enriching the town with rich monuments and multiplied the works of public utility. *Ziyādat Allāh I* and *Ibrāhīm* built waterworks and cisterns to secure the town's

supply of drinking water, for the reservoirs built for the purpose in the time of the Caliph *Hiṣhām* had become insufficient. "The largest and most useful of these reservoirs", says *al-Bakrī*, "is circular in form and of enormous size. In the centre rises an octagonal tower covered by a pavilion with four doors. A long series of arcades of arches resting one upon the other ends on the south side of this reservoir". These waterworks have not completely disappeared and one of the reservoirs restored by French engineers is still called the "reservoir of the *Aghlabids*". The great mosque was rebuilt from top to bottom. The primitive edifice built by 'Oḳba had already been destroyed by *Hasan b. al-Nu'mān* [q. v.] who had rebuilt it and adorned it with pillars of marble which, without doubt, came from the ruins of Carthage. Soon becoming too small, the mosque was again enlarged in 105 = 723/724, then entirely rebuilt with the exception of the *miḥrāb* in the time of *Yazid b. Ḥātim* (155 = 772). *Ziyādat Allāh I* in his time had the whole building taken down including the *miḥrāb*, which was enclosed between two walls so as to be preserved without being seen except through a narrow grill, and replaced it by the present mosque. According to *al-Bakrī*, 80,000 *miṭḳāls* (about £ 320,000) were expended on this work. *Ibrāhīm b. Aḥmad* completed the work of *Ziyādat Allāh*; he lengthened the principal building and built above the nave abutting on the *miḥrāb* a cupola called *Ḳubbat Bāb al-Bahw* (the cupola of the gate of the pavilion), 220 cubits long, 150 broad, divided into 17 naves by 414 columns, the great mosque could rival the most famous monuments of the East. Other religious buildings restored in the same period also claimed the attention of visitors, like the Mosque of the Three Gates, the Mosque of *Sīdī Ṣaḥāb* (Mosque of the Barber), the Mosque of the *Anṣār*, which according to the legend was built even before the arrival of 'Oḳba by one of the companions of the Prophet, *Ruwaif' b. Ṭhābit*, and the Mosque of *Ismā'il b. 'Obaid al-Anṣārī*.

Outside the town rose the royal residences, *Ḳaṣr al-Ḳadīm* and *al-Raḳḳāda*. *Ḳaṣr al-Ḳadīm*, also called *al-Abbāsīya*, was built in 184 = 800, 3 miles S. E. of Kairwan by *Ibrāhīm b. Aghlab*, who settled there under the protection of his negro guard and made it the seat of government. It is the "Castle of the Moat", where were received the ambassadors of Charlemagne. Around the palace there grew up a town provided with baths, caravanserais and bazaars and surrounded by a wall with five gates. *Al-Bakrī* mentions in it a mosque flanked by a cylindrical minaret ornamented with seven tiers of columns. Some distance off was another castle called *al-Ruṣāfa*. *Al-Raḳḳāda*, four miles S. W. was a creation of *Ibrāhīm b. Aḥmad* (263 = 876/877). This prince built here in a place celebrated for the purity of its air, a castle around which grew up an important town with bazaars and baths. It measured 24,000 cubits in circumference but enclosed large areas filled with parks and gardens.

A venerated sanctuary and capital of a powerful state, Kairwan was also a great commercial city. The shops of the merchants stood on either side of a covered street about two miles in length. It was also a city of learning where the study of *Mālikī* law was particularly honoured. Celebrated professors like *Asad b. al-Furāt* [q. v.], *Ibn Raḥīd*

and Saḥnūn had numerous pupils there. The teaching of medicine was equally flourishing. The Jew Ishāk b. Imrān, physician to Ziyādat Allāh II and his pupil Ishāk b. Sulaimān founded a regular school there.

This prosperity did not end with the Aghlabid dynasty; it continued under the Fātimids and the early Zirids, although the Mahdī 'Ubaid Allāh, after living some time at Raḡḡāda, had moved the seat of government to al-Mahdiyya. The town suffered a great deal, however, from the revolt of Abū Yazid [q. v.], "the man with the ass." The Nekkāris captured it in 333 = 944 and pillaged it in spite of the appeals of the notables and scholars who had come to implore the clemency of the conqueror. But in 334 = 946, the Caliph Ismā'il retook Kairwan and after having defeated the Khāridjis built some distance away the town of Sabra to which he gave the name of al-Manṣūriya, in memory of his victory over Abū Yazid, and in which he established his residence (337 = 948). His successor al-Mu'izz moved to al-Manṣūriya the bazaars and factories of Kairwan to the great dissatisfaction of the inhabitants. The new town was surrounded by a wall with five gates of which the principal, Bāb al-Futūḥ (gate of conquest) was used by the sovereign when he took the field at the head of his army. The town of Raḡḡāda on the other hand abandoned by its inhabitants and half destroyed by the Nekkāris was razed to the ground. The gardens alone were spared. During all this period Kairwan and al-Manṣūriya still had a very active economic life. The manufacture of carpets, of woollen and cotton goods flourished there. Cultivated land and orchards extended round the town. The wealth of the inhabitants is evidenced by the fact that the agents of the Fātimids were able to exact from them 400,000 dinars on a single occasion. According to al-Bakrī the taxes levied each day at one of the gates of al-Manṣūriya amounted to 26,000 dirhems (about £ 600). The people of Kairwan, however, complained of the tyranny of the Fātimids and the bulk of them remained attached to orthodoxy. Their hostility showed itself in serious bloodsheds under the earlier Zirids. In 407 (1017-18) 3,000 Shī'īs were massacred in a rising and the town of al-Manṣūriya was pillaged by the populace. Al-Mu'izz's break with the Fātimids was therefore received with enthusiasm by the people of Kairwan.

This act of rebellion let loose on Ifrikiya the Hilālī invasion of which Kairwan very soon felt the disastrous results. After the defeat of Ḥaidarān, al-Mu'izz ordered his soldiers to evacuate the town; they sacked it first of all and he withdrew to al-Manṣūriya. He then rebuilt the walls of Kairwan on a length of 22,000 cubits and joined Kairwan to al-Manṣūriya by two walls half a mile apart (444 = 1052). In spite of these precautions the attacks of the Hilālīs became more and more serious. Kairwan was abandoned by a part of the population and in 449 = 1057, al-Mu'izz decided to evacuate al-Manṣūriya and retire to al-Mahdiyya. The Arabs then entered the town and wrought the most frightful havoc. "They destroyed all the beauty and all the splendour of the monuments of Kairwan. Nothing that the Ṣanhādjī princes had left in their palaces escaped the greed of the brigands. All that there was in the town was carried off or destroyed."

(Ibn Khaldūn, *Hist. des Berbères*, transl. de Slane, i. 37). The inhabitants were scattered in all directions, "some went to Egypt, others to Sicily and Spain; a considerable body to Fās." ('Abd al-Wāḥid al-Marrākushī *al-Mu'djib fī Talkhīṣ al-Akhbār al-Maghrib*, ed. Dozy², p. 259).

The capital of Ifrikiya never recovered from this disaster. Pillaged again in 1060 by the Huwāra, its possession disputed between the Zirids and the governor, the Ḳā'id Ibn Mainūn, who tried to set up in it for his own benefit an independent principality with the support of the Iḡammadids, Kairwan remained under the domination of the Arabs and defenceless against the exactions of the nomads. "The latter levy contributions on every thing; the inhabitants are few in number, their trade and industries in a miserable condition" (al-Idrīsī, transl. de Goeje, p. 129). Stayed for a time in the reign of 'Abd al-Mu'min, who restored the town in part, its decline continued its rapid course under his successors and under the Ḥafṣids as a result of the continued troubles of which Ifrikiya was the theatre. At the end of the xivth century A. D. the town was almost deserted; its only inhabitants were the peasants who sought shelter there. It was gradually repopulated, but it was still very wretched at the beginning of the xvth century A. D. "The inhabitants", writes Leo Africanus who visited Kairwan in 922 (1516), "are at present all poor artisans, of whom some are carriers of the skins of sheep and goats, the others furriers whose handiwork is sold in the cities of Numidia, where no European cloth is to be had. But of all these trades there is not one, which is able to make a good livelihood and those who follow them live a miserable existence and are in very great poverty." Ill-treated by the rulers of Tunis, the people of Kairwan were in an almost continual state of revolt. They even definitely threw off the authority of the Ḥafṣids when the latter had accepted the Spanish protectorate after the capture of Tunis by Charles V in 1535 and recognized as chief the Marabout Sīdī 'Arfa of the tribe of Shabbīya. In spite of the help of the Spaniards Mulay Ḥasan could not dispose of this pretender, who was supported by the Arab tribes and the Turks of the corsair Dragut. His successor Aḥmad Sulṭān was no more fortunate.

Under Turkish rule Kairwan felt the repercussion of all the troubles of the xviith century A. D. In 1701 the Bey Murād, to punish a rising of the inhabitants, destroyed the walls and the houses and only left the mosques and zāwiyas standing. On the other hand Ḥusain b. 'Alī, founder of the Ḥusainid dynasty made great efforts to raise Kairwan from its ruins. He reconstructed the fortified wall round it and restored over fifty mosques, according to the author of the chronicle *al-Mashra' al-Malikī* (French transl. by V. Serres and Muḥammad Lasram, Tunis 1900). He had a "bardo" there, where he used to stay while his troops were going through the Djerid to collect the taxes. The inhabitants showed their gratitude to the Bey by supporting him vigorously against his nephew 'Alī Pasha, who could only capture Kairwan, where Ḥusain had taken refuge after a five years' siege (1735-1740). The town was once more razed by the victor, but it was rebuilt and, according to Desfontaines, was in 1784 "the largest town of the kingdom next to Tunis and even better built and less filthy than it".

Trade and industry were quite busy there and the people were exempt from taxes in return for the fidelity of their ancestors to the Bey Husain. Kairwan had also preserved its character as a place of sanctity and the inhabitants were very hostile to Christians. Very few Europeans, among whom were Peyssonnel, Shaw and Desfontaines had been able to visit the town. The fanaticism of the inhabitants persisted down to the end of the 19th century. After the signing of the treaty of Bardo (1881) which placed Tunisia under the protectorate of France, Kairwan was one of the centres of native resistance. To put an end to this, three columns under the supreme command of General Saussier set out from Tebessa, Tunis and Susa and united before the walls of the town. It was occupied without fighting on October 29, 1881.

KAIS, a little island in the Persian Gulf, in that part of it which the mediaeval Arab geographers call the "sea of 'Omān", in 54° E. Long. (Greenw.) and 26° 30' N. Lat. Kāis, which next to Kīshm [q. v.] may now very well be considered the most important of the Persian islands of the Gulf, is about 10 miles long and five broad; it is separated from the mainland by a strait about 12 miles wide, which affords a very secure passage. Apart from a few rocky places, the island is quite flat; it is better cultivated than most of the islands of the Persian Gulf. The mediaeval Arab and Persian geographers make special mention of its prosperous condition,

noting particularly its wealth in trees (mainly date-palms) and refer to the cultivated fields, gardens and cisterns. Besides agriculture, navigation and trade, the then fairly numerous population of the island was also engaged in the pearl-fishery; for the latter see the remarks in Ibn Khurdādhbeh, Yāqūt, al-Dimashqī, Ḥamd Allāh Mustawfī and Ibn Baṭṭūṭa [*op. cit.*].

The name Kāis is an arabicised form of the Persian Kis or Kīsh (the form Kās is also found; see al-Dimashqī, *op. cit.*). In the Portuguese and Dutch authors of the xvth and xvith centuries we find forms like QUINI, QUEIS, CAEZ or QUECHE, QAS, GUESS etc.; cf. Vincent and Tomaschek, *op. cit.* Kenn (Khenn) is also sometimes given as the name of this island, e.g. by Vincent, Kinnair, Morier (*op. cit.*, p. 31), Ouseley, Kemptorne, Ritter and Tomaschek, and in *Selections from the records of the Bombay Government*, No. xxiv. 20, 596. But it is, however, doubtful, whether the existence of some such second name for Kāis, which we know mainly from English sources (see on the other hand Schlāli, *op. cit.*, p. 150), can be maintained. Could Kenn, the Khāin of Ibn Khurdādhbeh (p. 62, 1), be the earlier name of another island near Kāis, perhaps of the island of Farur (east of Kāis)? See Schwarz, *Iran*, etc., p. 87. The circumstance that an Arab prince named Kāis b. 'Umairā took possession of the island of Kīsh — it was henceforth occasionally called Djazīrat Kāis b. 'Umairā or Bani 'Umairā, see Yāqūt, i. 503, 2, ii. 711, 8 — may have effected the arabicisation of the old name. The latter itself does not, however, date only from the Arab chief just mentioned, as Ibn al-Balkhī, *op. cit.*, thinks, but goes back into the pre-Muḥammadan period, for we find Kīsh already mentioned in the Sassanian period, as one of the seven bishoprics of the Nestorian ecclesiastical province of Persis; for this reference to Kīsh about the middle of the sixth century in Syriac literature, see Guidi in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xliii. 413; Chabot, *Synodicon orientale* (Paris 1902), p. 680; Sachau, *Zur Ausbreitung des Christentums in der Persis* (= *Abh. der Berl. Akad.*, 1919, No. 1), p. 58.

Historical. In classical literature the island is only twice mentioned: in Arrian's *Indica* (37, 8) under the form *Karain* and in Pliny (*Nat. Hist.*, vi. 110) as Aphrodisia; cf. Vincent, *op. cit.*, Ritter, viii. 774, xii. 458 and Pauly-Wissowa, *Realenz. der klass. Altertumswiss.*, i. 2727 (s. v. Aphrodisia, No. 7) and x. 2462 (*Karain*). Perhaps we have in *Karain* or *Kar* the prototype of Kāsh (Kīsh).

In the Muḥammadan period, Kāis formed a part of the province of Ardashīr Khurra in Fārs. It was only in the later middle ages that the town attained greater importance, when, as already mentioned, a prince of South Arabian origin captured it, built a fleet there and gradually began to extend his power. After the capture of Sirāf, which then enjoyed great prosperity as the main staple of the Persian-Indian-Chinese trade, the Arab dynasty of Kāis rose under the last Būyids in the first half of the vth (xith) century to unlimited control of the whole Persian Gulf. This Sirāf, which was previously often regarded wrongly as a town on the coast near the island of Kāis — actually confused with Kāis by Ibn Baṭṭūṭa (ii. 244, 2)! — lay much further to the north; the ruins of this famous commercial

centre are near the village of Tāhirī (north of Rās Nābend, in 27° 40' N. Lat. and 52° 20' E. Long. Greenwich; cf. Schwarz, *op. cit.*, p. 59 sq. and the article *sīrāf*). Sīrāf gradually became more and more deserted under the suzerainty of the princes of Kais, as they diverted the very considerable trade and shipping from the captured Persian seaport to their own island. They also extended their power to several other districts of the mainland opposite the island of Kais. Their predecessors in the occupation of this strip of land had been a South Arabian tribe, the Banū 'Umāra; cf. on their territory, the so-called Sīf 'Umāra (the 'Umāra-coast), Schwarz, *op. cit.*, p. 77 sq., 76. In the little town of Huzū there, a little dynasty of a family of the Banū 'Umāra, of whom coins still survive, ruled before the coming of the ruling house of Kais; cf. v. Bergmann in the *Numism. Zeitschr.* (Vienna), viii. 38—39 and Tiesenhausen in the *Rev. Numism. Belge*, 1875, p. 337; Huzū (probably the modern Ġirū) and Sāwiya (reading uncertain, probably the modern Tāwānah), both almost opposite Kais (in the N. W. or N. E. of it), were the most important ports of the island-rulers on the mainland. On Huzū and Sāwiya see Ibn al-Balkhī, *Fārsnāma*, p. 141; Ḥamd Allāh Mustawfī, *Nuzhat al-Kulūb*, text p. 120, transl. p. 118; G. le Strange, *The Lands of the Eastern Caliphate*, p. 257. A caravan route from Shīrāz ended in Huzū, the more important of these two towns; cf. Ḥamd Allāh Mustawfī, p. 185, 16, 186, 7. The same author (p. 171, 15, 184, 5, 186, 11 sq.) also gives the routes and distances from Kais to Baṣra, to Sulṭāniya and to the islands of Sarandīb (Ceylon) via Hormūz. Most of the smaller islands near Kais likewise became subject to the rulers of the latter, for example Dīāsak (probably the modern Lārek in the strait of Hormūz), where, according to Yāqūt ii. 9, 7, the "king" of Kais maintained a garrison celebrated for its seamanship; see also Dīāsak, i. 1025. At its period of greatest power, the dynasty of Kais also ruled over the opposite coast on the Arabian side (district of 'Omān), wherefore they are called by Yāqūt and al-Dimashkī "the lords of 'Omān".

The journey of the Rabbi Benjamin of Tudela falls within the period of Kais's prosperity (second half of the twelfth century). He notes with admiration the rich market of the island, whose chief business consisted in the exchange of Indian and Persian manufactures and produce; see the edition of the itinerary of Benjamin of Tudela by Grūnhut (transl. Jerusalem 1903), p. 77 sq. The Jewish traveller wrongly gives the island, which he calls Kish, much too large an area; but there can be no doubt that he refers not to Kishm (so Grūnhut, *op. cit.*, and Asher in his edition, ii. 175 sq.), but to our Kais. Benjamin of Tudela says that there were 500 Jewish families settled on the island. There must, of course, have also been a number of Persians living there. The bulk of the inhabitants, however, in the middle ages (as it is still the case to-day) were not Persians but Arabs, who were the chief settlers on most of the islands on the Persian side of the Gulf. The Venetian Marco Polo (*Travels*, Book i. Chap. 7, iii. Chap. 44) of the second half of the thirteenth century knows Kais under the name Kisi (in Ital. orthography: Chisi) as a place of call for ships sailing from Babylon to India.

The decline of Kais was caused by the com-

mercial rise of the little kingdom of Hormūz [q. v.], also under an Arab dynasty. Even under the Saldjūk prince Malik Dīnār of Kermān (582—591 = 1186—1194) the ruler of Kais of that time had vainly endeavoured to get Hormūz on the mainland from the latter in return for a yearly tribute; see Muḥammad Ibrāhīm, *Tawārīkh Āl Saldjūk*, ed. Houtsma, Leiden 1886, p. 160, 5 sq.; *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxxix. 395. Further information on the relations of Kais with Hormūz is given in the *Relaciones* (1610) of the Portuguese Teixeira; the book contains from a Persian source a fairly full history of the kingdom of Hormūz; see W. F. Sinclair, *The Travels of F. Teixeira*, (= Hakluyt Society, Ser. 2, vol. ix., London 1902), p. 161 sq., 169 sq., 183 sq., 259 sq. and cf. Schwarz in the *Zeitschr. der Deutsch. Morgenl. Ges.*, lxxviii. 531 sq. and Hormūz, ii. 325 sq. According to Teixeira (*op. cit.*, lxxviii. 534; cf. Ritter, viii. 777) about 700 (1300) the then king of Hormūz obtained from Nu'aim of Kais by purchase the island of Djarūn which lay opposite his capital. A few years later, he moved his residence to this island, which offered more protection; cf. above i. 694 sq., ii. 325 sq.). This New-Hormūz, thanks to its favourable position near the narrowest part of the Gulf, soon began to compete vigorously with the rulers of Kais and attracted more and more of the trade with India to itself. This led to long wars and feuds between the two kingdoms, which fill a great part of their history. For a time Kais was actually under Hormūz. In the end Kais completely lost its previous dominating position as the chief emporium of the Persian Gulf. Hormūz now took its place and from the tenth century to its capture by Shāh 'Abbās I in 1622 formed a great centre of international commerce. Its place was in turn taken by Bender 'Abbās [q. v.], which had to give pride of place to Būshīr [q. v.] after the middle of the xviiith century; the latter is now the most important trading port on the Persian Gulf. In the later middle ages the commercial centre of gravity within the Persian Gulf thus gradually shifted from north to south (Sīrāf-Kais-Hormūz) and returned in modern times to the north, although less adapted by nature. We know little of the later history of Kais. When the islanders became dissatisfied with their rulers, they finally called in the help of the governor of Shīrāz and as a result of his intervention Kais became permanently incorporated in Persia. According to Schlāfli, who spent 14 days on the island in 1862, there are 8 little settlements on it; he estimated the number of the inhabitants (Arabs and 1/10 Suaheli negro-slaves) at 2500—3000.

AL-KAIS, apparently an ancient Arab idol. He must have early disappeared as a deity, for Hishām b. al-Kalbī does not mention him in his *Kitāb al-Aṣnām* and he is not given in the various passages in Arabic literature that give lists of the gods of the Dīhiliya. But that he was at one time worshipped as a god may be deduced with considerable certainty from the tribal name 'Abd al-Kais [q. v.] and from the well-known personal and tribal name Imru' al-Kais [q. v.]; cf. the Arabic names Imru' Manāt, Ἀμριμαντος and Μουριμαντας in Wellhausen, *Reste arabischen Heidentums*², p. 5 sq. and אִמְרָאֵהוּ (= Imra'allāhi) and אִמְרָאֵהוּ (= Imra' Yaghūth) in Lidzbarski, *Handb. der nordsemit. Epigraphik*, i. 500, as well as the Hebrew Meri-Ba'al i. Chron., ix. 40b and 'Ashba'al (Septuaginta, Luc., and also Cod. Sin. Ἰσβααλ, = 'Ish-Bōshāth) i. Chron., viii. 33, ix. 39], further from statements like the following: "and it has been asserted that al-Kais was the name of an idol, which explains the name 'Abd al-Kais", *Hamāsa* of Abū Tammām, ed. Freytag, i. 85, schol., and "others have thought that al-Kais was the name of an idol and for this reason al-Aṣma'i (in verse 14 of the *Mu'allāḥa* of Imru' al-Kais) has rejected the reading "ya-mra'a 'l-Kaisi fa-nziu", and has preferred "ya-mra'a 'l-lāhi fa-nziu", 'Aṣim b. Aiyūb al-Baṭalyūsi, *Sharḥ Diwān Imri' 'l-Kais*, Cairo 1308, p. 3, and further from the name of the god קישא, קישא in the Nabataean inscription. of al-Hidjr, which can hardly be other than as Aramaic adaptation of al-Kais (cf. Lidzbarski, *op. cit.*, p. 363; Cook, *A Glossary of the Aramaic Inscriptions*, p. 104; Nöldeke, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xl. 167; Baethgen, *Beitr. zur*

semit. Religionsgeschichte, p. 108, etc.). From the Nabataean inscription *Corp. Inscript. Semit.*, N^o. 209, 9 (= Euting, *Nabat. Inschriften aus Arabien*, N^o. 12, 9) it would seem that the deity possessed a sanctuary in al-Hidjr, in which copies of documents used to be deposited; nothing else is known about his character or the area of his cult. The appellative meaning of *Kais* is obscure; according to the native dictionaries, it means: "misfortune", "need", "famine", "membrum virile" and "proud gait". But none of these meanings is suitable as the name of a deity, quite apart from the fact that I cannot find a single one actually occurring in literature. De Goeje has deduced the meaning "Lord" from al-Hamdānī, *Djazirat al-'Arab*, ed. D. H. Müller, i. 3, 9 and perhaps p. 221, 14 (see W. Robertson Smith, *The Religion of the Semites*, London 1894, p. 170, note 4, German transl. by R. Stübe, p. 132, note 219). "Lord" would, of course, be a good name for a deity, almost too good! But in view of the poor condition of the manuscripts available for D. H. Müller's edition of the *Djazirat al-'Arab*, and the problematic character in any case of the two passages in al-Hamdānī, this meaning can at best only be said to be a possible one.

As to the connection between al-Kais and the frequent personal and not uncommon tribal name *Kais* (see Wüstenfeld, *Register zu den Geneal. Tabellen der arab. Stämme u. Familien*; the indices to Ibn Duraid, *al-Iṣṭikṣāḥ*, ed. Wüstenfeld, al-Tabarī, *Ta'rikḥ*, ed. de Goeje, Caetani, *Annali dell' Islam*, ii./11 and vi., *Naḥḥīl Djarir wa 'l-Farazdaq*, ed. Bevan; Guidi, *Tables alphabétiques du Kitāb al-Aḡānī*, s. v., etc., and note also the Nabataean personal name קישא, Lidzbarski, *op. cit.*, p. 363 and Cook, *op. cit.*, p. 104), as well as the personal name 'Abd Kais (*Naḥḥīl Djarir wa 'l-Farazdaq*, Indices, s. v.; Ibn Duraid, *op. cit.*, p. 138, 275; Wüstenfeld, *Register*, p. 30; Ibn al-Aṭhīr, *Uṣd al-Ghāba*, ii. 137; Ibn Ḥadjar, *Iṣāba*, i. 987) no definite statement can be made. But at any rate we should not, as has always been done hitherto, overlook the fact that *Kais* always has the article (which the Nabat. קישא, קישא also shows) in the nevertheless in all probability theophoric form Imru' al-Kais as well as in the tribal name 'Abd al-Kais, while in the personal and tribal name *Kais* and in the personal name 'Abd Kais it is as regularly found without the article. (That the poet 'Abd Kais b. Khufāf, *Aghānī*¹, ix. 165, *Hamāsa*, *loc. cit.*, p. 352 and *Lisān al-'Arab*, ii. 206 appears as 'Abd al-Kais b. Khufāf may be due to an error; see *Mufaḍḍaliyyāt*, ed. Lyall, Nr. cxvi. sq., cd. Cairo, ii. 85 sq. and *Aghānī*, vii. 148, 152 sq.). I would consider *Kais*, as opposed to the god's name al-Kais, as a simple personal name. Wellhausen sees in it the god's name before which the concept 'Abd has disappeared (*op. cit.*, p. 8). But he does not tell us why in this contraction the article of the name of the god should also have been dropped. W. Robertson Smith (*Kinship and Marriage in Early Arabia*², p. 239) had practically anticipated Wellhausen.

Halévy (*Essai sur les inscriptions du Sufa*, in the *Journ. Asiat.*, 1882, p. 321), Wellhausen (*loc. cit.*, p. 67) and Gottheil (*On קישא and קישא*, *Journ. of Bibl. Literature*, xvii. 200) have identified our deity with the Edomite god *Ḳaus*, *Ḳōs*, *Ḳaush* or *Ḳōsh* (on the latter see especially Schrader,

Die Keilinschriften und das Alte Testament, 3rd edition, revised by Zimmern and Winckler, p. 472 sq. and W. Robertson Smith, *op. cit.*, p. 31). I consider the identity of the two to be exceedingly improbable. The comparisons of Ḳais with another Edomite god, the *Kōze* of Josephus, are, of course, utterly untenable (*Kōze* = Arab. *Kūzah*, see Wellhausen, *op. cit.*, p. 67, 81 sq.; Nöldeke, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xli. 714; Lagarde, *Symmicta*, i. 121, note 1; Gottheil, *op. cit.*, p. 201, etc. and cf. Thamud. and Nabat. קוז, Littmann, *Zur Entzifferung der thamudenischen Inschriften*, in *Mitt. d. Vorderasiat. Gesellsch.*, 1904, i. 46; Lidzbarski, *op. cit.*, p. 362; Cook, *op. cit.*, p. 104), as well as the identification with the Nabataean קציו (on this cf. Lidzbarski, *op. cit.*, p. 364; Cook, *op. cit.*, p. 105), with the Semitic deity (Ζεύς) *Káziōs* (on this see Drexler, in W. Roscher's *Ausführl. Lexikon der griech. u. röm. Mythologie*, Col. 970 sqq.) and with נחמך Nahum, i. 1 (De

Vogüé, *Syrie Centrale, Inscriptions sémitiques*, p. 105; H. Drenbourg, *Le poète antéislamique Imrouou 'l-Ḳais et le dieu arabe al-Ḳais*, in *Biblioth. de l'École des Hautes Études, Sciences religieuses*, Vol. vii.: *Études de critique et d'histoire*, 2nd Series, p. 122; Gottheil, *loc. cit.*, p. 201 sq., etc.). On the other hand the name Ḳais perhaps appears in קיש (Septuag. *Keis*) i. Sam., ix. 1, 3 etc. and the appellative *Ḳais* in קיש (Septuag., Cod. Vat. *Keisai*, Cod. Alex. *Keisav*) i. Chron., vi. 29 = קישירו (to he read קישירו?; Septuag., Cod. Vat. *Keisaiou*, Cod. Alex. and Luc. *Keisaiou*) i. Chron., xv. 17.

ḲAIS-ʿAILĀN (*Ḳaisu ʿAilāna*), one of the largest and most powerful tribal groups of northern Arabia in ancient times.

Name. For Ḳais ʿAilān we often find also Ḳais b. ʿAilān, most frequently *Ḳais* alone (in the poetry occasionally also simply ʿAilān, see *Naḳāʾid Djarir wa 'l-Farazdaq*, ed. Bevan, iii. Index iii. s. v.; the "Ḳaisites" are naturally called al-Ḳaisiyyūn, but as an ethno-political group more usually al-Ḳaisiyya, see al-Ṭabarī, *Ta'rikh*, ed. de Goeje, ii. 66, 180, 777, 1614, 1663, etc.; the nisba to Ḳais-ʿAilān or Ḳais b. ʿAilān is, however, ʿAilānī, see al-Samʿānī *al-Ansāb*, p. 404^b and Ibn Khallikān, *Bulāḳ* 1299, ii. 128 sq.). All three forms occur in prose as well as poetry, the middle one, Ḳais b. ʿAilān, remarkably rarely in poetry (Ḳais-ʿAilān in poetry: *Ḥamūsa* of Abū Tammām, ed. Freytag, p. 160, 659; *Naḳāʾid*, i. 117, 362 sq., 370, 375, 390; al-Ṭabarī, *op. cit.*, ii. 486; *Taḳḍīr al-ʿArūs*, s. v. *ʿyl*, etc.; Ḳais b. ʿAilān: Zuhair, *Dirwān*, ed. Ahlwardt, iii. 36, *Naḳāʾid*, i. 373, Abū 'l-ʿAlā' al-Maʿarri, *al-Luzūmiyyāt*, Cairo 1891, i. 47 and also *Taḳḍīr al-ʿArūs*, s. v. *ʿyl*; Ḳais: ʿAntara, *Dirwān*, ed. Ahlwardt, xxiv. 3, Append. xvi. 5; al-Nābigha, *Dirwān*, ed. Ahlwardt, Append. lxiii. 1; Zuhair, *op. cit.*, ix. 17; *Ḥamūsa*, ed. cit., 260, 302, 318, 657—660; *Naḳāʾid*, i. 374, 376

sq., ii. 902, 1041; *Aghānī*¹, xvii. 106, etc.). We never find before any of the three forms the word *Banū* ("sons") (wrongly in the indices to Ibn al-Athīr, *al-Kāmil fī 'l-Ta'rikh*, ed. Tornberg, to Caetani, *Annali dell'Islam*, ii. 1422 and vi. 145, and even to al-Ṭabarī, *op. cit.*, etc.). What we are to understand by ʿAilān, is difficult to conceive. Those who use the form Ḳais b. ʿAilān — these are primarily the genealogists (see *Taḳḍīr al-ʿArūs*, s. v. *ʿyl* and *ḳys*) — see in him naturally, at least the great majority of them (see below), the father of Ḳais and they further explain that he was the son of Muḍar and therefore brother of al-Yās (Ḳhindif) b. Muḍar. According to them his real name is al-Nās (which, according to Ibn Duraid, *Kit. al-Iḥṭikāḳ*, ed. Wustenfeld, p. 162 comes from al-Nāss; according to al-Wazīr al-Maghribī in the *Taḳḍīr al-ʿArūs* s. v. *ḳys*, al-Nāss would be the only correct form), so that ʿAilān would be his epithet (Ibn Duraid, *op. cit.*, p. 162; *Taḳḍīr al-ʿArūs*, s. v. *ḳys*; Ibn ʿAbd Rabbihī, *al-ʿIḳḍ al-farīd*, Cairo 1305, ii. 51; Abū 'l-Fidā', *Mukhtaṣar Ta'rikh al-Bashar*, partly ed. by Fleischer as *Historia antislamica*, p. 194; Wustenfeld, *Genealog. Tabellen der arab. Stämme u. Familien*, D; Caetani, *op. cit.*, i. Intro., § 49; also al-Samʿānī, *op. cit.*; al-Yā'qūbī, *Ta'rikh*, ed. Houtsma, i. 260; al-Masʿūdī, *al-Tanbih wa 'l-Ishraf*, in *Bibl. Geogr. arab.*, ed. de Goeje, viii. 208; Yāqūt, *Muʿjam*, ed. Wustenfeld, iii. 908; Ibn Khallikān, *op. cit.*, ii. 130; ʿAbd al-Ḳādir b. ʿOmar, *Khizānat al-Adab*, ii. 449; Caussin de Perceval, *Essai sur l'histoire des Arabes*, i. 192, etc.). But this view is contradicted directly by Ibn Khaldūn, *al-ʿIbar*, ii. 305 and indirectly by many others — practically by all who say Ḳais ʿAilān and these are, as we have said, the majority —; according to them ʿAilān disappears as a separate member in the genealogical table; Ḳais ʿAilān is identical with al-Nās or al-Nāss (Ḳais ʿAilān here also is said to be only an epithet, al-Nās(s) on the other hand the proper name) and is son of Muḍar and brother of al-Yās. At the same time they explain the genitive ʿAilān in the most different ways: as the name of a famous horse of Ḳais (by calling him after this horse, an endeavour has been made to distinguish our Ḳais from Ḳais b. al-Ghawth of Badjila, who also possessed a celebrated horse called Kubha and who was similarly called *Ḳais-Kubba*, *Taḳḍīr al-ʿArūs*, s. v. *ḳys* and *ʿyl*, and Ibn Khallikān, *loc. cit.*), or as the name of a dog or of a bow, which were in his possession, or as the name of a slave or of some other man who had brought him up (in an isolated case in the form of the name Ḳais b. ʿAilān, the word ʿAilān is regarded as the name of such a slave, see ʿAbd al-Ḳādir b. ʿOmar, *op. cit.*, i. 67, ii. 449; cf. the exactly analogous interpretation of the tribal name Saʿd (b.) Hudhaim in Ibn Kūtaiba, *Kit. al-Maʿarīf*, ed. Wustenfeld, p. 51, Ibn Duraid, *op. cit.*, p. 319, *Ḳāmūs* and *Taḳḍīr al-ʿArūs*, s. v. *ḥdhm*, etc.), or as the name of a mountain, where he is said to have been born or lastly, — and most stupidly as no notice is taken of genitive relationship in the form *Ḳaisu ʿAilāna* — as an otherwise quite unknown adjective, interpreted as qualifying Ḳais with the meaning "needy, dependent" (see also Ibn Duraid, *op. cit.*; *Shihāḥ, Lisān al-ʿArab* and *Ḳāmūs*, s. v. *ḳys* and *ʿyl*; al-Samʿānī, *op. cit.*; Abū 'l-Fidā', *op. cit.*; Ibn Khaldūn, *op. cit.*; ʿAbd al-Ḳādir h. ʿOmar, *op. cit.*, and

Hamāsa, *op. cit.*, i. 124; Reiske, *Primae lineae historiae regnorum arabicorum*, ed. Wüstenfeld, Tables v. and viii. on p. 136; Sprenger, *Das Leben u. die Lehre des Propheten Moḥammad*, iii. p. cxxxix, etc.). Only very rarely do we find the statement that 'Ailān was an epithet of Muḍar (*Ṣiḥāh* and *Lisān al-ʿArab*, s. v. *ʿy*) and most strange is the assertion twice made by Ibn Kūtaiba (*op. cit.*, p. 31 and 38) and hardly reconcilable with his other statements, that Kais 'Ailān is identical with Kama'a b. al-Yās b. Muḍar.

These confused statements seem to one to be nothing but guesses. I should like to think myself that Kais 'Ailān is the real name of our confederation of tribes and that it was the genealogists who first made Kais b. 'Ailān out of it. As Arab tradition obviously knows absolutely nothing of a tribe or group of tribes called 'Ailān, I should further like to assume — of course with all reserve — that the combination *Kaisu 'Ailāna* is not to be interpreted on the model of *Taghlibu Wā'ilin*, "the Taghlib of the tribal group of Wā'il", *Taimu 'l-Ribābi*, "the Taim of the al-Ribāb confederacy", *Adiyu 'l-Ribābi*, "the 'Adi of the al-Ribāb confederacy", *Djarmu Kuḍā'a*, "the Djarm of the Kuḍā'a confederation of tribes", *Wā'ilu Bāhilata*, the Wā'il of the Bāhila group of tribes", also *A'shā Banī Kaisin*, "the A'shā of the Banū Kais", *A'shā Bāhilata*, "A'shā of Bāhila", etc., (see e. g. *Naḳā'id*, iii. Ind. iii. s. vv.), but on the model of *Kaisu Kubbata*, "Kais, the owner of the horse Kubba" (see above; the name is everywhere so explained), *Rabī'atu 'l-Farasi*, "Rabī'a with the horse", *Anmāru 'l-Shū'i*, "Anmār with the sheep", *Rabī'atu 'l-Djā'*, "Hunger-Rabī'a", *Zaidu 'l-Khaili*, "horses-Zaid", etc. (see e. g. *Naḳā'id*, iii. Ind. iii. and also *Tādī al-ʿArūs*, s. v.). What we are to understand, however, in this case by 'Ailān, whether, with the native explanations quoted, a horse or a dog or something of the kind is quite uncertain. According to the native dictionaries (I cannot quote an actual reference in literature) 'Ailān as a noun means a "male hyena". As a name, it is not found elsewhere, according to the native lexicons and according to 'Abd al-Kādir b. 'Omar, *op. cit.*, i. 67 (see, however, *Tādī al-ʿArūs*, s. v. *ʿy*). — The Arab genealogists may have simply invented the name *al-Nās* (see above) as a counterpart to *al-Yās*.

Branches of the confederation: Kais ('Ailān) and Khindif (according to the genealogical legend, the wife of al-Yās) comprise together the whole of Muḍar (Ibn Kūtaiba, *op. cit.*, p. 31, al-Ṭabarī, *op. cit.*, ii. 1298, 1299, al-Mas'ūdi, *op. cit.*, p. 324, al-Bakrī, *al-Muḍjam*, ed. Wüstenfeld, p. 56, Yāqūt, *op. cit.*, i. 463, Ibn Khaldūn, *op. cit.*, ii. 305, Caussin de Perceval, *op. cit.*, i. 192, etc.). Between the two groups there were very ancient points of dispute (see e. g. al-Bakrī, *op. cit.*, p. 56 = Wüstenfeld, *Die Wohnsitze u. Wanderungen der arab. Stämme*, from vol. xiv. of the *Abhdlg. d. Gotting. Ges. d. Wiss.*, p. 81). To Kais-'Ailān were reckoned the following large tribes or more accurate tribal groups: Ghatafān [q. v.], with 'Abs [q. v.], Dhubyān (q. v.); the two main branches of the Dhubyān are Fazāra, q. v. and Murra, q. v.) and Aṣḥāja-Hawāzin [q. v.], with Thakīf [q. v.], in whom many saw descendants of Thamūd [q. v.] (see e. g. *Aghāni*, iv. 76), 'Amir b. Ṣa'sa'a [q. v.], Kilāb (q. v.); from them descended the dynasty of Mirdāsids of Aleppo, q. v.), Kulaib,

Kushair, 'Uḳail (q. v.; this is the tribe of the 'Uḳailid dynasty of Mosul), Hilāl [q. v.] and Djusham — Sulaim [q. v.] — Bāhila [q. v.] — 'Adwān — Ghani [q. v.], etc. (On the branches of the Kais 'Ailān see especially Ibn Duraid, *op. cit.*, p. 162 sqq.; Ibn Kūtaiba, *op. cit.*, p. 38 sqq.; Ibn Khaldūn, *op. cit.*, ii. 305 sqq.; Abu 'l-Fidā', *op. cit.*, p. 194 sqq.; Ibn 'Abd Rabbihi, *op. cit.*, ii. 51; Wüstenfeld, *Geneal. Tabellen*, Tab. D sqq. and Reiske, *op. cit.*, Tab. viii. sq. on p. 136).

Distribution. The Kais 'Ailān, according to legend, were originally settled in the low lying parts of the Tihāma (al-Bakrī, *op. cit.*, p. 57 = Wüstenfeld, *Die Wohnsitze u. Wanderungen d. Arab. Stämme*, p. 81 = Yāqūt, *op. cit.*, i. 463 sq.). Somewhere about the time of Muḥammad they spread, in keeping with the large number of their subdivisions over vast areas of central and northern Arabia; we find them (still?) in the Tihāma (Ibn Khaldūn, *op. cit.*, ii. 305), then again S. E. and N. E. of Mecca (the Thakīf here owned the valuable town of Tā'if and the Sulaim, Hilāl and 'Uḳail all sorts of famous mines; see e. g. al-Yāqūbi, *al-Buldān*, in the *Bibl. Geogr. Arab.*, vii. 316, 312), in the region of Medina (Ibn Khaldūn, *op. cit.*, ii. 305 sqq., 312), in other parts of the Ḥijāz (al-Ḥamdāni, *Djazirat al-ʿArab*, ed. D. H. Müller, i. 50; al-Bakrī, *op. cit.*, p. 60 = Wüstenfeld, *Die Sitze und Wanderungen*, etc. p. 84), in the 'Aliya (Yāqūt, *op. cit.*, iii. 688, 697; Ibn al-Athīr, *op. cit.*, v. 53), throughout the highlands of Najd (al-Mas'ūdi, *op. cit.*, p. 209; al-Yāqūbi, *al-Buldān*, p. 312), in the Yamāma, where they occupied the important Falaj (al-Bakrī, *op. cit.*, p. 60 = Wüstenfeld, *Die Sitze u. Wanderungen* etc. p. 84; Yāqūt, *op. cit.*, ii. 238, iii. 908; Ibn Khaldūn, *op. cit.*, ii. 312 sq.; Wüstenfeld, *Bahrein u. Jemāma*, from the *Abhdlg. der Gotting. Ges. d. Wiss.*, xix. 40; Wüstenfeld, *Register zu den geneal. Tabellen*, s. v. Ka'b ben Rabī'a, in Bahrain (al-Ṭabarī, *op. cit.*, i. 1968) and as far as in the 'Irāk and therewith the former kingdom of the Lakhmids of al-Ḥira (al-Mas'ūdi, *Murūdj al-Dhahab*, ed. Barbier de Meynard, v. 65; Sperber, *Die Schreiben Muḥammads an die Stämme Arabiens*, reprint from the *Mitteilg. d. Seminars f. Orient. Sprachen zu Berlin*, xix./ii. 38); see also Blau, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxiii. 583 and the map on p. 559, Caussin de Perceval, *op. cit.*, i. 192 and Caetani, *op. cit.*, ii. the map on p. 376).

The great Arab campaigns of conquest which began with the rise of the Caliphate and the tremendous political revolutions produced by them in Western Asia and North Africa brought the Kais-'Ailān like most Arab tribes out of their ancient dwelling-places. To all appearance, however, several branches of them had emigrated northwards even before Islām. At any rate we find them later, partly even under the earlier Caliphs, throughout Syria: at Ḥalab, in the region of Ḥims, in Damascus and the Ghūta, in the Ḥawrān with its capital Boṣrā, in Baḥaniya with its capital Adhriāt, in the Djawlān with its capital Bāniyās, in the Balqa' and in Palestine (al-Balādhuri, *Futūḥ al-Buldān*, ed. de Goeje, p. 451; Ibn Khaldūn, *op. cit.*, ii. 312; Abū Ḥanifa al-Dinawari, *al-Akhbār al-firawī*, ed. Guirgass and Kratchkovsky, p. 183; al-Yāqūbi, *op. cit.*, p. 325 sq., 329; Ibn al-Athīr, *op. cit.*, v. 331; Yāqūt, *op. cit.*, ii. 744 etc.), in N. W. Mesopotamia, in the large

district called after them Diyār Muḍar [q. v.], with the important towns of Karkisiyā^c (Circesium), al-Rahba, 'Arābān, al-Khānūka, al-Rakka, Bālis (Barbalissus), Harrān (Carrhae), Ḍjīr Manbiḍj, Sarīḍj, Tell Mawzan, Sumaisāt (Samosata), etc. (Ibn Hawkal, *al-Masālik wa 'l-Mamālik*, in the *Bibl. Geogr. arab.* ii. 155; al-Balāḍhūrī, *op. cit.*, p. 178 = Yāqūt, *op. cit.*, iv. 391; al-Ṭabarī, *op. cit.*, ii. 72 = Ibn al-Aṭhīr, *op. cit.*, iii. 373; al-Ṭabarī, *op. cit.*, ii. 1891; Ibn Khaldūn, *op. cit.*, ii. 310; Caetani, *Studi di Storia orientale*, i. 271 and Caussin de Perceval, *op. cit.*, i. 192), in the 'Irāq, where they also formed an apparently large fraction of the population of al-Kūfa and al-Baṣra (al-Balāḍhūrī, *op. cit.*, 451; al-Yāqūbī, *op. cit.*, p. 310; al-Ṭabarī, *op. cit.*, i. 2986, 3454, ii. 777; *Aghānī*¹, iii. 52; Ibn al-Fakīh, *Mukhtaṣar Kitāb al-Bulḍān*, in *Bibl. Geogr. arab.*, v. 170; Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 183; Ibn al-Aṭhīr, *op. cit.*, iv. 116, v. 59), in Baḥrain (Ibn al-Aṭhīr, *op. cit.*, vii. 341; Ibn Khaldūn, *op. cit.*, ii. 313) and even near Iṣbahān (al-Yāqūbī, *op. cit.*, p. 275).

In the time of Ibn Khaldūn (xivth cent.) only remnants of the once so powerful group of tribes of the Kais 'Ailān were still settled in Central Arabia; considerable bodies of them had settled in different parts of North Africa, 'Adwānī tribes for example in Ifrīkiya, Sulaimīs there also and in the far west, near Fes (according to Ibn al-Aṭhīr, *op. cit.*, x. 401, — whether rightly or not is another question — 'Abd al-Mu'min, the founder of the Almohad dynasty traced his descent from the Sulaim), Fazārīs and Rawāḥīs in Barqa, other Dhubyānīs in Barqa, in Tripolis and in Fezzān, Aṣḥḍja'īs in the marches of Algieria and Morocco, Hilālīs in Ifrīkiya and at Bōne and Constantine, Ḍjushamīs in Morocco etc. (Ibn Khaldūn, *op. cit.*, ii. 305 sqq.).

History. The history proper of most Arabian Beduin tribes begins for us with their ("battle")-days" (see AYYĀM AL-'ARAB). So it is with the Kais-'Ailān. Their feuds were particularly numerous, which is not remarkable in so large a group with its multitudinous ramifications. Ibn 'Abd Rabbihi discusses them in the first place in his account of the Ayyām al-'Arab in the *ʿIqd al-Farīd* (iii. 47—93). He describes in this place the following entirely or essentially civil Kaisi battles (cf. Reiske, *op. cit.*, 204—252, following al-Nuwairī, who on this matter is dependent entirely on Ibn 'Abd Rabbihi): the Yawm Man'īdj (Man'adj, also called Yawm al-Radha, between Ghanawīs and 'Absīs), the Yawm al-Nafrāwāt (between 'Amiris and 'Absīs), the Yawm Baṭn 'Ākil (between Dhubyānīs and 'Amiris), the Yawm Shī'b Ḍjabala (between 'Amir, 'Abs, Ghanī, Bāhila and Baḍjila on one side and Tamīm, Dhubyān, Asad, Lakhm and Kinda on the other), the endless war of Dāḥīs and al-Ghabrā' (between 'Abs and Dhubyān), with the "days" of Dhū 'l-Murāikib, Dhū Husā, al-Ya'mariya, (Ḍjafr) al-Habā'a, al-Farūk, Kaṭan and Ghadir Kalyād(?), the Yawm al-Rakam (or al-Rakm, between Ghatafān and 'Amir), the Yawm al-Nuṭā'a (al-Bathā'a²), between 'Abs and 'Amir), the first and second Yawm Hawza (between Sulaim and Ghatafān), the Yawm 'Adaniya (other Millhān, between Sulaim and Ghatafān), the Yawm al-Liwā (between Ghatafān and Hawāzin) and the Yawm al-Ṣalā'a (between Hawāzin and Ghatafān). Also the following encounters

between Kaisīs and Non-Kaisīs: the Yawm Raḥrahān (between 'Amir and Tamīm), the Yawm Dhāt al-Aṭh (between Sulaim and Tamīm), the Yawm al-Kadid (between Sulaim and Kināna), the Yawm Burza (or Buzra³, do.), the Yawm al-Kīka⁴ (do.), the Yawm al-Su'bān (between 'Amir and Tamīm), the Yawm Akrun (between 'Abs and Banū Dārim), the Yawm al-Marrūt (between Banū 'l-'Anbar and Banū Kūshair and the Yawm Dāit Ma'sal (between Tamīm and Kais). Al-Yāqūbī, *Ta'rikh*, i. 261 also mentions as Kaisi the "days" of al-Baidā', Faif al-Rih (between Khath'am and 'Amir), al-Milbat and al-'Urrā. Cf. also the section in Ibn al-Aṭhīr on "the 'days' of the Arabs in the pagan period" (*op. cit.*, i. 367—517), pp. 411 sqq., 435 sqq., 420 sqq., 482 sqq., 478 sq., 473 sqq., in the chapter which al-Maidānī in his *Maḍma⁵ al-Amthal* has devoted to the "names of the days of the Arabs" (Chap. 29), nos. 76, 12, 11, 66, 96, 122, 30, 53, 22, 55 and *Naḳḳ'id*, iii. Ind. iv. under the separate place-names. Within the scope of this article at least, no attempt can be made to give these wars and feuds in more accurate historical and chronological sequence. Indeed, speaking generally we may say that it is a difficult, indeed for the most part an insoluble task, to get at the historical basis of the essentially legendary traditions of the Ayyām al-'Arab, — which we may call the epic of the Arabs. The most important and therefore also the most celebrated in poetry of the above-mentioned "days" is certainly that of Shī'b Ḍjabala (see ḌJABALA, also DHUBYĀN and also Blau, *op. cit.*, p. 583, *Mufaḍḍaliyāt*, ed. Lyall, ii. transl., p. 251 and especially *Naḳḳ'id*, iii. Ind. iv., s. v. *Ḍjabala*). Of the encounters in the Dāḥīs wa 'l-Ghabrā' war [see GHATAFĀN, 'ABS and DHUBYĀN], the most celebrated is that of al-Habā'a. It need not surprise us to find that the Kaisi tribes, as we see from the above, were also continually quarrelling with one another. The individual members of the great tribal confederacies never thought of maintaining peace as a principle within the limits of their group. Ibn 'Abd Rabbihi and al-Nuwairī really ought also to have described the al-Fidjār battles as Kaisi, as in them the Hawāzin, who were Kaisi, with the Ṭbakīf at their head formed one of the two contending parties (see FIDJĀR and HAWĀZIN, also Ibn al-Aṭhīr, *op. cit.*, i. 439 sqq., al-Mas'ūdi, *Murūdj al-Dhahab*, iv. 120, 153, al-Mas'ūdi, *al-Tanbih wa 'l-Ishrāf*, p. 208 sq., al-Diyārbakrī, *Ta'rikh al-Khamīs*, Cairo 1283, i. 288, 293, Wüstenfeld, *Gesch. der Stadt Mekka*, Vol. iv. of the *Chroniken der Stadt Mekka*, p. 51 sqq., Sprenger, *Das Leben und die Lehre des Moḥammad*, i. 148, Caetani, *Annali*, Introd., § 140, Huart, *Hist. des Arabes*, i. 92, etc. The question at issue in this was really the endeavours of the Hawāzin to deprive the Kināna of Mecca and the Ka'ba (cf. *Aghānī*, xiii. 3 sq.).

Like the other great central Arabian Beduin tribes the Kais-'Ailān belonged to the short-lived empire of the Kinda (q. v. and Ḥamza al-Iṣfahānī, *Ta'rikh*, ed. Gottwaldt, p. 140; Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 54; Ibn al-Aṭhīr, *op. cit.*, i. 376, 406; Reiske, *op. cit.*, 98; Caussin de Perceval, *op. cit.*, ii. 287; *al-Mufaḍḍaliyāt*, *op. cit.*, transl., p. 250). Otherwise the only thing regarding the pre-Muhammadan history of the Kais-'Ailān handed down to us is the statement that they had worshipped Sirius (?), Pococke, *Specimen hist. Arabum*, p. 4; Caussin de Perceval, *op. cit.*,

i. 349; Krehl, *Über die Religion der vorislam. Araber*, p. 24), and that the ʿAdwān had owned the *ifaḍa*, i. e. the management of the course run between ʿArafāt and al-Muzdalifa in the Meccan Ḥajj ceremonies [see ḤADJĪ II, 198] (Ibn Hishām, *Sira*, ed. Wüstenfeld, p. 77 sq., al-Ṭabari, *op. cit.*, i. 1134, Ibn Khaldūn, *op. cit.*, ii. 305, etc.).

The Kais-ʿAilān were, of course, thoroughly antagonistic to Muḥammad at first. The Ḡhaṭafān and Sulaim [q. v.] especially proved very unpleasant neighbours to Medina in the first seven years after the Ḥidjra. But a clan of the Ḡhaṭafān, the Aḥḍjaʿ, who dwelled N. E. of Medina, considered it advisable as early as 627, after the "Battle of the Ditch" to conclude with Muḥammad a — purely political — treaty of alliance (Sperber, *Die Schreiben Muḥammads an die Stämme Arabiens*, p. 8 sq.) and the vastly more powerful Sulaim along with a number of Aḥḍjaʿis took part in 630 in the "conquest" of Mecca on the side of the Prophet, and indeed, shortly after, we find them fighting at Ḥunain under the Muslim flag against their brother-tribe, the Hawāzin, although they must have seen that the latter's resistance to the state of Medina was the last possible attempt to break Muḥammad's hegemony over Arabia (Ibn Hishām, *op. cit.*, p. 810, 828—864; al-Ṭabari, *op. cit.*, i. 1647; al-Wāḳidī, *al-Maghāzī*, abbrev. transl. by Wellhausen, p. 326, 358; Ibn Saʿd, *al-Ṭabaḳāt*, ed. Sachau, ii./i. 97, 109; Ibn Khaldūn, *op. cit.*, ii. 308; Caetani, *Annali*, ii. 147, 153, 444 etc. When Muḥammad died all the Kaisi tribes had probably submitted to the law of Islām (Ibn Saʿd, *op. cit.*, i./ii. 41 sqq.; Wellhausen, *Skizzen u. Vorarbeiten*, iv. 139 sqq.; Sperber, *op. cit.*, 38 sqq. etc.). After the Prophet's death, it is true, the majority of them joined more or less openly in the apostacy which set in over all Arabia. The Ḡhaṭafān once more were the most active in this. They several times endeavoured to overrun Medina and finally joined Ṭulaiḥa, the prophet of the Asad. But the old days of Arabia were past. Ṭulaiḥa and his followers were defeated at the well of Buzāḳha by Khālīd b. al-Walīd, "the sword of God" (end of 632) and the rebellious central Arabian tribes had again to submit to the yoke of Medina and Islām (al-Ṭabari, *op. cit.*, i. 1870, 1885, 1889, 1898 sqq.; Ibn al-Aṭḥir, *op. cit.*, ii. 264; Caetani, *op. cit.*, ii. 604 sqq.; A. Müller, *Der Islam im Morgen- u. Abendland*, i. 174 sqq. etc.).

Henceforward the Kais ʿAilān show themselves good Muslims. Bodies of them took part in the battles against the Persians under Khālīd b. al-Walīd, under al-Muthannā al-Shaibānī and under Saʿd b. Abī Waḳḳās (al-Ṭabari, *op. cit.*, i. 2219 sqq.; Ibn al-Aṭḥir, *op. cit.*, ii. 347; Caetani, *op. cit.*, ii. 954 sq., iii. 155, 281 sqq.). In the "battle of the Camel" (656) and at Siffin (657) they fought on the side of ʿAlī (Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 155 sq., 183 sq.; al-Ṭabari, *op. cit.*, i. 3174, 3224, 3309; Ibn al-Aṭḥir, *op. cit.*, iii. 189).

In the period of the great Muslim conquests in which they — in so far as they had not done so earlier (see above) — had moved their settlements northwards, especially to Syria, their power had become such that from the beginning to the end of the Umayyad period they formed one of the deciding political and military factors in the Caliphate. In this capacity they were in constant antagonism to the Kalb, the

chief tribe of the Qudāʿa, who inhabited the strip of territory between the ancient Moab and Palmyra, an antagonism, at the root of which probably lay ethnic differences (but see Wellhausen, *Das arab. Reich und sein Sturz*, p. 112) — the Kais were Maʿaddis (Nizāris and Muḍarīs), that is North Arabians, while the Kalb were — or at least were considered — Yemenis, South Arabians [see KALB B. WABARA and KAḤṬĀN]. — This antagonism being augmented through the Baṣra-Khurāsān trouble between the Tamim and the Azd [q. v.], very early developed into a general vendetta between Muḍar and Yemen. The Umayyad Caliphs relied sometimes on the Kais and sometimes on the Kalb according to their family connections, the result of marriages into these two extremes, which had as a result that, for example between 719 and 745, i. e. within 26 years, the actual control of the government passed five times from one group of tribes to the other. This state of things was, of course, intolerable and, in fact, the fall of the Umayyad dynasty was really due in the end principally to this feud between Muḍarīs and Yemenis.

Muʿāwiya I had relied on the Kalb and Yazīd I, who was born of a Kalbī mother had also depended mainly on them. As a result, the Kais refused their homage to their successors Muʿāwiya II, whose mother was likewise a Kalbī, and Marwān I, and declared themselves for the anti-Caliph ʿAbd Allāh b. al-Zubair [q. v.]. In 684 the Sulaim, the ʿAmir and the Ḡhaṭafān — that is all Kaisis — fought under al-Daḥḥāk al-Fihrī on the Mardj Rāhiṭ in the Ḡhūta of Damascus for Ibn al-Zubair against Marwān, whose army consisted of Kalbis and other men of Yemen. They suffered an unusually severe reverse, which plays a great part in the songs of the Kalbī and Kaisī poets and by the laws of the Arab vendetta necessarily perpetuated the hatred of the Kais for the Kalb (see AL-DAḤḤĀK B. KAIS AL-FIHRĪ and in addition to the literature quoted there al-Masʿūdī, *Murūǧ al-Dhahab*, v. 201; al-Masʿūdī, *al-Tanbih wa ʿl-Ishraf*, p. 308 sqq.; Ibn al-Aṭḥir, *op. cit.*, v. 204; Yāḳūt, *op. cit.*, ii. 743 sq.; Ibn Badrūn, *Sharḥ Kaṣīdat Ibn ʿAbdūn*, ed. Dozy, p. 184 sq.; Ḥamūsa, ed. Freytag, p. 260 sqq., 317 sqq.; al-Maidānī, *op. cit.*, ii. 338, and Huart, *op. cit.*, i. 264 sq.). But they remained partisans of Ibn al-Zubair and maintained themselves with great tenacity in Mesopotamia under their important chief and leader Zufar b. al-Ḥarith al-ʿAmir al-Kilābī and his lieutenant ʿUmar b. al-Ḥubāb al-Sulamī, who did not capitulate till 691 in the reign of ʿAbd al-Malik after a siege of considerable length in their strongholds, Ḳarḳisiya and Raʿs al-ʿAin (Resaina) (Wellhausen, *Das arab. Reich u. sein Sturz*, 115 sqq., with references to the most important sources, al-Ṭabari, *op. cit.*, ii. 643, 777; Ibn al-Aṭḥir, *op. cit.*, iv. 188, 192, 242, 259, Dozy, *Gesch. der Mauren in Spanien*, German ed., i. 86, 101 sqq., A. Müller, *op. cit.*, i. 373, 385). ʿUmar b. al-Ḥubāb was the commander of the Kaisi force which fought against the Shīʿis under Ibrāhīm b. al-Aṣṭar in August 686 on the banks of the Khāzīr, a tributary of the Great Zab, in the Umayyad army led by ʿUbad Allāh b. Ziyād, but to revenge the day of Mardj Rāhiṭ, they deserted in the battle (Abū Ḥanīfa al-Dīnawarī, *op. cit.*, 301 sq.; al-Ṭabari, *op. cit.*, ii. 708 sqq.; Ibn al-Aṭḥir, *op. cit.*, iv. 215 sqq.; al-

Mas'ūdī, *al-Tanbih*, p. 312; al-Maidānī, *op. cit.*, ii. 339; Weil, *op. cit.*, i. 380 *sqq.*; Dozy, *op. cit.*, i. 100; A. Müller, *op. cit.*, i. 381; Wellhausen, *Die religiös-politischen Oppositionsparteien im alten Islam*, in the *Abhdlg. d. Gotting. Ges. d. Wiss.*, Phil.-hist. Kl., n. F., v. N^o. 2, p. 84; Wellhausen, *Das arab. Reich u. sein Sturz*, p. 116). In spite of this collapse of the Kaisis in their great war against the Umayyads, their smaller struggle against the Kalb continued without interruption, at first mainly under the leadership of 'Umayr b. al-Hubāb. It took the form of a series of "days" fought mainly in the Samāwa, the desert between the 'Irāk and Syria and forced the north-eastern part of the Kalb to migrate for a time to the Ghawr of Palestine. The most celebrated of these "days" is the battle of Banāt Kāin between the Fazāra and the Kalb in 692 or 693. When 'Umayr with his Sulaimis settled on the Great Khābūr (Chaboras) there resulted encounters with the Christian Taghlibis, who dwelled in eastern Mesopotamia; these led to a bitter tribal and blood-feud, fought out chiefly on the Khābūr, the Balikh (Bilechas), the Tharthār and in the Tigris region. The best known "days" of this conflict, which gradually reduced the weaker Taghlib to great extremity, are those of al-Hashshāk, where 'Umayr fell (in 689; the *Naḡā'id*, p. 373, 400, 508 give for this event the battle of Sindjār, and that of Mount al-Bishr (Wellhausen, *op. cit.*, pp. 125—130; *Naḡā'id*, p. 401, 508, 899, also 902, 1038 and 1041; Yāqūt, *op. cit.*, i. 632; al-Bakri, *op. cit.*, p. 179; al-Maidānī, *op. cit.*, ii. 329, 339). We hear of bloodshed as a result of this enmity between the Kais and the Taghlib as late as 814 in the reign of al-Ma'mūn (Ibn al-Athīr, *op. cit.*, vi. 213).

After the capitulation of the Kais, 'Abd al-Malik showed himself a clever statesman and above party; he summoned Zufar b. al-Hārith and later also his sons to his court at Damascus and married a Kaisī lady of the 'Abs, called Wallāda, who became the mother of his sons Walīd I and Sulaimān besides other children. Walīd I was most probably a Kaisi at heart, but he took care not to irritate the Kalb. Sulaimān seems in spite of his fondness for the Yemeni (Azdi) Yazīd b. al-Muhallab to have at least had the intention of placing the interest of the empire before that of parties. As might well be expected in his reign the Kaisis were partisans of the great Thakīfī al-Hadīdjādī [q. v.] and of the Bāhili Kutaiba b. Muslim (q. v. and *Naḡā'id*, iii. index III, s. v. *Kaisu Ailāna*). In the reign of 'Omar II, who was a pronounced advocate of the policy of conciliation, the dissensions between the two great tribal groups did not make themselves felt. On the other hand in the reign of Yazīd II, who in his struggle with the Azdi Muhallabids had naturally to rely on the support of the Kais, the result was a purely Kaisī party government. His brother and successor Hishām endeavoured to do away with this by withdrawing the Fazāri 'Omar b. Hubaira, whom Yazīd II had appointed viceroy of the 'Irāk and the East, and replacing him by the Badjili Khālid b. 'Abd Allāh al-Kasri, a distinguished statesman, but the Caliph finally found himself forced to allow the latter to be overthrown and replaced by a Kaisī, the Thakīfī Yūsuf b. 'Omar, a relative of Hadīdjādī. Under Walīd II, who appeared to have fallen entirely under the influence of Yūsuf

b. 'Omar, the wrath of the Yemenis ultimately found vent in a rising stirred up by personal enemies of the Caliph, which led to the murder of Walīd II and the enthronement of Yazīd III. The new Caliph sought his support exclusively among the Yemenis, especially the Kalb, the last Umayyad, Marwān II, relied no less exclusively on the Kais, into whose territory — to Harrān — he even removed his capital. Marwān II fell before the 'Abbāsids. Even in the decisive battle on the Great Zāb which he fought against them in January 750, the feud between the Kais and the Qudā'a proved fatal (cf. Wellhausen, *op. cit.*, p. 131 *sq.*, 140 *sq.*, 162 *sq.*, 194 *sqq.*, 199 *sqq.*, 203 *sqq.*, 224 *sqq.*, 229 *sqq.*, 235 *sq.*, 341, where the necessary sources are everywhere given; A. Müller, *op. cit.*, i. 408, 435 *sqq.*, 445 *sq.*; also the pertinent sections in Weil, *op. cit.*, Dozy, *op. cit.*, Huart, *op. cit.*, Muir, *The Caliphate, its Rise Decline and Fall*, etc.). The quarrel between Kais and Kalb had its effect in history not only in Syria, the 'Irāk and Khurāsān, but also in the other provinces of the vast Arab empire, notably in North Africa and Spain, where the two parties just as well were at deadly enmity (for North Africa and Spain see especially Dozy, *op. cit.*, i. 138 *sqq.*).

In the severe fightings of the later Umayyad period, the Kais had suffered losses from which they never again recovered. What we learn of them during the 'Abbāsīd period is not of any great historical interest. The following are the main outlines: In the years 790, 792, 796 and 803, i. e. in the reign of Hārūn al-Rashīd, they had all sorts of new encounters in and around Damascus with their hereditary Yemeni enemies (al-Ṭabarī, *op. cit.*, iii. 609, 625, 639 *sqq.*, 688; Ibn al-Athīr, *op. cit.*, vi. 87 *sqq.*, 129; A. Müller, *op. cit.*, i. 490; see also above AL-KAIN B. DJASR). They rebelled under Hārūn in 794 and again under al-Ma'mūn in 828, in combination with the Yemenis, in Egypt (al-Ṭabarī, *op. cit.*, iii. 629, 1099; Ibn al-Athīr, *op. cit.*, vi. 97, 288; Weil, *op. cit.*, ii. 146 *sq.*; A. Müller, *op. cit.*, i. 490). In 811 under al-Amin, they fought the pretender 'Alī b. 'Abd Allāh al-Sufyānī chiefly because he had Kalbi blood in his veins (Ibn al-Athīr, *op. cit.*, vi. 172 *sq.*; Weil, *op. cit.*, ii. 187); after the death of al-Mu'tasim in 842 they stirred up a revolt in Damascus but were quickly brought back to obedience by a severe defeat inflicted on them by al-Wathīk's army on the for them ill-omened Mardj Rāhiṭ (see above) (Ibn al-Athīr, *op. cit.*, vi. 376). The Kaisis of Bahrain played a certain part in the initial stages of the Karmāṭian movement in 894 *sqq.* (Ibn al-Athīr, *op. cit.*, vii. 341; cf. Weil, *op. cit.*, ii. 508, note 3).

The Kais appear, compared with the Kalb, to have been in general more savage, less civilised, more hardy, more treacherous and more cruel. The reason, no doubt, is that they were in much closer contact with the life of the desert than their rivals, who had been for centuries already settled in Syria, a home of ancient culture, and had naturally not remained uninfluenced by the refining influences of the Byzantine empire, whose eastern marches had been their home before the Muslim conquest. Their readiness to face battle or death is occasionally celebrated, not only in poetry (al-Ṭabarī, *op. cit.*, ii. 1930).

Famous Kaisis (with the exception of those already mentioned). The best known poets of the

Ḳais were: al-Nābigha al-Dhubaynī, 'Antara, Labid, 'Amir b. al-Ṭufail, Ṭufail b. 'Awf, 'Urwa b. al-Ward, al-Shammākḥ, al-Khansā, Abū Miḥdjan, al-Ḥuṭai'a, Ta'abbata Ḥaritha, Dhu 'l-Iḥṣā' al-'Adwānī, Duraid b. al-Sinnā, al-'Abbās b. Mirdās, Muzarrid, Khidāsh b. Zuhair, al-Nābigha al-Djādi, etc. [see the pertinent articles]. The great philologist al-Aṣma'ī [q. v.] was a Bāhilī. — Other Ḳais of historical importance are given by Ibn Khaldūn, *op. cit.*, ii. 305 sqq., Ibn Ḳutaiba, *op. cit.*, p. 38 sqq., Ibn 'Abd Rabbīhi, *op. cit.*, ii. 51 and Abu 'l-Fida', *op. cit.*, p. 194 sqq.

The Dialect of the Ḳais-*ʿAilān*. The Arabic philologists give us the following — as a matter of fact they are in the main common to most tribes of the Naǧd — phonetic and grammatical linguistic peculiarities of our group of tribes: They still pronounced the *hamza* as a guttural stop and they had even changed it to *ʿain* when initial (in part only? so that they said *ʿan*, *ʿanna*, *ʿaslama*, *ʿidhan* for *ʾan*, *ʾanna*, *ʾaslama*, *ʾidhan*). They had a tendency to *imāla* and to *ishmām*; and they said *tʿalamu*, *tintaliḳu*, *tistakḥridju* etc. for *taʿlamu*, *tanṭaliḳu*, *tastakḥridju* etc., *ḥublay* for *ḥubla* or *ḥubla*, *hū* and *hī* for *huwa* and *hiya* (? always) and *min ladʿuniki* for *min ladunhu*. Cf. Howell, *A Grammar of the Classical Arabic Language*, iv. 930, ii./iii. 425, iv. 739, 824, 1313, 1476, note 4, ii./iii. 11 sq., iv. 135, note to 1435, l. 8, i. 523, iv. 835, i. 780; Sibawaihi, ed. Derenbourg, ii. 168 sqq., 275 sqq., 279 sqq.; al-Zamakhsharī, *al-Mufaṣṣal*, ed. Broch, § 527, 580, 643, and thereon Ibn Yaʿish; al-Suyūṭī, *al-Mushir*, p. 104, 109; Ibn Djinnī, *al-Aḥṣāʾis*, p. 411; al-Ḥariri, *Durra*, ed. Thorbecke, p. 183 sq.; 'Abd al-Ḳādir b. 'Omar, *op. cit.*, iv. 495; Ibn Hishām, *Sharḥ Bānat Suʿādu*, p. 97; Lisān al-ʿArab, xx. 283; Lane, *Lexicon*, sub *ʿanʿanun* and *taltalun*; Lisān al-ʿArab and *Taǧī al-ʿArūs*, sub *lūn*; de Sacy, *Grammaire arabe*², ii. 154, note 1; Sarauw, *Die altarab. Dialektspaltung*, in the *Zeitschr. f. Assyriologie*, xxi. 31 sqq.; Schaade, *Sibawaihi's Lautlehre*, p. 78 sq., etc. On words and expressions peculiar to the Ḳais see Freytag, *Einkl. in das Studium der arab. Sprache*, p. 87 sq., al-Suyūṭī, *op. cit.*, i. 109 (*anṭā* for *ʾaṭā*, see thereon Landberg, *Arabica*, v. 147, note 1 etc.), Ibn Hishām, *Sira*, 385, 3 etc.

Bibliography given in the article itself.

(A. FISCHER)

KAIS B. AL-KHAṬĪM B. 'ADĪ, with Ḥassān b. Thābit [q. v.] the most important poet of pre-Muḥammadan Yathrib, the latter Medina. He belonged to the Banū Zafar, a family of the Nabit of al-Aws [q. v.]. In the desperate fighting between the two tribes of al-Aws and al-Khazraj, he championed the former with tongue and sword. Very little is known of the facts of his life, if we except the later, very doubtful stories. The account of the revenge he took on the murderers of his father and grandfather is however quite authentic, and by this he won particular fame with posterity. This event was later embellished with all sorts of fictitious details, some of which are echoes of the Cyrus saga and form a parallel to the legend of the young Parzival (see Singer, *Arab. und europ. Poesie im Mittelalter* in the *Abhandl. d. Preuss. Akad. d. Wissensch.*, 1918, phil.-hist. Kl., N^o 13, p. 7 of the reprint). All else that we know of the life of the poet is that he took an active

part in the political and military activities of his tribe. His *Diwān* contains references to a whole series of *Aiyām* of the Aws. In the decisive battle of Bu'āth [q. v.], later often celebrated in song, he did not take part, apparently on account of a wound received previously. Not long after this battle and before the Hidsra he was treacherously murdered. Ḳais was involved in polemics with almost all the Khazrajī poets of his day, notably with Ḥassan b. Thābit and 'Abd Allāh b. Rawḥa [q. v.], both of them survived him by a considerable period. Although he was still alive at the beginning of Muḥammad's prophetic activity, his *Diwān* shows no trace of a knowledge of it. All that the later sources tell of his meeting with the Prophet is pure invention.

Ḳais's *Diwān* is preserved in an old manuscript (dated 419 A. H.) in the Top Kapu Seray Library in Constantinople, as an appendix to the *Diwān* of Ḥassan b. Thābit. The second manuscript so far known which is in the Egyptian National (formerly Khedival) Library in Cairo, seems to be a late copy of the above. The poems were collected by Ibn al-Sikkīt, but the final editor seems to have been al-Sukkārī. What has survived for us in the *Diwān* is certainly only a fragment of the original total.

Ḳais reveals in his poems the two sides of his life, the settled and the nomadic, which was so characteristic of the Arabian oases of the time. His descriptions of war and women are celebrated. The real Beduin, the description of the riding she-camel, the ride through the desert and hunting are almost entirely lacking in his poems. Ḳais is highly esteemed by later generations, perhaps more for his chivalrous character than for his poetic gifts. His poems are a very important source for our knowledge of conditions in Medina immediately before Islām.

Bibliography: Der Diwān des Kais b. al-Ḥaṭīm, ed. T. Kowalski (Leipsic 1914). Besides the literature given there, in the historical introduction, al-Samḥūdī's *Wafā' al-Wafā' bi-Aḥbār Dār al-Muṣṭafā* (Cairo 1326/27, 2 vols.) is very important for the topography of Medina and therefore also for the understanding of the *Diwān*. (T. KOWALSKI)

KAISĀN, ABŪ 'AMRA, a client of the 'Uraina, who belonged to the Badjila [q. v.], was one of the leaders of the Mawālī [see MAWLĀ] in Kūfa in the time of al-Mukhtār [q. v.] and was one of the latter's intimates. Al-Mukhtār made him commander of his police force (*ḥaras*, *shurṭa*). In this capacity this ardent Shi'ī took part in avenging al-Ḥusain by killing, wherever possible, those who had taken the field against him and destroying their houses. For example, he beheaded, by al-Mukhtār's command, 'Umar b. Sa'd b. Abi Waḳḳās who had commanded the troops sent against al-Ḥusain. In the battle of Madhār (67 = 686) Kaisān commanded the Mawālī; he was perhaps killed in this fierce battle. According to al-Kashshī, Kaisān's method of procedure is said to have originated among the people of Kūfa the proverb applied to one who is deprived of his wealth: "Abū 'Amra has entered his house"; cf. al-Dinawarī, p. 297, 5: — "Abū 'Amra has visited him". A verse in al-Kashshī describes him as wickeder than Iblīs. — As Muḥammad b. al-Ḥanafīya was the Imām of the Kaisāniya, Kaisān is occasionally represented as his client or pupil.

KAISĀNĪYA was first applied to the Kūfa group of Shī'as, the Mawālī, represented by Kaisān Abū 'Amra (see above), whose interests were championed by al-Mukhtār. The name was then extended to those who held the views, which had considerable currency among the Shī'is led by al-Mukhtār, and continued to be influential even later. When the little known Kaisān came in time to be practically forgotten, his name was often explained as a *laḥab* of al-Mukhtār. Mukhtāniya thus became another name for the older stratum of the Kaisāniya. The latter name, however, is also derived from a certain Kaisān, a mawlā of 'Alī, who fell at Siffin (al-Tabarī, i. 3293, 10), from whom al-Mukhtār is said to have derived his views. The Kaisāniya were also called Khashabiya [q. v.] from the wooden club which the Mawālī carried as a weapon.

The contemporary Kaisānis ascribed special knowledge to al-Mukhtār and to some extent regarded him as a prophet. There must also have been among them an echo of a cult, followed especially by some Yemen clans and described as Saba'i, the worship of an alleged chair of 'Alī's, which was compared with the Ark of the Covenant and also used as an oracle. Their Imām in succession to al-Ḥusain was Muḥammad b. al-Ḥanafīya [q. v.], whom al-Mukhtār put forward as a mere figure-head. As al-Shahrastānī tells us, the Kaisānis held the view that he was master of all knowledge and had obtained from the two Saiyids (i. e. al-Ḥasan and al-Ḥusain) all mystical, allegorical and esoteric knowledge as well as knowledge of the celestial spheres and of the souls. In time there came to be Kaisānis who regarded Ibn al-Ḥanafīya as the Imām in immediate succession to his father and thus excluded al-Ḥasan and al-Ḥusain. In proof of this they pointed to the tradition that 'Alī in the Battle of the Camel had entrusted the standard to Muḥammad b. al-Ḥanafīya. This view probably arose in opposition to those held by the Imāmis and Zaidīs.

Ibn al-Ḥanafīya's death, probably in 81 = 700, resulted in a split in the Kaisāniya. Apart from those who raised his son 'Alī to be Imām, a section of them transferred the Imāmate to his son Abū Ḥāshim [q. v.], who was regarded as heir to the secret knowledge of his father. They were called Ḥāshimīyā; but after the death of Abū Ḥāshim (98 = 716/7 or 99 = 717/8) they broke up into various branches on the question of succession. The 'Abbāsids now spread the idea that Abū Ḥāshim before his death had transferred his rights to the Imāmate to Muḥammad b. 'Alī b. 'Abd Allāh b. 'Abbās [q. v.].

A group of the Kaisāniya, however, did not believe in the death of Muḥammad b. al-Ḥanafīya. According to them, he lived in concealment in a ravine in the mountains of Raḍwā [q. v.] out of which he would one day emerge at the head of his followers as Mahdī [q. v.] in order to fill the earth with righteousness. His stay there is described with Messianic features by the Kaisāni poets al-Kuṭhayrī [q. v.] and al-Saiyid al-Ḥimyarī [q. v.]. These views of the concealment (*ghaiba*, q. v.) and return (*raḍwā*, q. v.) are attributed to a certain Abū Karīb (Kuraib), whose followers were therefore distinguished as Karībiya (Kurāibiya) [q. v.].

According to al-Shahrastānī, all Kaisānis held the view that religion consisted in obedience

to a man; by means of allegorical interpretation (*ta'wīl*, q. v.) the prescriptions of law were transferred to such men. — Among the Kaisānis also arose the view that "the intervention of new circumstances can produce the alteration of a divine decision already made" (*badā'*, q. v.). Besides the doctrine of the return of the hidden Imām, metempsychosis (*tanāsubh*, q. v.) had also followers among them.

The Kaisānis could not survive alongside of the Imāmiya [q. v.] and the Zaidiya [q. v.]. For Ibn Ḥazm the Kaisāniya was an extinct sect. — To Kaisāni influences should probably be ascribed the fact that concealment and return were attributed to 'Alids, whom the Zaidīs had championed. — A remarkable document, which is said to contain Ḥarmatian doctrines (see ḤARMAṬIANS) may also emanate from Kaisāni circles. In it a certain Aḥmad b. Muḥammad b. al-Ḥanafīya appears as Mahdī and Prophet [al-Tab., iii. 2128 sq.; Ibn al-Aṭṭar, *al-Kāmil*, vii. 311, 16 sqq.; de Saey, *Exposé de la religion des Druzes*, Paris 1838, i. Introd. p. clxxvii. sqq.]. An Aḥmad is, however, not known among the sons of Muḥammad b. al-Ḥanafīya (cf. Ibn Sa'd, *al-Ṭabaḳāt*, v. 67; Aḥmad b. 'Alī al-Dāwūdī al-Ḥasanī, *ʿUmul al-Ṭālib fī Ansāb Āl Abī Ṭālib*, Bombay 1318, p. 319 sqq.).

(C. VAN ARENDONK)

KAISAR (A.), the usual name in Arabic for the Byzantine Emperor. The word, of course, represents the Greek *Kaisar* and came to the Arabs through the intermediary of the Aramaic (cf. Fraenkel, *Die Aramäischen Fremdwörter im Arabischen*, Leiden 1886, p. 278 sq.). The borrowing must have taken place at quite an early period as the word in Syriac later appears almost always in the form *Kesar* (cf. Payne Smith, *Thesaurus Syriacus*, s. v.). The Arabs, centuries before Muhammad, had relations with the Byzantines (cf. A. Müller, *Der Islam im Morgen- u. Abendland*, i. 10 and the article GHASSĀNIDS). Among the old Arabic poets, Imru' al-Kais in particular frequently mentions the Kaisar, who, indeed, played a great part in his life (cf. IMRU' AL-KAIS). The word does not occur in the *Qur'ān* but is quite frequent in the biography of Muhammad and especially in Tradition, where Kaisar — always, we may note, without the article like a proper name — is usually mentioned in the first place among contemporary secular rulers; next to him come the king of the Persians and the Negus of Abyssinia (that the Persian Hurmuzān in al-Bukhārī, *Ṣaḥīḥ*, *Djizya*, Bāb I = ed. Krehl-Juynboll, ii. 292, 5 from below gives a different opinion is, of course, not to be wondered at). In the narratives mentioned a great part is played by the epistle said to have been sent by Muhammad through Dihya [q. v.] to the governor of Bosrā and through him to the Emperor Heraclius, who thereupon interrogated Abū Sufyān, who happened to be within reach, regarding the new prophet. Here as well as in the story of the embassy of the Prophet to the Ghassānid al-Hārith b. Abī Shamir (of doubtful authenticity; cf. Noldeke, *Die Ghassānischen Fürsten* etc., in the *Abhandl. d. Kgl. Preuss. Akad. d. Wiss. zu Berlin*, 1887, phil.-hist. Klasse, p. 42 of the reprint), Heraclius (in contrast to Kisrā) appears as a man, at heart inclined to Islām, whom only fear of his subjects prevents from openly professing the new religion. — The Traditions further record all sorts of sayings and prophecies of Muhammad regarding Kaisar, which can at once be recognised as later views thrown back into the past. In al-Bukhārī, *Tafsīr* to Sūra lxvi. Bāb 2 (Kr.-J. iii. 360 middle of page) Muhammad comforts 'Omar, who is lamenting the neediness of his existence, contrasted with the splendid court of Kisrā and Kaisar, with the words: "Art thou not content that this world belongs to them and the next to us?" In *Djihād*, Bāb 93 (Kr.-J., ii. 229 below) we read: "To the first army of my community that plunders the city of Kaisar (Constantinople) its sins are forgiven". In *Aimān*, Bāb 3 (Kr.-J., iv. 259, 9) the prophet foretells the final decline of the power of the East Roman Empire as well as that of the Persian kingdom.

In later poets also, Kaisar is still a current conception as a symbol of power and wealth — again alongside of Kisrā. Thus Ibn Djinī (best known as a grammarian) in a verse quoted in Ibn

Khalikān, *Wafayāt*, ed. Wüstenfeld, fasc. iv. 129, 4 from below, prides himself on being descended from the 'Caesars'.

KAISĀRĪYA (also KAISĀRIYA, plur. *kayāsir*, the name of a large system of public buildings laid out in the form of cloisters with shops, workshops, warehouses and frequently also living-rooms. According to de Sacy, *Rélation de l'Égypte par Abd Allatif* (Paris 1810), p. 303 sq., the *kaisariya* was originally distinguished from the *sūk* or *bāzār*-street probably only by its greater extent, and by having several covered galleries around an open court, while the *sūk* consists only of a single gallery. At the present day in any case the term *kaisariya* is not infrequently quite or almost identical in meaning with the Persian word *kārwanserāi*, which first came into use in the nearer East in the xvth century, or the likewise modern analogous names, *khan*, *wakāla* (okella), *funduk* [q. v.] and *berzistan* [q. v.].

Origin. The word *kaisariya* is certainly of Greek origin: *καίσαρεια* "imperial", an abbreviation for *ἡ καίσαρεια ἀγορά* "the imperial market". As H. Thiersch has shown, not only is the plan of the mosque — according to R. Kasdorff, however, in his *Haus und Hauswesen im alten Arabien*, Halle 1914, p. 69, the early Muslim mosque was of ancient Arab origin — to be traced to the old quadrangular court (with or without cells around it) of the *agora*, but also the *kaisariya*, which was used on the one hand as a warehouse for goods (whence developed the market-place) and on the other hand, without any doubt, usually also as lodgings. The expression *ἡ καίσαρεια* recalls the fact that the oldest of these public buildings were imperial i. e. state institutions, while in the Muslim period they were mainly due to private initiative (foundations of rich merchants, members of royal families or high officials). Thiersch thinks (*op. cit.*, p. 233) that the place where the idea of these buildings originated — like many other things in the new Muslim period — seems to have been Alexandria, which was especially rich in covered market-places and halls. Whether we should actually consider the Caesareum, the Caesar temple in Alexandria, to which the market-place and warehouses were attached (Strabo, xvii. 794), as the original in name and fact of the *kaisariya* (as does Vollers in the *Ztschr. d. Dtsch. Morg. Ges.*, li. 302) is uncertain. A derivation of the word *kaisariya* from the name of the Palestine town of Kaisariya (sec be-

low), which de Sacy (*op. cit.*) recommends, can hardly be supported with sound arguments. The word in any case was originally used only in those districts which, like Syria, Palestine and parts of North Africa had been under (imperial) Byzantine rule. The idea was only transferred later to other lands, especially to Spain and the east. In Spanish and Portuguese we find *kaīsāriya* as a loan-word: Span. *alcaicería* (*cayceciā*, *caeceria*), Portug. *alcaçarius*; cf. Fr. Cañes, *Dic. Español Latino-Arábigo* (Madrid 1787), i. 69a; Dozy-Engelmann, *Glossaire des mots espagnols et portugais dérivés de l'arabe*² (Leiden 1869), p. 73, 79; D. Leopoldo de Eguilaz, *Glos. etim. de las palabras españolas . . . de origen oriental* (Granada 1886), p. 126.

The following notes may help to elucidate the occurrence of the word in the Islamic world. In Egypt we have especially good evidence of its use in Cairo. Al-Makrizī (d. 845 = 1441) in his description of the city gives a large number of *kaīsāriya*'s; cf. *al-Khiṭaṭ* (Bulāq 1270), ii. 86—91; E. Reitemeyer, *Die Städtegrundungen der Araber im Islam* (1912), p. 117. Later its place was gradually taken by the word *wakāla* (*okale*, *okelle*) and in Niebuhr's time (1761) only the market-place in the suburb of Bulāq was still called *Kissariē*. — In Fez (see Fās, ii. 72 sqq.) in Morocco by *kaīsāriya* one understands the central market shut off by gates and walls from the other parts of the town; see Dozy, *op. cit.*, ii. 432; T. Williams in the *Beitr. zur Assyriol.*, iii. 583; E. Reitemeyer, *op. cit.*, p. 148, and cf. also above, ii. 73a. — In Granada in Spain the *Alcaicería* is that quarter of the town where the raw silk is sold; see Tollhausen, *Spanisch-deutsch. Wörterb.*, i. Leipzig 1888, p. 28b; F. v. Schack, *op. cit.*, ii. 327. — In Syria we have evidence of the use of the word *kaīsāriya* as the "name of the shops of the wholesale dealers" in Beirūt (see Niebuhr, *op. cit.*, ii. 469 and K. Müller, *op. cit.*, p. 7), in Damascus (see Ibn Džubair, *Riḥla*², ed. Wright and de Goeje, p. 288, 21 (year 1184) and Seetzen, *Reisen durch Syrien* etc. (Leipzig 1854—9), i. 269) and also in Aleppo (see Ibn Džubair, p. 252, 13; Yāqūt, *Muḍjam* (ed. Wustenfeld), ii. 307, 23; Ibn Baṭṭūṭa (ed. Paris), i. 151; A. Russell, *The Natural History of Aleppo*², London 1794, i. 36; German transl., i. (Göttingen 1797), p. 45). — In al-Ḥaṣā (Hoflūf, q. v., p. ii. 324 sq.) in Eastern Arabia the quarter of the town that contains the shops is called *el-Gaiṣariye*; see *Der Islām*, viii. 32. — Going still further east we find a square called *Kāisāriya* in Mōsul: see Ibn Džubair, *op. cit.*, p. 235, 16; in al-Salāmiya near Mōsul: Yāqūt, iii. 113, 21; in Irbil: Yāqūt, i. 186, 22; in Baghdād: see Massignon, *op. cit.*, p. 92 (the present bazaar centre); in Kərbelā: see Massignon, *op. cit.*; in Iṣfahān: see Ritter, *op. cit.*, ix. 49; Vullers, *Lexic. Persico-Lat.*, ii. 753a, and cf. also (Ispahan) Pietro della Valle, *I viaggi* (Brighton 1843), ii. 8, German transl., (Gent 1674), iii. 5; [Dupré], *Voyage en Perse* (Paris 1819), ii. 125 and W. Ouseley, *Travels in Various Countries of the East*, iii. (1819), 16; in Tibriz: see Ritter, *op. cit.*, ix. 856; in Khwārizm (Urgandj): Ibn Baṭṭūṭa, iii. 4.

We may further note that, according to a reference in Niebuhr (*op. cit.*), about the middle of the xviiith century large public buildings in the Barbary States (N.W. Africa) were called *caeceries*. In Algiers at the present day *kaīsā-*

riya means barracks; see Dozy, *op. cit.* In the ruined cities of Ḥawrān the palaces of the erstwhile Roman or Byzantine governors are now also called *kaīsāriya*; see Wetzstein, *Reisebericht über Hauran* etc. (Berlin 1860), p. 55. In general it appears that in modern times the use of the word *kaīsāriya* as market-place and suchlike has to a great extent given way to newer words like *khān*, *wakāla*, *funduk* and *bezestān*.

KAISĀRIYA or **KAISĀRIYA** = **KAISĀRIYA** (Caesarea), a name bestowed in the reign of Augustus and Tiberius on a whole series of towns of the Roman East, and also in North Africa and Spain. 17 places of the name are known; see Pauly-Wissowa, *Realencykl. d. klass. Altertumswissensch.*, iii. 1288 sq. The Arab writers only know of two towns named *Kāisāriya*, viz.: 1. a town in Palestine, on the coast in 35° N. Lat. about 24 miles south of Haifa. Its earlier name *Σαρδάριος πόλις* (cf. Stark, *Gaza und die philistäische Küste*, 1852, p. 450 sq.; Neubauer, *op. cit.*, p. 11—15) is of uncertain etymology. To distinguish it from places of the same name, especially the north Galilaean Caesarea (Caesarea Philippi, Paneas, Bāniyās [q. v.]), this town was called more definitely Caesarea Stratonis, C. Palaestinae or C. maritima. The Arabs distinguish it by the addition of Filistin (*Kāisāriya* in Palestine) from the town of the same name in Asia Minor.

The origin and antiquity of Caesarea is veiled in obscurity; but it was certainly in existence in the second century B. C. In 22 B. C. Herod I laid out a fine city, which received the name of Caesarea in honour of Augustus, on the site of the ancient settlement which had fallen into ruins (on the date cf. Otto in Pauly-Wissowa, *op. cit.*, Suppl. Heft 2, col. 68, note). Part of the plan of the new foundation was the making of a splendid harbour which gave the town a great economic importance by giving the Jews access to the Mediterranean. Caesarea rapidly developed to be the first town in the country and maintained this position for some four centuries. It was also of great importance for Christianity, which early found a footing there, as it was its spiritual metropolis in Palestine down to the time of the Council of Chalcedon (451). As late as the Arab invasion Caesarea was still a flourishing town. It vigorously resisted the advance of the Muslims and withstood them in a long siege until finally Mu'awiya took the city by storm. The statements in the Oriental sources regarding the date of its fall and the length of the siege vary; the siege probably began in 18 (639) and ended in 19 (640).

The accounts also differ very considerably as to the number of the defenders. On the Muslim conquest see de Goeje, *Mém. sur la Conquête de la Syrie*², p. 166 sq.; Caetani, *Annali dell' Islam*, iv. 31 sq., 156—162.

Kaisāriya remained in undisputed possession of the Muslims until the First Crusade. During this it was stormed and taken by Baldwin I on May 31, 1101; see Wilken, *Gesch. der Kreuzzüge* (Leipzig 1807—1832), ii. 102—104; R. Rohricht, *Gesch. der Kreuzzüge im Umriß* (Innsbruck 1898), p. 57. Among the rich booty taken by the Christians on this occasion, the most valuable was a six-sided emerald, a vessel of green glass which was believed to have been used as a bowl of the Last Supper (this belief apparently first arose under the influence of the story of the Graal). The Genoese received those sacred relics along with a third part of the city as a reward for the services which they had rendered at its capture. The vessel is still preserved in the Cathedral at Genoa and is known as the *sacro catino*. On it see Wilken, *op. cit.*, ii. 103, 108—111; Mislin, *op. cit.*, ii. 112 sq.; Fr. Kampers, *Das Lichtland der Seelen und der hl. Gral* (Cologne 1916), p. 85 sq.

After the battle of Hattin (July 5, 1187) so disastrous for the Christians, Saladin reoccupied Kaisāriya without striking a blow; see Schultens, *Vita Saladini auct. Bohadino I. Sjeldadi* (Leiden 1755), p. 71 and glossary s. v. (p. 23). When a few years later, on Aug. 30, 1191, Richard Coeur-de-Lion occupied the city he found it in ruins. The Crusaders rebuilt the citadel in 1218. But as a result of their carelessness, the Egyptian Sultān al-Malik al-Mu'addam was able to recapture it within two years (in 1220). It was not till Louis IX of France took it, that Kaisāriya was again regained for the Christians. He spent a whole year (1251—1252) in it, engaged on the building of an extraordinary system of defences, notably a strong wall encircling the town. In spite of all this, Kaisāriya had to surrender after only seven days' attack to Sultān Baibars in 1265. The town, in which the Christians defended very stubbornly their last resort, the strong citadel, was completely destroyed after its capture; cf. Wilken, *op. cit.*, iii. 296, iv. 408, vi. 158, 303, vii. 474 sq.; Kugler, *Gesch. d. Kreuzzüge* (Berlin 1880), p. 387; Rohricht, *op. cit.*, p. 253. Sultān al-Ashraf completed the work of destruction in 1291.

The earlier Arab geographers describe Kaisāriya as a beautiful and important city strongly fortified; they particularly praise the fine fruits grown here, the woods and the running water. In Yāqūt's time Kaisāriya was still only a village. When Abu 'l-Fidā' [q. v.] wrote (721 = 1321) it was in ruins, after the devastations wrought in 1265 and 1291. In the xviii century only a few fisher families lived here; a little later the place was quite deserted. Since 1884 the Turks have settled Bosnians there. Kaisāriya now is one of the most important ruined sites in the country west of the Jordan; numerous remains of the ancient and mediaeval city have survived. The Roman town covered an area of 400 acres, while the mediaeval — a quadrangle with walls, ditches, bastions and towers — only occupied about 1/10 of the area of the Roman site.

The harbour is now unusable; but the once great harbour buildings with the Drusus tower

built by Herod are still to be traced, as well as in the southern part on the sea shore the great amphitheatre built by Herod I to hold 20,000 spectators. A little to the northeast are the remains of the hippodrome. The aqueducts are also partly preserved. The mediaeval castle, a quadrangle with a high tower, has been recently adapted by the Turks for a government office. The ruins of the city walls that still exist date from the fortifications of Louis IX. Only a few remnants are left of the great church of the Crusaders with its three naves. Much ancient and mediaeval material has been carried off in course of centuries to build other neighbouring towns. Džazār Pasha of 'Akkā for example (d. 1209 = 1804; see above i. 1033) for his famous buildings in 'Akkā (notably the great new mosque) brought stones and pieces of buildings (especially ancient columns) from the ruins of Kaisāriya and 'Askalān [q. v.]. Kaisāriya was also used as a quarry for the rebuilding of the Franciscan monastery in Jaffa. On the ruins see especially R. Pococke (1737), *Descr. of the East* (London 1743—5), ii. 58 sq., German transl. (Erlangen 1791), ii. 85—87 (with plan: copperplate Vb); A. v. Prokesch (1829), *Reise ins heil. Land* (Vienna 1831), p. 28—34; Wilson (1842), H. Barth (1846) in Ritter, *op. cit.*, xvi. 599, 604—7; G. Hanel (1847) in the *Zeitschr. d. Deutsch. Morgenl. Ges.*, iv. 339 sq.; v. d. KAİSÄRIYA (in Arabic authors also KAİSÄRIYA and KAİSÄRIYA), a town in Asia Minor (Rüm), in 35° E. Long. (Greenwich) and 38° 15' N. Lat. at the northern base of the Ardjish-Dagh [q. v.], 3,500 feet above sea-level on a treeless plateau, watered by the Kara-Su, a tributary of the Kizil Yrmak (Halys) — the latter flows about 14 miles North of Kaïsariya. At the present day it is the chief town of a sandjak of the wilâyet of Angora [q. v.]. The mediaeval and modern town is the successor of the ancient Mazaea, the capital of Cappadocia, to which Tiberius after its conquest gave the name Caesarea. Mazaea was a mile or two S.W. of the modern town, on the spurs of the Ardjish-Dagh, while the latter gradually grew up around the buildings which the great church-father Basilus, a native of Caesarea (329—379), erected here. Justinian I fortified this new settlement.

During the middle ages Caesarea in general shared the political history of central and eastern Asia Minor. In the viith century it passed into the hands of the Arabs, was retaken for a time by the Byzantines, but in 108 (726) again passed under Arab rule; cf. Weil, *Gesch. der Chalifen*, i. 637 and the Syriac chronicle of Dionysius of Tell-Maluë (ed. Chabot), p. 26 sq. In the xith century Kaïsariya was taken by the Seldjûks and played an important part as the second town in their empire. This was its period of greatest prosperity. In the xiiith century it was the residence of the Turkish dynasty of the Dänishmendids (cf. DÄNISHMENDIYA).

In the xvith century Kaïsariya had for a considerable time to acknowledge the suzerainty of the Mongol Khāns of Persia (the so-called Il-Khāns), as is shown by the coins they struck here. Ibn Battûta makes special mention of the strong Mongol garrison in the town. About 800 (1398) Bayazid I [q. v.] took it (cf. Weil, *op. cit.*, v. 70) and it remained henceforth in Turkish hands. Kaïsariya fell only for a very brief period into the power of the Mamlûk Sultāns, in 675 (1277) when Baibars and again in 822 (1419) when Ibrāhīm, son of Sultān al-Mu'ayyad advanced into this region of Asia Minor; see Weil, *op. cit.*, iv. 82, v. 146.

Kaïsariya is now one of the most important towns in the interior of Asia Minor. The population of the Sandjak of Kaïsariya was estimated by Cuinet in 1892 at 210,732, of whom 136,000 were Muslims, 45,318 Armenian Orthodox, 25,449 Greek Orthodox, 1,800 Protestant and 1,575 Roman Catholic Armenians. In 1813 Kinneir estimated the population at about 25,000 (including 15,000 Armenians, 300 Greeks and 150 Jews). Ainsworth in 1839 at 18,522, Cuinet in 1892 at 72,000 (45,000 Muslims, 14,400 Greek Orthodox, 9,000 Armenian Orthodox, 800 Catholic Armenians, 1,200 Protestants). In 1896 R. Oberhummer-Zimmerer put it at about 60,000, of whom 25% were Christians (including 10,000 Armenians), Baedeker in 1914 at 54,000 of whom 33% were Christians. H. Barth in 1858 estimated the number of inhabited houses at 8,000—10,000.

In the last centuries of the ancient period there must have been a strong Jewish community in Kaïsariya, for the Sāsānid Sapor (Sābūr) I (241—

272) is said, according to Jewish sources, to have slain no less than 12,000 Jews here about 260, in his incursion into Roman Asia Minor; cf. Ersch and Gruber, *Allgem. Encykl.*, 2nd Sect., xxvii. 184 (note 87) and Pauly-Wissowa, *op. cit.*, 2nd Series, i. 2330. In the middle ages the town seems to have been a great centre of Halaḳha study in Asia Minor; cf. A. Neubauer, *op. cit.*; H. Graetz, *Gesch. der Juden*, iv. 61, 263. The character of the present inhabitants is unfavourably criticised by several authorities (e.g. Chantre and Ramsay). During the hot months many of them live in the hills which form the last spurs of the Ardjish-Dagh.

The impression made by Kaïsariya is imposing and picturesque especially on account of its beautiful situation and considerable extent. Various travellers, like Moltke (*Briefe über Zustände u. Begebenheiten in der Türkei*⁶, Berlin 1893, p. 330) and Naumann have therefore considered it the prettiest and finest town in the interior of Asia Minor. Its interior is therefore the more disappointing with its filth and dirt, its numerous ruined streets and miserable cottages in the suburbs. The tuff of the neighbourhood yields excellent building material. For fear of earthquakes, the houses of the town are usually left (as Barth observes) unfinished in the upper stories.

The Arab geographers of the middle ages mention particularly among the buildings a mosque, erected in memory of Saiyid Battāl, the Turkish warrior of the faith and national hero [cf. above i. 680]. They also report that the town contained the highly venerated sarcophagus of Muḥammad b. al-Ḥanafiya [q. v.]. No remains are preserved of the important churches which existed here in the early Christian period. We find, however, important monuments of the Seldjûk epoch, notably the Ulu-Djāmi' of 1206, the Huen mosque of 1236 with Madrasa, also somewhat outside of the town, the round tomb or Syrtshaly Gumbet and the Köşk Onu, a khān-like building around an octagonal tomb of 1340. The walls of the town also date from the Seldjûk period but have been restored at a later date. This is also true of the citadel which, now filled with Turkish houses, affords a splendid panorama.

Kaïsariya is an important junction of roads and carries on a considerable trade. Local industry is limited to the manufacture of carpets and leather, the manufacture of various dyes, and (according to Barth) to the peculiar preparation of dried meat, which is sold throughout Asia Minor.

About half an hour South-West of Kaïsariya rise in vineyards the ruins of the ancient Mazaea Caesarea, called by the natives Eski-Kaïsariya, more usually Eski-Shehir (i. e. Old Town) and Zorpat by the Armenians. A series of not inconsiderable villages surrounds the modern town in the form of an arc from West to South-East, like suburbs. For example the little town of Talas lies 1½ hours to the South-East, the birthplace of St. Sabas († 532) with an ancient castle, powerful walls in the form of a quadrilateral, and the buildings of the American Mission (schools, hospital, etc.). ¾ hour further to the South lies Sindjidere, where in the monastery of St. John, surrounded by well conducted schools, the Greek Archbishop lives. Talas and Sindjidere are already on the North-eastern spurs of the Ardjish-Dagh.

In the West and South of Kaïsariya there was

a settlement of Christian monks at a very early period. There still exist here old monasteries and towns of caves, with churches, halls, cells and tombs. Special mention may be made of the cave-churches at Ūrgub and at the rocky cone of Mačan. For further information regarding these Christian foundations see Ch. Texier, *Descr. de l'Asie Mineure*, ii. (Paris 1849), p. 53 sq. (and plates lxxxv.—viii.); Ch. Texier and P. Pullan, *Byzantine Architecture*, London 1864, p. 40 sq.; Oberhummer-Zimmerer, *op. cit.*, p. 120 sq., 244—250, 298; H. Rott, *Kleinasiatische Denkmäler* (Leipzig 1908), p. 121 sq., 155—170, 210 sq.

KĀ'ITBEY, AL-MALIK AL-ASHRAF ABU 'L-NAṢR SA'IF AL-DĪN AL-MAḤMŪD AL-ZĀHIRĪ, Sultān of Egypt and Syria (873—902 = 1468—95) was purchased by Barsbey [q. v.], manumitted by Sultān Djākmak, became a life-guard, then *Dawādār Şaghīr* i. e. writer in the office of the Grand Dawādār (see DAWĀTDĀR, i. 931), then Emīr of

10 Mamlûks under Ināl [q. v.], *Ṭablaḫhāna* (i. e. Emīr with the right to have a band accompanying him), under Sultān Khoshkadam [q. v.], inspector of houses of refreshment and shortly afterwards commander of a thousand (*Mukaddam Alf*). In 872 (1467/8) he became *Ra's nawbat al-Nuwawb* (chief leader of the companies, i. e. Commander of the Mamlûks).

When Temirboghā ascended the throne in Dju-mādā I, 872 (Dec. 1467), he appointed his friend Kā'itbey Atābek but the Sultān had no real power, as he had very few supporters among the Mamlûks at his command. He had not the money to win over new followers; the treasury was empty. After an unsuccessful rising by the Ustādār Khā'irbey the crown was offered in the month of Radjab of the same year (Feb. 1468) to Kā'itbey, who accepted it after some hesitation. Temirboghā retired into private life to Damietta, to which he was not taken as a prisoner but travelled in perfect liberty accompanied by some friends. Unlike other Mamlûk Sultāns, Kā'itbey treated deposed Sultāns or descendants of former Sultāns throughout his reign with magnanimity and honour, frequently invited them to polo tournaments in Cairo, allowed them to make the pilgrimage to Mecca and even allowed them to visit the capital in his absence without any suspicion or fear of conspiracies.

Kā'itbey's chief political problem was his relations with the Ottomans. The rivalry between them and the Egyptians found expression in the fighting among their vassals in Asia Minor. The ruler of Albistān [q. v.], Shāh Suwār (cf. VIII 'L-KADR, i. 960a) was at war with Egypt (cf. KHOSHKADAM) and was secretly supported by the Ottomans, while Kā'itbey assisted prince Ahmad of Karamān in his war with Muḥammad II. The first two expeditions sent against Shāh Suwār (872 and 873) ended disastrously through the carelessness of the Egyptian commanders and more especially the lack of discipline among their troops and the rivalry between the Egyptian and Syrian corps. Kā'itbey later succeeded in depriving Shāh Suwār of the help of the Ottoman Sultān by agreeing to drop the assistance he had himself been giving Ahmad of Karamān. Thus weakened, Shāh Suwār was decisively defeated in 876 (1471) by the Atābek Ezbek. Shāh Suwār fell back to Zamanṭū. Besieged there he capitulated on condition that he was allowed to remain in possession of his kingdom as vassal of the Sultān; but he was taken prisoner, brought to Cairo and executed contrary to the laws of war. The prince of the White Sheep, Uzun Ḥasan, the ruler of Diyār Bakr and a part of Persia, was a dangerous rival to Kā'itbey, and advanced from triumph to triumph; in 872 he defeated the Sultān of the Black Sheep and in 873 the Sultān of Samarkand, but when in 876 (1471) he declared war on Muḥammad II he was defeated and thus became less dangerous for Kā'itbey. He died in 880 (1475) and was succeeded by Ya'qûb Bey. A quarrel arose between Bayinder, the latter's governor in al-Ruhā (Edessa), and the Sultān's general Veshbek, because Bayinder had given shelter to Saif, the rebel chief of the Beduins of Ḥamā. Veshbek advanced on al-Ruhā and, although satisfaction was offered in every respect, he insisted on besieging the town, but was defeated during a sortie and killed with several of his staff; other Egyptian notables were taken prisoner. Kā'itbey could not

wipe out this defeat and had to make peace, as he was threatened with a struggle with the new Ottoman Sultān Bāyazīd [q. v., i. 684]. Apart from continual friction regarding the ownership of Albistān, Bāyazīd felt himself threatened, because Kā'itbey had given a friendly welcome to his brother Lijem [q. v., i. 1034 *sq.*], the pretender to the throne and had even encouraged him to fight against Bāyazīd. An embassy sent to Bāyazīd to endeavour to maintain peace was unsuccessful. The Ottomans invaded the southern part of Asia Minor in 891 (1486) and occupied Ṭarsūs and Adana; other Ottoman troops besieged Malatya. The Egyptian forces operated with success against both armies especially as Kā'itbey had won over 'Alā' al-Dawla, prince of Albistān. In 893 (1488) the Ottomans were no more successful. An endeavour to land a considerable body of troops in the bay of Iskanderūn [q. v.] failed. In 895 (1489/90) the Atābek Ezbek inflicted a decisive defeat on the Turks at Caesarea in Asia Minor, where several generals were captured. Kā'itbey showed a wise moderation in retaining his inclination for peace, recognizing the enormous resources of the Ottomans and peace was concluded in 896 (1491). The rest of the reign of Kā'itbey was peaceful but the domestic situation did not improve. It is true that he succeeded by his authority alone in preventing a fight between the hostile Mamlūk factions, but he could not permanently restrain their outbursts and he did not succeed in introducing a sound financial system.

Kā'itbey was by far the most important ruler of the Burdjī dynasty (see i. 796). He once more raised the prestige of the Mamlūk empire to a great height abroad, so that he could with good reason consider himself the first prince of Islām. For his campaigns and his buildings he required considerable means, which he could only raise by extortion, in the total absence of a regulated system of taxation. This is made a severe reproach against him by the chroniclers. In the modern view it is an obvious duty of a country to provide the necessary means for its army. It was just this lack of organised taxation that brought about the ruin of the Mamlūk empire. The Sultān was left to provide funds for himself by force. He either extorted them (if necessary by torture) from the high officials of the treasury, who had enriched themselves by dishonest means or "visited" the great shaikhs of the provinces and received gifts — presumably not always voluntary — from them (on one tour alone he raked in 200,000 dinārs). He also levied contributions (e. g. to the amount of the five-monthly rental) from the real estate belonging to the pious foundations or from private individuals and forced the reservists, the Awlād al-Nās [on them cf. the article IBN IYĀS], to pay large sums in order not to be sent to the front. When the expedition planned did not take place, he gave back the money to the general amazement. He taxed Jews and Christians correspondingly. He also levied a very burdensome tax on the sale of corn. His expenses were on a corresponding scale. In the years 872—894 A. H. he expended over 7,000,000 dinārs (70 million francs) in paying the army, a large sum for these days. His buildings as well as the renovation of older buildings required large sums. The mosque at his tomb before the gates of Cairo, the Khānkāh (monastery) in the village of this name near the

capital, the building of the castle at Aleppo, work on the mosque in Medina which was destroyed in 881 (1475/6) by a fire caused by lightning are celebrated. Although he was nearly 60 years old when he ascended the throne, he spent the earlier years of his reign in an almost feverish state of activity. Not only did he, contrary to the previous custom, daily leave the citadel for riding and excursions but he travelled round unceasingly and made the pilgrimage to Mecca and great tours of inspection to Aleppo and beyond to the Euphrates. He was able to keep his Mamluks in control and the always rebellious Beduins in the Delta as well as the Arab tribes in Nābulus and Ḥamā. The period of his reign seemed an ideal one to the historians in contrast to those of his successors. He was of unusual, almost sadistic cruelty. He loved to be present at whippings and tortures, sometimes taking part in person; he was exceedingly strict to his son and once, as a punishment, made him live in the Mamlūk barracks and perform the most menial duties. He had only one legal wife; of his slaves the best known is Asil Bāi, the mother of his son Muḥammad al-Nāṣir (cf. her biography in my article in *Ztschr. des Deutsch. Pal. Vereins* 1905, p. 191).

AL-KAIYĀL, AHMAD AL-KAIYĀL AL-KHAṢIBĪ, a philosopher of the third century A. H., with Isma'ili and gnostic tendencies; al-Shahrastānī knew of works by him in Arabic and Persian; the fragments which he gives are to be compared with *Rasā'il Iḥwān al-Ṣafā* — cf. Shahrastānī, *Milāl*, Cairo 1317, ii. 17—18.

(L. MASSIGNON)

KĀIYIM (A.), originally: "he who stands upright", then (with *bī*, *'alā*, *ū* or the genitive alone): he who takes something upon himself, takes care of something or someone and hence also has authority over them. Thus we find the pre-Islāmic poet al-Kuṭāmī (*Dirwān*, ed. Barth, Leiden 1902, N^o. 26) already speaking of a "kaiyim of water", i. e. apparently the man in charge of it, the supervisor, and the poet Bā'ith b. Ṣuraim (*Ḥamāsa* of Abū Tammām, ed. Freytag, p. 269, verse 2) speaks of the kaiyim of a woman i. e. he who provides for her, her husband. The first mentioned meaning, (supervisor etc.), is then found in all possible applications, administrator of a pious foundation, of baths, superintendent of a temple, caretaker of a saint's grave, etc.; indeed, in al-Bukhārī, *Ṣaḥīḥ*, *Da'awāt*, Bāb 10 (ed. Krehl-Juynboll, iv. 189, 6), in Muḥammad's night-prayer, the expression is even applied to God as the director of heaven and earth, and this application seems also to be present in 'Omar b. Abī Rabi'a, ed. P. Schwarz, N^o. 91, 11, where the poet swears by the "religion of the Kaiyim". Here, of course, it is most probably a question of an inversion (perhaps caused by the metre) of the Korānic expression *al-Dīn 'l-kaiyim* (see below) on the model of *Bair 'l-Muḥaddasī*. (Cf. Wright, *Grammar*³ ii.

§ 95 sq. and al-Ḳaṣṭallānī on Bukhārī, *Ṣawm*, bāb 67 end).

The meaning "provider, husband" of a woman is frequently found in the eschatological traditions, in which it is said that with the approach of the last day the number of women will increase in proportion to men, so much that there will only be one kaiyim for every 50 women.

The adjectival meaning "commanding" (a branch of knowledge) perhaps arises out of the same sphere of conceptions as "provider", "master"; it is found in a biographical notice of a scholar in Yāqūt, *Muḏjam*, ed. Wüstenfeld, ii. 225, 18. On the other hand, kaiyim, also an adjective meaning "correct, right", repeatedly found in the Korān in the expression *al-Dīnu 'l-kaiyimu* and similar combinations may have to be semasiologically separated from the former meaning.

Bibliography (here as in the text mainly from references given by Prof. A. Fischer, Leipzig and Prof. A. J. Wensinck, Leiden): Kaiyim = administrator: al-Bukhārī, *al-Ṣaḥīḥ Waṣayā*, Bāb 32 (ed. Krehl-Juynboll ii. 196, 2) and al-Ḳaṣṭallānī s. v.; Yāqūt, *op. cit.*, iii. 856, 13; al-Maḳḳarī, ii. 547, 20; al-Ṭabarī, ed. de Goeje, I/ii. 814, 11; al-Ḳazwīnī, *Athār al-Bilād*, ed. Wüstenfeld, ii. 125, 2 from below; = husband: al-Bukhārī, *op. cit.*, *Nikāḥ*, Bāb 110 (ed. Kr.-J. iii. 453, 7 from below) and *passim*; 'Omar b. Abī Rabi'a, *op. cit.*, poem N^o. 269, 3; = correct, orthodox: Sūra ix. 36 and *passim*; xcvi. 4 and thereon al-Ḳaṣṭallānī's note on the quotation of this passage from the Korān in al-Bukhārī, *op. cit.*, *Imān*, Bāb 34 (Kr.-J., i. 19, 16). (A. SCHAADE)

AL-KAIYŪM (A.), one of the "beautiful names" of Allāh (see i. 303), according to some theologians the greatest name of Allāh (see *Taḏjī al-ʿArūs*, ix. 36, 7 from below — ult. The word is of Jewish origin and means like its prototype, the Hebrew קַיִם, or the Aramaic נִכְיָם (cf.

Hirschfeld, *New Researches into the Composition and Exegesis of the Qoran*, London 1902, p. 69, 12 and note 89; Brünnow-Fischer, *Arabische Chrestomathie*, Berlin 1913, glossary under *ḳwm* "the eternal". Muḥammad, who uses it three times in the Korān (ii. 256; iii. 1 and xx. 110) may have picked it up from the Jews of Medina (the attribution of the whole of Sūra xx. as "Meccan" would then have to be revised). When late (post-Korānic) texts e. g. al-Bukhārī, *al-Ṣaḥīḥ*, *Tawḥīd*, Bāb 24 (ed. Krehl-Juynboll, iv. 466, 12; Muḥammad's night-prayer) have the variant *kaiyām*, the *ā* in the last syllable is probably only to be regarded as another reproduction of the Hebrew *ḳameš*. The other meanings which Arab exegesis has given the word may be due to ignorance of its foreign origin (cf. *Taḏjī al-ʿArūs*, l. c.; al-Ṭabarī, *Djāmi' al-Bayān*, Būlāḳ 1324, iii. 5 on Sūra ii. 256).

Bibliography (here as in the text mainly from references given by Prof. A. Fischer, Leipzig): Levy, *Neuhebr. u. chald. Wörterb.*, under קַיִם und נִכְיָם; Z. D. M. G., xlv. (1890), p. 168—171; al-Abshihī, *Kitāb al-Mustaṭraf* (Cairo 1308), i. 5, 14 (beginning of Chap. i.). (A. SCHAADE)

AL-ḲA'KĀ' B. 'AMR B. MĀLIK AL-TAMĪMĪ, an Arab general. When Sadjāh bint al-Ḥārith gave herself out to be a prophetess after the death of

Muḥammad, al-Ḳa'kā' joined her and is said to have fought on her side. But in the period following he always retained his Muslim views, and as a subordinate of the famous Ḳhalīd b. al-Walīd [q. v.] he played a very prominent part in the earliest wars of Islām. As early as the year 11 (632) he is reported to have fought faithfully on the side of Ḳhalīd in the battle of Buzāḳha [q. v.] and after the capture of al-Hira [q. v.] in Rabi' 1, 12 (May/June 633) there was an encounter between the Muslims under al-Ḳa'kā' and the Persians at al-Ḥasid in the vicinity of al-Anbār [q. v.] in which the latter were defeated. The exact date cannot be ascertained; according to one statement the fight was in the year 12; by others it is put in Ḳhalīd's campaign in Syria. In Radjab 14 (Aug.—Sept. 635) al-Ḳa'kā' took part in the conquest of Damascus and in the following year he commanded a squadron in the battle of the Yarmūk, which also ended in the victory of the Muslims. Special mention is made of the way in which he distinguished himself in the desperate battle of al-Ḳādisiyya [q. v.] in 16 (637); Sa'd b. Abī Waḳḳās was in command here, but the success is ascribed to the timely intervention of al-Ḳa'kā'. He is again mentioned among the valiant heroes who took part in the capture of al-Mada'in in the same year, when countless booty fell into the hands of the Muslims. According to some accounts he commanded the vanguard in the battle of Djalulā [q. v.] at the end of the same year and organised a garrison in Hulwān [q. v.]. He also shared in the capture of Nihāwand in 21 (641/642) and before the battle of the Camel (36 = 656) he was sent by 'Alī to al-Baṣra to negotiate with Ṭalḥa and al-Zuhair. He afterwards settled in al-Kūfa. Al-Ḳa'kā', who is one of the favourite heroic figures in Arab legend, was also famed as a poet and celebrated his warlike deeds in several poems.

KĪAKHTA, in older spelling KAKHTĀ, sometimes AL-KAKHTĀ, the name of a place on the Kīakhta-Ṣu, a tributary of the Euphrates, about 40 miles S. E. of Malatya, the residence of a ḳaimmaḳam and chief town in a ḳazā (cirele) of the same name, which comprises the three *nahiyas* (communities) of Gerger, Şhiro and Merdis, with a population of about 46,000 (according to Cuinet mainly Kurds; with them over 4000 Armenians) and belongs to the *livā* (administrative district) of Malatya in the province of Ma'mūrāt al-'Aziz (Khārpūt). The modern Kīakhta which numbers only a few hundred huts with about 1000 inhabitants, almost exclusively Kurds, was famed in the middle ages for its exceedingly strong castle which, built on a steep eminence, guarded the eastern road from Sumcisāt to Malatya and was one of the frontier strongholds (*Thuḡūr*) of the

Muslim lands, and has again achieved fame in modern times through the discovery on the neighbouring Nemrud-Daghi of monuments of Antiochus I of Commagene of the first century B. C. We first meet with the name in the Oriental historians of the Crusades; in Bar-Hebraeus and Michael Syrus it is written *Gakhita*; the ancient and the Byzantine name are not known; but the bridge built in the reign of Septimius Severus about 200 A. D. over the İslām-Şu at Kiakhita and the remains of Byzantine buildings on the fortress show that the place was an important frontier station, even in antiquity and at the beginning of the middle ages. The hypothesis of Ainsworth that Kiakhita represents the ancient Claudias, the Kalawdhiya of the Arabs, is untenable (see the article KALAWDHIYA).

As a result of the battle of Manzikert (Melāzgird) on Aug. 19, 1071, these frontier districts were definitely lost to the Byzantine empire and became a shuttlecock between the Dānīshmandoghlu of Malatya, the Saldjūks of Rūm and the Ortokids of Khārpūt, who disputed the ownership of Kiakhita with one another and the Crusaders, who ruled in Urfa (Edessa) and Mar'ash. At the same time Armenians, who by the second half of the eleventh century had migrated into these regions in considerable bodies, had made themselves independent in various strong places like Malatya, İlişn Mansūr, Gerger and Kiakhita (Michael Syrus, ed. Chabot, iii. 158 sqq., 198 and 205 sq.) and kept ground against the neighbouring Muslim rulers. To this period belongs an inscription of the citadel of Kiakhita of the year 525 (1130/31) in which a certain Malik al-Manşūr is mentioned as restorer of the defences (O. Hamdy Bey, *Le Tumulus de Nemroud Daghi*, p. 2 sqq.).

After Baldwin, Count of Mar'ash, and his successor Reinaud had fallen in quick succession in battle with Nūr al-Dīn, the warlike Jocelin of Edessa seized their lands, which included Gerger and Kiakhita; when he was captured in May 1150 by Nūr al-Dīn, Kiakhita and the neighbouring strongholds like Gerger, İlişn Mansūr, etc., fell into the hands of Karā Arslān of Khārpūt; Krikor, the last Armenian ruler of Kiakhita, was granted another district by the victor (Michael Syrus, iii. 294 sq., Chalaudon, *Les Comnènes*, ii. 421, 423). Thus ended Christian rule in these regions.

On October 25, 1177, Sultān Kılıç Arslān conquered Malatya and drove out the last Danīshmandoghlu, who fled to Khārpūt (Michael Syrus, iii. 273) but the border strongholds like İlişn Mansūr, Kiakhita and others seem not to have been as yet occupied by the Saldjūks.

In the year 623 (1226) war broke out between 'Alā' al-Dīn Kaiqobād (see KAIQOBĀD I) and Mas'ūd, the Urtukid of Amid and Mardin; after Mas'ūd and his allies had suffered a severe defeat at Kiakhita in Shawwāl of this year, this stronghold, which had hitherto been under Mas'ūd's control, passed into the hands of the victor (Ibn al-Athīr, ed. Tornberg, xii. 300; Abu 'l-Fidā', *Ta'rikh*, Constantinople, iii. 144; Houtsma, *Revue*, etc. iii. 280, iv. 118 sqq.) and remained in possession of the Saldjūks of Rūm, also when they had already become vassals of the İlhāns. During the rising of Bābā Rasūl Allāh (638 = 1240—1241), Kiakhita and the surrounding country were plundered by the followers of this madman (Bar Hebraeus, *Kutāb al-Makbūnāt Zabnā*, ed. Bedjan,

p. 473; *Chronik*, ed. Bruns and Kutsch, ii. 517 = *Ta'rikh Mukhtasar al-Duwal*, ed. Şalḥānī, Hāirūt 1890, p. 439) after having been devastated a few years earlier by the Khwāzimis driven out of Rūm (Bar Hebraeus, *Ta'rikh*, etc., p. 437 sq.), afterwards, under Kaiqā'ūs II, it was used from time to time as a place of banishment (Houtsma, *Revue*, etc. iv. 259, 262) and it is also mentioned in other connections (Bar-Hebraeus, *op. cit.*, p. 499, 14 = *Ta'rikh* etc., p. 467 sq., anno 1257). Munadjimbashī, *Ta'rikh* iii. 271, reports that the last 'Alā' al-Dīn of Konya granted a fief in Pighī-Eli near Kiakhita to a son of Othmān and grandson of Ertoghul; and Ertēna, who had made himself independent as governor for the İlhāns in Asia Minor (728—753 = 1328—1352) ruled also in the domain of Malatya; on Ertēna see M. von Berchem and Halil Edhem, *Matériaux pour un Corpus Inscr. Arabicarum*, Cairo 1910, p. 41 sqq.). In the campaigns of the Egyptian Mamlūk Sultāns against the Mongols, Kiakhita is repeatedly mentioned (al-Makrizī, *al-Sulūk li Ma'rifat Duwal al-Mulūk*, French transl. by Quatremère entitled *Hist. des Sultans Mamelouks*, ii./i., p. 61) and in 682 (1283/1284) Karā Şonkor, the Egyptian governor of Halab, occupied the town, which he again fortified strongly (al-Makrizī, *op. cit.*; Abu 'l-Fidā', *Ta'rikh*, iv. 18) and it is therefore expressly mentioned in the treaty of 1 Rabī' II, 684 with Leon, king of Little Armenia, as the territory of Sultān Kalā'ūn (al-Makrizī, *op. cit.*; ii./i. p. 168). Kiakhita seems, however, to have been temporarily lost again with other places; in connection with the Egyptian campaign against the Mongols in 715 (1315—16), in the course of which the Mamlūks conquered and destroyed Malatya, it is reported that the people of Kal'at al-Rūm, Behesnā, Kiakhita and Gerger used to make raids into Muslim territory (Abu 'l-Fidā', *op. cit.*, iv. 77). Later this area must have been under the rule of the Dhu 'l-Qadīroghlu of Mar'ash, the vassals of the Mamlūk Sultāns, down to the first Ottoman conquest. When Bāyazid I, in 801 (1398/98), according to Egyptian sources (see Weil, *Gesch. der Chalifen*, v. 70 and 74; Neshri in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xv. 352: 800 A. H.; the old Ottoman Chroniclers in Leunclavius, *Histor. Musulm.*, col. 337, 24 sqq., 338, 17 sqq.; do. ed. Giese, p. 34 sq., and 'Ashīk Pasha Zāde, *Ta'rikh*, p. 74: 798 A. H.) opened hostilities against Egypt, he first of all occupied the region of Malatya and drove out the Turkomans, i. e. the Dhu 'l-Qadīroghlu, who had hitherto ruled there; on his campaign against Syria in the early months of the year 803 (1400/1401), Timūr conquered Malatya and the whole district as far as Kiakhita, drove out Bāyazid's garrisons and installed the "Turkoman" Karā Othmān (Sharaf al-Dīn 'Alī Yezdī, *Zafarnāma*, Calcutta, ii. 271 sqq., 278; Weil, *op. cit.*, v. 82). After Timūr's withdrawal, the Mamlūk Sultāns again entered this territory which they held till the destruction of their power by Selim I. It is specially mentioned that Kiakhita was captured by them in 820 (1417/1418; al-Makrizī, *op. cit.*, ii./i. 61 note; Weil, p. 139); lastly we read in Ibn Iyās, *Badā'ī al-Zuhur*, Cairo 1311, ii. 141, that Uzun İhsan seized this stronghold in 877 (1472/1473). In the report on his victory (*fathnāme*) from Halab (end of Radjab 922) Selīm I expressly mentions the capture of Gerger and Kiakhita. Under Ottoman rule it

had no longer the importance as a frontier fortress that it had in the middle ages, when it is specially mentioned as such by Abu 'l-Fidā' (*Tuḥfat al-ʿaʿīm*, ed. Reinaud, p. 262 sq.) and al-Dumashkī (ed. Mehren, p. 206). Djalālzāde (middle of the xvth century) had given it a section to itself in his description of the Ottoman empire for the district of Gerger and Kiakhta (von Hammer, *Des Osm. Reiches Staatsverf.*, ii. 449); in Ewliya also (*Siyāhet-nāma*, iv. 22) it is occasionally mentioned, but the great geographical works of the xviith century, the *Manāzīr al-ʿAʿwālim* of Muḥammad 'Ashīk (f. 176r of the Vienna MS.) and the *Djihānnūma* of Kīatīb Ćelebi (Constantinople 1145, p. 600 sq.) only know Kiakhta from Abu 'l-Fidā', whose statements they translate word for word; among the Anatolian Kaḫā's Kiakhta was placed in the outposts of the seventh stage (v. Hammer, *Gesch. d. Osm. Reiches*, ix. 8, N^o. 470). In the course of the last three centuries, these remote and inaccessible districts have been settled by Kurds; Kīatīb Ćelebi, *op. cit.*, describes them as a useless, rebellious horde of highway robbers; they obeyed only their own chiefs (*hey beyleri*) and during the last century it required repeated military expeditions to restore the authority of the Porte in the region inhabited by them. In these fightings the fortress of Kiakhta also played a part, as a Kurdish Bey with his followers had entrenched himself in it; it was stormed in 1838 by Turkish troops and from this incident became known in Europe through reports of Ainsworth and v. Moltke (cf. C. Ritter, *Erdkunde*, x. 870, 874, 883 sq.). An archaeological excavation of the fortress has yet to be made; there is a brief description in Hamdi Bey's work on the Turkish expedition of 1883; he paid special attention to the Muslim inscriptions (still unpublished); his statements are supplemented in details by the *Sālnāma* of Khārput. The great iron gate, which is mentioned as early as the Saldūḫ conquest in 1226, was brought along with the gate of the fortress of Gerger in 1882 to Diyār Bakr.

2. A town in Transbaikalia, 30° 19' N. Lat., 106° 40' E. Long., 2550 feet above sea level. Kiakhta is separated from Maimačīn (Dai Oergö) by a neutral zone of about 50 yards broad and connected with Troiskosawsk by the only high road in the district, about 3½ versts long. Lying on the Kiakhta brook (Mong. Kaktugorekhon) and surrounded by mountains (Burgultei = Eagle mountain) Kiakhta arose out of a Russian frontier post south of the Kiakhta brook on the Roro, a stream that forms the frontier, through the fact that here on Aug. 10, 1727 the treaty of Kiakhta was signed. The Chinese opened this

point for trade between Russia and China and founded here Maimačīn (trade-frontier) and the Russians the frontier post of Kiakhta. Henceforth Kiakhta has been the corridor for the exploration and penetration of Mongolia and China, for science, politics, trade (tea-trade) and commerce. Fortified with palisades, it has formed down to the present day a little republic of merchants with its own taxes (tax on tea), customs, its own administration, council of elders, fire-brigade and church. In addition to houses of stone there are still also wooden buildings in Kiakhta and great business-houses with large yards for caravans, but no shops; besides the Russian wholesale business there is the detail trade among the Mongols and Chinese. Since 1727 the famous December fair has been held annually in Kiakhta. Kiakhta is the main depot and clearing house for the so-called caravan tea. At one time rhu-barb was smuggled into Russia. Now gold is smuggled into China. As a result of the treaty of Peking 1898 and the opening of the great Siberian railway the import of tea, silk and cotton goods has considerably decreased; the export of cloths, furs and leather is rather busier. There is a steppe post and telegraph to Peking via Urga.

KÄKÖYIDS, a dynasty, which reigned from 398 (1007) to 443 (1051) over the provinces of Isfahān and Hamaghān. It descends from Dushmanziyār Rustam b. al-Marzubān, a native of Dailam, who held the fief of Shahriyār and received the title of *ispahbād* from the Būyid Majd al-Dawla (cf. Ibn Isfandiār, *Hist. of Ṭabaristān*, transl. Browne, p. 228, 230, 231, 239; Zahir al-Dīn, *Tārīkh-i Ṭabaristān*, ed. Dorn, p. 195, 209; Mirkhond, *Rawdat al-Safā*, iv. 26).

Käkōye in the dialect of Dailam is the hypo-

coristic diminutive of *Kākū* "maternal uncle" (cf. J. de Morgan, *Mission scientifique en Perse*, v. 216, N^o. 363; Riḍā Kālī Khān, *Farhang-i Nāsirī*, s. v.). The surname Ibn Kākōye had been given to the founder of the dynasty, because he was the son of the maternal uncle of Maḍjd al-Dawla by the mother of the latter, sister of Duṣhmanziyār (Ibn al-Athīr, ix. 338, better explanation than p. 146), his patron.

In place of Duṣhmanziyār, the coins have the name Duṣhmanzār (cf. F. Justi, *Iranisches Namenbuch*, p. 88; genealogical table, p. 445). The dynasty consisted of five members:

1. 'ALĀ' AL-DAWLA ABŪ DĪ'ĀFAR MUḤAMMAD B. DUṢHMANZIYĀR, surnamed *Ibn Kākōye*, who was the first to declare himself independent, soon after 398 (1007); he was cousin of the wife of the Būyid Fakhr al-Dawla [q. v.], mother of Maḍjd al-Dawla, who had him appointed governor of Iṣfahān; he seized Hamadhān (414 = 1023), Rai (419 = 1028) and Iṣfahān (421 = 1030); continual wars with the Kurds, with the *ispahbadh* of Ṭabaristān and with the Ghuzz prevented him from peacefully enjoying the possession of these places. In 420 (1029) he declared himself a vassal of Sulṭān Maḥmūd of Ghazna; in 424 (1033) he was confirmed in the government of Iṣfahān by Sulṭān Mas'ūd, who had succeeded his father; in 425 (1034) he rebelled, was twice defeated, lost Iṣfahān, tried to retake it two years later and ultimately succeeded after some time. The philosopher and physician Ibn Sīnā [q. v.] filled the ministerial office at his court, after having been dismissed from the service of the Būyid Tādī al-Dawla (Ibn Khallikān, ed. Wüstenfeld, N^o. 189; transl. de Slane, i. 442); he was still minister at his death in 428 (1037). 'Alā' al-Dawla died in 433 (1041), after having built a wall round his capital in 429 (1037).

2. ZAHĪR AL-DĪN ABŪ MANṢŪR FARĀMARZ, his eldest son, succeeded him at Iṣfahān; he fought against his brother Abū Ḥarb, who had appealed for assistance to the Ghuzz Saldjūks, settled in Rai; the latter was defeated. Having sought refuge with the Būyid Abū Kālīdjār b. Sulṭān al-Dawla [q. v.] he induced the latter to undertake the siege of Iṣfahān; the quarrel was terminated by a peace between the two brothers, which lasted till 435 (1044). Zahr then seized the two fortresses of Kirmān belonging to Abū Kālīdjār, who in order to get them back, took Abarḳūh and defeated the Iṣfahān army. Besieged in his capital by Toḡhrul Beg in 438 (1047) he was left in possession of his fief in consideration of paying homage till 443 (1051) when the Saldjūk finally obtained Iṣfahān after a long siege; he made it his capital and had the walls destroyed, saying that only a weak prince has need of walls to protect him. Abū Manṣūr received as fiefs the two cantons of Yazd and Abarḳūh. He accompanied Toḡhrul-Beg when the latter went to Baghdād to marry the daughter of the Caliph al-Kā'im in 455 (1063).

3. ABŪ KĀLĪDJĀR GERŠHĀSP, brother of the preceding, was reigning at Hamadhān when this town was besieged by the Ghuzz in 420 (1029). He made peace with their chief Gok-Tāsh and married his daughter; but the Ghuzz began their attacks again after the capture of Rai and forced him to take refuge in the fortress of Kinkawar. These Turks entered Hamadhān in 430 (1038);

having succeeded in drawing Abū Kālīdjār after them, they attacked him but he escaped. It was immediately after this that his father 'Alā' al-Dawla surprised and defeated them. On the latter's death Geršhāsp made Nihāwand his residence. Farāmarz having recaptured Hamadhān gave it as fief to his brother on condition that he had the *khutba* pronounced in his name. In 434 (1042) Toḡhrul-Beg seized this town and demanded that Geršhāsp should hand over Kinkawar, which its defenders refused to do. In 436 (1044) Geršhāsp regained Hamadhān and declared himself a vassal of the Būyid Abū Kālīdjār; next year Toḡhrul sent his brother Yannāl to reoccupy this town, from which the prince had fled and taken refuge among the Djawzakān Kurds. Yannāl in 439 (1047) took Kinkawar, which was commanded by a lieutenant of Geršhāsp's, 'Okbar b. Fāris, who, to obtain the best conditions of surrender, pretended that he still had considerable supplies. After the loss of his possessions, Geršhāsp took refuge with the Būyid Abū Kālīdjār. In 441 (1049) he was in Iṣfahān and received favourably the overtures of Mawdūd the Ghaznawid who was seeking help against the Saldjūks, but he lost many soldiers in the desert and fell ill, which forced him to return. He died at al-Ahwāz in 443 (1051).

4. 'ALĪ, son of FARĀMARZ, married Arslān Khātūn, daughter of the Saldjūk Dā'ūd, aunt of Sulṭān Malik-Shāh, in 469 (1076). Having sought refuge in Kirmān he was given the fief of Yazd (*Rec. de Textes rel. à l'hist. des Seldjoudes*, i. 26). He was killed in 488 (1095) fighting by the side of Tutush (Ibn al-Athīr, x. 312).

5. 'ALĀ' AL-DAWLA ABŪ KĀLĪDJĀR GERŠHĀSP, son of 'Alī; as prince of Yazd, he was in the service of the Saldjūks; he had married the sister of Sulṭān Muḥammad and of Sandjar; dispossessed of his fief, which was given to the cupbearer Karādja by Sulṭān Maḥmūd, he put himself under Sandjar's protection and was present at the battle in which the latter defeated his nephew (513 = 1119). He had escaped from the fortress of Farazīn, in which Maḥmūd had had him interned (*Rec. de textes rel. à l'hist. des Seldjoudes*, ii. 133).

KĀLĀ (PL. KĀLĀ^c, KULŪ^c) in Arabic the name for a fortress or stronghold built on a hill or small elevation. In Turkish it also means the interior of a city in contrast to the outer suburbs (cf. Zenker, *Türk-arab.-pers. Handwörterbuch*, p. 707a). The word which looks good Arabic and is fairly generally regarded as a genuine Arabic word may be a loanword from Irānian. Frankel first raised doubts as to its genuineness in *Die Aram. Fremdwörter im Arabischen* (Leiden 1886), p. 237, because it cannot be derived from any Arabic root. Quite recently A. Siddiqi, *Studien über die pers. Fremdwörter im klass. Arabisch*

(Göttingen 1919), p. 70 *sq.* has championed the Persian origin of the word. The original is considered to be the Persian *kālāt* (a fort or village on a hill), (see Vullers, *Lex. Pers.-Lat.*, ii. 859). This *kālāt*, strictly an appellative, appears at various places on Irānian soil, especially in Afghānistān and Fārs, as a local place-name also (Kelāt, Kilāt); cf. G. Le Strange, *The Lands of the Eastern Caliphate* (Cambridge 1905), p. 269 *sq.*, 332, 395. The form *kālāt* is of recent origin and has arisen through the addition of an inorganic *t* to the older *kālā*; cf. Andreas in the *Mitt. d. Vorderasiat. Gesellsch.* (Berlin), ii. (1897), 85 *sq.* and Pauly-Wissowa, *Realencyclop. der klass. Altertumswiss.*, i. 1176. *Kālā* (also *kulā*) has survived for example in place names in Māzandarān; for references see Melgunof, *Das südl. Ufer des Kaspischen Meeres* (Leipzig 1868), p. 303 *sq.* The old Irānian form of the word must, however, have been **kalak*; this is shown by the Armenian *khalakh* (town), which is certainly of Irānian origin, not perhaps an Aramaic loan word (from Aram. *kar-khā*), which P. de Lagarde, *Armen. Studien* (Göttingen 1877), N^o. 2357 and Hubschmann in the *Zeitschr. d. Dtsch. Morgenl. Gesellsch.*, xlvii. 252 wished to make it. **Kalah* would regularly become *Kālā* (Andreas, *op. cit.*). It is still uncertain why the Arabs added an *‘ain* at the end of the word. The word certainly was borrowed very early; the prototype yielded was perhaps not *kalā*, but still the oldest form **kalak*, the final *k* of which first of all becoming *ḡ* might be weakened in pronunciation to *‘ain*. [It is also possible that the Arabs took Persian *l* as a so-called emphatic *lām*, cf. *al-‘askar* from *lash-kār*. Ed.]. In the Arabic linguistic area there are a fairly large number of place names, which have *kal‘a* as their first member; cf. AL-ḲAL‘A, ḲAL‘AT; Yāqūt, *Muḡhtarik* (ed. Wüstenfeld), p. 357; al-Balāḏhurī, *Futūḥ al-Bulḏān* (ed. de Goeje), p. 533 (Index); Ibn al-Aṭṭār, *al-Kāmil* (ed. Tornberg), xiii. 786—9 (Register); Vullers, *op. cit.*, ii. 735.

(M. STRECK)

AL-ḲAL‘A. See ALCALA, ḲAL‘AT BANĪ ‘AB-BĀS etc.

KALAH (also KALĀH, KALĀ, KILĀ and KILLAH), according to the mediaeval Arab geographers the name of an island or peninsula, which played an important part as an intermediary in the trade and navigation between Arabia, India and China. It was particularly noted for its tin-mines; it is at the same time described as a centre of trade in camphor, bamboo, aloes, ivory, etc. Its capital was likewise called Kalah; cf. e.g. al-Dimashqī, p. 152, 11, 170, 1; al-Nuwairī (in A. v. d. Lith, *op. cit.*, (see below, *Bibl.*), p. 281; the sea washing this region, described as difficult to navigate, was called the “sea of Kalah” after it; see al-Mas‘ūdī, i. 370, 10, 340, 1; al-Dimashqī; p. 152, 11, 169, 20. The identification of the situation of this territory is of importance for the history of Indo-Arabian trade. According to the statements given by the merchant Sulaimān (his journal was edited in 237=851) and Yāqūt, a location in Further India is alone possible. The islands and peninsulas of Further India have been especially famous for centuries as producers of tin; cf. thereon Ritter, *Erkunde*, v. 23, 24, 28, 30, 77—80, 438—439. As it is expressly stated of Kalah (e.g. by Abū Zaid al-Sirāfi; see below, *Bibl.*) that it — at least for a time — was under the rule of the king of Zābedj (= Java; see A. van der

Lith, *op. cit.*, p. 231 *sq.* and JAVA, ii. 574 *sqq.*), in identifying it, we must look in the first place to the south-western part of Further India, in the region of the Strait of Malacca. We may leave Sumatra out of this limited choice, especially as it only produces tin in small quantities and of inferior quality. The island of Bangka on the S. E. coast of Sumatra, now famous as a rich tin-producer, is to be left out of the reckoning, as the mines there have only been known since 1710 and were not worked before (cf. A. v. d. Lith, p. 263). This only leaves us the peninsula of Malacca and we would have to follow Walckenaer (in *Nouvelles Annales des Voyages*, Paris 1852, p. 19) and identify the modern town of Quedah (Queda, Kedah, Keddah) on the west coast of the peninsula in 6° N. Lat. with the Kalah of the Arab authors. The province of Quedah (on it cf. Ritter, *Erkunde*, v. 20 *sq.*), watered by the river Kalang, which would appear to coincide more or less with the area of the “peninsula” of Kalah, is still distinguished in Malacca for its busy tin trade. The actual name of the chief town is Kādah (to-day pronounced Kēdāh). Quedah is to be explained as simply a corruption through the Portuguese. In the Turkish *Muḥit* of Sidi ‘Alī (see i. 287), written about 1554 the form Kēdā is found; see Bittner and Tomaschek, *Die topogr. Kapitel des indischen Seespiegels Muḥit* (Vienna 1897), p. 86 and see also there the maps reconstructed by Tomaschek from the statements of the *Muḥit* and from Portuguese sources (plates xxiii. and xxiv.) Quedah is at the present day an unimportant place but in earlier centuries it was a flourishing, much visited and populous harbour; see thereon Ritter, *op. cit.*, p. 25 and A. v. d. Lith, p. 261.

The identification put forward by Walckenaer is also accepted by A. v. d. Lith, p. 259, 308, de Goeje (in *De Gids*, Amsterdam 1889, iii. 297), Tomaschek, *op. cit.*, and G. Le Strange in his translation of Hamd Allāh Mustawfī’s *Nuḡhat al-Ḳulūb*, p. 194. Quatremère, *op. cit.*, p. 734 and Yule-Burnell, *op. cit.*, p. 145 consider it probable. The latter both think that Kalah might be identical with the *Kālā* of Ptolemy. But the situation required for the latter town (cf. the article *Kōli* in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, xi. 1075) seems to refute this.

The equation Kādah (Quedah) = Kalah seemed to be made quite certain by the fact emphasised by Kern in A. v. d. Lith, p. 308, that Malay *d* is pronounced very like *l*; Malay *Kādah* would therefore have sounded to an Arab ear as *Kalah*. But on the other hand it should be remembered that recently G. Ferrand (see *Bibl.*) contests the plausibility of a phonetic change from *Kādah* to *Kalah*. According to his investigations, Kalah would not be Kādah at all, but is rather to be equated to Kērah, Kra (on maps) in the northeast part of Malacca (near 10° N. Lat.).

After what has been said above we are only left with the choice between Kēdah or Kērah (Kra) on Malacca for the identification of the Kalah of the Arabs. The other attempts to locate the position of Kalah — on Ceylon (harbour of Ghāli, Galle, Pointe de Galle; so Renaud and Dulaurier), Malabar (so Renaudot; see Ouseley, *op. cit.*), Comorandel (so Gildemeister) — should now be definitely rejected as wrong.

Besides Kalah we find occasionally in the Arab geographers also Kalāh-bār, e.g. in the voyage

of the merchant Sulaimān (Reinaud, *Relation*, etc. ii. 18, 13) and in al-Mas'ūdī, i. 3, 3). Reinaud wished to separate this from Kalah entirely and connect the name with Coromandel, or rather its older Sanskrit form (which Gildemeister had already compared with Kalah). But that so far west a location for Kalāh-bār is excluded is shown by Sulaimān's reference, according to which Kalāh-bār (like Kalah, see above) was a dependency of the king of Zābedj (Java); Kalah and Kalāh-bār are probably identical as Quatremère, *op. cit.*, p. 733 sq. and A. v. d. Lith, p. 258, 253 have said. What -bār means in Kalāh-bār is quite uncertain; the explanations of Sulaimān (as = *mamlaka* = kingdom) and of al-Mas'ūdī (= sea) arouse little confidence.

Most probably it is from the district of Kalah in Malacca discussed above — whether it is Kēdah or Kērah (Kra) — that tin gets the name *kal'i* = "the Kala'ite" in Arabic. Like the Persian *kālā* (*Kālūt*; see the art. *ḲALĀ*) the Arabs usually reproduced Kalah by *Ḳal'a*; hence the nomen relativum *kal'i* (*kalā'i*). The somewhat fanciful observation of the traveller Miṣ'ar b. Muḥalhil (in *Yākūt*, ii. 162, 6; al-Ḳazwīnī, ii. 69, 23; Schlozer, *op. cit.*, p. 18 sq. that tin is called *kal'i* from the fort (*Ḳal'a*) of Kalah, on which alone mines of this metal existed may be described simply as an attempt to explain the form *kal'i* (with *ḥ*). Besides Kēdah and Kērah, Kēlang, Klang, a district in Selangor in Malacca might possibly come into consideration; cf. thereon the article *ḲALĪ* as well as for the relationship of *kal'i* to the Malay *kaling* = tin.

This same al-Ḳal'a, which was said to be the site of a very fine tin-mine, is usually regarded by the Arab geographers and lexicographers as the place of manufacture of a celebrated kind of Indian sword, called *kal'i* (*kalā'i*) to distinguish it. (Further information in article *ḲALĪ*).

ḲALĀ-I SEFĪD. See *ḲAL'E-I SEFĪD*.

ḲALĀ-I SULṬĀNIYE. See *ḲAL'E-I SULṬĀNIYE*.

KALĀM ("speech") is defined by the grammarians as such utterance (*lafẓ*) with the voice as is compound (*murakkab*), not single words, and which conveys a meaning by convention, not nature (*waqf*, not *ṭab*, as in exclamations; *ḥay*, not *ḥayy*). So the *Adjurrūmiya*; the *Mufaṣṣal* (§ 1) says it must be a complete sentence, however simple, and Ibn 'Aqil (*Sharḥ al-Aḥṣā*) distinguishes in detail between it and *kalim* (a compound of three or more words, not necessarily giving a complete sense) and *kalima* (a single word with a meaning by convention) and *ḳaw* which covers them all. The *Dict. of the Techn. Terms* (pp. 1268—1270) gives a thoroughly scholastic discussion of *kalām* and its parts, phonetically, grammatically, lexicographically, rhetorically. See, also, De Sacy in *Anthol. Gramm.*, Arabic text, pp. 73 and 93 and notes. In lexicography *kalām* is a generic noun for speech, little or much (al-Djāwāri in *Ṣaḥāḥ* and *Lisān*, xv. 428), applying to every kind of talk, *li-kullī mā yutakallamu bihi* (Ibn 'Aqil), or an expression for successive sounds (*aṣwāt*) giving an intelligible meaning (al-Fayyūmī, *al-Miṣbāḥ*). This is the actual usage of the root in the language. Thus *bi-kalāmī*, said by Allāh to Mūsā (*Ḳur.* vii. 141) is paraphrased by al-Baidāwī (ed. Fleischer, i. 343 *infra*) *bi-taklīmī iyāka*, "by my speaking to thee", and on *Ḳur.* xlviii. 15, al-Baidāwī says that *kalām* is an *ism* for *taklīm* (ii. 268, 10). In the remaining two occurrences, *kalām Allāh*, *Ḳur.* ii. 70, is ambiguous and may mean either Allāh's actual speaking to Mūsā or the Law, while in *Ḳur.* ix. 6, it seems to mean clearly the content of Islām. The 2nd stem of the verb is used fre-

quently in the *Qur'ān* in the sense "to speak to" some one with the accus. of the person addressed (al-Ash'arī *al-Ibāna*, ed. Haidarābād, p. 27, says that *taklim* means *al-mushāfaha bil-kalām*) and the 5th stem occurs four times (xi. 107, xxiv. 15, xxx. 34, lxxviii. 38) in the neuter sense "to speak, talk, discuss" with a *bi* of the subject discussed; in xxiv. 15 appears a shade of contemptuous reference, mere "talking with the mouth" (cf. Dozy, *Suppl.*, ii. 486a). In the later development *kalām* came to mean the statement of an intellectual position or an argument upholding such a statement, and a *mutakallim* was a person making use of such *kalām's*; so *passim* in the *Fihrist*. By al-Mas'ūdī (*Murūj*, Paris ed., viii. 161) *takallam* is used of the "patter" of a public story-teller and mimic by the roadside.

II. The first technical use of *kalām* seems to have been in the phrase *kalām Allāh*, meaning either the *Qur'ān* or Allāh's quality (*ṣifa*) called Speech. For these applications the way was prepared in the *Qur'ān* passages already quoted. But the order in which they came and the influences which produced them are still, like all the beginnings of Muslim theology, exceedingly obscure, and we are not yet in a position, in spite of Horten's collection of materials in *Die philosophischen Systeme der spekulativen Theologen im Islam* (Bonn 1912) even to sketch their development. It seems clear that the Muslim thinkers were affected (i) broadly by the conceptions, classifications and dialectic of Greek philosophy; (ii) much more minutely by personal intercourse and discussion with the theologians of the Oriental Christian Church and (iii), perhaps, by some ideas of the Indian philosophical schools. The last influence has been suggested tentatively by Horten, especially at several points in his *Systeme*; but he has not supported it by any detailed references or translations from Indian literature; it remains, therefore, a bare, although very possible suggestion; cf. further on it Massignon's review in *Der Islam*, iii. 408. The idea of representing the problem of the personality of Allāh as a combination of a *dhāt* or essence with *ṣifāt*, or "qualities", seems partly due to the methods of Greek theories of personality, partly to the *Qur'ānic* rhetoric which, following the fashion of the old poetry, describes Allāh by means of epithets, and partly to Christian explanations of the relation of the persons in the Trinity. The problem, however, remained of the relation between these qualities and the essence, and was eventually given up by orthodox Islām which took refuge in the statement, "they are not He (i.e. Allāh himself), nor are they other than He"; this was an admission that the relationship was a theological mystery, ungraspable by human thought. These qualities, further, were uncreated and eternal; the personality of Allāh was unthinkable without them. But rationalistic Islām, later the Mu'tazilites could not admit such a mystery and tended to reject the qualities as having necessary relationship to the essence. In these discussions the quality "Speech" was evidently prominent, and on it the influence of the Christian theologians was peculiarly felt. It is never represented by an epithet in the *Qur'ān*, i.e. Allāh is never a Speaker, *mutakallim* or *kalim*, although the later theologians used *mutakallim* frequently of him, and there is only one certain use of *kalām* for

the actual Speech of Allāh (*Qur.* vii. 141); but Allāh is represented again and again by means of verbs as "speaking", and al-Ash'arī (*al-Ibāna*, p. 23 *sqq.*) quotes over ten passages, using different expressions, as bases for the doctrine that both the Speech of Allāh, as a quality inherent in Him, and the *Qur'ān* as a manifestation of that quality are uncreated. These passages, it may be said, give distinctly the impression that the doctrine was historically reached through other means, or arose by other causes, and that these proof-texts were then sought as a *Qur'ānic* basis. The rationalistic theologians, on the other hand, denied the possibility of a material, yet uncreated, manifestation of the eternal quality of Speech. Thus when Allāh spoke to Mūsā (*Qur.* iv. 162; vii. 139 *sqq.*; xx. 8 *sqq.*; xxviii. 30) from the tree (*shajara*) they held that the sound of the words was created in the tree as a *maḥall*, and was therefore a state (*ḥāl*) in it (cf. Goldziher on Fakhr al-Dīn al-Rāzī in *Der Islam*, iii. 245 *sqq.*). This the later Ash'arites met by explaining that Mūsā did not hear this Speech as an ordinary act of hearing, but spiritually and as coming from every direction and perceived by every one of his organs. It was thus received in his sensorium by the *ḥiss al-mushṭarak*, the Aristotelian "common sense" (al-Baidāwī on *Qur.* vii. 139, xx. 12; ed. Fleischer, i. 343, 9, 593, 1). Further, it was recognized at least as early as al-Ash'arī (*al-Ibāna*, p. 25) that this Speech must go on without ceasing, for the quality is perfect and silence would be an imperfection in it. The *Qur'ān* (xviii. 109; xxxi. 26) and traditions (*al-Ibāna*, p. 25) speak also in violent metaphors of the *kalimūt*, separate words of Allāh, as being numberless; from all eternity Allāh has been speaking. But al-Ash'arī protests (*op. cit.*, p. 41) against the application of the term *lafẓ*, verbal utterance, to the *Qur'ān*; that is not seemly even in the case of our recital of it. Similarly the *Lisān* (xv. 427, 17) says that you must not call the *Qur'ān* *ḥawḍ Allāh*. Al-Ash'arī does not seem himself to have reached the position of the later Ash'arites that the Speech of Allāh is thinking, at least "ideas in the mind", *kalām* or *ḥadīth nafsī*, and therefore can go on without letters or words. Al-Ash'arī's desire was only to protect the *Qur'ān* arbitrarily from any approximation to the transitory and created, and he had not thought out what his position meant. The numberless *kalimūt* of Allāh are still speech but not like our utterance with the mouth. In part they are His creative acts, as He creates by the single word, *kun*, "come into being!" See further under KALĀMA.

For the later orthodox theologians the proof of the *kalām* of Allāh was simplified down to an *idjīmā'* [q. v.] of all peoples that Allāh has spoken to the prophets and must therefore be a speaker, possess a quality of Speech; see, e.g. al-Taftāzānī's comm. on the *Aḥkād* of al-Nasafī, Cairo 1321, p. 75 *sq.* Its nature has been indicated above. But the relation of this quality to the *kalām Allāh* of the *Qur'ān* was still to be defined. The Ḥanbalites continued to avoid any closer definition as al-Ash'arī had done; it was the uncreated, eternal Speech of Allāh, and that was an end of it. Some even tried to transfer its uncreated character to the very material on which it was written. For the Mu'tazilites it was simply created, like the words which reached the ears of Mūsā. The Mā-

turidites followed their normal method in dealing with theological mysteries, of putting the two elements flatly side by side and attempting no solution. Al-Nasafi (*ʿAḳāʾid*, p. 79) says: "The Qurʾān, the Speech of Allāh, is created and it is written in our copies, preserved in our hearts, recited by our tongues and heard by our ears. Yet it does not reside (*ḥall*) in these". Al-Taftāzānī, as an Ashʿarite, suggests as an explanation that the word "fire" written on a piece of paper does not have in it the burning quality of fire and consume the paper.

The later Ashʿarite view of this relation may be given in the words of al-Faḍālī (d. 1236 = 1820; see AL-FADĀLĪ) in his *Ḳifāya* (ed. 1315 with al-Baidjūrī's comm., p. 50). "These Glorious Expressions [the words of the Qurʾān] are not a guide to the eternal quality in the sense that the eternal quality can be understood from them. But what is understood from the expressions equals (*musāwī*) what would be understood from the eternal quality if the veil were removed from us and we were to hear it"; apparently the distinction between *ḥuṣūṣiyya* and *ʿumūmīyya*. Thus the wording of the Qurʾān is created, and al-Faḍālī has even a shade of doubt whether that wording goes back to the Preserved Tablet, that is to Allāh, or is due to Djabrīl or even to Muḥammad. Similarly Ibn Ḥazm [q. v.] reports (*Milāl*, ed. Cairo, 1317, p. 211 *infra*) that this was the Ashʿarite doctrine even in his time and especially of al-Bāḳillānī [q. v.] and that their formula was that the Qurʾān was the *kalām* of Allāh only in the sense that it was an *ʿibāra*, an "expression" for the *kalām* of Allāh. Similarly in *al-Fiḥḥ al-Akbar*, ascribed to Abū Ḥanīfa (d. 150) with a comm. by al-Māturīdī (d. 333), the word for this relation is already *ʿibāra* and also *ḥikāya*, "reproduction" (Ḥaidarābād 1321, p. 23). There is a very complete analytical and objective, but not historical, statement of the different positions in the *Maṭwāʾif* of al-Idjī with comm. of al-Djurdjānī, Būlāḳ 1266, p. 495.

In this the influence of Christian theologians seems plain. The parallel between the uncreated but creating Logos, the reason and word of God, with its earthly manifestation in Jesus and this *kalām*, as eternal quality, as creative agency and as revelation in time is very close. The position of the Ashʿarite school that the quality is practically the thinking of Allāh, although they carefully guard against confusion with our "thoughts" which originate in time (al-Faḍālī, p. 52) suggests the rational side of the Logos, the Hebrew *דְבַר*, the divine *σοφία*. But it is not allowable to ascribe *ʾaḳl*, *νοῦς*, to Allāh because of philosophical and etymological implications; cf. *Maṭwāʾif*, ed. Cairo, p. 541, ed. Sørensen, p. 161, *ʿAḳl*, and al-Baidjūrī on Qur. ii. 41, ed. Fleischer, i. 57, 13. The Christian theologians naturally translated their Syriac *melkethā*, *ὁ λόγος*, with *al-kalām*. On Christian influence in Muslim theology see further in Graf, *Die arabischen Schriften des Theodor Abu Kurra* and the various articles cited by Horten in his *Philos. Systeme*, p. 626; especially C. H. Becker, *Christliche Polemik u. islamische Dogmenbildung*, in *Zeitschr. für Assyriol.*, xxvi. 175 sqq.

III. It is not an overhazardous conjecture that similar influence worked in developing the use of *kalām* = theology and of *mutakallim* = theologian. The Syriac *mallel* (= *takallama*) and its deriva-

tives were parallel to *λέγω* and *λόγος* on both sides of their meanings of reason and speech. Thus *mamlal allāḥayyithā* meant *θεολόγος* and *melila*, *λογικός*. Starting, therefore, with *kalām* = speech, the development was easy to intellectual argument, especially as applied to theology. How much in the dark Muslims were on the origin of this use is evident from the eight explanations which al-Taftāzānī gives (comm. on al-Nasafi, p. 10 sqq.): (i) Theologians begin, "The *kalām* (statement, argument) on such and such a doctrine is ..." (ii) Deals most with doctrine of Speech of Allāh. (iii) Gives same weight to Speech in theology as philosophers give to *mantīq*, logic. (iv) Most essential of sciences taught by speech. (v) Speech between opponents necessary to it rather than consideration or reading. (vi) The most disputations of the sciences taught by speech. (vii) For its weightiness it is the "statement" as opposed to other sciences. (viii) The cutting, impressive science from *kalm* = *djarh*. Ibn Khaldūn, (see below) gives only two explanations: (i) That the science deals with speech only and not action (*ʿamal*). (ii) The same as (ii) above; cf. further Haarbrueker's translation of al-Shahrastānī's *Milāl*, i. 26, and remarks, ii. 388—393.

But *kalām* came only slowly to be the name for theology. At first, *fiḥḥ*, "intelligence", was used for the whole speculative side of theology and canon law, as opposed to *ʿilm* for the traditional side [see *fiḥḥ*]. Then theology came to be called "the greater *fiḥḥ*", *al-Fiḥḥ al-Akbar*, as in the book ascribed to Abū Ḥanīfa and al-Māturīdī, referred to above. There, p. 6, it is said, "*al-fiḥḥ fi'l-dīn afdal min al-fiḥḥ fi'l-ʿilm*", which would have been expressed later, "*kalām* is more excellent than *fiḥḥ*". *Kalām*, in that book, is not used technically except for the Speech of Allāh, *ḥawl* generally taking its place; in the *Ibāna* of al-Ashʿarī [q. v.] *kalām* occurs, similarly, only in titles to sections. But in the *Fihrist* (c. 377—400) *kalām* is used normally in the sense of "statement" and also technically, with *takallam* and *mutakallim*, of theology; while *fiḥḥ* is used, as regularly thereafter, of canon law. But there followed speedily a further development: *ʿilm al-Kalām* came to mean not simply theology, but scholastic theology of an atomistic type, going back most strangely to Democritus and Epicurus, and a *mutakallim* came to mean a theologian, first Muʿtazilite and later orthodox, behind whose theology lay the atomistic system which was Islām's most original contribution to philosophy. The importance of this conception of the matter of the universe, as being of a grained structure and not infinitely divisible and continuous can hardly be over-emphasized. In Europe, until the xviii century, it was eclipsed by the authority of Aristotle; but it re-appeared then, first in a qualitative form (Boyle and Newton) and later quantitative (John Dalton). It would be curious to contrast the experimental researches of these with the a priori speculations of Islām. A *mutakallim*, then, was thus distinguished, although calling himself an Ashʿarite, from the Hanbalite conservative traditionalists among whom al-Ashʿarī had reckoned himself, from the mystics who found their basis in religious experience (*maʿrifā*; *ḥaṭarāt* and *wasāwīs* in *Fihrist*, p. 183, 12) rather than in *ʿilm* and dialectic, and from the philosophers (*ḥukamāʾ*) who based upon a blend of

Aristotelian and Neoplatonic philosophy; although all these might profess to hold the same doctrines of the Sunnite faith. This leaves out of account, of course, the Shī'ite system, a structure of Mu'tazilite rationalism erected on the doctrine of *ta'lim*, i. e. that the ultimate basis of our knowledge is not reason but authoritative instruction by an inerrant guide, always in the world, whom man must seek and obey (cf. e. g. al-Ghazālī's *Munqidh*, ed. 1203, pp. 21 sqq. and Goldziher's *Streitschrift des Ghazālī gegen die Bātinijja-Sekte, passim*) and the pantheistic side of Sūfism which is not really Muslim at all, except in vocabulary and imagery.

It is a great misfortune that the beginning of the vith *Maqāla* of the *Fihrist*, which deals with *Kalām* in this sense, is lost, and with it the account of the origin of this science, and that the first *fann*, especially, has reached us in so hopeless a condition (Houtsma, in *Zeitschr. für die Kunde des Morgenlandes*, iv, 217—235, essentially supplementing Flügel's ed.). Yet it is clear that the author divided the *mutakallim*'s of his day (end of ivth cent. of H.) into five: (i) Mu'tazilites; (ii) Shī'ites, both Imāmites and Zaidites; (iii) Predestinarians and Anthropomorphists; (iv) Kharijites; (v) ascetic Sūfis. This arrangement may be due to the Shī'ism and, therefore, Mu'tazilism of the author; but the Mu'tazilites were certainly the first *mutakallim*'s. He places al-Ash'arī in the third class and has evidently no idea of the importance of his school — he seems to have been a joke (p. 181, 16); yet he died c. 330. Nor is there any mention of al-Māturidī who had died 333. Al-Bākillānī died 403, four years after the last date in our MSS of the *Fihrist* (Flügel's preface, p. xii). Certainly the author of the *Fihrist* grievously misread the future, for in his third class lay orthodox Sunnite Islām. Of his fourth class only the Ibādites [q. v.] continued to have any importance. Nor does he show any idea of the speculative possibilities in his fifth class.

We cannot, as yet, write a connected history of the atomic theory of Islām, the essential *differentia* of the system of the *mutakallim*'s, and it may never be possible. We have only references to and short quotations from the earlier disputants upon that system. Even the extant writings of al-Ash'arī do not give us any help, and we have, so far, none of al-Bākillānī's writings, which probably would. Fortunately Horten has gathered up and untangled, with great diligence, in his *Philosophische Systeme* the later references and quotations, and from these it would appear that the Mu'tazilite Abu 'l-Hudhail al-'Allāf (d. 235 or 226; cf. ABU 'L-HUDHAIL and Horten, pp. 246 sqq.) was the founder of the atomic school and was opposed in it by two other Mu'tazilites, Hishām b. al-Hakam (d. 231 (?); cf. HISHĀM and Horten, pp. 170 sqq.) and al-Nazzām (d. 230; Horten, pp. 189 sqq.). It thus arose among the Mu'tazilites, however it may have reached them; but we cannot be sure to what extent their system was exactly that which lies behind all the reasonings of the later *mutakallim*'s. It is unnecessary to describe the system here, as it has already been given under ALLĀH, i. 307 sqq. It may, however, be worth while to give the following references to Horten where he deals especially with it, pp. 22 sqq., 42 sqq., 178, 191, 246 sqq., 263 sqq., 526, 551. Pp. 195, 235, 236 make it plain that the division of time into atoms, which

could not be further divided, i. e., that time is not endlessly divisible, goes back to Zeno's paradox of Achilles and the tortoise; it was a solution of that paradox and made motion possible; cf. William James, *A Pluralistic Universe*, p. 228—231. Ibn Ḥazm in his *Milal*, because of his very hostility, has given us particularly full accounts, e. g. v. 92 sqq. But in the nature of the case it is not probable that the earlier disputants put their discussions into permanent written form, and still less permitted copies to be freely made and spread abroad. We have the classic case of al-Djunaid (d. 297 = 909), a very great theologian and ascetic Sūfī, on whom no shadow of real suspicion of heresy ever fell, but who openly said that the seeker of the divine Reality might expect to be called a heretic (Goldziher, *Vorlesungen*, p. 175; see, further, al-Kushairī, *Risāla*, Būlāq 1290, pp. 139 sqq. and DJUNAID, above, i. 1063). When he discussed questions of *tawhīd*, that is the doctrine of the person of Allāh, with his students, it was behind closed doors. We can hardly imagine that these discussions were concerned with such questions as are in al-Ghazālī's *al-Risāla al-Kūsiyya* or *al-Ikhtisār*, or even al-Taftazānī on al-Nasafī; they must have cut much deeper and have been like those which Ibn Ḥazm has exposed to us with malicious indignation, dragging those Godless *mutakallim*'s from behind their closed doors. In reply the *mutakallim*'s would have protested that he was not playing the game and did not understand their object. The Mu'tazilites preceded the orthodox theologians in open publication. We still have the *Masā'il* of Abu Rashīd, a Mu'tazilite, who wrote about 400 (1009) (Horten, *Philosophie des Abu Raschid*; Arthur Biram, *Atomistische Substanzlehre*). Al-Ghazālī, at a somewhat later day, actually did put such discussions into writing in his two *al-Maḥnūn*; but it was on the basis of Neoplatonic philosophy and not of atomism (see below).

In the *Muḥaddima* of Ibn Khaldūn (d. 808 = 1406) we get another view of this development, about four centuries later than the *Fihrist* (Quatremère's ed., iii. 27—43; Būlāq, 1274, pp. 223—228; trans. De Slane, iii. 40—64). In Quatremère's text (pp. 44—59; trans. De Slane, pp. 64—85) there follows a section on the *mutaṣṭabih* passages in the *Kur'ān* which is not found in some of the MSS., nor in the Būlāq editions. Ibn Khaldūn evidently added it later from a perception (i) that his view of these passages was essential to his general position and (ii) that he had not dealt fully enough with some of the theological matters of controversy. He traced, in fact, the origin, in great part, of the science of *Kalām*, viewed as defensive scholasticism, to these ambiguous and obscure passages; it sprang, thus, more from exegetical than from philosophical pressure. There is certainly truth in this; but it seems also certain that the early Muslim theologians, under the influence of outside ideas which were pressing in upon them, made use of the obscure verses to secure a possible footing in Islām for these outside ideas. In this they were greatly aided by Muḥammad's own confused thinking, and also by a certain largeness of conception and width and freedom of ideas which belonged to his greatness; he had not been a metaphysician; but a keen psychologist. But it is especially characteristic of Ibn Khaldūn's position, and in striking contrast to his otherwise

openmindedness and genuinely scientific spirit, that he rejected all *ta'wil*, or elucidation, of these passages as absolutely as Aḥmad b. Iḥanbal or al-Aḥḥārī themselves. He interpreted Qur. iii. 5 (cf. al-Baidāwī, ed. Fleischer, i. 146, 1) as meaning that only Allāh knew their meaning and that man should abstain from useless speculation. He thus secured a method of practically throwing out all the passages of the Qur'ān which did not suit his view of the universe, e. g. those speaking of the *ḡinn* [q. v.], and also, which was worse, set up a limit to man's investigation of the world.

Kalām having thus arisen from these difficulties, or impossibilities, of exegesis, the different sects developed according as the anthropomorphic Qur'anic expressions bearing on the essence (*dhāt*) of Allāh or on his qualities (*ṣifāt*) were treated literally (*tashbīḥ*, *tadṣīm*) or as having a meaning different in his case from the literal and unknown to us (*tanzīh*) or according as *tanzīh* was applied also to the other descriptives of Allāh, the meanings of which were quite plain and possible in the literal sense because they all expressed ideas apart from the concrete. This last was the position of the Mu'tazilites, between whom and the first sect, the anthropomorphists, stood the sect which professed to follow the doctrine of "the Fathers" (*al-salaf*). So the orthodox party was driven to the use of rational proofs (*adilla 'aqliya*) and there arose al-Aḥḥārī who combined *'aql* and *naql*, denied *tashbīḥ*, establishing "the qualities consisting of ideas" (knowledge, power, will, life), and limited *tanzīh* as the *salaf* had done. He also established "hearing" and "sight" and "the speech which exists in the mind" (*al-ḡu'm bil-nafs*). He also discussed (*takallama*) with the Mu'tazilites their ethical position (*aṣṭaḥ, taḥṣīn, taḥbīḥ*) and eschatology and future rewards and punishments. He discussed with the Imāmiya the principle of government, and demonstrated that it was not a part of the Faith, but a convenience upon which the people had agreed. With all this compare and contrast Goldziher in *Vorlesungen*, pp. 119 sqq. The next great name given is that of al-Baḡillānī (d. 403) [q. v.]. He reduced the whole to a system and established the intellectual basis and arranged the arguments. Thus he established the atom (*al-djawhar al-fard*) and the void (*al-khalā'*) — it is to be noticed that *djawhar* with the Aristotelian Neoplatonists means "substance" in the philosophical sense, and that *al-khalā'* is exactly the Lucretian *inane*; that an accident (*'araḍ*) cannot subsist in an accident and that it cannot continue through two atoms of time (see also, Ibn Khaldūn, ed. Quatremère, p. 114; De Slane, p. 157). So he made these principles only secondary in importance to the articles of the Faith, because he held that the nullity of an argument meant logically the nullity of the thing which it proved, and the converse. These principles were arguments for the Faith; the Faith was true, therefore these principles must be true. It is evident that formal logic was not the strong point of those who built up this system, however ingenious it might be; and that Ibn Khaldūn remarks. And it is further evident that with al-Baḡillānī the historical value of Ibn Khaldūn's outline begins. He makes no mention of Ibn Ḥazm [q. v.], a theological free lance, who died in 456; but he gives the titles of two of the books of the Imām al-Ḥaramain (al-Djuwainī, q. v., d. 478), a teacher of

al-Ḥazālī, apparently because of his reputation although no distinctive development is attached to his name. Immediately after him the science of formal logic was taken up by the theologians who had discovered that it was only a tool for thinking and not a part of philosophy. But this led to an examination of their foundations and to the rejection of a great part of them; so that they no longer argued, as al-Baḡillānī had done, from the nullity of the proof to the nullity of the thing proven. Their new proofs were derived, to a considerable extent, from the physics and metaphysics of the philosophers, and thus they entered upon a new method which was called *ṭarīkat al-muta'akḥḥirīn*; yet they also introduced into it a considerable amount of opposition to the philosophical positions because these seemed to be the same as their own earlier heresies. Leaders in this new school were al-Ḥazālī (d. 505) and al-Rāzī (d. 606; see on him especially Goldziher in *Der Islam*, iii. 213—247) and to their books Ibn Khaldūn would still send the student of theology who wished guidance in his criticism of the philosophers, although there was in them some amount of opposition to the older method. It is to be remembered, too, that al-Rāzī was a systematic user of *ta'wil* (Goldziher, p. 227) of which Ibn Khaldūn disapproved. But such students as wished simply to follow the path of the *salaf* in theology should take the old method of the *mutakallim*'s — only there could true *'ilm al-kalām* be found — and especially should study the *Irshāa* of the Imām al-Ḥaramain. This apparently means that with al-Ḥazālī there came a sharp abandonment of the method of the atomists and a going to school instead with the Aristotelian Neoplatonists. Such, too, is certainly the evidence of al-Ḥazālī's writings. After al-Ḥazālī and al-Rāzī came still deeper confusion between theology and philosophy, until the subject matter of the two was regarded as one. Yet the *mutakallim*'s had distinguished sharply the physics and metaphysics of the philosophers from their own theocentric position, using an intellectualist system in defence of dogmas laid down by divine authority. He gives as an example of this confusion the *Tawālīf* of al-Baidāwī (d. 685 = 1286) and every user of al-Baidāwī's Qur'ān commentary will recognize what he means. The learned of Persia (al-Adjam) who followed al-Baidāwī had used the same method in all their works. Of the kind of *Kalām* that was left in his own day Ibn Khaldūn had no good opinion; its ambiguities (*iḥāmāt*) and generalities (*iṭlāḡāt*) were a profanation of the Creator rather than a defense. And no *Kalām* was longer needed; it had been a defense against the Mulhida and the Mubtadi'a and they were extinct. But it was rather disgraceful for one who knew the Sunna by heart not to be able to give a reason for the faith that was in him.

Yet *Kalām* had still a long course to run, and the commentary of al-Baidāwī on the short treatise of al-Faḍālī, already referred to, gives a good idea of the development of the system of the *mutakallim*'s. Text and comment are quite modern — al-Faḍālī died in A. D. 1821 and al-Baidāwī in A. D. 1844; they are finished scholasticism and the title, *Kifāyat al-'Awāmm fī 'Ilm al-Kalām*, "The Sufficiency of the Commonalty in the Science of *Kalām*", with reiterated statements in the text that only so much is given as is necessary for sal-

vation, shows a purely intellectual view of religion. The commentary is based throughout on atomistic reasonings; the physics and the metaphysics are atomic. The text suggests an intentional counterblast to the treatise of al-Ghazālī with a similar title, *Iljām al-ʿAwāmm ʿan ʿIlm al-Kalām*, "Rein-ing back of the Commonalty from the Science of Kalām", yet the intention is nowhere expressed. In it al-Ghazālī had denounced the corrupting of the simple faith of the multitude with intellectualist arguments and had advocated very subtly what we would now call psychological methods — startlingly, for modern ideas, backed by the secular arm of the state. But al-Ghazālī had opposed the *mutakallim* system and method from the beginning. On the one hand he knew, as a fact of psychology, that being convinced against one's will left one of the same opinion, and on the other, he did not approve of atomism as philosophy. He appears to make no specific reference to it in his works, and where he does give an abstract of theology, as a formal science (e.g. in *al-Risāla al-Kudsīya*, and in *al-Iqtisād*) he stops short of absolutely philosophical bottoming. That, for him, was intellectually impossible; but such an outline of concatenated dogmatics, as in the two books mentioned, was justifiable (*Arbaʿin*, pp. 25 sqq., ed. 1328). The only real philosophy for him was, apparently, the Aristotelian-Neoplatonic amalgam, and with it he had dealt in his books which have reached us in a sceptical but respectful spirit. Probably following the economy of teaching, which he himself professed, and which he and all Islām practised, he dealt thoroughly and destructively in other books with the atomic system, and this may explain the mysterious allusions which have been called "the secret" of al-Ghazālī (e.g. W. H. T. Gairdner on the *Mishkāt* in *Der Islām*, v. 121—153). For his attitude towards the *mutakallim*'s see further AL-GHAZĀLĪ, above, ii. 147 sq., *al-Munqidh*, pp. 8 sqq., and *Mishkāt al-Anwār*, Cairo 1322, 47 sqq.

It is significant that reform movements in Islām at the present time seem to have cut loose from the atomic philosophy, and to have gone back for leadership to Ibn Sīnā [q. v.], Ibn Rushd [q. v.] and the Aristotelians generally. Djamāl al-dīn al-Afghānī (see above, i. 1008 sqq.; E. G. Browne, *The Persian Revolution of 1905—1906*, Cambridge 1910, Chap. i.; Goldziher, *Die Richtungen der islamischen Koranauslegung*, Leiden 1920, pp. 322 sqq.) and his friend and pupil Muḥammad ʿAbdu were the protagonists of this renaissance and continued the long interrupted method of al-Ghazālī, even on the side of the economy of teaching. The atomic system had crystallized and had become identified with the stiffest orthodoxy. In its origin, also, it had been, even with the Muʿtazilites, a weapon for the defence of accepted views and not an instrument of free investigation. Modern Islām, therefore, could have nothing to do with it, although it is possible that modern western atomic speculation may galvanize it into a semblance of life just as microbes have been used to defend the Qurʾānic doctrine of the *djinn* (Goldziher, *Koranauslegung*, p. 356). Yet it should never be forgotten that this theory is the most original contribution which Muslim thinkers have made to the history of philosophy.

Bibliography: It has mostly been given above, and almost all the bibliography under

ALLĀH applies. There may be added: Goldziher, *Vorlesungen über den Islām* (Heidelberg 1910) *passim*, but especially Chap. iii.; the same, *Islamische Philosophie des Mittelalters in Kultur des Gegenwart*, i. 5, pp. 302 sqq.; T. J. De Boer, *Geschichte der Philosophie im Islām* (Stuttgart, 1901), pp. 56 sqq.; Maimonides, *Le Guide des Égarés*, ed. and trans. by S. Munk (Paris, 1856—66); S. Horowitz, *Über den Einfluss der griech. Philosophie auf die Entwicklung des Kalām*, Breslau 1909 (*Jahres-Ber. des jud.-theol. Sem. Fraenckelscher Stiftung*, 1909); K. Lasswitz, *Geschichte der Atomistik*, Hamburg—Leipzig 1890, i. 143—152 (not seen by me).

(D. B. MACDONALD.)

QALAM (قلم, read) the reed-pen used for writing in the Arabic character. It is a tube of reed cut between two knots, cut obliquely (or concave) at the thicker end, having the point slit, as with us for the quill and later for the steel pen. It has to be very firm so that it does not wear away too quickly; the best kind comes from Wāsiṭ and grows in the marshes (*baṭāʾih*) of the ʿIrāq. It is allowed to steep like hemp and is kept in the water until its skin has taken on a beautiful dark brown colour. Its fibres should be quite straight so that the slit may also be even. To make the slit the slanted end of the *qalam* is laid on a long flat piece of ivory or bone, which is specially used for this purpose and is called *mīḳaṭṭa* (Turk. *mīḳṭa*); the point is then slit with a sharp backward cut with a special very sharp knife with a long handle (penknife, Turkish *qalamtırāş*).

The part of the point to the left of the incision is called *insī* ("human"), because turned towards the writer and the right *waḥṣhī* "savage". If the former is slightly softer than the latter so much the better. It has been made a rule that in the kinds of writing called *naskḥ*, *thuluth* and *riḳʿa* the *waḥṣhī* side ought to be twice as broad as the *insī* side; in the kinds called *diwānī* and *ḳırma*, it is the other way about. The *nastaʿlīq* is written with a pen slit exactly down the centre.

To protect the *qalam* from damage it is kept in a holder (*mīḳlāma*). These are of two kinds: 1) a metal box in the form of a long flat tube closed at one end by a lid with hinges and often adorned with arabesques. Attached to it is an inkwell (*dawāt*, popularly *dawāya*). This kind is peculiar to the Arabs. In Osmanli Turkish it is called *diwīt* (from Ar. *dawāt*); at an earlier period it was also called *kubūr* (strictly plur. of *ḳabr* "grave") by the Ottoman Turks, a word which is found as early as Abū Yūsuf, *Kitāb al-Ḳharāj* (Cairo 1302, p. 17) with the meaning of "holder", "case"; 2) a papier-mâché box adorned with lacquerwork. In it is a drawer which also holds an inkwell. This kind is used particularly in Persia and is called *qalamdār* "pen-box".

Sūra lxviii. of the Qurʾān (*Sūrat Nūn*) is sometimes called *Sūrat al-Qalam* from its opening: "N. — By the pen and what they write," According to the traditions quoted by al-Ṭabarī (*Tafsīr*, Būlāk 1323—30, xxix. 107) the *qalam* was the first thing created by God so that he could write down events to come; two explanations have been given of this *qalam*: 1) the implement used for writing, a divine gift like the

latter; 2) a kalam of light, as long as the distance from heaven to earth, which wrote down all things that are to happen until the last judgment (cf. Fakhr al-Dīn al-Rāzī, *Mafatih al-Ghaib*, Cairo 1278, vi. 330; Muṭahhar b. Ṭāhir al-Maḳḍisī, *Kitāb al-baḍ' wa 'l-ta'rikh*, cd. Huart, i. text, 161 sq., transl. 149).

The kalam is the emblem or symbol of the administrative services as opposed to the *saif*, which marks the military officer. Ibn al-Wardī († 749 = 1349) wrote a *Mufakharat al-Saif wa 'l-kalam* and Ibn Nubāta († 768 = 1366) a work with a similar title; Djalāl al-Dīn Muḥammad b. Asad al-Dawānī († 907 = 1501), 'Alī b. 'Abd al-'Aziz Umm al-Walad-Zāde († 920 = 1514) and Kīnālī-Zāde († 979 = 1572) each wrote a *Risāla Kalamīya* on the same subject (Brockelmann, *Gesch. d. arab. Litt.*, ii. 140, 211, 430, 433).

Huart, *Les calligraphes et miniaturistes de l'orient musulman* (Paris 1908), p. 13, 16, 17 (with pictures); L. Th. Bogdanow, *Persia* (in Russian, St. Petersburg 1909), p. 81; F. Sarre and F. R. Martin, *Die Ausstellung von Meisterwerken muhammedanischer Kunst in München 1910* (München 1912), ii. Plate 152.

(CL. HUART)

KALANDAR, a Ṣūfī religious order, founded by Kalandar Yūsuf [cf. KALANDARĪ], an Arab of Spain, contemporary with Hādījī Bektāsh [q. v.], brought to Damietta by the *Shaikh* Djamāl al-Dīn al-Sāwī, a native of the town of Sāwa in Persia; he is buried in the Zāwiya which he had founded there. He shaved his beard and eyebrows, since by doing this he had escaped in an amorous adventure; all his pupils followed his example. This sect, however, must have its origin in an earlier period, for it appeared in Damascus towards the year 610 (1213); it attracted attention by a strange costume adopted from the Persians and Mazdeans, which orders from the authorities forced it to abandon. The Mamlūk Sultān al-Malik al-Nāsir Ḥasan, grandson of Kālā'ūn, in 761 (1360) forbade them to shave the beard. According to al-Maḳrīzī's account of them, they made it a rule to lay nothing aside and never to amass this word's goods; but in his time they did not wear coarse garments nor subject themselves to any mortification or any devotional exercises, saying it was sufficient for them that their hearts were at peace with God. They wanted nothing more; they made no effort to attain a degree of virtue more eminent than this state of peace at heart. To show their indifference as regards everything outside their ideal, they took the course of throwing off the restraint of all the laws of politeness usually observed in society. Their morals also were very loose. Bābā Ṭāhir 'Uryān of Hamadhān said: "I am the mystic gipsy called *kalandar*. I have neither fire, home nor monastery. By day I wander about the world, and at night I sleep with a brick under my head" (*Quatrains*, No. vi., *Journ. Asiat.*, Series viii., Vol. vi. 1885, p. 516). The description of the odd costumes which accompanies the French translation of Chalcocondylas by B. de Vigenère (Paris 1662) and which is taken from the *Navigations* of Nicolas de Nicolay (Lyons 1568) gives on p. 23 an engraving showing one of these Kalandar-

dars wearing a kind of hair-shirt of wool and horse-hair coming barely down to the hips; he has his hair closely clipped, face clean shaven and on his head a felt hat surrounded by a fringe of horse-hair of the length of a hand. He wears rings in the ears, around the neck, on the wrists and under the pubis. He has no shoes; some of them used to walk quite naked in the streets. It is only fifty years ago that the Ottoman police finally succeeded in suppressing them. There was a convent of this order in Constantinople, founded in the reign of Muḥammad II with a mosque and a madrasa (Hammer, *Hist. de l'Empire ottoman*, transl. by Hellert (Paris 1835—43), xviii. 110, 131. Sometimes they have been confused with the Malāmītiya [q. v.]; cf. especially A. Le Châtelier, *Les confréries musulmanes du Hedjaz*, Paris 1887, p. 253 sqq.

(CL. HUART)

KALANDARĪ, the reputed but mythical founder of the Kalandariya. According to all the information available regarding the early history of these dervishes, it is more than probable that we have not here to do with a body similar to the other dervish orders introduced from Eastern Persia, but rather with a kind of wandering monks, who followed in their mental and physical mode of life the ideal which al-Maḳrīzī, *al-Khiṭaṭ* (Būlak 1270), ii. 432 sq. attributes to them, à propos of his description of the Kalandarī monastery in Cairo (cf. thereon de Sacy, *Chrest. Arabe*², Paris 1826, i. 263—275). According to this and to descriptions which e. g. al-Suhrawardī (in Silvestre de Sacy in *Notices et Extraits des Mss. de la Bibl. du Roi*, xii. Paris 1831, p. 341) or Djāmī, *Nafahāt al-Uns*, ed. W. Nassau Lees (Calcutta 1859) as well as Sa'dī himself (cf. *Gulistan*, transl. by K. H. Graf, *Moslichehaddin Sa'di's Rosengarten*, Leipzig 1846, p. 294 sq.) give of the Kalandar dervishes of the time, we have to deal with wandering dervishes, Malāmīti's (cf. al-Maḳrīzī, *al-Khiṭaṭ*, ii. 432; but on the other hand see the *Burhān-i Kāfi* under *Kalandar*, where a rigid distinction is made between *kalandar*, *malāmīti* and *ṣūfī*), without fixed abode and without fixed rules for their order and with an utter neglect of the laws of religion or of the forms of society. Abū Sa'd b. Abū 'l-Khair composed a quatrain on them, which gives an excellent picture of the real kalandar of his time (cf. *Sitzungsber. der Kgl. Bayr. Akad. der Wissensch.*, phil.-hist. Kl., 1875, ii. 157; Ign. Goldziher, *Vorlesungen über den Islam*, Heidelberg 1911, p. 172; F. Babinger in *Der Islam*, xi. 1911, p. 66 sq.). What, then, is usually called the founder of a so-called order of kalandars, is apparently nothing more than some important

protagonist of these views. This is certainly true of Yūsuf, said to have been a Spanish Arab, who is often represented as the founder of the Ḳalandariya, as well as of Shaikh Djamāl al-Dīn of Sāwa in Persia, who, Ibn Baṭṭūṭa says (i. 61 sq.), settled in Damietta and ended his days there. The expression Ḳudwa in Ibn Baṭṭūṭa here obviously means nothing more than "pattern, model". The Ḳalandars seem to have originated in Central Asia and to have been strongly influenced by Indian ideas. According to al-Maḳrīzī (d. 1442), they came about 400 years before his time into Arab lands. About 610 (1213) the first of them appeared in Damascus (al-Ḳhiṭaṭ, ii. 433). Here there died in 622 (1225; this, not 722 = 1322 is to be read in al-Ḳhiṭaṭ, ii. 433) the Persian Shaikh Ḥasan of the Dījawālīki sect, who flourished under Sulṭān al-Malik al-ʿAdīl Ketbogha and founded a monastery of Ḳalandars not far from Cairo (Seryākūs = Kyriakos?). The Ḳalandaris may have been most numerous in Persia and the great bulk of them, still in the xviiith century at least, seems to have been concentrated in Ardabil [q. v.], the stronghold of the Ṣafawiya (SAFAWIDS, q. v.; cf. Adam Olearius, *Persianische Reisebeschreibung*, op. cit., 1656, p. 68; the Kalendaran). In Anatolia also and even in Rumelia in the early Ottoman period down to the xvth century, they several times played a dangerous part by attacks on the authority of the state and serious risings (cf. F. Babinger in the *Islam*, xi. 14; Pečewī, *Tārīkh*, Sтамbul 1283, i. 1283). Even in the Saldjūk period similar risings seem to have been led by Ḳalandaris. There are also various indications of connections between Ḳalandaris and Bektāshīs.

ḲALANDARĪ has also become the name of a certain tune in Turkish.

(Maestricht 1776), p. 224 s. v. *Calender*; Adam Olearius, *Persianischer Rosenthal*, Book viii. § 67; *Burhān-i ḳāfī*, ed. Th. Roebuck (Calcutta 1818), s. v.; J. P. Brown, *The Dervishes* (London 1868), where the presumably not Persian origin of the word *kalender*, *ḳarendal* etc. is also discussed (cf. besides Dozy, *Supplément*, ii. 340 also *Der Islam*, xi. 94, note). (FRANZ BABINGER)

ḲALANSUWA, ḲALANSIYA (A.), the name for a cap which was worn by men either under the turban proper or alone on the head. The word, from which verbal forms are derived as denominative verbs, is apparently of foreign origin; while it used to be commonly connected with the Latin *calantica*, for which, however, the form *calantica* is difficult to quote — and besides it means a head-cloth for women —, Fraenkel wishes to derive it through the Aramaic קולס (cf. Arabic *ḳālīs*, *ḳālis*, Dozy, *Supplément* ii., 395) from *κῶνος* (*conus*). The Arab grammarians and lexicographers have found in the manifold formation of the broken plural and the diminutive a reason for using *ḳalansuwa* as a paradigm for substantives of more than three radicals with such peculiarities.

Caps of different shapes are called *ḳalansuwa*; varieties of the *ḳalansuwa* are *ṭurṭūr*, *burnus*, *urṣūša*, etc. While it is related of the companions of the Prophet that they wore tight-fitting *ḳalan-*

suwa's, later a long peaked sugar-cone shape, supported within by pieces of wood became fashionable, for which the name *ḳawila* is usual. It seems to have come from Persia (cf. the head-dresses in the Dura-Ṣālihiya first century paintings, in J. H. Breasted, *Oriental Precursors of Byzantine Painting*, Chicago 1924) for it was regarded by the pre-Muḥammadan Arabs as a noteworthy feature of Persian dress (Jacob, *Alt-arab. Beduinenleben*², p. 237) and is said to have been first adopted in the reign of the first Umayyad by ʿAbbād b. Ziyād from the inhabitants of the city of Ḳandāhar, conquered by him (Yāḳūt, *Muʿdjam*, ed. Wustenfeld, iv. 184). High, black *ḳalansuwa*'s were worn by the ʿAbbāsīd Caliphs from al-Manṣūr to al-Mustaʿīn and by their viziers and ḳādis. The latter adhered longest to the *ḳalansuwa*, so that in the course of the third (ixth) century — also popularly known as *danniya*, pot-hat, or *ḳawila* — it became their regular official headgear together with the neck-veil *tailasān* and at times was strictly forbidden to other classes of the community (al-Kindī, ed. Guest, p. 460, 586). — On the other hand criminals had a *ḳalansuwa* put on their heads when they were led through the streets. The *ḳalansuwa* was also worn among the Umayyads in Spain, where *muḳallās* meant a Muftī wearing the *ḳālīs*. A headdress introduced by Timūr into his army was also known as *ḳalansuwa*.

The name *ḳalansuwa* appears several times in Ibn Baṭṭūṭa according to whom (ed. Deffrémery and Sanguinetti, ii. 378) the Ḳipčaks, for example, called their *ḳalansuwa*'s by the Persian name *kulāh*. Of the Futūwa [q. v.] societies in Asia Minor (*aḳhiyat al-fityān*) he says (ii. 264) that their members wore several *ḳalansuwa*'s above one another, a silk one on the head, above it a white woollen one, to the top of which was tied a strip of cloth 2 fingers broad and 1 ell long: at meetings only the woollen *ḳalansuwa* was taken off, the silk one remaining on the head. A similar pendant strip of cloth is also part of the dress of the Coptic priests of modern Egypt and is there called *ḳālūsa* or *ḳalaswa*; here the name appears to have been transferred from the cap itself to its most striking and therefore better known part.

At periods when, as in the second (viiith) century, both Muslims and Christians wore *ḳalansuwa*'s, the latter had to tie two knots of another colour to it (Ṭabarī, ed. de Goeje, iii. 1389); but when the *ḳalansuwa* went out of fashion with the Muslims in the third century, it remained the mark of the Christians. The word is therefore frequently found in Arab authors meaning the headdress worn by Christian monks and hermits, Greek priests and even the Pope himself. Through the Crusades the high cap with the veil seems to have found its way to Western Europe as a woman's dress.

The name *ḳalansuwa* was also given to other objects of similar shape: *ḳ. nuḥās* is the metal cap of the obelisk near Heliopolis (ʿAin Shams q. v.). *Ḳ. Turāb* in modern Arabic for a chemical sublimating vessel. *Ḳ. buḳrāṭ* is used by surgeons for a particular kind of head-bandage; *ḳālīs* (*ḳūlis*) is the name of a plant, which seemed to represent a human head with a high cap. *Ḳalansuwa* was also the name of a fortress near al-Ramla in Palestine.

(supposes an influence of *Kalansuwa* on the French word *calotte*). (W. BJÖRKMAN)

KALĀNTAR (comparative from *kalān* "great") means at the present day in Persia the chief personage in a town, a kind of mayor, burgo-master, bailiff. This office is filled by election; the person elected has to be approved by the higher authority. The main duty of this official is to levy taxes.

KALĀT (KELĀT, KILĀT, KHELĀT). 1. The town of Kalāt is the capital of the Khānate and fort of the same name, the most important part of Balōčistān, and the residence of the Khān, its ruler. The word Kalāt or Kilāt represents the Arabic *kaṭa* or rather the Persian *kālāt* [cf. the art. KALĀʿA], which in India is usually pronounced *kila*. In Balōči *khilāt* is the common word for a fort. On coins we find both کلات and کلات (W. H. Valentine, *Copper Coins of India*, vol. ii. 1921, p. 223). It has been known in earlier times as Kalāt-i Sēva (from a legendary Hindu king) and Kalāt-i-Niḥārī, which connects it with the Brahōi tribe of Niḥārī, which is generally accepted as belonging to the oldest branch of the indigenous Brahōis [s. BALŪČISTĀN, i. 627, 630]. The town was unknown to the early Arab historians under its present name. It is however possible that it may represent Kizkānān, which Arab geographers mention as the residence of the ruler of Kuṣḍār (al-Iṣṭakhri, *Bibl. Geogr. Arab.*, i. 176 ult. sq.; Ibn Ḥawkal, *ib.*, ii. 232, s. sq.). Its situation is in the modern district of Sarāwān, close to the boundary of Djahlāwān [q. v.]; thus it would have been included in the ancient province or kingdom of Tūrān, of which the capital was Kuṣḍār (now generally written Khozdār, in Djahlāwān). [In the *Shāhnāma* Kelāt belongs to Tūrān; cf. ed. Vullers ii. 794. — Ed.]

After the Balōči tribes had passed through the Brahōi country on their way to the Indus valley, in the xvth and xvth centuries, Kalāt remained in the hands of the Brahōis under a chief of the Kambarānī clan, from whom the line of Khāns is descended. Their power gradually extended during the Indian expeditions of Nādir Shāh and Aḥmad Shāh Durrānī [q. v.], whose suzerainty was admitted by the Khāns. The greatest of these, Naṣir Khān, endeavoured to shake off the Durrānī yoke. He was defeated by Aḥmad Shāh, but the latter, who besieged Kalāt in 1172 (1758), was unable to take it, and Naṣir Khān made favourable terms for himself. He built a strong fort (known as the Mūr) and strengthened his position among the surrounding tribes. In 1834 Shāh Shudjāʿ al-Mulk took refuge in Kalāt with Mihrāb Khān after his failure to recover Kāndahār. In 1838

through the intrigues of his followers Mihrāb Khān was embroiled with the British force advancing on Kāndahār by the Bōlan Pass; Kalāt was taken by storm, and the Khān himself killed in the attack. Two years later the fort was taken by disaffected Brahōi tribes. The British Agent, Love-day, and the traveller Masson fell into their hands and the former was murdered. This led to a second British occupation for a time, but the Khāns were re-instated and remained practically independent for the next thirty years. Under the British protectorate, Kalāt remains the capital of the Khān's dominions. It is a small town situated in the high plateau 6780 ft. above the sea with a population of under 5000. The best descriptions of Kalāt are those of Pottinger, who visited it in 1810, and Masson (1831 and 1840).

2. The Khānate or State which takes its name from the town of Kalāt. This includes the provinces of Sarāwān, Djahlāwān, Kačchi and Makrān, and the tributary states of Las Bēla and Khārān.

For details see under BALŪČISTĀN.

(M. LONGWORTH DAMES)

KALĀT BANĪ ʿABBĀS, a town in Algeria (department of Constantine) 24 miles N.E. of Burdj Bu ʿArrandj. Kalā occupies at the height of 3,500 feet a natural fortress formed by a plateau surrounded on three sides by rugged and deep ravines, 1800 to 2000 feet high and joined to the adjoining country by a narrow tongue with precipices on either side. The town is divided into four quarters, which formerly were frequently fighting with one another and one of which is now almost in ruins. It is the most important centre of the tribe of Banū ʿAbbās, whose territory lying between the Wādī Sāhel and the Maḍjāna contains about 24,000 souls. The town itself with an exclusively native population numbers 3000 inhabitants. The few patches of tilled land at the bottom of the ravines not sufficing to maintain the inhabitants, the latter have for long had to devote themselves to industry. They used to make woollen burnuses in large numbers, which they sold in Algeria and Tunisia. At the present day many of them emigrate and follow the trade of embroidering burnuses in the towns of the Tell.

Kalā was founded in the second half of the fifteenth century A.D. by the marabout Sidi ʿAbd al-Rahmān, a descendant, according to some, of the Idrisids, according to others, of the Hammādid. He established a zāwiya on the rock of Kalā and put himself at the head of the Banū ʿAbbās, who had risen against the Zwāwa, to whom they had hitherto been subject. His son Aḥmad built a *kaṣba*, proclaimed himself Sulṭān and extended his authority over the country between the Hodna and

the sea (the "kingdom of Labès" of Marmol). 'Abd al-'Azīz, his successor, further increased his power with the support of the Turks, whom he assisted against the Kabyls of Kuku and supported in their expeditions against the Moroccans and the people of Tuggūrt and Wārgla. The rupture of this alliance in 1552 brought about wars between the Turks and the Banū 'Abbās, which lasted down to the end of the sixteenth century A.D. Besieged several times, during this period, Ḳal'a could never be taken. After the death of 'Abd al-'Azīz, killed in defending his capital, power was exercised by his brother, Amokran. The latter extended his territory as far as the Sahara, repelled several Turkish attacks and fell fighting them in 1600. His son Sidi Nāṣir, a man of the *Zāwiya* rather than the battlefield, dissatisfied the Banū 'Abbās and was assassinated by them. With him the kingdom of Ḳal'a disappeared. Henceforth the town was only the family citadel of the Mokānī, *shāikhs* of the Maǧjāna, descendants of Sidi Nāṣir. Protected by its impregnable situation, it remained independent down to the French conquest. It served as an asylum for the adversaries of the Turks and the members of the great native families, who in time of war stored their grain and treasures for security with private individuals here. The honesty of the latter was proverbial. Thus Ḳal'a benefited in the midst of the disorders, which were ruining the country, by a regular neutrality and in spite of the quarrels of the *sofs* [cf. i. 702^b], inevitable in a Kabyl city, enjoyed a remarkable prosperity. It is at Ḳal'a that Mokānī was buried the leader of the rising of 1871; his tomb is, however, now quite forgotten and neglected.

ḲAL'AT BANĪ ḤAMMĀD, a town in the Central Maghrib, which has now disappeared, but was in the vth (xth) century the capital of the Ḥammādid empire (cf. the article ḤAMMĀDIDS ii. 252). Al-Ḳal'a (Ḳal'at Abī Ṭawil in al-Bakrī and in the *Kit. al-Istibṣār*) was founded by Ḥammād b. Bulukkin [q. v.] in 398 = 1007-8 on a flank of a mountain called Kiyāna or 'Adjisa by Ibn Khaldūn and Ṭakarbast (now Djabal Takerbust) by al-Idrīsī. A Roman fort had perhaps previously occupied this site; in the ivth (xth) century Abū Yazīd [q. v.] had tried to check in these regions the Fātimid troops, who were pursuing him on his retreat through the Maghrib. The place seemed therefore well suited to enable Ḥammād to resist the attacks of his enemies from the West, the Zenāta, who had just besieged his capital Ashīr [q. v.] and those from the east, the Zirids of Kairawān. Ḥammād peopled the new town by transporting thither the inhabitants of al-Msila and of Ḥamza, which he destroyed, and a large number of members of the tribe of Djerāwa. He built mosques, caravanserais, and various public

buildings and surrounded the whole with a wall which ran round the mountain. These defences, built, according to Ibn Ḥammād, by a Christian slave, enabled Ḥammād to offer a successful resistance to the Zirid Bādīs, when this prince came to besiege al-Ḳal'a in 406 = 1016. Thus Ḥammād made it a habit to live sometimes at Ashīr and sometimes at al-Ḳal'a and it was in this town that he died in 419 = 1028-29. Al-Ḳal'a rapidly became very prosperous. "The population increased rapidly, students came there in large numbers from the most remote parts of the empire, attracted by the resources which the new capital offered to those who cultivated science, commerce and the arts" (Ibn Khaldūn). The importance of al-Ḳal'a further increased after the sacking of Kairawān by the Hilālīs. Many inhabitants of Ifrīqiya came to seek shelter there. The population was very mixed. It is worth noting that it included a small community of native Christians; well treated by the rulers, they had a church dedicated to the Virgin and administered by an official, perhaps a bishop, whom Paul the Deacon calls by the Oriental name of *califa*. The country around was quiet, thanks to an alliance made by the Ḥammādid with certain sections of the Aḥlbedj; the harvests surpassed the needs of local consumption and were stored in granaries, where they could be kept for several years. Life was easy there, owing to the abundance of fruits and of cattle fattened on the adjoining pasturage; the markets were attended by caravans, which came from all parts of the Maghrib and even from Egypt and Syria and the 'Irāk. Magnificent buildings were erected by al-Nāṣir: the Ḳaṣr al-Mulk (Government-Palace), the private residence of the emirs, the Ḳaṣr al-Manār (Palace of the Signal), the Ḳaṣr al-Kawkab (Palace of the Star), the Ḳaṣr al-Salām (Palace of Bliss).

The situation altered in the second half of the vth century. Breaking their alliance with the Ḥammādid rulers, the Arabs began to plunder the region of Hodna and thrust their incursions up to the very gates of al-Ḳal'a. The insecurity became such that al-Manṣūr, while continuing to make frequent stays at al-Ḳal'a, moved the seat of government in 483 (1090/1) to Bougie, which had been founded by al-Nāṣir in 1062/3 [see Bougie, i. 766], but the attacks of the Arabs multiplied and made the lot of the inhabitants more and more precarious. In the reign of al-'Azīz the nomads invaded all the territory of al-Ḳal'a and forced the garrison to take refuge in the town out of which they could not go. Thus Yaḥyā, who succeeded al-'Azīz, decided in 543 (1048) to remove from al-Ḳal'a all objects of value, that were still there. Four years later, the Ḥammādid empire succumbed to the attacks of the Almohads. When master of Bougie, 'Abd al-Mu'min sent his son 'Abd Allāh to lay siege to al-Ḳal'a. The place, defended by Djusham, Yaḥyā's brother, was taken by assault, the garrison put to the sword, 8000 inhabitants slain and many others taken prisoner. The conquerors carried off vast booty (547 = 1152—1153).

Still al-Ḳal'a survived this disaster. Some of the inhabitants repopulated, if not the town itself, at least the Djerāwa quarter, E. of the wall. According to the author of the *Kit. al-Istibṣār*, they were still fairly numerous at the end of the vth (xth) century and were engaged in the making

of garments, which were celebrated. But in 580 = 1185, 'Alī b. Ḡhāniya captured al-Kal'a after a three days' siege. It was undoubtedly he who completed the destruction of the town, for it is never mentioned again after this date. Considerable ruins alone recall the existence of the ancient Ḥammādiid capital. They lie about 20 miles S. of Burdj Bū 'Araridj, on the southern slope of the Djabal Maadid, in the N. of Hodna, at a height of 3600 feet and occupy the summit of the cliffs which command the right bank of a tributary of the Wādī Selmān. The mināret of a mosque is still standing. Excavations made by P. Blanchet (1898) and again in 1908 by General de Beylié have made it possible to trace the wall and recognise the remains of various buildings: the Dār al-Bahr, so called, perhaps, from a tank there, the palace of the Signal, the palace of Bliss and the mosque. Fragments of decoration, painted terracottas, stalactites of faience, faiences of metallic lustre, and capitals have been brought to light. The study, which has been made of them, leads to the conclusion that Berber art before the Hilālī invasion was in great part Oriental in its inspiration and is revealed as a combination of Persian and Mesopotamian elements with local Byzantine art.

KAL'AT DJA'BAR. See DJA'BAR, I, 985.

KAL'AT HUWĀRA, a town in Algeria (department of Oran, a mixed commune of Mina) 20 miles N.E. of Mascara, on the Wādī Kal'a, one of the branches of the Hillil. Population (1911): 2072 inhabitants, of whom 2047 natives. Carpet-making, at one time a flourishing industry here, still employs 500 workmen, although on the decline.

Kal'a was founded in the vith (xiith) century by Muḥammad b. Ishāk, chief of the Huwāra, living in the region of Mina. He built a citadel and gathered round it his tribesmen as well as the Masrāta, a Berber clan related to the Huwāra. Ishāk's descendants were faithful servants of the 'Abd al-Wād of Tlemcen and as a reward received the government of the land of the Tūdjīn. After the occupation of Tlemcen by the Marīnids (759 = 1358), the people of Kal'a recognised the authority of the conquerors, then passed again under the rule of the sovereigns of Tlemcen after the restoration of the Ziyānīd dynasty. In the xvth

century Arūdī seized the town (1517) and placed a garrison of 400 men there under his brother Ishāk. Retaken in 1518 by the Spaniards, Kal'a was restored by them to the Sulṭān of Tlemcen and passed finally to the Turks towards the middle of the xvth century. It is described by the writers of this period (Leo Africanus, Marmol) as one of the principal places in the land of the Banū Rāshīd (the Beni Rasi of Leo, the Beni Arax of Marmol). According to these authors, Kal'a was a very strong place inhabited by merchants and well-to-do artisans. During the Turkish period, Kal'a frequently served as a place of refuge for Beys and Turkish officials, as well as for numerous families from Oran and Algiers, so that about 1830, the population was in great part composed of Ḳuloghlu, i. e. of half-castes born of the marriages of Turks with native women. On various occasions the town has suffered from earthquakes but it was, on the other hand, greatly extended by the Bey of the West, Bū Shelāghem in 1736. The population was employed in agriculture and industry (manufacture of soap and especially the weaving of carpets). After 1830, Kal'a recognised the authority of 'Abd al-Kādir, who drove out the Ḳuloghlu, and was in 1845 occupied by the French. Kal'a was the birth-place of the celebrated marabout Sīdī Aḥmad b. Yūsuf (ixth cent. A.H.), to whom are attributed satirical sayings very popular in Algeria (Cf. R. Basset, *Les dictons populaires attribués à Sīdī Aḥmad ben Yūsuf*, Paris 1890).

(G. YVER)

KAL'AT NADJIM, the name of a celebrated citadel in Northern Syria, on the right bank of the Euphrates in 36° 53' N. Lat. and 38° 18' E. Long. (Greenwich). Its importance lay in the fact that it commanded the passage of the river here, where it was crossed by a bridge. It was here that a caravan route from Syria to Mesopotamia, much used in the middle ages, crossed the river. The route ran from Halab via al-Bāb [q. v.] to Manbij, thence in a fairly straight line to the Euphrates, then across the river in a slightly north-eastern direction to Harrān. The distance from Manbij to Kal'at Nadjim is given as 4 farsakh (a short day's journey), that from the Euphrates to Harrān as 2 days' journey. As there are two small islands in the river at Kal'at Nadjim, a passage is very easily effected by a short bridge of boats.

In the middle ages Kal'at Nadjim was the bridgehead of Manbij (the ancient Bamyke; cf. MANBIJ), a very busy emporium, which the Caliph Ḥarūn al-Rashīd had raised to be the capital of the 'Awāṣim province [q. v., I, 515]. So long as Manbij flourished, Kal'at Nadjim retained its importance; with the decline of Manbij — by the xith century A. D. Manbij was already for the most part in ruins; see G. le Strange, *Palestine under the Moslems* (London

1890), p. 501 — the importance of Ḳal'at sank also, for traffic across the Euphrates turned more and more to the northern crossing at al-Bira (Bīredjik; q. v., i. 723). In ancient and mediaeval times there were on the central Euphrates, below where it breaks through the Taurus, a series of places where bridges maintained the connection between Syria and Mesopotamia; on these crossings, some of which succeeded others in course of centuries, see the references in the article BĪREDJIK (i. 723). Whether there was already a bridge in ancient times at Ḳal'at Nadjm and whether the isolated hill commanding the ford was already inhabited or defended, we do not know. But it is very probable that a place so favoured by nature was used long before the coming of the Muslims. What ancient town is to be sought on the site of Ḳal'at Nadjm or the immediate vicinity can hardly be decided with certainty. Most probably we have to locate here the Caeciliana of the Roman itineraries (*Kaamilā* of Ptolemy); cf. the article Caeciliana in Pauly-Wissowa, *Realenzykl. d. klass. Altertumswiss.*, ii. 1172 and Streck's addition in Suppl. i. 266; Regling in *Klio*, i. 472; V. Chapot, *La frontière de l'Euphrate* (Paris 1907), p. 281; H. and R. Kiepert, *Formae orbis antiqui*, part v. (1910); L. Bell, *op. cit.* (see the *Bibl.* there), p. 23. Ainsworth, *op. cit.*, p. 224 sought Caeciliana in the ruined site of Sarisat (Sīrēsāt on Kiepert's map in Sachau (*op. cit.*), north of the Sādūr river, whereas the map of Syria and Mesopotamia published on a scale of 1:400,000 by the cartographical department of the Prussian Survey, sheet 1b. (Halab) seeks to identify the ancient place in question with the modern Khirfān (Djabal al-Ḥamām, a little N. W. of Ḳal'at Nadjm). Less commendable than the identification of Caeciliana with Ḳal'at Nadjm seem to me the other identifications that have been proposed: namely with Betammali (Bethammaris), as Benzinger suggests in Pauly-Wissowa, *op. cit.*, iii. 362 (adopted on the above mentioned map of Mesopotamia and Syria, 1:400,000) (see thereon my additional note in Pauly-Wissowa, Suppl. i. 269), also with Callicome (so d'Anville, *L'Euphrate et Tigre*, Paris 1779), on which see my article on this name in Pauly-Wissowa, Suppl. i. 270. The Thilaticomum of the *Itinerarium Antonini* and the *Tabula Peutingeriana* was suggested by Mannert, *Geogr. d. Griech. und Römer*, vi. 1 (Leipzig 1831), p. 394, 397 and Ainsworth, *op. cit.*, i. 224. Nöldeke proposed (*op. cit.*, p. 13) the Gerre (Gerrha, Serre) of Ptolemy and the itineraries (see the article Gerre in Pauly-Wissowa, vii. 1270); on what are perhaps its ruins see Chapot, *op. cit.*, p. 282. Finally it should be mentioned that Chesney in *Expedit. for the Survey of the Rivers Euphrates and Tigris* (London 1856), i. 420 and in *Narrative of the Euphrates Expedition* (London 1868), p. 234, wrongly would find Djisr Manbij — which, as will be emphasised immediately, is only an older name for Ḳal'at Nadjm — in the Ḳara or Büyük Manbij, 10 miles to the south of it (which Nöldeke, *op. cit.*, p. 14 considers the Eragiza of the classics, Regling in *Klio*, i. 471 Betammali).

Al-Balādhuri (*Futūḥ al-Buldān*, ed. de Goeje) p. 150, 15 sqq. (excerpted by Yāḳūt, i. 478, 8 sq.) especially mentions that the bridge of Ḳal'at Nadjm was built by the Caliph ʿOthmān, but

expressly adds that, according to some, traces were still to be seen of an older bridge, which would seem to prove the existence of a river-crossing here, dating back to pre-Muḥammadan times. Al-Balādhuri, however, does not call the place Ḳal'at Nadjm but Djisr Manbij, "the bridge of Manbij". The older Arab geographers and historians know it only by this name. Even if the name Ḳal'at Nadjm perhaps only begins to appear in Arabic literature from the xiith century A. D. (to judge from the references quoted), it is clear from an important passage in the Ḥalabī chronicle (not written, however, till the xvth century) of Ibn al-Shiḥna (*al-Durr al-Muntakhab fī Ta'rikh Mamlakat Ḥalab*, Beirut 1909; cf. on this work above II, 236) that its origin must be put back to the tenth century. Here it is stated (p. 230), that Ḳal'at Nadjm was long ago called Djisr Manbij, and remained a little village in the Muslim period until it was refounded by a certain Nadjm, a slave (*ghulām*) of Ḥubbā al-Safwānī, about 300 A. H. (912 A. D.). From this Nadjm comes the new name Ḳal'at Nadjm (N.'s citadel), which in time quite supplanted the earlier name Djisr Manbij. Similar changes of place-names occurred elsewhere in Syria and Mesopotamia in the middle ages; for example the strong castle of Ḳal'at Dawsar, which rose farther down the Euphrates on the left bank between al-Bālis and al-Raḳqa, received the name Ḳal'at Dja'bar [see the art. DJA'BAR] after the Arab chief Dja'bar b. Mālik (in the xiith century A. D.) had taken possession of it.

The passage quoted from Ibn al-Shiḥna's history further shows that the form Ḳal'at al-Nadjm and the translation of the name founded on this as "the star-castle", which have become quite familiar in European literature (and therefore also on maps: Ḳal'at en-Nedjm), are wrong. The Arabic sources, moreover, show, so far as we can see, almost always the correct Ḳal'at Nadjm; the Syrians reproduce this by Ḳal'a Nagam, e. g. Barhebraeus, *Chronicon Syriacum* (ed. Bedjan), p. 509, 23. If the reading Ḳal'at al-Nadjm is occasionally also found in our editions of the texts — e. g. in Yāḳūt, iv. 165, 8 (against iii. 860, 22; *al-Mush-tarik*, p. 357, 2, *al-Marāṣid*, ii. 443, 2) and al-Ḳazwīnī, ii. 160, 23 — it would still have to be investigated whether the manuscripts really support this reading. At the same time we do not deny that later Arabic writers, in ignorance of the origin of the name of the place, occasionally may have written Ḳal'at al-Nadjm and this may have given the etymology "star-castle". For example, Ibn al-Shiḥna (*op. cit.*, p. 229) gives a passage from a *risāla* of the ḳāḍī al-Fāḍil [q. v.], in which the latter explains the name of the fortress in poetical fashion as "a star in the clouds", "an eagle in the sky". Similarly Ritter (*op. cit.*, x. 1062, following J. v. Hammer) writes: "The castle is said to have taken its name from its height, reaching up to the stars". Lastly Ainsworth (*op. cit.*, i. 229) takes the name Ḳal'at al-Nadjm back to al-Ma'mūn, who is said to have built an observatory here. That the Caliph had observations of the heavens made in the region between Palmyra and al-Raḳqa on the Euphrates is certainly true (cf. above i. 498b), but his responsibility for the doubtful place-name is to be denied, after what we have said above. In this connection it may also be pointed out that we have several places called

Kawkab (= star) in Nearer Asia, for example one in Northern Syria, but an identification of the latter with Kal'at al-Nadīm, "the star-castle", which R. Röhrich, *Gesch. des Königreiches Jerusalem* (Innsbruck 1898), p. 237, note 3 proposes, is impossible. It is noteworthy that Hamd Allāh Mustawfī (*Nuḥat al-Kutub*, ed. G. Le Strange, vol. i., Leiden 1915, p. 103, 22) says that the citadel of Ḥarrān was called Kal'a-i Nadīm. As there is no confirmation of this in Arabic sources, this must be an error of the author's.

The citadel and the bridge of Kal'at Nadīm play a not unimportant part in the history of the wars of Islām. Soon after their invasion of Syria the Arabs occupied this region (in 18 = 639), the Euphrates villages, as al-Balādhurī (p. 175, 9) calls it. In the accounts of the fightings between 'Alī and Mu'āwīya, which led in 657 A. D. to the battle of Siffin (on the right bank of the Euphrates opposite Kal'at Dja'bar already mentioned) the bridge of Kal'at Nadīm is frequently mentioned; cf. e. g. al-Ṭabari, i. 3259, 25 sq. and Ibn Miskawaih, *Taḡārīb al-Umam* (Gibb Mem. Ser., i. N^o. 7), i. 571, 7. When 'U-baid Allāh b. Ziyād took the field against Mukhtār in 65 (685) in the 'Irāk, he crossed the Euphrates by this bridge; see Wellhausen, *Das Arabische Reich und sein Sturz* (Berlin 1902), p. 115. In 330 (941) after the murder of Ibn Rā'ik (on whom see above ii. 407) there was fighting here between the latter's troops and those of the Ḥamdānīd Naṣir al-Dawla; see *Zeitschrift d. Deutsch. Morgenl. Gesellsch.*, x. 470. The citadel of Kal'at Nadīm changed hands several times then as in later centuries; we find as its possessors, in turns, the Ḥamdānīds, the Mirdāsīds of Ḥalab (cf. above ii. 229 sq.), the Banī Numair (see Ibn Ḥawkal, p. 159, 19; Ibn al-Shihna, *op. cit.*), Sulṭān Nūr al-Dīn al-Zankī (1146—73) and his successors in Syria, the Ayyūbids. Nūr al-Dīn (according to Abū 'l-Fidā', *Taḡwīm al-Buldān*, ed. Paris, p. 233) renovated the castle — on which account Ibn Džubair, who passed it two or three decades later, calls it "a new citadel" — and placed a strong garrison in it, which was very troublesome to the neighbouring Syrian towns occupied by the Franks. Kal'at Nadīm was also for a time in the hands of the Begteginid princes of Irhīl (on them see above ii. 591). After the death of Salāh al-Dīn (1193) his sons and grandsons (al-Malik al-Aḫḫāl, al-Malik al-Zāhir, al-Malik al-'Azīz) and his brother (al-Malik al-'Adil) several times succeeded one another in the possession of the town (cf. above vol. i., ii. and Yāqūt, iii. 165, 18; Abū 'l-Faraj (Barhebraeus), *Ta'rikh Mukhtaṣar al-Duwal*, ed. Beirut, p. 393, 11; Abū 'l-Fidā' (ed. Reiske-Adler), iv. 109, 189; Weil, *Gesch. der Chalifen*, iii. 435).

When Hülāgū in 658 (1260) began his campaign against Syria (cf. above II, 332), he had to fight for the Euphrates crossings and the forts defending them; see Barhebraeus, *Chronicon Syriacum* (ed. Bedjan), p. 509, 23. Barhebraeus, who was then bishop of Ḥalab, and went to meet the Mongol ruler to beg that the Christians be spared, was shut up by him in Kal'at Nadīm (see *op. cit.*, p. 510, 17).

On the topography of Kal'at Nadīm and the present condition of the castle there, we have various accounts by European travellers, e. g. by Helfer and Ainsworth (on their visit together in

1836), Sachau (1879), M. v. Oppenheim (1896) and Miss Gertrude L. Bell (1909). According to their descriptions, the rocky cone about 160 feet high stands quite alone, crowned by the picturesque ruins of the citadel, falling steeply towards the river and fairly difficult of ascent on other sides also. All parts of the castle are still standing upright and are quite well preserved. Two storics are distinguished with an agglomeration of rooms of various sizes. The only parts damaged are those which were bombarded during the taking of the castle by Turkish troops about 1820. When at this time an Arab tribe refused tribute to the government and took refuge in this stronghold, the soldiers of the Pasha had to besiege and storm it, and a large gap was made in the wall in the process. A peculiar feature of Kal'at Nadīm are its not yet fully investigated caves and subterranean passages, which, according to the Arabs, run through below the Euphrates to the Mesopotamian side (compare the Oriental stories about a similar system of tunnels made by the Queen Zenobia in Fr. Müller, *Studien über Zenobia und Palmyra* (1902, p. 37). Kal'at Nadīm is now quite deserted and forms a refuge only for countless wild pigeons and bats. According to Sachau, there are still three Arabic inscriptions here. One of them is carved out over the main gateway which is flanked by two high towers and gives an account of the restoration work done by the Ayyūbid al-Malik al-Zāhir in 605—612 (1208—1215); beside it, is a second one which gives the name of the architect. A third inscription of the same ruler (of 1215 A. D.) may be read over the door of what was once the little mosque of the castle.

According to the Arab geographers (Ibn Džubair, Yāqūt, al-Kazwīnī, *al-Marāṣid*), a little town lay below the castle rock, probably at the river's edge, which served as a market for the numerous travellers as well as for the Beduins of the surrounding desert. The remains still in existence of buildings of an earlier period at the foot of the hill on the south cannot, as Sachau observes, be considered the remains of a town on account of the way in which the ground is cut up; but the Muslim cemetery in the vicinity with the ruins of two buildings (mosques or chapels) may mark the site of the small mediaeval village. At the present day there is no bridge there. Whether traces of any earlier ones can be found seems very doubtful. Chesney (*Expedition*, i. 420; *Narrative*, p. 230; see above) has, it is true, thought to discover remains of one and M. v. Oppenheim claimed to find traces of old bridges in no less than three places (see *Berliner Zeitschr. für Erdkunde*, xxxvi. 80 sq. and *Byzant. Zeitschr.*, xiv. 1905, p. 7), but according to Chapot (*op. cit.*, p. 281, note 7), who likewise examined the area in question, there is nowhere any trace of such remains to be seen.

A little to the south of Kal'at Nadīm, but on the left bank of the stream, there lies close to the Euphrates a mound of ruins, part of which has at one time been swept away by the river, called Tell Mas'ūdīya, out of which M. v. Oppenheim dug a large ancient mosaic of the river-god Euphrates; see *Byzant. Zeitschr.*, xiv. (1905), p. 7 and Moritz in the *Beitr. zur Assyriologie*, vii./ii. 1913, p. 158. Also on the east bank opposite Kal'at Nadīm there lies a very winding system

of hills, called *Djabal Sarrīn* after the ancient ruined site of *Sarrīn*. S.E. of the latter (N.E. of Tell Mas'ūdiya) rise two great grave-towers, one of which has in the second story a porphyry sarcophagus with the oldest known inscription in pure Syriac (73 A.D. = 385 Seleucid era). This monument of an Edessa man named Ma'nu bar Ma'nu, with inscriptions relating to the building and to the deceased, is of great value from the linguistic as well as the palaeographical side. M. v. Oppenheim and H. Pognon found and copied it independently; cf. Pognon's publication and edition of the text in his *Inscriptions Sémitiques de la Syrie* (Paris 1907–1908), p. 15–22 (and Pl. xiv.) and see thereon Noldeke in the *Zeitschr. f. Assyr.*, xxi. 151–153. The edition of the text by B. Moritz in the *Beiträge zur Assyriologie*, vii./ii. 1913, p. 158–165 is based on v. Oppenheim's material. The ancient names of Tell Mas'ūdiya and *Sarrīn* are unknown; perhaps it was one of the above mentioned stations in the itineraries (Gerre or Thilaticum).

KAŁ'AT AL-RŪM. See RŪM KAŁ'A.

KAŁ'AT SHERKĀT, an extensive group of ruins in the wilāyet of Mōṣul, on the right bank of the Tigris in 35° 30' N. Lat. and 45° 15' E. Long. (Greenwich). They rise on the edge of the desert on the sharp spur of the hilly lands, cut up by many valleys, which slope from the ridge of the

Khanūka mountains, an eastern spur of the *Djabal Hamrīn*, down towards the Tigris. The name Kał'at Sherkāṭ is not found in the Oriental writers of the middle ages nor, so far as I can see, in those of later centuries either. Whether the spelling אֲשֶׁר שֶׁרְקָט = *Ashshur* שֶׁרְקָט (v) ט (ʔ), which is found in Aramaic inscriptions of the Parthian period, is really connected with Sherkāṭ, as Jensen (*Mitt. der Deutsch. Orient-Gesellschaft*, n^o. 60, p. 46) supposes, is very doubtful. Perhaps the name Shekāṭ — not Sherkāṭ; cf. Streck, *Die Inschriften Assurbanipals* (Leipzig 1916), p. 792 — only dates from the xviiith century A.D.; in the literature of European travellers it seems to appear first about the time of Rich (1821). The meaning (? a personal name) is quite unknown. The Turks also give the place the name (often found where Turkish is spoken) of *Toprak-Kal'e* = "Earth-citadel", which is without significance; cf. Rich, *op. cit.*, ii. 137 sq.

Kał'at Sherkāṭ occupies the site of the oldest capital of the Assyrian empire, the city of *Ashshur*, from which the whole district ruled by it also took the name *Ashshur* (Assyria), while the city itself apparently derived its name from the national deity of this name (hardly the reverse). The site offers many advantages for an effective defence and was presumably planned by the inhabitants of southern Mesopotamia (Babylonia) as a military bulwark against the inroads of northern barbarians. That Kał'at Sherkāṭ was fortified in the archaic period has been shown by the excavations of the Deutsche Orientgesellschaft. These further show that the Semitic settlement was preceded by a non-Semitic (Sumerian) occupation; Sumerian sculptures have been found which are closely connected with those from Telloh in South Babylonia (about 2600 B.C.). In the time of the third Babylonian dynasty of Ur (2296–2786 B.C.), *Ashshur* was a small state dependent on Babylonia. The beginnings of *Ashshur* may safely be put back to 3000 B.C. and perhaps even farther; thereon cf., most recently, Weidner in *Boghazköi-Studien*, Heft 6 (*Der Zug Sargons von Akkad*, Leipzig 1922), p. 96. Some not inconsiderable time before 2000 B.C. an end was made of the Sumerian colonisation of *Ashshur* by the invasion of the Semites.

The numerous historical inscriptions, which were brought to light by the excavations of the Deutsche Orient-Gesellschaft in Kał'at Sherkāṭ have extended in a most unexpected fashion our knowledge of the history of the city and kingdom of *Ashshur*, especially with regard to the older periods. Its chronology now begins about 2300 B.C. or even earlier. From Puzur Ashir I (2086–2072) to the fall of Nineveh, with the help of the dynastic lists of *Ashshur*, we can restore the series of rulers without a gap; cf. E. Weidner, *Die Könige von Assyrien, Neue chronol. Dokumente aus Assur*, in the *Mitt. der Vorderasiat.-Ägypt. Gesellsch.*, xxvi. (1921), n^o. 2; with the chronological list of the kings of *Ashshur* given there (p. 64 sq.) compare the (somewhat later) list given by Schroeder in *Keilschrifttexte aus Assur historischen Inhalts*, Heft 2 (1922), p. 101 sq.

Ashshur retained its place as capital down to the middle of the tenth century B.C. Older rulers built other towns as royal residences, but only temporarily, for example Salmanassar I (1280–1261) chose *Kalkhu* (Bibl. Hebr. *Kālāh*) farther to the north at the mouth of the upper

Zāb for his capital and his son and successor Tukulti Ninurta I (1260—1232) built a new capital for himself in the immediate vicinity of Ashshur to the northeast of it, which he called after himself Kār ('wall, citadel of') Tukulti Ninurta (now the ruins of Tulūl 'Akr). After their death both these towns again lost their predominance to Ashshur. It was only from the tenth century onwards that the latter became more and more overshadowed by Kalakh and Nineveh and the later kings chose these two places only as the centres of their kingdom. Ashshur survived the fall of Nineveh, however; cf. Streck, *op. cit.*, CDXLIV and note 3 and p. CDXLIX, note 1. It is mentioned in the proclamation of Cyrus to the Babylonians, which is preserved in cuneiform. During the greater part of the Graeco-Roman period, especially in the 400 years of the Parthian epoch (which is represented by countless remains of buildings), it was an inhabited town, and as such — under other names (Kainai; perhaps also Labbana and Libba) — it is several times mentioned by classical authors; thereon cf. E. Herzfeld in *Memnon*, i. (1907), p. 98 sq., 237 sq. In the Parthian strata of the ruins of Kal'at Sherkāṭ 43 Aramaic inscriptions, mainly in memoriam, were found, which, in so far as they were dated, cover the period of the Seleucid (Arsakid?) era (199/200—227/228 A.D.), i.e. they cease just with the rise of the Sassanians. An interesting fact is also to be deduced from these documents, that the cult of Assyrian deities and names of gods still survived in Ashshur in the third century A.D. On these inscriptions cf. Jensen in the *Sitzungsberichte der Berliner Akademie*, 1919, liii. 1042—1051, and in the *Mitt. d. deutsch. Orient-Gesellsch.*, 1920, n^o. 60.

The name Ashshur appears in the Aramaic form Athūrā as early as the old Persian version of the Behistūn inscription; see Weissbach, *Die Keilinschriften der Achämeniden* (= *Vorderasiat. Bibl.*, iii.), p. 140. By Athūrā we have here probably not to understand the whole of Assyria but only the district of Ashshur. The classical authors give the Aramaic equivalent of Ashshur in the form Ἀσσορία, Ἀσσορία; see Pauly-Wissowa, *Realenzykl. d. klass. Altertumswissenschaft.*, ii. 2260; Herzfeld, *op. cit.*, i. 127. Ashshur presumably became more and more deserted under the Sassanians. The Syriac authors know of Athor down to the late middle ages as the name of a parish; see G. Hoffmann, *Auszüge aus syrisch. Akten persischer Märtyrer* (Leipzig 1880), p. 175, 210.

The Arab geographers of the middle ages likewise are acquainted with Athūr. It is given by them firstly as an earlier name of Mōsul, then as the name of the province which was later usually called al-Djazīra and finally as the name of a ruin near al-Salāmiya (probably the Biblical Resen, 2½ miles N.W. of Nimrūd, the ancient Kalakh; cf. Streck, *op. cit.*, p. CDXXVI). Sometimes Akūr is written instead of Athūr and sometimes the one, sometimes the other noted as a variant. Akūr is either to be regarded as a corruption or, perhaps better, as a parallel dialect form. Cf. for Athūr or Akūr: Ibn Rosteh in the *Bibl. Geogr. Arab.*, vii. 104, 6 (arḍ Athūr, "land of A." = Mōsul); Yākūt, *Mu'djam* (ed. Wüstenfeld), i. 119, 16, 340, 5, iii. 118, 18. For the Djazirat Akūr see Yākūt, *Mu'djam*, ii. 72, 13, 231, 9; this coincides with the Iklim Athūr (Akūr), the Kalīma (region

of) A., of which only al-Mukaddasī (*Bibl. Geogr. Arab.*, iii. 20, 3; cf. also 27, 10, 28, 7) speaks and which, according to him, is divided into three large divisions. On (Dj)azrat Akūr as an older name for Djazīra see above i. and G. Le Strange, *The Lands of the Eastern Caliphate* (Cambridge 1905), p. 86.

From the statements of the Arab geographers this much is evident that in the middle ages a ruin was still known which covered the site of the ancient Ashshur; only the name had been erroneously connected with a deserted locality near al-Salāmiya. It may here be recalled that, according to Layard, *Nineveh and Babylon* (London 1853), p. 165, the Arabs at the present day call a high hill in the corner of the ruins of Nimrūd (Kalakh) 'Tell Athūr'. The Arab geographers further make the observation, which is quite correct, that the earlier name of the province of al-Djazīra, which, indeed, practically coincides in area with the ancient Assyria, is derived from the deserted town of Athūr. When Athūr ultimately came to be erroneously regarded as the ancient name of the later capital Mōsul, we have a false identification here similar to the case of Baghdād, which western travellers throughout the middle ages down to Pietro della Valle (1616—17) equated with Babylon and always called so.

On the Arabic names Athūr or Akūr cf. also A. Schultens, *Vita et res gestae . . . Saladin* (Leiden 1755), *Ind. Geogr. s. v. Mosula*; Fr. Tuch, *De Nino urbe* (Leipzig 1845), p. 16 sq.; Tuch's *Kommentar über die Genesis*, 2nd ed. by Merx (Halle 1871), p. 61 sq.; Layard, *Nineveh and its Remains*³ (London 1849), ii. 245.

The ruined arca of Kal'at Sherkāṭ is of considerable extent (nearly 180 acres), very little smaller than that of the two other royal cities of Assyria, Kālāh (Nimrūd) and Nineveh (Kuyundjik). It is sharply defined; there is no doubt on any side as to how far the ancient city reached. The Tigris flowed along the east front; the north front was formed by a natural ledge of rock, which was strengthened by defensive walls and made inaccessible. On the finest part of Ashshur, in the eastern part of the north plateau, the Shammar Shēkh Ferhān Pasha in the second half of the 19th century founded a settlement which later became a Turkish outpost, which until the Great War served as barracks for troops of regular cavalry or mounted police. Apart from this temporary use as a military post by the government, Kal'at Sherkāṭ has been quite uninhabited since the memory of man.

The extensive ruins early excited the interest of European travellers. Their importance was first emphasised by Cl. Rich, who examined them carefully on a Tigris journey in March 1821; see his *Narrative of a Residence in Koordistan* (London 1836), ii. 137 sq. In 1836 Ross visited them; see a communication by him in the *Journ. of the Royal Geogr. Society*, ix. (1839), p. 451—453. The first thorough description of the site we owe to W. Ainsworth. He visited it along with Layard and Mitford in 1840 when on an excursion to al-Hadr [q. v., ii. 204] (the caravan road to al-Hadr branches off at Kal'at Sherkāṭ; see his report in the *Journ. of the Royal Geogr. Society*, xi. (1842), p. 4—8). Layard again in 1847 spent two days at Kal'at Sherkāṭ, engaged in examining the ruins; see Layard, *Nineveh and its Remains*³,

ii. 45—63. Later (1852) H. Rassam conducted excavations on the spot; on these cf. Layard, *Nineveh and Babylon* (London 1853), p. 581 and H. Rassam, *Ashur and the Land of Nimrod* (New York 1857), p. 1321.

A systematic examination of the whole system of ruins was first effected between Sept. 1903 and June 1914 by excavations of the Deutsche Orientgesellschaft which extended over practically the whole site of the town. Accurate plans were made of all parts examined. As the excavations proved, the kings Tiglathpileser I (1115—1103) and Salmanassar III (859—825) in particular displayed very great activity in building at Ashshur; the latter renovated completely almost all the great works of his predecessors. The most prominent buildings within the town are the great temples — the sanctuary of Ishtar, the oldest of all, showing a Sumerian stratum below it, then the Ashshur temple, also of very great antiquity, called E-Kharsag-kurkurra with a great temple tower (*sikḫuratu*) belonging to it, and lastly the sanctuary of Anu and Adad. Besides there was a series of smaller temples; of special interest is a "New Year Festival House", a work of Sanherib (705—682), discovered before the city gates. Palaces also were uncovered; but we have not yet detailed information regarding them. The powerful fortifications (double wall, Tigris-quay, wall and citadel) with which the Assyrian rulers protected their capital are most impressive. Among the monuments brought to light in great number special mention should be made of two rows of steles with reliefs and inscriptions (one north of kings and one south of officials), which belong to the xvth—viiith centuries and are of fundamental importance for our knowledge of Assyrian history. The topographical and archaeological investigation of the site has, at last, also given us a clear picture of the extent and significance of the erstwhile "city of the Parthians" (we have to distinguish two periods of Parthian building).

An exhaustive work on the topography and history of Ashshur based on the German ten years' excavations on a large scale is not yet available. For the present we have only the official reports, almost all by W. Andrae, the leader of the German expedition in Assyria, published in the *Mitteilungen der Deutschen Orient-Gesellschaft*, No. 20—22, 25—26, 28—29, 31—33, 36, 38, 40, 42—45, 47—49, 51 and 54. On two of the principal temples, on the fortificatory works and the rows of steles, Andrae has published monographs in the *Wissensch. Veröffentl. der Deutsch. Orient-Gesellschaft*, namely: *Der Anu-Adad-Tempel in Assur* (Leipzig 1909; = *Wissensch. Veröffentl.*, No. 10); *Die Stelenreihe von Assur* (1913; = *op. cit.*, No. 24); *Die Festungswerke von Assur* (1913, 2 vols.; = *op. cit.*, No. 23); *Die archaischen Ištar-Tempel in Assur* (1922; = *op. cit.*, No. 39).

The yield in inscriptions from the excavations in Ashshur has been very rich and exceedingly important. They have to a very great extent extended our knowledge of Assyrian chronology, history and religion. The publication of the texts is likewise being done in the *Wissensch. Veröffentl. der Deutsch. Orient-Gesellschaft*; so far there have appeared: *Keilschrifttexte aus Assur historischen Inhalts*, 2 parts, Leipzig 1911 and 1922, ed. by

Messerschmidt and Schroeder (= *Wissensch. Veröffentl.*, n^o. 16 and 37); *Keilschrifttexte aus Assur religiösen Inhalts*, ed. by Ebeling, vol. i. 1915—1919 (= *op. cit.*, n^o. 28), vol. ii. (part 1—2), 1920 (= *op. cit.*, n^o. 34); *Keilschrifttexte aus Assur verschiedenen Inhalts*, ed. by Schroeder, 1920 (= *op. cit.*, n^o. 35); *Allaramäische Urkunden aus Assur* (dating from the latest period of the Assyrian empire), ed. by Lidzbarski 1921, *op. cit.*, n^o. 38.

Bibliography: Apart from the references already given we may mention the following: Ritter, *Erdkunde*, xi. 666 sq., 671—676; Fr. Delitzsch, *Wo lag das Paradies?* (Leipzig 1881), p. 252—255. Delitzsch also in 1903, before the beginning of the German excavations, drew up a sketch of the history of the town (especially its buildings) based on the inscriptions then known, in the *Mitteilungen der Deutsch. Orient-Gesellschaft*, n^o. 20, p. 30—36; M. v. Oppenheim, *Vom Mittelmeer zum persischen Golf* (Berlin 1900), ii. 203—210; E. Herzfeld in *Memnon*, i. (1907), p. 97—116, 231 sq., 237; M. Streck, *Die Inschriften Assurbanipals* (Leipzig 1916), iii. 773; B. Meissner, *Babylonien und Assyrien*, i. (Heidelberg 1920), *passim* (see Index), esp. p. 12 sq., 33 sq., 300 sq. — The best map of the region of Kał'at Sherkāṭ is the one of Mesopotamia and Syria published by the cartographical department of the Prussian Survey on the scale of 1:400,000, sheet 4 C (Sāmarrā). The latest plan of the ruins of Ashshur is given by Andrae in his *Die Festungswerke von Assur* (1913), Plates i. and iii. On the flora of Kał'at Sherkāṭ and district E. Herzfeld writes in the *Orientalist. Literaturzeit.*, Suppl. ii., Berlin (1908) on the basis of the collection made by him as a member of the German expedition in Ashshur in 1903—1905 and (somewhat enlarged) in Sarre-Herzfeld, *Archäolog. Reise im Euphrat und Tigrisgebiet*, iv. (Suppl. Berlin 1920), p. 25—26. He gives the plant-names in the dialect of the half nomadic Djebbūr Arabs of the district. (M. STRECK)

KALATA. See CONSTANTINOPLE, I, 867.

KALĀ'UN, AL-MALIK AL-MANŠÜR SAIF AL-DĪN ABU 'L-MA'ĀLI AL-ALFĪ (the 'Thousand', a name, it is said, given him because he was bought for 1000 pieces of gold) AL-SĀLIḤ AL-NAḌMĪ, the sixth Sultān of the Baḥrī [q. v.] Mamluks, born in Kiptāk [q. v.], was brought to Egypt, sold to Sultān Šāliḥ Aiyūb [q. v.] and manumitted by him in 647 (1247). The beginning of his career is unknown. Under Sultān Baibars [q. v.] he became commander of a thousand. He later distinguished himself in a campaign in 671 (1272) against the Mongols by a skilfully executed passage of the Euphrates and again in 672 (1273) in a war against the Armenians. Sultān Baraka Khān, son of Baibars, sent him again against the Armenians in 677 (1278). When this Sultān was deposed a year later, the Emirs chose his seven-year-old brother al-Malik al-Ādil Salāmish as Sultān and appointed Kalā'un his guardian and Atabek. In reality Kalā'un ruled and was mentioned in the Friday prayer and on the coins along with Salāmish; after three months Salāmish was deposed and Kalā'un in due form raised to the throne and confirmed by the Caliph. While he was at once recognised in Egypt, he had to fight a rival in Syria, the Emīr Šonkor al-Ashkar, who was chosen

Sulṭān in Damascus by the Syrian troops. Şonkor found support among the Beduins of Syria, as well as with the sons of Baibars, the deposed Baraka Khān, to whom on his deposition Karak [q. v.] had been given as an independent principality, and his brother Khidr, who occupied several fortresses in the southern part of Syria. Both sides gathered together their armies; there was a battle in the beginning of 679 (1279) south of Damascus, which was decided in favour of Kalā'ūn, as a result of the desertion of Damascus troops. Baraka Khān had died shortly before; his brother Khidr was glad to conclude peace with Kalā'ūn in the spring of the year 680, by which he was granted Karak as a fief. Şonkor had appealed for assistance to the Mongols and they, always ready for loot, had invaded Northern Syria, plundering as they went. When the Mongols were preparing for a second campaign on a larger scale, Şonkor, who had become afraid of his too ardent friends, had made peace with Kalā'ūn on condition that he was left the North Syrian fortresses of Şahyūn, Şhaizar, Apamea and several other places to rule independently. Freed from these opponents, Kalā'ūn was able to devote his attention to the invading Mongols, who were reinforced by Armenians, Franks and Georgians. The armies met at Hims. In spite of their superiority at first, the Mongols were defeated and had to withdraw from Syria. While the Sulṭān, as we have seen, was threatened from several sides, the Crusaders, who still occupied the greater part of the Syrian coast, had not decided to collect their full strength for a decisive effort. Only the Knights of St. John in the fortress of Marḳab had enticed the governor of Ḥiṣn al-Akrād [q. v.], who was approaching it, into an ambush and inflicted a severe defeat on him in a surprise attack; after the destruction of the Mongol army, they, like the Count of Tripolis and the Templars a year later, were content to have peace on favourable terms. An agreement was also made with the city of 'Akkā in 682 (1283). Kalā'ūn, however, punished the Armenians for the help they had given the Mongols, by invading their country and doing them great damage by plundering and ravaging it.

The Khān of the Mongols, Abākā [q. v.] died in 680 (1281); his successor adopted Islām, taking the name Aḥmad. Letters and embassies were exchanged between him and Kalā'ūn and although their relations did not result in an alliance, they were by no means unfriendly. In 683 (1284) Aḥmad was murdered. His successor Arghūn [q. v.] remained a pagan and favoured the Jews and Christians in his Empire. His plan was to induce the Pope and the king of France to cooperate with him in a crusade against Kalā'ūn. This scheme, however, did not materialise. The Sulṭān for his part entered into diplomatic negotiations with the republic of Genoa, with whom he concluded a commercial treaty; he had a kind of defensive alliance with king Alfonso of Castile and James of Sicily. Embassies were exchanged with the Byzantine Emperor, with the Emperor Rudolf of Hapsburg, the king of Yemen and the prince of Ceylon. The prince Tudan Mangū of Kipčāk, who became a convert to Islām, obtained from Kalā'ūn, as the first ruler in Islām, a title and a standard with a coat-of-arms.

It was Kalā'ūn's aim to extend his rule over

the whole of Syria. To attain this end he did not hesitate to break his treaties with the Crusaders. For example at the beginning of 684 (1285) he fell suddenly upon the fortress of the Knights of St. John at Marḳab and undermined the walls so rapidly with his sappers, that the garrison had to surrender and depart. He adopted another plan to capture the stronghold of Maraḳiya, built in the sea near the coast and considered impregnable. It belonged to a vassal of Bohemund VII of Tripolis. Kalā'ūn pursued and threatened the latter so long that finally he bought it from his vassal, and let the Sulṭān dismantle it to appease him. Margaret of Tyre had to purchase peace with Kalā'ūn on humiliating terms. Having thus consolidated his position, he was able in 686 (1287) to think of depriving his old opponent Şonkor al-Ashḳar of his possessions in Syria. In the course of several campaigns he compelled him to give up his kingdom and retire to Cairo. He threatened Khidr, prince of Karak, so long that the latter finally yielded up his principality to him. In 688 (1289) he decided to capture Tripolis, the largest town still in the possession of the Crusaders. Prince Bohemund had died and his mother and sister were making claims on the vacant throne. The Sulṭān intervened in the quarrel and finally began the siege of the town. Although Tripolis received help from the sea, its position soon became desperate, so that the mother of the late ruler left the town with the Genoese and Venetian colony. With the help of his sappers the Sulṭān succeeded in undermining the walls and took the town by assault. It was for the most part destroyed and not rebuilt till a few years later, several miles from the sea on the bank of the river Qādisha. (From the Christian period date the great mosque, the Ṭailān mosque, both formerly churches, and the foundations of the citadel). The stronghold of Baṭrūn, south of Tripolis, was shortly afterwards taken. This was Kalā'ūn's last feat of arms. When about to depart next year to besiege 'Akkā on the pretext that Muslims had been robbed and murdered by Christians there, he died quite near Cairo, just after starting for Syria. Besides his continuous campaigns in Syria he had also to wage war against Nubia. In two battles he was victorious against king Şhamāmūm but he could only maintain his authority there as long as his armies remained. He gained no permanent success in Nubia, although he succeeded in making king Şhamāmūm resume payment of the ancient tribute. He had frequently to take the field with full strength against the Beduins of South Palestine and Upper Egypt; it is a sign of his strength that he, unlike other Sulṭāns, was able to subdue the rebels completely. Kalā'ūn, on the whole, maintained his authority over the sacred city of Mecca, although the Sharif from time to time endeavoured to make himself independent.

Sulṭān Kalā'ūn succeeded in consolidating Mamlūk power in Syria and gradually made good the damage done by the incursions and ravages of the Mongols. We find his renovations on a grand scale in the citadels of Aleppo, Baalbek and Damascus. His most famous building is the hospital in Cairo in which there were large wards for the different illnesses, laboratories, kitchens, ample storerooms with provisions and medicaments. It was connected with a mosque and a school (see below). He was the only one of the Mamlūk

Sultāns to found a dynasty; his descendant in the fifth generation reigned till 783 (1382).

(SOBERNHEIM)

ḲALAWDHIYA, according to Yāqūt, *Muḍjam*, ed. Wüstenfeld, iv. 167 a fortress near Malatya, undoubtedly the ancient Claudias, which is mentioned as early as Pliny, *Historia Naturalis*, v. 85 as Claudiopolis, and under the later Roman Empire was one of the *castra praesidiaria*, the fortified permanent camps on the eastern frontier between Samosata and Melitene. It was taken from the Arabs and destroyed by Constantine V Copronymos, probably in 755 A. D., together with Malatya (al-Balādhuri, ed. de Goeje, p. 186 sq., Abu 'l-Fida', *Ta'rīkh*, under the years 133 and 138 of the Hidjra; Barhebraeus, *Kethābhā de Makhtebhānūt Zabhnā*, ed. Bedjan, Paris 1890, p. 122 below), but retaken and rebuilt by the 'Abbāsīd al-Manšūr in 140 (757/758) (al-Balādhuri, p. 188 = Ibn al-Athīr, ed. Tornberg, v. 382; Abu 'l-Faraj, *Ta'rīkh Mukhtaṣar al-Duwal*, ed. Šāhānī (Bairut 1890), p. 210, without giving a date; according to Yāqūt, *op. cit.*, in 141 A. H.) and the Christian population transplanted to Constantinople (Michael Syrus, *Kethābhā de Makhtebhānūt Zabhnā*, ed. Chabot, ii. 518, 522). In the first quarter of the tenth century the district of Melitene again passed under Byzantine rule and was not lost again until the Saldjuq invasion; in the tractate *περί παραδρομῆς πολέμου* (*de velitatione bellica*) of the second half of the tenth century the place is mentioned under the name *ῥὰ Καλοῦδια* along with Melitene (Leo Diaconus, ed. Bonn 1828, p. 250). Armenian bands entered the district of Ḳalawdhiya and established themselves there in 1066 (Michael Syrus, *op. cit.*, iii. 158). The Byzantines were followed in their rule in these regions by the Dānīshmandoghlu and their rivals, the Saldjuks of Ḳonya. In this period Ḳalawdhiya is repeatedly mentioned by the Syriac chroniclers, for the last time in the year 1273 (Michael Syrus, *op. cit.*, p. 304, year 1152, p. 400, year 1185; Barhebraeus, *op. cit.*, i. 522 = ii. 543, year 1257; *id.*, i. 549 = ii. 574, year 1273); among other things they report that in October 1152 the Euphrates overflowed its banks as the result of a great landslide and made a way out at the foot of the hills of Ḳ. (see Michael Syrus, *op. cit.*, p. 306 = Barhebraeus, *op. cit.*, i. 341, ii. 348). Hamdu'llāh Mustawfi, *A'uzhat al-Ḳulūb*, ed. Le Strange, p. 98 sq., knows Ḳ. under the name Erḳalawdiya as a considerable fortified place in a fertile region, which produced corn, cotton, grapes and fruit plentifully; he thinks, like Yāqūt, that Ptolemaeus, the author of the *Almagest* came from there, and was therefore called al-Ḳalawdī.

With this the place disappears from history; for, although Hādjdjī Ḳhalīfā (xviii cent. A. D.) still mentions Erḳlūdiyā in his *Djihānnūmā*, p. 601, he only knows it from Hamdu'llāh Mustawfi and Otter, *Voyage en Turquie et en Perse* (Paris 1748), ii. 284 (beginning of the xviii century) translates, as usual with him, only the statements of the Turkish geographer. The site has so far not been discovered; Ainsworth, *Travels and Researches in Asia Minor* (London 1842), i. 263 wishes to identify the ancient Claudias with the modern Kiakhṭa [q. v.], which is, however, impossible because the Syriac chroniclers mention Ḳalawdhiya and Kiakhṭa together contemporaneously as different places.

KALB, the dog, is also in Islām one of the "unclean beasts," primarily because its flesh may not be eaten (al-Nawawī, *Minhādī al-Ṭalabīn*, ed. v. d. Berg, iii. 312); and further because, according to the Hadīth, there are several special regulations regarding it. For example dogs render food which they lick impure and render unavailable water intended for ritual purifications (al-Bukhārī, *Wuḍū'*, bāb 33). Vessels, likewise, which have been licked by dogs, require to be cleaned several times, including once with sand. In a certain way they render impure the whole room in which they are; for angels do not enter a house in which there is a dog and Muḥammad had first to sprinkle the place on which a young dog had lain concealed with purificatory water before Džibril would appear to him (Muslim, *Libās*, trad. 31 sqq.). — Dogs "cut off the ṣalāt", i. e. they make the ṣalāt worthless when they come into the immediate vicinity of the man at prayer (Ibn Mādjā, *Iḳāma*, bāb 30) and one is all the more inclined to attribute this rule to the impurity of the dog, as it also holds for menstruating women. The Arab commentators, however, explain it by saying that the dog frightens the worshipper and distracts him from his devotions (al-Sindī, commentary on Ibn Mādjā as cited above). This is especially true of the black dog, for "he is Satan". This saying is either to be interpreted literally as meaning that Satan occasionally appears in the form of a black dog (cf. Faust) or it only means that black dogs in general are considered particularly dangerous. Dogs in general are considered noxious and should therefore be exterminated (al-Nasā'ī, *Said wa 'l-Dhābā'ih*, bāb 9—14), but as "Allāh does not create anything in which there is not a trace of his wisdom" (al-Sindī, commentary on this passage), this rule is applied only to black dogs.

It is only permitted to keep dogs for hunting, for herding and for watching (al-Nasā'ī, *op. cit.*); whoever keeps a forbidden dog has to forfeit a portion of his possessions daily (cf. *Babylon. Talmud, Šabbāth*, fol. 63^a: "whoever possesses a dangerous dog keeps good fortune away from his house"). Dealing in dogs on the other hand is strictly forbidden (al-Bukhārī, *Buyū'*, bāb 25).

But in spite of its impurity and dangerousness

the Arabs are able to appreciate the good qualities and services of the dog. Muḥammad himself promises a woman a divine reward for a kindness, which she had done a thirsty dog (al-Bukhārī, *Wuḍūʿ*, bāb 33), and al-Ḳazwīnī (p. 403) characterises the dog as "a particularly intelligent, very useful animal, patient in hunger and on the watch, whose cleverness and fidelity are shown in many ways". Al-Ḳazwīnī describes very fully the symptoms of hydrophobia; cf. thereon *Babylon. Talmud*, *Yōmā*, fol. 83b: "there are five symptoms in a mad dog; its mouth is open, its saliva runs, its ears have a foul smell, its tail lies limply on its hips and it wanders aimlessly along the sides of the streets".

The dog of the seven sleepers (Sūra xviii. 17) is a special matter. According to al-Baidāwī (ed. Fleischer, p. 557) it was a dog with the gift of speech, in al-Ṭabarī's view (*Tafsīr*, xv. 141, 1st ed. p. 131), a man in the form of a dog, but perhaps simply an ordinary dog. — On the dog-star (Sirius) see AL-KALB and AL-ŠIʿRA.

AL-KALB, the Dog-Star in astronomy: *Šurat al-Kalb al-akbar* (the constellation of the Great Dog) and *Šurat al-Kalb al-aṣḡhar* (constellation of the Little Dog) or also *Šurat al-Kalb al-Mutakaddim* (constellation of the fore-runner dog; *ῥοκωύων*), the former known as canis major and the latter as canis minor, two constellations of the southern heavens, the names and configuration of which the Arabs took out of *al-Madīstī* of Ptolemaios. Like the latter, the Arabs allotted 18 stars to the šura proper of Canis Major, of which Sirius (*al-Šiʿra l-ʿabūr*) is of the first magnitude (actually 1.6), while outside of the constellation lie 11 stars, and to Canis Minor two stars of which Prokyon (α Canis Minoris, *al-Šiʿra l-ghumaiṣā*) is also of the first magnitude (actually 0.5). As regards the stellar co-ordinates (latitude and longitude), the star-catalogues of ʿAbd al-Raḥmān al-Šāfi (d. 376 = 986) and al-Bīrūnī (d. 440 = 1048) are based entirely on the Ptolemaic *Almagest*, while the star-catalogue of Ulugh Beg prepared for the period 1437 contains numerous new definitions of star positions.

The name Dog-Star probably goes back to ancient Egypt where the modern Sirius (*σεῖρος* = burning, brilliant — with the addition of *Kāw* = Dog-Star) was called *Sopdet*, which undoubtedly became the Greek *Sothis*. The name of the star had originally nothing to do with dog, but in the Greek terracottas which are frequently found in Egypt, Isis, to whom the star was sacred, is often represented with a dog and (according to L. Borchardt) with a particular kind of dog, the so-called Armant (Erment)-dog. Sirius alone is also reproduced in terracottas in that way; sometimes

he also has a star above his head. According to Borchardt, it is not improbable that the star which appears in the star-tables from the Ramesid graves, which precedes or follows Sopdet, is the modern Prokyon.

In Babylonia Sirius was called "Arrow-Star", never Dog-Star. The older Babylonian name (according to F. X. Kugler) was *Kakkab mīṣrē*, the late Babylonian *Kak Kashi* ("weapon of the bow" = "arrow").

(C. SCHÖY)

KALB B. WABARA, the eponymous ancestor of the tribe of Kalb, a confederation of nomadic Syrian Arabs attached to the powerful *Qudāʿa* [q.v.] group. The Banū ʿUdhra [q.v.] have been the most famous among the clans of the Kalb since the Hijra, especially in literary history. The pre-Muḥammadian annals of Kalb are very obscure and semi-fabulous. Zuhair b. Djanāb [q.v.], an almost legendary personage — reckoned among the *muʿammarūn* or centenarians — is said to have been one of their principal chiefs. They seem to have developed independently of other tribes in the Peninsula and to have had no relations with them. Their dialect showed curious peculiarities and we know of no pre-Islamic poets using it. About the time of the Hijra they were the most important Arab group in Syria.

The conquest of this country brought them to the front, not least through the close alliance made by Muʿāwiya I with their tribe, a union sealed by his marriage with Maisūn [q.v.], mother of Yazid I. This political alliance brought them into high office, at court and in the army; to the latter they furnished disciplined contingents and captains of great bravery. Towards the middle of the first century A.H. their numbers must have been considerable: 2000 of them were receiving the pension of 2000 dirhems, the *sharaf al-aʿlāʾ*, a distinction reserved for the *aṣḥāraf* or nobles. Half-settled, half-nomadic they covered with their huge flocks — for they were great herdsmen — the tSamāwa the steppes separating Syria from the ʿIrāq and hence called Samāwa of Kalb and desert of Kalb. They held the springs, the oases at the east and south of Ḥawrān, especially Dawmat al-Djandal, Tabūk and several others dotted about the Wādi l-Ḳurā with their palm-groves, the property of the Banū ʿUdhra. In Syria they were grouped round Salamiya and Palmyra, towns which belonged to them. A part of the district of Emesa and of the lower valley of the Orontes were united in their territory and in

the Ghūta [q. v.] of Damascus a number of villages belonged to the Kalb. The possession of commercial centres like Palmyra and Dawmat al-Djandal leads us to suppose that this active Syrian tribe must have profited by the caravans passing by these routes, still very much used in the first century of Islām.

They seem to have inherited the ancient hegemony of the Ghassānids. Like the latter and other Syro-Arab tribes at the time of the Hīdjra the great majority of them professed the Christian religion and probably were Monophysites. They gradually exchanged it for Islām; one group is even said to have sent a deputation to the Prophet. In the following of the latter several Kalbis — we may mention Zaid b. Hāritha, his adopted son, and Dahya b. Khalifa, his diplomat — rose to fill important positions. Islām spread among the Kalb, especially from the time when frequent marriages — the first that of Nā'ila, wife of the Caliph 'Othmān [q. v.] — with the Omayyads assured them preponderance over the other tribes. Yazīd I, with his mother Maisūn, passed a part of his youth in the desert of Kalb and contracted a marriage with a Kalbiya. The supremacy of this tribe and of the powerful family of Bahdal [q. v.] incited the Kais against them. Refusing to recognise Mu'āwīya II, the latter declared for Ibn al-Zubair [see ABD ALLĀH B. AL-ZUBAIR]. The victory of Marj Rāhiṭ [q. v.], due mainly to the bravery of the Kalbis, completed the rupture between them and the Kais. Burning for revenge, they attacked the Kalb everywhere and succeeded in driving them out of Mesopotamia and the adjoining districts of the Samāwa. Besides, with the advent of the Marwānids, their popularity had sunk for the time at the court of Damascus, where their striking triumph at the battle of Marj Rāhiṭ gave offence. They were not long in regaining their influence. They continued to figure among the most stalwart supporters of Omayyad rule. On several occasions, their contingents rendered effective assistance in retaking the 'Irāk from the rebels in the East. They were therefore proclaimed the bravest among the Qudā'a. In a word, the name of Kalbi had become synonymous with partisan of the Omayyads. The almost constant policy of this dynasty was to rely on the Kalbi alliance and through it on the support of the other Syrian tribes. A tradition said that the Kalb would be the last adherents of al-Sufyānī [q. v.]. This state of affairs inevitably led to a violent reaction under the 'Abbāsids and precipitated the fall of the Kalb, decimated by their long struggle with the Kais and their active participation in all the wars of conquest. Soon their solidity was broken up and the designation of Kalbi, an object of suspicion to the Baghdād government, gradually disappeared. Ibn Sa'īd, quoted by al-Kāḷkashandī (in his *Nihāyat al-Arab*), says that in his day there were great numbers of them settled on the shores "of the straits of Constantinople and divided equally between Christianity and Islām".

AL-KALBĪ, a family of scholars of Kūfa. The elder al-Kalbi, ABU 'L-NADR MUHAMMAD (B.

MALIK, according to Ibn al-Kūfī in the *Fihrist*) B. AL-SĀ'IB B. BISHR, whose grandfather with his sons al-Sā'ib, 'Ubaid and 'Abd al-Rahmān had fought by the side of 'Alī in the battle of the Camel and whose father had fallen by the side of Muṣ'ab b. al-Zubair, had taken part in the battle of Dair al-Djamādīm [q. v.] in 82 (101) as a follower of 'Abd al-Rahmān b. Muḥammad b. al-Ash'ath [q. v.]. He then devoted himself to historical and philological studies; he read the *Naḳā'id* of Farazdaq [q. v.] with the poet himself. He lectured in Kūfa on Kor'anic exegesis and history; at the invitation of Sulaimān b. 'Alī he expounded the Kor'an for a time in the latter's house at Basra. His commentary on the Kor'an was still used by al-Tha'labī († 427 = 1036; q. v., (see *Cat. Codd. MSS. Or. in Museo Britannico*) pars ii. N^o. 821). He died in 146 (763).

His son ABU 'L-MUNDHIR HISHĀM mainly continued his father's historical studies, in which the latter had been his teacher. Both scholars have often been attacked by critics of traditions and even accused of forgery (see *Kit. al-Aghānī*, ix, 19; xi. 48; xviii. 161; Goldziher, *Muh. Studien*, i. 186); but on the other hand they did not lack warm defenders (e. g. Yāqūt, *Mu'djam*, ed. Wüstenfeld, ii. 158). Modern research has confirmed many of their statements, which they reached sometimes by regularly scientific methods such as the study of inscriptions, against the fanatical criticism of their co-religionists (see Noldeke, *Gesch. der Araber u. Perser*, p. xxvii.). Muḥammad, who worked for a time also in Baghdād, died in his native town of Kūfa in 204 (819), according to others in 206.

Of the 140 works of Muḥammad, listed in the *Fihrist*, pp. 95—98), there have survived: 1. *Kit. al-Nasab al-Kabir* or *al-Djamhara fi 'l-Nasab* (*Djamharat al-Ansāb* in Hādīdī Khalifa), on the genealogies of the Arabs in a MS. of the Escorial (see Casiri, *Bibl. arabico-hispana*, N^o. 1693), of whose second volume the Brit. Museum (see *Cat. Codd. MSS. ... Mus. Brit.*, Pars ii. N^o. 915) owns a modern, almost worthless copy, perhaps only of an extract; a fragment of the work is perhaps preserved in a Paris manuscript (*Bibl. Nat., de Slane, Cat.*, N^o. 2047). Of an apparently much condensed version of the work by Abū Sa'īd 'Alī b. Mūsā al-Sukkari (d. 465 = 1075), which is chiefly based on Muḥammad b. Ḥabīb's recension, but also uses that of Ibn al-A'rābi and other fundamentally independent sources also, the first volume is preserved in the British Museum (see *Cat.*, N^o. 1202 and also p. 783b). The extract by Yāqūt is in Cairo, Khed. Library, see *Fihrist*, v. 156; Vollers, *Zeitschr. d. Deutsch. Morg. Gesellsch.*, xliii. 116). 2. *Kit. Nasab Fuḥūl al-Khāl fi 'l-Djāhiliya wal-Islām* (cf. Hammer, *Denks. der Wiener Akad.*, phil.-hist. Kl., vi. 214, n^o. 50) in Gotha (see Pertsch, *Die arab. Hss.*, N^o. 2078) and in the Escorial (see Casiri, N^o. 1700, 2). 3. *Kit. al-Aṣnām*, or more accurately *Kit. Tankis al-Aṣnām*, which Ahmed Zeki Pasha [Ibn al-Kalbi, *Le Livre des Idoles* (*Kitāb al-Aṣnām*), Cairo 1914] has published. An apparently very full synopsis which enables us to judge of the extent and arrangement of the book is to be found in 'Abd al-Qādir al-Baghdādī's *Khizānat al-Adab*, iii. 242—6. The numerous extracts in Yāqūt have been collected by Wellhausen, *Reste arab. Heidentums*², p. 10—64 (cf.

also 243) and translated and annotated. 4. An extract from the *Kit. al-Kutāb* (*Fihrist*, p. 97, 18) is given by Ibn al-Anbārī in his commentary on the *Mufaḍḍaliyyāt*; see C. J. Lyall, *Ibn al-Kalbī's Account of the first Day of al-Kutāb in the Orient. Stud. Th. Nöldeke gewidmet* (Giessen 1906), i. 127—154.

Bibliography: Ibn Sa'd, *Ṭabaqāt*, vi. 249—250; Ibn Ḥadjar, *Tahdhīb al-Tahdhīb* (Haidarābād 1325—7), ix. Qorāns*, ii. 168, 170, 171; Brockelmann, *Gesch. d. ar. Lit.*, i. 138—140.

(BROCKELMANN)

KAL'E-I SEFĪD, a fortress in Fārs, in 30° 10' N. Lat. and 51° 30' E. Long. (Greenwich). It is built on a mountain with a flat top, in the eastern part of the valley of Kohra, which falls steeply down on all sides. On its summit, which can only be reached by cliff-paths, lies an extensive well-wooded plateau watered by numerous springs. A strong garrison is necessary for its defence as is noted in the *Fārsnāma*. Descriptions of the fortress and the country round it are given, among Oriental writers for example by Ibn al-Balkhī in the *Fārsnāma* (the pertinent passage is copied by Mustawfī, *Nuḣat al-Kulūb*, 'Alī Yazdī and Mirkwānd (see *Bibl.*). Of descriptions by European travellers in the 19th century, that of Stolze deserves special mention; along with Andreas he explored the mountain and castle thoroughly. The statements of Kinneir who visited Kal'e-i Sefid in 1810 are unreliable, according to Stolze.

The name of the fortress is given in the Persian geographers and historians as Kal'e-i Isfid (Sefid, Sepid), the "white citadel"; Kal'e-i Ispid-diz (the "white fortress") is also found; Kal'e-i Sefid is the only form in use at the present day. Translated into Arabic the name is given in Ibn al-Athīr (ed. Toimberg), xi. 46 as al-Kal'a al-Bayḍā'. The name "white citadel" which is found elsewhere as a name for a castle in areas where Arabic and Persian are spoken (e. g. in al-Hira, al-Mada'in, in the oasis of Ruḥbe east of Hawrān, and in the region of Kairawān, in Afghanistan, etc.; for Biredjīk cf. above i. 723) may very probably originate in the dazzling white colour of the building-stone used. The name Kal'e-i Gul u Gulāb (citadel of the rose and rose-water), borne by Kal'e-i Sefid in al-Bundārī, *Tawārikh al-Salḡūq* (ed. Houtsma, 2., p. 188, 13) is remarkable.

Kal'e-i Sefid is the most noteworthy point on the mountain road which leads from Behbahān to Shīrāz and furnishes communication between Khūzistān and Fārs. It may be regarded as certain that a commanding place like this was very early fortified. The "Persian passes" through which Alexander the Great tried to enter the ancestral home of the Achaemenids and which were defended by the Satrap of Persis, Ariobarzanes, with his strong forces, have often been sought in the valley of Kal'e-i Sefid; e. g. by Vincent, Müttel, Droysen, Forbiger. Ritter (*Erdkunde*, ix. 138) in differing from these, considers Kal'e-i Sefid to be the stronghold of the Uxians and places the "Persian Gates" farther east. Ritter's view has been attacked particularly by Müttel in his edition of Curtius (Berlin 1841),

p. 414 sq. and by Stolze (*op. cit.*, p. 262 sq.). That the region of Kal'e-i Sefid does not correspond to the situation of the "Persian Gates" of the historians of Alexander and that the latter should be located elsewhere has been fairly convincingly proved by Stolze, *op. cit.*

Kal'e-i Sefid is not mentioned by the Arab geographers of the middle ages. Like the adjoining town of Nawbandjān (Nawbandādjan) it must have been allotted to the Persian province of Sābūr in the Caliphate period. From the tenth century on we find cropping up in the Oriental sources a nomadic people named the Shūl, after whom the whole area, inhabited by them from the west of Shīrāz to the frontiers of Fārs and Khūzistān was called Shūlistān. There is definite evidence to show that Kal'e-i Sefid belonged to Shūlistān. On the Shūl and the land of Shūlistān cf. the references in Quatremère, *op. cit.*, p. 380 sq. and also Mustawfī, *Tā'rikh-i Guzida* (ed. Browne, Gibb Mem. xiv.), p. 538, 658, 660, 696, 726.

Kal'e-i Sefid is frequently mentioned by Persian poets and chroniclers. It is first found in Firdawsi's *Shāhnāma* (ed. Mohl, ii. 92, 245 sq.); here the conquest of the stronghold is related as one of the noteworthy deeds of the hero Rustam. As the *Fārsnāma* (written about 500 = 1106) reports, the fortress of Kal'e-i Sefid had lain in ruins for many years until it was rebuilt by a certain Abū Naṣr from Tīr-Murdān (a district of the province of Sābūr) during the turmoils of the last decades of Būyid rule, that is in the first half of the 10th (xth) century. The mountain, difficult of access, served not infrequently in wartime as a secure hiding-place. For example in 534 (1139) Buzāba, Governor of Fārs, retired here before Karā Ṣonkor, Atābeg of the Salḡūq Sultān Mas'ūd; cf. the article BUZĀBA, i. 809). The Salḡurid Abū Bakr, Atābeg of Fārs from 623 to 658 (1226—1260) (on him see above i. 82) transported his treasures to Kal'e-i Sefid and placed a garrison in the citadel in order to have a place of refuge here in case of a catastrophe. The last Atābeg of Fārs of the Salḡurid dynasty, Salḡūqshāh, met his death at the foot of Mount Kal'e-i Sefid in battle with one of Hūlāgū's generals in 663 (1264); see J. v. Hammer, *Gesch. der Ilchāne* (Darmstadt 1842), i. 243 and cf. also Mustawfī, *Tā'rikh-i Guzida*, p. 509.

Although Hūlāgū issued an order to destroy all the fortresses in the lands conquered by him, an exception was made of Kal'e-i Sefid, as is expressly mentioned; cf. the passage in the *Tā'rikh-i Waṣṣāf* in Quatremère, *op. cit.*, p. 382. The citadel could therefore continue to serve as a place of refuge, and was also on several occasions used as a state-prison for political opponents. Thus for example Mas'ūd Shāh of the Indjū dynasty, who ruled as governor of Fārs from 736 (1335) imprisoned his brother Muḥammad in Kal'e-i Sefid (cf. above ii. 504); when later Abū Ishāq, a younger brother of the Mas'ūd Shāh just mentioned, came into conflict with the Muẓaffarid Mubārīz al-Dīn and had to flee after the capture of his capital Shīrāz in 754 (1353) he went to Kal'e-i Sefid (see Mirkhwānd's account in Quatremère, *op. cit.*, p. 382; Mustawfī, *Tā'rikh-i Guzida*, p. 658, 15 sq., and cf. above ii. 804). A few years later the sons of Mubārīz al-Dīn, Shāh Sultān and Shāh Shudjān rebelled against their father, blinded him and imprisoned him in Kal'e-i Sefid

in 759 (1358); see Mustawfi, *Ta'rikh-i Guzida*, p. 681; Defrémery in the *Journ. Asiat.* 1864, ii 112. In 785 (1383) Shāh Shudjā' had his son Sultān Shibli sent to Kāle-i Sefid as an alleged rebel (see Mustawfi, *op. cit.*, p. 724; Quatremère, *op. cit.*, p. 382; Defrémery, *op. cit.* (1845), i. 437).

Kāle-i Sefid has attained special fame through its capture by Timūr. The latter on his second campaign in Fārs in 795 (1393) passed by the road from Behbahān to Shirāz, besieged this barrier fortress, considered impregnable, and stormed it on the third day. All the members of the Muza'ffarid dynasty were captured and put to death (cf. Sharaf al-Din 'Alī Yazdī, *Zafarnāma*, Bibl. Ind., New Series, N^o. 616, Calcutta 1887, i. 600 sq.; Mustawfi, *op. cit.*, p. 751).

We read of the capture of Kāle-i Sefid by Hamza-Bey several centuries later, in the reign of Shāh 'Abbās I; see Quatremère, *op. cit.*, p. 384. The Māmasenī have now settled in a large part of what was once called Shūlīstān; they are a robber Lūr-tribe, who belong to the Bakhtiyārī [q. v., I, 603]. They centre round Kāle-i Sefid. On them see Layard in the *Journ. of the R. G. S.*, xv. 28; Ritter, *Erdkunde*, viii. 390, ix. 137; C. de Bode, *Travels in Luristan and Arabistan* (London 1845), i. 210, 219 sq., 262 sq. When the Māmasenī in the latter part of the reign of Fath 'Alī Shāh (1797—1834) were in constant rebellion under a robber chief named Walī Khān Bakash, an army of Ādharbaidjānī troops was sent against them, who besieged Kāle-i Sefid and forced the stubborn defenders of the citadel to yield (cf. Curzon, *op. cit.*).

It should further be mentioned that below the fortress on the mountain there was at one time a second smaller castle, the name of which is variously given as Astak (*Fārs nāma*, p. 158, 17) or Nishnāk (Mustawfi, *Nuzhat al-K'ulūb*, p. 132, 5); further variants of the name are given here in note 1).

The little village of Tell Espīd should not be confused with this; it lies northwest of Kāle-i Sefid in the adjacent plain on a hill some 2400 feet high; cf. Wells in the *Proc. of the Roy. Geogr. Soc.*, 1883, v. 161 and Herzfeld, *op. cit.*, p. 85.

KALE-I SULTANIYE, in popular speech usually ČANAQ KALE'SI ('Pot-castle'), the town and fortifications known to Europeans as the Dardauelles, the chief place in the sandjak of Bigha [q. v., I, 716, cf. also DARDANELLES, I, 922], situated at the narrowest part of the straits. The modern settlement has taken the place of the very ancient seaport of Abydos; the latter name, indeed, survived down to the xvth century on Italian charts in the form Avido, Aveo, as the name for Kāle-i Sultāniye (the bay: la bocca d'Aveo). While the form Andus [q. v.] found in Yākūt, *Muḍjam* (ed. Wustenfeld), i. 374 also is to be read Abydus, the statement of Joh. Leunclavius, *Historiae Musulmanae*, Frankfurt 1591, p. 182, 55, taken from the *Codex Hainavallanus* (Neshrī?), that Abydos is called Aydos by the Ottomans can be said to be wrong. There is a confusion with Aidos in Koča Eli and the whole story of the conquest in Leunclavius refers to this place and not to Abydos. Here from the days of the Roman empire was the chief custom-house of Byzantium, where every vessel entering the straits had to pay a tithe (Agathias, v. 12; cf. the customs regulations of Abydus published by A. D. Mordtmann Jun. in the *Athen. Mitteil.*, vi. 182 sqq.) and it was strongly fortified, as the key to the capital. In spring of 717 the town was taken along with the coasts of the Hellespont by the Umayyad general Maslama (Theophanes, ed. Bekker, Bonn 1839, p. 395). In those days there was attached to a tower here the great chain which barred the Muslim ships' entrance to the straits (Ibn Khordādhbeh, ed. de Goeje in the *Bibl. Geogr. Arab.*, vi. 103 sqq.; cf. Yākūt, i. 374; al-Idrisī, *Nuzhat al-Mushṭāḡ*, Fr. transl. by Jaubert, *Géographie d'Edrasi*, ii. 135, 301, 303). While the siege and capture by Emir Orkhān are as uncertain as the crossing of the Dardanelles attributed to him at this place (cf. Joh. Dräseke in the *Neue Jahrbücher für klass. Altert.*, xxxi. (1913), 476—504), the statement that in the reign of Murād about 1354 the straits were crossed in small boats at Abydus, is more worthy of belief (Dukas, ed. Bekker, Bonn 1834, p. 14, 8, 39, 13; Phrantzis, ed. Bekker, Bonn 1838, p. 45, 15). This would, it is true, be in contradiction to the Turkish account which places the crossing at Kemer opposite Hexamilia. The place did not become of any considerable importance in the Muslim period until the time of Muḥammad II, who took it in 1461, built great defensive works here for the protection of Constantinople, which he had recently captured, and founded a town here (Chalkokondylas, ed. Bekker, Bonn 1843, p. 529, 18 sqq.). The fortress was armed with about 30 large and a number of smaller guns. All incoming ships had henceforth to cast anchor there, to show their papers and pay toll (Chalkokondylas, *op. cit.*, p. 530; cf. thereon Kritobulos, ed. C. Müller, *Fragm. Hist. Graec.*, v. 146). The town was now regarded as the main defence of the Dardanelles, although by the middle of the xvth century we find European travellers who sailed through the straits wondering at the insufficiency of the defences; for example Pierre Belon, to whom the walls and towers, said to be built out of the ruins of Scamandria, seemed not nearly strong enough

for the "key to Turkey" (*Les observations de plusieurs singulitez*, Paris 1854, p. 77^h sqq.; there, also, is a picture of the Dardanelles forts following p. 78). It is certain that European fleets could pass the straits unhindered in the middle of the xviiith century, and that the bastions on both European and Asiatic sides were in almost complete ruins. Although about 1550, 32 great guns still barred the entrance to hostile ships (cf. Charrière, *Négociations*, Paris 1848, i. 374 and 380, where "les deux chasteaux du Hellespont nommez Dardanneaux", the "XXXII groz canons dont nul navire ne peult entrer ou sortir malgré eulx" as well as the search of a ship are described), a very short time after, it was no longer possible to think of any serious resistance being made by them. It was the vigorous Sultana Kösem, who reigned for a period for her minor grandson Mehmed IV, who, with the grand vizier Mehmed Köprülü, devoted special attention to the decaying Dardanelles forts and decided to renovate and remodel them completely. The building of Seddu'l-Bahr and Küm Kal'e, the two so-called "new castles", was also decided upon at this time (cf. J. v. Hammer, *Gesch. des osman. Reiches*, Pest 1827—35, v. 516). In 1658 the work was begun under the supervision of Ankabüt Ahmed Paşa, commander of the Dardanelles, and under the direction of the architect Mustafa Agha, and by Sept. 1659 Sultan Mehmed IV was able to inspect the new works (cf. Na'imâ, *Sambul* 1147, ii. 698 sq., 704; J. v. Hammer, *op. cit.*, vi. 65 sq.) and dedicate a mosque (Ewliya, v. 307; according to him, the name Kal'e-i Sultânîye arose at this time in honour of Kösem Vâlide, but it is probably older). The appearance of the new citadel is accurately known from European descriptions of the time. The fortress proper was surrounded by a strong wall at each of the four corners of which there rose a fortified tower. In the middle was the donjon, which had been increased in height. Nearly 30 guns were placed here in no regular order, so as not to injure the opposite works of Kilidu'l-Bahr when they were fired. Behind the defences lay the town proper, inhabited chiefly by Turks and Jews, numbering some 3000 inhabitants about 1680 (cf. Grelot, *Relation Nouvelle d'un voyage de Constantinople*, Paris 1681, p. 24, 28, 30 with a picture of the Dardanelles defences on p. 41; further pictures in Pitton de Tournefort, *Relation d'un voyage du Levant*, Paris 1717, i. 453 sqq., Amsterdam 1718, i. 175 sqq.). There were definite rules regulating the passage of ships. Every merchantman had to announce its arrival with 3, 5, 7 shots to which 1—5 were fired in reply. This had to be returned with 3, 5, 7 shots and not till then could the voyage be continued. All ships coming from Constantinople had to cast anchor here to be examined and pay tolls (cf. M. de Thevenot, *Relation d'un voyage fait au Levant*, Paris 1665, p. 32 sqq.; Jacob Spon and George Wheler, *Voyage d'Italie, de Dalmatie, de Grece et du Levant fait aus années 1675 et 1676*, the Hague 1724, i. 123 sqq.). Not more than five Christian ships could go through at the same time (cf. Grelot, *op. cit.*, p. 30). These regulations survived into the xviiith century, although there was considerable laxity in their enforcement (cf. R. Chandler, *Travels in Asia Minor*, Oxford 1775, p. 11). A hundred years later the defences were again in the most wretched state, vividly described by

Baron Franz von Tott (Tott) (*Mémoires du Baron de Tott*, Amsterdam 1784, iii. 43 sqq.). In 1770 the Russian fleet was able to sail through the straits without opposition. Von Tott thereupon hurriedly repaired the fortifications (cf. Edgar Pálóczi, *Báró Tóth Ferenc, a Dardanellak megérosítása*, Budapest 1916), without, however, being able to stop their decay. The town seems to have been in quite a flourishing condition at this time, according to R. Pococke, *A Description of the East* (London 1743—1745), ii. 102—104, it was 1½ miles around and had 1200 inhabitants (200 Greeks, 100 Armenians and 50 Jews), who carried on a busy trade in silk, sailcloth and earthenware. The annual export was put at 15,000 dollars. A French Consul, as well as a Dutch and English dragoman had their offices in Kal'e-i Sultânîye. The potteries, which seem to have begun about 1740, were for a long time famous and gave the place the name Çanak Kal'esi. The inhabitants lived in different quarters separated into nations, Armenians who fled from Şah Tahmâsp are said to have been settled here as early as 1529 (according to Cabanel in V. Cuinet, *La Turquie d'Asie*, iii. 689 sqq.) but a regular Armenian colony only dates from about 1650. At the same time there is evidence of a, sometimes large, Jewish settlement, which played a prominent part in the business world (cf. Grelot, *op. cit.*, p. 24; Baron de Tott, *op. cit.*, iii. 59; J. B. Lechevalier, *Voyage de la Propontide*, Paris an VIII (= 1800), i. 14, according to whom the people were almost all Jews, who did a brisk business in provisioning passing ships (cf. thereon Grelot, *op. cit.*, p. 28). There is no documentary evidence of the presence of Greeks before 1690 in Kal'e-i Sultânîye. In the sixteenth century the fortress sank practically to insignificance. The bold passage of the English fleet through the Dardanelles on Feb. 19, 1807 resulted in the defences being again repaired (cf. Zinkeisen, *Gesch. des osm. Reiches*, vii. 434) but without their afterwards keeping pace with the rapid development of modern artillery. A very full description of the fortifications in 1836 is given by Helmut v. Moltke, *Briefe über Zustände und Begebenheiten in der Türkei* (Berlin 1841), p. 51 sqq., 8th ed. (1917), p. 55 sqq. and by Abercromby Grant, *Narrative of a Journey to Greece in 1830*, p. 431 (with sketches). Kal'e-i Sultânîye and its forts only became of considerable strategic importance again during the Great War, when as a result of an indirect bombardment from the Gulf of Saros by the Anglo-French fleets the town, which had been almost deserted by its inhabitants, suffered severe damage in March 1915 and was burned down. It had previously suffered from frequent fires and especially from the great earthquake of Aug. 9, 1912. About 1890 the town had about 11,000 inhabitants, 11 larger and several smaller mosques and 4 churches, but now the number must be much smaller.

(FRANZ BABINGER)

KALGHA, the title of the heir-apparent among the Tatars of the Crimea from the time of Mengli Girāy (last rule 883—921 = 1478—1515). The origin of the title is unknown; in manuscripts the same word is also written *kāghilghay*, which has caused W. Smirnow (*Krimskoje Chanstvo pod vechovenstvom Ottomanskoi Perli do načala XVIII vjeka*, St. Petersburg 1887, p. 350 sq.) to suggest that we have here to deal with a non-Turkish (probably a Mongol) word. We have perhaps to connect with *kalgha* the Central Asian word *ḡalkhān*, a name frequently given to the prince of Balkh (Balkh appears as the residence of the heir-apparent beside Bukhārā, the royal residence of the Khān of the Ōzbegs); this word also is sometimes written *Kā'lkhān* (no doubt for *Kāghilkhān*); cf. J. Senkowski, *Supplément à l'histoire générale des Huns* etc., St. Petersburg 1824, p. 74 sq. When, under Muḥammad Girāy II (985—992 = 1577—84), Alp Girāy, brother of the Khān, was designated *kalgha*, the rank of second heir-apparent (*wali aḥd thāni*) was created for the Khān's son, prince Sa'adat Girāy and retained in later reigns. The name Nūr al-Dīn of this prince's tutor (*atālligh*) was transferred to the prince himself and to his rank (Muḥammad Riḍā, *al-Sab' al-Sayyār*, Kazan 1832, p. 103, more fully in the abbreviated recension by Hurramī Ālebi, which only exists in manuscript; for the manuscript see A. Samojlovich in the *Izv. Tavrič. učenoj arch. kom.*, N^o. 49; cf. O. Retowski, *Die Münzen der Girei*, Moscow 1905, p. 93 = *Trud. Mosk. Numism. Obšč.*, iii. 32). Henceforth the Nūr al-Dīn along with the *kalgha* is found not only among the members of the ruling house but also among the members of the most important families like the Šīrīn and Manḡit (cf. Radloff, *Wörterbuch*, ii. 253, where both family names are erroneously taken as adjectives).

(W. BARTHOLD)

KALHĀT (in Marco Polo CALATU, in Portuguese writers CALAIATE), a once flourishing seaport in 'Omān lying northwest of Rās al-Hadd. Ibn Baṭṭūṭa, who visited the town during his travels in 'Omān, specially mentions the fine streets and splendid lofty mosque, which afforded a wide view of the sea and the harbour and was built by the pious Bitī (of noble family) Maryam. The inhabitants of the town, who lived by trading in Indian products, and spoke a bad Arabic, were members of the Ibāḍīya sect (see IBĀḌĪYA), but concealed their creed from their rulers, the kings of Hormuz [q. v.] (cf. also Ibn al-Athīr, *al-Kāmil*, ed. Tornberg, xii. 198 below), who were Sunnīs. According to Yāqūt, who calls Kalhāt the most beautiful district in 'Omān and places its foundation in the xiith century, the sectarians of this town openly professed their faith. The Portuguese broke the power of the kings of Hormuz in the beginning of the xvth century.

AL-KĀLĪ, ABŪ 'ALĪ ISM'ĪL B. AL-KĀSİM B. 'AYDĪN B. HĀRŪN B. 'ISĀ B. MUḤAMMAD, a great Arab philologist, born in Djumādā II, 288 = May-June, 901 (according to others in 280), at Manāzguird, a little town in Armenia which was then a dependency of Diyār Bakr, and died at Cordova on Djumādā I 7, 356 = April 19-20, 967 (according to others Rabī' II, Djumādā II, 356, and also 366 according to Ibn 'Idhārī).

In 303 having gone to Baghdad in company with some people of the town of Kālīkālā, he was confused with them and in consequence was surnamed al-Kālī. However, he is usually called in the East Abū 'Alī al-Baḡhdādī. After studying Islāmic Tradition and particularly Arabic language and literature, al-Kālī, at the end of his resources, left Baḡhdād in 328 (939/40) and went to Spain where he did not arrive until 330 = 941/2, in the reign of the Caliph 'Abd al-Raḥmān al-Nāṣir. The son of this prince Abū 'l-'Āṣī al-Ḥakam who was fond of learning and of scholars received him very kindly, and, indeed, it is said that even he had written to the East to get al-Kālī to come to the West. Abū 'Alī arrived in Cordova on Ša'bān 26, 330 (May 16, 942), where he began to teach Tradition and especially the Arabic language and literature. As teachers he had 'Abd Allāh b. Muḥammad al-Baḡhawī, 'Abd Allāh b. Sulaimān b. al-Aḡḡath al-Sidjīstānī, Ibn Duraid, Ibn al-Sarrādj, al-Zaḡdīdjādī, al-Aḡḡafsh al-Šaḡhīr, Niṣṭawaih, Abū Bakr Ibn al-Anbāī, Ibn Kūtailba, Ibn Durustawaih, etc. Among his pupils we may specially mention the grammarian and lexicographer Abū Bakr Muḥammad b. al-Ḥasan al-Zubaidī.

Among his works we now only possess: 1^o. *Kit. al-Amālī wa 'l-Dhail wa 'l-Nawādir*, a kind of anthology containing a large number of notes on proverbs, language and poetry, publ. at Būlak in 1324; indexes of poets and rhymes have been published by F. Krenkow and A. Bevan at Leiden in 1913; 2^o. *Kit. al-Nawādir*, part I, Cambridge, Univ. Libr., E. G. Browne, *A Hand-list of the Muḥammadan Manuscripts*, N^o. 926; 3^o. *Kit. al-Bārī fi Ḡharīb al-Ḥadīth*, remained unfinished, Paris, Bibl. Nat., N^o. 4235.

Bibliography: Al-Dabbī, *Buḡhyat al-Multamīs*, N^o. 547; Ibn al-Farajī, *Kit. KALĪ, KALĀĪ: 1. The name for tin, or for a specially good quality of tin among the Arabs, occasionally also called *al-raṣāṣ al-kalī* and *al-raṣāṣ al-abyaḍ*, i. e. "Kalī-lead" or "white lead"; see *Lisān al-'Arab*, x. 167, 16; Dozy, *Supplément aux Dict. arab.*, ii. 397^a; Vullers, *Lex. Pers.-Lat.*, ii. 735^a; Quatremère in the *Journ. des Savants* 1846, p. 731. For other names of tin in Arabie (Kaṣḍir = *Κασσίτερος*, etc.) see e. g. al-Dimashkī, *Nukhbat al-Dahr* (Cosmography, ed. Mehren), p. 54, 1. The word apparently comes from the Far East, from which the Arabs may possibly have got it directly, without the (not impossible) intermediary of modern Persian, which al-Djāwālīkī, *al-Mu'arrab* (ed. Sachau), p. 125, 6 demands (the original would be Persian *Kalhā*). The correction *kalahi* for *Kalhā* there proposed is based on Ibn Sa'īd, quoted in G. Ferrand, *Relations de voyages et Textes géograph. ... relat. à l'extrême-Orient* (Paris 1913—1914), p. 343. The word *Kalī* (in Ghilāni: *Kālīb*) found in the modern Persian dialect of Māzandarān — see Melgunof in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxii. 198 — must have come through the Arabic; from the latter the word entered Turkish: *Kalai* (Sāmi, *Kāmūs-i Türki*, p. 1032) and thence into modern Greek: τὸ καλαί. As a loan-word *Kalā'i* travelled still further, into Portuguese (*calaim*, *calin* = Indian tin); see Dozy and Engelmann, *Gloss. des mots espagnols et portugais dérivés de l'Arabe*², (Leiden 1869), p. 245; Yule and Burnell, *Hobson-Jobson*², (London 1903), p. 143. The cradle of the word might be the district of Kalah in the peninsula of Malacca, which was celebrated for its tin-mines (see KALAH above). The Arabic geographers and lexicographers usually derive the name Kalī from al-Kalā in India (= Kalah, q. v.); so, for example, Yāqūt, *Mu'djam* (ed. Wustenfeld), iv. 162, 6; al-Firūzābādī, *al-Kāmūs* (Cairo 1301), iii. 71, 5; cf. also Ḥamd Allāh Mustawfī, *Nuḥat al-Kulūb* (ed. le Strange, Gibb Mem. Ser., xxiii.), p. 203, 6. At the same time the word — certainly erroneously — is also connected with an (alleged) tin-mining area al-Kalā in Ceylon (Yāqūt, i. 21, 13; iv. 162, 13), in Spain (Yāqūt, iv. 162, 15 sq.; Ḥamd Allāh Mustawfī, p. 203, 8) and in Yemen (Yāqūt, iv. 162, 17; al-Firūzābādī, *op. cit.*).

The most usual word for tin in Malay at the present day seems to be *timah*. At the same time we find with this meaning also *kaling*, *kaleng* — not *kelang*, as written by Langlès, Quatremère, Dozy-Engelmann, Yule-Burnell and others — which, according to the dictionaries, means primarily tin-plate, or tinned iron-plate (but nevertheless is the meaning tin an older one?); cf. Wilkinson, *A Malay-Engl. Dict.* (Singapore 1901), p. 497^b; Wilkinson, *An abridged Malay-Engl. Dict.* (Singapore 1919) and Klinkert, *Nieuw Maleisch-Nederl. Woordenboek* (Leiden 1916). It is obvious that the Arabic *Kalī* is to be traced back not to *Kalā'a* (*Kalah*) but to this Malay word. Quatremère, *op. cit.*, definitely puts forward some such derivation of *Kalī*, whereas Dozy-Engelmann, *op. cit.*, and Yule-Burnell, *op. cit.*, leave the question undecided. Is the similarity of name simply an accident? It is hardly possible that the Malay *Kaleng* itself is only a corruption of the Arabic *Kalī*. The further pos-

sibility has also been considered that the name of the district of Kalah — from the Malay *Kaling* — may mean simply "land of tin", a view expressed as long ago as Langlès in his edition of the voyages of Sindbad the Sailor in Savary's *Grammaire de la langue arabe* (Paris 1813), p. 499 = reprint (Paris 1814), p. 63. Yule and Burnell quote as an analogy the fact that the little state of Selangor (north of the town of Malacca) was formerly known as Nagri Kalang = "land of tin". To this we may add, quoting Wilkinson, *Malay-English Dictionary*, p. 526^b, that *Kēlang*, *Klang*, properly only the name of a district in Selangor and of a little township in this district, is also often extended to include the whole state of Selangor. Perhaps the origin of *Kalā'i* is to be sought in this Kēlang.

2. The name of a particular kind of sword, which is often mentioned, especially in the old Arabic poetry. Cf. for example, Aws b. Ḥaḍjar (ed. Geyer, *Sitz.-Ber. d. K. Akad. der Wiss. zu Wien*, phil.-hist. Kl., 1892), xii. 33; Ru'ba b. al-Adīdjādī (ed. Ahlwardt, *Sammungen alter arab. Dichter*, iii. 137), N° 49, 43; scholiast to Ṭarafa, *Mu'allafā* (in Arnold, *Septem Moallakat*, Leipzig 1850, p. 61). On Ṭarālibi, *Laṭā'if*, p. 102, 7, 130, 4 (quoted in Dozy, *Supplém. aux dictionn. arabes*, ii. 396^b) see Fleischer in the *Sitz.-Ber. d. Sächs. Gesellsch. d. Wissensch.*, 1886, p. 45. Cf. also Ibn Sa'īd, *al-Ṭabaḳāt*, I/i. 50, 21. This kind of sword is usually said to be of Indian origin (cf. for example al-Firūzābādī, *al-Kāmūs* under *ḫī'*) and, indeed, Indian swords were from early times famous among the Arabs and celebrated by the poets; on this cf. Schwarzlose, *Die Waffen der alten Araber* (Leipzig 1886), p. 127 sq. and A. Siddiqi, *Studien über die persischen Fremdwörter im klassischen Arabisch* (Göttingen 1919), p. 88 sq. As a more definite place of origin we usually find the Arab geographers and lexicographers giving that al-Kalā from which the tin of this name comes. Occasionally also the Syro-Arabian desert (the Bādiya) or the district of Ḥulwān in the 'Irāq is given as the place of origin; cf. *Lisān* and al-Firūzābādī, *al-Kāmūs* under *ḫī'*. The Yemen, which produced the finest swords next to India, is sometimes also described as the place of origin of the *kalī* sword, for example in the above quoted gloss to Ṭarafa's *Mu'allafā*. Jacob, *Altarabisches Beduinenleben* (Berlin 1897), p. 149, would like to decide in favour of Yemen, in particular the "fortress" (*kal'a*) of 'Aden, in support of which could be quoted the fact that in a poem by 'Alkama (ed. Socin), N°. 3, 4, there is mention of "pearls from Kalā" *Kalā'i*. Nevertheless, the derivation of the Arabic word from an East-Indian place al-Kalā (Kalah on Malacca? see KALAH) seems to me more probable. It is unnecessary to distinguish between two different kinds of sword, *kalī* and *kalā'i* (see Freytag, *Lex. Arab.-Lat.*, s. v. *kal'a* and *kalā'a*), in spite of Schwarzlose, *op. cit.*, p. 130.

(M. STRECK)

KALĪ KALĀ. [See ERZERUM].

KALĪLA WA-DIMNA is the title of an Indian mirror for princes, formed by the corruption of the Sanskrit names of the two principal characters, two jackals, Karatāka and Damanaka (in the old Syriac translation the forms are still Kalilag and Damnag); it was translated from Sanskrit into Pahlavi and thence into Arabic,

and became widely known in Muslim as well as Christian literatures.

1. The original work. The Indian original was composed by an unknown Vishnuite Brahman, according to Hertel probably about the year 300 A. D. in Kashmīr; the main argument for this, the reproduction of denarius by *dināra* is, however, not cogent, as the pronunciation of the *y* as *i* is older than Hertel supposes (see also A. Berriedale Keith in the *Journ. Roy. As. Soc.*, 1915, p. 505). It consisted of an introduction and five books each of which bore the name *tantra* i. e. "case of good sense". The book was intended to instruct princes in the laws of polity by means of animal-fables composed in perfect Sanskrit. The oldest descendant of the original work is the *Tantrākhyāyika*, rediscovered by J. Hertel (see *Tantrākhyāyika, die älteste Fassung des Pañcatantra*, transl. from the Sanskrit with introd. and notes by J. Hertel, 2 parts, Leipzig and Berlin 1909). A second recension of the original work is called the *Pañcatantra* (see J. Hertel, *Pañcatantra*, etc. in Harvard Oriental Series, Vols. 11—14); it has become a very popular book in India and is current there in countless versions. J. G. L. Kosegarten published an uncritical mixed text, Bonn 1848; on this Th. Benfey based his translation, *Pantschatantra, fünf Bücher indischer Fabeln, Märchen und Erzählungen*, transl. from the Sanskrit with introd. and notes, 2 parts, Leipzig 1859. In the introduction to this work the history of the migration of Indian literary subjects to Europe was first exhaustively investigated.

2. The Pahlavi translation. A rather early recension of the *Pañcatantra* was translated from Sanskrit into Pahlavi by order of the Sassanian king Khusrav Anūsharwān (531—579) by his physician Burzōe, whom he had sent to India for this purpose, and expanded by the addition of an appendix of fables from other Indian sources; of these the three first (chap. 11—13 in de Sacy) are taken from the twelfth book of the *Mahābhārata*, the other five (de Sacy's chap. 14, 15, 17, 18 and the story of the king of the mice, see below, not given in de Sacy) have so far not been found again in Indian literature, although there is no reason to doubt their Indian origin. Burzōe prefaced his translation with an autobiographical introduction which the vizier Buzurjdmihr, it appears, signed with his own name as an honour to the author (see *Burzōes Einleitung zu dem Buche Kalila wa-Dimna*, transl. and annot. by Th. Noldeke, *Schriften der wissenschaft. Gesellsch. in Strassburg*, Heft 12, Strassburg 1912).

3. The old Syriac translation. Burzōe's Pahlavi translation itself is lost; but by about 570 A. D. it had already been translated by the Periodont Būd into Syriac. This translation only survives in one manuscript, which was formerly preserved in the monastery at Mārdin, then in the library of the Patriarch of Mōsul and afterwards came into the possession of Mgr. Graffin in Paris. From a defective copy of this, which Socin had brought with him, Bickell prepared the first edition (*Kalilag und Damag, alte syrische Übersetzung des indischen Fürstenspiegels*, text and Germ. transl. by G. Bickell, with an introduction by Th. Benfey, Leipzig 1876). F. Schulthess was later able to prepare a much more reliable text based on three new copies which

Sachau had had prepared in Mōsul (*Kalila und Dimna*, Syriac and German, Berlin 1911).

4. The Arabic translation. About three centuries later 'Abd Allāh b. al-Muḳaffa' (see Ibn al-Muḳaffa', II, 404) translated Burzōe's Pahlavi version into Arabic. He wrote an original preface to his book, inserted in Burzōe's introduction probably the section on the uncertainty of religions, added after the first book of the *Pañcatantra* a chapter written by himself on Dimna's trial (chap. 6 in de Sacy), which by punishing the traitor satisfies the feeling of justice, outraged by the immoral teachings of this book, and apparently also added the chapter "monk and guest" (No. 16 in de Sacy). Ibn al-Muḳaffa's edition was originally a stylistic work of art intended for literary connoisseurs; but from the nature of its matter, it soon became very popular and therefore much corrupted in transmission. Even the numerous quotations in Ibn Kūtaiba's *ʿUyūn al-Akhbār* already no longer reproduce Ibn al-Muḳaffa's text word for word. The fairly numerous manuscripts of the work are all of late date. Sylvestre de Sacy's edition (*Calila et Dimna, ou Fables de Bidpai*, Paris 1816) is based on an inferior manuscript and arbitrarily emended from other manuscripts (see Noldeke, in the *Göttinger Gelehrte Anz.*, 1884, p. 676). In de Sacy's text, Ibn al-Muḳaffa's preface is preceded by a new preface by an otherwise unknown Bahnūd b. Saḥwān or 'Alī b. al-Shāh al-Fārisī, in which he gives an account of the history of the book in India, as well as a report said to have been written by Buzurjdmihr regarding Burzōe's mission to India with the commission to bring back the book; in several manuscripts this is followed by another story of Burzōe's being sent for a miraculous plant. Some manuscripts (see J. Derenbourg, *Directorium vitae humanae*, p. 323) add at the end two more fables, of the heron and the duck and of the dove, the fox and the heron from other, as yet unknown sources. This latter story is also inserted in the oldest Oriental reprint of de Sacy's edition, Būlaḳ 1249 (according to Chauvin, *op. cit.*, p. 13, in the University Library of Cambridge; a copy in my possession also); from this it has passed into the more recent editions printed at Cairo, Mōsul and Bairūt, the list of which in Chauvin, p. 13 sqq., according to Cheikh (see below), p. 6, is not yet complete. Valuable contributions to the criticism of de Sacy's text from Italian manuscripts are given by I. Guidi, *Studi sul testo arabo del Libro di Calila e Dimna*, Rome 1873. The story of the king of the mice and his ministers, not given in de Sacy, which is shown by the Syriac text to belong to the Pahlavi work, was published by Noldeke in text and translation in the *Abhandl. der Königl. Gesellsch. der Wissensch. zu Göttingen*, 1879, xxv. No. 4. The complete material from 16 Paris manuscripts for the story of the ascetic and the broken jug was given by Zotenberg in the *Journ. Asiat.*, Ser. 8, vii. (1886), p. 117—123.

While the numerous printed editions of the East in the main reproduce de Sacy's text, A. N. Tabbara (*Kalila et Dimna, trad. arabe copiée d'après un ancien manuscrit trouvé à Damas, avec notes*, Beyrouth 1322 = 1904) claimed to have discovered a new source for textual criticism; but his manuscript (of 1080 = 1675) is too modern to afford new material and his edition is, besides, bowdlerized. On the other hand L. Cheikh found

in the Lebanon monastery of Dair al-Shir a valuable manuscript of the year 749 = 1339, and made it accessible in an excellent edition: *La version arabe de Kalilah et Dimnah d'après le plus ancien manuscrit arabe daté*, Beyrouth 1905. I have not seen the new edition by Khalil al-Yāzidjī (ibid. 1908); that of Salim Ibrāhīm Ṣādir and Shāhin 'Aṭīya (ibid. 1910) is intended for school use. The modern European translations from de Sacy's text are given by Hertel, *op. cit.*, p. 393; to these may now be added M. Moreno, *La versione araba de Kalilah e Dimnah*, transl. into Italian, San Remo 1910 (see *Riv. d. Studi Orient.*, vi. 201).

5. Arabic versifications. The translation by Ibn al-Mukaffā' has been three times put into Arabic verse. The first version was made by his younger contemporary Abān al-Lāhīqī (q. v.; see also A. E. Krymski, *Abān al-Lāhīqī, le Zindīq (environ 750—815), versificateur arabe des recueils des apologues indo-persans. Essai sur sa vie et ses écrits, tiré de l'unique manuscrit de Souli...*, Bibl. Khéd. No. 594, et d'autres sources primitives. Appendices: a. Barlaam et Joasaph, essai littéraire-historique; b. Texte arabe intact d'al-Awrāq par Souli, éd. en collaboration avec Mirza Abdoullah Ghaffarov (also in Russian with Russian title) Moskva 1913; on the manuscript cf. Horovitz in the *Mitt. des Seminars für Orient. Sprachen*, Berlin, x. 35. This version is lost; with the help of it, but on the basis of the text of Ibn al-Mukaffā' about the year 1100, Ibn al-Habbāriya [q. v.] composed in ten days a poetic version in elegant and flowing language entitled: *Natā'idj al-Fiṭna fī Naẓm Kalīla wa-Dimna*, lith. Bombay 1317 (see Houtsma in the *Orient. Stud. Th. Nöldeke.... gewidmet*, i. 91—96). A third versification of the book entitled *Durr al-Hikam fī Amthal al-Hunūd wa'l-'Adjām* was completed by 'Abd al-Mu'min b. al-Ḥasan b. al-Ḥusain al-Ṣaghānī after 80 days' work on *Djumādā I* 20, 640 (Nov. 15, 1242). It exists only in a manuscript in Vienna (see Flügel, *Die arab., pers. und türk. Hdss. der.... Hofbibliothek zu Wien*, i. 469, No. 480).

6. The later Syriac translation. In the tenth or eleventh century a Syriac cleric translated the work from Ibn al-Mukaffā's text again into the then already dead language of his church; he endeavoured to give the book a Christian tinge and therefore amplified the verses of the Indian original, already much distorted in the Pahlavi translation, into long and weary moral discourses. He also made a series of mistakes in the translation. But as the text he used was much nearer the original than the most of our manuscripts, this translation is, in spite of its defects, of considerable value for textual criticism; it is edited by W. Wright, *The Book of Kalilah and Dimnah transl. from Arabic into Syriac*, London 1884. In contrast to the naturalism of the original, Keith-Falconer, the English translator of this version (Cambridge 1885) is even more prudish than the latter itself; on text and translation see Nöldeke in the *Göttinger Gelehrte Anz.*, 1884, p. 673 sqq., 1885, p. 753 sqq.

7. Persian prose and verse translations. According to Firdawsi in the *Shāhnāma* (see de Sacy in *Not. et Extr. X* (1818), i. 140 sqq.), Ibn al-Mukaffā's book was translated into Persian under the Sāmānid Naṣr b. Aḥmad (914—943) by order of the vizier Bāfāmī [q. v.]; but

it appears that this translation was never completed. By order of the same ruler the poet Rūdhakī (d. 304 = 916) put the book into Persian verse of which, however, only 16 verses have survived in quotations in Asadi's *Lughat-i Furs*, ed. Horn, p. 18 sqq.

Ibn al-Mukaffā's work was translated into Persian prose probably after the year 539 = 1144 (see Rieu, *Cat. of the Pers. MSS. in the Brit. Mus.*, p. 745/6) by Nizām al-Dīn Abū 'l-Ma'ālī Naṣr Allāh b. Muḥammad b. 'Abd al-Ḥamid, who dedicated his work to Bahrām Shāh of Ghazna [q. v., I, 586]. Naṣr Allāh in a new preface announces his intention of reproducing the work completely, including the aphorisms which seemed to him particularly valuable, with all the rhetorical adornment of artificial prose; he only gives Burzōe's introduction in ordinary prose, as an artificial style does not suit its matter. The work was lithographed in Tihirān in 1282 (= 1864; this disposes of Chauvin's doubts, p. 46/7), 1304 and 1305. Cf. de Sacy in *Not. et Extr. X*, i. 96 sqq.; E. G. Browne, *A Literary History of Persia*, ii. (London 1906), p. 349.

A metrical version of the book was given by Aḥmad b. Maḥmūd al-Tūsi Kānī, a contemporary of Djalāl al-Dīn Rūmī at Konya, whither he had fled before the Mongols from his native city of Tōs, for Sultān 'Izz al-Dīn Kaikā'ūs (643—662 = 1244—1263), probably based on Naṣr Allāh's translation, which, however, he nowhere mentions; see Rieu, *Cat. of the Pers. MSS. in the Brit. Mus.*, p. 582 sqq.; E. G. Browne, *A History of Pers. Literature under Tartar Dominion* (Cambridge 1920), p. 111.

This work was, however, put in the shade completely by the revision of Naṣr Allāh's translation done by Ḥusain Wā'iz Kāshifī (d. 910 = 1504, see KASHIFĪ), the court-preacher of Ḥusain Baikarā of Herāt [see ḤUSAIN MĪRZĀ]. In honour of Ḥusain's minister Aḥmad Suhailī he called his work *Anwār-i Suhailī*. He professed to be making the rhetorical artificial prose of Naṣr Allāh easier to understand by giving it in a new version but in reality he created an even more florid and verbose concoction, "full of absurd exaggerations, recondite words, vain epithets, far fetched comparisons and tasteless bombast and represents to perfection the worst style of those florid writers who flourished under the patronage of the Timurids" (E. G. Browne, *Lit. Hist. of Persia*, ii. 352, *op. cit.*, p. 503 sqq.). But as this style remained predominant in Persia and particularly in India down to the threshold of the modern period, the work had an unparalleled success and was printed in England (first complete edition London 1836), where it was used as a text book for the examination of English officials in India in Persian and repeatedly printed and lithographed in India and Persia, translated into several Indian dialects, into Pushtu, Georgian and all the principal languages of Europe (see Chauvin, p. 26—43). Ḥusain replaced the four prefaces at the vulgate of Ibn al-Mukaffā' by a new introduction from a so far unidentified source; de Sacy supposes (*Not. et Extr. X*, i. 59) that in it he was the older *Djāwīdān Khirad*, which al-Turtūshī was still able to use for his *Sirādj al-Mulūk* (Bulāḳ 1289), p. 97, 22—24, 185, 25 sqq. The Emperor of China Humāyūnfāl is persuaded to give up the idea of abdicating his throne by his vizier, who

tells him how the Indian king Dabshalim was directed by a dream to a cave in which an old man would give him a treasure. Of the latter Dabshalim keeps only the testament of Hōshang, king of Persia, which contains 14 pieces of advice for rulers, and with these he goes to Ceylon where the Brahman Bidpai or Pilpai explains each of these precepts by stories which form the separate chapters of the book.

Dislike of the extravagant and luxurious style of the *Anwār-i Suhaili* induced the Emperor Akbar (1556—1605) to commission his vizier Abu 'l-Faḍl to prepare a new edition of the work. This bears the title *'Iyār-i Dānish* and was completed in 996 (1578). It retains the arrangement of its model but restores Ibn al-Muḳaffā's preface and Burzōe's introduction. The work itself is not yet printed but a Hindustānī translation by Hafiz-uddin, entitled *Khīrad Afrōz*, was published by Th. Roebuck (Calcutta 1815) and by Eastwick (Hertford 1857, London 1867) on account of its elegant diction.

8. Turkish translations. Ibn al-Muḳaffā's work was twice translated into Eastern Turki from Naṣr Allāh's translation; see the manuscripts in Dresden in Fleischer, *Cat. Codd. Mss. orient. Bibl. Regiae Dresdensis* (Lipsiae 1831), p. 19, N^o. 136 and Munich in Aumer, *Die pers. und türk. Hdss. der K. Hof- und Staatsbibliothek*, p. 54.

Naṣr Allāh's edition was translated into old Ottoman Turkish (not into Eastern Turki, as Hertel, p. 407 says, relying on a somewhat misleading expression of Éthé's, *op. cit.*) by Mas'ūd for 'Umürbeg, prince of Aidin (d. 750 = 1349) (a MS. in the Bodleian, Marsh. 180). This prose text was put into verse by an unknown author who dedicated his work to Sulṭān Murād I (761—792 = 1359—1389); only about half has survived in a Gotha manuscript (see Pertsch, *Verz. der türk. Handschr. d. Herz. Bibl.*, p. 168, N^o. 189). A modern Ottoman prose version, which must have been made before 955 (1548), exists in the Bodleian MS. Marsh. 61; cf. H. Éthé, *On some hitherto unknown Turkish Versions of Kalilah and Dimnah in the Actes du 6e Congr. internat. des Orientalistes*, 2nd sect., i. 241 sqq.

'Alī h. Šālih, called 'Alī Wāsi' or 'Alī Čelebi, translated the *Anwār-i Suhaili* into Ottoman rhymed prose and dedicated his work to Sulṭān Sulaimān I (1512—1520) with the title *Humāyūn-nāma*; it has been several times printed in Būlāḳ and Stambul (see Chauvin, p. 50). Among the different European translations of the *Humāyūn-nāma*, the best known is the French of Galland, published after his death by Gueulette (Paris 1724); it was translated by Gonggrijp into Malay (Batavia 1866) and the latter version inspired a Javanese translation by Kramaprawira, which was put into Javanese verse by an anonymous poet. The luxuriousness of its language, in which the *Humāyūn-nāma* surpassed even its Persian original, induced the Mufti Yahyā Efendi and 'Othmānzāde, who died in 1139 (1726) as Kāḍī in Cairo, to prepare extracts from it (see Éthé, *op. cit.*, p. 242).

The *Anwār-i Suhaili* was translated, apparently with the assistance of the *Humāyūn-nāma* by Faḍl Allāh b. 'Isā Tashkendī at the instigation of Muḥammad Mūsā Bai Bāččā into modern Eastern Turki prose (to be more accurate into the language of Tashkend and Farghāna as the colophon,

or the language of Turkeṣtān and Farghāna as the title states); the latter then had the book lithographed by the calligrapher Mirzā Hāshim Khodjandī, according to the colophon in 1306 (1888); according to the title, the book was published in 1893.

Ibn al-Muḳaffā's book was translated from the Arabic into Ḳāzan Turki by 'Abd al-Allām Faiz Khān Oghlu and printed at Ḳāzan 1889 (University Press, *Orient. Bibliographie*, iii. 1421), in the same year at Wjatschakow (*ibid.*, iv. N^o. 3935) and in 1892 at Cirkova (*ibid.*, vi. 167, N^o. 3166). The introduction, however, was, according to a communication from Prof. Hommel, borrowed from the *Anwār-i Suhaili*.

9. The Mongol translation. The Mongol translation which Malik Iftikhār al-Dīn Muḥammad b. Abī Naṣr, a descendant of Muḥammad Bakrī, prepared in Ḳāzin has not survived (see Hamd Allāh Mustawfī, *Tārīkh-i Guzida*, ed. Browne, Gibb Mem. xiv. p. 844/5, transl. p. 233; Browne, *A Hist. of Persian Literature under Tartar Dominion*, p. 93, and correctly stated as early as Hammer-Purgstall in the *Journ. Asiat.*, 3rd Ser., i. 580). This statement is confused in Hādjīdī Khālifa, v. 239, who ascribes a translation into Turkish (*luḡat al-Turk*) to the ancestor Muḥammad Bakrī (see de Sacy, *Not. et Extr.* X, 175; Éthé, *op. cit.*, p. 243, who does not take notice of von Hammer's correct statement). As Flügel wrongly translates in *linguam Tatarorum*, Hertel (p. 414) wrongly identifies this reported Tatar translation with the above mentioned Ḳāzan Turki (so-called Tatar) translation quoted in Chauvin, p. 78, note.

10. The Ethiopic translation. An Ethiopic version, which was certainly based on a text, indigenous to Egypt, of the Arabic of Ibn al-Muḳaffā, is also lost: it is mentioned in a work composed in 1582 (see Wright, *Cat. of the Ethiop. MSS. in the Brit. Mus.*, p. 82b) (see Nöldeke, *Gött. Gelehrte Anz.* 1884, p. 676, note 5).

11. The Hebrew and older European translations. At the beginning of the twelfth century a certain Rabbi Jō'el translated Ibn al-Muḳaffā's work into Hebrew from a valuable manuscript which, however, already contained the false story of Burzōe's mission and the two not genuine fables at the end of the heron and the duck and of the fox, dove and heron. From the unique manuscript, exceedingly corrupt in the beginning, J. Derenbourg published this translation along with that of Jacob b. Eleazar of the xiiith century (*Deux versions hébraïques du Livre de Kalilah et Dimnah* in the *Bibl. de l'École des Hautes Études*, fasc. 49, Paris 1881). Jacob's version while based on a similar text to that of Jō'el is, however, very free, composed in elegant rhymed prose and full of Biblical locutions. The version of the Rabbi Jō'el was then translated into Latin by the baptised Jew John of Capua for Cardinal Ursinus between 1263 and 1278 with the title *Directorium vitae humanae* (cf. Johannes de Capua, *Directorium vitae humanae*, publ. and annot. by J. Derenbourg in the *Bibl. de l'École des Hautes Études*, fasc. 72, Paris 1887; a new edition based on manuscripts which he has recently discovered is to be expected from Hilka). With the exception of an old Spanish version, which reproduces the same text as Rabbi Jō'el much more faithfully than John of Capua does (see Clifford G. Allen, *Lan-*

cienne version espagnole de *Kalila et Digna*, *texte des mss. de l'Escorial, précédé d'un avant-propos et suivi d'un glossaire*, Thesis, Paris-Macon 1906), all later translations into Western European languages with the exception of quite modern ones are based on the Latin text of John of Capua (see Chauvin, p. 59—72; Hertel, p. 366—400).

12. The Greek translation. Towards the end of the xith century, Symeon son of Seth translated Ibn al-Muḳaffā's work fairly freely into Greek from a manuscript which was still free from later additions but contained the chapter on the king of the mice and his ministers. He called the book *Στεφανίτης καὶ Ἰχθυόλατῆς*, because he recognised in *Kalīla* the Arabic *ikhlil* and in *Dimna* the Arabic word for "trace". See *Στεφανίτης καὶ Ἰχθυόλατῆς. Quattro recensioni della versione greca del Kitāb Kalilah wa-Dimna*, pubbl. da Vittorio Puntoni, *Pubblicazioni della Soc. Asiat. Ital.*, ii. (1889). This version was in turn translated into Latin and German as well as into several Slavonic languages.

13. The Persian translation of the *Hitoṇpadēsha*. The later Sanskrit version of the *Pañcatantra*, the *Hitoṇpadēsha*, was translated very freely into Persian, probably in the reign of Akbar, by a certain Tādj al-Dīn, under the title *Mufarrīḥ al-Kulūb* (see de Sacy, *L'Électuaire des cœurs, ou traduction persane du livre indien intitulé Hitoṇpadēsa par Tadj-eddin, ms. persan de la Bibl. du Roi*, No. 386 in the *Not. et Extr.* X, i. 226—264). This work was then translated by the highly esteemed Hindūstānī author Mir Bahādur 'Alī Ḥusainī in 1217 (1802) into his mother tongue (see Garcin de Tassy, *Hist. de la Littér. hindoue ou hindoustanie*², i. 609 sqq.). A year later the latter was edited by Gilchrist as *Ukhlaqi Hindee or Indian Ethics*, transl. from the *Version of the celebrated Hitoṇpades or Salutory Counsel* by Meer Buhadoor Ulee, . . . under the superintendence of John Gilchrist, Calcutta 1803; cf. J. Hertel, *Die Akhlāq-e Hindī und ihre Quellen in der Zeitschr. d. Deutsch. Morg. Gesellsch.*, lxxii. 65—86, lxxiv. 95—117, lxxv. 129—200.

14. The older Malay translation. On a mixture of Ibn al-Muḳaffā's work and a Tamil text of the *Pañcatantra* is based the Malay version *Hikayat Kalila dan Damina*, which was first brought to notice by Wernrdly in his *Malische Sprachkunst*, Amsterdam 1736, and was published in 1876 by Gonggrijp at Leiden (2nd ed. 1892; cf. J. J. Brandes in the *Feestbundel aan Professor M. J. de Goeje*, Leiden 1891, p. 77 sqq.). This work was next translated into Javanese (Batavia 1878) and Maduresc (ibid. 1879).

15. Imitations of *Kalila wa-Dimna*. Setting aside the fables included in the *1001 Nights*, Ibn al-Muḳaffā's work has been three times imitated in Islāmic literatures. Ibn al-Habbāriya (see above) followed up his versification with the *Kit. al-Sādīḥ wa'l-Baḡhim* (see above p. 378 sq.; also printed in Cairo 1294). While this was only an imitation of the beast-fable, Muḥammad b. 'Abd Allāh b. Zafar al-Ṣakālī (d. 565/1169 or 568/1172) in his *Sulwān al-Muḳāṭ*, which he first composed in 545 (1150) and dedicated in 554 (1159) in a new edition to the *Kalīd* of Sicily, Abū 'Abd Allāh Muḥammad al-Kurashī, intended to produce a mirror for princes, like the *Kalila wa-Dimna*; in addition to beast-fables the book also contains

historical anecdotes. It was lithographed at Cairo 1278, printed Tunis 1279, Bairūt 1300; translated into Turkish by Kaṣa Khalīl-zāde (d. 1168—1754) and printed Stambul 1285; translated into Italian by M. Amari, *Solcan al-mota ossiano Conforti politici di Ibn Zafer, arabo siciliano del XII secolo*, Florence 1851, 1882 (Engl. transl. London 1852).

Another mirror for princes in which historic anecdotes are mingled with beast-fables for the edification of the reader, was composed about the end of the fourth century A. H. by the prince of Tabaristān, Ispahbadh Marzubān in the Persian dialect of his land. This work itself has not survived, but in the viith (xiiith) and viiith (xiiiith) century it was twice translated into classical Persian. This was first done at the court of the Saldjūk of Asia Minor, Sulaimānshāh (588—600 = 1192—1204) by his vizier Muḥammad b. Ghāzī of Malatya; his work, entitled *Rawḍat al-'Uḳūl*, exists in two manuscripts in Leiden and Paris. The *Marzubānnāma* of Sa'd al-Dīn-i Warāwīnī, composed between 607 and 622 (1210—1225), enjoyed greater popularity. It has been edited by Mirzā Muḥammad (Gibb Mem. Scr., vol. viii.).

Warāwīnī's version was translated by an unknown author into Ottoman Turkish (a copy of 848 (1444) in Berlin; see Pertsch, *Verz. der Türk. Hss.*, No. 444); this Turkish version was again translated anonymously into Arabic (MS. Berlin, see Ahlwardt, *Verz.*, No. 8472). A second Arabic translation, which, according to the Gotha MS. (see Pertsch, *Die Arab. Hss. der Herz. Bibl.*, No. 2692), is also based on the Turkish, was made by Ibn 'Arabshāh [q. v.]; there is another MS. in Paris (de Slane, *Catal.*, No. 3524) and it was lithographed in Cairo in 1278. The same author then rewrote his work in artificial prose in his *Fākihat al-Khulafā' wa-Mufāḥḥarat al-Zurafā'*, and added several new stories.

The same recension which had been translated into Ottoman Turkish and which is distinguished from Warāwīnī's vulgate as well as from the *Rawḍat al-'Uḳūl* by the tenth (concluding) chapter *dar bayān-i ziyādat-i umr wa-dawlat wa-zindagānī kardan bā dōst udushman*, was translated into Kazan Turkī by an unnamed writer for a certain Sulaimān Bek, son of Muḥammad Bek, and printed at Kazan in 1864 under the title *Kitāb Destūri Shāhī fi hikāyati Pādishāhi*.

(C. BROCKELMANN)

KALĪM, a Persian poet of India of the seventeenth century. His full name was MIRZĀ ABŪ ṬALIB KALĪM of Hamadhān. He lived first in Kāshān, so that he is also given the *nisba* Kāshānī as well as Hamadhānī. In the beginning of the reign of Djahāngīr (q. v., 1014—1037 = 1605—1627) he came to India to his court. A considerable journey took him in the following years to the 'Irāk, from which he returned in 1028 (1619) to India and lived there henceforth as court-poet of the Moghul Emperors. Under Djahāngīr's successor Shāh Djahān (1037—1068 = 1628—1656), whom he celebrated in an epic — the title of which is given in three forms: *Shāhān-shāhnāma*, *Shāhnāma* and *Pādishāhnāma* — he was given the title of honour *Malik al-Shu'arā'*.

He died in Kashmīr in 1062 (1652); the date 1061 (1651) has less authority. His *Divān* contains the usual kinds of poetry, especially *qaṣīdas* and *mathnawīs* of a panegyric character. Manuscripts of the *Divān* are frequent — a lithographed edition appeared at Lucknow in 1878 — but his *Shāhīnshāhnāma* seems only to exist in extracts. He is estimated to have left 24,000 verses.

Philol.*, ii. 238, 309, 311; more details are given in the Catalogues of manuscripts: Sprenger, *A Cat. of the... Mss. of the Libraries of King of Oudh.*, p. 453 sq.; Rieu, *Cat. of the Persian Mss. in the Brit. Mus.*, ii. 686 sq.; Pertsch, *Verz. der pers. Handschr. ... zu Berlin*, p. 920 sq.; Sachau-Ethé, *Cat. of the Persian ... Mss. in the Bodleian Library*, p. 692—4; and especially Ethé, *Cat. of Persian Mss. in the Library of the India Office*, p. 854 sqq., where the references in the *Tadhkirāt* to K. are given.

(H. H. SCHAEDEER)

KALĪM ALLĀH. *Kalīm* is one who speaks to you, following the equation *fa'il = mufa'il* (e.g. al-Baiḍāwī, ed. Fleischer, i. 445, 20, 583, 13, 595, 7); so in the *Lisān* (xv. 428 *infra*) which adds that the *Tahdhīb* (of al-Azhari) allows it to mean also one to whom you speak. In consequence, *Kalīm Allāh* has become the special honorific title of Mūsā, "He who spoke to Allāh", or, following the *Tahdhīb*, "He to whom Allāh spoke", because of several passages in the *Qur'ān* describing direct speech between Allāh and Mūsā — especially *Qur.* iv. 162, *wa-kallam Allāhu Mūsā taklīmā*, where the addition of the infinitive is said to show that literal and direct speech is meant and not a metaphor (*Lisān*, xv. 429, 3 sqq.; al-Ash'arī, *al-Ibāna*, ed. Haidarābād, 1321, p. 27 *infra*). In these passages the emphasis is always on Allāh's speaking to Mūsā, and this may be the cause of the extension of meaning of *kalīm* in the *Tahdhīb*. Further, the third stem of *kln* does not occur in the received text of the *Qur'ān*; but in *Qur.* ii. 254, there is a variant reading, *kālam Allāha* (al-Baiḍāwī, i. 130, 9) and this variant reading is given by al-Baiḍāwī as the source of the honorific title, *kalīm = mukālīm*. Yet in this passage there is no mention of Mūsā. Cf. also, the epithet with similar meaning *naḍjī*, applied to Mūsā in *Qur.* xix. 53, where al-Baiḍāwī (i. 583, 13) equates *naḍjī* with *munāḍjī*.

Bibliography. See under KALĀM. Add Goldziher, *Die Richtungen der islamischen Koranauslegung*, p. 174; and on variants in the *Qur'ān* text, pp. 1—54; Dozy, *Supplément*, ii. 486b.

(D. B. MACDONALD)

KALĪMA. For the primary meaning see under KALĀM. Each utterance of Allāh is a *kalīma*, whether it is the single creative word, *kun*, "come into being!" or a longer expression. Thus it is a synonym of *dīn* (Dozy, *Suppl.* ii. 286a); *kalīmātun baḳīyatan*, in *Qur.* xliii. 27 is interpreted as meaning the *tawhīd*, the first of the two articles of the Muslim creed (al-Baiḍāwī, ed. Fleischer, ii. 237, 25) and "two words" in *The 1001 Nights* (Calcutta ed., N. 834, iv. 159; in the Breslau text, iv. 327, it is *fard kalīma*) means the two articles. In this wide sense the *kalīma* of a poet can mean a whole *qaṣīda* by him (*Lisān*, xv. 428 *infra*; al-Baiḍāwī, i. 154, 17 on *Qur.* iii. 34) and

it is a question whether 'Isā is called a *kalīma* from Allāh (*Qur.* iii. 34, 40) because he is an expression of the *kalām* of Allāh, or because he was produced by the single creative word *kun*, and is thus a primary creation like Adam (al-Baiḍāwī, *loc. cit.*; *Lisān*, xv. 430 *supra*). From the doctrine of Allāh's *kalām* it follows that his *kalīmāt* must be innumerable (see KALĀM). But all contingent existences (*al-mumkināt*) have been produced by *kalīmāt* of Allāh, i. e. the creative commands *kun*; therefore the Speech of the Reality (*al-ḥaqīq*) is the self of the identities of the contingent existences, or the contingent existences themselves (*nafs a'yūn al-mumkināt*, *Dict. of Techn. Terms*, p. 1271, *infra*). The half page which follows the last reference shows how this is the bridge from the orthodox doctrine of Allāh's quality, Speech, to the Neoplatonic Chain and all its descendants.

Bibliography: Has been given above. See further on 'ABD AL-RAZZĀK (i. 61 sqq.); AL-INSĀN AL-KĀMIL (ii. 510 sq.).

(D. B. MACDONALD)

AL-ḲALKASHANDĪ, *nisba* from Ḳalkashanda near Ḳalyūb.

I. SHIHĀB AL-DĪN ABU 'I-'ABEĀS AḤMAD B. 'ALĪ B. AḤMAD B. 'ABD ALLĀH (in MSS. often briefly called AḤMAD B. 'ABD ALLĀH) B. AHĪ GHUDDA, died on Dhu'mādh II 10, 821 (July 16, 1418), wrote besides a number of smaller works a guide to the artistic composition of essays and reports, especially for the use of Egyptian government officials; just as Ibn Ḳutaiba [q. v.] in his *'Uyūn al-Akhbār* and the supplements to that work wished to afford the secretary class an encyclopaedic survey of the most important branches of knowledge of his time, so al-Ḳalkashandī's work, composed after 791 (1387), entitled *Ṣubḥ al-Ashū fī Shīn'at al-Inshā'*, presents in a much more comprehensive and systematic form practically the whole knowledge of his time and contains information of the utmost value, especially regarding the history and geography of Egypt and Syria. It has been printed as a publication of the Dār al-Kutub al-Ḳhadiwiya (al-Sultāniya) (Cairo 1331—8 [1913—9], 14 vols.). Cf. F. Wüstenfeld, *Die Geographie und Verwaltung von Ägypten nach dem Arab. des Abu 'I-'Abbās al-Calacaschandī* in the *Abh. d. Kgl. Gesellsch. d. Wiss. zu Göttingen*, phil.-hist. Cl., XXV (1879); W. v. Tiesenhhausen in the *Zapiski Vost. Otdj. Imp. Russk. Arch. Obč.*, i. 208; do., *Gesch. der Goldenen Horde*, i. 395; H. Sauvaire, *Extraits de l'ouvrage de K. intitulé Lumière de l'aurore pour l'écriture des hommes* (Arab. MS. of the Bodleian Library) in the *Mém. de l'Acad. de Marseille*, 1886, 1887; H. Lammens, *Correspondances diplomatiques entre les sultans mamlouks d'Égypte et les puissances chrétiennes* in the *Revue de l'Orient chrétien*, ix. (1904), 151—187, 359—392. A selection from it entitled *Ḍaw' al-Ṣubḥ al-Musfir wa-Djāny al-Dawḥ al-Muthmir* was printed in Cairo 1906. His second great work which he composed in 812 (1409) is a genealogy and history of the Arab tribes before Muḥammad with an alphabetical list entitled *Nihāyat al-Arab fī Ma'rifat Ḳabā'il al-'Arab*, MSS. in Berlin (Ahlwardt, *Verzeichn.*, N^o. 9382/3) and London (*Cat. Codd. Mss. Or... in Mus. Brit.*, N^o. 341/2); according to Lammens in the *Mél. de la Fac. orient. de Beyrouth*, iii. 150 N. 1, it has been printed in Baghdād n. d.; in this

text the author is called Muḥammad b. 'Abd Allāh; Lammens concludes from this that the authors of the *Ṣubḥ* and of the *Nihāya* were different individuals; but here either the father is confused with the son (see N^o. 2) or the printed book contains the work of the son. The alphabetical list was worked up by Abu'l-Fawz Muḥammad Amin al-Suwaidi in 1229 (1814) into a genealogical survey and extended to the Caliphs and Sultāns with the title *Sab'ik al-Dhahab fī Ma'rifat Kabā'il al-'Arab*, lith. Baghdād 1280, Bombay 1296. After the year 818 (1415) al-ḲalḲashandī wrote a supplement to it entitled *Ḳalā'id al-Djūmān fī 'l-Ta'rif bi-Ḳabā'il 'Arab al-Zamān*, MSS. in Berlin (Ahwardt, *Verzeichn.*, N^o. 9384) and London (Rieu, *Suppl. to the Cat. of the Arabic Mss. in the Brit. Mus.*, N^o. 595); a synopsis by al-Suyūṭī in Berlin (Ahwardt, *Verzeichn.*, N^o. 9385).

2. His son NAḌīm AL-Dīn MUḥammad imitated his two chief works, the *Ṣubḥ* under the title *Ḳalā'id al-Djūmān fī Muṣṭalah Mukātabāt Ahl al-Zamān* (see Rieu, *Suppl.*, N^o. 1020) and the *Nihāya* under the title *Nihāyat al-'Arab fī Ma'rifat Ansāb al-'Arab*, dedicated to the Grand Emir of the Arabs of the East and of the West Zaim al-Dīn Abu 'l-Djūd Baḳr b. Raṣhīd al-Zainī; the autograph of the year 846 (1442) in the Bibl. Nat. of Paris (see de Slane, *Cat.*, N^o. 2049), another MS. in Cairo, Khed. Bibl. (*Fihṛ.*, v. 170; author Muḥammad b. 'Abd Allāh, see Vollers, *Zeitschr. d. Dtsch. Morg. Gesellsch.*, xliii. 118; on the Baghdād printed text see above).

3. ABU 'L-FATH IBRAHīm B. 'ALī B. AḤMAD AL-MAḲḌISī, BURHĀN (DJAMĀL) AL-Dīn, d. 922 (1516), Traditionist, whose works are detailed in Brockelmann, *Gesch. d. ar. Litt.*, ii. 78.

Bibliography: Wüstenfeld, *Geschichtschreiber*, N^o. 467; Brockelmann, *op. cit.*, ii. 134.

(C. BROCKELMANN)

KALMUCKS, the Turkish name for a Mongol people who call themselves OIRAT. In Radloff's *Wörterbuch* (ii. 272), the forms Ḳalmaḳ (Central Asian dialects), Ḳalmīḳ (Volga dialects; whence the Russian word) and Kalmuk (Ottoman; whence the Crimean Tatar expression *ḳalmuk-i bad-maḳhūṭ*) are given. In Central Asia the Turkish speaking Teleuts are called "White Kalmucks" (Aḳ Ḳalmaḳ) and the Western Mongols proper "Black Kalmucks" (Ḳara Ḳalmaḳ). The word is derived (probably only by a popular etymology) from the verb *ḳalmaḳ* "to remain"; it is said to denote the Oirat, who "remained" pagans, in contrast to the Dungsans (the Chinese-speaking Muḥammadans), who "returned" (verb *donmek*) (according to the well known Muslim idea) to Islām.

The word Ḳalmaḳ seems first to occur in the *Muḳaddima* (not included in the printed edition) to the *Zafar-Nāma* of Sharaf al-Dīn Yazdī, not, it seems, as an ethnographical term but as a geographical one. It is said that after the expulsion of the Mongol dynasty from China only their "original territory" (*yurt-i aṣlī*), i. e. Ḳaraḳorum and Ḳalmaḳ remained in their possession; the "Emirs of the Oirat" later deprived them of this also.

From the time of Wais Khān (1418—28) the Mongols on the Ili [q. v.] had to fight against the "infidel Ḳalmaḳ"; accounts of these wars are found, notably in the *Ta'rikh-i Rashīdī* (ed. Ney-Elias, see Index). Wais Khān was twice taken prisoner by the Ḳalmaḳ and had to give his sister

in marriage to the chief of the Ḳalmaḳ Isān Tāishi (properly Esen Tāishi). Toghon, father of the latter, was then ruling in Mongolia on the Chinese frontier, where he was succeeded in 1439 by Esen Tāishi. After the death of Esen Tāishi (1455) the great nomad kingdom of the Oirat broke up; individual princes are mentioned from time to time later, as ruling in the neighbourhood of Muslim lands; in the beginning of 864 (end of 1459) a Ḳalmaḳ embassy appeared in Herāt. According to Chinese sources, the Oirat in 1552 had to submit to Altan Khān, prince of the Tūmet. The name Ḳalmaḳ seems to have been extended by the Muslims to this kingdom. According to the Ottoman Saifī (wrote 990 = 1572), the prince of the Ḳalmaḳ bore the title *Altun Khān* (Turk. *Altun* = Mongol *Altan*); cf. the text in the Leiden MS. N^o. 917 and the translation by Ch. Schefer in Abdoul Kerim Boukhary, *Histoire de l'Asie Centrale*, transl. p. 292 sq. The Muḥammadan sources also report the restoration of the Oirat kingdom under Ḳhara Ḳhula (d. 1634). In Turkestan the Ḳalmaḳ, during this period also, were regarded as powerful foes to Islām. The prince of the Ḳazaḳ (Kirgiz), Tawakkul Khān, had to fly before them to Tashkend, where he was received by Nawrūz Aḥmad Khān or Barāḳ Khān (d. 1556); but Nawrūz Aḥmad is said to have replied to his guest's appeal for help that ten such princes as they two could do nothing against the Ḳalmaḳ. At a later date on the other hand we find Tawakkul described in Russia as "Czar of the Ḳazaḳ and of the Kalmucks" on the occasion of his embassy to the Czar Feodor (1594), perhaps because a few bodies of Kalmucks had attached themselves to him; according to the *Abdallāh-Nāma* (MS. of the Asiatic Museum, N^o. 574, f. 352^a) there were also Kalmucks (Ḳalmaḳān) in Tāshkend in the army of Bābā Khān (a son of Nawrūz Aḥmad) about 1582. In the winter of 1603—4 took place the first raid of the Kalmucks into Ḳhwārizm (Abu 'l-Ghāzī, ed. Desmaisons, text p. 275). Soon afterwards, under the Czar Wassilij Shuiskij (1606—1610), the Kalmucks for the first time entered into relations with the Russian government, although it was not till 1632 that Kalmucks settled on the Volga on a large scale. This branch of the Kalmucks had separated from their kinsmen, under the leadership of Kho Urluk, as early as 1618. The land of the Volga Kalmucks therefore did not belong to the empire founded by Ḳhara Ḳhula, although the relations between the two branches of the people had not yet been broken. Representatives of the Volga Kalmucks still appeared at the *ḳurultai* (parliament) of 1640; Batur, the son and successor of Ḳhara Ḳhula gave his daughter in marriage to the grandson of Kho Urluk. By the same *ḳurultai* the dominance of Buddhism was firmly established among all branches of the Kalmucks. The progress made by Islām described in the *Ta'rikh-i Rashīdī* (p. 91) in connection with the above mentioned marriage contract apparently was not maintained. Most of the Muslim territories of Turkestan were under the suzerainty of the Buddhist Kalmuck prince on the Ili, the founder of the last great nomad empire in Central Asia, until the destruction of this empire by the Chinese in 1758 (subjection of Kāshgharia in 1682, conquest of Tāshkend in 1723); as late as 1749 the regent (*Atalik*) of

Bukhārā and his opponent had to submit a dispute to the verdict of an embassy of the Kalmuck prince (*Tūa-i Kalmāk*) (Muḥammad Wafā Karminagī, MS. of the Asiat. Mus., c. 581^b, f. 101^b sqq.). A great part of the pasture grounds of the Kazak was at once occupied by the Kalmucks. Islām was then almost completely driven out of the southern part of the modern Semirjetje. From this period date several Buddhist monuments, including Tibetan inscriptions. It was only after the decline of the Kalmuck empire that these areas were again occupied by the Muḥammadan Kazak. The wars of the Volga Kalmucks with the Crimean Tatars and their raids into Khwārizm had less effect on Islām; from 1724 the Kalmuck chiefs on the lower course of the Volga were simply considered governors (*namjestnik*) of the Czar of Russia. No connection existed then with the ruler on the Ili. The decision of the "governor" Ubushī and a great part of his people to migrate from Russia and settle on Chinese territory proved disastrous for the Kalmucks. During this migration heavy losses were inflicted on the Kalmucks in Central Asia, especially by the Kazak (1771). Henceforth the Kalmucks were of no political significance either in Russia or in China. During the Muḥammadan rising in the Ili valley the great Kalmuck temple of Buddha near Kulджа was destroyed (Radloff, *Aus Sibirien*, ii, 403). After the Russian revolution an "autonomous Kalmuck territory" (*avtonomnaja kalmizkaja oblast*) arose in what was formerly the government of Astrachan, between 45° and 48° N. Lat. and 44°—48° E. Long. A portion of the Kalmucks in Semirjetje (less than 2000 souls) which has adopted Islām and taken to agriculture is called Sart-Kalmak.

KALPAK (т.), A Central Asian headdress, which was introduced by the Turks into Europe and became widely distributed there. The word *kalpak* is found in the most diverse Turkish dialects in meanings which are detailed by W. Radloff in his *Versuch eines Wörterbuches der Turkdialekte*, ii, 268 sq. (cf. also *kalabak*, ii, 234). The Eastern Turkish *tülpäk*, Djag. East. Turk. *tälpäk*, Kirg. and Karakirg. *telpäk*, meaning cap, felt cap (cf. also the French *talpack*) is certainly related. Cf. thereon Pavet de Courteille, *Dict. turk-oriental*, p. 408. In its original form the *kalpak* is a cone-shaped sheepskin cap, flattened on top, covering the head down to the eyes and ears, for the manufacture of which skins of darker colour, in people of rank particularly a black astrachan, were used and then trimmed with softer fur of a brighter colour. Such caps have been worn among almost all Tatar tribes from ancient times to the present day. In earlier times, as G. Rosen suggests, they were a part of the national costume also among the Ottomans. Nevertheless, neither this headdress nor the word *kalpak* can be proved to have existed before the middle of the xviii century. The *kalpak* must, very soon after this, under the arabicising influence of Islām,

have been driven out by the turban in its countless forms (cf. 286 styles in Michael Thalmann, *Elenchus librorum or. miss*, Vienna 1702, vi, 29 sq. on Codex Ture. VII, Bologna). But the *kalpak* remained as the distinguishing headgear of prominent Christian subjects of the Sublime Porte, with, it is true, considerable alterations in its original appearance. In place of the fur a thick black felt was used and the shape became swollen almost like a melon. Of these headdresses three kinds were especially known, called after professions which particularly wore them, viz. the *kalpak* of the physicians, of the money-changers and of the interpreters (*hekim, şarrāf* and *terdjunān kalpagh*). As late as the beginning of the xix century the embassy interpreters, who were not Turkish subjects, had to wear the *kalpak*, when they went on business to the Porte. In the house the *kalpak*, which, on account of its weight, was too hot and uncomfortable for indoor wear, was placed on a stand elaborately carved, often painted and adorned with gilding, the *kalpaklık*, a piece of furniture, which was considered the sign of a distinguished and prosperous Christian household. When, with the coming of the fez, the *kalpak* threatened to go entirely out of use among the Christian population also, an edict (*firmān*) of the grand vizier 'Izzet Meḥmed Pasha ordered in 1842 that all non-Turkish subjects should wear the *kalpak* instead of the fez. But this order was not long enforced. At the present day the *kalpak* is still made and worn only by Armenians. The fine lambskins stretched over pasteboard shapes were at one time imported from Ural in Russian Tartary, and also from Khiva and Bokhārā, and manufactured and sold on the so-called *Kalpakdžilar Çarşusu* in Stambul. Among the peoples who adopted the name *kalpak* for their corresponding headdress, special mention may be made of the Slav tribes of the Balkans (cf. Slav *klobuk*; Greek *κολβάκι*). Down to 1763 the *kalpak* was also the headdress of the Hungarian Hussars. The high felt cap made of the finest arctic furs and adorned with valuable jewelled clasps, which is still worn as part of the state-dress of Hungarian magnates and Rumanian boyars, is also called *kalpak* (Magyar *kalpag*, cf. also *kalap* = hat). The Hungarians may have adopted the headdress from the Ottomans in the beginning of the xviii century. Cf. also J. Szendrei, *A magyar viselet történeti fejlődése*, Budapest 1905, s.v. Among the Hussars of the German army, where the *kalpak* was worn since the time of Frederick the Great, *kolpak* means the cloth tab above in the bearskin, the colour of which served to mark the regiment. Under the First Empire in France the *kalpak* (*colback*) was introduced into the French army as the headdress of certain arms; under the Second Empire the mounted chasseurs wore a cap called *talpack*.

Bibliography (in addition to the works quoted): cf. Ch. White, *Häusliches Leben und Sitten der Türken*, ii. (Berlin 1845), p. 299 sq.; d'Ohsson, *Tableau de l'Empire Ottoman*, ii. (Paris 1790), 137; *Magyar Nyelvtör.* iv. (Budapest 1875), 400 (G. Szarvas); also vi, 365. (FR. BABINGER)

KALYŪB, a fair sized town in Lower Egypt with a railway station, 10 miles north of the central station at Cairo on the Cairo-

Alexandria railway. The town proper lies about a mile west of the station and about 3 miles from the right bank of the Nile, on the Tur'at al-Sardūsiya. Down to the middle of last century Kalyūb was the capital of the Mudiriya al-Kalyūbiya. Under the Khedive Ismā'īl the Diwān of the Mudiriya was moved to Benha. Since that date Kalyūb has been a *markaz* (district-capital). Branch lines run to Zakāzīk and the Barrage du Nil. The majority of the inhabitants are Muslims. According to 'Alī Pasha Mubārak, Kalyūb possesses a Shari'a court (*maḥkama Shar'iya*) and a hospital. Cf. 'Alī Pasha Mubārak, *al-Khiṭaṭ al-djādida*, xiv. 114 sqq.; Baedeker, *Egypte* (1914), p. 34; Samibey, *Kānūs al-A'lām*, Stambul 1314 (1896), v. 3693b, where (line 2—3) we should read *šinālinde* for *genūninda*.

A Greek *Καλλίερα* — not yet, however, found — is at the base of the name. In the *Sealae* it is found under the form *Καλιωπε* (Maspero-Wiet, *Matériaux pour servir à la géogr. de l'Égypte*, Series i. 151).

Historical: John of Nikius mentions Kalyūb in his *Chronicle*, Chap. 113 (ed. Zotenberg, p. 321, 509). 'Amr b. al-'Ās [q. v.] had a bridge thrown over the canal at this town to be able to conquer the other towns of the province of Miṣr (circa 20 = 641). In 549 = 1154/5 the Caliph al-Zāhir granted Kalyūb as a fief to his great favourite Naṣr b. 'Abbās. Usāma b. Munqidh so depreciated this present in the eyes of Naṣr and his father that it became one cause of the murder of the Caliph by Naṣr and 'Abbās (Ibn al-Aṭhīr, *al-Kāmil*, ed. Tornberg, xi. 126; Usāma b. Munqidh, ed. Derenbourg, i. 245; Ibn Muyassar, ed. Massé, p. 93). In the fighting between Selim I and Tumān-Bey, Kalyūb did not escape the raids of the Arabs (Ibn Iyās, *Ta'rikh Miṣr*, under Ṣafar 923 = March 10, 1517). For embassies etc. Kalyūb was the last stage before Cairo. Thus, for example, in Rabi' I 925 (= March 1519 'Alī Pasha Mubārak wrongly gives R. I 25, 923 for R. I 23, 925), Khazir Bey had the Sultān's envoy received there with the greatest ceremony by the Kādi Barakāt b. Mūsa (Ibn Iyās, *op. cit.*, iii. 109). The town had again to suffer exceedingly from the extortions and plundering of the half-savage soldiers and Mamlūks in the years 1219 and 1220 (1804 and 1805); cf. al-Djabbartī, *Adjīb al-Aṭṭār*, under the years quoted. Kalyūb, as a result of its situation close to the gates of Cairo, may not have escaped on other occasions the effects of the political happenings in the capital. Ibn Duḥmāk (809 = 1406) and al-Zāhiri (839 = 1434/5) report, that in their day Kalyūb was for the most part lying in ruins.

Economic: Almost all sources praise the wealth of Kalyūb in gardens and trees, among which the acacias (*sanf*) are mentioned as particularly valuable. In spite of the restrictive edicts of al-Malik al-Kāmil, the ground was very badly farmed, so that Kalyūb's prosperity suffered considerably (cf. 'Othmān b. Ibrāhīm al-Nābulusi — wrote 637—648 = 1240—1249; Brockelmann, *Gesch. d. arab. Litt.* i. 335 — who devotes a longish section to Kalyūb in his *Luma' al-Kawānīn al-Muḍ'ā fi Daw'awīn al-Diyār al-Miṣriya*; quoted in 'Alī Pasha Mubārak, *op. cit.*, 114 sq.). — In 1240 (1824/25) Muḥammad 'Alī built a cotton mill in Kalyūb and later barracks and a remount depot were established there. The al-Shawāribī

family deserves special mention for its share in the economic development of Kalyūb, where they also built a *sear* with a mosque.

There are six mosques in Kalyūb, in one of which the Friday service is held. Among these the "great Mosque", formerly called *Djāmī al-Zaiuabī*, with its great *Maḥalla*, made a great impression on Ibn Duḥbair (578 = 1182/3 in Egypt; cf. Brockelmann, *op. cit.*, i. 478; 'Alī Pasha Mubārak, *op. cit.*, p. 114). According to the inscriptions on its minbar and above the door it was renovated in 1148 = 1735/6 by the Shaikh al-'Arab of Kalyūb, Ahmad al-Shawāribī. Among the tombs of saints the most important is that of Sidi 'Awwād with popular amusements and horse-racing.

'Alī Pasha Mubārak gives a very full account of the above mentioned al-Shawāribī family as one of the most prominent in the town. Al-Malik al-Zāhir Baibars gave them charge of the new bridge over the Baḥr Abū'l-Manadīdja (cf. also al-Kalkāshandī, transl. Wustenfeld, p. 28) and granted them large estates as fiefs and an annual pension (which lasted till 1275 = 1858/9). Muṣṭafā Pasha granted them the supervision of the whole province of al-Kalyūbiya. Various members of the family also filled important posts in the administration, besides the office of Shaikh al-'Arab of Kalyūb, which seems to have been hereditary with them. Sulaimān al-Shawāribī's patriotism cost him his life: in Raddjāb 1213 (Dec. 1798) he was beheaded by the French for his part in an attempted rising (cf. al-Djabbartī, *op. cit.*, iv. 37 sq.).

According to Ibn Dī'ān (cf. 'Abd al-Laṭīf, *al-Ifāda wa'l-I'tibār* etc., French transl. by de Sacy entitled *Relation de l'Égypte* etc., p. 595) the province of al-Kalyūbiya comprised in his time (777 = 1375/76) 59 townships and yielded a revenue of 419,054 dinars (but on p. 599 a list of 61 townships is given). Ibn Duḥmāk gives 60 with a total revenue of 383,140 dinars. In the time of the French expedition the revenues of the province from the estates (*Descr. de l'Égypte*, i. 306 sqq.) amounted to: 1. for the payment of the *mīrī* 3,390,742 dinars; 2. for the *kushūfiya* 1,710,462 dinars; 3. for the *fā'iz* 15,119,199 dinars.

The Baḥr al-Sardūs — according to legend built by Pbaraoh and enlarged by his 'vizier Hāmān' (Ibn Duḥmāk, al-Kalkāshandī) — was, according to the enthusiastic description in Ibn Duḥmāk (whom al-Kalkāshandī follows), a large canal, apparently with water always in it. This is indicated also by two documents of the years 891 (1486) and 1061 (1650/1) (quoted by 'Alī Pasha Mubārak) in the possession of the al-Shawāribī family. Al-Kalkāshandī notes that the canal in his time had disappeared and that its place had been taken by the Abū 'l-Manadīdja canal, (cf. Wustenfeld, *op. cit.*, p. 25 sq.); Maspero-Wiet, *op. cit.*, p. 105). According to 'Alī Pasha Mubārak, there was only a small canal in his time: the Tur'at al-Sardūsiya. Ibn Khallikān, Buṭrus al-Bustānī and 'Alī Pasha Mubārak give several scholars, who have the *nisba* al-Kalyūbī. The best known of them is Shihāb al-Dīn al-Kalyābī (see the following article).

Bibliography: Besides the works quoted above: Ibn Muyassar, *Akhbār Miṣr*, ed. H. Massé (Cairo 1919), p. 23, 60, 93; Abū Shāma,

Kitāb al-Rawḍatāin in the *Hist. des Crois.*, iv. 147; al-Dīmashqī, *Nukhbat al-Dahr fī 'Adwā'ib al-Barr wa 'l-Baḥr*, ed. Mehien (Copenhagen 1874), p. 231; al-Makrīzī, *al-Khitaṭ* (ed. Wiet), i. 313, Chap. 25, ii. 85, note 1; Ibn Duḡmā, *Kitāb al-Intisār*, ed. Vollers, with title *Descr. de l'Égypte* (Bulāḳ 1309, v. 43, 47; al-Kalkāshandī, *Subḥ al-Ashā* in Wustenfied, *Calcasch-andi's Geographie u. Verwaltung von Ägypten*, (Abh. d. Kgl. Gesellsch. d. Wiss. zu Göttingen, xav. [1879]), p. 25 sq., 28, 109; al-Zāhiri in De Sacy, *Chrestomathie arabe*² (Paris 1826), ii. 5; Ibn Iyās, *Tārīkh Miṣr* (Bulāḳ 1311), ii. 54, 109, 157, 197, 204, iii. 109, 110, 170, 192, 206, 286, 303, 318; d'Anville, *Mémoires sur l'Égypte*... (Paris 1766), p. 39; al-Djābartī, *'Adwā'ib al-Athār fī 'l-Tarā'ijim wa 'l-Akhbār* (Cairo 1322), iii.; 'Alī Pasha Muḥārak, *al-Khitaṭ al-Diādida*... (Bulāḳ 1305), xiv. 114—119 (cf. also the article EGYPT).

(A. RICHTER)

AL-KALYŪBĪ, AHMAD B. AHMAD B. SALĀMA, SHIHĀB AL-DĪN, an Arab author, pupil of the celebrated Shāfi'ī Faḳīh Shams al-Dīn (al-Shams) al-Ramlī (d. 1004 = 1596), was regarded in his day as an unchallenged authority and died towards the end of Shawwāl 1069 (July 1659). He composed numerous works, of which 21 have survived, in the fields of Fiqh, geography, medicine, secret sciences and Adab. To the 17 works mentioned by Brockelmann, *op. cit.*, we have to add 1. a *Kit. al-Mudjarrabūt* in Göttingen (see *Verzeichn. der Hss. im Preuss. Staate*, i. Hannover, 3. Göttingen, iii. Berlin 1894, N^o. 100); 2. *Mīrādī al-Nabī* in the Zāhiriya or 'Umūmiya in Damascus, see Ḥabīb al-Zaiyāt, *Khazā'in al-Kutub fī Dimashk wa-Dawā'iḥā* (Cairo 1902), p. 74, N^o. 40; Houtsma, *Cat. d'une coll. de Mss. arabes et turcs* etc. (Leiden 1889), N^o. 241; 3. *Risāla fī Ma'rifat Asmā' al-Bitād wa-'Urūḡhā wa-Aṭwālā* in Princeton, see Littmann, *A list of Arabic Mss. in Princeton Univ. Library* (Princeton—Leipzig 1904), p. 9, N^o. 40; 4. a *Kit. Hikāyāt*, anecdotes of pious individuals, different from the *Kit. al-Nawādir* in the Brit. Mus., see Ellis and Edwards, *A Descr. List of the Arabic Mss. acquired... since 1894* (London 1912), p. 62, Or. 7018. Of his works there have been printed: 1. *Hāshiya* to al-Maḥallī's (d. 864/1400) commentary on al-Nawawī's *Minḥāj al-Tālibīn*, along with the *Hāshiya* of Shihāb al-Dīn al-Burullusī, Cairo 1306, 1318, 4 vols.; 2. *K. al-Ṣalawāt*, Bulāḳ 1300; 3. *al-Tadhkira fī 'l-Ṭibb* on the margin of al-Suwaydī's *Tadhkira*, Cairo 1302, alone Cairo 1305; 4. *Hikāyāt Gharība wa-'Adjiba* or *Hikāyāt wa-Gharā'ib wa-'Adwā'ib wa-Lafā'if wa-Nawādir wa-Fawā'id wa-Nafā'is*, usually briefly quoted as *Nawādir al-Kalyūbī*, which was only published after his death; see *The Book of Anecdotes, Wonders, Marvels, Pleasantries, Rarities and Useful and Precious Extracts*, ed. by W. Nassau Lees and Mawlawī Kabīr al-Dīn, Calcutta 1856, 2nd ed. 1864, also in Cairo several times since 1274, last ed. 1323, 1328, the conclusion of which differs from the Calcutta edition.

Bibliography: al-Muḥibbī, *Khulāṣat al-Athar min A'yūn al-Karn al-Hudfashar*, i. 175; after this 'Alī Bāshā Muḥārak, *al-Khitaṭ al-Diādida*, xiv. 118; Sanguinetti, *Journ. Asiat.*, 1865, ii. 351; Leclerc, *Hist. de la Médecine arabe* (Paris 1876), ii. 303; Brockelmann, *Gesch. der arab. Lit.*, ii. 364. (C. BROCKELMANN)

KAMĀL AL-DĪN ABU 'L-KĀSIM 'OMAR B. AHMAD... B. ABĪ DJARĀDA B. AL-'ADĪM AL-'UḲAILĪ, historian of Aleppo, a member of the highly esteemed family of notables, the Banū Djarāda, whose ancestor had migrated from Baṣra into Syria with other members of the tribe of 'Uḳail about 200 (815) on account of a pestilence and had settled as a merchant in Aleppo, born in Dhū 'l-Hijjdja 588 (Dec. 1192; in the *Fawāt* wrongly 586), the son of a Ḥanafī ḳāḍī, whose office had been hereditary in the family for four generations. After studying in his native city, in Jerusalem, to which his father took him in 603 (1206/7) and again in 608 (1211/12), Damascus, in the Irāk and in the Hūdūd, he became in 616 (1219) professor in the madrasa of Shādbakht in Aleppo. He later filled the office of ḳāḍī there and served the two last Aiyūbids, al-Malik al-'Azīz (613—634 = 1216—36) and al-Malik al-Nāṣir (634—658 = 1236—1260) as vizier and several times, by their command, acted as ambassador to Baghdad and Cairo. When his native city was captured and destroyed on Ṣafar 9, 658 (Jan. 26, 1260) by the Tatars, he fled with al-Malik al-Nāṣir to Egypt. Hūlāgū summoned him back to Syria as Chief ḳāḍī, but he died in Cairo on Djumādā I 29, 660 (April 21, 1262) before he could obey.

His principal work was an alphabetically arranged history of the famous men of his native city, on the model of those of *Khataib al-Baghdādī* [q.v.] and Ibn 'Asākir [q.v.] in ten (according to some in 40) volumes entitled *Bughyat al-Talab fī Tārīkh Halab*, which on account of its too great bulk was never completed in a fair copy and was therefore already scattered to all the winds before the Mongol invasion under Tīmūr, so that even Ibn al-Shihna (see below) only knew of one volume of it (see *Cat. Codd. Arab. Bibl. Acad. Lugd.-Bat.*, ii. 82); odd parts are preserved in Paris (*Bibl. Nat.*, de Slane, *Cat.*, N^o. 2138), in London (*Cat. Codd. Mss. Or. in Mus. Brit.*, Pars ii., N^o. 1290) and perhaps in Constantinople, Aya Ṣofya, N^o. 3036 (see Horowitz, *Mitt. Sem. Or. Spr.*, Berlin, x. 60, N^o. 51). Out of this he made a synopsis arranged chronologically entitled *Zubdat al-Halab fī Tārīkh Halab* down to 641 (1243), but died before he had finished the fair copy of this work either. The Paris MS. (de Slane, N^o. 1666, another in St. Petersburg, which, however, is perhaps only a copy of the Paris one, see V. Rosen, *Not. sommaires des manusc. arabes du Musée Asiat.*, St. Pétersbourg 1881, p. 98, N^o. 160) has been utilised by G. W. Freytag, *Selecta ex historia Halebi*, Lutetiae Par. 1819; *Regnum Saahd-aldaulae in oppido Halebi*, Bonn 1820; *Historiens orientaux des Croisades*, iii. 691—732; H. Derenbourg, *Vie d'Ousama* (*Publ. de l'Éc. des Langues or. viv.*, 2nd series, xii. 1.), 569—585; E. Blochet, *L'histoire d'Alep de Kamāladdin*, French version after the Arabic text, in the *Rev. de l'Orient latin*, 1896, p. 509—565, 1897, p. 146—235, 1898, p. 37—107, 1899, p. 1—49. A further synopsis with continuation down to Rabī' II 6, 951 (June 28, 1544) was made by Muḥammad Ibn al-Hanbalī, d. 971 (1564), entitled *Durr al-Habab fī Tārīkh A'yūn Halab* (see *Cat. Codd. Mss. Or. in Mus. Brit.*, N^o. 334; *Bibl. Bodl. Codd. Mss. Orient.*, i. N^o. 810, 836, cf. ii. 597; V. Rosen, *Not. sommaires*, N^o. 203).

The basic work, the *Bughya*, was twice continued in the ixth century: 1. by 'Alā' al-Dīn

Abu 'l-Ḥasan 'Alī b. Muḥammad b. Khaṭīb al-Nāṣiriya, d. 843 (1439) entitled *al-Durr al-Muntakhab fī Ta'rikh Ḥalab*; the work contains a description of the city of Aleppo followed by biographies of distinguished natives since 658; Horovitz details the MSS. in the *Mitt. Sem. Or. Spr.*, x. 60 sq.; 2. by Muḥibb al-Dīn Abu 'l-Faḍl Muḥammad b. al-Shihna al-Ḥalabī, d. 890 (1485), entitled *Nuḣḥat al-Nawāṣir fī Rawḍ al-Manāṣir*, MSS. in Berlin (Ahlwardt, *Verz.*, N^o. 9791); vol. i. in London (*Cat. Codd. Or. in Mus. Brit.*, N^o. 436, 2); vol. ii. in Gotha (Pertsch, *Verz.*, N^o. 1772); vol. iii. in Paris (de Slane, *Cat.*, N^o. 2139). From this one of the descendants of Ibn al-Shihna between 1014 and 1024 composed a synopsis with occasional notes down to his own time; MSS. of this synopsis are given by Pertsch, *Verz. d. arab. Hds. zu Gotha*, N^o. 1724 and further in *Cat. Codd. Arab. Bibl. Lugd.-Bat.*, ii. 85, N^o. dcccclii. This synopsis was published as *al-Durr al-Muntakhab fī Ta'rikh Mamlakat Ḥalab* by Joseph Elias Sarkis, Bairūt 1909. Extracts from it were given by A. v. Kremer in the *Sitzungsber. d. Wien. Akad.*, phil.-hist. Kl., IV (1850), i. 125 sqq.

Of the history of his family *al-Akhbār al-Mustafāda fī dhikr Banī Abī Djarāda*, which he composed for Yāqūt, the latter gives extracts in his *Irshād*, vi. 18—35. Of his verses an elegy on the fall of Aleppo, of which Abu 'l-Fidā', *op. cit.*, gives specimens, is the most famous. In 610 (1213) he handed al-Malik at-Zāhir a congratulatory letter on the birthday of his son Malik al-'Azīz, entitled *al-Darārī fī dhikr al-Dharārī*, which is printed from the MS. Nūri 'Othmāniye, N^o. 3790 in the *Maḍimū'a*, Sтамbul 1298, as N^o. 2. Last he wrote under the title *al-Wuṣṣā ila 'l-Ḥabīb fī Wasf al-Ṭaiyibāt wa'l-Ṭib* a guide to make all sorts of perfumes; MS. in Berlin (Ahlwardt, *Verz.*, N^o. 5463), in the Brit. Mus. (Ellis and Edwards, *A descr. List of the Arab. Mss. acquired ... since 1894*, London 1912, p. 56, 62, Or. 6388, and in Bankipore (*Cat. of the Arab. and Pers. Mss. in the Orient. Publ. Libr.*, iv. 146, N^o. 96). Specimens of his hand-writing — he was one of the most famous calligraphers, according to Yāqūt — are in St. Petersburg (see *Cat. des Mss. et Xylographes orient. de la Bibl. Imp.*, N^o. 147).

Bibliography: Yāqūt, *Irshād al-Arib ila Ma'rifat al-Adib* (Gibb Mem. vi.), vi. 18—46; Ibn Shākir, *Fawāt al-Wafayāt* (Bulak 1299), ii. 101; Abu 'l-Fidā', *Ta'rikh*, iv. 634; Ibn Kut-lūbughā, *Ṭabaqāt al-Ḥanaṣiya* (*Abh. f. d. Kunde des Morg.*, ii. Leipzig 1862), N^o. 143; Weijers, *Orientalia*, ii. 248; Wüstenfeld, *Geschichtsschreiber der Araber*, N^o. 345; Brockelmann, *Gesch. d. Arab. Lit.*, i. 332. (BROCKELMANN)

KAMĀL AL-DĪN AL-FĀRISĪ (Muḥammad b. al-Ḥasan, Abu 'l-Ḥasan) died about 720 = 1320. He was a scholar equal in calibre to Ibn al-Haitham [q. v.] and, indeed, perhaps surpassed him in originality. Kuṭb al-Dīn al-Shirāzī had called his attention to the latter's *Optics*, which he procured and wrote an excellent commentary upon. He added a series of brilliant treatises to it. These deal more particularly with the refractions and reflections of a sphere, the rainbow, the halo, *camera obscura*, etc. As to the latter it should be noted that the first scholar whom we know to have used the *camera obscura* was Ibn al-Haitham. On the wall opposite the orifice, he showed the image

of the sun during an eclipse of the sun and explained the phenomenon. That he did not succeed in obtaining a representation of the crescent moon is due, not to some error in his assumptions, but to the fact that its tips are too faint. Kamāl al-Dīn gave a more perfect theory and tested it by brilliant experiments. He first made the orifice very small and placed opposite it a surface half red and half green. He then showed how one got the sharper images the smaller the opening and that the images were independent of the shape of the orifice. The larger the opening the less these principles applied. It was to be noted that the images were reversed. With this apparatus Kamāl al-Dīn also observed on the wall the clouds and their movements as well as a bird flying past. The movements in the image are in the contrary direction to real life. At a later

The figure, taken from a manuscript, shows the path of the rays, which start from *b* and undergo a second reflection in the interior of the sphere. They produce the secondary rainbow. The primary bow would be the result of the first reflection. Goethe and Boissierée at a later date observed the secondary rainbow.

period Levi ben Gerson (Levi de Balneolis, d. 1344) used the *camera obscura* in eclipses of the moon also.

KAMĀL PASHAZĀDE. [See KEMĀL PASHAZĀDE.]

AL-KAMAR, the moon, the satellite of the earth, considered in quite early times the principal heavenly body next to the sun, whose path lay on the sphere next to the earth (*ṣalāk al-kaṣmar*). Pythagoras was the first to recognise it as a dark body illuminated by the sun, from whose relative position with regard to the sun its changes in illumination or phases were seen to result; the recurrence of the latter, when the sun and moon have again reached the same positions with regard to the earth, led to the conception of the synodic month (29½ days). The Muḥammadans calculate time by lunar years, each of twelve months. These are alternately "full" of 30 days and "empty" of 29 days. This gives a year of 354 days. The Iranian astronomer al-Bīrūnī [q. v.] in his *al-Kānūn al-Masʿūdī* (Maḳāla iii. Ch. 7) makes the interesting suggestion that the number 360 may have been introduced for the division of the circle, because it is midway between the solar and lunar years.

But as the synodic month, to be quite accurate, is 29.5306 days, which means that the month as reckoned by the Muslims is .0306 and the lunar year .367 days too short, a number which in 30 years amounts to 11.01 days, in the Muḥammadan calendar an intercalary period of 30 years is in use. It is called *al-maḳīmūʿa* and the intercalary year itself *al-sana al-kabiṣa*. Within an intercalary period there are 11 intercalary years.

The Muḥammadan year begins (or rather should begin) with the sunset after which the crescent moon is seen for the first time (first day of Muḥarram). The beginning of this era was dated on the first Muḥarram of the year in which the Prophet migrated to Medina from Mecca (July 15, 622 of the Christian era = *al-Hiǧra*).

The first appearance of the crescent moon (*ruʿyat al-hilāl*) (cf. *Ziǧī* of Ḥabash al-Ḥāsib, Berlin MS., Ahlwardt, *Verz.*, No. 5750, f. 151b) on the night of Shaʿbān 29 is of special importance as the fast of Ramaḍān begins with this moment. It is necessary to be able to calculate this moment when the weather prevents the observation of the first appearance of the crescent moon. This is one of the most difficult tasks of Arab astronomy. H. Suter has illustrated this from the example: "to find whether on the night of Shaʿbān 29 of the year 540 A.H. the moon is visible" (cf. *Die astronomischen Tafeln des Muḥ. b. Mūsā al-Kh̲wārizmī*, Copenhagen 1914, p. 67 sqq.) and C. A. Nallino gives a formula for ascertaining the smallest phases of the moon (cf. *al-Battānī sive Albatēnii Opus Astronomicum*, Milan 1903, i. 269).

Even in the earliest lunar theory, as stated by Hipparchus and Ptolemy, the complicated and irregular movement of the moon during a month is apparent; it is in reality due to the double attraction of earth and sun to which the moon is subjected (the three body problem of modern astronomers). The determination of the longitude of the moon in its orbit is the main problem of lunar theory and, in order to solve it in some degree, Ptolemy was forced to substitute for the eccentric circle of the moon's orbit an auxiliary circle, the so-called epicycle, which the moon would traverse regularly in an anomalistic month (27 days, 13 hours, 18 minutes), while at the same time the centre of this epicycle moved uniformly round the earth on a second called the deferent circle in a nodical month (27 days, 5 hours, 5

minutes). In addition the plane of oscillation was, according to Ptolemy, inclined to the plane of the earth's motion (ecliptic) at 5° (to be more accurate 5° 9'), while he made the line of intersection of the paths of the earth and moon (nodal line) execute a retrograde movement and put the centre of the oscillation about 10½ nearer the apogee (distance from the earth).

The true longitude of the moon therefore consists of the four so-called great variables, equation of centre, evection, variation and annual equation. The first denotes the transition from circle to ellipse, the second the displacement of the centre of the deferent just mentioned, while the fourth was laid down by the astronomer Kepler. As to the variation, it is given by the following expression:

$$-2' = \sin(1-\lambda) + 39' 5'' \sin 2(1-\lambda)$$

in which $1'$ and λ are the mean longitudes of sun and moon. From this formula we find that the variation in the syzygies ($1-\lambda = 0^\circ$) and in the quadratures ($1-\lambda = 90^\circ$) i. e. $2(1-\lambda) = 180^\circ$, quite disappears or is very small, but on the other hand is very marked in the octants. Ptolemy, in order to reconcile smaller differences between theory and observation, actually introduced a kind of variation of the line of apsides, the *πρόσνευσις*. After Tycho Brahe had long been regarded as the real discoverer of the variation, the orientalist and astronomer L. Am. Sédillot in his article *Sur un manuscrit arabe dans lequel la variation de la lune est signalée* (*Compt. Rend.*, 1836) asserted that it was evident from the *Almagest* of the mathematician and astronomer Abu 'l-Wafā' al-Būzǧānī (328—388 = 940—998) that he was really the discoverer of the variation to which he gave the name *ikhtilāf al-Muḥāḍḥāt*. A long dispute arose on the accuracy of Sédillot's interpretation of the text, which ran through many years of the *Comptes Rendus*; Sédillot, Mathieu, Chasles etc. formed the one party, Biot, Binet, Bertrand etc. the other, who held the contrary view that Abu 'l-Wafā' had discovered nothing new but only substituted his *Muḥāḍḥāt* for Ptolemy's *prosneusis*. In the end Carra de Vaux has been able to prove definitely the erroneousness of Sédillot's argument by a thorough analysis of the Arabic text in question and the citation of other Arabic and also Persian and Hebrew sources.

The Arab astronomers adopted the lunar theory of Ptolemy and developed it. They also recalculated several numerical values on which the study of the *Ziǧāt* accessible to us, e.g. those of al-Kh̲wārizmī, al-Farghānī, al-Battānī and al-Djaghminī gives the information we require.

In determining the parallax of the moon (*ikhtilāf manẓar al-kaṣmar*) and ascertaining its distance from the earth, the Arabs did not go beyond Ptolemy. Al-Bīrūnī in chap. 8 of *maḳāla* iii. of his *Kānūn al-Masʿūdī* makes an interesting observation on the shadow thrown by a gnomon (*mikyās*) in moonlight. As the size of the radius of the earth in relation to the distance of the moon from the earth is not infinitely small (as in the case of the sun), the staff at the same apparent altitude of the moon and of the sun throws longer shadows in the case of the moon. Al-Bīrūnī calculates the difference between the two shadows for an altitude of 45°.

The Arab astronomers devoted special attention to the exact calculation of the frequency of eclipses (*kuṣūf al-kaṣmar*), as they made use of it to

ascertain the difference in longitude between two places on the earth. They worked out tables (based on Ptolemy) which gave the times of the beginning and ends of the eclipse for various parts of the earth as well as the area of the moon's disc covered. But it is impossible to calculate these with great accuracy from observation only. The difficulties (according to al-Bīrūnī) lie in ascertaining the point where the eclipse begins on the edge of the moon, in the indistinctness of the shadow, the lack of agreement between the astronomical instruments of the two observers, etc. The result was that the calculations of longitude from eclipses of the moon were often very inaccurate. It is true that in al-Khwārizmī's astronomical tables (H. Suter, *op. cit.*, p. 85) there is an example in which the period of commencement of the eclipse agrees perfectly with the previous calculation of it, but not every calculation was so accurate. The Fātimid astronomer Ibn Yūnus (d. 399 = 1009 in Cairo), who goes so far as to distinguish five phases in the course of an eclipse, gives in his *al-Zīj al-Kabir al-Hakīmī* cases where the difference between calculation and observation amounted to as much as 23 minutes (cf. Caussin, *Le Livre de la Grande Table Hakémite observée par . . . Aboul-hassan Ali . . . Ibn Iounis* in the *Not. et Extr.*, vii. 92).

Several studies on the moon, none of which are yet published, have been preserved to us from the pen of the exceedingly prolific Arab mathematician, physicist and astronomer Ibn al-Haitham (d. 430 = 1039). We may mention: 1) the great *Maḥāla fī Daw' al-Kamar* (India Office Catalogue, No. 734, ix.); 2) *Maḥāla fī Ikhtilāf manẓar al-Kamar* (ibid., No. 734, xix) dealing only with a special case of parallax ("when the altitude of the moon is less than 30° and is western, its latitude lies south of the ecliptic and the head of the constellation of Cancer is under the western horizon so that it does not reach the meridian from below, the latitude of Medina being taken at 30° or near this figure, the parallax of the moon is in longitude the opposite of the order of the signs of the zodiac . . ."); 3) *fī Mā'iya al-athr alladhī fī Wadīh al-Kamar*, Municipal Library (*maḥlis baladī*) of Alexandria ("If one carefully observes and examines these marks on the superficies, one finds them always the same in shape and never changing, either in configuration or in position or magnitude or as regards their dark character").

AL-KAMAR. Title of Sura liv. of the Qur'an, after the splitting of the moon which is mentioned in the first verse. Cf. MUḤADḌĀT.

KAMARĀN, an islet in the Red Sea, on the coast of Tihāma, opposite Zabīd. The fortified town of Kamarān has always belonged to whosoever possessed Tihāma; it contained prisons of the King of Yemen, in al-Maḥdisī's times, and a spring of sweet water called al-'Akd. Taxes and customs duties were collected there.

The jurist Muḥammad Ibn 'Abdūya, a disciple of Abū Ishāq al-Shīrāzī, author of works on *uṣūl al-fīqh*, lived in Kamarān and is buried there. When there is a storm and ships are in danger, the natives throw dust from his grave into the sea, which is then supposed to subside.

In modern times Kamarān has become one of the quarantine-stations for pilgrims; cf. on this subject Snouck Hurgronje, *Mekka*, ii. 299, note 1; do., *Verspreide Geschriften* (Dorn and Leipzig 1923 sqq.), iii. 27, 32.

Bibliography: al-Muḥaddasī (ed. de Goeje), *B. G. A.*, iii. 2 103; Yakūt, *Muḥjam* (ed. Wüstenfeld), iii. 80. (V. VACCA)

KĀMIL, the fifth metre in the system of Arab prosody, is regularly composed of three *mutafā'ilun* in each hemistich: it has three 'arūd and nine qarab:

I	{	<i>mutafā'ilun</i>	"	"	..	"	"	<i>mutafā'ilun</i>
		<i>mutafā'ilun</i>	"	"	..	"	"	<i>mutafā'il</i>
II	{	"	"	<i>mutafā</i>	..	"	"	<i>mutafā</i>
		"	"	<i>mutafā</i>	..	"	"	<i>mutafā</i>
		"	"	<i>mutafā'ilun</i>	..	"	"	<i>mutafā'ilun</i>
III	{	"	"	..	"	"	"	<i>mutafā'ilun</i>
		"	"	..	"	"	"	<i>mutafā'ilun</i>
		"	"	..	"	"	"	<i>mutafā'il</i>

In all the feet except *mutafā* and *mutfā* one may suppress either the second vowel of the foot (*mutafā'ilun*), or the second consonant with its vowel (*ta*), or the second vowel and the prolongation of the third consonant (*mutfā'ilun*) which is exceedingly rare.

As a result of these suppressions the regular foot, *mutafā'ilun*, may become *mutfā'ilun* (= *mutaf'ilun*), *muṣā'ilun* (= *mafā'ilun*), *mutfa'ilun* (= *muṣta'ilun*); if this is done so that a piece does not contain a single whole foot in *mutafā'ilun*, it then belongs to the *raḍīx* metre.

(MOH. BEN CHENER)

AL-MALIK AL-KĀMIL. [See AL-MALIK].

KĀMRĀN MİRZĀ, second son of Bābur, and half-brother of Humāyūn; his mother was Gulrukh Bēgam, and he was born in Kābul city about 1509. He was cleverer than Humāyūn and had a poetical turn, but he was cruel and vicious, and a restless schemer. He repeatedly rebelled against Humāyūn, who was at last compelled by his officers to make him innocuous by blinding him in the end of 1553. He went to Mecca in 1554 and died there in October 1557. The most interesting thing about him is the devotion of his wife, Māh Čīrak Bēgam Arghūn, daughter of Shāh Hasan of Sind. She insisted on going on board his vessel

and accompanying him to Mecca, in spite of her father's remonstrances, saying that he had given her to Kāmran in the days of his greatness (in 1546) and that she would not abandon him now in the time of his misery. She died at Mecca a few months after her husband.

Kāmran was put in charge of Kandahār by his father, and in the beginning of Humāyūn's reign he was governor of the Pandjāb. During the interregnum, when Humāyūn was in Persia, Kāmran and his younger brother, 'Askari, ruled over Afghānistān. He left one son and three daughters. The son, Abu 'l-Kāsim, who inherited his father's poetical talents, was confined in Gwalior by Akbar in 1557, and was put to death some years later as a dangerous competitor. All three daughters were given in marriage; one of them, named Gulukh, was a woman of a masculine spirit; she married Ibrāhīm Husain Sultān, and she and her son were thorns in Akbar's side. (Firishā, lith. ed., p. 221, and Muḥammad Husain, *Darbār-i Akbari*).

Bibliography: Abu 'l-Fadl, *Akbar-nāma*, vol. i; Muḥammad Haidar, *Tārīkh-i-Rashīdī*, Engl. vers. by N. Elias and E. Denison Ross; Djawhar Aftābā, *Memoirs of the Emperor Humāyūn*, transl. by Major Stewart (O. T. F. 1832); Bābur's *Memoirs*; Erskine, *Memoirs of Baber*; Gulbahān Begam, *History of Humāyūn* (O. T. F.), London, 1902; Badā'ūnī, *Muntakhab al-Tawārīkh*, i. 451 sqq.; Elliot-Dowson, iv. 498, v and vi. There is a copy of Kāmran's *Diwān* in the Oriental Public Library, Bankipore, Cat., ii. 145, and 215, where a biography of Kāmran is given. (H. BEVERIDGE)

KĀMRĀN SHĀH DURRĀNĪ, the last sovereign of the Sadozai family of Afghānistān who succeeded his father, Maḥmūd Shāh, in the limited sovereignty of Herāt in 1245 (1829) and reigned till 1258 (1842). In the civil wars between the sons of Taimūr Shāh, the princes Zamān, Shudjā' al-Mulk and Maḥmūd, the prince Kāmran proved himself a brave warrior and in 1221 (1806) he took Kandahār from Shudjā' al-Mulk, but lost it soon afterwards. In 1232 (1816) he took a leading part in the events which led to the disruption of the Durrānī monarchy. In revenge for an insult offered to his sister by Dōst Muḥammad he blinded and beheaded Faṭḥ Khān, the Bārakzai Wazīr (Dōst Muḥammad's father), to whom Maḥmūd Shāh owed his kingdom. This led to the loss of the whole kingdom except the Herāt province. Kāmran was debauched and indolent in his later years, but maintained himself at Herāt through the efforts of his able and unscrupulous wazīr, Yār Muḥammad Alikozai. The siege of Herāt by the Qadjar Shāh of Persia in 1837—39 was the principal event of his reign. The rivalry between England and Russia was one of the principal causes of this siege, the Persians being advised by Russian officers, while Lieut. E. Pottinger, a young English officer, was the main spirit in the defence. In 1258 (1842) Kāmran Shāh was assassinated by Yār Muḥammad, who was in league with the Persians and remained in possession of Herāt. Coins were struck at Herāt by Kāmran.

KĀMRŪP, a district in Assam, situated between 25° 43' and 26° 53' N. and 90° 39' and 92° 11' E.; the greater part consists of a wide plain, through the lower portion of which the Brahmaputra R. flows from east to west; but south of the river there are ridges of hills, thickly covered with jungle. Under the rule of the Kōē dynasty, the first attempt to bring this country under Muhammadan rule was made by Muḥammad Bakhtiyār Khaldjī [q. v.], but his victorious progress eastward was checked when he attempted to enter Assam, and successive rulers of Bengal after him made similar fruitless attempts. In 1256 Ikhtiyār al-Dīn Yūzbak Tughril Khān invaded Kāmṛūp and erected a mosque in commemoration of his victories, but disease broke out among his troops and the Assamese destroyed the general and most of his army. The thick jungles and moist, unhealthy climate of the Brahmaputra Valley proved to be effectual obstacles to the progress of the Muhammadan troops. It was not until 1638 that they succeeded in gaining a footing in Kāmṛūp and Gauhati became the capital of a Muslim governor, but 20 years later they were driven out of the country by the Ahoms, who took advantage of the confusion that resulted from the conflicts between the rival claimants to the throne of Shāh Djahān [q. v.]. In 1662 Mir Djumla [q. v.] made a vigorous attempt to conquer the Assam valley, but though he was at first successful, the difficulty of military operations during the rainy season and the outbreak of disease among his soldiers compelled him to beat a retreat into Bengal, and Mir Djumla himself did not survive the failure of his expedition. After intermittent struggles for some years, the last vestige of Muhammadan rule disappeared in 1681 from Kāmṛūp, and it formed part of the Ahom kingdom, until it was ceded to the British in 1826.

Beng.*, vol. xli., Part i. (1872), p. 49 sqq.); E. A. Gait, *The Koch Kings of Kāmārūpa* (*Journ. As. Soc. Beng.*, vol. lxii., Part i. (1894), p. 279 sqq.); B. C. Allen, *Gazetteer of Kamrup* (Allahabad, 1905), p. 27 sqq. **KĀN**. [See **KHĀN**].

KĀN WA-KĀN, the name of one of the seven kinds of modern poetry (*fumūn*), unknown to the classical authors. It was invented by the people of Baghdād and takes its name from the formula used by story-tellers at the beginning of their recitals: "There was once upon a time". Originally the *kān wa-kān* was a rhymed tale and it was only later that it was applied to other subjects, especially of moral tendency. In the spoken language it was always in vogue in the east only, especially in its place of origin. The *kān wa-kān* is a poem composed of strophes of two lines the metre of which is given by the prosodists as follows: *mustafīlun fa'ilātun, mustafīlun mustafīlun fa'lān*.

But, according to the 32 specimens that I have seen, the last foot of the first verse is *mustafīlun* and not *mustafīlān*; and therefore there is a rhyme only in the last hemistich of every second verse. The principal variations are the disappearance of *s* or *f* in *mustafīlun* and *fa'lān* is often changed to *fa'ilān*. Al-Ibshīhi, *al-Mustatraf*, Bulāḥ

1292, ii. 273 sqq., Abu 'l-Fidā', *Ta'rikh*, Constantinople 1286, iv. 158, and especially Hurāfīsh, *al-Rawḍ al-fā'ik*, Cairo 1311, p. 23, 26, 29, 33, 34, 42, 53, 55, 71, 74, 77, 80, 86, 135, 137, 144, 169, 181, 191, 204, 217 give specimens of *kān wa-kān*.

KAN'ĀN, the biblical Kēnān, is a personality, regarding whom the traditions, in spite of their sparsity, agree in hardly a single point. Al-Baidāwī (ed. Fleischer, i. 513) mentions him as the father of the famous Nimrūd (Numrūd according to the *Lisān* and the *Taḍj*); he is also regarded as the ancestor of the Kan'āniyūn (*Lisān*, x. 191) and of the Berbers (al-Dimashqī, *Nuḥbat al-Dahr*, ed. Mehren, p. 266 and Ibn Khaldūn, *al-'Ibar*, vi. 93, 22 sqq., 97, 11 sqq.). — Very little is known about him. Many refer to him the story in Sūra xi. 44 sq., that a son of Nūḥ in spite of his pressing appeal refused to take refuge in the Ark with him and thus perished in the Flood with the unbelievers (al-Baidāwī, ad locum and al-Thaḥabī, *Kiṣaṣ al-Anbiyā'*, Cairo 1324, p. 36 below). — Al-Ṭabarī (ed. de Goeje, i. 199) also knows of a son of Nūḥ called Kan'ān, who lost his life at the Flood, but refers the Korān verse in question to Yām b. Nūḥ (see *Tafsīr*, ad Sūra 44 sq.), whom, however, he identifies with Kan'ān in i. 199, 6.

While Kan'ān appears here as the son of Nūḥ and Ibn al-Kalbī mentions Shālūm (i. e. Kan'ān) as Nūḥ's fourth son (in Yāqūt, *Mu'djam*, ed. Wüstenfeld, iv. 311) we find him in the parallel passage to Genesis, ix. 25 (in al-Ṭabarī, *op. cit.*, p. 212) as a son of Hām b. Nūḥ (see also al-Yāqūbī, i. 13, 8 sq., 16, 1; al-Mas'ūdī, iii. 240, 294). According to a third tradition (in Yāqūt, *op. cit.*) Kan'ān was a son of Sām b. Nūḥ and according to a fourth — not quite reliable — tradition, a son of Kūsh b. Hām (al-Dimashqī, *op. cit.*).

(B. JOEL)

KAN'ĀN PASHA. [See KEN'ĀN PASHA].

KANĀT, plur. *kanawāt*, *kanar*, *ḥunī* and *aḥniya*, means in Arabic: (1) canal, aqueduct, (2) lance or stick (see *Lisān al-'Arab*, xx. 66; *Taḍj al-'Arūs*, x. 304; Dozy, *Supplément*, ii. 414). These two conceptions have developed from the original meaning of "reed". The word may be said with considerable certainty to be borrowed in the western Semitic languages from the Assyrian or Accadian, where *kanū* = reed, bulrush; cf. Zimmern, *Akkad. Fremdwörter*, Leipzig 1915, p. 56. Hence we have in Hebrew *kanā*, in Aramaic *ḥanyā*; the word passed through the intermediary of the Aramaic into Arabic; there in the popular dialects of Syria and Egypt it is pronounced *kanāya*, *kanūyāt*. The Greeks and Romans took over the Semitic word as *κάννα*, *κάννυ* (*κάννυ*), *canna*; note the change of meaning — an exact analogy to the Arabic — of the Latin *canalis*, strictly an

adjective meaning "reed-shaped", then "channel, canal". In modern Persian also *kanāt* is in use but there it has the special meaning of subterranean channel or aqueduct. The true Persian word for this particular kind of canal is *kārez*, earlier *kahriz* (Vullers, *Lexic. Pers.-Lat.*, ii. 767, 927; in the older language we also find *awghūn*; see Vullers, i. 58). This latter word has in turn entered Arabic as *sihrīdī* (also *ṣuhārīdī*), but there means "water-holder", "cistern"; cf. *Lisān al-'Arab*, iii. 136; Lane, *Lexicon*, p. 1738; cf. also Yāqūt, *Mu'djam*, ed. Wüstenfeld, iv. 276, 2. Only in Syria (according to Moritz, *Zur antiken Topographie der Palmyrene*, in the *Abh. Pr. Akad.*, 1889, iv. 12) do we find *kahriz*, *ṣahrīdī*, vulgar *ḥahriz*, in the meaning of "subterranean aqueduct". It may here be pointed out that the other words in Arabic for aqueduct seem also to be borrowed (probably all from the Aramaic); cf. Fränkel, *Die aram. Fremdwörter im Arab.*, Leiden 1886, p. 23—25; take, for example, *kaṣāṭil* (Dozy, ii. 344; from the Aram. *kaṣṭal* = castellum; that is "any large building"; cf. the meaning of *kanṭara* = bridge, aqueduct, castle).

The plural *kanawāt* occurs in Syria as a place-name. It is, for example, the name of a town on the western slope of the Ḥawrān, fifty miles south of Damascus, which is so called on account of its wealth of water, and is certainly a very ancient settlement, although hardly identical with the Biblical Kēnāt (*Numbers*, xxxii. 42; I *Chron.*, ii. 23), which Wetzstein would rather recognise in Kēnia (diminutive of *kanāt*), a village near Kerak, four hours' journey east of Der'at in al-Nukra; see Wetzstein, *Das batanäische Giebelgebirge*, Leipzig 1884 (from Delitzsch's *Psalmenkommentar*, p. 26). Kanawāt's (*Kanatha*, Canatha) period of greatest prosperity was in the early centuries of the Christian era; splendid ruins still exist dating from the Roman period. Mention is made of the building of a new canal in the reign of Trajan; this must certainly have been simply the restoration of an already existing canal of older date. The upper town still has a well preserved ancient aqueduct. On this Syrian Kanawāt see Burckhardt, *Reisen in Syrien und Palästina*, Weimar 1823 sq., p. 157 sq.; Seetzen, *Reisen durch Syrien*, Berlin 1854—59, i. 79 sq., iv. 51—54; J. Porter, *Five Years in Damascus*, London 1885, ii. 90 sq.; G. Le Strange, *Palestine under the Moslems*, London 1890, p. 586; M. v. Oppenheim, *Vom Mittelmeer zum persischen Golf*, i., Berlin 1899, p. 194; P. Thomsen, *Loca sancta*, Halle 1907, p. 76—77; Georgius Cyprius, ed. Selzer, Leipzig 1890, p. 206—207; Moritz in Pauly-Wissowa, *Realenzykl. d. klass. Altertumswiss.*, x. 1856; Baedeker, *Palästina und Syrien*, Leipzig 1913, p. 153—155.

On the Syrian aqueducts, *kanṭarat Zainab* and *kanṭār Fir'awn*, see *KANṬARA*.

Subterranean aqueducts such as we get in Persia are only rarely found in Syria, e. g. at Karyātēn on the ancient road from Damascus to Palmyra (according to Moritz, *Die antike Topographie der Palmyrene*, loc. cit.). The town of Damascus is supplied by a channel from the river Barrādā, the water of which is led into the dwelling-houses by subterranean pipes. For information on aqueducts in Syria and Arabia in general see also J. Berggren, *Guide français-arabe vulgaire*, Upsala 1844, p. 56—57, s. v. *aqueduc*.

. Among the oldest aqueducts of the Muslim period is the aqueduct of Mekka, which was begun in the time of Mu'āwīya. Zubaida, wife of Hārūn al-Rashīd, earned special merit by providing for the water supply of the holy city; in 810 (1407) she had canals made which led the water from the district of Tā'if, the valley of Minā and from 'Arafāt to Mekka. The channels, much neglected in course of time and often only very negligently repaired, were restored by the Turkish Wālī 'Uthmān Pāshā (1882—86). For details see Snouck Hurgronje, *Mekka*, the Hague 1888, i. 6—10, where the Arabic sources are also cited.

In view of the dryness of Irān, artificial irrigation by means of canals has always been a necessity of existence there (cf., for example, *Polybius*, x. 23), as river water is in many places not available in sufficient quantity and the rainfall is slight. Open canals continually lose large quantities of water through infiltration and evaporation and they are also not infrequently damaged by cloud-bursts and torrential floods. The subterranean *kanāt* or *kārēz* (*kahrīz*) system is therefore generally preferred in Persia. By this means water is brought often from great distances to the humus-covered plains. Wells are made in the higher lying parts of the valleys, especially at the foot of hills, and the water accumulates plentifully in them and is led first by subterranean tunnels, latterly by open trenches and furrows (*djūz*), to the fields and gardens to be watered. These channels are often 50 or more feet below the surface of the ground, are vaulted and often lined with bricks and so high that a man can crawl through them. Every 30 or 40 paces a perpendicular shaft, often of masonwork, and covered at the top, leads down to the pipe. In the making of these channels the Persians reveal great skill. The searching for springs and the making of channels is a special industry, that of the *muḥannī* (see especially Bishop, *op. cit.*; see *Bibliography*). The making of a *kanāt* costs a great deal in proportion to the water it supplies and the annual cost of maintaining it is also not inconsiderable. It is also very important to see that the water is properly distributed, and much care is taken that the villages in turn have the use of it for the proper length of time. This business of water-distributing is perhaps the most important part of the administration of a Persian village. A special official, the *Mir-āb*, is entrusted with the duty. He has also to see to the maintenance of the pipes etc., especially to their being kept clean; cf. thereon Gordon, *op. cit.*; see *Bibliography*.

At the present day the Persian *kanāt* system is, unfortunately, much neglected; many channels are now quite dry; for example, the great network of channels which once supplied the thickly populated town of Ray near Tīhrān is now so much destroyed that it can barely supply the wants of the village of Shāh 'Abd al-'Azīm which is built on the ruins of Ray (Polak, *op. cit.*, ii. 118). Tīhrān is, according to Bishop, *loc. cit.*, still supplied by 35 canals.

This method of irrigating the fields by artificial channels is called in Persia the *ābī* system of agriculture, in contrast to the natural method, the *deīmī* or *bārāmī* system; cf. Polak, *op. cit.*, ii. 120; Stolze-Andreas (see *Bibl.*), p. 8.

A great network of canals cuts up Central Asia. The planning of this system is ascribed to Timūr; but they are certainly much older and their origin may be dated at least as far back as the early middle ages. To make them, the water from springs in the oases miles apart was collected, great rivers diverted, and water led by tunnels through ranges of hills and by aqueducts over the valleys. A great many of these canals are, however, now decayed, as in Persia. There the canal is called *arīk* and the canal manager *arīk-aksakal*. A thorough account of this Central Asian system of irrigation is given by A. Th. v. Midden-dorf in his article *Einblicke in das Ferghana-Thal* in *Mém. de l'Acad. imp. des Sciences de St. Petersburg*, 1881, Series 7, vol. xxix. See also, especially for the country east of Bukhārā, H. Moser, *Durch Central-Asien*, Leipzig 1883, p. 114—119.

(M. STRECK)

KANAWDJ or **KANŌDJ**, Skr. Kanyākubdjā, (known to the Arab authors as Kānnawdj or Kīnnawdj) was the capital of a powerful kingdom before the Muslim invasions. It is now a small town in the Farrukhābād district of the United Provinces on the R. Ganges (27° 2' 30" N. 79° 58' E.). It has been supposed to be identical with Ptolemy's Kanagora or Kanagoza (see McCrindle, *Ptolemy*, p. 134; Beal, *Travels of Buddhist Pilgrims*, p. 70). V. Smith disputes this on the ground that the existence of Kanawdj at the time of Ptolemy (140 A. D.) is doubtful. The identification is however not improbable. The first undoubted mention is found in the travels of Fa-hsien (405 A. D.), when it was a place of no great importance under the Gupta kings. At the time of Yuan Chwang's visit (circa 641 A. D.) under the rule of Harshavardhana it had grown into an important capital and a centre of Buddhism. It may be noted that this traveller gives the Chinese transcription (Kano-kū-she) of the Sanskrit-name Kanyākubdjā, while the earlier traveller Fa-hsien gives Ka-no-yi, answering to the Prakrit and modern form. The country of which it was the capital was known as Pančāla. After a period of anarchy and short lived monarchies it became the capital of the Gurdjara Pratihāra kings, who founded a dynasty which lasted for two hundred years. The most powerful king of this race was Bhōdja (A. D. 480—90) under whom Kanawdj became the capital of an extensive empire, which may be stated to have included all the plain of northern India from the Satlādj to Bihār and southwards to Guḍjārāt and Saurāshtra. On the west it was bounded by the territories of Sind now under Muslim rule.

Al-Mas'ūdī writing in A.H. 332 (943—4) says that the king of Kinnawdj ruled over the country bordering on Multān and Sind and southwards on al-Mānkīr, the country of the Ballalū (i.e. the Vallabhi kings), and al-Bīrūnī [q. v.], says that Muḥammad b. al-Kāsim b. al-Munabbih, who had entered Sind from Sijḡistān, penetrated India as far as Kānnawdj, but the date of this invasion is not given. Probably this invader is identical with Muḥammad b. al-Kāsim b. Muḥammad, the conqueror of Sind who, according to the *Čač-nāma*, made war on the chief of Kānnawdj. But, if any such expedition took place, it could not have been directed against Kānnawdj itself, but only against its territories bordering on Sind. There is no ground for supposing that any Muḥammadan invader penetrated as far as Kānnawdj before Maḥmūd of Ghaznī. His conquest overthrew the Pratihāra rule, which had already been weakened by the attacks of the Rāṣtrakūṭas. At the time of Maḥmūd's invasion, after his conquest of Dīpāl, the Shāhi of Gandhāra, Kānnawdj was under Rājyapāla, who abandoned the city and fell back on Bārī, east of the Ganges, which became the capital. After Maḥmūd's departure the Čandēls seized on Kānnawdj and Rājyapāla was killed. Maḥmūd returned next year and defeated the Čandēls, and the Kānnawdj kingdom continued as a small state until it fell into the hands of the Gabarwār Rājapūts.

In 589 (1193) the final destruction of the Hindū kingdom was brought about by the invasion of Mu'izz al-Dīn Muḥammad b. Sām, the Ghōrī king of Ghaznī, and Kanawdj ceased to be a place of importance. It probably never really recovered from its destruction by Maḥmūd, as al-Bīrūnī, writing as a contemporary, says that it was mostly in ruins after the transfer of the capital to Bārī. Mu'izz al-Dīn adopted the style of the coins or Kānnawdj in some of his issues with Sanskrit legends, and these were probably struck at Kānnawdj after the conquest. There are not many important events in its later history.

In 948 (1540) the emperor Humāyūn was defeated here by Shēr Khān, and in the eighteenth century it was included in the territories of the Bangash Nawwābs of Farrukhābād and afterwards in Awadh. During the mutiny of 1857 the Nawwāb of Farrukhābād was defeated by the British army here.

Kānnawdj was made a mint by Shēr Shāh after his victory over Humāyūn, and on the Sūri coins it appears and "Kānnawdj urf Shērgarh". Shērgarh was changed to Shāhgarh in Akbar's reign. Under Muḥammad Shāh and his successors, Aḥmad Shāh, 'Ālamgir II, Shāh Dīahān III, and Shāh 'Ālam II, the name of the mint was Shāhābād Kānnawdj.

From Kanawdj are derived the names of the Kanawḍjīa section of the Brāhman caste and the Kanudjīa dialect of Western Hindī. The only important modern industry is cloth-printing.

(M. LONGWORTH DAMES)

KANDĀBĪL, a city in the territory of the Budha (Budhiya, var. Nudha) which corresponds to the modern Kačhi or Kač Gandāva in Balōčistān. It is probably the modern town of Gandāwa, which is not now important. Kāndābīl was taken by the Arab invaders in the time of al-Ḥaǧǧīǧādī probably before the invasion of Sind by Muḥammad b. al-Kāsim [q. v.] in 89 (707). The *Čač-nāma*, a legendary history of Sindh and its capture by the Muslims, mentions Kāndābīl as having been taken by the legendary King Čač, who advanced through Armābēl (Las Bēla) and Tūrān (the hill-country of Kuṣṣār) into a desert, and took the fort situated on the river Sīnī (which should doubtless be read Sībī, as a branch of the Nārī flowed through Sībī towards Gandāva). In the reign of Yazid II (101—105 = 720—724) it was chosen by Yazid b. al-Muḥallab as a place of refuge for his family when he rebelled. Al-Iṣṭakhṛī and Ibn Hawkal mention it as the principal emporium of the Budha. In the time of the Caliph al-Manṣūr (136—158 = 754—775) it is stated by al-Balāḏhūrī that Hishām b. 'Amr al-Taghlībī attacked a body of Arab rebels at Kāndābīl, and 'Imrān b. Mūsā in the reign of al-Mu'taṣim (218—227 = 833—842) conquered Muḥammad b. Kḥallī there and carried the inhabitants off to Kuṣṣār. The name of Kāndābēl or Kāndā'il is not met with in more recent times.

Its identification with Gandāwa is doubted by Raverty on the ground that the *Masālik wa'l-Mamālik* (cf. Iṣṭakhṛī, p. 179 a) states that it is but five farsangs distant from Kuṣṣār, but this is not in accordance with its position as shown in al-Iṣṭakhṛī's and Ibn Hawkal's map (see *Journ. As. Soc. Beng.* 1892. Plate XI) which shows it to the west of the Mihrān and a long distance North of Kuṣṣār. There is in reality no other place with which it can reasonably be identified. Cf. also J. Marquart, *Erānsahr* (*Abh. K. Ges. Wiss. Göttingen*, Phil.-hist. kl., new series III, N^o 2, Berlin 1901), p. 187 sq., 190. Gandāwa remained an important centre as is shown by the Balōč ballads of the commencement of the xvth century, and it is probable that the *k* of the Arab writers represented a vernacular *g*, as in Kāndahār for Gandhāra and other cases. It is an ancient walled town standing on a mound, and was long the capital of the province of Kačhī, which from it obtained the name of Kačēh Gandāva. The disappearance of the name Kāndābēl from history may be therefore accounted for by the decay of the Arab rule and the revival of indigenous government which naturally gave the chief town its original vernacular name.

importance. Shams al-Dīn II, the Kart ruler of Herāt, is stated by Khwandamir to have besieged Kandahār, and as his reign began in 676 (1278) it may be held that by that period Kandahār had become the capital, and henceforward it plays a prominent part in history. It was conquered by Timūr and formed part of the province bestowed on his grandson, Pir Muḥammad. At the close of the 15th century it formed part of the Kingdom of Husain Bāikarā of Herāt, and the name Kandahār first appears as a mint on his coins. Under Husain, the Arghūn Chief, Dhu 'l-Nūn Beg, obtained the government of Zamindāwar in addition to other provinces and made Kandahār his capital. After his death in the wars with Shāibānī the emperor Bābur drove his son Shāh Beg Arghūn out of Kandahār in 913 (1507), but Shāh Beg soon recovered the town with the aid of Shāibānī and held it for several years, but Bābur finally took it in 928 (1522) and it remained part of the territories of the Mughal Empire of India, although always regarded by the Safawī Shāhs of Persia as properly belonging to Khorāsān. Kāmrān succeeded Bābur in the possession of Kābul and Kandahār, and held them even when his brother Humāyūn was expelled from India. A Persian attack on Kandahār in 941 (1535) failed. In the disputes between the brothers which followed Humāyūn's exile, Humāyūn besieged Kandahār with the aid of a Persian army and after its fall made it over to the Persians, but re-took it from them afterwards. In the early part of Akbar's reign Tahmāsp Shāh succeeded in taking Kandahār 965 (1556) and Akbar did not recover it till the latter part of his reign, 1003 (1594). Persians again took it from the Emperor Djahān-gīr in 1031 (1621), but Shāh Djahān's army occupied it in 1047 (1637). The last transfer was in 1058 (1648) when Shāh 'Abbās II took it, and the Mughal Emperors were never again able to conquer this province.

conquer this province.

Ḳandahār remained under the Ṣafawī Monarchy until the rising of the Ḡhalzai tribe to power under Mīr Wais (v. ḠHALZAI). The success of the Ḡhalzai rebellion in driving the Persians out of Ḳandahār emboldened them to invade Persia itself, and Maḥmūd became Shāh of Persia. Ḳandahār itself came into his brother's power, and the Ḡhalzais maintained their hold on it until Nādir Shāh took it after a year's siege in 1151 (1738). During the siege he built a new town outside the old city and named it Nādirābād. The Ḡhalzais were driven away from the neighbourhood, and the Abdālīs, who had been removed to the Herāt province, were allowed to return. They are still the most important element in the province. Aḥmad Shāh, one of their leaders who had held high command under Nādir Shāh, obtained possession of Ḳandahār without difficulty after the latter's death, and made it the capital of the Durrānī Kingdom which he founded (v. AḤMAD SHĀH, ABDĀLĪ, DURRĀNĪ, AFGHĀNISTĀN). He built a new town and gave it the name of Aḥmad-shāhī with the epithet of *ashraf al-bilād*, "most illustrious of cities", which appears on all coins struck there during the Durrānī rule, but has been replaced under the Bārakzais by the old name Ḳandahār. The vicissitudes of Ḳandahār were not at an end; it passed rapidly from one pretender to another in the course of the wars between Zamān Shāh and his brothers, Maḥmūd and Shudjā

'al-Mulk, and, after Dōst Muḥammad Bārakzai had obtained the principal power, the inevitable rivalry set in and Kāndahār was held for long by his brothers. Kohandil and Furdil. In 1839 it was occupied by a British Indian army in support of Shāh Shujā 'al-Mulk, and held till 1842 when the British left Afghānistān. After Dōst Muḥammad's death Kāndahār again passed from one to another during the civil wars between his sons (see 'ABD AL-RAḤMĀN KHĀN). In the war of 1879—80 after the deposition of Yatḡub Khān, Kāndahār was for a time erected into a separate state under the Wālī Shēr 'Alī, but after Aiyūb Khān's invasion and his final defeat by Roberts at Kāndahār the British Government decided to put the whole country under 'Abd al-Raḥmān as Amīr, and the separate state of Kāndahār came to an end. Since then it has remained peacefully under him and his successors.

The changes in the political relations of Kāndahār are reflected in its coinage. It first appears under Husain Bāikarā of Herāt; then under Humāyūn. Then for a long season only a few copper coins of Persian origin are known. Rupees were struck by Djahāngīr and Shāh Djahān. These are followed by a long series of anonymous copper coins of Persian origin bearing figures of antelopes, peacocks, the hand of Fātima or the sword, Dhu 'l-fikār. Maḥmūd the Ghazai struck rupees, and Nādir Shāh also, both in the names of Kāndahār and Nādirābād. Then follows a full series of all the Durrānī Kings, followed by anonymous coins in the name of the "Shāhib-i-Zamān", or "Amīr-i-Kullāmīr". Last of all come the coins of the Bārakzai dynasty, and even the temporary Wālī, Shēr 'Alī, is represented.

The site of Kāndahār has been several times altered. The town taken by Nādir Shāh appears to have been on hilly ground; it was no doubt the Husainābād built under the Ghazais and named after the Persian King Husain Shāh, afterwards dethroned by Maḥmūd. Nādirābād seems to have been some distance away on the open plain, while Aḥmadshāhī, the modern Kāndahār, was nearer to the old city, according to Elphinstone. Masson about 1830 describes the ruins of the old town dismantled by Nādir Shāh as on the slope of a hill about two miles distant from the walled town of his days. The tomb of Aḥmad Shāh is in Kāndahār.

KANDAHĀR. 3. A fort in the Dekkhan, 77° E. 19° E. which gives its name to a talūka in the dominions of the Nizām of Haidarābād. This place appears to be the mint-town of some rupees of Kāndahār struck in the reign of the Mughal Emperor Muḥammad Shāh from 1157 to 1159 (1744-45). As the city of Kāndahār in Afghānistān had been separated from the Mughal Empire since 1058 (1648) and was at this period in Nādir Shāh's possession, it is impossible that these rupees should have been struck there.

KANDŪRĪ. The Persian word *kandūra* or *kandūrī* means a leather or linen tablecloth; in Hindūstānī this word means also a religious feast held in honour of a venerated person like Fātima. In this latter meaning the word has been imported, apparently, from India into the Indonesian archipelago. In Acheen the word is unchanged, in Java it is slightly altered into *kenḡuri* or *kenḡurīn*; it may be noted that nowadays the more usual term in Java is: *sedekah* or *sidekah*, from the Arabic *ṣadaqa*, *slametan*, from the Arabic *salāmat*, or *hādḡat*, a well known Arabic word, meaning need, want of a man's presence at a feast, and hence the festival itself. In general it is a feast given with a religious purpose, or at least in conformity with religious law, just like the *walima* in the books of *jīkh*. The occasions which give rise to it are numerous, for instance: days of commemoration, domestic events, especially circumcision, the completion of teaching the *Qur'ān*, certain periods, such as pregnancy, sowing and harvest, and sundry reasons like setting out on a journey, occupying a new house and other enterprises, the averting of epidemics and calamities, etc. According to the Law each *kandūrī* should have a religious character; the poor must be invited, forbidden things should be avoided, but the strong local *ūdāt* is always prone to look for means of effecting a compromise. Every complete *kandūrī*, especially those in commemoration of deceased relatives and those given on the anniversary of a saint, is sanctified by means of recitation of the *Qur'ān*, *dhikr*'s or prayers; popular superstition, however, regards such *kandūrīs* as consisting of actual offerings of food to the deceased. Almost every *kandūrī* is opened by a prayer, the commemorative ones by the *dō'a kubur*. In Acheen some months are called *kandūrī* with a second word indicating the food the sacred meal consists in.

KANEM, a country in the Central Sūdān, east and north-east of Lake Tchad. Until recent years Kanem was only known from the accounts of Barth, who visited a part of it in 1851, and Nachtigal, who crossed it in 1871 on his way to Borku. But from 1900 onwards, the work of French scientific missions, as well as the explorations of officers and officials entrusted with the administration of the "territoire militaire du Tchad", have made it possible to rectify and complete the data furnished by these two travellers.

The name Kanem, taken in the widest acceptation, is applied, according to Nachtigal, to a region bounded on the north by the caravan route from Kavar to Lake Tchad, in the south by the Baḡr al-Ghazal [q. v.], in the east by the depression of the Eguei, in the west by the Lake, and lies between 14°—16° N. Lat. and 12°—14° E. Long. (Greenwich). The surface may be estimated at 27,000 to 30,000 square miles. Kanem, in the stricter sense, only occupies about a quarter of this huge area, between Lake Tchad on the west, Baḡr al-Ghazal on the south and the mountainous mass of the Manga, which separates it from the Eguei, on the east.

The most characteristic topographical feature of Kanem is the existence of numerous sand dunes

running N. W. by S. E., separated from one another by hollows several hundred yards broad and sometimes four or five miles long. Dunes and depressions are specially marked in the northern part. The hollows, which are given the name of wāds, are dry except during the rainy season, when ponds are formed in the deepest parts; their bottoms consist of soil impregnated with natron. Below this, to a depth of 3 to 30 feet, lies a vast water-bearing stratum; wells therefore are dug into the beds of the wāds. The existence of this subterranean water supply has suggested that the present Kanem is simply an ancient lagoon formerly fed by the waters of the Bahr al-Ghazal and now dried up. The wāds themselves would be the beds of the ancient exits or *baḥr* of the Tchad. The shore itself is in process of transformation. It is bordered by elongated islets lying S. S. E. by N. N. W. and separated from one another by narrow channels. The islets, which number 300, of which 80 are inhabited, lie from two to three miles from the shore. They are divided into two groups, the Kūri archipelago in the south and the Buddūma archipelago in the north. The gradual desiccation of the south-east part of Lake Tchad has added a certain number of islands to the mainland. Peninsulas and bays, which cut into the shore, have thus been formed and force sailors to make numerous detours.

The climate of Kanem is that of tropical regions. Two seasons are distinguished, the rainy season from July to September, and the dry season from February to June. The intermediate period, from October to January, corresponds to winter and is marked by a perceptible drop in the temperature; in the bottoms of the wāds the thermometer goes sometimes down to zero Centigrade ($= 32^{\circ}$ Fahrenheit). The rains themselves are unequally distributed and diminish from south to north. The very luxuriant vegetation of the southern part becomes less and less rich as one ascends northwards. It flourishes on the slopes of the wāds, the bottoms of which remain barren. The date-palm grows wild in many of these wāds. It even forms a regular oasis at Mao, in the centre of Kanem, but disappears in the northern part, which is of prairie character. Cultivation is limited to the area around the villages, built on the slopes of the dunes close to the wooded zone. The commonest crop is the millet, to which may be added beans and cotton in the *baḥr* of the Tchad. The rearing of horses, cattle, sheep and camels is also a very important source of income for the inhabitants. Fishing around the lake and hunting in the interior also contribute to the support of the inhabitants. The fauna is very rich and varied. The elephant is becoming scarce, but the rhinoceros, the hippopotamus, lion, buffalo and panther abound in Kanem proper and the ostrich, antelope, gazelle and giraffe on the northern steppes.

The number of inhabitants is difficult to estimate. It is certainly not above 80,000 to 100,000 or about two to the square mile. The population is settled, with a few nomads. The principal settlements are in the south Ngūri, in the S. E. Mondo, in the centre Mao, "a junction of roads, a centre of gravity and of confluence of races... the first oasis in the date country, still rich in millet, suited both for the rearing of camels and cattle". (Largeau).

The population is far from being homogeneous.

The diverse elements which compose it belong some to the negro group and some to the Arab group, more or less altered. To the first belong the Kanembū, the Buddūma, the Kūri; to the second the Ūlād-Slimān and the Shoa; the Tundjur and Tubu are classed between the two.

The Kanembū, descendants of the first settlers in Kanem, constitute the basis of the population, upon whom they have imposed their language. They are dark grey (*azrak*) in colour and tall in stature. Industrious and peace-loving, they are settled and devote themselves to agriculture. They profess Islām and are fairly strict Muslims. In their midst live groups of individuals called Haddād (in Kanembū *dogoa*) who, although differing from the Kanembū neither in language nor in physical type, are considered as belonging to an inferior race and are despised. These natives are distinguished from the others by their weapons and by their mode of life. They use bows and arrows, while the Kanembū use spears, and live chiefly by hunting. Very warlike in disposition, they have played an active part in the civil wars which desolated the country in the course of last century.

The Buddūma and the Kuri inhabit the islands of Lake Tchad, to which they retired when they abandoned the mainland. The Buddūma, who occupy the northern archipelago, live by fishing, cattle-raising and the cultivation of millet. Before the French occupation, they practised piracy to the detriment of their neighbours of Kanem and even at the expense of the natives of Bornū [q. v.]. They have, for the most part, remained fetish-worshippers, although they have adopted some Muslim customs. The Kūri, on the other hand, while leading the same sort of life as the Buddūma, are completely Islāmisised.

The Ūlād Slimān and the Shoa represent the Arab element in Kanem. The first, who came from Tripolitania and Fezzān [q. v.] in the middle of the nineteenth century, have preserved the Semitic type quite pure. They have light complexions, speak the Arab dialect of Tripolitania and dress like the Arabs of the north. Nomads and robbers, possessing, thanks to their rifles, an incontestable superiority over the negro tribes, their sole means of existence was the slave trade and brigandage. Since the French occupation, some sections of them have taken service with Europeans, while others have left the country and entered the service of the Sanūsīya.

Of Arab origin, like the Ūlād-Slimān, the Shoa have been long established in the Sūdān. But if they have retained the use of the Arab language, which they speak quite purely, their physical type has been markedly altered by mixture with the black population. The Islām which they profess is fairly strict among the tribes of the north, where many of them are affiliated to the Tidjāniya brotherhood; among the tribes of the south, however, their faith has been contaminated by fetishist practices and the orthodox regard them as *kirdi*, i. e. idolaters. The Shoa live almost entirely by cattle-rearing; nomads in the dry regions near the desert, they become settled in the moister southern regions. They are represented in Kanem by the Ūlād Serrar, the Bant Wail and the Dagana of the Bahr al-Ghazal.

The Tubu or Teda, who came originally from Tibesti, are fairly numerous in Kanem. But, as

a result of contact with negroes, they have lost some of their distinctive features, notably the slimness of the body and elasticity of gait. They are also much less fanatical than their kinsmen who have remained among the mountains. Lastly, while the Tubu, strictly so-called, are nomads and live almost entirely by brigandage, the Tubu of Kanem or Dazagadā Konumā are for the most part settled. They follow agricultural pursuits, for which they are not fitted, without great success. The principal bodies of them are the Gadoā, the Warabba, the Dogorda and the Yorūmma, related to the Kasherda of the Baḥr al-Ghazal. Their language is connected with the Kanuri spoken in Bornū.

The Tundjur are the descendants of Hilālī Arab tribes, who, after sojourning around Tunis, migrated to Dār Fūr at the end of the fifteenth century. There they passed to Wādaī and finally settled themselves in Kanem towards the middle of the seventeenth century. Much mixed with negroes since then, they form a group intermediary between the Arabs, the Kanembū and the Tubu. Arabic is their proper language, but they also speak Tubu and Kanembū. They are found especially in the region of Mondo and acknowledge the authority of a chief called *fugbu*.

History. According to the Arabic sources studied by Marquart, who modifies on this point the data of Barth (cf. BORNŪ), the kingdom of Kanem seems to have been founded by the Zoghāwa, whose territory extended in the ninth and tenth centuries A. D. from Dār Fūr to Lake Tchad and Kavar. Al-Bakrī mentions the inhabitants of Kanem as idolators and al-Idrīsī seems also to consider them as such. Some time after the tenth, but not later than the twelfth century, Kanem was occupied by the Tubu (Teda) who came from Borku and Tibestī, conquered the Zoghāwa and introduced Islām. This occupation seems to coincide with the accession to the throne of the Yazanīs, who claimed to be descendants from Saif b. Dhi Yazan [q. v.] and became the disseminators of Islām, which had been introduced by al-Hādī al-ʿOṭhmānī, the predecessor of the Yazanīs. The *Kitāb al-Istibṣār* (ed. von Kremer, Vienna 1852, p. 32, transl. Fagnan, p. 61) places the conversion to Islām of Kanem about 500 = 1106/7. According to a Hausa legend, Abū Zaid al-Fāzāzī (end of the xiith and beginning of the xiiith century) preached Islām in Kanem and Borku. Another tradition refers the introduction of Islām to the beginning of the twelfth century, in the reign of King Ouné. In any case this religion was solidly established in Kanem in the thirteenth century. Some Muslims from Kanem founded a Maliki school in Cairo between 640 and 650 (1242—1252). The soi-disant descendants of Saif remained in power as long as the kingdom existed. They preserved their complexion "fair like the Arabs" down to Selma'a, son of Bikoru, who was the first negro king of the country. This dynasty considerably extended the kingdom of Kanem, the boundaries of which were carried by Dunama I, Selma'a and Dunama II up to the frontiers of Egypt. The Sultāns of Kanem maintained friendly relations with the Ḥafṣids. A rapid decline followed this period of prosperity. The Būlala, a Kanembū tribe which at the beginning of the xivth century A. D. had withdrawn to the S. E. of Lake Tchad, attacked the Sultāns of

Kanem and after a century of incessant fighting ended by conquering the country. Ndjimi, capital of Kanem, was taken by the invaders. Sultān 'Omar b. Idrīs (796—800 = 1394—1398) had to retire to the country west of Lake Tchad, where one of his successors founded the kingdom of Bornū [q. v.]. In the sixteenth century the sovereigns of the new state in their turn took the offensive against the Būlala in order to re-conquer Kanem. This end was achieved by Idrīs Katakarmabi (1504—1506 A. D.). The conquered Būlala had to pay tribute and Kanem became a province of Bornū. The submission of the Būlala remained, however, somewhat precarious. During the xvth century the Sultāns of Bornū found themselves forced to resort to force in order to oblige their neighbours to respect the treaties that had been made. Thus we find Idrīs Alaoma (1571—1603) sending five expeditions against the Būlala, who were supported by the Tubu. The Sultān of Bornū was victorious over his adversaries but his authority and that of his successors were hardly recognised except by the people around the shores of the Lake; the interior of the country slipped from them. Very soon the weakening of Bornū enabled the Būlala to recover their independence. But towards the middle of the xviith century they were in their turn conquered by the Tundjur from Wādaī. They then left Kanem and went to settle in the west of Baḥr al-Ghazal, then in Fitri, where their descendants still are to-day. The Tundjur imposed their authority on the various peoples of Kanem but had to endure the attacks of the Bornūans who drove them into the region of Mondo and reduced them to the state of tributaries. The Bornūan troops, commanded by a Hausa slave named Dalafna, settled permanently in Kanem, where their descendants are known as Dalatua. Their chief (*alifa*) settled at Mao and became the representative of the Sultān of Bornū, to whom he paid an annual tribute. This restoration of the Bornūan suzerainty was of short duration. From the beginning of the xixth century Kanem was attacked by new enemies, the Wādaīans, who claimed the country as a former possession of the Būlala settled in Wādaī. The Sultāns 'Abd al-Karīm Sabūn (1805—1819) and Muḥammad Sharif occupied parts of the south almost without striking a blow. Bornū, invaded by the Fulbe, was unable to intervene, and Kanem occupied with the feuds of the Tundjur and Dalatua was in a state of complete anarchy. The Dalatua ended by triumphing over their rivals but recognised the suzerainty of Wādaī. Their chief, the *alifa* of Mao, received the title of *aguid al-baḥr*, and became the representative of the Sultān of Wādaī, in the name of whom he gave investiture to the Kanembū and Ḥaddād chiefs. The natives who would not submit to the Wādaīans took refuge in the islands of Lake Tchad. The arrival of the Ulād Slimān (1846) provoked new disorders. Driven out of Fezzān by the Turks these nomads reached the country north of Lake Tchad and began to plunder it. Severely defeated by the Tuaregs in 1850 they moved on to Bornū. The Sultān then took into his service the remains of the tribe and entrusted the Ulād Slimān with the defence of the frontier against the Wādaīans. The Ulād Slimān took advantage of this to reconstitute themselves and to plunder friends and enemies without distinction.

At the period of Nachtigal's visit to Kanem

1871) they were the real masters of the country. The Tundjur of Mondo tried to resist them but being decisively beaten in 1883, they were reduced to slavery. The Haddād of Ngumo alone succeeded in keeping in check these nomads, who dreaded their poisoned arrows.

The situation was none the less much disturbed. The Kanembū and the Haddād were fighting between themselves while the Wādaian made frequent incursions. Finally, after the death of Ṣaiḥ ⁶Abd al-Djalil, the various factions of the Uḷād Ṣlimān began to fight with one another.

The French occupation put an end to this anarchy. Kanem was included in the zone of French influence, as determined by the Anglo-French agreement of March 21, 1899. After being visited by the Joalland and Foureau-Lamy missions (1900) it was effectively occupied between 1901 and 1905. Accepted without opposition by the Kanembū, European domination met with an obstacle in the hostility of the Sanūsīya, who in 1900 established a zāwiya at Bi'r Alali, in the north of Kanem. Muḥammad al-Barrānī, the deputy for the grand master of the brotherhood, at the head of bands of Arabs from Tripolitania, Tuaregs and Uḷād Ṣlimān, endeavoured to arrest the advance of the French. The evacuation of the zāwiya in 1902 determined a number of the Uḷād Ṣlimān to abandon the struggle. The malcontents, who had been joined by Tubu brigands, continued hostilities down to January 1905, when their chief, Ṣaiḥ Aḥmad, finally made his submission.

K'ANGHRI (also written KANKRI, with the subsidiary form Cangri), capital of the liwā (administrative district) of the same name in the

wilāyet (province) of Kaṣṭamūnī, on the Adḡ Ṣu, a tributary of the Kizıl İrmak (Halys), the ancient Gangra, famous even in ancient times as a stronghold, was sometimes used by the Byzantines as a place of banishment and later in the wars with the Arabs and the Dānīshmand-Oghlu again became important on account of its almost impregnable citadel. On their campaigns against the Byzantines the Umayyads repeatedly penetrated as far as Khandjara (variant Djandjara), e.g. in the year 93 = 711/12 (al-Ṭabari, ed. de Goeje, ii. 1236 = Ibn al-Aṭḥir, ed. Tornberg, iii. 457; al-Ya'qūbī, ii. 350, who calls the town Iḥṣan al-Hadid), in the year 109 = 727/28 (al-Ya'qūbī, ii. 395) and in the year 114 = 731/32 (Bar-Hebraeus, *Ketāb de Maḥkūbāt Zabmē*, ed. Bruns and Kirsch, ii. 125; cf. al-Ṭabari, ii. 1561, and Theophanes under the year 6224). When as a result of the defeat at Mangikert in 1071 the eastern frontier provinces were abandoned by the Byzantines, the Saldjuks and the Dānīshmand-Oghlu shared the spoil: the former established themselves in Konya, while the latter spread through the northern half of Asia Minor from Amasia to Kaṣṭamīnī; among the conquests of the first Dānīshmand-Oghlu in 468 (1075/6) we find Kianghri mentioned; cf. *Tārīkhī Abī Dānīshmand* in Amāsīyā Husain Ḥusām al-Dīn, *Amāsia Tārīkhī*, Stambul 1322, ii. 286 sqq.; Hezārfenn, *Tanḳīḥ al-Tawārīkh* in the *Z. D. M. G.*, xxx. 470. In the year 1101 an army of Crusaders left Constantinople for the land of the Dānīshmand-Oghlu, in order to liberate Boemund of Antioch, who had been captured by them at Malāṭya and imprisoned in Niksār, conquered Angora and reached Kianghri (= praesidium Gangara), but the attack on the fortress failed and soon afterwards the army was completely wiped out by the allied Saldjuks and Dānīshmand-Oghlu at Amāsia (Albertus Aquensis, liber viii. caput 8; Ibn al-Aṭḥir, ed. Tornberg, x. 203; cf. *Z. D. M. G.*, xxx. 476; Chalandon, *Les Comnènes*, i. 224 sqq.). The emperor John Comnenus captured Kianghri in 1134 with the help of his heavy siege artillery, after having stormed it in vain a year before (*Chronicle* of Niketas, i. ch. 6 and especially also Joannes Prodromos; see Chalandon, *op. cit.*, ii. 84 sqq.); but very soon after the departure of the emperor the fortress was retaken by the Dānīshmand-Oghlu and never again passed into the hands of the Byzantines. In the period following we find Kianghri in possession of the Saldjuks of Konya (see Chalandon, *op. cit.*, passim). After the decline of the Saldjuk empire Kianghri belonged to the territory of the Isfandiār-Oghlu of Kaṣṭamūnī, was taken from them in 795 = 1392/3 (so Neshri) or 797 = 1394/5 (so 'Ashik-pashazāde and the anonymous Ottoman chronicles) by Bayazid I with the greater part of their lands, but restored to them by Timūr in 804 (1401) and finally in 822 (1419) definitely annexed by Meḥmed I ('Ashik-pashazāde, *Tārīkh*, p. 88 sq.; Leunclavius, *Historiae Musulmanae Turcorum*, Frankfurt 1591, col. 475; the statements of von Hammer, *Gesch. des Osman. Reiches*, i. 70, 248 and ii. 176 are due to a misunderstanding). In the period of peace that now followed under Ottoman rule, Kianghri falls completely into the background: it is scarcely mentioned by the historians; we have, however, full descriptions of the town from Ewliyā, *Siyāhetnāme*, iii. 250 sq., and Hādjdī Khalifa, *Dihānnumā*, p. 645. Among European

travellers we find it first mentioned in 1553—55 by Dernschwam in his *Tagebuch einer Reise nach Konstantinopel und Kleinasien*, ed. Babinger, Munich 1923, p. 196; nearly 300 years later Ainsworth was the first European to describe it from his own observations and in our own time it has been occasionally visited and described by German explorers in Asia Minor. The castle, in its day stormed by Arabs, Dānīshmand-Oghlu, Byzantines and Crusaders, lies in ruins; the tomb still survives of Karategin, who captured the town for the first Dānīshmand prince and is now revered as a saint. The system of cisterns, which dates from pre-historic times, on the castle hill, which Ewliyā and Hādījī Khalifa fully described, has not yet been closely examined, nor has the "Medjīd Tash" (Tash Masjid), i. e. the monastery of the Mewlewī dervishes, with its inscriptions, which, as Ainsworth was told, are said to date from the Arab Caliphs. Of the 27 large and small mosques some are said to date from the Byzantine period (see Cuinet); the principal mosque was built by Sulaimān I in 966 (1558/9).

The extensive deposits of rock-salt at Maghāra, two hours south-east of Kianghrī (Cuinet, iv. 427 and Märcker) are famous; their product was known even to the Byzantines under the name Γαγγυρὸν ἕλας; (Nikolaos Myrepsos, end of the xiiith century, in Du Cange, *Glossar. ad scriptores med. et inf. Græc.*, s. v.). The severe earthquakes, which have repeatedly shaken the town in modern times, are mentioned in the mediaeval ages also; al-Kāzwinī, *Athār al-Bilād*, ed. Wüstenfeld, p. 368, gives a full account of one of these catastrophes, which destroyed the town in Aug., 1050.

The number of inhabitants may be approximately estimated at 30,000 in 5,000 houses; among them were about 150 Greek and 50 Armenian families, who may now have left it as a result of the Great War.

KĀNĪ. ABŪ BAKR, a notable Ottoman poet and prose stylist of the old school. Born in 1124 (1712) in Tokad in Asia Minor, while still a young man he attained a great reputation in his native town as a stylist and poet. He belonged to the Mewlewī order and was allotted to the *Shāikh* of the Mewlewī monastery in Tokad to serve him. An important landmark in his career was the passing of Hākīm Oghlu 'Alī Pasha through Tokad in 1168 (1754/5); he had been summoned from Trebizond to Constantinople to fill the office of Grand Vizier for the third time. Kānī presented him with a *kaşida* of welcome and a chronogram which made such an impression on the aged statesman that with the permission of the *Shāikh* of his order he at once took him to Constantinople and procured him a position in

the imperial Diwān. The way to the highest offices of state was thus opened to Kānī; but ambition was foreign to his nature. The careless and somewhat unrestrained life that he had been leading in his native town — he was only a lukewarm Muslim and only at the end of his long life returned again to the devout life of the order — seemed to him more desirable; so he took advantage of the fall of his patron, which took place after only two months of office, to give up his position in Constantinople. Henceforth his activities lay mainly in the provinces: — in Silistria, in Wallachia and in Bucharest. He acted for a considerable time as Diwān secretary to the voivod Alexander; there is a picture of them together in the Museum of Sinaya. Finally Yegen Mehmed Pasha, who had previously been a close friend of his, summoned him to Constantinople, when he became Grand Vizier (1196 = 1782). But this brought nothing but misfortune to Kānī. Kānī showed himself indifferent to all ceremony and conducted himself towards the Grand Vizier with as little politeness as in the old days when there was no difference of rank between them. He also chattered about matters that should have been kept secret. Yegen Pasha enraged at this had him condemned to death and it was only with difficulty that the punishment was reduced to banishment to Lemnos. All his property was confiscated, so that he had to struggle with poverty. He died in Rabī' II, 1206 (Jan.-Feb., 1792) and was buried in Aiyūb. Surūrī and Sümbül-Zāde Wehbī composed chronograms on his death.

Kānī is one of the most remarkable figures in Ottoman literature of the post-classical romantic period during which Persian influence died down and was replaced by a more national spirit. As a poet Kānī was not specially distinguished; he even lacks one of the principal features of most Ottoman poets: smoothness and polish of language. In his poems there are many inequalities and harsh passages: this is closely connected with his manner of working and his habit of extemporising verses on any stimulus or on any occasion. Kānī himself, it should be added, never collected and arranged his poems nor put the finishing touch to his *Diwān*. Only at the instigation of the Re'isü 'l-Kuttāb Mehmed Rāshid Efendi were the poems which could still be found in existence collected by Nūrī and the *Diwān* published. A portion of the poems have been lost. He wrote poems in Arabic and Persian in addition to Turkish.

His poetical works consist of numerous hymns, *naẓīra*'s and *takhmīs*, *kaşida*'s, chronograms and some hundreds of *ghazels*. What distinguishes his poems from those of other poets is his fondness for wit and humour, his humorous phraseology, while otherwise humour is entirely lacking in the old Ottoman poets.

A much higher estimate must be placed on Kānī as a prose-writer in his *Münshā'āt* and we have the very high opinion expressed by Abū 'l-Ziyā Tawfīk that, as regards his style, a nation produces not more than five or six of his rank. In his letters Kānī gives rein to his humorous mood and produces the most peculiar and unexpected flowers of speech. He might be compared with Rabelais. Many witty sayings and anecdotes of him are recorded. His happy disposition and his humour made him thoroughly

popular and gave his hearers and readers that attraction to him, his letters (of which about 120 exist) and his poems, which is only partly intelligible to our taste and ideas. His works are especially important for the phraseology, as he often uses popular expressions not found in the literary language and says most unusual and unexpected things.

(TH. MENZEL)

KANĪSA (plural *kanā'is*), synagogue, church, the arabicised form of the Aramaic *kenishā* "meeting (place), school, synagogue" (cf. J. Levy, *Neuhebr. und Chald. Wörterbuch*, ii. 359 sq.). The Syriac form *kenūshā* in the Peshittā on the New Testament is a rendering of συναγωγή and sometimes also of ἐκκλησία (cf. Payne Smith, *Thesaurus Syr.*, i. col. 1773), whereas the form *kenishā* in Christian Western Aramaic represents συναγωγή as well as ἐκκλησία (cf. Schulthess, *Lex. Syropal.*, Berlin 1903, p. 95). The latter term is nearly always rendered by 'idā in the Peshittā *The Lisan al-'Arab*, viii. 83, 2 sq. is nearly right in so far as it derives *kanisa* from *kunishā*; al-Khafādī (*Shifā al-Ghalīl*, Cairo 1282, p. 195), however, rejects this view and expresses the opinion that the word denotes an especially Christian institution and goes back to *kalisa*, an abbreviated form of *kalisiyā* (ἐκκλησία). Al-Bustānī also considers the word as being the arabicised *ἐκκλησία* (*Muḥīt al-Muḥīt*, Beyrouth 1286, p. 1847a).

In Arabic *kanisa* denotes the Jewish as well as the Christian place of worship; this appears also from the various statements of the lexica; some refer to churches, others to synagogues exclusively (cf. al-Djāwharī, *Ṣaḥāḥ*, Bülāḳ 1282, i. 473 ult.; al-Zamakhsharī, *Asās al-Bawāgha*, Cairo 1299, ii. 212, 20; *Lisān al-'Arab*, loc. cit.; Yāqūt, *Mu'djam*, ed. Wüstenfeld, iv. 314, 7). According to al-Firzābādī, *al-Kāmūs*, Bülāḳ 1272, i. 549 1, *kanisa* denotes the place of worship (*muta'abbad*) of the Jews, the Christians or the Kāfir's; cf. also *Tādj al-'Arūs*, iv. 235 infra.

In early literature *kanisa* is often found in the meaning of "church" Two documents on papyrus of the year 88 (707) mention the church of a monastery called (*Munyaṭ*) *Kanīsat Mārya* in Egypt (*Papyri Schott-Reinhardt*, i., ed. C. H. Becker, Heidelberg 1906, p. 111, g, line 4, p. 112, i, line 4). In a satirical verse Djarīr speaks of the churches of Taghlib (al-Mubarrad, *al-Kamil*, ed. Wright, p. 485, 5) The treatise which 'Umar or his generals are said to have concluded with the inhabitants of several towns usually contain stipulations concerning the *kanā'is* (al-Balādhurī, *Futūḥ al-Buldān*, ed. de Goeje, p. 173; al-Ya'qūbī, *Tārīkh*, ed. Houtsma, ii. 167, 18; al-Ṭabarī,

i. 2405, 8 sq., 2588, 7; Eutychius, ed. Cheikho, ii. 17, 7; Ibn 'Asākir, *al-Ta'rikh al-kabir*, Damascus 1329 sqq., i. 178; cf. also Abū Yūsuf, *Kit. al-Kharāj*, Bülāḳ 1302, p. 80). In the Ḥadīth it is related how Umm Ḥabiba and Umm Salama told the Prophet of a church in Abyssinia adorned with images (al-Bukhārī, *Ṣaḥīḥ*, bāb 48, 54; *Djānā'iz*, bāb 70; *Manāḳib al-Anṣār*, bāb 37).

Kanisa further occurs with a following noun in the genitive, e.g. *Kanīsat Hanas* (in Alexandria, Yāqūt, *op. cit.*, i. 257, 32), K. al-Ghurāb (on Cape St. Vincent in South Portugal, Yāqūt, *op. cit.*, i. 377, 19; al-Idrīsī, *Nuḥat al-Mushtāk*, partly ed. by Dozy and de Goeje, text, p. 180; transl., p. 218), K. al-Kaff (in Egypt, with an impression of Jesus' hand, Yāqūt, ii. 22, 2 sq.), K. Yuhannā and K. Maryam (in Damascus, Yāqūt, ii. 591, 10, 596, 23); K. al-Kumāma (Church of the dust heap, an intentional corruption of K. al-Qiyāma, Church of the Resurrection, in Jerusalem, al-Mas'ūdī, *Murūdī al-Dhahab*, Paris 1861—77, i. 111; iii. 405; cf. also G. Le Strange, *Palestine under the Moslems*, London 1890, p. 141 sq., 202 sqq.), K. al-Baghūta (al-Bā'ūḥa; in al-Hīra, al-Hamdānī, *Ṣifāt Djazīrat al-'Arab*, ed. D. H. Müller, p. 127, 2), etc.

Al-Makrīzī denotes synagogues as well as churches by the word *kanisa* (*al-Khiṭaṭ*, Bülāḳ 1270, ii. 464 sqq., 510 sqq.).

In Spain and in the Maghrib the Form *Kanisiya* (perhaps influenced by *iglesia*) was in use; it is still current in Morocco and Tunisia (vgl. Dozy, *Supplément*, ii. 493).

In the modern language *kanisa* denotes a church, *kanis* a synagogue (al-Bustānī, *loc. cit.*). For the Egyptian dialect cf. S. Spiro Bey, *Arabic-English Dictionary*, 2nd ed., Cairo 1923, s. v.).

Al-Kanisa or al-Kanisa al-Sawdā' was a town with a stronghold in the frontier province of Northern Syria, which Hārūn al-Rashīd restored from its ruins (Yāqūt, iv. 314; cf. i. 927, 20; al-Iṣṭakhārī, *BGA*, i. 63, 7; 68, 3); vgl. Le Strange, *op. cit.*, p. 477 sq.). — Al-Mukaddasī, *BGA*, iii. 2, 453, 9) mentions a place K. al-Madjūs at a day's journey from Arradjān. — A harbour in Yemen on the Red Sea in the neighbourhood of Zabīd also bore the name of al-Kanisa (al-Firzābādī, *loc. cit.*; *Tādj al-'Arūs*, loc. cit.). — According to *Tādj al-'Arūs*, loc. cit., Kunaisiya occurs in several names of places in Egypt.

On the rules for churches laid down by the Muslims cf. the art. NAṢĀRĀ.

Bibliography: In addition to the literature mentioned in the art. cf. S. Fränkel, *Die aramäischen Fremdwörter im Arabischen*, Leiden 1886, p. 275. (C. VAN ARENDONK)

KANO (in Hausa KANU), a town in the Central Sūdān 300 miles west of Kūka and 290 E. S. E. of Sokoto, 1200 feet above sea-level, situated in 12° 27' N. Lat. and 8° 20' E. Long. (Greenw.). Kano lies in the middle of a marshy plain dominated by the isolated rocky hills of Goron Duchi and Dala. The town is surrounded by a fortified wall (*birni*) 20 to 25 feet high and measuring, according to Barth, nearly 20 miles in circumference. A portion of the area thus mapped out is occupied by tilled fields especially in the West and North-west. The houses are grouped in the South between Dala and the wall. The town divided into two by a marshy pond called Djakara (Robinson: Jakhara) is formed of mud

houses. Only the houses of great personages or of Arab traders or rich Hausa merchants are provided with an upper story. The number of inhabitants, estimated by Barth at 30,000, would, according to Monteil, amount to 50,000 or 60,000, according to Robinson, to 100,000, according to the reports of the English officials in Nigeria, to 200,000. This population comprises very diverse elements, Hausa, Fulah, Kanūri and Arab; of whom 2/3 (Robinson) or 4/5 (Monteil) are slaves. In addition to the fixed population there is a very large floating one, reaching, according to Monteil, the figure of two million individuals a year.

This accession is explained by the economic role of Kano, the commercial metropolis of the whole of the Sūdān and at the same time a much frequented stage on the pilgrim route to Mekka. Representatives of all the negro races from the mouth of the Niger and Senegambia to Bornū and Wadai meet there with Tuaregs and Arabs from Ghadāmes and Tripolitania. Every day a market is held there attended by over 30,000 people. Business is done through the intermediary of brokers, and owing to the scarcity of currency settlements are made most often with cowries; some transactions are carried through by simple barter. The principal articles of commerce are clothes and garments of local manufacture, leather, salt brought from Bilma, natron and above all the *kola* nut from the Western Sūdān, which is perhaps the most important element in the commerce of Kano. To these we must add sugar from Egypt, gunpowder, paper, iron-mongery, cotton goods of European origin, ostrich feathers and ivory to a small extent and finally slaves. The articles sent to or brought from Ghadāmes or Tripolitania are carried by Arabs settled in Kano to the number of 400 or 500. But the Sūdānese trade, which makes up 4/5 of the total transactions, is entirely in the hands of Hausa merchants.

Kano is not only a great centre of commerce; it is also a centre of native industries. Weaving and dyeing flourish there. The manufacture of cotton goods is so active that the town has been given the name of the "Manchester of the Sūdān." Robes (*tobe*) dyed black are much esteemed and exported to all the neighbouring lands. Metal work occupies numerous smiths, who make hunting spears and stirrups as well as ornaments in copper and silver. The leather dyed yellow and red called morocco is very much esteemed and exported as far as Morocco and the markets of Tunisia and Tripolitania. The same is the case with the leather sacks indispensable for caravans.

The province of Kano is very fertile. As early as the xvth century we find Leo Africanus remarking the abundance of cattle, the richness of the soil, the extent of the fields of rice, cereals and cotton. The observations of modern travellers coincide with those of this early writer. The province of Kano, says Barth, includes 27 walled towns with 300,000 inhabitants and an equal number of slaves. "All the ground", says Monteil, "is cultivated for a distance of 60 miles round the town." Robinson notes the large number of separate farm places surrounded by plantations of tobacco, indigo, cotton and dura (*sorghum vulgare*).

A tradition noted by Robinson attributes the foundation of Kano to a group of refugees from Daura, a place three days' journey to the North, led by a certain Kano, son of Bawo. The latter, it

is said, built a new town at the foot of the rocks of Goron Duchi and Dala, on the top of which two villages had long been planted. According to Barth, Kano was the son of Bitan and brother of Daura. He would thus be one of the seven "legitimate Hausas" (see HAUSA, ii. 291^b). Another tradition to the effect that Kano had been appointed by his father *Sarikin baba*, i.e. chief of the dyers, attests the antiquity of this industry in the town. The date of the foundation is uncertain but it seems that by then Kano was already of some importance. In the second half of the xvth century A. D. education was held in honour in the town. Scholars had settled there on returning from the pilgrimage and were teaching theology and Maliki law. The celebrated 'Abd al-Kādir al-Marḥili taught there. At the beginning of the following century, Leo mentions Kano as a town filled with rich merchants and artisans. These facts seem to invalidate Barth's statement that at this date Kano could only have been a citadel built on the rock of Dala. The king of Kano had subjected to his authority the kings of Zegzeg and Katsena, but he was in his turn conquered by the Sulṭān of Timbuktu, Muḥammad Askia, and was reduced to the state of a tributary. Later the kings of Kano had to endure incessant fighting against the Sulṭāns of Bornū, who even annexed Kano to their empire. The Bornūan governor, however, was driven out by king Korafa and Kano regained its independence. The invasion of the Fulah at the beginning of the nineteenth century increased the commercial importance of Kano, as the merchants of Katsena sought refuge there after the capture of the latter town by 'Othmān Dan Fodio in 1814. Kano was, however, not long in falling in its turn. On the dismemberment of the Fulah empire, the town was included in the kingdom of Sokoto. The country was administered by a governor (*serki*), who paid the Sulṭān of Sokoto an annual tribute (100 horses, 15,000 robes and other garments, 10,000 turbans etc. in the time of Barth). The Anglo-French agreements of Aug. 5, 1890 and June 14, 1898 having placed Sokoto within the zone of British influence, British representatives attempted to settle in Kano. These first attempts were unfortunate. Rev. C. H. Robinson (1893) and Wallis, a British official of Nigeria, were able to visit the town where the French traveller Monteil had already spent three months (1891—1892) in his journey from St. Louis to Lake Tchad, but Bishop Tugwell's mission was badly received and he had to withdraw. The effective occupation of Kano only took place in 1908 after a military expedition led by Sir Frederick Lugard.

(G. YVER)

KANSU, a frontier province in the north-west of China proper; it is bounded on the south and east by the provinces of Sze-chuan, Shensi and Shansi, in the west and north by the territory of Kukuor, Chinese Turkestan (formerly included in Kansu, but since 1884 the separate province of Sin-Kiang) and Mongolia. With its present area of 5910 geogr. sq. m. = 125,483 sq. miles, Kansu is the third largest province of China but as regards density of population it is lower than all the other provinces of China with the exception of Kuangsi. The province first formed under the Emperor Kūbilāi in 1282 A. D. is said to have received its name from two towns in the extreme north-west, Kančou-fu and Sučou; both towns are already mentioned in the *Khudūd al-'Ālam* and in Gardizi (cf. W. Barthold, *Ōket o poezdke v Irednyuyu Aziyu*, p. 92), the former in the form *Khāmčū* (in the Mongol period *Kāmčū* or *Qāmčū*), the second as *Sakhčū* (later *Shukčū* or *Sūkčū*).

Down till the xiiith century A. D. this territory was for the most part under the rule of foreign peoples of Turkish (Uigur) or Tibetan (Tangut) origin; immediately before the Mongol conquest there was a Tangut kingdom here under the rule of the Hsia (or Si-hia) dynasty (1032—1227) with its capital in Ning-hia. Rashīd al-Dīn (ed. Blochet, p. 484 sqq.) in giving a list of the twelve provinces (*shink*, chin. *shin*) reckons two with capitals Kīnčānfū (now Sian-fu, capital of Shensi) and Kāmčū (Kančou) respectively to Tangut (Tangūt). In reality Kančou was at this time the capital of Kansu; Kansu and Shensi then as now combined in one governorship, the only difference being that the residence of the governor was in the capital of Shensi and not, as now, in the capital of Kansu. The boundary between Kansu and Shensi was formed by the Hoang-ho, so that the present capital of Kansu, Lančou-fu, then belonged to Shensi. In connection with Kīnčānfū Marco-Polo (ed. Yule and Cordier, ii. 24) mentions prince Mangalai (d. 1280; called Mīngkālā by Rashīd al-Dīn), Kūbilāi's third son, as ruler of Tangut, while Rashīd al-Dīn (p. 495 sq.) gives his son Ananda; Rashīd al-Dīn says that Ananda was the founder of the dominance of Islām in this region. He was born about 1270 (in the early years of the viiith [xivth] century, he was 30 years of age, *ibid.*, p. 603, 6) and was brought up by Muhammadan foster-parents (*ibid.*, p. 599 sq.); but it was only after the conversion of Sultān Ghāzān in Persia (i. e. about 1295; cf. GHĀZĀN, ii. 1149 sq.) that he openly professed Islām (Rashīd al-Dīn, p. 602). The greater part of his army, said to have numbered 150,000 men, was converted to Islām (*ibid.*, p. 600); the people of Tangut, except the peasants, likewise adopted Islām (*ibid.*, p. 599). Taken to task by his cousin, Kūbilāi's

successor Timūr (1294—1307), for his conversion, Ananda remained faithful to Islām and after a period of interruption was restored to his dominion. In 1307 a party wished to raise him to the throne; he was therefore killed after the success of another claimant, Timūr's nephew Khaishān (1307—1311) (d'Ohsson, *Histoire des Mongols*, ii. 525 sqq.). Not till 1323 was Ananda's son Ūruktimūr again appointed prince of Tangut (Blochet, in Rashīd al-Dīn, p. 362, note c).

As Marco Polo (ed. Yule and Cordier i., 203 and 219) shows, there were already Muslims in Kansu before Ananda's day; on the other hand he says nothing about the dissemination of Islām south of the Hoang-ho (cf. the erroneous statement in the article CHINA, i. 851, following *Mission d'Ollone*, p. 435, that Marco Polo mentions "the presence of Muslims in the province of Yunnan only"). The Turkī speaking Salar (cf. CHINA, i. 850), who live at the present day on the south bank of the Hoang-ho, are mentioned as living there as early as the Ming dynasty (1368—1644) and described as unruly subjects (W. W. Rockhill, *The Land of the Lamas*, London 1891, p. 40), although no Muhammadan risings are mentioned for this period. The story which reached Timūr's lands about 1398 to the effect that the founder of the Ming dynasty had had about 100,000 Muslims slaughtered and had completely rooted Islām out of his kingdom (Niẓām al-Dīn Sha'mī and 'Abd al-Razzāk al-Samarqandī in Barthold, *Uluglek*, Petrograd 1918, p. 42 sq., note 6) finds no confirmation in any Chinese source. Under Manchu rule (from 1644) risings of the Muslims of Kansu are mentioned by 1646 and 1648 and have been several times repeated in the xviiith and xixth centuries.

In Kansu those who profess Islām are at the present day certainly more numerous than in the other provinces (the figures are very variously estimated; cf. the article CHINA, i. 847). The most important centre of Muslim life and culture was until quite recently Iločou (south-west of the capital Lančou-fu), "the Chinese Mekka". Iločou was at an earlier date considered a purely Muslim city (about 30,000 inhabitants); in the year 1884 the traveller G. Potanin (*Tangutsko-Tibetskaya Otkrytie Kitaya*, St. Petersburg 1893, i. 169) was told that there were no longer any Muslims at all there; later the Muslims were only allowed to live in a separate suburb there (*Mission d'Ollone*, p. 235). The Muhammadan area in Kansu is divided into two separate tracts, Iločou-Sining in the south-west and Ninghia-Kintsip'u in the north-east; in the intervening area the Chinese have built hill-forts (*ibid.*, p. 253). Kintsip'u, sometimes called "the Chinese Medina", was first founded by the religious reformer and leader of a rebellion, Ma Hua-lung (cf. CHINA, i. 849).

In the xviiith century there still seem to have been more Muslims in Shensi than in Kansu (Dabry de Thiersant, *Le Mahométisme en Chine*, i. 41 and 156); their language and dress were also different from those of the Chinese (*ibid.*, p. 155). This suggests that the modern Dungsans or Tungans (cf. CHINA, i. 850) did not adopt the Chinese language until a later date.

The rebellions were usually local movements, not general risings under the banner of Islām. During the great rebellion in Kansu, which began in 1871, there was perfect quiet in Shensi (Dabry,

op. cit., i. 159). The rebellion which had begun in 1861 or 1862 in Shensi was only spread to Kansu by the expulsion of the rebels from Shensi. The fighting was carried on with even greater bitterness in Kansu than in Shensi and had the most disastrous effects on the Muslim population as well as on the economic prosperity of the province generally. Just as at an earlier period the number of Muslims in Shensi had been considerably reduced by the expulsion of the rebels into Kansu, so now (since 1872) a considerable part of the Muslim population of Kansu has migrated westwards under the leadership of the valiant Boyan-akhūn. The birthplace of Boyan-akhūn (also written in Chinese Bo-yan-hu or Pai Yen-hu; his Muslim name was Muḥammad Ayyūb) is variously given; he had lived for a long time in Peking and only moved to Kansu shortly before the rising. In December, 1877, Boyan-akhūn with the remainder of his army crossed the Russian frontier into Semirečye; the Chinese authorities demanded (of course without success) that he should be handed over to them. After his death in 1883, he was celebrated in songs as a national hero by the Dungans settled in Semirečye; whether his memory is still revered in Kansu also, does not seem to have been ascertained. The last rising (1895/1896) was started by the Salar and is said to have been provoked by the proclamation of their Chinese governor ordering that in future one Chinese should be regarded as equal in value to ten Muslims. There seems to have been no activity in Kansu against the present Republican government.

KĀNŠŪH, AL-MALIK AL-AŠHRAF SAIF AL-DĪN min Baiberdi (i. e. Baiberdi's Mamlūk) AL-ĠHŪRĪ (originally pronounced in Eastern Persian with *ō* and later there and in Egypt with *u*), of the "al-Ġhūr" division of Mamlūks from Afghānistān, which was specially instructed in the Korān and theological subjects. He served for a long time as a *khāṣṣki* (lifeguard) and *Djamaār* and only when he was about 40, he became governor of the province of al-Bahriya [see BAHRĪYA], and in 893 (1490) *Hādīb* [q. v.] al-*Huḍjīdīb* (president

of the military court) in Aleppo, where he gave proof of his great energy in the suppression of a rising. In 903 (1497) he became *Muḥaddam al-ulīf* (commander of a thousand Mamlūks) and two years later *Ra's nawbat al-Nuwwāb* (commander of the Mamlūk officers) under Sulṭān Džānbālāt [q. v.]. The latter's rival and successor Ṭamānbāi I during his brief reign in 906 (1500) appointed him Grand Dawādār [see DAWĀTDĀR] and, as often happened in the last period of the Mamlūk dynasty, at the same time Grand Ustādār (Grand Chamberlain), vizier and *Kāshif al-Kushāf* (chief inspector of domains). The choice of the Mamlūks therefore, as a result of his high position, naturally fell upon him, when after a few months they were discontented with Ṭamānbāi; after considerable hesitation he accepted, as he was now over sixty. By inflicting heavy taxes and levies and issuing a depreciated currency he ruthlessly raised the money to pay the old Mamlūks and to buy new ones in order to create a following. In his financial measures he did not even respect the privileges of the pious foundations and by depreciating the currency injured commerce and trade, and extorted money from merchants, women, eunuchs and from his own court-officials down to the very door-keeper. All this is made a very grave reproach against him by his contemporaries; it was even cast up against him in the Friday sermon. The chroniclers number him among the "bad Sulṭāns". He hurried on the financial ruin of his country by over-heavy taxes on the sales of goods and by oppressive customs duties, even although he made good use of a great part of the money by strengthening fortresses (notably Aleppo), making roads and wells in the Hidjāz and in providing water by good aqueducts (e. g. the aqueduct in Cairo). One great source of revenue in these days was the harbour and customs dues on Indian goods, which then had to be brought to Europe via Egypt ('Aden, Djidda, Suez, Alexandria) or Syria (Hormūz, Baṣra, Aleppo). To avoid these oppressive dues, the Portuguese staked everything on finding the sea route to India, which Vasco de Gama finally succeeded in doing. The Portuguese then gradually established themselves on the coasts of India and brought their great quantities of goods directly to Europe by the Cape of Good Hope. In this way the excessively high costs of passing through Egyptian ports as well as the cost of overland transit were avoided and the profits went to the Portuguese. These losses in revenue could not be tolerated by the Sulṭān al-Ġhūrī; besides, he felt it his duty as first ruler in Islām, as plenipotentiary of the Caliph and as a servant of the holy places of Mekka and Medina to come to the help of the oppressed Muslims in India. The first encounter with the Portuguese took place in 909 (1503) when the latter robbed an Egyptian ship coming from India of its cargo and sent it to the bottom. Sulṭān al-Ġhūrī tried at first to get redress by peaceful means by sending the Grand Prior of the Sinai monastery to the Pope with a letter of complaint, threatening to destroy the holy places in Jerusalem if King Manuel of Portugal did not cease from oppressing Muslims in India and from conducting hostilities against his merchant-ships. The mission failed in its object as King Manuel knew quite well that the Sulṭān's interest in the great profits derived from Christian pilgrimages would prevent him from going to extremes. Sulṭān al-Ġhūrī had

therefore to make up his mind to equip a considerable fleet, especially as 17 Arab ships were destroyed in 910 (1504) in the Indian harbour of Pananc. The Sulṭān was interrupted even in the building of his fleet by the fact that the Knights of St. John in Rhodes captured a consignment of wood intended for Egypt. To secure a base for his naval war against the Portuguese, the Sulṭān dispatched several expeditions to keep the coast of Arabia under his control; his able general Husain fortified Djidda with walls and towers and made the harbour a base for the fleet. The first encounter in the Indian harbour of Shāul between Husain and Lorenzo, son of the Portuguese viceroy, in 914 (1508) ended in favour of the Egyptians, who were supported by the fleet of the Muslim governor of Diu. Lorenzo perished and the Admiral's ship was burned. But the very next year the Admiral avenged his son's death, destroyed a part of the Egyptian fleet (the Indian ships kept aloof) and forced Husain to a hurried retreat into the Red Sea. Hostilities between the Portuguese and Egyptians continued in the following years, a strong Portuguese fleet even attacked Aden but without any lasting success. A new fleet was then sent to India by the Sulṭān. But when it reached Djidda, the political situation in Egypt had changed. In 922 (1517) the Ottoman Sulṭān Selīm I seized Cairo and thereby became protector of the Holy Cities as well as master of the western coast of Arabia. Sulṭān Selīm, who cared little about expansion towards India, as his interests lay in the direction of Asia Minor and the Balkan lands, at the request of the Mckkans, recalled Husain, in spite of his successes, along with his subordinates, who held other parts of Arabia, and had him executed on account of his numerous acts of cruelty to the people of Arabia. The Egyptian fleet had to return. The Portuguese on their side were content with the successes they had won, as they had succeeded in diverting commerce from the route through the Red Sea. After the appearance of the Portuguese in the East and the alteration of the trade-route the most important source of revenue for Egypt gradually dried up so that Sulṭān al-Ghūrī, for want of an intelligent system of taxation, had to fall back on extortion and the oppression of his subjects as he could do nothing else in view of the disorganisation of the finances. Thus it was not possible for him to pay his Mamlūks well so that his rule now lacked a firm support. His foreign policy also was unsuccessful. From fear of the powerful Selīm, he made an alliance with the latter's most bitter enemy Ismā'il [q. v.], the ruler of Persia. In 922 (spring of 1516) Sulṭān Selīm entered Asia Minor, ostensibly to fight against Shāh Ismā'il. Sulṭān al-Ghūrī went to Aleppo under the pretext of acting as intermediary between the two rulers. To show his peaceful intentions he had brought with him the Caliph and the chief kādis but had in secret promised Ismā'il his support. Selīm learned of this through spies and was not deceived by the friendly reception accorded his envoys by Sulṭān al-Ghūrī. To make war inevitable, he maltreated al-Ghūrī's envoy, had his attendants killed and sent him back ignominiously on a mule, with a declaration of war. Sulṭān al-Ghūrī's cause was hopeless from the first as he was not sure of his generals. He could neither protect his subjects from the extortions and acts of cruelty of his governors nor could he rely

on their fidelity. Although several times warned, he entrusted the command of the left wing to the governor of Aleppo, Khā'irbek; but at the first charge the latter left the battle with his troops and soon after the beginning of the battle the aged Sulṭān fell from his horse, struck with apoplexy. According to his biographer, his body was never found; others say that a Mamlūk cut off the head from the body and took it to Sulṭān Selīm. On the rapid occupation of Syria and Egypt and the last desperate battle of the Mamlūks see the articles SELĪM and TŪMĀNBĀI II. Although Sulṭān al-Ghūrī had tackled his task with energy, he could neither make friends nor bring order into the chaos of the finances. His attention was always directed only to immediate profit and to making ends meet somehow, while he was not sure of his Mamlūks and Amirs. He had no sense of justice nor a proper appreciation of relative strengths. Besides there was his aversion to the new arms, artillery and rifles, due to a certain disdain of using long range weapons, which it did not require personal bravery to carry. The rapid victory of the Turks and the superiority of the Portuguese was certainly to some extent due to the objection of Sulṭān al-Ghūrī and his knights to proper training with fire-arms, as is specially mentioned by Ibn Iyās.

[In the Kur'ān in the Sulṭāniya Library, Cairo, written for him, his name is spelt Kānsawh Ghawri, see E. Denison Ross in *Bulletin of the School of Oriental Studies*, ii. 334 (London 1922). Red.]

Bibliography: Weil, *Geschichte der Chalifen*, v. 384—416; v. Hammer, *Gesch. des Osmanischen Reiches*, Pest 1827 sqq., ii. 462 sqq. (in both, the principal Oriental manuscript sources as well as the contemporary chronicles and consular reports of the west are given). Ibn Iyās deals with the reign of Sulṭān al-Ghūrī in the *Badā'i' al-Zuhūr* [see Ibn Iyās]; but only the end is printed in the Cairo edition, the years 906—922 are contained in the Paris manuscript, Bibl. Nat., de Slane, *Cat.*, N^o. 1824 (years 906—913) and in the St. Petersburg manuscript, Rosen, *Les manuscrits arabes de l'Inst. des Langues orient.*, N^o. 46 (the years 913—922). The full biography by Ibn al-Hanbalī has not previously been utilised; see Ibn al-Hanbalī's *Durr al-Habab fī Tārīkh A'yān Halab*, MS. Vienna, Flügel, *Die arab. Handschr. der Hofbibl.*, ii. N^o. 1184 (cf. Brockelmann, *Gesch. d. arab. Litt.*, ii. 368), f. 176^b sqq.; J. J. Marcel, *Hist. de l'Égypte depuis la conquête des Arabes*, etc., Paris 1834, p. 407—11; W. Muir, *The Mameluke Slave Dynasty*, London 1896, p. 187—201. On his building operations or detailed particulars will be given in the coming work on inscriptions in Aleppo in the sections "citadels and city-wall"; on his buildings in Damascus see M. Sobernheim, *Die Inschriften der Zitadelle von Damaskus*, N^o. 24—26 in *Der Islam*, xii. (1921); on commerce in his time see B. Moritz, *Ein Firman des Sultans Selim in the Festschr. Ed. Sachau. gewidmet*, Berlin 1915, p. 425—27. On his wars with Portugal see S. Ruge, *Gesch. des Zeitalters der Entdeckungen* (Samml. Oncken, ii. 9) and H. Schäfer, *Gesch. Portugals*, iii., Hamburg 1850, p. 200 sqq.; R. S. Whiteway, *Rise of Portuguese Power in India*, London 1899. For his coins see *Or. Coins*, of in the *Cat. Brit. Mus.* iv. 214—216. (M. SOBERNHEIM)

KANTARA, plur. *kanāṭir*, means in Arabic (1) bridge, particularly a bridge of masonry or stone; also (2) aqueduct (especially in the plural), dam, and finally (3) high building, castle (similarly *kasūl* = aqueduct from *kastal* = castellum; see *KANĀT*); cf. *Tāḥi al-ʿArūs*, iii. 509; Dozy, *Supplément*, ii. 412; de Goeje, *B.G.A.*, iv. 334; and particularly R. Geyer in the *S. B. Ak. Wien*, 1905, vol. cxlix. N^o. 6, p. 114—119. The original meaning of the word, "arch", is found in the earliest Arabic lexicographers; cf. Dozy-de Goeje, *Description de l'Afrique et de l'Espagne par Edrisi*, p. 369. *Djizr*, a bridge of wood or boats, is the opposite of *kanṭara*, which is of stone; in time, however, the two words came to be used as synonyms (see Dozy, *op. cit.*, i. 194).

No satisfactory explanation has yet been given of the origin of the word. The oldest reference is found in a verse of Tarafa (iv. 22; see *The Divans of the Six Ancient Arabic Poets*, ed. Ahlwardt, 1870, p. 55). On account of this early occurrence of the word, Yāḥūt (*Muḍjam*, ed. Wüstenfeld, iv. 187) considers the word to be genuine Arabic. But we may with considerable certainty regard it as a loan-word. Vollers and Geyer thought it borrowed from Latin or Greek. The former connected (*Z.D.M.G.*, li. 376; *Z.A.*, viii. 100 sq.) *kanṭara* with the mediaeval Latin word *cintrum* (French *cintré*, arch, vault), while Geyer (*op. cit.*, p. 118—119) sought the original either in *καβήλος* = basket, *cantherius* = wickerwork used in the making of roofs and buildings, or in *κάμπτηρα*, *κάμπτηρον* = depository (cf. also *καμπτής* = rounding), from which Vollers, *Z.D.M.G.*, li. 302, derived Egypto-Arab. *ḫimṭar*. But all these explanations had best be rejected, because there are phonetic objections to them and they partly rely for the meanings of the words cited on obsolete, far-fetched glosses; cf., on the other hand, Fränkel in the *Z.A.*, xix. 270 sq., and Noldeke, *op. cit.*, p. 408. *Kanṭara* is most probably to be derived from the Aramaic and, as Noldeke, *op. cit.*, thinks, in the first place from *ḫēṭārā* = bond, arch (see Payne-Smith, *Tesaur. Syriac.*, col. 3591; note specially *ḫēṭārā* in Bar Bahlūl, *Lexic.*, col. 1768). The above mentioned word *djizr* also comes from the Aramaic (Fränkel, *Die aram. Fremdwörter im Arab.*, Leiden 1886, p. 285 and D. H. Müller in the *W.Z.K.M.*, i. 31), but can actually be traced back to the Assyrian or Accadian; cf. Meissner in the *Z.A.*, ix. 269, and Zimmern, *Akkadische Fremdwörter*, Leipzig 1915, p. 31.

Al-Kanṭara has survived in Spanish in the diminutives *alcantarilla* = little bridge, gutter and *alcantarillado* = arched aqueduct; see Dozy-Engelmann, *Glossaire des mots espagnols et portugais dérivés de l'arabe*², Leiden 1869, p. 47; *Diccionario de la Lengua Castellana por la Real Academia Española* 13, Madrid 1893, s. v.

Al-Kanṭara and al-Kanāṭir are frequently found — sometimes with descriptive additions e.g. *Kanāṭir Fir'awn* — as names for places like quarters of a city (notably in Baghdad) in areas where Arabic was, or is, spoken in the mediaeval or modern East. In his geographical dictionary (*Muḍjam*, ed. Wüstenfeld, iv. 180, 187—192, vi. 179—180) Yāḥūt gives a dozen places named al-Kanṭara and four called Kanāṭir; cf. also, for example, the indices to al-Ṭabarī, ed. de Goeje, p. 759—760, and Ibn al-Aṭṭar, ed. al-Kāmil, ed. Tornberg, xiii. 790. For the numerous districts of Baghdad named

after particular bridges under the Caliphate see the index to Guy le Strange, *Baghdad during the Abbasid Caliphate*, London 1900, p. 368.

Of the places named al-Kanṭara, the following are worthy of special mention:

1. An oasis on the southern slopes of the Atlas in Algeria at the exit of a narrow pass through which run the road and railway from Constantine to the desert regions; it is a station on the Constantine-Biskra line, 35 miles north of the latter. This, the most northern oasis in Africa, consists of three villages with about 3,500 inhabitants and possesses a very dense date grove. From its situation it was an important military station and, as Roman inscriptions found there show, settled in ancient times. It is presumably identical with the station *Ad Calcem Herculis* of the Roman itineraries; see Dessau in Pauly-Wissowa, *Realencyklop. der klassischen Altert.-Wissensch.*, iii. 1345. The name al-Kanṭara is derived from the Roman bridge, restored in 1862 by the French, which spans in one huge arch the ravine, the 150 feet wide Fumm al-Ṣahāra = the mouth of the Ṣahāra (so-called by the natives), through which flows the Wād al-Kanṭara; cf., for example, Vivien de St. Martin, *Diction. de Géographie Universelle*, Paris 1879, i. 66 and Kobelt, *Reiseninnerungen aus Algerien und Tunis*, 1883, p. 322.

2. Alcántara, a little town of great antiquity in the province of Cáceres (district of Estremadura) in Spain, near the Portuguese frontier, with 3,200 inhabitants. It receives its name from an imposing granite bridge, built in 105 A. D., which crosses the Tagus in six great arches to the northwest of the town. The place is also famous for the order of knighthood founded there in 1176 to defend the frontier against the Moors, which became called the Alcántara Order after its headquarters were moved to this town in 1213; see Baddeker's *Spain and Portugal*⁴, Leipzig 1913, p. 459.

3. A small town with a mosque in Egypt, on the Asiatic side of the Suez canal, half-way between Port Ṣaʿid and Ismaʿīliya, a station on the railway connecting these two towns. It lies on a low narrow tongue of rising ground, which runs out between the large Menzaleh lake in the north and the little Balāḥ lake in the south. But it hardly takes its name from this "land bridge", but from a bridge which already existed here probably in the early Middle Ages.

The Arab geographer Ibn Faḍl Allāh al-ʿUmārī, who wrote about 741 (1340), mentions the arch of a bridge, called Kanṭarat al-Djizr, near the old caravan station of al-ʿAḫīla, under which the superfluous water flowed into the desert at the time of the Nile's inundation. There was still a bridge here at the beginning of the nineteenth century, built over a canal connecting the two lakes already mentioned. The modern al-Kanṭara has only arisen on its present site since the making of the Suez Canal. The old settlement was a short half-hour's journey to the east and is marked by the mound of ruins Tell Abū Sēfe (on the maps also called Tell al-Aḥmar). This place may be regarded as the key to Egypt, for it has always been used by conquerors as the gateway to the Nile valley. Its strategical importance led to its being occupied in remote antiquity. Tell Abū Sēfe (with ruins of a temple of Rameses II and remains of the Ptolemaic and Roman period)

marks the site of the ancient Egyptian town of Zaru (*T'rw*), the capital of the fourteenth district of Lower Egypt, which was already a fortress in the time of the Middle Kingdom. In the later classical and Byzantine literature it appears as Sile, Selc (Selle); according to a Latin inscription found here, it had a Roman garrison in 288 and was later also the see of a bishop. In the Middle Ages it was called al-ʿAḳūla (on the name al-ʿAḳūla = "the bend" see above s.v. DAIR al-ʿAḳūl.), a name which was temporarily supplanted by that of the castle of al-Ḳusair during the Mamlūk period. In the World War (1914—1918) al-Ḳanṭara played an important part in the struggle for the Suez Canal. From November, 1914, to March, 1916, there were frequent encounters there between English and Turkish troops; cf. threoon, for example, Baer, *Der Völkerkrieg. Eine Chronik der Ereignisse seit dem 1. Juli 1914*, Stuttgart 1914 sq., iv. 220—24, viii. 367, xi. 318, xvii. 47 sq., 128, 130, 132.

In remote antiquity as well as in the late Middle Ages and modern times, al-Ḳanṭara was the point of departure for the caravan road from Egypt to Syria. Since the World War the new railway line to Syria has branched off here from the Port Saʿīd-Suez line, and runs from al-Ḳanṭara via Ḳaṭya, al-ʿArish and Ghazza to Ludd, where it links up with the line from Yāfa to Jerusalem.

G.*, lxiv. 688, 691, 696; lxx. 486 sq., 511 and in *Petermann's Geogr. Mitteil.*, 1916, lxii. 373—377; Alt in the *Palästina-Jahrbuch des deutsch. evangel. Instituts*, x., Berlin 1914, p. 60—63 and Dalman, *loc. cit.*, xx, 1924, p. 44—46. On excavations and finds in the region of al-Ḳanṭara see Clédat in the *Recueil de travaux relatifs à l'archéol. égyptienne et assyrienne*, Paris 1915, xxxvii. 38 sq. and 1919, xxxviii. 1 sq., 70 sq.

4. A sanctuary among the ruins of the ancient Petra on the Sinai Peninsula; cf. Savignac, *Le Sanctuaire d'el Kantara in the Rev. Biblique*, New series, 1906, iii. 391 sq.

5. Ḳanṭarat Zainab in the valley of the Nahr Bairūt in Syria, an ancient Roman aqueduct of which considerable remains exist at the present day; according to Arab legend, it was built by Queen Zenobia (Zainab); cf. Fr. Müller, *Studien über Zenobia and Palmyra*, Diss. Königsberg 1902, p. 14 sq.

6. Ḳanāṭir Firʿawn ("Pharaoh's aqueduct"), a great aqueduct in the south of Syria, which, beginning at Dilli, at the western foot of the lava plateau of Ledjā (west of Hawrān), runs in a south-western direction for some sixty miles as far as Mukēs (Gadara), providing many villages with the necessary drinking-water in the summer months. It is identified by Wetzstein — probably rightly — with the Ḳanāṭir mentioned by Ḥamza al-Isfahānī (*Annales*, ed. Gottwaldt, p. 117). But the Ghassanid Djabala b. al-Ḥārith, who reigned about 500 A. D., can hardly, as Ḥamza says, be the builder of this marvellous piece of work; see Nöldeke, *Die Ghassan. Fürsten* . . . in the *Abh. Pr. Akad.*, 1887, iv. 50; it certainly dates back to ancient times. For further information see Wetzstein,

Reisebericht über Hauran und die Trachonen, Berlin 1860, p. 123—125.

The diminutive Ḳunāṭira (popularly Ḳunṭira or Ḳenṭiri) is occasionally used as a place name, e.g. a village in the district of Djawlan (Eastern Jordan); see Baedeker's *Palestine and Syria*⁵, 1912, p. 268. (M. STRECK)

KĀNŪN, the name of a month, which is found as early as in inscriptions from Palmyra (see S. A. Cook, *A Glossary of the Aramaic Inscriptions*, s. v.) and corresponds to Marḥeshwān. It later appears among the Syriac names of the months (see Payne Smith, *Thesaurus Syr.*, s. v.) as *K. ḥedem* or *ḥadimāyā* and *K. ḥrāy* or *ḥrāyā*. Here the two *K.* are the ninth and tenth months respectively. Al-Birūnī, *Kitāb al-Āthār al-bākiya*, ed. Sachau, p. 60, transcribes the Syriac forms exactly as *K. ḥadim* and *K. ḥrāy*. In Arabic terminology they are called *K. al-awwal* and *K. al-ākhir*. In the Ḥadīth the former appears in a remarkable connection. In Muslim, *Ashribā*, Trad. 99, a reason is added for the regulation, often mentioned elsewhere, that vessels should be kept covered: "for there is a night in the year in which the *waḥāʾ* passes no uncovered vessel". In another version of the same tradition it is added: "foreigners (*aʿdām*) among us used to fear this in *Kānūn al-awwal*". (A. J. WENSINCK)

KĀNŪN, a musical instrument, consisting of a flat thin quadrilateral box strung with wire chords, which is laid on the knees and played with a key of metal fixed on the forefinger, like the zither (Lane, *Modern Egyptians*, ii. 70, 72; Salvador Daniel, *Musique Arabe*, p. 37).

KĀNŪN (from the Greek κανών), canon, custom, law. The development of the Muslim empire, its vast conquests which brought it into contact with peoples of very different characters, who for the most part had laws already codified, the rise of commerce and industries and the institution of regular troops forced the governors to establish alongside of the *shariʿa* or religious law a series of special enactments by the application of the principle of *ʿurf, lex principis*. It is these edicts that are called *ḳānūn* (plur. *ḳawānīn*). The Berbers give this name to their own statutes, their customary law; see Hanoteau et Letourneur, *La Kabylie et les coutumes Kabyles*, Paris 1873, ii. and iii.; Morand, *Les Kanouns du Mزاب in the Études de droit musulman algérien*, Algiers 1910; Masqueray, *Formation des cités chez les populations arabes sédentaires*, Paris 1886, p. 74 sqq.; *Archives berbères*, i. and ii.; *Le droit Kabyle*, 2nd ed., Paris 1917; Henri Basset, *Essai sur la littérature des Berbères*, Algiers 1919, chapter v.: *La littérature juridique des Kanouns*. (CL. HUART)

KĀNŪN-I ESĀSĪ, "fundamental law", the name given to the constitution of the Ottoman empire dated Dhu l-Ḥiǧǧja 7, 1293 (Dec. 24, 1876), promulgated by a *ḳhaṭṭ-i shariʿ* of the same date addressed to the Grand Vizier Midhat Pasha. It maintains the order of succession of the family of ʿOthmān and explicitly gives the Sultān the title of *Ḳhalīfa* (art. 3), protector of the Muslim religion (art. 4). It confirms his sacred and non-responsible character (art. 5). It enumerates the rights of Ottoman subjects (art. 8—26), the duties and responsibilities of the ministers (art. 27—38) and other officials (art. 29—41); establishes a parliament (*medjlis-i ʿumūmī*), consisting of two chambers, the Senate (*Heyʿ-i aʿyān*) and the

Chamber of Deputies (*Hey'et-i mebcūhān*); the first is to consist of members nominated directly by the Sultān and its numbers must not exceed a third of the second (art. 60), which is elected by the people on a ratio of one deputy for every 50,000 Turkish subjects (art. 65). It establishes the permanency of the magistracy (art. 81). No tax can be levied if it is not passed by a law, *kānūn* (art. 86). The administration of the provinces is based on the principles of decentralisation (*tevsī-i me'dhūniyet*) and the separation of powers (*tefrīk-i vezā'if*); it is based on elected municipal councils (art. 108—112). In case of trouble, the state has the right to proclaim an autocratic government, *idāre-i urfiye*; it is the state of siege which is meant by this name (art. 113); banishment on the Sultān's decision is provided for those who stir up trouble. The principle of compulsory elementary education is laid down (art. 114). In spite of the formal terms in art. 115, according to which not a single article of the constitution could be suppressed or not put into operation for any reason or under any pretext, the fundamental law of the empire, although continuing to figure at the head of the *Sālnāmē* (official annals), was actually suspended after the fall of Midhat Pasha and only re-established by the military revolution which marked the close of the reign of 'Abd al-Hamid II.

The same name was given to the Persian constitution proclaimed by a *firmān* (royal proclamation) dated Djum. II 14, 1324 (Aug. 5, 1906) and promulgated on Dhu l-Kāda 14, 1324 (Dec. 30, 1906) in the reign of Muẓaffar al-Dīn Shāh. It deals only with the formation and activities of the national assembly; it was granted in reply to the demand of the refugees in the English legation. A supplementary constitution, promulgated by Muḥammad 'Alī, successor to Muẓaffar al-Dīn, on Shābān 29, 1325 (Oct. 7, 1907), laid the foundation for constitutional law in Persia. It laid down more especially that Shī'ī Islām is the official religion of the State, that Tīhrān is the capital, that the national flag is green, white and red (in three horizontal stripes) with the emblem of the Lion and Sun. It provided for the equality of citizens of Persia before the law, the protection of life and property; arrests could not take place without a written order from the President of the Tribunal of Justice. It recognises the freedom of the press, except for heretical publications or those hurtful to religion, as well as the right of association and assembly. Legislative power is divided between two chambers. The ministers must be Muslims, they are responsible to the two chambers; lastly it provides for the establishment of provincial and departmental councils (*andjuman*).

(CL. HUART)

KĀNŪN-NĀMA, the name given to the fundamental law of the Ottoman Empire promulgated by Sultān Muḥammad II on the advice of his Grand Vizier, Muḥammad of Caramania. It is divided into three sections called *bāb* (chapter), which treat respectively of the great dignitaries of the Empire, of customs and ceremonies and lastly of the fines for crimes and revenues set aside for special appropriations.

Sultān Sulaimān completed these ordinances by issuing several *Kānūn-nāmē*'s. The one reorganised the administration of the military fiefs (*zi'āmet, zimār*) established by Murād I; the second codified the administration of the farms in Egypt; the third laid down the rights and duties of the *ri'āyā*, "subjects" Muslim and non-Muslim in respect of feudatories; the fourth dealt solely with the police regulations and the penal laws.

(CL. HUART)

KAPLĀN GIRĀY, the name of two Khāns of the Crimea in the eighteenth century.

1. KAPLĀN GIRĀY I reigned three times: 1119—1120 (1707—1708), 1125—1128 (1713—1716) and 1143—1149 (1730—36). He died on the island of Chios in Shābān, 1151 (Nov.-Dec., 1738). Immediately after the death of his father Salīm I, in Shābān, 1116 (Nov.-Dec., 1704), he set up as a claimant to the throne but was not proclaimed Khān till after the death of his brother Ghāzī III. His own three depositions were on each occasion the result of the unfortunate course of military operations; the first (according to Smirnow, 9 months before the battle of Poltava, i. e. Oct., 1708) after an unsuccessful campaign against the (then not yet completely islamised) Circassians, the second as a result of his arriving too late on the scene of operations on the Danube, the third (when he was now enfeebled by old age and illness) after his campaign to Persia, by which without even reaching the frontiers of Persia he exposed his own country to the invasion of the Russians. He was generally regarded as a skilful politician but an unfortunate general.

2. KAPLĀN GIRĀY II, grandson of Kaplān Girāy I and son of Khān Salīm II, only reigned for a short period: 1183—1184 (1770). He fought unsuccessfully against the Russians in the Dobrudja, was falsely accused of having had dealings with the enemy and deposed on Shābān 4, 1184 (Nov. 23, 1770). He died in Rabi' II, 1185 (July-Aug., 1771) of the plague at the age of 32.

KAPLAN MUŞTAFĀ PASHA, a native of Merzifon, an Ottoman general and statesman of the time of Sultān Mehmed IV (1648—87), one of the ablest and most successful collaborators of the Grand Vizier Köprülü Aḥmad Fāzil (Fādil) Pasha and therefore closely involved in Turkey's struggle under the Köprülü's to regain her old position of power.

He was brought up in the court service, was Silihdār of the Sultān and in 1650 was appointed Wazīr and Wālī of Baghdād. He spent a number of years as Wālī of important provinces, in Wān, Konya and Damascus, until the Hungarian campaign gave him an opportunity to distinguish

himself, notably before Neuhausl in 1663, at Kanischa and elsewhere. The Grand Vizier gave him his sister in marriage in order to ally him closely to him. Aḥmad Fāzil Pasha cleverly managed to transfer the most important affairs to his brothers-in-law. In 1660 Kaplan was appointed Grand Admiral (*Kapudan-i Deryā*) ("a tiger on land and a crocodile at sea", as Rāḥid describes him à propos of his appointment in allusion to his name) (Kaplan = panther). He filled this important post for six years, commanded the Ottoman fleet with vigour and caution during the heavy fighting of the time and cooperated with special distinction in the conquest of Crete. He then took part in the campaign against Poland and conquered Lemberg along with the Khān of the Crimea. He then became Wālī of Aleppo in 1672, of Diyār-bakr in 1675, of Baghdād for a second time in 1676 and in 1677 of Diyār-bakr again. After the death of the Grand Vizier Aḥmad Fāzil Pasha his frank nature still enabled him to maintain his position against the new Grand Vizier Kāra Muṣṭafā, who was not inclined in his favour. Even the severe defeat which he suffered in 1678 in the Ukraine in the swamps between the fortress of Tschechrin and Romodanowski, where he lost the whole of his army and equipment, brought him only temporary dismissal and disgrace. Soon afterwards he became Grand Admiral for a second time. He died in November, 1680, in Smyrna, which he happened to have entered with the fleet, and was buried there. In Baghdād he had restored the mosque and *türbe* of Shaikh Muḥammad Kūdūrī.

Osm. Reiches*, Pest 1130, vi., cf. Index; Jorga, *Gesch. d. Osm. Reiches*, Gotha 1911, iv. 179.

(TIL MENZEL)

KAPU, gate, the Ottoman Porte, properly the palace of the Sultān or of the Grand Vizier. The name (by synecdoche, cf. "court") may be of Central Asian origin; it recalls names like the Japanese mi kado, for example, literally "exalted gate", etc. (cf. J. Six in *Acta Orientalia*, ii. 205 sq.). Among the Ottomans *Kapu* has been long in use in the above sense and used alternately with the Arabic *bāb* or the Persian *dar*. The name may have passed from Turkish into Arabic about the Mamlūk period, as, for example, the passage i. 469, 2 from below, in Ibn Khaldūn, *Histoire des Berbères*, transl. de Slane, Algiers 1847, where *bāb* = palace, shows. — *Kapu Kūli* "gate-slaves" (the meaning of this expression is explained and a list of the troops concerned given in Aḥmed Djewdet, *Tārīkh*, xii., Stambul 1301, p. 214, 7 from below; cf., on the other hand, J. von Hammer-Purgstall, *Gesch. des Osm. Reiches*, iv. 566). — The name "lofty gate" for the office of the Grand Vizier (*Pasha Kapusu*, *Bāb-i ʿālī*, "Sublime Porte, Fulgida Porta") probably did not come into use before 1654, when the Grand Vizier Derwish Mehmed Pasha was given a building near the Serai for an office by Sultān Mehmed IV.

Bibliography: J. v. Hammer, *Staatsverfassung des Osmanischen Reiches*, ii. 44, 137 sq.;

T. X. Bianchi and J. D. Kieffer, *Dictionnaire turc-français* 2, Paris 1850, s. v. *Kapu*, ii. 438. (FRANZ BABINGER)

KAPUÇI, gate keeper, porter (Ar. *bawwāb*, Pers. *derbān*), formerly the lowest grade and outermost guard of the Imperial Serai chosen from the Yaničars, who guarded its gates, 50 at each gate. By day they carried a rod of bamboo, by night they were armed with sword and dagger. They were used as messengers to carry to the grantees of the Empire and foreign princes invitations to court festivities or documents of state. Some performed the duties of eunuchs. They wore white helmet-like caps (*usküf*, *scuffia*). Their number and pay varied. While they numbered 300 at the beginning of the sixteenth century (cf. T. Spandugino, *Commentari dell' origine de' principi Turchi* (Florence 1551, p. 130; in Schefer's edition, Paris 1896, p. 116 sqq.) and each Kapuçi received up to 7 aspers a day, their pay had risen to 20–50 aspers daily about 1511 (cf. the Bailo Andrea Foscolo report of March 6, 1511, quoting Marino Sanuto, in J. v. Hammer, *Gesch. des Osm. Reiches*, ii. 627; cf. ii. 234 as well as Spandugino, ed. Schefer, p. lix.); under Sultān Murād III in 982 (1574) their number was 356 (cf. *Z.D.M.G.*, 1861, xv. 283) and under Sultān Mehmed IV (1648–1687), according to Husein Hezārfenn's (d. 1103 = 1691) *Kānūnnāme* (written in 1080 = 1669; cf. F. Pétis de la Croix, *État général de l'Empire Othoman, par un solitaire turc*, Paris 1695, and J. von Hammer, *Staatsverfassung des Osman. Reiches*, ii. 44 sq.), they had risen to 1962, who received 5,785,004 aspers a year. The Kapuçiler were divided into 45 companies, each of which was under its own company-commander (*buluk bashi*), who held a sief in place of salary. The commander of the gatekeepers was the *Kapuçiler Bashi*, a kind of chamberlain. According to the evidences of Menavino, Navagero and Spandugino, the number of *kapuçiler bashi*'s in the first half of the xvth century was only four. Above them was the *kapuçiler kyayasi*, head-chamberlain.

(FRANZ BABINGER)

KAPUDAN PASHA, formerly the title of the supreme commander of all the Ottoman fleets, who had also unlimited control of the imperial arsenal. The origin of this rank dates back to the beginnings of Ottoman sea power under Sultān Mehmed II. The first naval captain (*Kapudan-i Deryā*; the word *Kapudan* comes from the Greek *καππάνης*) was Balta-Oghlu Suleimān Beg, probably of Bulgarian origin, the Παλτόγλη or Παντόγλης or Παιτόγλης of the Byzantine chroniclers (Chalcocondylas, p. 390, 519; Kritoboulos, i. 22, 28, 33, 37, 39, 41; Dukas, p. 270, 5; cf. *ʿĀlī, Kūnh ul-Akhbār*, v. 168, 174). Till 1533 the Sandjakbeg of Gallipoli was at the same time *Kapudan Pasha* (cf. [Ramberti], *Cose de' Turchi*, Venice 1543, p. 142; T. Spandugino, *Commentari dell' origine de' principi Turchi*, Firenze 1551, p. 146, 164; Nic. de Nicolai, *Navigations et pègrinations orientales*, Lyon 1567, p. 77; N. Barozzi and G. Berchet, *Le relazioni degli ambasciatori Veneti*, p. 356: capitano dell' armata di Gallipoli; cf. Feridūn Bey, *Münshi'at-Selāfin* 2, i. 464: *Gelibolu Kapudanı*). With the increasing sea power of the Ottomans and the foundation of an arsenal of their own, especially under Sulaimān the Great when the dreaded Khair al-Din Barbarossa

for so long commanded the fleet, the headquarters of the High Admiral were removed from Gallipoli to Constantinople. While the office of Kapudan Pasha, who had the 19th wilāyet of the Empire as well as 13 sandjaks under him and disposed of an income of 885,000 aspers (cf. Sir P. Ricaut, *The Present State of the Ottoman Empire*, London 1687, p. 102 sq.), was already one of prestige, with the increasing size of the Ottoman navy it soon became one of the first in the Empire. As long as the Sandjak-beg of Gallipoli was at the head of naval affairs, his jurisdiction only extended to Pera and Nicomedia and in larger naval enterprises a special Pasha was appointed beside him, who acted in supreme command as admiral (Spandugino, *Commentari*, Firenze 1551, p. 165). Later, especially from the time of Barbarossa, the Kapudan Pasha was one of the regular and active members of the Diwān and was not only one of the most powerful but also one of the best paid dignitaries in Turkey. In rank he was equal to the *Ser Asker*, directly below the Grand Vizier and the *Shaiikh al-Islām*. On account of the revenues attached to the post it was always an object of ambition in the Turkish official world and was granted by the Sultān as a mark of special favour without regard to practical or theoretical training and fitness. Down to about 1780 the Kapudan Pasha was also given the governor-generalship of the islands subject to the Porte in the Aegean Sea, some of the sea-provinces of Asia Minor and the controller-ship of the arsenal on the north shore of the Golden Horn in Galata, where he had his residence among the wharves. In the sixteenth century the title was abolished under Sultān 'Abd al-'Azīz and replaced by that of *Bahriye Nāzir-i*, Director of the Arsenal. All naval establishments were under him, the Minister of Marine; a naval council (*Shūrā-i Bahriye*) assisted him and advised on technical matters and affairs of administration. In June, 1876 under Murād V, the title was revived but only for a short time; it was then definitely replaced by that of Minister of Marine.

A list of all *Kapudān-i Deryā* is given in J. v. Hammer-Purgstall's *Geschichte d. Osmanischen Reiches* (at the end of each volume) and in the work — which first appeared as a feuilleton of the newspaper *Djerride-i Hawādith* — by Rāmiz Pasha-Zāde Mehmed Efendi, *Kharīṣ-i Kapudān-i Deryā* (of 761—1258 [= Chronogram of the title]; 220 pp., 12°, Stambul 1285 = 1868/69) and in Mehmed Rāif, *Mir'āt-i Istambul*, Stambul 1314, p. 481—497.

Bibliography: Hādīdjī Khalifa, *Tuhfet al-Kitār fi Asfūr al-Bihār*, Stambul 1141; I. Mouradgca d'Ohsson, *Tablau général de l'Empire Othoman*, vii., Paris 1824, p. 424, 429 sqq.; J. v. Hammer, *Staatsverfassung des Osmanischen Reiches*, Vienna 1818, ii. 291. (FRANZ BABINGER)

KARA, the Turkish word for black or dark colour in general. It is commonly used with this meaning as the first component of geographical names, for example Kara Āmid (on account of the black basalt of which this fortress is built), Kara Dagħ (on account of its dark forests), etc. Beside Kara we find in place-names the form Karaḍja. In personal names it refers to the black or dark brown colour of hair or to a dark complexion. It has, however, at the same time also the meaning "strong, powerful" and has

to be interpreted in this sense in the name Kara Osmān or in names like Kara Arslān. In this connection also we have the name Kara Khān, which was assumed by the Karakhānids in Eastern Turkestan.

Bibliography: Von Hammer, *Geschichte des osmanischen Reiches*, i. 80; Maḥmūd Kašghari, *Dirwān Lughāt al-Turk*, Constantinople 1333, iii. 167. (J. H. KRAMERS)

KARA ARSLAN IBN DĀ'UD with the laqab FAKHR AL-DĪN, third Amīr of the line of the Ortoḳids [q. v.] of Hiṣn Kaifā and great-grandson of the founder of this dynasty.

Statements differ regarding the year in which he succeeded his father Dā'ud b. Suḫmān. According to Abū 'l-Farajī Barhebraeus (*Chronicon*, ed. Bedjan, Paris 1890, p. 305), Dā'ud died in the Greek year 1455 (1143—44). The Arabic sources do not give the year; in any case Stanley Lane-Poole, who bases his view that Dā'ud did not die till about 543 (1148) on a mistaken interpretation of Ibn al-Aṭhīr (*Kāmil*, xi. 73) (*Coins of the Urtuḳi Turkomāns in Numismata Orientalia*, Part ii, London 1876, p. 6), puts the date too late. Münedjdjim Bāshī (iii. 577) gives 540 (1145). Even before his father's death we find Karā Arslān at war with the Crusaders. When in Ramaḍān, 532 (May, 1138) the Byzantine Emperor John, in alliance with the Franks against the Atabek Zangī of Mawṣil, besieged the fortress of Shaizar near Antioch, he retired when he heard that Karā Arslān had crossed the Euphrates with 50,000 men to come to the help of the town (Kamāl al-Dīn al-'Adīm, *Tārīkh Ḥalab*, in the *Recueil des Historiens des Croisades, Documents Orientaux*, iii. 677). Karā Arslān does not, however, seem to have had at all a friendly reception from Zangī on his arrival; the Atabek, indeed, ordered him to go back to his father. His relations with Zangī continued to be strained, as is shown in the account in Kamāl al-Dīn (p. 684) that a battle was fought between the two in 536 (1141—1142) at Bahmard, in which Karā Arslān was defeated. Peace was restored next year again. According to Abū 'l-Farajī's account of his accession (see above), Zangī went so far as to attempt to secure the succession of Karā Arslān's elder brother Toḡhmish, who had escaped to Mawṣil. Sultān Mas'ūd of Konya, however, gave help to Karā Arslān and Zangī had to abandon his plan.

However strained may have been Karā Arslān's relations with Zangī, his alliance with the latter's son Nūr al-Dīn of Aleppo was a most faithful one. In 544 (1149—1150) he accompanied the latter on an expedition against the town of Sindjar, which, however, was later again restored to Nūr al-Dīn's brother Ḳuṭb al-Dīn. In 559 (1164) he again assisted him, along with Naḍīm al-Dīn of Mārdīn and other princes, at the capture of the fortress of Hāram, where many Frankish knights were taken prisoner (Ibn al-Aṭhīr, xi. 92, 185). For the rest Karā Arslān does not seem to have been of a particularly warlike disposition. He would have preferred to keep out of the last named expedition, if the fear of his own subjects, whose fanaticism had been aroused by Nūr al-Dīn (and apparently also the fear of Nūr al-Dīn himself), had not compelled him to take part. Very little else is chronicled of his activities; for example, the capture of the Kurdish stronghold of Shātān (Ibn al-Aṭhīr, xi. 185) in 546 A. H. and the unsuccessful

siege of 'Āmid on a campaign against the Danishmandid Yaghī Arslān in 1163 A. D. (Abu 'l-Faradj, *op. cit.*, p. 329).

The Arabic and Syriac sources are unanimous in giving the year 562 (1166—67) as the year of his death. Ibn al-Athīr (xi. 217) tells how before his death he commended his son and successor Nūr al-Dīn Muḥammad to the protection of his powerful ally Nūr al-Dīn of Aleppo. The latter kept the trust and prevented his own brother Ḳuṭb al-Dīn from seizing Karā Arslān's territory. Stanley Lane-Poole, on the other hand, relying on coins of the year 570 A. H. of Karā Arslān, places his death in 570 or even not till 571 (*op. cit.*, p. 16).

Hiṣn Kaifā [q. v.] seems to have been his usual residence. There still exist here the remains of the great bridge of one arch over the Tigris which, according to Ibn Ḥawqal (*B. G. A.*, ii. 152), he had restored. Abu 'l-Faradj, however, calls him, like his father, lord of Hiṣn Ziyād (i. e. Khartabirt) (Kharput). It is very possible that this town belonged to Karā Arslān's territory, for in 1122 it was in the hands of the Ortoqid Balak and Karā Arslān's son 'Imād al-Dīn later (581) founded there a collateral line of the Ortokids. But the town of 'Āmid most probably never belonged to his possessions; it was only presented to his successor by Saladin in 579 (Ibn al-Athīr, xi. 324). At his death he is, however, described as ruler over Hiṣn Kaifā and the greater part of Diyār Bakr (Ibn al-Athīr, xi. 217).

Bibliography (besides works already mentioned): F. Wilken, *Geschichte der Kreuzzüge*, ii, iii., Leipzig 1813, 1817; *Recueil des Historiens des Croisades, Documents Arméniens*, Paris 1869, p. 155, 357, and *Historiens Orientaux* (besides Kamāl al-Dīn also Abu 'l-Fidā' and Abū Shāma). On Karā Arslān's coins (remarkable, like the coins of other Ortokid and Atabeg lines, for their pictorial types) see Stanley Lane-Poole, *op. cit.*, and his *Catalogue of Oriental Coins in the British Museum*, iii. (1877), 118. On inscriptions with the name of Karā Arslān cf. M. v. Oppenheim, *Inscriften aus Syrien, Mesopotamien und Kleinasien*, i.; *Arabische Inscriften* by M. v. Berchem, Leipzig 1909, p. 83, 85. (J. H. KRAMERS)

KARABĀDHĪN. [See AKRABĀDHĪN].

KARĀ-BĀGH (Turkish-Persian: "black garden", because of the black and fertile soil of its high valleys), the present-day name of the mountainous part of Arrān [q. v.] forming a province of Transcaucasia bounded by the Kurr, the Aras and the district of Eriwān; area about 6,750 sq. miles and 250,000 inhabitants (half Adharbaidjāni and half Armenians); capital Shūsha; mountains: Kāmish (12,480 feet) and Kapudjik (12,360 feet). Its horses are famous for their swiftness, and reptiles, scorpions and tarantulas are found there. It is in this province that Faṭḥ 'Alī Ākhondzāde [q. v.] lays the scene of his comedy: *Monsieur Jourdan, botaniste parisien*.

At the beginning of the reign of Shāh 'Abbās I, in 996 (1588), the Ottoman general Farhād Pasha, in alliance with the governor of Shirwān, Dja'far Pasha, invaded Karā-bāgh and seized Gandja (v. Hammer, *Hist. de l'Empire Ottoman*, vii. 221; Sykes, *History of Persia*, ii. 257—258). This province was at that time the hereditary fief of the Turkish clan of Djewānshir, the family of Sarīca-lu, a descendant of Avshār or Afshār, eldest

son of Yulduz, third son of Oghuz (Abu 'l-Ghāzi, ed. Desmaisons, St. Petersburg 1871—74, p. 27). This clan emigrated from Turkestan with Hūlāgū and was brought back from Asia Minor by Tīmūr and scattered over Turkestan, Persia and Afghānistān, especially around Kābul and Kandahār. Its chiefs were called from father to son alternately Panāh and Ibrāhīm Khalīl; it was Panāh III who built Shūsha in 1165 (1752) and gave it the name of Panāh-ābād, whence the name *panāh-ābādi* given to the coins which he struck there. His son Ibrāhīm Khalīl Khān, having succeeded him, found himself attacked by the Persians; after two fruitless sieges, Āghā Muḥammad Khān (later Shāh) Kādjar captured Shūsha but was assassinated there on the morning of Dhu 'l-Ḳa'da 21, 1211 (June 18, 1797), five days after entering the town, by three of his servants who feared his vengeance. Ibrāhīm, who had fled, came back two months later; he submitted to the Russian general, a Georgian by origin, Prince Sisianoff (Zizishwili), after the capture of Gandja in 1219 (1804) and agreed to pay a tribute of 6,000 ducats; he received the rank of lieutenant-general and a Russian garrison occupied his capital. His eldest son, Abu 'l-Faṭḥ Khān, was the brother-in-law of Faṭḥ 'Alī Shāh and had remained faithful to the Persian alliance; he brought his father back to the Kādjar party and the latter attempted to liberate his capital, but Dja'far Ḳulī Khān, son of Muḥammad Hasan Khān and grandson of Ibrāhīm, warned the Russians of the Persian advance. 600 Russian soldiers left the citadel and in the middle of the night of Rabi' I 23, 1221 (June 10, 1806) attacked the camp of Ibrāhīm Khalīl, who was killed with his family in the fighting. The Russian major commanding the garrison installed another of his sons in his place, Mahdi Ḳulī Khān, who reigned till 1238 (1822) when he fled to Persia. The Kādjar had, however, renounced all claim to Karā-bāgh by the treaty of Gulistān (Oct. 12, 1813).

(CL. HUART)

AL-KARĀBĪSĪ, the cloth-merchant, the *nisba* of several Arab authors; viz.:

1. the mathematician AḤMAD B. 'UMAR, the date of whose death is not known and among whose works, a commentary on the translation of Euclid is specially celebrated; see *Fihrist*, p. 265, 25, 282, 3; Ibn al-Ḳifṭī, *Tārīkh al-Hukamā'*, Cairo 1326, p. 57, 5.

Only one of his works has come down to us, viz. his *Kitāb Miṣāḥat al-halīk* (Oxford and Cairo; cf. *Bibl. Bodl., Codd. Mss. Or.*, i. No. 913; and *Fihrist al-Kutub al-'arabiya fi 'l-Kutubkhāne al-Khedīwiya*, v. 204).

2. the traditionist and faḳīh ABŪ 'ALĪ AL-

HUSAIN B. 'ALĪ B. YAZĪD AL-MUHALLABĪ, who had at first belonged to the Ahl al-Ra'y, but after the arrival of al-Shāfi'ī at Baghdad attached himself to him; at the same time he remained an absolute supporter of the belief in predestination (*qabr*); nothing has survived of his writings on criticism of traditionists and fiqh. He died in 245 (859), according to others in 248 (862).

Wüstenfeld, N^o. 180; Cairo 1299, i. 181; al-Shahrastānī, *al-Milāl*, ed. Cureton, p. 96; al-Nawawī, *Tahdhīb*, ed. Wüstenfeld, p. 774; al-Subkī, *Tabaqāt*, Cairo 1324, i. 251—6; Ibn al-Athīr, *al-Kāmil*, Cairo 1303, vii. 29; Abu 'l-Fidā', *Tārīkh*, Constantinople 1287, ii. 439; ed. Reiske-Adler, ii. 204; Ibn Taghribirdī, ed. Juynboll, i. 753, 763.

3. the Hanafī faqīh AS'AD B. MUHAMMAD (d. 570 = 1174), whose *Kitāb al-Furūq fi 'l-Furūq*, which Hādījī Khalīfa, *Kashf al-Zunūn*, ed. Flügel, iv. 419, N^o. 9041 confuses with the *Talkhīḥ al-'Ukūl* of al-Mahbūbī (Brockelmann, *G.A.L.*, i. 380, N^o. 34), is preserved in Cairo; see *Fihrist al-Kutub al-'Arabiya fi 'l-Kutub al-Khāne al-Khediwiya*, iii. 96.

(C. BROCKELMANN)

KARĀ-CELEBĪ-ZĀDE, epithet of the Ottoman historian, jurist and Shaikh al-Islām, 'ABD AL-'AZĪZ EFENDI. Born in the year 1000 = 1591/92 at Stambul, the son of the then military judge of Rumelia, HUSĀM al-DĪN HUSAIN B. MUHAMMAD B. HUSĀM al-DĪN EFENDI (d. in Muḥarram, 1007 = Aug., 1598 at Brussa and buried there; cf. al-Saiyid Ismā'īl Beligh Brūsewī, *Tārīkh-i Brūsa*, Brussa 1302, p. 314—316; Ewliyā, *Siyāhat-nāme*, Constantinople 1314—1318, ii. 53; he bore the *makhlaṣ* Karā-Celebi-Zāde which passed to all his descendants and caused frequent confusion), he enjoyed the tuition of his older brother, the chief district judge Muhammad Efendi (cf. M. Thuriyā, *Sijill-i 'Othmānī*, iv. 155; Ewliyā, *op. cit.*, i. 407; J. von Hammer, *Constantinopolis*, ii. 25; M. E. died Dhu 'l-Hijja 6, 1042 = June 14, 1633 and is buried at Aiyūb in Stambul) and studied also under the Muftī Šan' Allāh Efendi. He then filled a series of offices: in August, 1612 he became Müderris at the medrese of Khair al-Din Pasha, in April, 1615 at the new medrese of 'Alī Pasha, in April, 1616 at the medrese of Piri Pasha, in April, 1617 at the medrese of Kaler Khānc, in December, 1619 so-called "eighth" (*ṣānu-i thāmin*) at the mosque of Muhammad the Conqueror; in Jan., 1621 he was transferred to the Sulaimāniya at Brussa, but by October of the same year appointed to the Sulaimāniya in Adrianople and in May, 1623 summoned to the same institution in Stambul. In June, 1623 he was involved in a mutiny of the 'Ulema at the mosque of the Conqueror and sent as a punishment to Brussa to the medrese of Molla Khusrav but pardoned on the accession of Murād IV and in Jan., 1624 recalled to Stambul to the Sulaimāniy. In March of the same year he became judge of Yenī Şehir, was dismissed in December, appointed judge of Mekka in February, 1626 and dismissed once more in December, 1627; returning to Stambul, after a short stay in Adrianople, he was appointed city-judge of Stambul in Jan., 1634. In this capacity he had to take measures for the

security of the city during the preparations for the Polish campaign; cf. J. v. Hammer, *Gesch. des Osm. Reichs*, v. 178). But when in July of the same year the shortage of grease provoked discontent among the people of Stambul and brought down the wrath of Murād IV upon the judge responsible for the regulation of the market (cf. *Z.D.M.G.*, xviii. 722) he was dismissed from his office and sentenced to death by drowning. A letter in the Sultān's hand ordered the Superintendent of the Imperial Gardens (*Eustādjī Başjī*), Dudge Efendi, afterwards governor of Bosnia, to take the disgraced magistrate in a boat and to supervise the execution of the sentence on one of the Princes' Islands. The boat was just reaching Prinkipo, where the sentence was to be carried out, when fortunately for Karā-Celebi-Zāde, a second letter, procured by his patron, the Grand Vizier Bairam Pasha (d. 1638), brother-in-law of the Sultān, arrived which altered the drowning to banishment to Cyprus and at the last moment prevented the execution of the death sentence (cf. Na'imā, *Tārīkh* Stambul 1147, i. 577). Pardoned by December, 1634, he was appointed military judge of Rumelia. During the rebellion which cost Sultān Ibrāhīm his throne and life in the summer of 1648 Karā-Celebi-Zāde distinguished himself by such shamelessness that even the frank Na'imā (ii. 166; J. v. Hammer, *op. cit.*, v. 449) has not the courage to repeat his utterances. After Ibrāhīm had been disposed of, he gained the favour of the youthful Muḥammad IV, who again appointed him military judge in Aug., 1648. The real object of his ambition, which he pursued by every means in his power, was the office of Shaikh al-Islām. After he had first been granted the title of a Shaikh al-Islām (Na'imā, ii. 231), a case probably unique in Ottoman history, he was removed in October, 1649 from his position as military judge and appointed Shaikh al-Islām in place of Behā'ī Muḥammad Efendi, dismissed on May 2, 1651 ("Balios Müftisi"; cf. von Hammer, *op. cit.*, v. 531—535). On the fatal Sept. 2, 1651 he once more fell into the imperial disfavour and was banished to Chios. Two years later he was given permission to go to Brussa and in 1655 for the barley-money (*arṣalīk*; see i. 460) which he had so far enjoyed he received the revenues of Chios and the office of judge of Mudania, which he exchanged in March, 1657 for that of Gallipoli. On the evening of Jan. 11, 1658, death finally ended Karā-Celebi-Zāde's eventful career. He was buried at Brussa in the cemetery of Shaikh Muḥammad Dewedjī; his tomb may still be seen there.

Karā-Celebi-Zāde is not a very pleasing figure in Ottoman history, as he was a ruthless, selfish and intriguing man. His prestige as a scholar is therefore all the more marked. He was the author of a series of historical works, of which two have so far been printed. With the *Mir'āt al-Safā* his chief production is the *Rawdat al-Abrār*, a historical work in four parts dedicated to Sultān Ibrāhīm I, which covers the period from Adam down to 1056 (1646/47). The book, of which there are several good manuscripts in Europe (cf. G. Flügel, *Die arab., pers. u. türk. Hss. . . . zu Wien*, ii. 96, N^o. 865; Tornberg, *Codices . . . Bibl. Reg. Univ. Upsaliensis*, p. 193, N^o. 277 and p. 197, N^o. 286, which appears not to be complete), was printed in Muḥarram, 1248 (1832/33) at Bülāk

(large 4°, six parts, 637 pp.; on p. 637 full title). Iḥs Sulaimān-nāma has also been printed (Bulāḳ 1248, large 8°, 230 pp.); it is the epic of the legislator Sulaimān in which he describes his glorious reign to his death (1520—1566) in a pleasing flowery style (a MS. in Vienna; cf. Flügel, *op. cit.*, ii. 230). He extended his historical work from 1056 to 1068 (1646—58) by a supplement (*Dhail*) of which there are copies in the Vienna National Library (cf. Flügel, *op. cit.*, ii. 262), in the Johanneum of Graz and in the possession of Dr. J. H. Mordtmann. Several other smaller historical works from his pen exist in manuscript, e. g. an account of the conquest of Eriwān (1635) and Baghdād (1638) entitled *Taṛīkh-i Fath-i Riwān wa-Baghdād* (cf. Flügel, *op. cit.*, ii. 262). Kara-Celebi-Zāde's translations from the Persian and Arabic as well as other writings are detailed by Hādjī Khālifa, *cd.* Flügel, ii. 113, v. 233. He also dabbled in poetry under the name 'Azizī. A poem entitled *Gulshen-i Niyāz*, written in 1634 on the occasion of his banishment, exists in MS. in the Prussian State Library in Berlin (cf. Pertsch, *Verz. d. Türk. Hss.*, p. 415 sq.) and in the British Museum (cf. Rieu, *Cat. of the Turk. MSS.*, p. 191a; see also Hādjī Khālifa, *op. cit.*, v. 233, No. 10,840).

Bibliography: cf. besides the already mentioned sources the biography in Na'imā under the year 1068; Hādjī Khālifa, *Fedleke*, ii. 152 (biography); the best sketch of his life with all details is given by Ismā'il Beligh Brūsewī, *Guldest-i Ziyāl-i 'Irfān*, Brussa 1308, p. 317—322; *Sigill-i 'Othmānī*, iii. 339; Mustakim-Zāde, *Dawḥat al-Mashāyikh al-Kibār*, Vienna MS., Mxt. 153 (Flügel, ii. 409 sq.); Rif'at Efendi, *Dawḥat al-Mashāyikh*, Stambul n.d., p. 58—62; *ʿImīye Sūtnāmesi*, Stambul 1334, p. 461 sqq. (with reproduction of K.'s signature); J. v. Hammer, *Gesch. der Osm. Dichtkunst*, iii. 426 sqq.; *do.*, *Gesch. des Osm. Reiches*, v. 178, 184. — K.'s collection of manuscripts is still preserved in the library of the Shāhzāde mosque in Stambul. A catalogue of the books (16 pp., 4°, Stambul n.d.) has been printed. — On the family, of which several members achieved fame, cf. especially Hādjī Khālifa, *Tuḥẓim al-Tawārīkh*, p. 191; also Ismā'il Beligh, *op. cit.*, p. 315, where the ancestors of Kara-Celebi-Zāde are dealt with; cf. also Wüstenfeld, *Die Gelehrtenfamilie Mulhībī*, p. 48).

(FRANZ BABINGER)

KARĀČĪ (KURRACHEE). 1. An important city and seaport on the coast of Sindh situated 24° 51' N. 67° 4' E. Population (1901) 116,663. The administrative centre of the province of Sindh at the present day, and gives its name to a district.

The name does not appear to be of great antiquity, and is probably due to the settlement of a Dodāi Balōḥ tribe called Kulāčī, originally Rādjpūt (see *Glossary of Panjab Castes*, Lahore 1911), from whom the town of Kulāčī (in the Dēra 'Ismā'il Khān District of the N. W. Frontier) also took its name. Following a common practice in the Sindhi language the *l* has become *r*. (Cf. Kōthi in the Panjāb and Kōthi in Sindh).

The harbour of Karāčī was naturally a good one, although when first surveyed by English sailors it was impeded, as Pottinger tells us (1808), by a bar, which prevented vessels drawing more

than 16 ft. from entering. The population was at that time only 9000, but it had already become the principal port of Sindh. The *Imperial Gazetteer of India* (Bombay, Vol. II) asserts that Karāčī began to be known as a port about 1729, and that its rise was due first to the silting up of Khārak and afterwards of Shāhbandar, a statement which is not easy to understand. Khārak (an island in the Persian Gulf occupied by the Dutch from 1748 to 1765) could have had no influence on Karāčī, and Shāhbandar is too far to the Eastern side of the Indus Delta to have affected it. The real cause was the gradual deterioration of the two ports of Dēwāl and Sindi (often spoken of jointly as Diul-Sindi) which were situated on the two sides of the west mouth of the Indus. These were still in use in Thevenot's time (*Travels in India*, published 1687) and Manucci visited Sindi on his way to India in 1655. During the 18th century the advance of the land cut off these ports from the sea, but Karāčī, lying outside the Delta to the west, was not liable to such rapid silting. It also took the place of Tatta as the principal city of S. W. Sindh. Under the Kalhōra rulers of Sindh it was made over to the Khān of Kilāt, and under his suzerainty was held for a time by the Djam of Las, but after the fall of the Kalhōras the Tālpur Amīr, Fath 'Alī Khān, took Karāčī in 1795 and erected a fort on Manora point to protect the harbour. Henceforward the trade grew considerably. Pottinger's account in 1808 has been alluded to above. Burnes found the population in 1831 to be 15,000.

Sir Charles Napier made it his landing place in 1841 and after the annexation of Sindh in 1843 he undertook its development with the object of making it the military and civil centre of the administration and also an important port equipped to deal with the trade of the Panjāb as well as of Sindh. Through his judgment and foresight he was able to lay the foundations of the progress made in more recent times. Sir Bartle Frere improved the harbour in 1854 by the construction of the Napier Mole which connects Kīāmārī Island with the mainland. The Manora breakwater was constructed in 1869—73, and the harbour has gradually been restricted in area, and at the same time deepened and otherwise improved. In 1883, a good supply of water from the Malir R. was brought in. General Haig in his work on the Indus Delta identifies the harbour of Karāčī with Alexander's Haven which Nearchus reached by sailing westwards from the western mouth of the Indus. As the coast here has not changed so much as in the actual Delta, it is possible to identify some of the places mentioned. The Island of Bibakta appears to be Manōra point, and Eiros seems to be the high ground east of the harbour now known as Clifton. In spite of this identification, however, Karāčī as a town has no ancient or mediæval history, although the harbour must always have been of use as a haven of refuge. Its enormous development in modern times is due to the opening up of the trade of N. W. India by railways. It is the outlet for the wheat, cotton, oilseeds and hides of the Indus valley.

2. Karāčī District. A modern administrative district taking its name from the town of Karāčī, lying between 23° 35' and 26° 21' N. and 66° 42' and 68° 48' E. with an area of 11,970 sq. m., and a population in 1901 of 607,

828. Its boundaries are on the N. the District of Lārkāna, on the E. the R. Indus and the Haidarābād District on the S. the sea, and on the W. the Kirthār Mts. and the Habb River. Besides Karāčī the most important town is Tatta, the ancient capital of S. Sindh, which first rose to importance about the beginning of the 16th century, and was an important centre of trade and government in the 17th century, and still a large and flourishing town in Nādir Shāh's time (1742). It was an important mint of the Mughal emperors from the time of Akbar till that of Muhammad Shāh, when Sindh ceased to form part of the empire. Nādir Shāh and the Durrānis both used this mint; their other mints in Sind were Bhakkar and Haidarābād which latter mint probably also issued the coins of Nādir and the Durrānis bearing the name Sindh alone. Tatta, which is now far inland was in the 16th century accessible to seagoing ships and was visited by a Portuguese fleet in 964 (1556). The Portuguese had apparently been called in by the Tarkhān chief 'Isā Tarkhān, who had obtained possession of Tatta after the death of Shāh Husain Arghūn, but, finding the city unprotected in the absence of 'Isā at the siege of Bhakkar, they turned their arms on their ally and plundered Tatta unmercifully. The port alluded to by the Portuguese as Bandel, which was also plundered on this occasion, was probably Shāhbandar. (See Sayyid Djamāl's *Tarkhān-nāma* in Elliot and Dowson, *Hist. of India*, I, 324 and Danvers, *Portuguese in India*, I, 408). The town of Tatta quickly recovered from this disaster, and its final decay was due no doubt to natural changes in the Indus Delta.

KARADAGH. [See MONTENEGRO.]

KARA DENİZ, the Turkish name for the Black Sea, the Pontus Euxinus (abbreviated to Pontus) of ancient and Byzantine geography. The Arab geographers took over the Greek names Pontus and Maeotis (Sea of Azov) in the forms *Bunṭus* and *Ma'ūṭis*, which early became *Niṭash* and *Mānīṭash* in Arabic writing and language (Juynboll on *Marā'id al-Iṭīlā'*, iv. 194) and in these corrupt forms have survived down to the latest works of Oriental geography. Other names were also used, for example Sea of Trebizond (*Bahr Ṭarabazunda*), Sea of the Crimea (*Bahr Ārim*), Russian Sea (*Bahr al-Rūs*; cf. *mer de Rossia* in Villehardouin, ed. Wailly, § 226), which are explained by the commerce of the Muslim East with Trebizond and the coast lands of South Russia (Yāqūt, *Muḡam*, ed. Wustensfeld, i. 499; al-Dimashki, *Nuḡhat al-Dahr*, ed. Mehren, passim; Abu 'l-Fidā', *Takwīm al-Buldān*, ed. Reinaud, passim; al-Mas'ūdi, *Murūḥ al-Dhahab*, ed. Paris, i. 260 sq.; cf. Marquart, *Osteuropäische u. asiatische Streifzüge*, p. 162, 333); on the other hand, in the passages where *Bahr al-Rūm* — which otherwise means the Mediterranean Sea

only — refers to the Black Sea (e. g. Gardīrī in Maiquart, *op. cit.*, p. 161; al-Dimashki, *op. cit.*, p. 138, 18, 259, 4 sq.) *Bahr al-Rūm* should be emended to *Bahr al-Rūs*. The name *Bahr al-Khazar*, which originally meant the Caspian Sea, was, on the other hand, transferred to the Black Sea (Ibn Khordādhbeh, *B. G. A.*, vi. passim; Qudāma, *B. G. A.*, vi. passim; al-Mas'ūdi, *Kṭ. al-Tanbīh*, *B. G. A.*, viii. passim), as al-Mas'ūdi (p. 67) thinks, because a connection was erroneously thought to exist between the two seas; as at the same time the name *Ma'ūṭis* (*Mānīṭash*) was extended to the Black Sea (al-Mas'ūdi, *Kṭ. al-Tanbīh*, p. 138, 140; *Murūḥ*, i. 272 sq.; al-Dimashki, *op. cit.*, p. 138, 18, 143, 13, 228, 17), the name Sea of the Khazars may have been at first limited to the Sea of Azov and only by a mistaken use have come to include the Black Sea.

All these names were driven out of use by the name *Kara Deniz*, evidence of which is first found in the 13th century and which is no doubt the name given to the Black Sea by the Turco-Tatar inhabitants of its shores in Southern Russia; it was understood by the western authors of the time to mean "Great Sea" (locus classicus, Rubruquis, ed. Bergeron, p. 2: en la mer du Pont que les Bulgares appellent la grande mer; Mare Majus in Haythou, Vincentius Bellocensis, Marco Polo, chap. 1; Mar Majour in Ghillebert de Launoy and Bertrandon de la Broquière; mer mayor in Clavijo; the Grete See in Chaucer, *Prologue*, l. 5^o), more rarely as Black Sea (Schiltberger, who, however, also writes "Grosses Meer"; mare nigrum, quoted for the year 1338 in Yule, *Cathay* etc., new ed. by H. Cordier, iii., London 1914, p. 81; il mar nero in a document of 1473 in Berchet, *La Repubblica di Venezia e la Persia*, Venezia 1865, p. 11), by the Arabs as "Black Sea", *al-Bahr al-Aswad* (Abu 'l-Fidā', *Takwīm al-Buldān*, p. 31, 34; al-Dimashki, *op. cit.*, p. 139, 143, 145, 220; *al-Bahr al-Aḡam* in Ibn Khordādhbeh, p. 110 is to be explained otherwise); among the Greeks we find only *mauri thalassa* and this only for the first time in the treaty with Venice concluded in 1265 (*Fontes Rerum Austr.*, part II, xiv. 62); in literature from the 17th century (see Leunclavius, *Pandectes Hist. Turc.*, Ch. 148). The Italians and French used *Mare Maggiore*, *Mer Majour* down to the first half of the 17th century: henceforth we find the name Black Sea throughout geographical literature. The older reproduction of *Kara Deniz* by "Great Sea" shows that *Kara* in this connection does not refer to the colour but means, as often in proper names, "great, powerful, terrible" (cf. *KARA*), in keeping with the dangers of the voyage, particularly in bad weather, upon this sea so liable to storms and of such extent. All other attempts to explain the meaning, especially those which seek to find the name "Black Sea" among the Greeks and Byzantines, or, like L. de Saussure in his brilliant essay *L'origine des noms de Mer Rouge, Mer Blanche et Mer Noire* (*Le Globe*, xliii. 23 sq.), to trace it to the cosmographic conceptions of the Far East, are to be rejected; nor should one quote in support of "black" Sea the fact that the Turks called the Mediterranean *Ak Deniz* (White Sea), as if by contrast, any more than we could justify the mediaeval nigromantia (a corruption of nekromantia) by saying that white magic was invented as a pendant to it. — The name "Sea

of the Khazars" has survived into modern times in corrupt form *Bahr-i Hazar* (the result of transposition of the diacritical points) as a name of the Sea of Azov.

After the Black Sea had been treated as a *mare clausum* during the centuries under Byzantine rulers, in the latter half of the Middle Ages it was opened up under the Komnenoi and Palaiologoi to the Genoese and Venetians and thus to European trade with the Near and Far East; in Kaffa [see KAFKA], Tana, Amaşra and Samsūn there arose autonomous Frankish colonies and smaller settlements in Sinope and Trebizond. After the fall of Constantinople Mehmed the Conqueror closed the Black Sea to foreign shipping by barring the Straits; the destruction of Amaşra (1459), Sinope and Trebizond (1461) and Kaffa (1475) completed the ruin of Frankish commerce and the Black Sea became a Turkish inland sea, a Πόντος "Ἀξενος", on which only the Turkish flag was allowed to wave. It was only with the advance of the Russian empire to the north coast of the Black Sea that the latter was opened first to Russian commercial navigation by art. X of the treaty of Kučuk Kainardja in 1774, and ten years later, in 1784, to Austrian and in 1799 to British commerce; in the sixteenth century the other European powers obtained liberty of access to the Black Sea: France in 1802 and following her the smaller seafaring nations; the last treaties on this matter were concluded in 1827. Down to quite recently foreign warships were not allowed to pass through the Straits and into the Black Sea.

Bibliography: The history of the various appellations of the Black Sea has not yet been written. The main work on commerce at the close of the Middle Ages is W. Heyd, *Histoire du Commerce du Levant*, Leipzig 1885—1886; reprint 1924; for commerce under Turkish rule: Ch. Peyssonel, *Traité sur le commerce de la Mer Noire*, Paris 1787; for the later period: Hommaire de Hell, *Les steppes de la Mer Caspienne*, Paris and Strasburg 1843—1845. — The political and diplomatic events which led to the opening of the Black Sea in the xviiith century are fully discussed in [P. Hadji Mischief], *La Mer Noire et les Détroits de Constantinople*, Paris 1899; cf. thereon the notes in Djewdet, *Turikhi*, ii. 284 and vii. 485 sqq.; the documents concerned are given by Noradounghian, *Recueil des traités internationaux de l'Empire Ottoman*, vol. i. and ii., Paris and Leipzig 1897—1900. (J. H. MORDTMANN).

KARAFERIYA, a small town in Macedonia, situated about 40 miles to the S. W. of Selānik, on the Ana Dere, a tributary of the Indje Kara Šu, in the neighbourhood of the Gulf of Salonica. The ancient Greek name is Βέροια, in modern Greek Véria (Slav. Ber), to which form the Turks have added the adjective Kara. According to the Byzantine authors the town was sacked as early as 1331 by Turkish pirates belonging to the country of Karasi. They landed with 70 ships and laid waste the region of Véria and Trajanopolis, but they were finally driven back by the emperor Andronicus. Karaferiya was an important military point; in 1347 it was occupied by the Servians and in 775 A. H. (1373/4) it was conquered for the first time by the Ottoman Turks. From the reign of Murād II, from whom dates the conquest of Selānik (1430) down to the

Balkan war, Karaferiya belonged to the Ottoman Empire. In November, 1912 Karaferiya was one of the last Turkish supports in the defence of Selānik, which was at last taken on November 8 of that year by the Greeks; since the peace of Athens (Nov. 14, 1913) it has belonged to Greece.

Karaferiya is situated at the foot of the richly wooded Aghostos Dagħ in a fertile region which produces all kinds of crops and vegetables and is famed for its tobacco and especially its vineyards on the mountain slopes. The silk-growing has given rise to a rather important weaving-industry in the town. In the neighbourhood are still ruins of the ancient Βέροια. In the last period of Turkish domination the number of its inhabitants was a little less than 10,000 of whom about one fourth Muslims, the rest being composed of Greeks, Bulgarians and Wallachians. It was the chief place of a Kaḏā of the same name in the wilāyet of Selānik.

(J. H. KRAMERS)

KARAGÖZ, principal character in the Turkish shadow-play. The shadow-play has been known to the Muhammadan peoples since about the xith century of our era. Its origin is perhaps to be sought, as Jacob suggests, in Eastern Asia, but, as regards the matter of the plays, there seem to be connections with the Hellenistic mime (Horowitz, Reich). The modern Turkish shadow-players attribute the invention of their art to the patron saint of their gild, *Shaikh Kūshteri* (i. e. Tustari, the man from Tustar [Shūshṭar] in Persia), after whom they call their shadow-stage *Shaikh Kūshteri Maidānī* "Shaikh-Kūshteri place". According to the Turkish biographers a certain *Shaikh* Mehmed Kūshteri migrated from Persia to Asia Minor in the xvth century and was buried in Brussa. On the various legendary accounts of the origin of the shadow-play see Ritter, *Karagöz*, i. 5. The shadow-players talk among themselves a kind of professional language, in which gipsy elements predominate. Another circumstance in favour of a connection with the wandering gipsies is the fact that the principal figure, Karagöz, is represented as a gipsy. The shadow-play is a favourite image of the transitoriness and worthlessness of all that is mortal with poets, especially those who are fond of mysticism. The idea often expressed by the mystics that all things in the world have only a shadow-existence and only owe their being to the light permeating things from the Primeval One, who alone possesses reality and substance, found in the shadow-play a symbolical application. The shadow-players are fond of calling attention to this edifying aspect of their performance in the so-called stage-ghazel (*perde ghazeli*).

The external apparatus of the shadow-play consists of a stand like that of the European marionette theatre, only that in place of the open stage a canvas is stretched across and illuminated by an oil-lamp. Against this canvas (*perde*) the

shadow-player presses coloured figures about a foot high made of dried skin; this is done by means of guiding rods which are put into the figures through holes provided with links. All the figures that appear are controlled by one player. Two musicians are his only assistants. The performances usually take place in the early hours of the nights of Ramaḍān but are also given as entertainments at domestic festivals, such as circumcisions.

The following is the course of the typical performance of the Turkish shadow-play: an introductory picture (*gösterme*) is shown on the canvas before the beginning of the performance. This is removed during introductory music on a reed-pipe and one of the two principal characters, Hacıwād, comes on the scene singing a song. At the end of the song Hacıwād calls out *Hai Haḥḥ*, "O God", as the introductory religious formula of the play, recites the stage-ghazel, praises God and curses Satan and then proceeds to pay a tribute of homage to the Sultān. After a conventional introduction he begins to express in rhymed prose his longing for his companion Karagöz and to sing to him before the door of his house — where the scene is supposed to be laid — in languishing tones. Karagöz rushes out in anger and a fight ensues between the two at the end of which Hacıwād usually disappears to return after an interval. The prologue proper then begins, consisting of a dialogue (*muhāwwe*) between Hacıwād and Karagöz, and this is followed after a stereotyped transition-formula by the piece proper, the dramatic part (*faṣl*). The piece again concludes with unvarying turns: Karagöz gives Hacıwād a box on the ear and the latter goes to tell the "master of the curtain" that Karagöz has torn the curtain down and destroyed it. Karagöz then asks for indulgence to the defects of the play and goes off after threatening to punch Hacıwād still harder the next time — here the piece is announced for the next evening.

The principal characters are always Hacıwād and Karagöz. The former is a cultivated elderly gentleman somewhat given to opium eating who is wellknown to all the characters who appear and often acts as their confidant. Karagöz is an uneducated, rough gipsy, the type of simple, natural vivacity contrasted with the decrepit representative of prudence and deliberation. Like his relatives in the European marionette theatre he is the real favourite with the public. He is bald and sometimes still appears with the phallus, both features which indicate a certain connection with the ancient mime. Both characters wear special caps, peculiar to the shadow-play.

The humour of the dialogue between Hacıwād and Karagöz depends for the most part on countless puns and plays on words which are always brought about by Karagöz misunderstanding the learned words of his friend and giving them humorous interpretations. The preludes are not limited to any particular piece (*faṣl*) but are chosen for presentation at will according to the length of the following play. The substance of the dialogue has almost always the same object, to attain humorous effects by the contrast between Hacıwād's learning and Karagöz's stupidity. Hacıwād, for example, gives Karagöz lessons in spelling, proposes games which he does not understand, goes with him as a singing Ramaḍān-night

watchman round the streets, when Karagöz sings all the songs out of tune and misunderstands them, or gives him sentences to be said rapidly, or plays games with him which necessarily end in a fight, etc.

The production of the dramatic part (*faṣl*) which follows the prelude shows certain peculiarities in scenic technique which are the natural result of the paraphernalia of the shadow-stage. The white surface of the canvas, only rarely relieved by a few figures in the wings, always represents the Kūshteri square in front of Karagöz's house, which latter is, as it were, represented by the frame of the canvas. As Karagöz has continually to accompany the action with comments from the window of his house, there are often several scenes of action in one, one quite remote, the real scene of action, and the square before Karagöz's house. The possibility of mixing up the characters into crowds with the conducting-rod is used to present remarkable scenes of recognition.

The players have a fixed stock of pieces, which is practically the same with all companies and, except for a few modern pieces, is considered to have "been handed down from olden times." The pieces are sometimes dramatic versions of popular books (*Ferhād and Shīrin*, *Ṭāhir and Zühre*, *Medjūn* and *Lailā* etc.), in which case Hacıwād appears as trusted adviser and Karagöz as servant of the heroes concerned, or suchlike; sometimes they are pictures of everyday life in Stambul. In the latter we are given a series of Stambul types, among which one recognises pathological (the drowsy opium-eater, the pugnacious drunkard, the lame beggar, the dwarf, the crazy man) and racial types (the young Stambul Efendi, the Persian, the Armenian, the Jew, the rough woodcutter from Kaşṭamuni, the Kaṣarlı, the Lasc, etc.). The effect is very often attained by the formation of a series of incidents. A whole series of characters, differing as much as possible from one another, is brought successively into the same comical embarrassing situation, or they bring Karagöz, around whom the action then usually develops, into some such situation so that the tension increases with each successive character until it is finally relieved by a character superior to the situation.

Pieces of this kind are, for example: *Yalowa Şafazı*, "The pleasure-excursion to Jalowa". A young Efendi, usually called Çelebi, wishes to take a trip with his sweetheart to the seaside resort of Yalowa and buys a bag and a jug in which to put provisions for the journey. While he is away to make the final preparations, Karagöz appears and teases the young woman, who has remained behind with the sack and jug, with stupid stories about a fatal accident that has overtaken her lover, that he has set the sea on fire with a match he had thrown away and has been burnt or that he has been swallowed by an eater of *lokma*, and so on. Then a series of typical characters appear all of whom wish to go to Yalowa with the young woman and are hidden one after the other by the obliging girl in the sack and jug, in which a new fight begins for the little room available with every new-comer. After 5 or 6 people have disappeared in the narrow jug, Çelebi returns and pulls out all the stowaways again. — Another piece of the same kind is *Kanaṭ Nigar* "Bloody Nigar". The young Efendi is stopped in the street by two

ladies of his acquaintance, each of whom assert they have a good right to him and try to pull him with her. As neither will abandon him, women-neighbours are called in to decide which is worthy of the pretty young man. But when the neighbours decide in their own favour, the two women (one is called "Bloody Nigar") drag the young man into their house, undress him, thresh him and throw him out on to the street to punish him for his infidelity. A series of characters then come up who see the young man sitting naked and volunteer in turn to fetch his clothes out of the women's house; first comes Kağaröz, then Hacıwıw, then the drunkard, then a negro and next a dwarf. In the attempt to get the young man's clothes, they all meet in turn with the same fate. They are likewise undressed and thrown naked upon the street so that naked figures keep accumulating round the door of the house. In the end the problem is solved by the robber captain Şarî Efe from Brussa, whom the women respect, and the naked forms receive their clothes again. — Another is *Mandıra*: — Kağaröz finds himself malevolently abandoned by his wife and enters into relations with a lady who meets him on the street and takes her to his house. To his question whether she also has no lover she replies: "apart from him who comes afterwards, no one". Then various lovers of the woman come in turn, ask for Kağaröz's new house-mate and send all kinds of love-verses to her through him which the latter delivers to her in quite a distorted fashion, and ask her to take a trip with them to Mandıra. But they are always driven away by Kağaröz and to his repeated question whether there is still any one coming the woman only answers with the above phrase. This goes on for a considerable time until finally Kağaröz is turned out of his own house by the drunkard and then collects the admirers he has driven away in order to recapture his own house. In the mêlée which follows all take to their heels. — In the "Singer's competition" (*Kağarözün Şah'irliyi*) Kağaröz as a strolling singer (*aşık*) disposes of a number of droll singers who have assembled for a competition. In the "writer-play" (*yazdı oyunu*) he appears as a public letter-writer who writes letters which are absolute nonsense for his clients. — In the "Boat-play" (*kağı oyunu*) he acts in his particular way as a ferry-man assisted by Hacıwıw. In the "Swing-play" (*şallındık oyunu*) he lets a swing to the most varied customers, lastly to a Jew who apparently dies on it and is buried by his co-religionists in the most ludicrous fashion and is then brought to life again. Another time we find Kağaröz as a rich gentleman (*Kağarözün Aghalığı*) and in this capacity he has to deal with a series of people who wish to get positions in his service and with a beggar.

The series of incidents is often made up of vain attempts by Kağaröz to gain admittance to a house or a garden, for example in the "Garden-play" (*bağçe oyunu*), in the "Bath" (*hammam*), the "Surprise" (*başkın*), or of his unsuccessful attempts to ascertain something about his wife's doings by questioning the neighbours, who in turn misunderstand his questions and give the stupidest answers ("The Well *Çeşme*").

Pieces in which we do not have this succession of incidents are, for example, "The Poplar" (*Kanlı Kawağ*), in which an amusing act is spun round a brief touching episode: the

singer Hasan's son is stolen by the spirit of the poplar but restored on the poetic appeal of his father. Kağaröz is first of all bewitched by the spirit of the poplar, then released by Hacıwıw and, when he wants to cut down the poplar as a punishment, he is seized by two Albanian foresters and punished with the bastinado, which is made the more severe in a comical way as the foresters continually go wrong in counting the blows and have to begin all over again. — In the "Circumcision" (*sünnet*) Kağaröz is circumcised when a full grown man and the usual games are played which are used to distract a boy from the pain. A shadow-player appears, for example, so that we have here a play within a play, also an *orta oyunu*-player, two jugglers, etc. — A kind of competition in magic between two witches, in which the young Efendi and his sweetheart and then Kağaröz and Hacıwıw are turned into animals, is the "Witch-play" (*Djâzûlar*). — In the "Lunatic asylum" (*timârkhâne*) Kağaröz is infected by some lunatics escaped from an institution and chained by Hacıwıw in an asylum and treated by a Frank doctor. — In the "Wrong Bride" (*Sâkhte Gelin*) Kağaröz is brought as bride to the drunkard, in order to cure him of his craving. — Lastly the play the "Bar" (*Maikhâne*) shows the doings of a famous sot named Bekri in a bar. The pieces so far mentioned substantially form with several other less important and less well-known pieces (*Tukhmisâjiler*, "The broken ones", *Kırğınlar*, "The coffee-crushers", *Balık Oyunu*, "The fish-play", *Djânâzlar*, "The rope-dancers", *Edizâkhâne*, "The chemist's shop") the usual repertoire of the shadow-players.

Very few of these plays have so far been published and translated and those usually in an abbreviated form. The texts printed in the east are almost all bad and defective. For further particulars see the *Bibliography*.

(H. RITTER)

KARAGÖZLÜ ("Black-eyed"), a Turkish people around Hamadān, to which they pay their tribute (Curzon, *Persia and the Persian Question*, London 1892, ii. 270 and 472). The Karagözlü are several times mentioned in the history of the domestic troubles in Persia in the second half of the xviiith century; cf. J. v. Hammer, *Geschichte des Osmanischen Reiches*², Pest 1836, iv. 475; *Tārīkh-i Zandiya*, ed. Beer, Leiden 1888, p. 33, 42 and 93. In the first half of the sixteenth century the Karagözlü are said to have numbered some 12,000 souls (C. Ritter, *Erkundung*, viii. 404 and ix. 78). Karagözlü is also the name of a small Turkish clan in Fārs, which belongs to the 'Inābulī group of the tribal confederacy Ilāt-i Khamsa (Tumanskiy, *Ot Kaspiyskago moria k Akhormuzskomu piolivu i obratno*, St. Petersburg 1896, p. 78). A Tatar village in what was formerly the gouvernement of Yelisawetpol in the district of Djevanshir is also called Karagözlü.

(W. BARTHOLD)

KARA HIŞAR, "Black Castle", the name of several places in Asia Minor, which, although distinguished by epithets, are often confused with one another; lists of them, none of which is complete, are given in a later addition to Yaḡūt's *Muḡam*, ed. Wüstenfeld, iv. 44, then by Ewliyā. *Siyāhatnāme*, Constantinople 1314—18, ii. 384 = *Narrative of Travels by Evliya Efendi*, O.T.F., London 1850, ii. 205 (cf. J. v. Hammer, *Gesch. d. Osm. Reiches*, Pest 1827—35, iv. 619), in Aḥmad Wafīk's *Lehçe-i 'Othmānī*, Constantinople 1293, p. 911, and in 'Alī Djawād, *Tārīkh wa-Djaghrafīya Lughātī*, Constantinople 1313, i. 599. They are alike in being situated on heights, sometimes difficult of access and fortified; the majority date probably from the middle ages only and were mainly built as places of refuge for the inhabitants of the surrounding country during inroads which were continually made in the wars of the Byzantines with the Arabs and Saldjūks and later in the wars between the small states that arose in Asia Minor; many were later abandoned under the peaceful rule of the Ottomans and disappeared from our maps.

The most important places of this name are:

1. Kara Hişār-i Şāhib (in Nashri, *Z.D.M.G.*, xiii. 193 = Leunclavius, *Hist. Musulm.*, Frankfurt 1591, col. 140, Şāhibiñ Kara Hişārī; Saibcarascar in Caterino Zeno, *Commentarii del Viaggio in Per-*

sia, Venice 1558, fol. 14b), also called Afūn Kara Hişārī ("the opium K. H."). The former name is derived from a notable man of the last period of the Saldjūks of Konya, Şāhib Atā Fakhr al-Dīn 'Alī Beg (d. 687 = 1288/9), who had retired there with his treasures before the Karamānians and Mongols and whose successors ruled the town and district under the protection of the Germiyan-Oghlu of Kütāhya (Houtsma, *Recueil de textes rel. à l'hist. des Seldjucides*, iv. 308, 323, 327, 334, where K. Dewele means this K.; Ibn Faḍl Allāh, *Masālik al-Absār*, transl. by Quatremère in the *N.E.*, xiii. 350, 357; Aḥmad Tawhīd in the *Revue Historique publiée par l'Institut d'Histoire Ottomane*, first series, p. 563 sq.). The popular name Afūn Kara Hişār later became generally used in place of K. H. Şāhib, which is still the official name. Afūn K. takes its name from the extensive cultivation of opium in the neighbourhood which is mentioned as early as Belon, *Les observations de plusieurs singularitez et choses mémorables*, Paris 1555, fol. 183a; cf. Blau in the *Z.D.M.G.*, xxiii. 280.

Kara Hişār-i Şāhib is now identified with the Byzantine fortress Akroinós, Akroíjnos, in the vicinity of which the legendary Saiyid Battāl in 739 perished with his followers on a campaign against the Byzantines (Theophanes, *Chrenogr.*, ed. de Boor, i. 390, 411) and where the Comnenus Alexius I negotiated with the Saldjūk Sultān in 796 (Anna Comnena, *Alexias*, ed. Reifferscheid, ii. 285); in the course of the xiiith century it must have been taken from the Byzantines by the Germiyan-Oghlu. Khidr Pasha (d. 750 = 1349), son of Sulaimānshāh of Germiyan, and other members of this dynasty are mentioned as presidents (*Chilēbī*) of the Mewlewī settlements in K. (cf. Ghālib Dede, *Tadhkara-i Shu'arā-i Mewlewīye*, MS., No. 1257 of the Vienna Nat. Libr., fol. 54^a and 90^a = 'Alī Enwer, *Simā-ḥūne-i Edeb*, Stambul 1309, p. 48 sq. and 102). During the invasion of Asia Minor by Timur after the battle of Angora (1401) K. also was visited by the victor's raiding parties (Sharaf al-Dīn 'Alī Yazdī, *Zafarnāme*, Bibl. Ind., Calcutta 1887—88, ii. 446, 457, 484, 492 = *Histoire de Timur-Bec* etc., Fr. transl. by Pétis de la Croix, Delft 1723, iv. 21, 31, 60, 68; Dukas, *Hist.*, ed. Bonn, p. 77). In 832 (1428/9) the kingdom of the Germiyan-Oghlu passed to the Ottomans and K. with its lands became incorporated in a sandjak of the eyalet of Anadolu (cf. *Djihanname*, p. 641). As a stronghold near the Karamanian frontier it remained of military importance so long as Karaman was still independent; at the beginning of the war with Uzun Ḥasan in 877 (1472/3) prince Muṣṭafā fell back on its defences and made raids from it upon the Karaman-Oghlu who were allied to the Persians ('Ashk Pasha Zāde, *Tārīkh*, Istanbul 1332, p. 177; Sa'd al-Dīn, *Tadh al-Tawārīkh*, i. 524; Caterino Zeno, *op. cit.*) and in 895 (1489/90) K. formed the base of the operations of the Hersek-Oghlu Aḥmad Pasha against the Egyptians who had invaded Karamania (Sa'd al-Dīn, *op. cit.*, ii. 65). But K. became still more important as a junction of the caravan-routes leading from Smyrna to trading centres of the interior, like Angora, Kaşariya, Tokat, etc. In recent years the Smyrna-Cassaba railway there joins the Anatolian railway system which starts in Stambul. On the dissolution of the old eyalet of Anadolu the sandjak of K. was attached to the

province of Brussa; the town of K. is the residence of the *mutşarrıf*; its population was estimated at 25,000 in 5,000 houses (20,000 Muslims, 5,000 Armenians, some 300 Greeks), but later figures are not available.

Of the few relics of classical antiquity the majority must have been brought here from ruined sites in the neighbourhood, like Seidiler (Prymessus), İsdje Kārahışār (Docimaeon) and Çifut Kaşabası (Synnada); the monuments of the time of the Germiyan-Oghlū, e. g. the Ulu Djami' of Khodja Beg and the tomb of Sultān Diwāni, and the older buildings of the Ottomans have not yet been thoroughly investigated.

The feature of the town, the steep cone of trachyte which rises 650 feet above the level of the town which lies around it, with the late Byzantine defences renovated by the Germiyan-Oghlū, still bore in Niebuhr's time the name Lek Baran Kālesi, ("the fortress which affords shelter to the Beg"); this citadel was probably never really a permanent settlement and is now left to fall to pieces, although it has been from time to time used for the internment of political prisoners (Ashik Pasha Zade, *Tarih*, p. 243-4), the last occasion being in 1802 when French prisoners of war from Egypt were kept there. The "Arabic" foundation inscription at the entrance, which Niebuhr and Oberhummer saw, has not yet been copied.

Some 15 miles or 5 hours north of Kārahışār-i Şāhib lies:

2. İsdje Kārahışār — the correct name, not Eski K., as in Hamilton, *op. cit.*, i. 461, 467, de Laborde, *op. cit.*, p. 68 sq., Texier, *Description de l'Asie Mineure*, i. 145-152, and following them C. Ritter, *Kleinasien*, i. 605, 642 sq., nor İtehi or İstyā (Ramsay, *Mitt. Dtsch. Arch. Inst. in Athen*, vii. 132 sqq., x. 348), nor again İsehtshi (Korte, *op. cit.*, i. 88 sqq.) or İshite K. (v. Diest, map in *Petermann's Mitteilungen*, Erg.-Heft No. 125 —, a village of 251 houses near the quarries of the ancient Docimaeon, from which the marble of Synnada came; the quarries have again been worked in modern times by European enterprise (*Sālnāme Brūsa*, 1325 A.H., p. 125).

3. Kārahışār-i Şarkī, also called Şābīn (or Shebin, Sheb) Kārahışār, or Kārahışār-i Şābkhāne, from the alum-mines in the neighbourhood which were worked in ancient times and still more in the middle ages and produced a particularly esteemed kind of this mineral.

As was first pointed out by Blau in 1865 on the authority of a Byzantine inscription the town is the ancient and mediaeval Colonia and bore this name down into modern times. After the reforms of Justinian it belonged to Armenia Prima; in the *Notitiae Episcopatum* it appears as the see of the bishop of Armenia Secunda. In 162 (778) the town was captured by Yazid b. Usaid al-Sulamī in a raid on the Pontus (Ghévond, *Hist. des Guerres des Arabes en Arménie*, p. 106, quoted by Blau; cf. al-Tabari, ed. de Goeje, iii. 493; cf. Ibn Khordādhbeh, *B.G.A.*, vi. 108). On the other hand the Kālūniya which, according to Eutychius, ed. Selden and Pococke, p. 383, was taken by the Sāsānid Shāpūr with Cappadocia and the Kālūniya, which the Hāmānid Saif al-Dawla captured in 335 (946/7) (*Z.D.M.G.*, x. 467; Yāqūt, *Mu'djam*, ix. 168) are almost undoubtedly identical with Colonia Cappadociae, which, according to Niketas (p. 72 and 689), is the later Aḡ-sarāi. This strong fortress must have been lost to the Byzantines after the battle of Manzikert. The Dānīshmand-Oghlū first established themselves there (Anna Comnena, *Alexias*, ed. Reifferscheid, ii. 164); later we find the Saltūḡids of Erzerūm in possession (Niketas Chon., *Ann.*, ed. Bonn, p. 185, 294) who were dispossessed in 598 (1201/2) by the Saldjūks of Kōnya; they in turn were succeeded by the Mangūdids, vassals of Kōnya. After the fall of the Sultanate of Kōnya, the descendants of Eretnā ruled there and various princes of the house of the Aḡ-Koyunlu and Kārahışār-Koyunlu (cf. Sa'd al-Dīn, i. 287 = 'Alī, *Kunh al-Akhbār*, v. 178 = Leunclavius, *Hist. Musulm.*, col. 474, 14 sqq.); in 1473 after the battle of Terdjān the town was taken by Meḥemmed the Conqueror and incorporated in the Ottoman empire (Ashik Pasha Zade, *Tarih*, p. 378 and 181, who describes the town as the Kārahışār of Kamākh, and Sa'd al-Dīn, i. 541 and 542; Leunclavius, *Hist. Mus.*, col. 589, 42 sqq.); Kārahışār-i Şarkī formed a sandjak of the eyālet Erzerūm (Ewliyā, *Travels*, ii. 205; Hādjdjī Khalifa, *Djihānnumā*, p. 422, 424); this district now belongs to the wilāyet of Siwās and the seat of government is in the town of the same name.

The old name Colonia was taken over by the Saldjūks in the Armenian form Kughūniya, which we find in Ibn Bibi's chronicle (Houtsma, *Recueil*, iii. 291-295, iv. 151, 152, 319) and on the coins of Eretnā (Aḥmad Tawḥid, *Meshkūkāt-i Kādime-i Islāmīye*, iv. 439). If, as seems almost certain, the Mavro-Kastran mentioned by Michael Astaliota, ed. Bonn, p. 125, and Skylitzes, p. 679, "on a high hill difficult of access in Armenia", is identical with Colonia, Kārahışār seems to have already been in use alongside of Colonia; among the Greeks of the xviiith century we again find the form Garasaris, corrupted out of Kārahışār, in use as well as Colonia.

The imaginative description of the town in Ewliyā Çelebi and scanty references in the *Djihānnumā*, both of the second half of the xviiith century, are corrected and supplemented by the descriptions of modern travellers. The town, built on

the slopes of a hill below the ancient fortifications possessed—according to Cuinet, with whom travellers agree—12–13,000 inhabitants (7500 Muslims, 3000 Armenians and over 1500 Greeks) and was the residence of the *mutesarrif* and of an Armenian Bishop and of the Greek Metropolis of Nicopolis; there is no more modern information available. The citadel surrounded by a ring of walls, in which old well-shafts suggest a pre-Hellenic settlement, is no longer inhabited; within this fortress on the summit of the hill lies a small fortified redoubt with an octagonal watch-tower. The defences date from the Byzantines and were further developed by the Muslim rulers.

Schiltberger (*Reisebuch*, ed. Langmantel, p. 57) calls Karassere "ein fruchtbares lant an weinwachs" (a land rich in vine-yards); more famous than the vine-yards which still exist were the rich alum-mines in the adjoining village of Şahbkhāne, in which were obtained the valued "alume de rocca di Colonna" (i. e. Colonia) (Pegolotti in Heyd, *Histoire du Commerce du Levant*, ii. 565); these are the *aluminis minera iuxta Sabastiam quae valet unam argentariam* of Vincentius Bellocensis, xxxi. col. 143; they were also mentioned by Rubruquis (ed. Bergeron, p. 147). Mehmed the Conqueror took possession of them for the state treasury (Sa'd al-Din, i. 542) and from the rent they yielded when farmed out to the garrison of the fortress was later paid (*Djihānumū*, p. 424).

Bibliography: Ewliya, *Siyāhatnāme*, ii. 384 sqq. = *Travels*, ii. 204 sqq.; C. Ritter, *Kleinasien*, i. 208 sqq.; H. Barth, *Reise von Trapezunt nach Scutari*, Supplement to *Petermann's Geogr. Mitteilungen*, Gotha 1860, p. 14 sqq. (with plan of the town), thereon A. D. Mordtmann's additions in *Ausland*, 1863, p. 406 sq., 414 sq.; O. Blau in *Petermann's Geogr. Mitteilungen*, 1865 p. 252; Taylor in the *Journal of the R. Geogr. Soc.*, 1868, xxvii. 293 sqq.; P. Triantaphyllides, *Ἡ ἐν Πόντῳ Ἑλληνικὴ φύλις*, Athens 1866, p. 113 sqq.; X. A. Sideropoulos in the *Arch. Suppl.* to vol. xviii. of the publications of the Greek Syllogos at Constantinople; F. and E. Cumont, *Studia Pontica* ii.; *Voyage d'Exploration archéologique dans le Pont*, p. 296 sqq. (with pictures).

4. Kara Hişar-i Behrāmshāh (Bairāmshāh) is first mentioned by Hamdullāh Muşawfī, *Nuḥat al-Kulūb*, p. 97; Sidi Re'is (xvth century) visited the place on his journey from Siwās to Bozak and Kirshehir (*Mir'at al-Mamālik*, Stambul 1312, p. 96). In Kītib Celebi's time (xviith century) it was a *kaẓā* of the eyālet Siwās (*Djihānumū*, p. 622); it is now the residence of the *Mudir* of the nāhiye of the same name of the *kaẓā* of Ma'den in the sandjak Yozghad in the wilāyet of Angora, of day's journey east of Yozghad. The place is not marked on our maps.

5. Kara Hişar-i Demirdji, a village in the *Kaẓā* Çorum of the wilāyet of Angora, a few hours north of the famous ruined site of Üyük, given in the *Djihānumū*, p. 625, among the *Kaẓā*'s of the sandjak of Çorum. W. Hamilton in 1838 was the first European to visit and describe it (*Researches* etc., i. 379, 381, 403; following him Ritter, *Kleinasien*, i. 147, 149 sqq.); next came in 1859 H. Barth (*Reise von Trapezunt nach Scutari*, p. 42) and A. D. Mordtmann (in *Ausland*, 1863, p. 785; *Sitzungsber. Bayr. Ak.*, 1861, p. 191 sq.). The ruined

site of Kaṭā Sarāy which belongs to it is mentioned under this name in the *Djihānumū* also. On our maps this Kara Hişar appears without an epithet; it may be identical with the Kara Hişar which the older Ottoman chroniclers mention in connection with the fightings of prince Muḥammad with the Yürük chief Gozleroghlu about 805 A. H. (Leunclavius, *Hist. Musulm.*, col. 386; Sa'd al-Din, i. 200).

6. Kara Hişar-i Teke (*Djihānumū*, p. 638; Aḥmad Wafik, 'Alī Djawād, *loc. cit.*) also called Kara Hişar-i Adalia (Ewliya, *Travels* etc., ii. 705), is mentioned by Yāqūt, *Mu'jam*, iv. 44 as a village a day's journey from Anṭakiya (or rather Anṭaliya). In the time of Ibn Faḍl Allāh a certain Zakariyā, a former Mamlūk of the lord of Adalia, had made himself independent there and ruled a small territory which included 3 towns and 12 strongholds (*N. E.*, xiii. 372 sq.). The place is still mentioned in the surveys of Mehmed the Conqueror (*Revue Historique publ. par l'Institut d'histoire Turque*, part ii. 76) and as a *kaẓā* of the sandjak of Adalia in the *Djihānumū*, *loc. cit.* According to Aḥmad Wafik, K. is the capital of a nāhiye of the *kaẓā* of Sirik in Adalia, in the wilāyet of Konya; the *Sālnāme* of this wilāyet, however, only knows the place-name Sirik, nor is the older name found on our maps. Sirik, a miserable village on a tributary of the Köprü Şu (Eurymedon), is the ancient Selge (Ritter, *Kleinasien*, ii. 515 sqq., 653; G. Hirschfeld, *Reise im südwestlichen Kleinasien* in the *S. B. Pr. Ak. W.*, 1875, p. 134). The similarity of names is accidental because Sirik is originally the name of a Yürük clan.

Besides these towns of the name Kara Hişar and Dewele K. dealt with separately (see above, i. 952) the following are also given:

Kara Hişar in the land of Osman (Yāqūt, *op. cit.*); this may refer to Karadja Hişar, also called Karadja Shehir near İnönü in the ancestral lands of the Ottoman Sultans for which even in the older historians Kara Hişar is often written.

Kara Hişar in the land of Ibn Torghut (Ibn Faḍl Allāh, *op. cit.*, p. 350); no other reference is known, unless it is an older name for Torghudlu Kaşabasi near Mānisa.

Kara Hişar, capital of the *Kaẓā* of Na'illukhān, wilāyet of Angora (Aḥmad Wafik, *op. cit.*), not given in the *Sālnāme* nor marked on the maps.

Hamām Kara Hişari, village of the nāhiye of Günyünzi, *Kaẓā* of Siwri Hişar, wilāyet of Angora (*Sālnāme*); also on the maps.

Wān Kara Hişari (Ewliya, *op. cit.*); no other reference known. (J. H. MORDTMANN)

KARAK. [See KERAK].

KARAKALPAK ("black caps"), a Turkish people in Central Asia. In the Russian annals a people of this name (Černi Klobutzi) is mentioned as early as the twelfth century; whether these "black caps" are identical with the modern Karakalpak cannot be definitely ascertained. It is not till the end of the xviith century that we find records of the Karakalpak in Central Asia. According to the embassy report of Skibin and Troshin (1694), they then lived on the Sir Daryā, 10 days' journey below the town of Turkestan. There they are again mentioned in the xviiith century as neighbours of the land of the Khāns of Khiva; about 1722 a treaty was concluded by the ambassador Verzhinin between Peter the Great and the Khān of the Kara kalpak, Abu 'l-Muzaḥfar Sa'adat 'Ināyat Muḥammad

Bahādur (*Polnoye Sobraniye Zakonov*, 1722, No. 4101). The eastern part of the lands of the Volga Kalnūcks between the Ural mountains and the Volga used to be raided by the Qarākalpak. Even then the Qarākalpak lived not only by their herds and by their raids but also by agriculture — with artificial irrigation of their fields — and by fishing (on Lake Aral). They are said to have migrated to Central Asia from the Volga region. About the middle of the xviiith century the winter quarters of a body of the Qarākalpak were on the central course of the Sir at Khawās (north of Ura-Tūbe); the prince (*tura*) of these Qarākalpak entered into an alliance in 1755 with the *Atalik* of Bukhārā, Muḥammad Rahīm; 3,000 families of the Qarākalpak were settled at Samarḳand and received from there 400 ass-loads (*khawār*) of corn; the son of the *tura* joined the army of the *Atalik* (Muḥ. Wafā Karminagi, MS of the Asiatic Museum, c. 581 b, f. 148^b). Radloff (*Aus Siberien*, Leipzig 1893, i. 228) visited in 1868 north-east of Samarḳand some settlements of the Qarākalpak, who had immigrated "from the Amū-Daryā not long ago". A considerable number (about 20,000) still live in Farghāna at the present day. The Qarākalpak are said to have been driven out of the lower valley of the Sir Daryā by the Qazaḳ towards the end of the xviiith century; they are still mentioned in the sixth century a little farther south on the (now dried up) Yenī Daryā ā propos of the campaigns of Muḥammad Rahīm, Khān of Kḥiwa, against the land of Kungrat (1807—1811). The Qarākalpak were then subject to the Khān of Kungrat and lived, in part, on the lower course of the Amū Daryā, especially on the arm of the river known as the "Qazaḳ"; there they succeeded in holding their own even at a later date against the Qazaḳ. After the union of Kungrat with Kḥiwa (1811) the Qarākalpak also had to submit to the Khān of Kḥiwa, but made frequent attempts to throw off this yoke; in 1827 the town of Kungrat was even captured by them for a time; after the suppression of this rising a part of the Qarākalpak migrated to Farghāna (*History of Kḥiwa*, MS. of the Asiatic Museum, 590 oh, f. 300^b—305^b). In 1855 the leader of the rebel Qarākalpak, Ir-Nazar-bī, adopted the title of Khān (*ibid.*, f. 516^a); the fortress built by him near where the Qazaḳ flows into Lake Aral, the ruins of which still bear his name, did not fall till the following year, and then through treachery, into the hands of the Kḥiwans. After the Russian conquest of Kḥiwa in 1873, when the Khān had to cede to Russia all his possessions east of the main arm of the Amū and the most north-western arm of its delta (Taldīk or Taldīk), the land of the Qarākalpak also became Russian. The area, then separated from Kḥiwa, was first administered as a separate circle (*otdyel*), later as part of the gouvernement of Sir Daryā; after the revolution it was constituted a separate territory (*oblast'*). The Qarākalpak form about half the population there, according to the latest census over 110,000 souls. In addition there are about 20,000 Qarākalpak in Kḥiwa and as many in Farghāna.

The dialect of the Qarākalpak was first investigated in 1903 by S. Byelyayew; some of the texts then written down were later published (1917) in the *Protokoll Zakaspiyskogo Kruzhka lyubiteley Arkheologii* etc., parts 3 and 4. Information on the Qarākalpak is given in all hooks on Turkestan

and its population; e. g. Fr. v. Schwartz, *Turkestan*, p. 17; Kostenko, *Turkestanskiy Kray*, St. Petersburg 1880, i. 329 sq.; Masal'skiy, *Turkestanskiy Kray*, St. Petersburg 1913, p. 390 sq.; *Aziatskaya Rossiya*, St. Petersburg 1914, an official publication, i. 163 sq.; Vambéry, *Das Türkenvolk in seinen ethnologischen und ethnographischen Beziehungen*, Leipzig 1885, p. 373 sq. No special monograph has so far been devoted to the study of the Qarākalpak people. (W. BARTHOLD)

QARA KHALIL. [See ÇENDERELI].

QARA KHITAI (or QARĀ KHITĀI), the usual name since the vith (xith) century in Muḥammadan sources for the Kitai people, mentioned by the Chinese from the eighth century A. D. onwards, who were probably Tunguz (according to another view Mongol). In the Turkish Orkhon inscriptions the Kitai are several times mentioned as enemies of the Turks in the extreme east of the area visited by the Turks in their campaigns; according to Chinese sources, they lived in the southern part of Manchuria. From the beginning of the tenth century the Kitai carried on a campaign of conquest, conquered the northern part of China and founded a dynasty which as a Chinese ruling house was called Liao (916). Even the founder of the dynasty, Apaoki, was able to subdue Northern Mongolia, which had been conquered by the Kirghiz about 840; Apaoki himself visited Karakorum in 924 and is said to have received an Arah, i. e. Muḥammadan, embassy there (Bretschneider, *Mediaeval Researches from Eastern Asiatic Sources*, London 1910, i. 265), the first record of the appearance of Muslims in this region; it was probably only a trading caravan (Mongolia, of course, lay outside the usual range of Arabic geographical literature, for which the Kirghiz were the extreme north-eastern people). The house of Liao succeeded in holding its ground against the national Sung dynasty which had arisen in South China since 960; not till about 1125 were the Kitai driven from China and Eastern Asia by another Tunguz people, the Djurdjen.

Even before settling in China the Kitai had adopted Chinese civilization to a greater extent than other nomadic peoples; in contrast to the cult of the rising sun predominant among the other nomads of the East, they had borrowed from the Chinese the cult of the South; with this fact is no doubt connected the spread of this cult among the Mongols, and throughout the Mongol Empire in Central Asia generally (see W. Barthold's essay in the *Zapiski vost. otd. arkhe. obshch.*, xxxv. 55 sq.). As the Djurdjen did later, the Kitai formed a system of writing of their own based on the Chinese hieroglyphic system (about 920 A. D. with some 1000 characters). A statement in the official "History of the Liao" (*Liao-shi*) where, according to de Groot's translation, there is mentioned an alphabet prepared for the Kitai ("small characters, few in number and all arranged in rows") by the foreign wise man, Tiet-ts'ik (according to F. W. K. Müller, perhaps *tarsū* = Christian), is explained by Marquart to mean that about this time (the statement refers to the reign of Apaoki) the sounds of the language were reproduced in an alphabet of western origin (perhaps modelled on the Uighur) (*Sitzungsber. d. Preuss. Akad.*, 1912, p. 500 sq.); documents or inscriptions in this alphabet have so far not been found. On the other hand we have specimens of Kitai writing in the alphabet

modelled on the Chinese. Quite recently P. Pelliot (*Fourn. Asiat.*, Ser. II, iv. 174) mentions a Chinese "maigre vocabulaire" of the language of the Kitai.

As early as the first quarter of the eleventh century (according to some 403 = 1012/3, according to others 408 = 1017/8) an attack was made by the *Khita* or Kitai (not yet called *Karā Khitai*) against Muslim lands; they are said to have advanced within 8 days' journey of Balasāghūn [q. v.] and were only driven back from there by the *İlek Khāns* [q. v.]. In what connection this campaign stands with events in Eastern Asia is not known; Marquart's attempt (*Osttürkische Dialektstudien*, Berlin 1914, *Abh. der Kon. Ges. der Wiss. in Göttingen, phil.-hist. Klasse*, New Series, vol. xiii, No. 1, p. 194 sq.) to find with the help of de Groot some reference in the *Liao-Shi* which might be connected with this campaign has not been successful. On the campaign itself see Ibn al-Athīr, ed. Tornberg, ix. 209 sq.; Marquart, *Osttürk. Dialektst.*, p. 54; Barthold, *Turkestan* etc., ii. 294.

More important for the Muslim world was the western movement of the Kitai after the destruction of their empire in China by the *Djurdjen* (in Muslim sources later called *Čurčit*) about 1125. It was not the migration of a whole people; a part of the Kitai remained in China under the rule of the *Djurdjen* and at a later date, in the time of Čingiz *Khān* [q. v.], took the opportunity to rebel against the dynasty and to restore the kingdom of the Kitai as a Mongol vassal state. Kitai is, of course, still the usual name for China among Mongols and Russians; in Muhammadan sources the Kitai who remained in China as well as those who migrated westwards are called *Karā Khitai*. The Chinese historians continue to regard the Kitai dynasty expelled from China as a Chinese imperial dynasty under the name "Western Liao", with posthumous titles, reign periods, etc. — probably the only example of the members of a dynasty of foreign origin being regarded as Chinese emperors even after their expulsion from China. But the statements of the Chinese annals regarding the Western Liao are very inaccurate as regards chronology and in other respects also very meagre. The Chinese can only report one march of the Kitai through the modern Chinese *Turkestan*; from Muhammadan sources we know that it was not this migration that led to the formation of a Kitai kingdom in the West; on the contrary, these Kitai were completely defeated by Arslan *Khān* Ahmad b. Hasan, prince of *Kāshghar*, a few days' journey beyond this town. Ibn al-Athīr (cf. the account in his *Chronicle*, xi. 55) places this battle in the year 522 (1128); perhaps it took place a few years later, as it is mentioned as a very recent event in the letter sent in name of Sultān Sandjar to the Caliph's vizier in Ramadān, 527 (July 6—Aug. 4, 1133) (Barthold, *Turkestan* etc., i. 35 and 37). Presumably another branch of the migration of the Kitai by a more northern route met with more success; we get the fullest account of it from *Djuwaini* (*Ta'rikh-i Djahan-Kushai*, ed. Mirzā Muḥ. Kazwini, ii. 86 sq.; translation in d'Ohsson, *Hist. des Mongols*, i. 441 sq. and following him in Bretschneider, *Mediaeval Researches* etc., i. 225 sq.). According to this account, the *Karā Khitai* advanced through the land of the *Kirghiz* (on the Yenisei), then south-westwards to the region of the modern *Cugačak*, where they built the town

of *İmil*. From there as a base they occupied without opposition the town of *Balasāghūn* [q. v.], whither the Muslim ruler of this region of the *İlek Khān* dynasty had summoned them against his enemies; it was only from here, i. e. from the North, that they conquered *Kāshghar* and *Khōtan* and later *Mā-warā'-al-Nahr* and *Khawārizm*; the king of this land, *Atsiz* (1128—1156), had to bind himself to pay a yearly tribute of 30,000 *dinārs*. On the fighting in *Mā-warā'-al-Nahr* and *Khawārizm* we are particularly well informed by Ibn al-Athīr as well as by a few earlier sources like *Imād al-Dīn* (Houtsma, *Recueil de textes rel. à l'hist. des Seljoucides*, vol. ii.) and *Rāwandī* (*Rāhat al-Šudūr*, ed. Muḥ. Iḳbāl, esp. p. 172 sq.); the material is utilised in Barthold's *Turkestan* etc. and in Marquart's *Osttürkische Dialektstudien*. In Ramadān, 531 (May-June, 1137) the *Khān* of *Samarḳand*, *Maḥmūd*, was defeated at *Khodjand* and on *Šafar* 5, 536 (Sept. 9, 1141) his powerful overlord, Sultān Sandjar, in the desert of *Qatwān* north of *Samarḳand*. After this the kingdom of the *Karā Khitai* stretched from the land of the *Kirghiz* (on the Yenisei) in the north for a time as far as *Balkh* in the south, from *Khawārizm* in the west to the land of the *Uighurs* (see *BISHBALIK*) in the east, with its ruler's residence on the *Cū* [q. v.] at *Balasāghūn*. The ruler bore the title *Gürkhan*, which is explained by *Djuwaini* (ii. 86 below) as "*Khān* of *Khāns*" (*Khān-i Khānān*); the word *Gūr* is perhaps reproduced by the Chinese *Ye-lu* (family name of the *Liao* emperors). Unlike the other nomad empires no fiefs were granted either to the relatives of the *Gürkhan* or to other persons of high rank; the first *Gürkhan* is said to have allowed no one command of more than 100 men. On the other hand almost everywhere (*Balasāghūn* perhaps formed the only exception) the native dynasties continued to exist as vassals of the *Gürkhan*; these vassal states probably formed the greater part of the empire. The level of taxation was, as in China, fixed by the number of houses; a *dinār* was levied on every house. The language of the government seems to have been Chinese. The son-in-law of the *Gürkhan* is called *fumā* (Chinese "son-in-law") in *Djuwaini* (thus *Defrémery* in his note on *Mirkhond*, *Hist. des Sultans du Kharezm*, Paris 1882, p. 124; in the edition by Muḥ. Kazwini, ii. 17, 18 and 20, *farmā*); in the account of the *Khita* in *Awfi* (*Lubāb al-Albāb*, ed. Browne, ii. 385) we appear to find the well-known Chinese word *paiza* (so to be read for *bā nayza*), later also adopted by the Mongols. Even under the rule of the pagan *Karā Khitai* the Muslims appear, however, to have retained their leading positions; the wealthy merchant prince, *Maḥmūd Bāi*, is mentioned by *Djuwaini* (ii. 89) as vizier of the last *Gürkhan*. In *Kāshghar* about this time we find a Christian hishop (Assemani, *Bibl. Orient.*, III, part ii. 502); to the same period also belong the oldest Christian inscriptions on the *Cū* (*Zapiski vost. otd. arkh. obšč.*, viii. 26; W. Barthold, *Zur Geschichte des Christentums* etc., Tübingen 1901, p. 58); but *Islām* also seems to have made progress during this period. In the story of the conquests of the *Karā Khitai*, the country of the princes of *Balasāghūn* appears as the frontier land of the Muslim world; in the beginning of the xiiith century two Muhammadan principalities are mentioned north of the *Ili* [q. v.] (one in the northern part of the

modern Semiryeçye and one at Kuldja). After the destruction of the kingdom of the Ka ra Khitai and of that of the Naiman prince Kücluk, which succeeded it although over a much smaller area, the last Ka ra Khitai, as is apparent from the account of the journey of the Chinese envoy Wu-ku-sun (1220—1221), had to adopt Muslim customs and Muslim garments (Bretschneider, *Mediaeval Researches* etc., i. 29). All this says little in favour of Marquart's (*Osttürkische Dialektstudien*, p. 209) idea of the civilization of the Ka ra Khitai, which, according to him, stood "brilliantly out from its miserable surroundings".

The first *Gürkhan* died, according to Ibn al-Athir, xi. 57, in Radjab, 537 (Jan. 20—Febr. 18, 1142); he was followed by his widow "and his son Muhammad". Marquart wants to read *ibnatu 'ammih* for *ibnuhu Muhammad* (*Osttürk. Dialektst.*, p. 237); but it is nowhere stated that the wife of the *Gürkhan* was also his cousin; moreover, according to Chinese sources, she was only regent for her son who was still a minor. The latter, of course, cannot have been called Muhammad; but how the text is to be emended must remain unsettled (the reading *wa-ibnuhu Muhammad* is also found in the Bülak edition, xi. 36). In the Muhammadan sources we find no complete list of the *Gürkhan*s with particulars of their dates; the only references to these are scanty and contradictory. Djuwaini in his chapter on the Ka ra Khitai (ii. 88 sq.) only mentions the widow and the brother of the first *Gürkhan*; in another passage (ii. 17) he also mentions, as do the Chinese annals, the rule of the daughter of the first *Gürkhan*; the same queen is mentioned by Rāwandī (*Kāhat al-Sudūr*, p. 174), but he makes her reign down to his time, i.e. to the beginning of the thirteenth century, which cannot be correct. A more accurate list of the *Gürkhan*s is given by the Chinese annals, but their tradition also is obviously inaccurate, especially in its chronological data. Marquart's endeavour (*loc. cit.*) to bring the Muhammadan and Chinese sources into agreement and thus to date the reigns of the different rulers seems in general to be successful. According to him, the widow of the *Gürkhan* reigned till 1150, his son till 1163, his daughter till 1178 and his grandson till 1211. The latter is mentioned in the Chinese annals and, according to the usual pronunciation of the characters concerned, was called Či-lu-ku; Marquart (following De Groot) reads Tirgu.

Under this ruler took place the fall of the Khitai kingdom, brought about partly by the activities of the Muslim rulers in the west and partly by the Mongol inundation, then just breaking; cf. the accounts thereon in Barthold and Marquart and also the articles BURHĀN, BUKHĀRĀ, ČINGİZ KHĀN and MUHAMMAD B. TAKĀSH. As happened elsewhere also, it was here not always the conflict of religions that was the deciding factor. The Khwārizmshāh Muhammad, afterwards leader of the Muhammadan movement, relied in the early years of his reign for assistance against his Muslim enemies on the pagan Ka ra Khitai, as well as the spiritual rulers (*sudūr*) of Bukhārā. The rising of Othmān, prince of Samarkand, against the Ka ra Khitai is explained by Djuwaini (ii. 91) as due to the refusal of the *Gürkhan* to give his daughter in marriage to this prince. Later, under the influence of the estrangement between Othmān

and his Muhammadan liberator and father-in-law Muhammad, this matrimonial alliance nevertheless took place (*ibid.*, ii. 124); the rising of the Muhammadan population of Mā-warā'-al-Nahr against their liberator had to be put down with ruthless vigour and bloodshed (609=1212). In contradiction to the view of these happenings given by Djuwaini, the *Gürkhan* was in reality deprived of his power a year earlier, in 1211, by Kücluk, prince of the Naiman. The attitude of this originally Christian, later pagan (probably Buddhist) ruler to the Muslim population did not always remain uniform; he appears as an ally of the Muslim enemies of the *Gürkhan* and as an ally of the prince of Kāshghar (cf. the text of Djamāl al-Kurashī in Barthold's *Turkestan* etc., i. 133). He afterwards became a most bitter enemy of Islām. In his reign took place the first and only persecution of Islām in Central Asia; public Muslim worship was suppressed, the Muslims forced either to adopt Christianity or the religion of the pagans or at least to adopt the clothing of the Ka ra Khitai. Those who resisted were, like the Protestants under Louis XIV, punished by having soldiers billeted on them. The only source on this point is Djuwaini (i. 49 sq.). By Čingiz Khān's victory over Kücluk the religious persecution was ended; the former Muslim subjects of the Ka ra Khitai, who had as early as 1211 been in negotiation with Čingiz Khān, received complete freedom of religion under Mongol rule. The Muslim dress was now adopted (cf. above) by the remaining Ka ra Khitai, which was the very reverse of Kücluk's law. Neither inscriptions nor buildings nor any other trace whatever of the rule of the Ka ra Khitai have survived in Central Asia.

On the rule of a former "Amīr" of the *Gürkhan* and his descendants in Kirmān see BURĀK, HĀDJIB and KIRMĀN. (W. BARTHOLD)

KA RA KIRGIZ. [See KIRGIZ].

KARAKOL, KARAGHUL. [See KARAUL].

KARAQORUM (KARAQORAM), a chain of mountains in the centre of Asia lying north of and almost parallel to the Himalayas. The range extends westwards as far as 73° of Long.; it has not yet been definitely ascertained how far it runs eastwards. At one time the eastern limit was thought to be the pass of the Karaqorum, but, according to the views of several famous geographers, the range runs much farther into Tibet and the Tang-la should, they think, be regarded as a part of the Karaqorum. This idea was first put forward by Klaproth in 1836 and is now held by Barrard, Sven Hedin and others who further regard the Trans-Himalaya as belonging to the Karaqorum system. If this is accurate, the whole system would be about 1250 miles long.

The highest elevations are found in the part west of the pass of Karaqorum. There we find several peaks over 26,500 feet high and countless summits over 23,000 feet. The highest peak — probably the second highest in the world — is Mount Godwin Austen, indicated on the *Survey of India* maps as K 2, but which seems to have been long known as Chogo-ri among the natives. This giant attains a height of 28,265 feet.

This western part of the Karaqorum possesses a wild and imposing natural beauty; it is covered with eternal snows over a considerable extent. The snow line runs from 15,500 feet north of the principal chain to 17,000 in the south.

If we exclude the polar regions the largest glaciers in the world are found in this part of the Karakorum. The Siachen glacier is 45 miles long and covers a surface of about 1,000 square miles. The Baltoro, Hispara and Biafo glaciers are only a little less than the Siachen. The plateau out of which rises the Karakorum has an average height of 10,000 feet. The whole region is excessively dry because the rain (snow, hail) falls almost exclusively on the high mountains. The vegetation in the valleys is very slight and is confined to the vicinity of torrents and streams. At the terminations of the glaciers we find — very often on a little plain — a very beautiful alpine flora.

The Karakorum is the most important watershed in Central Asia, dividing the rivers which running northwards empty their waters into the deserts of this part of the world, and running southwards into the Indian Ocean.

The principal pass is the *col* of Karakorum (18,550 feet), through which runs the important trade route between Chinese Turkestan and Kashmir. It is difficult and dangerous. In their long journey countless beasts of burden perish of exhaustion or in the avalanches. The mountains take their name from the pass. But, as Karakorum means "black debris", the name is not very appropriate. It is found for the first time in a map by Elphinstone published in 1815. On this map the range in question is indicated by the name Moor Taugh or Karakoorum Mountains.

The first traveller to write on the mountains now called Karakorum was Mirzā Haidar, a prince of Chinese Turkestan, à propos of his journey from Yarkand to Leh, capital of Ladak, in 1533. The exploration proper of the Karakorum only began in 1808 when Elphinstone visited these regions. The more systematic and detailed exploration of the high mountains proper was only begun in 1892 by Sir Martin Conway's expedition, which has been followed by several others.

(Ph. C. Visser)

KARAKÖRUM, a town in Mongolia on the Orkhon, in the thirteenth century for a short time (about 1230—1260) the capital of the Mongol Emperors, now in ruins. The fullest accounts of the town are given among European travellers by Rubruk (Latin edition in *Recueil de Voyages et de Mémoires*, 1839, iv. 345 sq.; transl. by W. W. Rockhill, Hakluyt Society, 2nd series, especially p. 220 with the translator's notes) and among Muslim historians by Djuwaini [q. v.], *Tārīkh-i Dīhān Gushāi*, ed. Mirzā Muḥammad Kazwīnī, especially i. 169 sq. and 192. The fullest account of the ruins (by the members of the Orkhon expedition of 1891) is in *Sbornik Trudov Orkhonskoy Ekspeditsii*, part i. (1892); in Radloff's *Atlas der Alterthümer der Mongolei* is a plan of the ruins (Pl. xxxvi.) and a squeeze of a large (not completely preserved) Persian inscription (Pl. xlviii); on the latter see E. Blochet in *T'oung Pao*, 1897, viii. 309 sqq. As Djuwaini rightly remarks, a little below Karakorum there were the ruins of the old (viiith—ixth century) Uighur capital Ordu balīk ("court-town") which, from being in ruins, was then called Mo-balīk ("bad town") and is now known as Kḥara-Balgasun ("black town"). The city built by the Mongol Emperor Üdegei (1229—1241) was also at first officially known as Ordu-balīk; the name Karakorum was a popular one. On linguistic grounds Karakorum cannot, as Rockhill supposes, be a corruption of *Kara Kūren* ("black camp") but means "black debris" (cf. Radloff, *Versuch eines Wörterbuchs* etc., s. v. *Korum*), a name still frequently found in mountainous regions. As Djuwaini expressly remarks, this was the original name of the mountain region round the sources of the Orkhon. The statement ascribed by Rockhill (following d'Ohsson) to Djuwaini that the town was half a farsakh long does not seem to be found in the printed text of the *Tārīkh-i Dīhān Gushāi* nor in manuscripts. Rubruk describes Karakorum as a small town not larger than the faubourg St. Denis in Paris; the monastery of St. Denis far surpassed in size the palace of the Mongol emperor. The ruins of the Mongol Karakorum indeed indicate a town of very moderate size; the Uighur Ordu-balīk was considerably larger. On the other hand there was much building in Karakorum during the city's brief period of splendour; Rubruk as well as Djuwaini give full descriptions of the imperial palaces built in the city and around it, some by Chinese and others by Muḥammadan architects; according to Rubruk, Russian and Western European architects also shared in the building operations at a later date. Two farsakh east of Karakorum lay, according to Djuwaini, the palace of Targhū-balīk ("city of precious stuffs, brought as presents").

After the Mongol Emperors had removed their residence to China, Karakorum was only the seat of the governor of Mongolia; according to Marco Polo (transl. Yule-Cordier, London 1903, i. 226), who was not himself in Karakorum, the palace of the governor was in the citadel. After the Mongol dynasty was driven out of China (1368) the Emperors returned to Karakorum; after the dissolution of the dynasty in the xvth century the city lost all importance; at the present day the great Buddhist monastery of Erdeni-Tsu is there.

(W. BARTHOLD)

ĞARA-ĞOYÜN-LU (Turkish "those of the Black Sheep"), a Turkoman dynasty which reigned in Persia and Mesopotamia from 777 (1375) to 873 (1468). In the reign of the Djālā'irid Sultān Uwais, Bairām Khwādja, chief of the family of the Behārlu, had obtained an important position at the court of the Sultān through his valour; at the latter's death he seized al-Mawşil, Sindjār and Ardjish. When he died in 782 = 1380, his son Ğara Muḥammad Tūrmush, who was in the service of Sultān Aḥmad, son of Uwais, came back to succeed him and fell in a battle in Syria (792 = 1390). The son of this Ğara Muḥammad, Ğara Yūsuf, proclaimed himself independent and chose Tabriz as his capital. He made war on Timūr, took refuge with Bāyazīd Yildirim and took advantage of the conqueror's campaign in Asia Minor to seize 'Irāk 'Arabi, but he could not defend Baghdād against Mirzā Abū Bakr, sent against him by Timūr, and retired to Egypt to the Mamlūk Sultāns, who kept him prisoner for some time. On Timūr's death he was released, collected the thousand men who had accompanied him, took Diyār Bakr after overcoming a thousand difficulties, defeated Mirzā Abū Bakr in the vicinity of Nakḥcewan (809 = 1406), recaptured Tabriz and settled himself there. The following year he again defeated this prince, accompanied by his father Mirān Shāh, who fell on the field of battle. He took as colleague on the throne his son Pir Budak, who had been adopted by Sultān Aḥmad. He took Diyār Bakr from Ğara 'Oḥmān Bayandir, put Sultān Aḥmad to death after his defeat and capture not far from Tabriz, seized 'Irāk 'Arabi (813 = 1410) and made peace with Ğara 'Oḥmān after defeating him. He destroyed the army sent against him by Shaikh Ibrāhīm, king of Shīrwān, and Kustendil, king of Georgia. In 822 (1419) he captured al-Sultāniya, Ğazwin and Sāwa, towns of 'Irāk 'Adjamī. Shāh Rukh, son and successor of Timūr, was leading a vast army against him when he fell ill and died in Dhu 'l-Hidjja of the same year (December) in the town of Ūdjān, at the age of 65, after reigning 14 years. His body was despoiled by the Turkomans and lay for two days without burial; then he was buried at Ardjish beside his grandfather Bairām Khwādja.

His eldest son Amīr Iskandar, having reunited the scattered members of his tribe, took the field against Shāh Rukh and was defeated after a battle lasting two days (824 = 1421); but he seized the opportunity of his opponent's return to Khorāsān to regain Ādharbaidjān. He defeated and slew Shams al-Dīn, Sultān of Akhlāt (828), Sultān Aḥmad, chief of the Kurds, and 'Izz al-Dīn Shīr (830 = 1426). He recaptured Shīrwān and al-Sultāniya. He fought again with Shāh Rukh in 832 (1429) and, despite the bravery of his brother Djahān Shāh, he lost the battle and fled into Asia Minor; then, taking advantage of the fact that the Timūrid sovereign had placed on his throne his other brother Abū Sa'īd, he returned to the charge, captured his brother and put him to death. On the complaint of the people of Shīrwān, who had been ruined by the plundering, Shāh Rukh sent a new army in 838 (1434) with which Djahān Shāh and Shāh 'Alī, his nephew, joined forces. Not being able to make a stand, Iskandar fled and came back again when Djahān Shāh had been installed by the Timūrid, but he was de-

feated and shut himself up in the castle of Alendjak, where he was murdered by his son Kōbād at the instigation of one of his wives, who had fallen in love with the young man (841 = 1437). He had reigned for sixteen years.

Mirzā Djahān Shāh, appointed by Shāh Rukh (839 = 1435), engaged in the reorganisation of Ādharbaidjān and added to it new provinces, 'Irāk 'Adjamī (856 = 1452), Isfahān, in which the inhabitants were massacred, Fārs, Kirmān and Khorāsān (862 = 1458), where he established his capital in the town of Herāt. He was obliged to make peace with the Timūrid Sultān Abū Sa'īd, who took the field against him, by giving up the latter province to him because his son Ḥasan had escaped from his prison and had succeeded in taking Ādharbaidjān. After an exceedingly swift march, on which he laid the country passed through waste and many beasts of burden perished, he captured his son and banished him from the country. Another of his sons, Pir Budak, whom he had deprived of his office as governor of Fārs because of his evil conduct and relegated to Baghdād, rebelled in 869 (1465) and sustained a siege for a year. He then obtained by a ruse the submission of Pir Budak, put him to death and replaced him by his other son Muḥammad Mirzā. He reigned undisputed over the whole of Ādharbaidjān, the two 'Irāks and Kirmān as well as over the coast of 'Omān. Winter prevented him from putting into operation his plans against Diyār Bakr (871 = 1466). On his return, while out hunting, he was surprised by his enemy Ūzūn Ḥasan Bayandir and killed while trying to escape, at the age of 70 after a reign of 32 years (on the 12th of Rabī' II = Nov. 21).

Ḥasan 'Alī, his exiled son, whom Ūzūn Ḥasan had welcomed, and whose brain was affected by his 25 years in prison, gathered together a body of bad characters and marched on Tabriz where his brother Ḥusain 'Alī, the dervish, who had been crowned king in spite of himself, had just been murdered as a result of feminine intrigues. He ascended the throne, distributed his wealth to the mob and avenged his brother. Abandoned by the army leaders who went over to the camp of Ūzūn Ḥasan, he tried to raise the people of Hamadḥān but was captured and put to death in 873 (1468). This was the end of the main branch of the family.

The branch which reigned at Baghdād consists of the following succession of princes: 1. Shāh Muḥammad, son of Ğara Yūsuf (died 837 = 1433), had been entrusted by his father with the administration of this province, but he was deprived of it after 23 years by 2. his brother Espān, who reigned 12 years and died in 848 (1444). 3. His son Fūlād succeeded him; it was in his reign that Djahān Shāh took Baghdād and thus put an end to this line.

ĞARAĞUM (Turkish "black sand"), a desert in Russian Turkestan, between the Amu Daryā, the Ust Urt and the ranges of hills on the Caspian, contrasted with Ğīzīl-Ğum ("red sand"),

the desert between the Sir Daryā and the Amū Daryā. The Karākum (area 148,000 sq. miles) is a still more dreary waste and possesses even fewer fertile areas than the Kizil-kum. The sandy stretches north of the Sir as far as Lake Çalkar are called "little Karākum"; cf. Franz Mahatschek, *Landeskunde von Russisch-Turkestan*, Stuttgart 1921, p. 15 sq., 285 and Index. The Karākum mentioned by Djuwaini in the *Ta'rikh-i Djihān Gushāi* is, in the opinion of the editor, probably identical with the little Karākum (the readings of the MSS. are not certain; cf. edition by Mirzā Muḥ. Ḳazwīnī, Gibb Mem. Series, vol. xvi., part i. 69 sq., ii. 101 sq.).

(W. BARTHOLD)

KARAKÜSH, BAHĀ' AL-DĪN IBN 'ABD ALLĀH (i.e. son of an unknown father) AL-ASADĪ (mamlūk of Asad al-Dīn Shīrkūh) AL-RUMĪ (boin in Asia Minor) AL-MALIKĪ AL-NĀSIRĪ, officer of Malik al-Nāṣir Yūsuf (i.e. Saladin), a eunuch, received his liberty from Shīrkūh and was appointed an Amir. By the time of Shīrkūh's death (564 = 1169) he was already playing an influential part; it is said that it was due to him and the Ḳāḍī 'Isā al-Ḥakkārī that the Caliph al-'Āḍid appointed Saladin vizier. After the suppression of the rebellion fomented after al-'Āḍid's death by his Chamberlain, the eunuch Mu'taman al-Khilāfa, Karākūsh was appointed Chamberlain. In this capacity he had the surveillance of the family of the late Caliph and is said to have administered his office with great strictness. To prevent the family of the Caliph increasing, he separated men and women. Saladin gave him the task of building the citadel of Cairo and extending the city walls to include Cairo and Fustāt; later he was asked to fortify and defend 'Akkā. When the town fell in 587 (1191) after eighteen months' fighting he was taken prisoner; Saladin ransomed him a few months later for the high sum of 20,000 dinārs. After the death of Saladin in 589 (1193) he entered the service of his son al-Malik al-'Aziz 'Uthmān and was trusted to represent the Sultān when the latter was out of Egypt. When the Sultān felt his end approaching (595 = 1199) he designated his son al-Malik al-Manṣūr his successor and Karākūsh his regent. In keeping with this wish, the young ruler appointed him Atābeg although Karākūsh was now very old. He only held his post for a very short time as most of the Amirs and the head of the chancellery, Ibn Mammātī, declared him incapable of ruling, presumably on account of his great age. His supporters, who considered him the most worthy, consulted Saladin's adviser, al-Ḳāḍī al-Fāḍil [q. v.], but the latter, who had retired from political life, would not be drawn into the question. Finally the Amirs asked al-Manṣūr's uncle, al-Malik al-Aḡḍal, to take over the regency. After this we find only one mention of Karākūsh, when Sultān al-'Āḍil, who had seized the throne in 596 (1200), had two of his nephews taken to the house of Karākūsh as prisoners. He died a year later. Contemporary historians, like 'Imād al-Dīn al-Kātib al-Iṣfahānī, bestow the highest praise upon him, as do later writers, like al-Maḳrizī and Ibn Taghribirdī, and describe him as the ablest man of his day. They give him particular credit for his activity as a builder. Besides the buildings already mentioned, his house, his hippodrome and the bridge at Gizeh, which he built out of stones from the Pyramids at Memphis, are mentioned.

In the same period a "Karākūsh" became notorious as a type of stupidity. A series of absurd verdicts are related in a work entitled *Kitāb al-Fāshūsh fī Ahkām Karākūsh*, "the book of the stupidity in the judgments of Karākūsh". According to Ḥādīdjī Khalifa, the above mentioned Ibn Mammātī was the author of this book. Casanova (see *Bibl.*) in his elaborate study on Karākūsh quotes three manuscripts: 1) a Cairo manuscript which contains a brief selection from the *Kitāb al-Fāshūsh*; the author is there given as Ibn Mammātī; 2) a Paris manuscript the author of which is given as al-Süyūṭī, certainly wrongly as in the introduction Ibn Taghribirdī is wrongly quoted and given a wrong praenomen, which one can hardly credit of al-Süyūṭī; 3) a Cairo manuscript which is a later version, in which Karākūsh is called a Sultān and the number of his "verdicts" is increased, by 'Abd al-Salām al-Lakānī of the year 1200 (1786). These "verdicts" have nothing to do with state-craft but are court verdicts; they are typical, well known anecdotes, current among other nations also. A special investigation has not yet been made of the problem. Casanova endeavours to show that the work is a pamphlet against Karākūsh, whom, he says, Ibn Mammātī hated as an exceedingly severe man. It is not known whether Ibn Mammātī collected and published these anecdotes in the life-time of Karākūsh. Ibn Khallikān rightly points out that it is impossible that a man such as is described in the anecdotes could have held high offices of state. Nor is anything known of a particular feud between Ibn Mammātī and Karākūsh except that Ibn Mammātī had protested in 595 (1199) against the appointment of this then very old man; Karākūsh is described by the Frankish chroniclers as advanced in years even in 585 (1189) at the siege of 'Akkā; he is said even to have known Godfrey de Bouillon. One thing is clear from Ibn Khallikān's observation: the anecdotes given by Ibn Mammātī were referred to our Karākūsh.

KARAM (BANU 'L-), a dynasty of 'Aden, from 476—533 (1083—1138) conducted an Ismā'īlī condominium — at first as viceroys of the Sulaiḥids of Ṣan'ā' — in two branches, the Banū Mas'ūd and the Banū 'Abbās Abi 'l-Zurāi'; from 533—569 (1138—1173) the latter alone — the Zurāiḥids, also called Banu 'l-Dhīḥ (sons of the wolf) — held the now independent sultanate, only recognising the Caliphate of the Fātimids.

The Banu 'l-Karam belonged to the Djusham clan of the tribe of Yām in the Hamdān group and were closely related to the Sulaiḥids [q. v.]. They were therefore the principal supporters of

the founder of this dynasty, the Ismā'īlī Fāṭimī *dā'i* 'Alī b. Muḥammad and of his son and successor al-Mukarram. When the Banū Ma'n, whom the *Dā'i* had allowed to remain as vassals after the conquest of 'Aden in 439 (1047), rebelled, al-Mukarram and his wife, the Sultāna Saiyida Ḥurra, to whom 'Aden belonged as her dowry, transferred the governorship to the two brothers Mas'ūd and 'Abbās, sons of al-Karam, in 476 (1083); the former received the castle of al-Khaḍrā' and the revenues of the coast-lands while the latter got the revenues of the landward part of the country and the castle of al-Ta'kir at the gateway to the interior (not to be confused with the stronghold of the same name above Djubla, not far from the road from Djanad to Yarim). Their joint annual tribute amounted to 100,000 dinārs. Mas'ūd and al-Zurāi', son and successor of 'Abbās, fell before the gates of Zabīd, performing their feudal duty under the command of the major-domo of the Saiyida, al-Mufaḍḍal Abī 'l-Barakāt. The division of the territory into two parts was for the time being maintained. Mas'ūd was followed in succession by his son b. 'Abū 'l-Gharāt and the latter's sons Muḥammad and 'Alī; al-Zurāi's heir was his son Abū Su'ūd and the latter's son Sabā. But the manner of division of the country afforded the latter line an advantage from the first in view of greater facilities for expansion into the interior and the easier defence of the strongholds won by the two families there. It was the mountains in the north of the al-Ma'āfir district that were specially concerned. It proved to be of importance that al-Zurāi' had taken possession of Dumluwa in 480 (1087), a fortress in the Djabal al-Šilw above the bend where the road from Djanad has to curve round the mountain and is at its farthest east point. Under the vigorous Sabā, if not earlier, not only had their lands there been considerably increased but even Dhubhān about 100 miles W.N.W. of 'Aden on the road to Mokhā and Zabīd had been occupied. Sabā's father, along with Abū 'l-Gharāt, had succeeded in getting the tribute reduced to half and then to a quarter by successfully refusing to pay more to the Saiyida. Sabā was able to stop it altogether when the difficulties of the widow increased. The changed conditions attracted attention in Cairo: the eleventh Fāṭimid, al-Ḥāfiẓ 'Abd al-Maǧīd, soon after his accession received Sabā into the Ismā'īlī hierarchy as *dā'i* in 525 (1131). Dumluwa remained the royal residence. A two years' war in the Wādī Laḥdǧ brought about a decision between the families of the two brothers. 'Alī b. Abī 'l-Gharāt began by purchasing the support of numerous warriors. When he had shot his bolt, Sabā gained the upper hand by throwing his great wealth into the conflict and 300,000 borrowed dinārs in addition. He was finally victorious on the same day, it is said, as his ally in 'Aden, Bilāl b. Djarīr, stormed the castle of al-Khaḍrā'.

Henceforth the ZURĀI'D's ruled alone. But Sabā died six months after his entry into 'Aden in 533 (1138). He is buried there at the foot of al-Ta'kir. By the next year his son and successor 'Alī al-A'azz had died of consumption. He had designated as his successors his infant sons, who were in Dumluwa under the guardianship of their tutor Anīs and the minister Yaḥyā b. 'Alī. But Bilāl, whom he had dismissed and menaced, was

now in 'Aden and gave the crown to another son of his former patron Sabā, namely Muḥammad who had taken refuge from 'Alī al-A'azz on his father's death with Manšūr, son of the above mentioned major-domo al-Mufaḍḍal. The reign of this Muḥammad b. Sabā from 534 to 548 or 550 (1139 to 1153 or 1155) marks the zenith of Zurāi'd power. He put to death the last prince of the line of Mas'ūd in 545 (1150/1), 'Alī b. Abī 'l-Gharāt, who had still held out after his defeat with some members of his family and a few faithful followers in a few mountain strongholds, for example in the Djabal Munif, north of Laḥdǧ. In 547 (1152/3) he purchased from his former protector Manšūr, the heir of Saiyida, 28 towns and strongholds including al-Ta'kir with Djubla and Ibb in the north-east and Dhū Ashrak in the south-east. He had received the rank of *dā'i* immediately after his accession, for the Kādī sent from Cairo to invest 'Alī al-A'azz found Muḥammad already in actual power. It is to this ruler that we are mainly indebted for our knowledge of the history of the Zurāi'ds. For, with some men not so fully interviewed, like Anīs and Bilāl already mentioned, he is the main authority for the section on the dynasty in the *Ta'rikh al-Yaman* of 'Umāra, who visited him personally and on 'Umāra are based e. g. al-Djanādī, al-Khazraǧī and Ibn Khaldūn. 'Umāra praises Muḥammad very highly, notably as a Maecenas. But one cannot help thinking that he — himself an enthusiastic Ismā'īlī — was biased in favour of his royal co-religionists. Whether Muḥammad for the rest interpreted his duties as *dā'i* in a religious sense, we do not know nor can we tell whether the request of the founder of the Mahdī dynasty, 'Alī b. al-Mahdī, who had asked Muḥammad in the presence of 'Umāra in an audience shortly before his death for help against Zabīd, was rejected for purely political and military reasons or for religious reasons as well. In his son and successor 'Imrān the religious interest predominated. The real power passed into the hands of the vizier family of Bilāl. The latter himself, who had already had the share in the government in the reign of Muḥammad, which was due him for his help in securing the throne, had died not long before — or very shortly after — the change in the throne, leaving a vast estate. He was succeeded in office first by his son Mudāfi' and after the latter's early death by his other son Yāsir who ruled quite independently. When 'Imrān died in 560 (1164/5) and in keeping with his wishes was buried in Mekka, Yāsir had his 3 sons, who were still minors, imprisoned in Dumluwa in charge of the eunuch Abū 'l-Durr Djawhar al-Mu'azzami. But the Zurāi'ds were to be spared the fate of being definitely dethroned by their own people. The last blow came from without: in 569 (1173/4) Saladin's brother Tūrānshāh conquered 'Aden along with the rest of Yemen. In the following year Djawhar surrendered him Dumluwa by treaty and a year later Tūrānshāh had Yāsir, whose hiding-place was betrayed, beheaded.

(R. STROTHMANN)

KARĀMA is strictly the infinitive of *karuma* (to be *karim* "generous" in the widest sense); but in usage it is a noun of similar meaning to *ikrām* and *takrīm*, to show one's self *karīm* to any one (*Lisān*, xv. 456, 3 sqq.). It does not occur in the *Qur'ān* although *karīm* is very frequently used of Allāh and his workings (al-Rāghib al-Isfahānī, *al-Mufradāt*, *sub voce*). It has come, therefore, in the devotional language of Islām, to mean the exhibition by Allāh of his generosity, favour, protection, help towards any one, e.g. al-Baiḍāwī on *Qur.* x. 63 (ed. Fleischer, i. 419, ult.), a *locus classicus* on the *walīs*; and *karāmāt* mean individual cases of this generosity. In a special sense, the *karāmāt* then come to mean the miraculous gifts and graces with which Allāh surrounds, protects and aids his Saints (*al-awliyā*). A *Qur'ānic* basis for these was sought in the story (*Qur.* iii. 32) of the food which came miraculously to Maryam in the locked *mihrāb* and in the transporting in a moment from Yemen of the throne of Bilkīs by a unnamed companion of Solomon (*Qur.* xxvii. 40). As neither Maryam nor the unnamed companion was a prophet these could not be evidentiary miracles (*mu'djizat*). See the whole discussion in al-Taftazānī on al-Nasafī's *'Akū'id*, Cairo 1321, pp. 134 sqq. But the real basis lay in the innumerable narratives of *karāmāt* in the lives of the *walīs*, exaggerated and distorted reflections of indubitable facts in the ecstatic religious life. The fact of these all orthodox Islām admits, even so philosophical an historian as Ibn Khaldūn (ed. Quatremère, i. 169, 199; transl. de Slane, i. 190, 227) and a peripatetic philosopher like Ibn Sīnā (*ṭihārāt*, ed. Forget, pp. 209, 219, 221 sqq.). These were evidently driven by the pressure of facts to fall back on the hypothesis of still unsolved mysteries in nature; cf. Goldziher, *Die Richtungen der islamischen Koranauslegung*, Leiden 1920, p. 139, note 3. Only the Mu'tazilites, who were certain that nature held no mysteries for them and that they need only apply reason to their theological positions, protested and found, even in the *Qur'ān*, basis for their protest. See al-Zamaksharī on *Qur.* lxxii. 26, 27 (*al-Kashshāf*, ed. Nassau Lees, ii. 1539) and on the whole development Goldziher, *op. cit.*, pp. 144 sqq. The coincidence in sound, in derivation and in meaning between these *karāmāt* and the *χαρίσματα* of the early Christian Church (I Cor. xii.) is most striking and can hardly be accidental. The religious phenomena behind both are the same; but the verbal link is not clear; the Syriac Church called the *χαρίσματα* simply "gifts", *mauḥabbāt*, in Arabic, *maḥabbāt*, which indeed occurs in this sense; it is possible that the Greek word taken over into Syriac may have suggested to users of Arabic their own *karāmāt*. Technically, such a *karāma* is one of the *khawāriḡ al-'āda*, "the breakers of usage"; for there is no Nature in orthodox Islām, only, and at best, a custom which Allāh has established (Goldziher, *Vorlesungen*, p. 130). It differs from the *mu'djiza* or "evidentiary miracle" in that it is not worked by Allāh for a prophet in proof of his mission and is not accompanied by a *da'wā nubūwa* or a *taḥaddī*, a claim of prophethood or a challenge to the unbeliever. It differs from the

ma'ūna, "help", in that while the recipient of the *ma'ūna* is a Muslim he has had no special religious experience; and from the *irḥās*, an anticipatory miracle worked for a prophet before his call. It differs from the *istidrāj* and *iḥāna* as these are wrought at the instance of unbelievers to lead them astray and bring them to shame (*Dict. of Techn. Terms*, i. 444 sqq.; al-Nasafī, *'Akū'id*, *loc. cit.* with accomp. commentaries). A *walī* should conceal his wonders, while a prophet must display them; a *walī* may not know about them, while a prophet cannot help knowing. Yet the *karāma* of a *walī* may be regarded as a *mu'djiza* for the prophet whose follower he is. Finally, a *walī* should disregard them as much as possible and should look on them as tests rather than as privileges.

KARAMĀN is the name — derived from the Turkoman dynasty of the Karamān-Oghlu [q.v.] — 1) of a district in Asia Minor, 2) of a town in Turkey, capital of a *ḥaḍā* of the same name.

The boundaries of the district of Karamān (Karamān-ili, Caramania) have varied. All the lands which were permanently under the Karamānids are occasionally so called, that is Lycaonia, the Cilician Taurus and the whole southern Anatolian coast territory as far as Adalia. When the Karamānids were finally overthrown, their lands became one Ottoman province (*wilāyet*) with Konya as the residence of the Pasha. The sandjak of İč-ili [q.v.] was afterwards separated from the Pashalik; the northern larger portion was called *Khāridj*, probably in contrast to İč-ili (Hādjdjī Khalifa, *Djihān-numā*, p. 615 sq.; cf. also Ewliyā Celebi, *Siyāhat-nāma*, Constantinople 1314—18, iii. 20), and comprised in the xviii century the sandjaks of Akşarāi, Ak-shehir, Konya, Kır-Shehir, Kaişariya, Nigde. After the administrative reforms of 1861, the name of the province was changed to Konya [q.v.]. The population of Caramania is overwhelmingly Turkish (picture of a Muslim of Caramania in d'Ohsson, *Tableau de l'Empire Ottoman*, Paris 1786—1820, ii., opposite p. 137); even the Greeks, or at least those inhabitants who belong to the orthodox Greek church, speak Turkish. They are known as Karamānlī and write Turkish in Greek letters; in Constantinople they have their newspaper *Nea Anatoli* printed in this way. During the nationalist fighting in 1919 and 1920, the Karamānlī under the protection of the nationalist government cast off the Oecumenian Patriarch and for a time chose a patriarch of their own. They are very probably not Greeks at all by origin but descendants of the ancient Lycaonians. In the mountains of Caramania live Yürüks and Turkomans. The name Caramania for the coastlands from Mersina to Adalia seems to have become

obsolete. In 1812 it was described by Fr. Beaufort in his book *Karamania* (second edition, London 1818).

2. The town of Ḳaramān is the ancient Lāranda (Ṭā Ḥāpāwā; cf. Pauly-Wissowa, *Realenz. d. class. Altertumswiss.* xii.¹ col. 793). It lies 35 miles S.E. of Konya in the plain at the foot of the Taurus, "on one of the great roads which lead from the coast (Selefké) across the Taurus into the interior of Anatolia. It is not known when it fell into the hands of the Saldjūks for the first time; as was the case in the rest of Anatolia, the process of islamisation probably was rapidly completed here. Lāranda also belonged to the Dānīshmandids from whom Kīlīdj Arslan retook it in 1165 (Michael Syrus in the *Rec. des Hist. des Crois.*, *Doc. Arm.*, i. 360). In 1190 Frederick I Barbarossa entered Lāranda on his way to Cilicia and in 1210 it again fell into the hands of the Christians when Leon II, King of Armenia, conquered it for the Knights-Hospitaller. In 1216 it had, however, again to be surrendered to Sultān 'Izz al-Dīn Kaikā'ūs (*Rec. etc.*, *Doc. Arm.*, i. 644). Shortly afterwards (about 1230) Lāranda was among the towns which were abandoned to the invading Khwārizmīs (Ibn Bīlī in Houtsma, *Recueil de Textes rel. aux Seljūcides*, iv. 191). In connection with this event Bahā' al-Dīn Walad, father of Djalāl al-Dīn al-Rūmī, migrated about this time from Khorāsān to Lāranda where Djalāl al-Dīn al-Rūmī married in 623 (1226) and where Sultān Walad was born (*Les Saints des Derviches Tourneurs*, transl. by Huart, i., Paris 1918, p. 19, 26, 268).

The town attained great importance through the dynasty of the Ḳaramān-Oghlu [q. v.] who made it their capital in the beginning of the xivth century, when they did not yet feel secure in Konya. Several princes of this dynasty lived there even at a later period. They embellished the town with fine buildings and fortified the citadel. During this period the town was often under Egyptian suzerainty (Ibn Baṭṭūṭa, ed. Paris, ii. 284; Ibn Faḍl Allāh, *Masālik al-Aḥṣār*, in the *N. E.*, xii. 342 sq.). In the wars with the Ottomans, Lāranda was repeatedly occupied by the latter and the Ḳaramānid ruler was forced to take refuge in the mountains. Finally in 1467 it was captured under Mehmed II and totally incorporated in the Ottoman Empire in 1486 by Bāyazīd II. Henceforth Lāranda was known as Ḳaramān, although the old name has always been retained in official language.

The modern Ḳaramān is a town of about 5,000 inhabitants (according to Banse, p. 106; Ḳāmūs al-A'lām gives 7,500, 'Alī Djawād 10,000). It lies on a low hill on the southern edge of the Lycaonian plain about 4,000 feet above sea-level. The highest part of the hill (about 300 feet higher) has on it the citadel now falling to pieces; it consisted of round and square towers linked by walls; the outer wall is built from stones from older buildings with Arabic inscriptions. Among the most important buildings of the Ḳaramānid period is the Emīr Mūsā Medresesi where several princes of the dynasty are buried. The dome has fallen in; pillars of it are still standing which once belonged to Roman buildings. There is also the Khātūniye Medresesi, one of the finest buildings of the Ḳaramānid period (pictures in van Berchem, *op. cit.*, p. 118 and 126, and

Woermann, *Gesch. d. Kunst*, ii. 446). According to the inscription (*Tārīkh-i 'Othmānī Endjūmeni Madīmū'sā* [also entitled *Revue historique publ. par l'Institut d'histoire ottomane*], N^o. 11, p. 711), it was built in 783 (1381) by the daughter of Murād I, who married the Ḳaramān-Oghlu 'Alā' al-Dīn (or 'Alī); there is now very little left of it. Mention may also be made of the *sāwīya* built by the same 'Alā' al-Dīn in 772 (1370), where Djalāl al-Dīn al-Rūmī's mother is reputed to be buried (now called Agha Tekke; cf. van Berchem, *op. cit.*, p. 116), and of the *türbe* where the Ḳaramānid Ibrāhīm Beg and two of his sons are buried. The inscriptions in it are now destroyed (*T.O.E.M.*, N^o. 13, p. 831). The *türbe* is situated near the Ḳaramān-Oghlu mosque or 'Imāret Djamī'i which was founded by this same Ibrāhīm Beg in 836 (1432) (picture in van Berchem, *op. cit.*, p. 127) and has a finely ornamented gateway and is richly adorned with tiles in the interior.

The houses of the town are built of clay (*toprak*); the inhabitants are reputed to be very dirty and the climate with its great variations in temperature here is said to be very unhealthy. There are a number of looms (*kelin*'s and *sahdjad*'s) in Ḳaramān and tanneries. The town is on the Anatolian Railway between Konya and Ereğli; it has always been an important station on the trade route to Cilicia.

The Kaḍā of the same name, the capital of which is Ḳaramān, belongs to the sandjak of Konya. It has about 30,000 inhabitants (according to Cuinet 21, 417) of whom the great majority are Muḥammadans. The Taurus in the south is here called Ālā Dagħ and in the north rises the Kara Dagħ. As the chalk soil is as a rule well watered by the streams from the Taurus there are good crops. Most of the farmers in the plains are Muḥājirs (settlers from Rumelia). The mountain valleys are tilled by Turkomans who have settled there. The produce of the soil consists of different cereals, vegetables, fruit (raisins), cotton and opium. Salt is also produced. The wool for the carpet factories is yielded by the many sheep reared there.

(J. H. KRAMERS)

ḲARAMĀNĪ MEHMET PASHA, an Ottoman Grand Vizier and historian. He first saw the light, probably in Karamania, as son of a certain 'Arīf Çelebi and was a descendant of the great mystic Djalāl al-Dīn al-Rūmī [q. v.]. He seems to have come when quite young to Stambul where he made the acquaintance of the celebrated

Grand Vizier Maḥmūd Pasha-i Welī [q.v., executed 1474] and through his influence was educated in a medrese founded by him (cf. J. v. Hammer, *Gesch. des Osm. Reiches*, ii. 123 sq.). At an early age — in 869 (1464), it is said — he became secretary of state to the signet (*nishāndjī*) with the rank of vizier. But in 862 (1454—5) i. e. soon after the capture of Constantinople he must already have been in high office, as is shown by the epithets *al-Amīr al-khaṭīr wa 'l-wazīr al-kabīr* in his Arabic grant of foundation (*wakfiya*), dated Dhū'l-Ka'da 4, 862 (= Sept. 13, 1458), in the Pruss. Nat. Library in Berlin (cf. W. Ahlwardt, *Katalog der ar. Hss.*, iv. 227, No. 4763, fol. 74 sqq.).

He attracted the attention of Mehmed II, the Conqueror, more and more, became his adviser in the organisation of the offices of state and in the making of new laws. The celebrated *Kānūn-nāme* (cf. *Mitt. zur osm. Gesch.*, i. 131 sqq., Vienna 1921) is probably for the most part his work. When in May, 1478 the Grand Vizier Aḥmad Gedik Pasha was dismissed, Mehmed II summoned the unwelcome but intellectually distinguished Mehmed Pasha to be Grand Vizier. As such he achieved fame by composing a dispatch to Uzun Hasan, praised alike for style and matter (cf. Feridūn Bey, *Munshi'at al-Salāṭīn*², Stambul 1274, .). On Rabi' I 5, 886 = May 4, 1481, on the day after Mehmed's death he was most cruelly murdered by mutinous janissaries in Stambul in the Takht al-Kal'a (Um Kapan) quarter (cf. M. Guazzo, *Historie ove se contengono le guerre di Mahometto*, Venice 1545, p. 28a; cf. also Andrea Navagero in Muratori, *Rerum italic. script.*, xxiii. 1167, Milan 1733). He is buried in Stambul near the Kum Kapu in the new Nishāndjī mosque called after him (cf. Hāfiẓ Ḥusain, *Ḥadīkat al-Djawāmi'*, Stambul 1281, i. 209; J. v. Hammer, *Gesch. des osman. Reiches*, ix. 90, No. 449; do., *Constantinopolis*, Pest 1822, i. 430; (Sehī's statement, *op. cit.*, p. 23, 10, is incorrect). Mehmed Pasha also dabbled in poetry and published his verses under the *makhlās* Nishānī. He is more important as a historian. He wrote a treatise (*risāla*) in two parts (*ḥisn*) on the history of the Ottoman Empire; the first part covers the period from 'Othmān to Mehmed II (1451), the second from 1451 to 1480 (885) i. e. to shortly before the death of Mehmed II and himself. Specimens of the work, which is written in Arabic, were published in Turkish by Mukrimin Khalīl in the *Revue Historique*, vol. xiv., Stambul 1924, part 2 and 3, from the MS. in the Aya Sofia, No. 3204 (*Defter*, p. 192). The historian Ruḥī Edrenewī [q.v.] follows him.

K. M. P. had two wives, through whom he became connected with famous and wealthy families viz.: Shāh Khatun, daughter of the celebrated author 'Alā' al-Dīn 'Alī al-Bisṭāmī (called Muṣannifck, cf. i. 734; he was also a politician, cf. Kritoboulos, ed. C. Müller, p. 146: Σάμουρος 'Αλῆ and Chalkokondylas, ed. I. Bekker, p. 526, 17) and Sitti Sulṭān Khatun, daughter of the wellknown chief of 'Alā'iya, Luṭfi Beg, cf. Miklosich-Müller, *Acta et Diplomata*, iii. 284 sqq. and L. de Mas Latrie, *Histoire de l'île de Chypre*, iii. 64—68, Paris 1861, and 'Ashikpashazāde, *Tārīkh*, Stambul 1332, p. 174 and 192). By his first marriage he had a son, Zein al-'Ābidin 'Alī Çelebi, from the second a daughter, Rukaiye Khatun. His marriage with the daughter of the Beg 'Alā'iya (q. v. in-

corporated in the Ottoman Empire in 1471) apparently brought him considerable wealth, which he used for splendid endowments in Constantinople and Adrianople. This explains the hitherto obscure spiteful passage in the history of 'Ashikpashazāde, *Tārīkh*, p. 192, where all sorts of wicked things are said about the "*nishāndjī pasha*", which must be due to personal quarrels (probably the withdrawal of *wakf*-states in Elwān Çelebi).

A grandson of Karamānī Muṣṭafā Pashā, son of the above Zein al-'Ābidin 'Alī Çelebi, was the Molla Muṣṭafā (d. 966, 1558, cf. 'Aṭā'i, *Dhail* to the *Shakā'ik al-Nu'māniya*, Stambul 1288, p. 15 sq.); the statement that the family of Kara Çelebi-zāde goes back to K. M. P. (*Sidjill-i 'Othmānī*, ii. 111) is probably based on confusion with the vizier Rūmī Mehmed Pasha (cf. Ismā'il Beligh Brusewi, *Gildeste-i Riyāḍ-i 'Irfān*, Brussa 1302, p. 314 sqq.; J. v. Hammer, *G. O. R.*, ix. 129, No. 754; Hāfiẓ Ḥusain, *Ḥadīkat al-Djawāmi'*, ii. 195).

Hammer, *Gesch. des Osm. Reiches*, ii. 246 sq. (the statement there made that Hādjīdī Baba [i. e. Ibrāhīm b. 'Abd al-Karīm al-Ṭūsī, cf. Tashkōpiuzāde, *Shakā'ik al-Nu'māniya*, Stambul 1269, p. 226] was Mehmed P.'s father is due to a mistake); J. v. Hammer, *Gesch. des osm. Reiches*, i. 281 (Nishānī), 40 (error regarding Hādjīdī Baba repeated).

(FRANZ BABINGER)

KARAMANLI, a family who ruled Tripolitania in almost complete independence from 1711 to 1835. The founder of the dynasty, Aḥmad Karamanli, seems to have been a Kulughli. In 1123 (1711) he took advantage of the absence of the Pasha Muḥammad Abū Ammis to have himself proclaimed by the people, conquered and killed at Zuwāgha Khalīl Pasha who was sent to overthrow him, bribed Muḥammad Pasha who commanded a new expedition (1124 = 1712) and purchased from Sulṭān Aḥmad III a *firmān* confirming him in authority with the title of *beylerbey*. He put down insurrections at Tādjūrā and Maslāta and that of 'Alī al-Sanhādjī, gave the government of Barka and of Benghāzī to his brother al-Hādīdī Sha'bān Bey, who was killed ten years later in a rebellion suppressed by the Pasha. He also rebuilt the fortifications of Tripoli, notably the Burdj al-Mandrik, and built near the gate of Manshiya the mosque which bears his name and the madrasa adjoining it. In his reign a French squadron bombarded Tripoli in 1728 (1141—1142) and a treaty was concluded which lasted till 1766 (1180—1181).

He was succeeded in 1158 (1745—46) by his son Muḥammad Pasha under whom piracy developed and who concluded a treaty with England. He died in 1167 (1753—1754) leaving the power to his son 'Alī Pasha. In his reign the reins of authority became more and more loose and thefts and murders made life in Tripoli miserable; the troops were no longer paid regularly, the people

thought of appealing to the Porte. Matters were made worse by divisions in the family of the Pasha. His third son, Yūsuf, had his eldest brother Ḥasan assassinated on his authority in the arms of his mother (1790 = 1205—1206), then, supported by the Shaikh Khalifa b. Maḥmūd, chief of the Djabal Nafūsa, he rallied under his flag the Arab and Berber population hostile to the Turks, openly raised the standard of revolt against his father and besieged Tripoli. On these events, an adventurer named 'Alī Pasha Burghūl, a former official of the Oḍjaḳ of Algiers, succeeded in obtaining a *firmān* from the Porte and seized Tripoli. In face of a common enemy, the Karamanli were reconciled and asked help from the Bey of Tunis, Ḥamūda Pasha, who was also threatened by the return offensive of the Turks against their former Barbary possessions. With a Tunisian army they retook Djerba commanded by an ally of the usurper, Kara Muḥammad al-Turkī, and Tripoli in which 'Alī Burghūl had made himself detested by both Arab and Jew (Djumādā II 25, 1209 = Jan. 16, 1795). The latter fled to the East and in 1803 he succeeded in getting himself appointed Pasha of Egypt but was assassinated by a Mamlūk as soon as he arrived.

'Alī Pasha's rule was transitory; his son Aḥmad II Bey was next proclaimed. But taking advantage of his absence in Tādjūrā, his brother Yūsuf Bey had himself proclaimed (1210 = 1795—1796) and received a *firmān* from Sulṭān Selīm confirming him in his dignity. Aḥmad resided at Derneh with the title of Bey.

Yūsuf was the most important ruler of the Karamanli dynasty. He completed the fortifications of Tripoli, built a navy with which he forced Sweden to pay tribute to him (1213 = 1798—1799) and in secret agreement with Napoleon resisted Portugal whose fleet commanded by the English captain Campbell bombarded Tripoli. This expedition was celebrated in a Latin poem (*Carmen heroicum de rebus a Lusitanis ad Tripolim gestis*, Lisbon 1800; 2nd edition with French transl., Paris 1846, *La guerre de Tripoli*). Yūsuf had to sustain a more serious fight with the United States (1217 = 1801—3). An expedition commanded by Commodore Morris and another under Commodore Barron forced Yūsuf to accept a treaty which abolished the enslaving of Christians (Rabī I 4, 1220 = June 4, 1805). The Americans had tried to use the help of the Bey of Derneh, Aḥmad, brother of the Pasha; they deported him to Egypt after the peace. In 1232 (1815) the cruiser Decatur confirmed the advantages previously obtained; on the relations of Tripolitania with the United States see E. Dupuy, *Américains et Barbaresques*, Paris 1910, p. 132—297; Lane-Poole, *The Barbary Corsairs*, London 1890, p. 274—291. A little later all the countries of Europe, even the weakest, supported by the strongest, finally succeeded in disposing of the last attempts at piracy (on the relations of Tripoli with France see E. de la Primaudaie, *Le littoral de la Tripolitaine*, Paris 1866, p. 182—195, and with England see the references given by Playfair, *The Bibliography of the Barbary States*, i. *Tripoli*, London non dated, p. 49—52).

In addition to these difficulties, Yūsuf had to suppress revolts in the interior of the country; those of Gharyān in 1218 (1803—1804), of Ghadāmes in 1221—1225 (1806—1810), of Maḥmūd Sharīf, governor of Fezzān, in 1227 (1812), of the

Djabal Nafūsain in 1231—1236 (1815—1821) and of his own eldest son Muḥammad in the east of the regency in 1237 (1821—1822) (cf. Della Cella, *Viaggio da Tripoli alla frontiera occidentale dell'Egitto*, Geneva 1819, p. 19—23), without reckoning the intertribal wars such as that between the B. Bishr and the B. Saif al-Naṣr (cf. Muḥammad al-Tūnistī, *Voyage au Ouadai*, French transl., Paris 1891, p. 564—565) or that of the Sort and the Abufela. Fezzān, to add to his troubles, made itself independent under 'Abd al-Djalil b. Ghaiṭh of the Saif al-Naṣr, whom Yūsuf had sent to suppress a rising of the Bornu (1242—1246 = 1826—1830). Deprived of the resources supplied him by piracy, Yūsuf sought to procure supplies by imposing extraordinary super-taxes on the Jews whom he had at first protected, then by altering the value of the coins and finally by imposing a tax on gardens. The revolt became general; the insurgents meeting together at Manshiya proclaimed the dethronement of Yūsuf and replaced him by one of his grandsons, Muḥammad (according to others Aḥmad), and came to besiege Tripoli. An army led by the two sons of the Pasha was forced to retreat; not having succeeded in getting the help of the Bey of Tunis Yūsuf decided to abdicate. He did this in favour of his son 'Alī but this step only increased the troubles. If the European Consuls, 'Abd al-Djalil, master of Fezzān, Ghūma, chief of the Djabal Nafūsa, recognised 'Alī, the rest of the country remained faithful to Muḥammad. The Ottoman Porte took advantage of the occasion with the secret support of England; after having sent a *firmān* to 'Alī, Turkey sent out under the command of Naḍjib Pasha a fleet which took Tripoli without striking a blow (Muḥarram, 1251 = May, 1835) and reestablished the authority of the Porte in Tripolitania. Yūsuf remained till his death a prisoner in his own house, 'Alī was deported to Constantinople, Muḥammad committed suicide and his brother Aḥmad fled to Malta.

(RENÉ BASSET)

KARAMĀN-OGHLU, the most important of the various Turkoman dynasties, which arose in Asia Minor after the break up of the Saldjūk empire at the end of the viith (xiiith) century. They were for a time the most serious rivals of the Ottomans. The name goes back in the first place to the Turkoman chief Karamān, who attained a certain degree of independence during the Mongol troubles in the middle of the viith (xiiith) century and was granted by the Sultan Rukn al-Dīn a territory, from which he himself had come, in Cilicia. His native district was then known as Kamar al-Dīn-Ilī (now İle-İli) after the Amir Kamar al-Dīn, who had been appointed commander of the conquered Armenian fortresses after the war between 'Ala' al-Dīn Kaiḳobād I and Lesser Armenia (625 = 1223; Ibn Bibī in Houtsma, *Recueil*, iii. 329). Munadjjim Bashī (iii. 24) derives the name Karamān from Kamar al-Dīn, following Ibn Bibī's statement. This explanation of the name is hardly more than a popular etymology. The derivation from a geographical or ethnic name is nevertheless very probable as similar derivations are found among other Asia Minor dynasties and elsewhere (cf. İzmir-Oghlu, Germiyan-Oghlu [q. v.]). It is most probable, that the Karamānids originated in the subdivision of the Turkoman tribe of Sālūr [q. v.] called Karamān. That the town of Lāranda and the surrounding country later became called Karamān [q. v.] and that even the whole southern coast territory of Anatolia is called Caramania, is however due to the name of the dynasty itself. Among the older Ottoman chroniclers the general name Karamān-Oghlu is used almost regularly for every reigning Beg of the dynasty and the European authors of the xvth century also speak of the "Grand Karaman". The Byzantine authors have never had a clear idea of the identity of the Karamān-Oghlu. They confuse them with the Geruiyān-Oghlu and sometimes call the princes of Ḳonya Ἀλιδέριος Ἀλίζουριος etc. which goes back to the Germiyan-Oghlu 'Alī Shīr.

There are two kinds of sources for the earliest history of the Karamānids. The one is hostile to them; it belongs to the school of Saldjūk historians and is represented by Ibn Bibī and the later Ottoman chroniclers; the other group is only represented by Shikārī, whose *Karamān Tārikhi* is a Turkish prose translation of a Persian poem in the style of the *Shāhnāma*. Shikārī sings the praises of the Karamānids, but unfortunately gives no facts (on the MS. of Shikārī cf. Khalil Edhem in the *T. O. E. M.*, No. 11, p. 597; Munadjjim Bashī also used Shikārī). Al-Djannābī occupies a position midway between the two traditions. An extremely important addition to our knowledge is formed by the inscriptions of the Karamānids edited by Khalil Edhem.

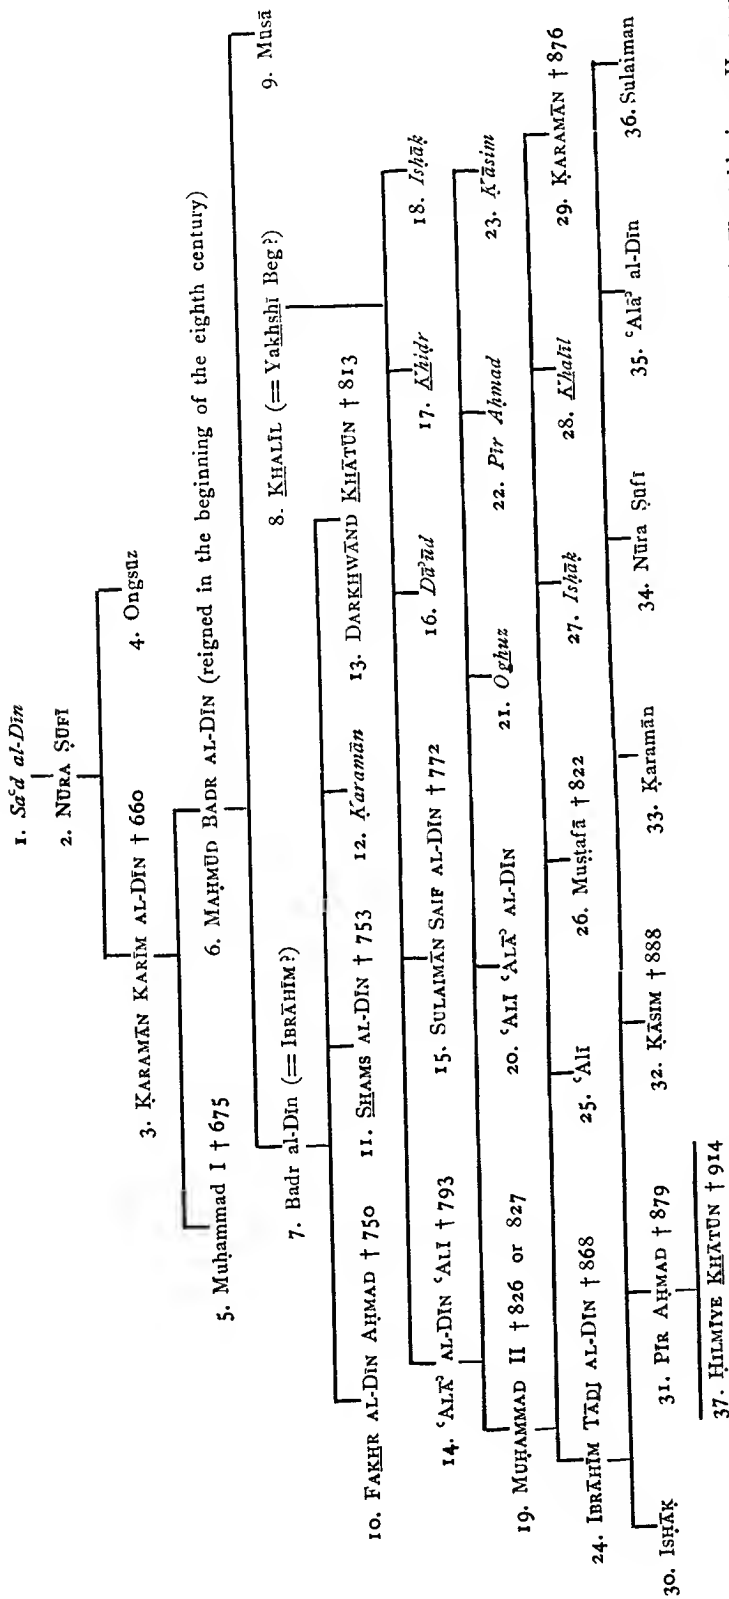

The ancestral home and the later regular place of refuge of the Karamān-Oghlu is the almost inaccessible mountainous country in the north-western Taurus on the frontier between Cilicia and Lycaonia, where the town of Ermenek [q. v.], the ancient Germanicopolis, lies. Karamān, according to Ibn Bibī (Houtsma, *Recueil*, iv. 321), was a Turkoman charcoal-burner, who used to sell his

charcoal in Lāranda, but this statement is biased; in Djannābī (p. 213) and Shikārī, Karamān's father, is called Nūra Ṣūfī (son of Sa'd al-Dīn in Shikārī), who was a mystic Shaikh held in great esteem by the Sulṭān of Ḳonya. Djannābī calls this Nūra Ṣūfī an Armenian but this statement is probably suggested by the name Ermenek. Besides it is improbable that Ermenek had anything at all to do with Armenia; it never belonged to Lesser Armenia (*Rec. Hist. des Crois. Doc. Arm.*, i. p. xxiii), and there is no obstacle to the derivation of the name from Germanicopolis. The name Nūra (نور) for the father of Karamān is further guaranteed by an inscription given by Khalil Edhem from the *türbe* of Karamān (Karīm al-Dīn Karamān b. Nūra) in Bālkāsūn in the sandjak of Ermenek; Nūra Ṣūfī's *türbe* is said to be at Deyirmenlik in the kaḍā of Müt [one of the sons of Ibrāhīm Beg (see below) was also called Nūra Ṣūfī]. The Karamān-Oghlu thus have their beginnings in Ṣūfī circles, just as now seems to be probable for the Ottomans (Giese, *Ztschr. f. Semitistik*, 1924, p. 246 sq.) and for the Ṣafawids (cf. Babinger, *Z. D. M. G.*, 1922, p. 132). Djannābī's statement that Nūra Ṣūfī was a follower of Bābā Ilyās needs only the correction that the latter was not the instigator of the Bābā'ī rising in Amasia (this was Bābā Ishāk) but a Ḳhorāsānī Ṣūfī who strongly influenced the whole religious development of Asia Minor (cf. Koprlü Zāde Fu'ād, *İlk Mütesawwifler*, p. 232, 233). It is in any case significant that Ibn Bibī calls the Karamānids Ḳhawāridj, which name was also given to the Bābā'īs, cf. also Ḳhair Allāh, *Tārikh*, Constantinople 1292, ii. 58, where it is said that Nūr al-Dīn Ṣūfī (sic) was *Ḳhalīfa* of Bābā Ilyās for İle-İli.

Nūra Ṣūfī is said (according to Djannābī) to have taken the fortress of Sclefke by treachery and his son Karīm al-Dīn Karamān was granted this fortress as a fief by the Sulṭān; according to other sources, he received the beglik of Ermenek (Munadjjim Bashī) and the Sulṭān Rukn al-Dīn hoped therefore to regain the fealty of himself and his brother Ongsūz, who had been made *Mirāḳhor* of the Sulṭān, after they had begun to stir up unrest in this region. After Karamān's death, which is placed in 660 (1261) (by Munadjjim Bashī; Shikārī makes him be poisoned by the Sulṭān), his sons and his brother were imprisoned in the fortress of Kāwala (كوال); Ibn Bibī, *Recueil*, ix. 322; After the death of the Sulṭān (661 = 1267) they were released by the vizier Mu'īn al-Dīn Parwāna.

Soon afterwards Karamān's son Muḥammad began his activity. He came to an arrangement with the rulers of Syria, who where then at war with the Saldjūks, and the vizier Parwāna found it impossible to bring him to obedience again, among his mountains. Then, when the Saldjūks and their overlords, the Mongols, were engaged in Mesopotamia with the wars against the Mamlūks, the Ermenek Turkomans began to covet the plain of Ḳonya. Muḥammad Beg made use of Djamrī, the false claimant to the throne, who gave himself out to be a son of the Saldjūk 'Izz al-Dīn who escaped to the Crimea. In the name of this false Sulṭān, Muḥammad seized Ḳonya which was poorly defended and Djamrī entered its citadel as Sulṭān (Thursday, June 7, 1275 = Dhu 'l-Ḥijja

GENEALOGICAL TABLE OF THE KARAMAN-OGHLU

This genealogical list is reconstructed and somewhat different from that of Khalil Edhem Bey (*J.O.E.M.*, No. 14, p. 880). The table in v. Hammer, i. 682, is obsolete. The names written in capitals are found on coins and inscriptions, those in italics only in Shikāri. — 4. in Ibn Bibī, *Reueit*, iv. 322, is called Bānsūz. — 7. The Badr al-Dīn of Shikāri and Ibn Baṭṭiṭa is here tentatively identified with the Ibrāhīm mentioned in the epitaphs of 10 and 11 as their father. — 8. This Khalil would be the Yakḥshī Beg of Munadḡḡim Başlı. According to Shikāri he reigned for 17 years. — 9. Inscription of the year 740 at Ermenek. — 13. Tomb inscription of the year 813 at Ermenek. — 14. is the Abu 'l-Faṭḥ 'Alā' al-Dīn Khalil of the inscriptions (see the text), identified with Shikāri's 'Alā' al-Dīn Ibn Khalil and with 'Alī, the husband of Naṭise. — 15. is buried in the Khātūniya Medrese at Lāranda, according to the inscription of 772. — According to Shikāri, he was appointed by his brother (14) regent of Lāranda and poisoned at the instigation of Arṭena-Oghlu. — 19 and 21 are, according to the battle of Kaşariya (822) against the Mamlūks. — 24. On a coin of Rukn al-Dīn; according to Shikāri, he was the son of a Salḡūḡ princess. — 26. Killed in the battle of Kaşariya (822) against the Mamlūks. — 29. Epitaph at Adrianople 876. — 30. Coin of 880. — 32. Epitaph at Lāranda of 888 (according to Anonymus, ed Giese, p. 117, he died in Muḥarram, 887). — 31—36. are according to the Ottoman chroniclers, sons of the sister of Murād II who married Ibrāhīm. Shikāri in part has other names. — 37. Epitaph of 924 at Lāranda. (J. H. KRAMERS).

10, 674, if we read 674 instead of 676 in Ibn Bibi). Muḥammad Karamān-Oghlu administered the conquered territory for him as vizier and married the daughter of Sultān Rukn al-Dīn. An important administrative enactment of his was that he replaced Persian by Turkish as the official language for the first time and introduced a kind of mixed book-keeping which also became a model for the Ottomans (cf. thereon v. Hammer, *Gesch. d. Osm. Reiches*, i. 35). At first Muḥammad and Djamri (who had taken the name Siyawush) successfully held their own against the Saljuq troops and extended their territory. Finally the Mongol Khān Abāka [q. v.] sent his son Oghuz against Ḳonya. On hearing of this Muḥammad and Djamri hurried out of Ḳonya, carrying with them the vast booty which they had taken at the capture of the city. After the withdrawal of the Mongol army, they again tried to reach the town but the inhabitants under the leadership of the Kādī Maḥmūd al-Urmawī refused them admittance and the Turkomans retired to their mountains, burning and plundering as they went. Soon afterwards Muḥammad and two of his brothers were killed in a fight with Mongol and Saljuq troops. Djamri escaped to the north-west; in an encounter between his troops and those of the Sultān in the neighbourhood of the Sakaria he was taken prisoner and afterwards executed. This last battle, according to Ibn Bibi, took place in Muḥarram, 676 (June, 1277). It is therefore probable that Muḥammad's death took place in 675 (1276), which is made the more probable by various epitaphs in Ḳonya (*T. O. E. M.*, p. 702). Shikāri has a somewhat different account (cf. also von Hammer, *Gesch. d. Ilchane*, p. 297, who gives Muḥammad the *laḡab* Shams al-Dīn). No inscriptions are known of Muḥammad; he was, of course, not a reigning prince but acknowledged the Egyptian Sultān Baibars as his overlord.

Some years later the power of the Karamānids revived under Maḥmūd Beg, whose *laḡab*, according to Khair Allāh, was Badr al-Dīn. In his inscription of the year 802 (1399—1400) he is called the son of Karamān, which agrees with Shikāri, who says that Maḥmūd had previously taken part in many of his brother's enterprises; Munadjjim Bashī's statement that he was the son of Muḥammad may therefore be considered to be wrong. Maḥmūd's principal residence was probably Ermenek, where he founded a mosque (702 = 1302). According to Munadjjim Bashī, he recaptured Ḳonya and in 708 (1308) became completely independent. Driven out of Ḳonya in 719 (1319) by the Amir Čubān, general of the Mongol Sultān of Persia, he retired again to Ermenek. According to Ibn Faḍl Allāh (*Masālik al-Aḥṣār* in the *N. E.*, xiii. 342 sq.), however, the Karamānids were not entirely independent at the beginning of this period; they called themselves Amīr and frequently placed themselves under the protection of the Egyptian Sultāns while they on the other hand endeavoured to live on good terms with the Mongols. They were at that time bitter enemies of the Armenians against whom they felt themselves powerful through the protection of the Egyptian Sultāns.

The statements of the historians regarding the succession of the princes after Maḥmūd and their names are contradictory and the inscriptions throw little light on the question. According to Shikāri, Maḥmūd had three sons: Badr al-Dīn, Khalil and ʿĀ, of whom Badr al-Dīn reigned first, being

followed on his abdication by Khalil, then cam Badr al-Dīn for a second time. Fakhr al-Dīn, his son succeeded him after his death; he was killed through the intrigues of Artena, Beg of Kaṣariya, and succeeded by Shams al-Dīn's second son, also called Shams al-Dīn, who was poisoned by his brother Karamān after reigning 14 months. The above mentioned Mūsā b. Maḥmūd then ascended the throne to be replaced four years later by Khalil's son 'Alā' al-Dīn, passing over the brief reign of Badr al-Dīn's third son Karamān. According to Shikāri, this 'Alā' al-Dīn was one of the greatest of the Karamānids and is called by him Abu 'l-Faḥ. In agreement with the statements of Shikāri is Ibn Baṭṭūṭa (ii. 281, 284), who visited a Sultān Badr al-Dīn in Lāranda in 733 (1332), to whose territory Ḳonya also belonged. But his brother Mūsā had, it is said, already reigned in Lāranda before him but had ceded the town to the Mamluks from whom it later had been reconquered by Badr al-Dīn; that Mūsā had very close relations with Egypt is confirmed by Ibn Faḍl Allāh also (*Masālik al-Aḥṣār*, in *N. E.*, xiii. 347). We must therefore assume that the brothers reigned in different parts of Karamānia at the same time. Two epitaphs in the Emir Mūsā Medrese in Lāranda prove that Fakhr al-Dīn Aḥmad b. Ibrāhīm b. Maḥmūd died in 750 (1349/50) and Shams al-Dīn b. Ibrāhīm b. Maḥmūd in 753 (1352). They must certainly be the two sons of Badr al-Dīn (who, in that case, may perhaps have borne the name Ibrāhīm) mentioned by Shikāri.

It is more difficult to ascertain the identity of 'Alā' al-Dīn. An inscription of 772 (1370/1) on the gate of the *zāwiya* in Lāranda, where Djalāl al-Dīn Rūmī's mother is said to be buried, records that the *zāwiya* was built by Sultān Abu 'l-Faḥ 'Alā' al-Dīn Khalil b. Maḥmūd b. Karamān and that Saif al-Dīn Sulaimān b. Khalil (who, according to Shikāri, was a brother of 'Alā' al-Dīn) is buried there. Munadjjim Bashī (iii. 26) also knows an 'Alā' al-Dīn, son of Yakhshī Beg, son of Maḥmūd; as there is no documentary evidence for the existence of this Yakhshī Beg, he may perhaps be identified with Shikāri's Khalil (as Khalil Edhem Bey in the *T. O. E. M.* has already done; Yakhshī is probably not a proper name at all here; cf. Ibn Baṭṭūṭa, ii. 316). Shikāri makes his 'Alā' al-Dīn marry the daughter of the Ottoman Sultān Murād II, while according to Munadjjim Bashī it was 'Alā' al-Dīn's son 'Alī Beg who made this marriage. The contract of marriage between Murād II's daughter Nefise and Karamān-Oghlu 'Alī Beg is, indeed, still preserved in Feridūn's *Munsh'āt*, i. 105 sq.) (in the printed text, p. 107, the date is 788 = 1386, but Khalil Edhem Bey has shown that 783 = 1381/2 is more probably correct). There is an inscription of this Ottoman princess in the Khātūniye Medrese at Lāranda of the year 783, in which the reigning prince is called Amir 'Alā' al-Dīn Khalil b. Maḥmūd, i. e. the same name as in the above mentioned inscription of 772, but without the title of Sultān. The difficulty now is whether the 'Alā' al-Dīn Khalil of the inscriptions is identical with Shikāri's 'Alā' al-Dīn Ibn Khalil and with 'Alī, the husband of the princess Nefise. Very strongly in favour of this identity is a *waḡḡnāme* of 'Alā' al-Dīn's grandson Ibrāhīm of the year 859 = 1454/5 (given by Khalil Edhem Bey in the *T. O. E. M.*, No. 13, p. 831), where this Ibrāhīm is called: b. Muḥammad b. 'Alā' al-Dīn b. Khalil b. Maḥmūd b. Karamān

(cf. on the question van Berchem, *Inscripfen* etc., p. 118—125 in addition to Khalil Edhem Bey) Probably throughout the whole period different Karamânians ruled in different places (like Lāranda, Konya, Eimenek, Akşehir, Akserai). [Ibn Battūta, ii. 258, mentions a Yūsuf b. Karamân as lord of 'Alā'iya]. The extent of their territory varied considerably during this period. Lāranda was probably the principal royal residence Konya, which had been conquered by "Yakhshī Beg" (Munadjjim Bashī), did not always belong to them. They had to fight with the Artēna-Oghlu at Kaşariya, who were vassals of the Mongols and, according to Shikāri, once took Konya and Lāranda, with the Mamlūks of Syria, the Armenians, the Franks of Cyprus and with the other Turkoman rulers of Asia Minor, at whose expense they extended their territory considerably; they even advanced as far as Brūsa. Finally in 788 (1385) they came into conflict with Sulṭān Murād I (battle of Konya) and in 793 (1390) the battle of Ak Çai in Kermiyan was fought against Bāyazid I Yıldırım, in which 'Alā' al-Dīn (or 'Alī) was captured and put to death by Timūr Tāsh Pasha, while his kingdom was annexed and his two sons taken to Brūsa as prisoners. (Most of the Ottoman writers mention these events; Shikāri's account differs considerably).

The crushing defeat of the Ottomans by Timūr gave the Karamân-Oghlu again an opportunity to revive and a third period of struggle ending in final overthrow begins. 'Alā' al-Dīn's son Muḥammad was liberated from imprisonment in Brūsa by Timūr's grandson Mirzā Muḥammad (according to another story, he fled to Timūr) and was given a portion of his territory by Timūr again (about 805 = 1403). There are coins of his struck in Timūr's name. Konya is said to have become his again in 816 (1413/14) (Munadjjim Bashī). He began to fight the Ottoman pretenders and occasionally supported Djunaid [q.v.], the Izmir-Oghlu. With the Ottoman Sulṭān Mehmed I he had concluded a treaty before the latter's ultimate success, by which he is said to have ceded half of his lands to the Sulṭān (*Tādj al-Tawārikh*, etc., also Chalcocondylas), but in the same year we find Muḥammad attacking Brūsa on a pretext of avenging his father's death. After 34 days' siege of the citadel and the destruction of the town he withdrew. The lands of the Germiyan-Oghlu were under his rule for 2½ years at this time (inscription at Kutahiya; cf. *T. O. E. M.*, No. 2, p. 110 sq.). There were new campaigns against the Ottomans in 817 (1414) and 818 (1415). Muḥammad was on one occasion captured by Bāyazid Pasha but again released.

The Turkish chronicles tell us nothing of the years 818—824 (1415—1421). The Egyptian historians (al-'Aini, al-Makrizi, Abu 'l-Mahāsin), however, fill the gap. After Muḥammad had sought help from the Egyptian Sulṭān for his war against the Ottomans and had even recognised him as his overlord (as is evidenced by his coins also) hostilities began, in which the Ramadān-Oghlu [q.v.] was also involved and during which Muḥammad's brother 'Alī fled to Egypt. This produced an Egyptian expedition against Muḥammad in 822 (1419). Kaşariya and Konya were captured and 'Alī installed in his brother's place in Konya. Muḥammad took refuge in the mountains at first but was later captured in an encounter near Kaşariya and sent to Cairo.

In 824 (1421) he received permission to return and again ascended the throne. He met his death at the siege of the Ottoman fortress of Adalia, which is fully described by the chroniclers (probably 826 or 827). His son 'Alī went over to the Ottomans, who gave him the sandjak of Sofia, while his son and successor Ibrāhīm returned to his native mountains with his father's body. Of the second Muḥammad various inscriptions exist in Konya. There are also inscriptions of his brother 'Alī in Nigde, where he held sway before and after the Egyptian period. After his brother's death he endeavoured to make himself independent again but when Murād V supported his nephew Ibrāhīm he did not succeed. In this period the power of the Karamân-Oghlu was considerable; Sanudo estimates the size of his army at 30,000 men on a war footing and 60,000 on a peace footing (Murat, *Inscr. Ital.*, xxii. col. 962).

Ibrāhīm b. Muḥammad Tādj al-Dīn reigned from about 827 (1425) to 868 (1463) (coins of the years 827 onwards) and is the last great member of the dynasty, which after the extinction of the Germiyan-Oghlu was now the only dangerous rival of the Ottomans. Ibrāhīm had married the sister of Murād II and was at peace and war alternately with the Ottomans. The fact that he was the Sulṭān's brother-in-law often saved him from destruction. He had also an alliance with the Emperor Sigismund; the early Ottoman chroniclers bitterly reproach him for his dealings with the unbelievers as well as for his repeatedly breaking faith after solemnly concluded treaties (Anon., ed. Giese, p. 63, 64, 68). Murād II had made up his mind to exterminate the Karamānids and for this purpose he made an alliance with the Turkomans of the Dhu 'l-Qadr dynasty. The latter about 840 (1436/7) took Kaşariya and the surrounding country from the Karamānids; Ibrāhīm lost Akşehir and Beyshehri among other possessions to Murād II. An attempt to regain the lost territory after Murād's death (855 = 1451) failed. Mehmed II is said to have acted in this campaign as friend and protector of the Christians (Ducas, p. 233). Ibrāhīm was more successful in the south; in 1443 he took the fortress of Gorigos in Cilicia from the Cypriotes (*Rec. Hist. des Crois., Doc. Arm.*, i. 638). Before his death Ibrāhīm wished to abdicate in favour of his son Ishāk. But Ishāk was the son of a slave and the other six sons whose mother was Murād's sister besieged Ibrāhīm and Ishāk in Konya; both had to take to flight and Ibrāhīm died in the fortress of Kāwala (or Guwāle; 868 = 1463).

His successor was his son Pīr Aḥmad whose side Mehmed II had taken. Ishāk fled to Uzun Hasan, prince of the Ak-Koyunlu. The confusion that followed in the struggle for the throne finally brought about the end of the dynasty. With the help of the Ottomans Pīr Aḥmad defeated his brother in the battle of Ermenek (869 = 1465) and henceforth regarded himself as the vassal of Mehmed II (inscription of 870 = 1466 at Kaşariya). But he soon came into conflict with his overlord because he had come to an arrangement with the Venetians. In 872 (1467) the Ottomans permanently occupied Konya where the Ottoman prince Muḥammad became wālī; a part of the Karamānian population was transferred to Stambul. Pīr Aḥmad retired to Lāranda and Nigde, where he fought the Ottomans and his brothers alternately. He made

an alliance with his brother Kāsim for a time (inscription of the two at Nigde of the year 874=1469/70). But they could not stand against Gedik Aḥmad Pasha and lost Lāranda. After Ermenek and Minan had also been taken by the Ottomans, where Pir Aḥmad's family and treasures fell into their hands, the latter threw himself from a cliff but did not kill himself. He was still able to go to Tarsus where he died about 879 (1474), according to the *Tādī al-Tawārīkh*. Ishāk had withdrawn to Selefke, where his widow continued to hold out for some time after his death.

Kāsim b. Ibrāhīm then maintained himself till his death (Muḥarram, 887=Febr.-March, 1482), according to Anonymus, ed. Giese, p. 117; his epitaph at Lāranda is dated 888). He also sought the assistance of Uzun Ḥasan but could not recapture Lāranda. Then in 887 (1482) he joined the pretender Sultān Djem [q. v.] who had at one time governed Konya in succession to his brother Muṣṭafā and on other occasions also had been served by Karamānian troops. Kāsim was afterwards pardoned by Bāyazīd II but with his death the rule of the Karamānids ended. His other brothers had already gone over to the Ottomans.

After Kāsim's death his generals placed Torghut-Oghlu Muḥammad, who belonged to the Karamān nobility, on the throne, but he also came into conflict with the Ottomans and had to flee to Aleppo in 892 (1487).

It was to their geographical situation that the Karamānids owed the great power they held for a time. Their mountains formed a refuge which it was almost impossible to capture, from which they could make successful descents into the plains of Konya and Cilicia again and again. The possession of the various Cilician passes and other routes over the Taurus brought them a considerable revenue from the tolls which they levied on the Genoese and Cypriote merchants, who carried on a busy trade by these routes with Asia Minor, while their revenue from the customs in the coast towns ruled by them (Scandolor, Manavgat, Anemur, Selefke, Lamos) must have been considerable. Their wealth put them in a still stronger position; their buildings in Lāranda, Konya and Nigde are evidence of this wealth, especially the ruins of the Khātūniye Medrese in Lāranda or Karamān [q. v.]. Karamānian art is a continuation of Saldjūk art in contrast to Ottoman art which rather follows Byzantine models (Woermann, *Gesch. d. Kunst*, Leipzig and Vienna 1915, ii. 445). Of importance in the history of civilization is their encouraging the use of Turkish instead of Persian, as has been already mentioned. The contrast between the Karamānians and the Ottomans seems, however, to have been very marked (Ducas, p. 195, says: ἦσαν γὰρ οἱ ἔχθρῶδες διακείμενοι οἱ τοῦ Καραμάν μετὰ τοῦ Ὀσμάν).

Bibliography: The most important monograph on the Karamānid is Khalil Edhem Bey's work on the inscriptions of the Karamān-Oghlu, *Karamān-oghullary haḳkyndu wethā'ik-i mukḳūke* in Nos. 11—14 (Dec., 1911 to Jun., 1912) of the *Revue Historique publiée par l'Institut d'Histoire Ottomane (Tārikh-i 'Othmānī Endjūmeni Medj-mū'asī = T.O.E.M.)*; he is the only author who has used Shikāri. Of the earlier historians there are Ibn Bibi (vol. iv. of Houtsma's *Recueil de Textes relatifs à l'Histoire des Seldjucides*, Leiden 1902); Aḥṣīk Pasha Zāde, Constantinople 1332; F. Giese, *Die Alt-Osmanischen Chroniken*, Breslau

1922; Sa'īd al-Dīn, *Tādī al-Tawārīkh*, Constantinople 1279; Munadjjim Bashi, *Ṣaḥā'if al-Akḥbār*, Constantinople 1285; Hādījī Khalifa, *Taḳwīm al-Tawārīkh*; al-Djinnabi's *Tārikh*; the Egyptian historians mentioned in the text. See also Ibn Baṭṭūta, *Tuhfat al-Nuṣṣār*, ed. Defrémery and Sanguinetti, Paris 1853—1859, ii.; Feridūn Bey, *Munshā'āt Salāṭin*, i., Constantinople 1274; the Byzantine Chalcocondylas (ed. Becker, Bonn 1843) and Ducas (ed. Becker, Bonn 1834). — We may also mention: Aḥmed Tewhīd, *Meskūkāt-i İslāmiye-i İsmā'īl Ghālib*, *Meskūkāt-i İslāmiye Taḳwīmī*, Istanbul 1328; Cl. Huart, *Epigraphie de l'Asie Mineure in Revue Sémitique*, 1895, p. 346 sq., 355 sq., 371; Max van Berchem's edition of the Arabic inscriptions in the *Inscripfien aus Syrien, Mesopotamien und Kleinasien*, collected by Max von Oppenheim, Leipzig 1909, p. 119—125; J. H. Lojtvēd, *Konia*; *Inscripfien der Seldjukischen Bauten*, Berlin 1907, p. 79—84; J. v. Hammer, *Geschichte des Osmanischen Reiches*, Pest 1827, i. and ii.; *Recueil des Historiens des Croisades, Documents Arméniens*, Paris 1869, i.; J. von Hammer-Purgstall, *Geschichte der Ilchane*, Darmstadt 1842, i. 297.

(J. H. KRAMERS)

KARĀMAT 'ALĪ, born (date uncertain, early in the sixteenth century?) at Djawnpūr [q. v.], of a Shaikh family, which had held the office of *khāṭib* under Muhammadan rule; his father was *sarīkhādār* in the Djawnpūr Collectorate. He studied theology and other Muslim sciences under various celebrated teachers of the time, esp. Shāh 'Abd al-'Azīz, *muhaddith* of Dihlī, who was also the teacher and afterwards follower of Saiyid Aḥmad of Barēli. Between 1820 and 1824, Saiyid Aḥmad made a tour through Bengal and Northern India, collecting a band of disciples, and Karāmāt 'Alī was one of the most devoted of the younger men who followed him, but he does not appear to have taken part in the *ḡhīhād*, which Saiyid Aḥmad waged against the Sikhs [q. v.], or to have ever been in the Afghān borderland, where Saiyid Aḥmad was slain in battle in 1831. The Saiyid's old master, Shāh 'Abd al-'Azīz, now became his *khālifa*, and an active propaganda for the revival of Islām was organised in Bihār and Bengal. With this peaceful propaganda Karāmāt 'Alī was identified, and he may be regarded as its most successful apostle, as he was certainly its most brilliant exponent. During the early decades of the 19th cent, there were several minor reform movements in Eastern Bengal, led by men with more zeal than learning, notably by Hādījī Sharī'at Allāh [v. FARĀ'IDĪ, ii. 57], who in 1252 (=1836-7) met Karāmāt 'Alī in Calcutta. By 1855 the two schools had made some progress towards a rapprochement, and in the meeting then held at Barisal, Karāmāt 'Alī was able to agree on several points with the representative of the other movement, Mawlāwī 'Abd al-Djabbār, though on the question of the lawfulness of *Djum'a* and *Id* prayers in British India, he could not overcome the stubborn opposition of 'Abd al-Djabbār, and he had to appeal to the humour of 'Abd al-Djabbār's followers by pointing out that their leader mistook grasshoppers (which were unlawful food) for locusts (which were lawful (*ḥudūdīyat-i-kāṭī'a*, p. 29-32).

Karāmāt 'Alī's life was a double struggle; first, he combated the Hindu customs and superstitions

which had crept into the practise of Islām in Eastern Bengal, against which he wrote a book, entitled *Radd al-Bid'ā*, besides inveighing against them throughout his writings; and secondly, he tried to bring back into the fold of orthodoxy the new heterodox schools against which he waged a successful war; to this subject, also, he devoted a special book, *Hidāyat al-Kāfiḍin*, besides constant references to "the ignorant" in his voluminous writings. He kept in touch with the Musalmāns of Bengal, and distributed to the needy all the presents that he received. He was a trained *ḡarīf* and an expert calligraphist.

Garcin de Tassy (*op. cit.*, ii. 162) says that he competed for the prize offered by Sir Charles Trevelyan for the best Hindustani essay on the influence of the Greeks and Arabs on the Renaissance in Europe, but that his essay was not accepted for want of an English translation, which according to the rules should have accompanied the essay. He was thus interested, unlike the majority of contemporary Indian Mawlawis, in the relation of Islām to the wider questions of the world at large. He died on the 3rd of Rabi' 11, 1290 (= 30th May, 1873) and was buried in Rangpūr (*Tadjiḡlī-i-Nūr*, ii. 136), in the province in which he had laboured for the regeneration of Islām all his life. He was succeeded in his work by his son, Mawlawī Ḥāfiẓ Aḥmad (ob. 1898), and his nephew, Muḥammad Muḥsin. His following was so large that there was hardly a Bengal village without his disciples and he still exerts a living influence in certain districts of that province.

He wrote chiefly in Urdū. Raḥmān 'Alī (*op. cit.*, p. 171—2) gives a list of 46 of his works, without claiming that it is exhaustive. One of his works, *Miftāḥ al-Djannat*, has run through numerous editions and is accepted in India as a correct statement of Islamic principles. His writings may be divided into four classes: 1) general works, like *Miftāḥ al-Djannat*; 2) works on the reading and verbal interpretation of the Qur'ān, and formal prayers and ablutions; 3) works on the doctrine of spiritual preceptorship (*Piri Murīdī*), the cornerstone of orthodox Islām in India; in accepting this doctrine, Karāmat 'Alī stands in sharp opposition to the Wahhābī sect and merges insensibly in the *Taṣawwuf* schools, which he brings into relation with the traditional religious orders; 4) polemics against *Shari'at* Allāh, Dūda Miyān, the Wahhābīs, etc.

The common conception that Karāmat 'Alī was a Wahhābī is refuted by the detailed exposition of his own views as set forth in his *Mukāshafāt-i-Raḥmat*; he had not seen any Wahhābī books, but had made verbal enquiries and found that they were so fanatical (*ḡiddī*) that they called all who did not agree with them *mushrik* (p. 38-9); he and his school carefully distinguished between *shirk*, which was the negation of Islām, and *bid'ā*, which was only an error in doctrine (p. 39). In his *Hudūdīyat-i-kāfi'a* he draws a clear distinction between a *fāsiḳ* (sinner) and a *kāfir* (infidel) and inveighs against those who would deny funeral prayers to those who did not pray but repeated the *kalima* (p. 21); if non-Muslims conquer Muslim lands, the *Djuma'a* prayer and the two 'Id [q. v.] prayers were not only lawful but obligatory (p. 13 *bis*). He laid great stress on authority, successively handed down by living teachers, and based his doctrine on the orthodox Sunnī

books of the Ḥanafī school (*Mukāshafāt-i-Raḥmat*, p. 37). He accepted the six orthodox books of tradition (*Ṣiḡḡh sitta*), the commentaries (*tafāsīr*), the principles of ceremonial law as interpreted by the masters (*uṣūl-i-fikḥ*), and the doctrines of *taṣawwuf* and *piri murīdī* (pp. 38, 35), even basing the mission of Saiyid Aḥmad on a ḥadīth from Abū Huraira (p. 32): in every century a teacher is born to revivify the faith: Saiyid Aḥmad was such a teacher for the xiiith cent. and should be followed until another teacher arise for the xivth cent. (p. 34). All this was in direct antithesis to Wahhābī teaching and the "reform" amounted merely to the abolition of Hindū rites and ceremonies or those introduced through ignorance (p. 36), or to a revival of Islām according to the accepted orthodox schools (p. 50). The political effects of Saiyid Aḥmad's life brought his followers into conflict with the authorities, but the writings of the school show that there was no connection, political or doctrinal, with the sect founded by Muḥammad b. 'Abd al-Wahhāb in Arabia.

Bibliography: The European accounts of Karāmat 'Alī are unsatisfactory, being based on secondary information and failing to distinguish between this school of reform and Wahhābism, and in some places there is confusion between the subject of this article and Mawlawī Saiyid Karāmat 'Alī of Djawnpūr (1796—1876), who represented the British Government at the court of Dōst Muḥammad Khān at Kābul, 1832—1835, and was superintendent (*mutawallī*) of the Hughli Imāmbāḡa, 1837—1876 (v. *Nineteenth Century*, May, 1905, pp. 780—782; Sir W. W. Hunter, *The Indian Muslims*, p. 114; C. E. Buckland, *Dictionary of Indian Biography*, p. 229; Nūr al-Dīn Zaidī, *Tadjiḡlī-i-Nūr*, ii. 139); *Census of India, 1901*, vol. vi. part i. (Bengal, p. 174 (Calcutta, 1902); *Journ. As. Soc. of Bengal*, vol. lxiii., part iii., pp. 54-6 (Calcutta, 1894); Garcin de Tassy, *Hist. de la Littérature Hindoue et Hindoustanie*, ii. 162 (Paris, 1870). (It is doubtful whether the *Muḡḡiza-i-rashk-i-Maṣiḡa*, Dihli, 1868, mentioned there, was a work by the subject of this article); Saiyid Nūr al-Dīn Zaidī, *Tadjiḡlī-i-Nūr* (biographies of the famous men of Djawnpūr), pp. 135-6 (Djawnpūr, 1900).

A correct appreciation of Karāmat 'Alī's doctrines can only be gained by a study of his own writings, the most important of which are the following: *Miftāḥ al-Djannat* (Calcutta, 1243) (frequently reprinted); *Kawkab-i-durri* (? Calcutta 1253) (translates passages from the Qur'ān for the benefit of those who know only a little Arabic); *Ba'at-i-Tawba* (Calcutta, 1254) (defends the legality of repentance at the hands of a *pir*, and other practices of the religious orders); *Zināt al-ḡarīf* (Calcutta, 1264), (on the correct principles for the reading aloud of the Qur'ān); *Faiḍ-i-'amm* (Calcutta, 1282), (a tract on speculative theology, expounding the doctrines of Shaikh Aḥmad Sarhindī); *Hudūdīyat-i-kāfi'a* (Calcutta, 1282), (a polemical tract against the school of Sharīf Allāh and his son Dūda Miyān, whose name (commonly spelt Dūdu Myān) Karāmat 'Alī always writes in this way); *Nūr al-Hudā*, (Calcutta, 1286), on the doctrines of *taṣawwuf*, of the *muḡḡaddidiya* school, apparently the new school of Saiyid Aḥmad of

Barēli); *Mukāshafāt-i Rahmat* (? Calcutta, 1286), (gives an account of the life and work of Saiyid Aḥmad of Barēli, and discusses and disowns the Wahhābis); *Zinat al-Muṣallī* (Calcutta, 1259), (instructions for ablutions and prayers, etc.); *Zūd al-Taḳwā* (Calcutta, 1287, reprint), (treats of the beliefs and practices of Islām, and *taṣawwuf*; accepts the Nakṣhabandiya teaching). A list (not complete) of Karāmat 'Alī's works is given in Rahmān 'Alī's *Tadhkirat-i 'Ulamā-i Hind*, p. 171 (Lucknow, 1894); 46 separate works are mentioned.

(A. YUSUF ALI)

KARA MUŞTAFĀ PAŞHA, the name of two Ottoman Grand Viziers.

1. Kara [Kemānkesh (i.e. archer)] Muştafā Paşa, an Arnaut by origin, taken from the Janissaries became first *kyaya* and was then dismissed; in 1043 (began July 8, 1633) he was appointed *Segban bashi* (general of the Janissaries) and became successively Agha of the Janissaries in Shawwāl, 1044 (began March 9, 1635), Grand Admiral (*Kapudan-i Derya*) on Djumādā I 5, 1045 (= Oct. 17, 1635) and Grand Vizier in Sha'bān, 1047 (began Dec. 19, 1637). During his period of office which lasted till his execution by order of Sulṭān Ibrāhīm I on Muḥarram 1, 1053 = March 22, 1643 (cf. J. v. Hammer, *Gesch. d. Osman. Reiches*, v. 326 sqq.) he distinguished himself by economy and a talent for administration, which all the historians recognise with admiration. Husein Wadjihi, the author of a history of the Ottoman Empire covering the period between 1048 (1638) and 1070 (1659), was K. K. Muştafā Paşa's keeper of seals. A number of buildings owe their origin or restoration to him; he founded mosques, built bridges and planned settlements (for example Ortaḳād near Siwās). The best verdict on him is that of the contemporary Ism. Bullialdus in *Ducæ Historia Byzantina*, Paris 1649, p. 263 infra: *vir, quameis inenuditissimus, ut qui nec legere, nec scribere sciebat, in rebus gerendis negotiisque expellendis solertissimus ac promptissimus*. Kara Muştafā Paşa is buried in Stambul at Parmak Kapu on the Diwān Yolu in the madrasa built by him (Na'ima, *Tārīkh*, ii. 30 sq.).

II. Kara Muştafā Paşa, the besieger of Vienna. He belonged to Merzifün where he was born in 1044 (began July 27, 1634), according to other stories about 1620 (cf. Barozzi-Berchet, *Relazioni degli ambasciatori e baili veneti a Constantinopoli*, Vcuice 1879, ii. 207, according to whom he was 52 about 1677), the son of a *Sipahi* captain named Urudj (according to other sources Hasan Agha) who fell before Baghdād. His father was a friend of Koprülü Mehmed Paşa who had the boy educated. His first rank was Silihdār, next Talkhīdjī (master of oratory), in Dhu 'l-Hijja, 1068 (began Aug. 30, 1658) *Mirakhor* (chief marshal) and in Mu-

ḥarram, 1070 (began Sept. 18, 1659) he became Beylerbey of Silistria with the rank of vizier (cf. Barozzi-Berchet, ii. 134 sq. and *Voyages du Sicur A. de la Motraye*, the Hague 1727, i. 439); in Ramaḍān, 1070 (began May 11, 1660) he was appointed governor of Diyarbakr, in Radjab, 1072 (began April 20, 1662) Grand Admiral (*Kapudan-i Derya*), in Ramaḍān, 1073 (began March 9, 1663) *Rikāb Kāimmaḳāmi* (deputy for the Grand Vizier *a latere*) and two years later dismissed from the office of Grand Admiral; in 1672 he was *Kā'immaḳām* at Adrianople (d'Arvicux, *o.c.*, Knolles-Ricaud, *o.c.*, ii. 263, 277). In 1086 (began March 28, 1675) he was betrothed to the Sulṭān's daughter Kučuk Sulṭāne. In Sha'bān, 1087 (began Oct. 9, 1676) he was appointed Grand Vizier. His policy as Grand Vizier was that of his great predecessors and may be summed up in the one word, war: — war, for the sake of domestic peace, war, to please the Sulṭān, war, for the glory of the Ottoman Empire, and more particularly for his own prestige. Ambition and avarice are said to have been the motives of his actions (cf. Barozzi, *op. cit.*, ii. 207; Rycaut, *The Present State of the Ottoman Empire*, p. 89 sq.) and contemporary western chroniclers generally describe him as unjust, cruel and avaricious (cf. Barozzi, *op. cit.*, ii. 207: *venale, crudele ed ingiusto*). In his boundless ambition and avarice he allowed himself to be tempted in the late summer and autumn of 1683 to a campaign against Austria and the siege of Vienna, although he had no ability as a general. He had already conducted an unsuccessful war against Russia in the spring of 1677 and had been forced to consent to an armistice (at Radzin on Feb. 11, 1681) disadvantageous to the Porte and the campaign which he began in 1683 against the Emperor Leopold V brought about his ruin. After he had given Tokóly, the chief rebel in Hungary, the Hungarian crown, he advanced into Austria laying the country waste as he went along. On July 14, he began the siege of Vienna with 200,000 men; the city was heroically defended by Count Starhemberg with 10,000 men. The city was near its fall when the German-Polish army of relief appeared and on Sept. 12, 1683, completely defeated the arrogant foe. Muştafā Paşa escaped with the remnants of his force to Hungary. On Dec. 25, 1683, he was executed by the Sulṭān's orders. His body was buried in Belgrade in the mosque erected by him before setting out for Vienna and his skull brought to Adrianople to Sulṭān Mehmed IV and buried in the mosque of Saridja Paşa (epitaph in J. v. Hammer, *Gesch. d. Osm. Reiches*, vol. ix., p. xxxiv.). The statement, made by J. v. Hammer, *Gesch.*, vi. 519 and 740 and in *Wiens erste aufgehobene türkische Belagerung*, Vienna 1829, p. 119 sqq., supported with documents of Cardinal Leopold von Collovič (of Sept. 17, 1696) and adopted by V. v. Renner, *Wien im Jahre 1683*, Vienna 1883, p. 465, that the Turk's skull preserved in the armory of the Historical Museum of the City of Vienna, the former arsenal, is Kara Muştafā's is wrong. The question of the talismanic shirt ('*abā*') also preserved there and of the skein of silk is more uncertain. Cf. A. Camcsina in the *Berichte und Mitteilungen des Altertumsvereines zu Wien*, viii., Vienna 1865, Appendix, p. xlix. sqq. and also J. v. Karabaček in the *Katalog der Historischen Ausstellung der Stadt Wien 1883*, Vienna 1883, N^o. 541. —

Kara Muştafā Pasha was exceedingly rich and left a vast estate. According to Sieur A. de la Motraye (*op. cit.*, p. 349), he possessed over 1500 odalisques, the same number of slave-girls, 600—700 black eunuchs and fabulous treasures, all of which passed to the state. He is said to have left 12,000,000 ducats (cf. Franz Wagner, *Historia Leopoldi Magni*, Augsburg 1719, i. 631). Besides several madrasas (cf. J. v. Hammer, *Gesch.*, ix. 158, No. 188, 189) he founded a number of mosques, — in Stambul, at Galata, at Adrianople, Belgrade, Djidda and in his native place. His palace (Tirnakdji Yalısı at Kuru Çeshme near Constantinople) was sumptuously furnished (cf. J. v. Hammer, *Gesch.*, vii. 362); his splendid tomb in Stambul was destroyed by the mob (Barozzi, *op. cit.*, p. 334). His son was Kaimak Muştafā Pasha; on his descendants see *Sidjill-i 'Othmānī*, iv. 402, 5 sq. from below. A sister was married to Kaplan Pasha (d. 1091 = 1680 at Smyrna; Magni, *Viaggi per la Turchia*, Parma 1679, p. 488). — Kara Muştafā Pasha has been repeatedly made the hero of dramas and romances; cf., for example, *Cara Mustapha Grand Vésir*, *Histoire contenant son élévation, ses amours dans le sérail, ses divers emplois, le vrai sujet qui lui a fait entreprendre le siège de Vienne et les particularités de sa mort*, Paris 1684, 12°, and Pierre Martino, *L'Orient dans la littérature française au XVII^e et au XVIII^e siècle*, Paris 1906.

KARAPAPAKH ("Black-caps", so called from their head-dress of black lamb-skin), a Turkish people formerly living on the river Borčala or Debeda in the eastern part of the gouvernement of Tiflis, who migrated about 1828 partly to Turkish territory (to the vicinity of Kars) and partly to Persian territory (district of Suldüz, south of Lake Urmia). In the district of Kars they form about 15% of the population; about 1883 they numbered 21,652 of whom 11,721 were Sunnis and 9,931 Shi'is (K. Sadovsky, *Kavkazskaya zamiatka o Karskoj oblasti in the Sbor. Mater. etc. Kavkaza*, iii. 315—350); about 1893, 28,366 (N. Aristow, *Zamietki ob etničeskom sostave tyurkskikh plemen etc.*, St. Petersburg 1897, p. 139 sq., quoting *Prav. Vestnik*, 1896, No. 74; according to the census of 1897, 29,879. In the "Caucasus Calendar" (*Kavkazskiy Kalendar'*) for 1910, 99 villages of the territory of Kars are given as inhabited by the Karapapakhs, of which 63 are in the district of Kars, 29 in that of Ardahan (Russ. Ardagan) and 7 in that of Kagizman; the number of the Karapapakhs is given as 39,000 (*ibid.*, p. 546, article by A. Dirr).

A small village of Karapapakhs, inhabited by Tatars, is also mentioned in the gouvernement of Yelisawetpol, in the district of Kazakh (which bounds on the gouvernement of Tiflis). On the Karapapakhs in the district of Suldüz cf. C. Ritter, *Erdkunde*, ix. 939, 1018 and 1032, following Fraser and Rawlinson (up to 1838), and more recently V. Minois (member of the Commission for the Rectification of the Turco-Persian frontier, 1911—1914) in *Materiali po izučeniju Vostoka*, vfp. 2, Petrograd 1915 (see Index).

These Karapapakhs, who are all Shi'is, were at one time in Russian service and still preserve the certificates given to their ancestors by Russian generals in recognition of their services. After their transfer (it is said there were only 800 families under the leadership of Mahdi Khān affected) to Persian service the district of Suldüz was allotted to them as *tiyūl* (fief) by 'Abbās Mirzā [q. v., i. 13] in return for which they were to furnish 400 horsemen. As landowners the chiefs (Khān, Aghā) of the Karapapakhs attained considerable prosperity under Persian rule. After the occupation of the district by the Turks (1905) their situation became much less pleasant, because the Turkish authorities favoured the peasants at the expense of the landowners. In a petition sent on Rādjab 15, 1329 (July 12, 1911) to the Russian and English delegates of the commission, the Karapapakhs expressed the wish that Persian rule should be restored to their land or that they should be given the opportunity of migrating to the interior of Persia. Suldüz was thereupon adjudicated to Persia (protocol of Nov. 4/17, 1913). The Turkish troops had already been withdrawn during the Balkan war (1912). How the situation has developed since the world-war I do not know. (W. BARTHOLD)

KARASĪ, 1) the name of the founder of a Turkoman dynasty in Asia Minor in the viith century A. H. (thirteenth A. D.), the dynasty which was the first to succumb to the Ottomans; 2) the name of the territory ruled by this dynasty, now a sandjak of Turkey.

1. Karasī is said to be a contraction of *Kara* 'Tsa or *Kara Ese*, the name of a Turkoman chief, a vassal of the Saldjūkh Sultān Ghiyāth al-Dīn Mas'ūd, who conquered the province of Mysia for him from the Byzantines in the reign of Andronikos II Palaiologos (Ducas, p. 13). The name of the father of Karasī is also given by the Byzantine historians (Nicephoros Gregoras, i. 214) as Καλάμης, which Mordtmann identifies with the Λαμίσης or Λαμίνσης of Pachymeres (ii. 316, 339), which name perhaps conceals 'Ālamshāh or Kalamshāh (cf. Ibn Battūta, ii. 281).

Although Karasī did not conquer the whole of Mysia at once (Edremid and Assos remained Greek down to the xivth century) he must have had considerable power not least on account of the fleet which he created and with which he conducted raids on Rumelia. His territory became a refuge for the inhabitants of Eastern Anatolia, fleeing before the Mongols, as well as for the Turks when they were driven back after conquering the Dobruča under Šary Sältyk Ghāzi [q. v.]. How long Karasī reigned is not known. About 1330 we find two other rulers in the land, namely Yakhshi Khān in Bergama and Demir Khān in Balikesri. They are mentioned by Ibn Battūta (ii. 316, 317) and in the *Masālik al-Abšār* (Notes et Extraits, xiii. 339, 366; the

مرحان mentioned on p. 339 is probably a corruption for Demir Khān), with which authorities the Byzantine writers agree, except that they (Kantacuzenos, i. 339) make Γαζή the father of Ταμυρχάνης, while the *Masālik al-Abšār* makes the two brothers and sons of Karasī.

The account given by the Ottoman historians, who all follow 'Ashikpāshāzāde (p. 43—45 of the Stambul edition of 1332), is different. They only deal with the dynasty in connection with the annexation of its land by Orkhān. According to them, Ili 'Adjlān Beg ruled in Karasī and maintained friendly relations with Orkhān; he even sent his youngest son Tursun to be educated at Orkhān's court. After 'Adjlān's death his eldest son (whose name the chroniclers do not give) succeeded him. He made himself so hated by his subjects that his vizier Hādjdji Ilbeki went to Orkhān to seek help against the tyrant. The younger brother Tursun thereupon promised Orkhān the towns of Bergama, Balikesri and Edremid, if he would in return leave him in possession of Kizildja Tüzla and Maḥram (Assos). In keeping with this agreement Orkhān conquered from the Greeks Ulubād (Lopadion) and several other fortresses which still lay as Greek enclaves between the Ottoman lands and Karasī. He then advanced on Balikesri whence 'Adjlān's son fled to Bergama. At Orkhān's instigation, negotiations for peace were opened between the two brothers; Tursun, however, was killed by his brother on the walls of Bergama during the discussion of terms. The latter was then completely overthrown by Orkhān. He had also to leave Bergama and died two years later in Brusa of the plague. Hādjdji Ilbeki was given the administration of Karasī Ili and the Timariots were left in their fiefs. These events are put by the Ottoman historians to 735 or 737 (1434 or 1436).

If we compare this with the statements first given, we could equate the elder son of 'Adjlān with Ibn Battūta's Demir Khān (as Ahmad Tawḥīd does); for the latter traveller gives a very

unfavourable account of Demir Khān. Yakhshi Khān would then be the same as 'Adjlān; Ibn Battūta himself says that Yakhshi Khān only means the "good Khān" (ii. 316) so that his real name might have been 'Adjlān. It is more important that, as Mordtmann makes probable, the Karasī dynasty existed somewhat longer than the Ottomans say. The Byzantines as late as 1343 still mention a Sulaimān, a descendant of Karasī (Nik. Greg., p. 741; Kantacuzenos, ii. 476, 507), who was married to a daughter of Ventatzes. This is in keeping with the fact that in Orkhān's letter of Muharram 1, 741 (June 27, 1340) in which he tells the prince of Djanik of the conquest of Ulubād nothing is said about the land of Karasī (Feridūn, *Münshā'at*, i. 76). Mordtmann therefore supposes that the country did not finally pass to the Ottomans till a few years later (about 1345) and that the chroniclers have mixed up two events. In any case the Karasī-oghlu dynasty did not arise again later under Timūr, as was the case with most other Turkoman dynasties.

There are neither inscriptions nor coins of the Karasī princes; a small mosque at Balikesri is presumably of the pre-Ottoman period.

With the conquest of Karasī Ili a number of able statesmen and soldiers passed into the Ottoman service, such as Ādja Khalil, who had led the Muhādjdjirs out of the Dobruča, Hādjdji Ilbeki already mentioned, Faḍil Beg and the celebrated Ghāzi Ewrenos Beg [q. v.].

The lands ruled by the Karasī Oghlu are given in detail by Münedjdjim Bashī, iii. 36.

2. The sandjak of Karasī belongs to the wilāyet of Khudāwendigyar; towards the end of last century it formed for a short time a separate wilāyet along with the sandjak of Bighā [q. v.].

Karasī coincides with the ancient Mysia. The rivers Simaw and Şu Sighirli divide the land into a western and eastern half. The eastern half is very inaccessible owing to the irregular form of its thickly wooded mountains and it has no towns of any size; the mountainous centre of the west, also thickly wooded, gives place to flat country as it approaches the coast. The most populous and easily accessible parts are in the region along the railway from Banderma to Smyrna; the capital Balakesri [q. v.] is here. In the south-west is

Bergama [q. v.] the most important town; in this region besides the citadel-crowned rock of Pergamon we have several isolated hills (the Kazağ Dagħ in the north and the Kara Dagħ in the west). The Pergamene plain is very fertile and thickly populated; besides the Turks there are many immigrant Greeks and Muḥādīr settlers and Yürüks. The Greek element greatly preponderates in the little towns on the coast, especially in Edremid. The Muslim element increases as we go eastwards, but the Greeks in the interior speak Turkish. According to Sāmī, the total number of inhabitants of the sandjağ is 340,000, of whom half are Turks.

Karast comprises the following qaḍā's: Balakesir, Aiwaliğ, Kemer Edremid, Edremid Erdek, Banderma, Kūnān, Bighadiē and Sandirğī. The exports of the sandjağ are considerable owing to the fertility of its soil, its wealth in minerals and its cattle-rearing; according to Sāmī, the exports are six times the value of the imports.

(J. H. KRAMERS)

AL-KAṢASTŪN (KAṢISTŪN), means the steel-yard or Roman balance, while the common balance is usually called *al-mizān* (for other names in place of *kaṣastŪn* see below). The general observations that follow here apply to both kinds of balances.

In the systematisation of the sciences a science of weights, balances, etc. is included, for example by al-Fārābī in his *Ḥşā' al-'Ulūm* and by Ibn Sīnā in the *Risāla fī Aḵṣāṣ al-'Ulūm al-'aqliya*. Ḥādīdī Khalifa says (i. 493) that there are works, both short and long, on this subject but unfortunately he gives no titles. The references in the *Iḥwān al-Safā'* should be compared (Bombay ed., 1/ii. 118; Dieterici, *Logik*, p. 55). In the *Iḥwān al-Safā'* it is said that every science and art has a "balance" with which to measure; astronomy the astrolabe, geometry the straight line, circle and angle. At the same time a magnitude with which one measures is called a "balance", for example in mensuration the ell, rope, etc. In the science of the weighing-machine that of centres of gravity (*Marākiz al-thiqāl*) has also to be considered, as al-Akfānī specially mentions (*Beitr.*, iv. 105).

The balances used in ancient and mediaeval times were all steel-yards and consist of a beam (*'amūd*, in al-Djawbari also *kaṣaba*) turning on a horizontal fulcrum (*niḥwar*), a lever the centre of gravity of which is below the fulcrum. On the one arm of the beam is hung the article to be weighed and on the other the weights which are to weigh it, usually in scales. The arms may or may not be of equal length; we have equal armed and unequal armed balances accordingly. In standards with arms of equal length, in which to ensure accuracy in weighing a movable running weight (*rummāna*) is used, we have a combination of the two forms. The points, to which the running weight is moved and which are often marked with numerals, are called *arḳām*, *markaz*, *nuḳra*, *sha'ira*.

When the beam is horizontal, the balance is known to be in equilibrium. This may be seen approximately with the unaided eye. Sometimes

an equilateral triangle is placed below in the centre of the beam, the altitude *h* of which is marked; from the centre of the beam hangs a pointer (*shāḳūl*); if the pointer coincides with the line *h*, the beam is horizontal. Sometimes, as in our balances, a scissors-shaped fork (*ḡayārān*) is used above the balance and one watches when the tongue (*lisān*) standing up in the middle of the beam lies between the arms of the fork; or sometimes a pointer is attached to the fork above pointing downwards and one watches when the end of this pointer is exactly opposite the tongue below. Finally the tongue may be placed below and the fork hung downwards, turning on the fulcrum of the balance. If there is not equilibrium the tongue falls outside the fork which is always perpendicular. Of technical expressions we might further mention *al-waṣn*, the weight as measure of heaviness (*al-thiqāl*) and lightness (*al-khaffa*), the scale (*al-kaffa*), the threads to which the scales are attached (*al-khaif*), the hook on which the scales or the weights are hung (*al-'aḳraḅ*), the arrangement for suspension (*al-'ilāka*).

Almost the only weights used in scientific works are the *dirham* and the *mithḳāl* (1 *mithḳāl* = 10 *dirham* and one *mithḳāl* = 4—4.5 grammes). The absolute value is usually of no importance in the cases we are concerned with, as it is only a question of relations of the weights. Further, 1 *mithḳāl* = 6 *dānaḳ* = 24 *tassūḡi* = 96 *arḡā*. The normal weight, the standard, with which the other weights are to be compared, is called *sandj* or *sandja*. Weights etc. have been discussed and studied by H. Sauvaire (see the *Bibl.*).

In the theoretical discussion of the balance the first point to be considered is the definition of heavy and light body, the establishment of the centre of gravity, that of stable and unstable equilibrium, which is given by the relative positions of centre of gravity and centre of balance, the investigation of the question if it matters whether the weights are attached directly to the beam or to rods attached to it which are perpendicular or inclining to it.

By a fortunate chance there has been preserved to us the very important work "The Balance of Wisdom", *Mizān al-Hikma*, by Abū Maṣṣūr Abū 'l-Faḥ 'Abd al-Raḥmān al-Khāzini (c. 1100 A.D.). That he was really the author is certain from a passage in al-Baihaḳī (see *Beitr.*, xx. 73). All the above questions as well as the theory of the definition of specific gravities and some special applications of the balance for measuring time and for levelling are fully discussed by him.

In the general part he carefully considers the achievements of earlier workers in this field, for example the classical writers like Archimedes, Aristotle, Euclid, Menelaus and Pappus. He used the pseudepigraphic work of Aristotle — without, however, mentioning his name —, the *μυχανικὰ προβλήματα* (cf. Th. Ibel, *op. cit.*, p. 123). M. Steinschneider's statement that there is a translation of the work in the British Museum is wrong, as Mr. E. Edwards informs me. The work is, however, mentioned among those of Aristotle by Ibn al-Kifī, p. 43, 19. Among Muslim writers Thābit b. Qurra, Ibn al-Haiṭham and Abū Sahl al-Kāhī were specially used by al-Khāzini. He also deals with a series of balances which have been made by different students (see below). For specific gravities he relied mainly on al-Birūnī's work *Maḳāla fī*

'*l-Nisab allatī baina al-filazzūt wa 'l-Djarwāhir fi 'l-Haḍim*, on the relation between metals and jewels as regards volume.

A popular discussion of the theoretical considerations involved would take us too far and would have only subordinate interest for Orientalists (cf. the works by Th. Ibel and E. Wiedemann, mentioned below).

The steelyard or Roman balance (*al-ḡarastūn*) is a lever with two arms of unequal length, the centre of gravity of which lies below the centrum of balance. The object to be weighed G_1 , is placed on the shorter arm at a distance l_1 from the fulcrum, the travelling poise G_2 (*al-rummāna*) is movable along the longer arm. If equilibrium exists at a distance l_2 , $G_1 l_1 = G_2 l_2$ or $G_1 : G_2 = l_2 : l_1$, i. e. the weights G_1 and G_2 are at equilibrium in inverse proportion to the distance $l_1 : l_2$ (see further below). This principle of the lever is used by different writers as an example of inverse proportion (*takāfūf*). The principle seems to be first laid down by Archimedes (*Opera omnia*, ed. Heiberg, ii. 152); Arabic references are to be found in Aḥmad b. Yūsuf Abū Dja'far al-Miṣrī's work (about 850; Suter, N^o. 78) on proportion and relationship (*Fi 'l-Nisba wa 'l-Tanāsib*), in an anonymous work in Gotha, N^o. 1158, 12, in the *Iḡlūwān al-Safā* (E. Wiedemann in the *Beitr.*, lviii.), al-Khāzinī (do. in the *Beiträge*, xlviii.). But the *ḡarastūn* is also used as an example for direct proportion in which the greater the weight the greater the distance of the running poise from the fulcrum; so, for example, in al-Miṣrī.

The steelyard is usually called *al-ḡarastūn*. A form frequently occurring, due to a slip in writing, is *al-farastūn* (on *ḡarastūn* cf., for the rest, Dozy, *Supplément*, ii. 327). The origin of the word has been much discussed. According to P. Duham, who is followed by H. Diels, with better grounds, *ḡarastūn* is the Greek *χαριστήριον* which name Simplicius gives to the *σταθμιστικὸν ὄργανον* of Archimedes and which means the beam of the balance, and received this name from its inventor Charistion. Cf. H. Buchner, *op. cit.*, and E. Wiedemann, in the *Beitr.*, lxiv. 218 at the end.

Instead of *al-ḡarastūn* the word *ḡabbān* or *ḡaffān* is frequently used and at the most different periods. The word comes from the Persian *ḡappān* and perhaps from the Latin *campana* (steelyard). In Egypt a man who has to do with the steelyard is called *ḡabbānī*; there was *al-Diwān al-ḡabbānī* at which contracts to purchase were concluded. The usual pound was called *al-raṭl al-ḡabbānī*. In his *Fikḥ al-Luḡa* (Bairut 1885, p. 318) al-Tha'ālabi gives the word among those taken over from the Greek and equates *al-ḡarastūn* to *al-ḡabbān* and *al-ḡustās = al-mizān*. (On the etymology of various words for scales and weights cf. S. Fränkel, *Die aramäischen Lehnworte im Arabischen*, Leiden 1886, p. 198). According to Prüfer (information by letter) our modern steelyards are now called *al-mizān al-maskūbī* ("the Russian balance") in Egypt.

Al-Djāhiz mentions the *ḡarastūn* among the things which the Muslims had received from the Greeks (*Kitāb al-Hayawān*, Cairo 1323, i. 41); he further talks of the *ḡarastūn* as a means to keep 300 *raṭl* in equilibrium with 30 *raṭl* (*Kitāb al-Tarḡīf wa 'l-Tadwīr*), "work on the quadrilateral and round figure", ed. van Vloten, p. 114.

As the two arms of the beam were of different lengths the superior weight of the longer had to be balanced either by a suitable form of the beam or by a special weight attached to the shorter arm. Thābit b. Qurra's work on the *ḡarastūn*, which is preserved in Arabic and in Latin translations (cf. Buchner, *op. cit.*), is devoted to this problem.

To increase the steelyard's capacity for weighing, several large running-weights are used (see fig. 1); but attachments can also be fixed to the shorter arm of the lever at two distances from the fulcrum, but in this case compensatory weights must be used. If the spaces are in the relation of 1:2, the weights of the articles on it are as 2:1, when the position of the running poise is the same; two divisions are marked on the longer arm. It is the same when different running-weights are used; a corresponding number of these divisions is called *bāb*.

In order to be able to weigh the *dirham* and the *mithḡāl* with the same divisions, 'Omar al-Khāyāmī puts the scale for the *dirham* (silver) at a greater distance from the fulcrum than for the *mithḡāl* (gold). If the lever is in equilibrium for the *dirham*, a compensatory weight (*mu'yār al-ta'ḍīl*) must be added to the shorter arm for the *mithḡāl*.

The beam of the balance may also have divisions marked on the upper and on the lower side and be so arranged that either side may be turned upwards, so that one can weigh with two quite different systems of weights.

In many steelyards, for example those in use in Egypt at the present day, the scale hangs on to the *luḡma* (the "bit"), a piece of metal shaped like . The running poise is a cylinder of brass the interior (*kalb*) of which is filled with lead. Attached to it is the hook; the pointed part that moves along the divisions is called *mirāya* (index). The whole apparatus, about five feet long, rests on a wooden support, *ḡalālīsh*; the rod itself is called *badan*.

In the work by Eliyā (mentioned below) methods are given for ascertaining and correcting errors. These may arise from the balance and its attachments having false weights, from the poise being wrong, the beam bent or crooked or the divisions being wrongly marked.

Al-Khāzinī gives two pictures of older standards, one of the generally known (*mashḡūr*) *ḡabbān* (fig. 2) and another (fig. 1) of the *ḡustās al-mustaḡim* of the great mathematician 'Omar b. Ibrahīm al-Khāyāmī, author of the celebrated quatrains. The illustration shows the different divisions, the running poises, the different places for the attachments and the marginal notes of the text.

A place in Fez was called *al-Ḳarastūn*, probably because a *ḡarastūn* was placed there (see Dozy, *op. cit.*, s. v.).

The following are Arabic works on weights and balances besides those of al-Khāzinī:

Treatises of Euclid on the balance (*mizān*), ed. Wöpcke in the *J. A.*, Ser. iv., vol. xviii (1851), p. 27. According to Wöpcke, it comes from the Banū Mūsā, according to M. Curtze and L. Heiberg from Euclid (cf. Th. Ibel, p. 35). The work ascribed to Euclid on "Light and Heavy" is preserved in Arabic and often mentioned.

Works with the title "On the *ḡarastūn*" were written by the Banū Mūsā (about 950), Thābit b. Qurra (826—901), Ḳusṭā b. Lūḡā (864—923) and Ibn al-Haiṭham (965—1036).

Important information on balances, especially the *karastün*, is also contained in the work on masses and weights by Eliyā bar Shinnāyā (975 to a year later than 1049), Archbishop of Nisibis, which is perhaps based on a work by Kuṣṭā b. Lūḳā, *Kitāb fi 'l-Awzān wa 'l-Makāyil*. Part of it was dealt with by H. Sauvaire in the *J. R. A. S.*, 1877, vol. ix. 291, and 1880, vol. xii. 110; much information is also contained in the work by Ḥasan b. Ibrāhīm al-Djabartī (1698—1774) entitled: *al-'Ikd al-thamin simā yata'allaku bi 'l-Mawāzin*, or as it is also called: *al-Durr (al-'Ikd) al-thamin fi 'l-ilm al-Mawāzin*.

According to his son 'Abd al-Raḥīm al-Djabartī, weighing machines in Egypt etc. had fallen into great confusion about 1758, which was

completely cleared up by his father, who may therefore be regarded as the reformer of Egypt in this respect. In the composition of this work he was assisted by the Shaikh al-Kabbān, 'Alī b. Khalīl.

Other authors and their works are:

Abu 'l-Abbās Naḍīm al-Dīn al-Khazardjī (1247—1310), *al-Idāh wa 'l-Tibhān fi Ma'rifa al-Mikyāl wa 'l-Mizān*, "science of mass and weights"; Ibn Abi 'l-Faṭḥ al-Ṣūfī al-Miṣrī (about 1494): Two treatises on the steelyard (*Risālat al-Kabbān*). A number of MSS. on the subject in the Viceregal (now Egyptian) library in Cairo is given by H. Suter in his translation of the math.-astron. part of the catalogue in the *Zeitschr. für Mathematik und Physik., hist.-litter. Abteil.*, year xxxviii.

Fig. 2.

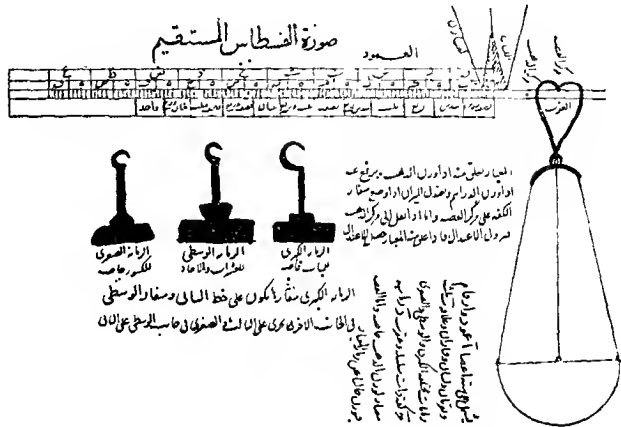

Fig. 1.

Above the beam of the balance is written *al-Amūd*, to the right of it *al-fayārān*, markaz (mark) for gold, for silver. Below are the hook (*al-akrab*). Below the weights is written: the large, middle and small *rummāna* (running poises) for the hundreds, tens and units, for the fractions. Partly below again is information relating in part to the separate running poises. Above on the left of the scale instructions are given for putting on the running poises. Above this the six parts of the balance are given: 1) the beam with the indicator etc.; 2—4) the three *rummāna*'s etc; 5) the scale etc.; 6) the compensatory weight. The illustration is taken from "The Balance of Wisdom".

(1893): Ya'ish b. Ibrāhīm b. Yūsuf b. Yatmāk al-Amawī al-Andalusī etc.

Bibliography: As the steelyard (*al-karastün*) and the common balance (*al-mizān*) are very often treated together in the same works, I give the whole literature here together. Very full references are also given in the works of Buchner, Ibel, Bauerreiss and Wiedemann: N. v. Khanikoff, *Analysis and extracts of the Book of the Balance of Wisdom written by al-Khazini* in the *J. A. O. S.*, vi. (1859), 1—123; H. Sauvaire, *On a Treatise on Weights and Measures by Eliā, Archbishop of Nisibis* in the *J. R. A. S.*, x. (1878), p. 253—284 and xii. (1880), p. 110—125. Besides the imperfect manuscript in Paris used by Sauvaire there is a complete one in Gotha, N^o. 1331; P. Duhem, *Les origines de la statique*, part i., Paris 1900; Th. Ibel, *Die Wage im Altertum und Mittelalter* (Dissertation, Erlangen 1906); E. Wiedemann, *Die Schrift über den Karastün in the Bibl. Math.*, third series, vol. xii. (1912), p. 21—39;

H. Bauerreiss, *Zur Geschichte der spezifischen Gewichte im Altertum und Mittelalter* (Dissertation, Erlangen 1914); E. Buchner, *Die Schrift über den Karastün von Thābit b. Qurra*, in the *Sitzungsber. der med.-phys. Sozietät Erlangen*, part lii. sq. (1920/21), p. 141—188; Carra de Vaux, *Notes de l'histoire des sciences* in the *J. A.*, 1917, series II, vol. x. 453.

In the following, the works of E. Wiedemann are collected from the *Beiträgen (B.) zur Geschichte der Naturwissenschaften* in the *Sitzungsberichte der med.-phys. Sozietät (S.B.) zu Erlangen*. When the whole part deals with the subject only its number is given. 1) *Wagen bei den Arabern (gefälschte)*: B., iv., S.B., xxvii. 388—392; 2) *Über die Lehre von Schwerpunkten*: B., v., S.B., xxxvii. 405 and 427; 3) *Zur Mechanik bei den Arabern*: B., vi., S.B., xxviii. 7—10; 4) *Auszüge aus der Schrift des Archimedes über die schwimmenden Körper*: B., vii., S.B., xxviii. 152—162; *Über al-Fārābī's Aufzählung der Wissenschaften*: B., xi., S.B., xxxix.

96; 6) *Lehre vom Schwimmen, Hebelgesetze, Konstruktion des Karastün*: B., xvi., S. B., xl. 133—159; 7) *Über Verfälschung von Drogen usw. nach Ibn Bassām und al-Nabarāwī* (only section iii. need be consulted: references in al-Nabarāwī and Ibn Bassām on balances, weights and measures), B., xl., S. B., 201—206; 8) *Über die Wage des Wechselns von al-Khāzinī und über die Lehre von den Proportionen von al-Birūnī*: B., xlviii., S. B., xlviii. 1—15.

Among the metrological works are: H. Sauvaire, *Matériaux pour servir à l'histoire de la numismatique et de la métrologie des musulmans* . . . part 2: *Poids*, in the *J. A.*, series 8, vol. iii. 368—445; iv. 270—321; v. 498—506; part 8: *Mesures de la capacité*, ib., vol. vii. 124—177, 394—468; viii. 272—297. Part 4: *Mesures de longueur et de surface*: viii. 479—536; *Mesures de capacité et de poids dans les ouvrages de médecine arabe*, vi. 80; J. A. Decourdemanche, *Étude métrologique et numismatique sur les poids et les dirhams arabes*, Paris 1906, and *Traité pratique des poids et mesures des peuples anciens et des Arabes*, Paris 1909.

The following works deal particularly with specific gravities etc.: Clément Mullet, *Essais sur la minéralogie arabe. Tableau des densités des pierres précieuses* in the *J. A.*, series 6, vol. xi. (1888), p. 250—253; E. Wiedemann, 1) *Zu al-Birūnī's Schrift: Ueber das Verhältnis, das zwischen den Metallen und den Edelsteinen im Volumen besteht*, B., viii., S. B., xxxviii. 163—166; 2) *Bestimmung der spezifischen Gewichte*, B., viii., S. B., xxxvi. 166—180; a) Abū Maṣṣūr al-Nairīzī (not the commentator on Euclid): *Bestimmung der Zusammensetzung gemischter Körper*; b) Notes by 'Omar al-Khayyāmī: *Bestimmung des Gehaltes von Legierungen zweier Metalle an diesen*; c) An essay on specific gravities ascribed to Plato; 3) *Bestimmung der Zusammensetzung von Legierungen nach al-Khāzinī* (contains a collection of the passages publ. down to 1908 from al-Khāzinī's work, B., xv., S. B., lx. 105—159; 4) *Verbreitung der Bestimmungen der spezifischen Gewichte nach al-Birūnī*, B., xxxvi., S. B., xlv. 33—34; 5) *Ueber die Gewichte der Kubikelle u. s. w. verschiedener Substanzen nach arabischen Schriftstellern*, B., xxxiv., S. B., xlv. 168—173; 6) *Ueber das al-Birūnische Gefäß zur spez. Gewichtsbestimmung in der Verhändl. der deutschen Physik. Gesellschaft*, x. 339—343.

(E. WIEDEMANN)

KARASU. [See AL-FURĀT].

KARASU-BĀZĀR, a small town in the Crimea, east of Simferopol, in 45° 10' N. Lat. and 34° 36' E. Long. of Greenwich. In 1736 after the destruction of Bāghṭe Sarāy [q. v.] by the Russians, Karasu-Bāzār was for a short time the residence of the Khān; but this town was also taken by the Russians under General Douglas in 1737. The town has preserved its oriental aspect down to the present day: there are many *khān's* there with warehouses and coffeehouses. The large Tāsh Khān, said to have been built as a fortress in the seventeenth century, now serves the same purpose. The town was several times pillaged by the Don Cossacks in the seventeenth century. Cf. Veliāminof Zernof, *Matériaux pour servir à l'histoire du Khanat de Crimée*, St. Petersburg 1864, Index.

(W. BARTHOLD)

KARATEGİN, a district on the Wakhsh or Surkhāb (Turk. Kızıl Sū), one of the rivers which form the Amū Daryā, called Rāshī by the Arab geographers [cf. i. 339]. The principal place (or "the fortress", *al-Kal'a*, al-Iṣṭakhī, p. 340) of Rāshī corresponded as regards its situation perfectly with the modern Garm, the only town in Karategin. Rāshī then formed one of the frontier lands of Islām and was defended on the east against the inroads of the Turks by a wall built by Faḍl b. Barmak [on him cf. i. 665, ii. 37]. In ancient times there ran through this region the road from Western to Eastern Asia described by Ptolemy. Karategin is frequently connected with the "highlands of the Komeds" Κομηδῶν ὄρεσιν (e. g. as recently as Chavannes, *Documents sur les Turcs Occidentaux*, p. 164, on the authority of Sewertzow in the *Bull. de la Soc. de Géogr.*, part iii. for 1890, p. 420—431); but in the middle ages the name (Arabic Kumīdh or Kumādh, Chinese Kiu-mi-t'o) was borne by the country below Rāshī. In the middle ages and later the valley of the Wakhsh seems to have had no great importance for trade; as far as has been so far ascertained, only the embassy sent by Shāh Rukh to China (1419—22) used on its return journey the road between Farghāna and Balkh described by Ptolemy.

Like all the highlands on the upper course of the Amū Daryā Karategin also was under its own rulers down to quite modern times; in the pre-Mongol period only one Amīr of Rāshī, Dja'far b. Shāmānīkū (Gardīzi in Barthold, *Turkestan* etc., i. 9, under date 337 = 948/949) is mentioned. Under Timūr and later the name of the country Kayir Tegin (or Tigin) is found, in the printed edition of the *Zafar-nāma*, i. 189, erroneously Tīr Tegin; when and how the present form arose is unknown. In the manuscripts of the *Bābur-nāma* (ed. Beveridge, f. 33^b and f. 63^b Karātigin, f. 69^b and f. 81 Kayirtigin) and of the *Ta'rikh-i Rāshīdī* (transl. Ross, especially p. 241) both forms are found. Karategin is popularly explained as a Turkish word for "blackthorn" (cf. Radloff, *Wörterbuch*, ii. 135, Ottoman *Kara dikān*) or as the name of the two first Kirghiz tillers of the soil (I. Minayew, *Suyedeniya o stranakh po verkhoviyam Amu Daryi*, p. 241, following Arendarenko). As is narrated in the *Bahr al-Asrār* of Maḥmūd b. Walī (India Office MS., Éthé, *Cat.*, No. 575, f. 277^a, in Radjab, 1045 (Dec., 1635—Jan., 1636) 12,000 families of Kirghiz, then still pagans, went through Karategin to Hīsar. At the present day the Kirghiz (Kara Kirghiz) form a part of the population of Karategin along with the Tadjik (and a small number of Özbegs).

In the nineteenth century the princes of Karategin, like the princes of Badakhshān [cf. i. 552 sqq.], claimed descent from Alexander the Great. Karategin was then under the suzerainty of the Khāns of Khōkand; their subjection is said to have taken place under Muḥammad 'Alī Khān (1822—42) in 1250 (1834) (Nalivkin, *Kratkaya istoriya Kok. Khanstva*, p. 134 sq.); but already under 'Alīm Khān (beginning of the nineteenth century) we find men from Karategin forming a considerable part of the standing army founded by this Khān (*Ta'rikh-i Shāhrukhi*, ed. Pantusov, p. 42 sq.). A campaign from Khōkand against Karategin in 1275 (1858) under Malla Khān (1858—62) is also mentioned (Nalivkin, *op. cit.*, p. 190); the ruler of Karategin was at this time Muẓaffar Khān

(later also called Muẓaffar Shāh). When in the year 1869 Hīṣār had to submit to the Amīr of Bukhārā, Ķarategin also was occupied by the troops of the Amīr and Muẓaffar Khān taken as prisoner to Bukhārā; the conflict thus engendered between Bukhārā and Khōkand was only settled by the verdict of the Russian governor-general (K. v. Kaufmann) and Muẓaffar Khān again restored to his principality; but after his death Ķarategin was definitely incorporated in Bukhārā. Ķarategin also became involved in the last fighting in Farghāna before the final subjection of this country by the Russians (1874—1876); the Beg Muḥammad Raḥīm Shāh advanced to resist the insurgents with force, although they had been favoured by his brother Muẓaffar Shāh (apparently not identical with the prince already mentioned). The frontier between Farghāna and Ķarategin (on the heights east of the valley of Kičik Karamuk Su) was defined by a treaty concluded between Skobelew and another brother of the Beg, Šafī Khān on August 28 (Sept. 9), 1876.

It was not till 1878 that Ķarategin was for the first time visited by a European (W. Oshanin). In the following decade the governor Khudāi Nazar Atālik and his successor Alnās Beg had a mountain road, one of the best in Central Asia, built through Ķarategin on the right bank of the Wakḥsh, which made Ķarategin much more accessible, but in winter Ķarategin is completely cut off from neighbouring lands. Oshanin and later travellers describe Ķarategin as a fertile country with numerous villages and orchards, and as one of the most prosperous provinces in the kingdom of the Amīr of Bukhārā. It is said (Logofet, p. 322 sq.) that in Ķarategin all the inhabitants without exception make a living by agriculture (including gardening), and that there is no landless proletariat there; anyone who neglects his piece of land for three years loses any right to it. On the other hand Rickmers (p. 340) says that many peasants go from Ķarategin to Farghāna, work there as day-labourers and servants and bring their savings home, so that Russian money is taken more readily there than Bukhariān. The only town is Garm; as regards the number of inhabitants, estimates, as usual in the east, are very contradictory: according to Oshanin 2,300 houses, to Masalskiy 4,000 people, to Logofet 15,000. Information regarding administration, taxes, etc. is given in particular by A. Semenow (Journey of 1898). The question: "When will the White Czar (*pādishāh-i safīd*) take us to himself?" was frequently asked Semenow by the people embittered by the arbitrary conduct of the tax-collectors.

Bibliography: Down to 1878 the best authority is Abramow in the *Izv. Russkago Geograf. Obšč.*, vi. 108 sq. and Arendarenko in the *Vojennij Sbornik*, May 1878, p. 116 sq.; after him Minayew in the *Svyedeniya stranach* etc., p. 196 sq., 233 sq.; notes from Oshanin's journal in the *Izv. R. Geogr. Obšč.*, 1880—81; Kostenko, *Turkestankiy Kray*, ii. 197 sq.; also *Proc. R. Geogr. Soc.*, 1880, p. 575, quoted by W. Geiger, *Ostiranische Kultur*, p. 22. Later travellers: A. Semenow, *Etnograf. očerki Zarafshanskikh gor, Ķarategina i Darwaza*, Moscow 1903; D. Logofet, *V gorakh i na ravninakh Bucharī*, St. Petersburg 1913, p. 322 sq.; W. R. Rickmers, *The Duab of Turkestan*, Cam-

bridge 1913, p. 325 sq. (journey of 1906); cf. W. Masalskiy, *Turk. Kray*, p. 735 sq.

(W. BARTHOLD)

ĶARAUL (ĶARAVUL, ĶARAGHUL), an Eastern Turkī word meaning guardian, watcher, guard, sentinel (borrowed by the Russian in the last sense); a hunter who watches game from a distance; the chief of a body of these hunters is called *ķaraul-begi*. In Ottoman Turkish *ķaraķoi* means a police-station. The word is connected with the root *ķara-*, *ķarala-*, to observe, watch or guard. — At the present day in Bukhārā, the rank of *ķaraul-begi* corresponds to that of lieutenant (P. Kouznetsov, *Lutte des civilisations et des langues*, Paris 1912, p. 83).

In Persia the name *ķaraul-khāna* is given to the watch towers erected on the mountain tops, commanding the surrounding country (Chodzko, *Specimens of the Popular Poetry of Persia*, Or. Transl. Fund, p. 228, note).

Bibliography: Radloff, *Opyt*, ii. col. 146 and 165; Pavet de Courteille, *Dict. turk-oriental*, p. 398; Sulaimān Efendi, *Lughāt-i Dīaghātī*, p. 216; R. Youssouf, *Dict. turc-français*, s. v.; Barbier de Meynard, *Dict. turc-français*, s. v.; Mme Carla Serena, *Hommes et choses en Perse*, Paris 1883, p. 56.

(CL. HUART)

ĶARA YAZİDJİ, leader of a serious rebellion in Asia Minor from 1599 to 1602. His proper name was 'Abd al-Halīm and he was chief of the corporation of Segbāns (*Segbān bölük bashī*). His followers consisted of Kurds, Turkomans and a large body of soldiers who had fled from the army in Hungary, chiefly on account of the Grand Vizier Čiğhālā's harsh and cruel treatment of them. They are therefore called *Firāris*; another name is *Djalālīs*; their rebellion is known as the *Ķhūrūdj-i djalālīyān*. Ķara Yazıdjī's first act was the occupation of Ruhā or Urfa (= Edessa) in 1008 A. H. The former Beglerbeg of Abyssinia, Husein Paṣha, who had been sent as an inspector to Anatolia in the previous year and had also rebelled against the Sultān, took refuge with Yazıdjī on hearing that Sinān Paṣha Zāde Mehmed Paṣha had arrived at Konya in order to bring him to book. They sustained together a siege in Ruhā in which they were finally compelled to cast bullets from silver coins, but in the end Ķara Yazıdjī made terms with the government troops by handing over Husein Paṣha to them. The latter was sent to Constantinople and put cruelly to death. Ķara Yazıdjī was then appointed governor of Amasia. In this town he again began a reign of terror; as Ewliya Celebi tells (ed. Constantinople 1314, ii. 184), the inhabitants hid themselves and their possessions in the mountain caves. Mehmed Paṣha again succeeded in driving him into the mountains round Siwās and, after passing the winter in Diyār Bakr, marched a second time against him. But Maḥmūd Paṣha, Beglerbeg of Siwās, and other notables went to Constantinople and convinced the authorities that Ķara Yazıdjī had abandoned his evil ways. Accordingly the latter was given the sandjak of Čorum, on condition that he would swear fealty. But, with his brother Deli Hasan (in Na'imā, i. 128 the name is once written Husein) he continued his propaganda, so that Ibrahim Paṣha, former governor of Damascus, and Hasan Paṣha, former governor of Baghdād,

were sent against them; these two Pashas were utterly defeated at Kaşariye on the 11th of Shawwāl, 1008 (April 25, 1600) by 20,000 rebels. After this victory Kara Yazîdjî regarded himself as an independent sovereign over the regions which he had taken from the Ottoman power. Finally he was defeated on the 12th of Shawwāl, 1010 (April 5, 1602) by the vizier Hasan Sokolli, at Sepealii. The rebels fled to the mountains of Dîjānik; here Kara Yazîdjî died in Ramadān of the same year (according to *Sidjill-i 'Uthmāni*, Constantinople 1311, iii. 301 sqq., his death took place already in 1009). He was succeeded by his brother Deli Hasan and three chieftains called Shāhwerdi, Yular Kapdî and Tawil; his body was cut by them into several pieces which were buried in different spots in order that the 'Othmānî's might not have it in their power to burn the corpse. The new chiefs afterwards waged war successfully against the already mentioned Hasan Pasha, who was killed by them in Tokāt.

The inner history of this rebellion, which continued until its bloody suppression by Murād Pasha in 1605, has not yet been sufficiently studied. It does not seem unreasonable to seek religious pro-Shi'a motives behind it (cf. Babinger in the *Z. D. M. G.*, lxxvi. 143), as a name like Shāhwerdi suggests. On the other hand the moment was very favourable for a rebellion, the bulk of the 'Othmānî power being then occupied in Hungary at the siege of Kanîza. On the name Djalālî cf. Babinger, *Isl.*, xi. 14, note 3.

Bibliography: Nā'imā, *Tārīkh*, Constantinople 1147, i. 88 sqq., 120 sqq., 128, 152, who cites chiefly the chronicle of Hasan Bey Zāde; von Hammer, *Geschichte des Osmanischen Reiches*, iv. 271, 303 sqq. (J. H. KRAMERS)

KĀRĪ. [See KĪRĀ, KORĀN].

KĀRĪB, the name of a modern metre used by the Turks and Persians and called *al-munsarid* by the Arabs. Its measure is in each hemistich: *mafā'ilun, mafā'ilun, fā'ilāun*.

The principal variations are: *mafā'ilun* by *kabā* [q. v.], *mafā'ilu* by *kaff* [q. v.], *fā'ilāun* by *khān* [q. v.], *fā'ilāt* = *fā'ilān* by *kaṣr* [q. v.] and lastly *fā'ilā* (= *fā'ilun*) by *haddf* [q. v.].

In Persian, it should be added, *mafā'ilun* may become *fā'ilun* (= *mafā'lun*) by *kharm* [q. v.].

Bibliography: See the article ARŪD.

(MOH. BEN CHENEB)

KARIBĪYA. [See KURĀIBĪYA].

KARĪM, of persons: generous, benignant, liberal, honourable, noble, high-born; of things: bounteous, plenteous, honourable, noble, splendid. *Al-Karīm* is one of the ninety-nine attributes or "excellent names" (Sūra vii. 179) of God, but in the twenty-seven passages in which the word occurs in the Qur'ān it is only twice applied to Him. It is applied to Muḥammad, to an angel, and, ironically, to misbelievers, but it more frequently qualifies things, e. g. the recompense and provision awaiting the faithful, the Qur'ān, the letter sent to Bilkis, queen of Saba' [q. v.], the entry of the faithful into paradise, plants, cornfields, dwellings, the mode of addressing parents, etc. In Ḥadīth the term is often applied to Yūsuf, who is called *al-Karīm ibn al-Karīm* (al-Bukhārī, *Manāqib*, bāb 13; *Tafsīr*, Sūra 12, bāb 1). *Al-Karīmātān* denotes the eyes (Aḥmad b. Hanbal, *Musnad*, iii. 283).

Bibliography: The lexica, s. v.

(T. W. HAIG)

KARĪM KHĀN ZEND (MUḤAMMAD), a member of a family of no special distinction belonging to a tribe of the Lūr, was in reality king of Persia at the end of the xviiith century without having the title, as he always retained the surname of *Wakīl* (plenipotentiary), under which his name has remained popular. He was at first one of the lieutenants of the Bakhtiyārī general 'Alī Mardān Khān who, taking advantage of the anarchy that followed the assassination of Nādir Shāh Afshār, seized Iṣfahān and placed on the throne the last scion of the Ṣafawī dynasty, Shāh Ismā'il III, aged eight (1164 = 1757). The murder of 'Alī Mardān, the defeat of the governor of Ādharbaidjān and of Muḥammad Ḥusain Khān, lord of Māzandarān, gave him possession of the whole of western Irān. Attacked in Shīrāz by Muḥammad Hasan, son of Fath 'Alī Khān Qājār, who had just seized Iṣfahān, he saw the army of his adversary melt away; a year later, the Qājār prince was killed in a battle against Karīm Khān's lieutenants. Khorāsān, however, eluded Karīm Khān; this province remained in the hands of the blind Shāh Rūkh, a descendant of Nādir Shāh. Karīm's two generals were his two brothers Šādīk and Zakī of whom the latter afterwards made himself notorious for his cruelties. The former directed a campaign against the Ottomans: the town of Baṣra, besieged for 13 months (1189 = 1775), surrendered to the Persians and remained in their hands till the death of the Wakīl. He busied himself in restoring peace to the country and in developing agriculture and commerce; although not in any degree educated, he attracted scholars to his court and proclaimed himself their protector. His usual residence was Shīrāz which he adorned with a number of buildings still standing to-day (mosque, caravanserai and baths); the tomb of the poet Sa'dī was restored by his orders; the tomb of the poet Ḥāfiz in beautiful Tabriz marble on which were inscribed two odes by the celebrated poet; the *Heftten* (seven bodies) was consecrated to the memory of the pious dervishes who inhabited it; it is a pleasure house the interior of which is adorned with paintings of Biblical scenes or imaginary portraits of Sa'dī and Ḥāfiz; not far from it is the garden of the Wakīl, better known as the *Dīahānumā* (mirror of the world), the name given it by Fath 'Alī Shāh; the garden called Bāgh-i Dilgoshā (garden which rejoices the heart), now occupied by kitchen-gardens.

He died at the age of 74 on the 23rd of Šafar, 1193 (March 13, 1779) — the date corrected according to Olivier. After his death, Persia fell back into a state of anarchy from which it was only raised by the coming of the Qājār dynasty.

KARĪN means a companion of any kind (*muṣāḥib* in the *Ṣiḥḥ* and the *Lisān*, xvii. 214 sq.; *khidm* in al-Baiḍāwī on *Kurʾān*, xli 24); thus Abū Bakr and Ṭālḥa and Abū Bakr and ʿUmar are called "the two *Karīn*'s." It is plain, too, that for Muḥammad and pre-Muslim Arabia the word also suggested a spirit-companion. That is the overwhelming usage of the *Kurʾān*. In theology, every human being has, as a *karīn*, a *shaiṭān* and also an angel appointed to accompany him and, respectively, to tempt him to evil or to incite him to good (*Lisān*, loc. cit.). The *shaiṭān* is sometimes called a *ḡinnī* and will be cast into the Fire at the Judgment along with his human comrade whom he has led astray. These two *karīn*'s are therefore different from the recording angels which accompany each human being (*Kurʾān*, lxxxii. 10—12). The basis of this is both *Kurʾān* and *Ḥadīth*. The word occurs in the *Kurʾān* eight times; in *Kurʾān*, xxxvii. 49, a human companion is evidently meant (*ḡalis fi 'l-dunyā*, al-Baiḍāwī); in *Kurʾān*, iv. 42 (bis), the *shaiṭān* is a *karīn*; in *Kurʾān*, xli. 24, the plural *ḡuranā* is used, but the context and especially the word *ḡayyaḡa* (see al-Baiḍāwī on this) shows that tempting spirits are meant; closely parallel is *Kurʾān*, xliii. 35, 37, where a *shaiṭān* is "ordained" (*ḡayyaḡa*) by Allāh as a *karīn*; on *Kurʾān*, l. 22 al-Baiḍāwī is in doubt whether by *karīn* a *shaiṭān* or an angel is meant, but on v. 26 he is certain that it is a *shaiṭān*. In this he follows the oldest exegetical tradition on the whole subject given in al-Ṭabarī's *Tafsīr*, xxvi. 93 sq. Even the prophets have such a *shaiṭān*, but that of Muḥammad was converted by him to Islām; a great many traditions bearing on this are given in the *Aḡām al-mardīyān* of Muḥammad ʿAbdallāh al-Shiblī, bāb x., p. 26 sq. (ed. 1326). A very suggestive and full ethical-theological treatment of the whole subject is in the *Iḡyāʾ* of al-Ghazālī, *Kitāb ʿadḡāib al-ḡalib*, ed. with comm. *Iḡyāʾ al-sūla*, vii. 264 sq., where the traditions are given in detail; cf. D. B. Macdonald, *Religious Attitude in Islam*, p. 274 sq. At the other extreme is the folkloristic development in popular Islām; for it see S. M. Zwemer, *Influence of Animism on Islam*, chap. vi. Much of this, too, may easily have been in the mind of Muḥammad and his world.

Another use of *karīn* in old Arabia was for the *ḡinnī* who accompanied a poet and brought to him his verses. This use has been transferred in Islām to the angel who consorted with the Prophet and brought him his revelations (*Lisān*, loc. cit.; Goldziher, *Abhandlungen zur arab. Philologie*, i. 5 sq.; D. B. Macdonald, *op. cit.*, p. 19 sq.).

Bibliography has been given above; add traditions in Aḡmad b. Ḥanbal, *Musnaḡ*, i. 385, 397 sq., 401, 460; cf. ii. 323; al-Dārimī, *Musnaḡ*, *Riḡāḡ*, bāb 25; Muslim, *Ṣaḡīḡ*, *Ṣiḡāt al-Munāḡiḡin*, Trad. 69 (ed. with al-Nawawī's commentary, Cairo 1283, v. 362; Constantinople 1334, viii. 138). (D. B. MACDONALD)

KARKARALI, a Cossack village and the capital of a district in the territory of Semipalatinsk, 49° 2' N. Lat., 76° 7' E. Long. (Greenw.); it has about 3000 inhabitants of whom two-thirds are Muḡammadans. (W. BARTHOLO)

AL-KARKH, the name of an important quarter of old Bagḡdād. The word *Karkh*, which comes from the Aramaic (*Karkā*), is found in Greek and Roman writers as *Carcha*, *Charcha* and *Charase* (see Pauly-Wissowa, *Realencykl. d.*

klass. Altertumswiss., Suppl. i. 275, 283) and means town; cf. Yāḡūt, *Miʿḡjam*, ed. Wustenfeld, iv. 252, 18; Streck, *op. cit.* (see *Bibl.*), p. 92, 186; G. Le Strange, *Bagḡdad*, p. 63). There was still in the Muslim period a whole series of places or parts of towns called al-Karkh within the area of influence of Aramaic culture, in the ʿIrāk, *Khūzistān* and al-Dīazīra; they were distinguished from one another by the addition of a geographical name (like Maisān, Sāmarrā). Yāḡūt, iv. 252—257, gives 9 such places; see also al-Ṭabarī (ed. de Goeje), *Indices*, p. 762. Our *Karkh* is often more exactly defined as *Karkh Bagḡdād*.

As the Aramaic name shows, the al-Karkh quarter was already in existence before the foundation of Bagḡdād by al-Manṣūr (145 = 762), as a small independent township said to have been founded by the Sāsānian Shāpur II (309—379 A.D.), which, like the other earlier settlements on the site of the future capital of the Caliphs, was no doubt mainly inhabited by Aramaic Christians (cf. above, i. 564). This pre-Muslim *Karkh* was selected by the Caliph al-Manṣūr to be the mercantile centre and it soon became the busiest quarter of Bagḡdād owing to its commercial character. Al-Karkh was at first quite separate, south-east of the so-called round city of al-Manṣūr and a fair distance from it; but as new roads and squares grew up all around it, it soon became merged in the sea of houses of the great capital.

Al-Karkh was watered by the Nahr ʿIsā, the most northerly large canal of the Euphrates in the ʿIrāk, as well as by its branches, the Nahr Ṣarāt and the Nahr Karkhāyā. The latter is the "Karkhian Canal" (Karkhāyā = כַּרְכִּיָּא; see Fränkel, *Die aram. Fremdw. im Arab.*, Leiden 1886, p. xx) which left the Nahr ʿIsā below the small town of al-Muḡawwal near the village of al-Barāḡḡḡ (see above, i. 655) and supplied the southern part of the western half of Bagḡdād, i. e. the mercantile quarter and its neighbourhood, with its branch channels, which in places ran underground. Numerous bridges carried the busy traffic over it. On the Nahr Karkhāyā and its canal system see Ibn Serapion, ed. G. Le Strange in the *J. R. A. S.*, 1895, p. 24, 17—26; p. 286—8, 292—3; al-Kḡaṭīb al-Bagḡdādī, ed. Salmon (see the *Bibl.*), p. 66—68, 154—5; Yāḡūt, iv. 252; Streck, *op. cit.*, p. 85—90; G. Le Strange, *Bagḡdad*, p. 52—56, 63—80; Herzfeld in Sarre-Herzfeld (see the *Bibl.*), ii. 110.

In the civic history of Bagḡdād, especially during the Būyid period (xth—xith century), al-Karkh, which was regarded as a Shīʿa stronghold, is frequently mentioned (cf. above, i. 567). Under the Būyids who had ʿAlid sympathies the already frequent encounters and frictions between the Sunnis and Shīʿis of the capital became more and more serious. Sanguinary street fighting between the two hostile sects often accompanied by pillaging and incendiarism was the order of the day. Al-Karkh was usually in the very centre of this civil strife; its inhabitants were always at daggers drawn with the Sunnis of the adjoining quarters (Bāb al-Baṣra etc.). Sultān Dījalāl al-Dawla (416—435 = 1024—1044) under whom the situation had become unusually serious was even on one occasion, in 422 (1031), reduced to take refuge with his Shīʿi co-religionists in al-Karkh. In 445 (1053) a considerable part of al-Karkh was laid in ashes as a result of these feuds. A great fire had previously devastated al-Karkh under the Caliph al-

Wahik (227—232 = 842—7); but the destruction was very soon made good.

In course of time numerous mosques and tombs arose in the area of al-Karkh in the wider sense, by which the whole southern half of Baghdad west of the Tigris was often meant. The most celebrated is the tomb-mosque of the local saint Ma'rūf b. al-Faizurān al-Karkhi (d. 200 = 816) and the alleged tomb of Zubaida, the wife of Hārūn al-Rashīd, barely 300 yards south of it. Both mausoleums (see also I, 569) still exist and are important starting points for studying the topography of old Baghdad. In their present form they were renovated by the Caliph al-Nāṣir (575—622 = 1180—1225); but they have been frequently restored since then. On the tomb of al-Karkhi, which as early as the ixth century was one of the most popular places of pilgrimage in Baghdad and which lies in the middle of an impressive cemetery as in the 'Abbāsīd period, cf. Streck, *op. cit.*, p. 159; G. Le Strange, *op. cit.*, p. 98—100, 350; Massignon, *op. cit.* (see the *Bibl.*), p. 49, 108; Herzfeld, *op. cit.*, ii. 172—3. For the so-called grave of Zubaida see G. Le Strange, *op. cit.*, p. 100, 161 sq., 350 sq.; Massignon, *op. cit.*, p. 108 sq.; Herzfeld, *op. cit.*, p. 173. On other mosques and tombs in the west side of Baghdad see Massignon, *op. cit.*, p. 64 sq. or 94 sq.

Al-Karkh was not only the largest but also the most long-lived quarter of the western half of Baghdad. When the quarters around it had gradually fallen into ruins, it stood quite isolated — as early as Yāqūt's day for example (beginning of the xiiith cent.) — like a separate town, as it had been in the earliest period after the foundation of Baghdad. It was a mile distant from the then still inhabited quarter of Bāb al-Baṣra (in the south-east of the old round city of al-Manṣūr). In the later middle ages (cf., for example, Ibn Baṭṭūṭa in the xivth century) the name of the Bāb al-Baṣra quarter was not infrequently extended to all the quarters of western Baghdad still standing i.e. even to include al-Karkh; cf. G. Le Strange, *op. cit.*, p. 336; Herzfeld, *op. cit.*, ii. 114 sq. We may here point out that the topography of al-Karkh and its vicinity in Yāqūt is not quite in agreement with the other sources. It appears that the local knowledge of the author of the *Geographical Dictionary* at the time of writing was no longer quite reliable. Cf. G. Le Strange, p. 84, 159.

Al-Karkh is also known as a rare mint; there are coins of the reigns of the Caliphs al-Muqtadir, al-Kāhir and al-Rāḍī, dated in the years 308, 315, 318, 321, 325; cf. *Numismatische Zeitschrift*, Vienna 1893, vol. xxxiv. 321; Lavoix, *Cat. des Monn. Mus. de la Bibl. Nat.*, i. 285; *Numismatic Chronicle*, 1902, p. 272; 1919, p. 197. The wine of al-Karkh was highly esteemed; in poems of the older 'Abbāsīd period (e.g. in Abū Nuwās, Ibn Mu'tazz) it is often mentioned; cf. G. Jacob in *Oriental. Studien*, Th. Noldeke ... *gewidmet*, Giessen 1906, p. 1065.

At the present day the part of Baghdad on the right bank of the Tigris, which barely makes up a third of the area of the city, is called Ḳarshiaka, properly (Turkish) Ḳarshy Yākā = the other side (lying opposite the city proper on the east bank), a reproduction of the popular Arabic *Hūdak al-Djānib*. This name has therefore no connection with al-Karkh (the contrary view is held by Le Strange, *op. cit.*, p. 66). Ḳarshiaka was for long

merely an insignificant suburb; but in recent years it has increased somewhat in importance and will certainly continue to do as the railway station of Baghdad is there. Since the second half of the xviiiith century Arabs of the tribe of 'Ukail ('Ogēl, 'Agēl) have settled here, who with other caravan people form at the present day a considerable part of the inhabitants of this western town. Cf. thereon Černik's expedition in *Petermanns Geograph. Mitteil.*, suppl. part 44, Gotha 1875, p. 28, 30; v. Oppenheim, *Vom Mittelmeer zum persischen Golf*, Berlin 1900, ii. 74, 238; Cl. Huart, *Hist. de Bagdad dans les temps modernes*, Paris 1901, p. xi sq., 188 sq.; Massignon, *op. cit.*, p. 99.

Massignon, *Mission en Mésopotamie (1907—8)*, vol. 31, Paris 1912, ii. 49, 99, 108; E. Herzfeld in Sarre-Herzfeld, *Archäol. Reise im Euphrat- und Tigrisgebiet*, ii., Berlin 1920, p. 105, 110, 112, 114 sq. — Cf. the plans of Baghdad in G. Le Strange, *Baghdad*, plan iii. and vii. and in Herzfeld, who (probably rightly) differs somewhat from G. Le Strange on the exact localisation of al-Karkh; see also the plan of modern Baghdad (scale 1 : 10,000), prepared by the cartographical section of the deputy General Staff of the German Army in 1917.

(M. STRECK)

KARKHA. [See KERKHA].

AL-KARKHĪ, ABŪ BAKR MUḤAMMAD B. AL-ḤASAN (or AL-ḤUSAIN), was one of the most important mathematicians of the Arabs; he also calls himself AL-ḤASIB (the arithmetician). He lived in Baghdad in the time of Abū Ḡhalīb Muḥammad b. Khālaf Fakhr al-Mulk, vizier of the Būyid Babā al-Dawla [q. v.] and his son Sulṭān al-Dawla Abū Shudjā'. The date of his death is not known but it may lie between 410 and 420 (1019—1029). The two of his mathematical works that still exist are entitled *al-Kāfī fī 'l-Hisāb* (the requisite for arithmetic) and *al-Fakhrī* (i.e. the book dedicated to the vizier Fakhr al-Mulk). The first exists in a unique manuscript in Gotha, the second in Paris, Oxford and Cairo. The Arabic text of neither of these works has yet been published but there is a German translation of the former by A. Hochheim, *Kāfī fīl Hisāb des Abu Bekr Muh. b. Alhussin Alkarkhi*, in 3 parts, Halle a/S. 1878—80, and a synopsis of the second in French by F. Woepcke, *Extrait du Fakhrī*, Paris 1853. The second work is the most important next to the *Algebra* of al-Khāyāmī that has come down to us on this branch of mathematics. In it al-Karkhī closely follows the Greek mathematician Diophantus of Alexandria; for the first time among the Arabs indeterminate equations appear in this work and they are solved after the fashion of the Greek mathematicians;

whether al-Karkhī deliberately took no notice of the Indian methods or was not acquainted with them cannot be decided. In his book on arithmetic, like almost all Eastern Arab mathematicians (except 'Alī b. Aḥmad al-Nasawī, about 980—1040), he does not use Indian numerals but writes out all the figures in words.

Bibliography: There is not a separate article on al-Karkhī in any of the Arab biographical works so far published; he is only occasionally mentioned in Ibn Khallikān, ed. Cairo 1310, ii. 65; transl. by de Slane, iii. 279. Cf. also M. Cantor, *Vorlesungen über Gesch. d. Mathem.* 2, i. 718—729; H. Suter in the *Abhandl. z. Gesch. d. mathem. Wissensch.*, x. 84. (H. SUTER)

KARKĪSIYĀ (also KARKĪSIYĀ), a town in al-Djazīra on the left bank of the Euphrates, close to the confluence of the Khābūr, a little above 35° N. Lat. Karkīsiyā is simply an Arabic reproduction of the Graeco-Roman name (τὸ) Κιρκήσιον, (τὸ) Κιρκήσιον κάστρον or Κιρκίσιον (Κιρκισία in the *Notit. episcop.*, ed. Parthey, p. 87), Circesium, Syriac Kerkusion, Latin = castrum Circense, "the castle with the circus"; cf. Noldeke, *op. cit.* (see *Bibl.*), p. 3. Ḥamza al-Isfahānī in Yāqūt, iv. 65, 21 sq., still knew the etymology of the place-name (Karkīsiyā, arabicised from Kīrkīsiyā, from *kīrkīs* = arab. *ḥalba*, Hippodrome). The name Circesium for the place at the mouth of the Khābūr in any case first appeared, when a Roman military station was built there. This perhaps may have been even before Diocletian. It was, however, this Emperor who first made the place of great importance by making it a powerful fortress on the extreme frontier of the Roman Empire in Southern Mesopotamia. From this it seems quite impossible that Circesium could have been a latinisation of the Aramaic *Karkā* = town (see the article AL-KARKHĪ), as Moritz, *op. cit.* (see *Bibl.*), p. 37, supposed; see Streck's arguments in the *Z. A.*, xxvii. 259.

A situation so favoured by nature as the mouth of the Khābūr must certainly have been already inhabited in remote antiquity. But the names of the settlements there have — as frequently happens in the East — changed several times in the course of centuries.

The old native name of the place was perhaps the Nabagath mentioned by Isidor of Charac (cf. Herzfeld, *op. cit.*, i. 174). Another name is perhaps preserved in Chabora i. e. the town on the Khābūr; see Streck in Pauly-Wissowa, *op. cit.* (see the *Bibl.*). In the inscriptions of the Assyrian kings of the ninth century (Tukulti-Ninurta II, Assurnasirpal) we find mention of a place named Sirku (Sirki) which, according to the itinerary of Tukulti-Ninurta, was the last western stage along the Euphrates on the road to the mouth of the Khābūr. Following Maspero (*De Carchemis oppidi situ*, Paris 1872, p. 13), this Sirku has been connected with Circesium and the latter name actually derived from the Assyrian one; see for example Sayce in the *Proceed. of the Society of Biblical Archaeology*, xviii. 174; S. Schiffer, *Die Avamier*, Leipzig 1911, p. 20 and 22, and Meissner, *Babylonien und Assyrien*, i., Heidelberg 1920, p. 344; it is queried by Scheil, *Annales de Tukulti Ninip*, ii., Paris 1909, p. 48. This identification is untenable; see against it Streck in the *Z. A.*, xxvii. 289 sq. and Horn in the *Z. A.*, xxxiv. 150 sq. The site of Sirku is besides to be sought on

the right bank of the Euphrates; on the probable situation cf. Forrer, *Die Provinzial-einteilung des Assyrischen Reiches*, Leipzig 1920, p. 15. According to the above mentioned itinerary of Tukulti-Ninurta, Rummunina (on the reading see Horn, *op. cit.*, p. 151) must probably be located in the region of the junction of the Khābūr with the Euphrates.

Simply on account of the similarity of names, Circesium used to be identified with Carchemish, the great Hittite city, for example in the older Biblical commentaries, by the Jewish traveller Benjamin of Tudela, also by Ritter, *op. cit.*, x. 15 and by Chesney, *op. cit.* (see the *Bibl.*), p. 250. The lack of foundation for this identification was shown notably by Maspero in the above mentioned work and by Noldeke, *op. cit.*, p. 1 sq. Besides, the site of Carchemish has been identified for several decades beyond all doubt in the ruins of Dīrbās or Dījarābis on the right bank of the middle Euphrates, a few hours' journey below Bīrēdīk.

In the fourth century A. D. Circesium passed into the hands of the Persians by the shameful treaty made by the Emperor Jovian (363). The Arabs next captured it in the conquest of al-Djazīra. The occupation by the Muslims, which took place, apparently without fighting, under the commander Ḥabīb b. Maslama who was sent by 'Iyād b. Ghanm, probably happened in the year 19 (640), not 16 (637), as many sources say. Cf. thereon al-Balādhuri, *Kitaḥ al-Futūḥ* (ed. de Goeje), p. 176, 2 (and cf. p. 111, 175, 178, 179); al-Ṭabari (ed. de Goeje), i. 2478; Ibn al-Aṭṭar, *al-Kāmil* (ed. Tornberg), ii. 409 sq.; Yāqūt, *Muḍjam* (ed. Wüstenfeld), iv. 65 sq.; Weil, *Gesch. der Chalifen*, i. 82; Caetani, *Annali dell' Islām*, ii/iii. 402, ii/ii. 732, 755 sq., 799. Karkīsiyā became the capital of the district of Khābūr in the province of Diyār Bakr. On account of its very characteristic situation, Karkīsiyā is mentioned by all the Arab geographers in their descriptions of the river-courses and roads, but no detailed account of it is given. The place probably did not attain any great size in the Islāmic period either. The high percentage of Jews (500 families) found by Benjamin of Tudela in the second half of the xiith century there is remarkable; see the Hebrew text of his travels edited and translated by Grünhut and Adler (Jerusalem 1903, Frankfurt a/M. 1904), i. 49, 21 sq. and ii. 47.

In the history of the wars of mediaeval Islām we find Karkīsiyā often mentioned. When 'Abd al-Malik was engaged in his campaign against Muṣ'ab, governor of the 'Irāk and brother of the anti-Caliph 'Abdallāh b. al-Zubair, he had to devote his attention to Karkīsiyā in 71 (690), where the Kaṣī Zufar b. al-Ḥārīṭh was ruling independently and had successfully resisted the governor of Hims, who had been sent against him. After a siege of some length, Zufar had to submit to the Caliph's army; cf. the account in Ibn al-Aṭṭar (ed. Tornberg), iv. 275 sq.; Weil, *Gesch. der Chalifen*, i. 431; J. Wellhausen, *Das Arabische Reich und sein Sturz*, Berlin 1902, p. 115—116, 119—120, 126. In the wars fought in the ivth (xth) century on Mesopotamian soil in the Ḥamdānīd epoch, we find Karkīsiyā playing a part along with al-Raḥba, a day's journey down the Euphrates from it; cf. Freytag in the *Z. D. M. G.*, x. 451—2. The rulers of Egypt repeatedly extended their power as far as Karkīsiyā, for example the Tūlūnīd Aḥmad, from

whom, however, the Caliph al-Mu'tamid's vigorous brother al-Muwaffak was able to retake it in 268 (881); see Wüstenfeld, *Die Statthalter von Ägypten zur Zeit der Chalifen*, Abh. G. G. W., (1876), vol. xxi., part iii. 20. Several centuries later the Egyptian Sultān Balbars again advanced his frontier up to the Khābūr, when he took Karkisiyā from the Mongols in 663 (1264); cf. Weil, *Gesch. der Chalifen*, iv. 96.

At the present day the site of Karkisiyā is marked by a miserable village of 30–40 houses and hovels of clay and an extensive ruined site adjoining it. It is now called Busaira (Besēra; wrongly written Bušaira by the Turks); older travellers give the form Abū Serai etc. Busaira is probably a corruption of Abū Serai (as, along with other authors, Moritz, *op. cit.*, p. 37, thinks); it has been with less probability taken as a derivative from Basīr, the older name — recorded by Abu 'l-Fidā' for 732 (1331) — of the present Dēr ez-Zōr (see Herzfeld, *op. cit.*). According to Herzfeld, the old name Karkisiyā still survives locally in the form Karkisa.

Busaira lies on an irregularly shaped tongue of land formed by the Khābūr at its junction with the Euphrates and is about half an hour's journey distant from its mouth. Communication with the hinterland is broken by a ditch so that we have a well-marked peninsula. The plan of the old fortress can still be easily recognised; it forms a rectangle, the longer side of which runs along the Khābūr, while the shorter faces the Euphrates from which it is now about 1000 yards distant. Four more or less well preserved towers and a fort-like building (praetorium, serai) can still be seen, from which Moritz (*op. cit.*) suggests that the modern name Abū Serai (Busaira) may be derived. The fairly extensive town lay to the north-east of the fortress and is still marked by numerous walls of earth. Descriptions of the modern ruins are given by Sachau, Moritz and Herzfeld; plans of them are in Sachau and Herzfeld (see *Bibl.*).

The important part once played by Karkisiyā as a trading centre as a result of the important roads which meet here — from Syria to Babylonia, Mōsul to Syria — has in modern times been to a great extent regained by the town of Dēr ez-Zōr on the Euphrates (see above, i. 936) above mentioned, a few hours' journey above the mouth of the Khābūr.

KARLOWITZ. [See CARLOWITZ].

KARLUK (KARLUKH), in early Arabic sources KHARLUKH, in Persian KHALLUKH, in Chinese KO-LO-LU, name of a Turkish people, who are mentioned in the Turkish Orkhon inscriptions and in the Chinese *T'ang Shu*; cf. E. Chavannes, *Documents sur les Tou-kiue (Turcs) occidentaux*, St. Petersburg 1903, Index. The Karluks attained some political importance after 766, when, after the decline of the empire of the Western Turkish Khākāns, they occupied the valley of the Ču [q.v.]. Their princes did not assume the title of Khākān (Kaghan) but only that of Yabghu (Arabic Djabghūya) al-Tabarī mentions a Djabghūya of the Karluks in Tokhāristān on the upper Amū Daryā as early as the year 119/737. With the Djabghūya al-Khalukhi (*op. cit.*, ii. 1612, 16) corresponds the Djabghūya al-Tukhāri (ii. 1604, 3 and 1612, 9). At the present day an affluent of the Surkhān is still called Kalluk or Karluk; cf. W. Barthold, *Die alttürkischen Inschriften und die arabischen Quellen*, St. Petersburg 1899, with reference to W. Radloff, *Die alttürkischen Inschriften der Mongolei*, second series, p. 27, note 1. According to al-Yā'qūbī, *Tārīkh*, ed. Houtsma, ii. 479, the Djabghūya of the Karluks adopted Islām in the year 162 (778/779); cf. J. Marquart, *Chronologie der alttürkischen Inschriften*, Leipzig 1898, p. 25; it should however be observed that the same fact at the same date is narrated concerning many other rulers, which makes it suspicious. al-Gardīzi (in Barthold, *Turkestan w. epochu mongolskago nashetwiya*, ii., St. Petersburg 1900, p. 207) mentions an invasion of the Djabghūya in Farghāna in the year 792/3. In the reports of the Arab geographers of the ivth/xth century the Karluks are still infidels. According to Ibn Hawkal (*B.G.A.*, i. 11, 17 sq.) their territory extended 30 days' journey from the frontier of Farghāna. According to the Persian sources, however, their territory was not so extensive (cf. especially the still unpublished *Hudūa al-'Ālam*; al-Gardīzi in Barthold, *Očer w. poudke w. Srednyuyu Aziyu*, St. Petersburg 1897, text, p. 81 sq., transl., p. 104 sq. and 'Awfi in Barthold, *Turkestan*, i. 99 sq.; Marquart, *Osttürkische Dialektstudien in der Abh. G. W. Göttingen*, new series, xiii./i., p. 40 sq.). In so far as they were the nearest neighbours of the Muhammadan territory, the Karluks, more than the other Turks, were influenced by Persian civilization. They even differed in their features from the usual Turkish type. Mahmūd al-Kashghari, *Diwān Lughāt al-Turk*, Constantinople 1915–1917, comprises the Karluks and the Ghuzz under the common name of Turkomans.

It cannot be ascertained with certainty what was the relation between the dynasty of the Illek Khāns [q.v.] and the Karluks. At any rate the Karluks are often mentioned in the history of this empire, especially in Samarkand, as unruly Praetorians just like the Ghuzz in the Saldjuk empire. In al-Djuwaini's report (*Tārīkh-i Djahān Gushā*, ed. Mirzā Muḥ.

al-Ḳazwīnī, Gibb Memorial Series, 1912—16, ii. 87) concerning the conquest of Central Asia by the Ḳara Ḳhitāi [q. v.], the latter appear as the allies of the Ḳhān of Balāsāghun [q. v.] against the Ḳarluḳs; the Ḳara Ḳhitāi of Samarḳand, on the other hand, are the allies of the Ḳarluḳs against Sultān Sandjār (cf. especially al-Rāwandī, ed. Muḥ. Iḳbāl, Gibb Memorial Series, new series, ii., p. 172). Later the Ḳara Ḳhitāi induced the Ḳarluḳs in Samarḳand to abandon their warlike life and to take to agriculture. According to Ibn al-Athīr, this took place in 559 (1163/64) (*Ḳāmil*, ed. Tornberg, xi. 205), but this date seems to late; cf. W. Barthold, *Turkestan*, ii. 358. In the second half of the xiith century the Ḳarluḳs are mentioned for the last time (by al-Ḳātib al-Samarḳandī; cf. the text as edited by Barthold, *Turkestan*, i. 71 sq.) as enemies of the Ḳhān of Samarḳand; in the history of the xiiith century they no longer appear. A Ḳarluḳ state N. of the Ili with the capital Ḳayāligh is however still mentioned; cf. especially *Ta'rikh-i Djahān Gushā*, i. 56 sq.; other reports in Barthold, *Turkestan*, ii. 433 sq., 477. The son of the Ḳarluḳ prince Arslān Ḳhān, who had submitted to the Mongols and taken part in the expedition against the Ḳh̄wārimshāh Muḥammad, was given in chief Ḳzgand in Farḡhāna by the Great Ḳhān Mangu (1251—1259; cf. *Ta'rikh-i Djahān Gushā*, i. 58); there is no later mention of this dynasty. To the same division of the Ḳarluḳs perhaps belonged the dynasty of the princes of Almaligh (cf. the art. KULḌJA). The name Ḳarluḳ seems later to denote an Özbek family only. (W. BARTHOLD)

ḲARMAṬIANS (ḲARMAṬI, plur. ḲARMAṬIYA: Carmathians). In the strict application of the word, the name was given to the rebel federations of Arabs and "Nabataeans", which were organised in Lower Mesopotamia after the servile war of the Zandj [q. v.] from 264 (877) and based on a system of communism into which initiation was necessary; active propaganda extended this secret society among the masses, peasants and artisans; — in al-Aḥsā, where they founded a state independent of the Caliph of Baghdād; — in Ḳhūrāsān, in Syria and in Yemen, where they formed lasting hotbeds of discontent.

In the broader sense, the name Ḳarmaṭian means the great movement for social reform and justice based on equality, which swept through the Muslim world from the ninth to the twelfth centuries of our era; this movement, captured and controlled by an ambitious family, the Ismā'īlī dynasty (cf. ISMĀ'ĪLIYA, SAE'ĪYA), who founded the Fātimid anti-caliphate in 297/910, became abortive and finally succumbed with this dynasty before the counterstroke of the Crusades.

The movement was characterised, from the point of view of knowledge, by the adaptation of the Arabic language to certain technical achievements of foreign origin, especially Hellenistic (Neo-Platonic, pseudo-Hermetic and "Sabaeen" writings); from the political point of view, by the exploitation of the 'Alid legitimist tradition on behalf of a conspiracy, carried on in a strict secrecy, in which the name of the supreme leader was never pronounced; from the point of view of worship, by the use of an allegorical and methodical catechism, Ḳorānic in origin, adapted to all creeds, to all races and all castes. The movement was based on reason,

tolerance and equality, with a system of graduated initiation and the ritual of a gild which — encouraging the rise of the trade gild movement (see the art. ŠIḲR) and universities — seems to have reached the West and to have influenced the formation of European gilds and freemasonry.

I. Etymology and early history.

The etymology of the word *ḳarmaṭ* (not *ḳirmiṭ*) is disputed. It appears as a descriptive adjective in the name of the first leader of the insurrection, Ḥamdān Ḳarmaṭ (cf. 'Alī b. Ḳarmaṭ, a heretic quoted by the Nuṣairī author Maimūn Ṭabarānī). Völlers has connected it with the Greek γράμματτα, but it is more probable that we should see in it a borrowing from the local Aramaic dialect of Wāsiṭ, where *ḳurmaṭū* to this day means *mudallis* (Arabo-Aramaic dialect of the Midān, cf. Anastase, in *Machriq*, x. 18, p. 857). From the year 255 (868) we find mentioned in the same region, along with the *Furāṭiya*, a corps of Ḳurmāṭiya among the rebellious troops of the Zandj (al-Ṭabarī, iii. 1757; cf. iii. 1749: Rāshid Ḳurmāṭi).

The name *Ḳarmaṭ* in palaeography means a particular kind of *nashḥ*; in addition there is a special secret Ḳarmaṭian alphabet used in the Yemenī texts recently studied by Griffini.

The Ḳarmaṭian insurrection was begun by Ḥamdān in the neighbourhood of Wāsiṭ; in 277/890 he founded a *dār al-ḥidjra* (an entrenched place of retreat) east of Kūfa for his partisans, whose various voluntary contributions supported the common chest: these contributions were alms at breaking the fast (*ṣakāt al-fiṭr*), for the right to use the place of refuge, a fifth of all income (*ḳhums*), right of all participation in the agapes (*bulgha*; cf. the art. NUṢAIRI); community of all objects of general utility (*ulfa*) was prescribed. These details, which we know from Sunnī sources, are perhaps accurate; at the agapes they ate "bread of Paradise"; this detail which we find in the contemporary trial of al-Ḥallādj is perhaps simply a transference of the consecrated bread (*pḥta*) used among the Mandaeans of Wāsiṭ (*mughṭasila* = *nāṣōrāyā*; cf. al-Ṭabarī, year 278 (891), on the Ḳarmaṭian Farādj b. 'Othmān of Naṣrāna; or to be pointed Naṣurāya).

We find along with Ḥamdān his brother-in-law 'Abdān (d. 286/899), author of a manual of initiation for the seven degrees (*balāghāt ṣab'a*). Both seem to have been dependent on leaders whose identity remained a secret, living outside of Sawād, the *Ṣāhib al-Zuhūr*, who is said to have invested Ḥamdān, and the *Ṣāhib al-Nāka*, who had dismissed 'Abdān and put in his place Dhikrawaih al-Dindānī. Dhikrawaih in 288/900 gave the signal in the desert of Syria among the Banū 'Ulais for the general Ḳarmaṭian rising — so long prepared (expected in Ḳhūrāsān for the year 290/902) — and proclaimed as leader the *Ṣāhib al-Nāka*, under the Ismā'īlī regnal name Abū 'Abd Allāh Muḥammad, with the dynastic name of "Fātimid". He was killed in 289 (901) at the siege of Damascus and his place was taken by his brother the "Ṣāhib al-Khāl", who as ruler took the name Abū 'Abdallāh Aḥmad, and who was captured and executed at Baghdād in 291 (903). The Ḳarmaṭian movement in Lower Mesopotamia, drowned in blood, ceased to be an active factor in politics in 294 (906) with the death of Dhikrawaih.

In time the movement regained strength in

al-Aḥsā, where the *Ṣāhib al-Nāḩa* had sent as his representative Abū Saʿīd Ḥasan b. Bahām al-Djannābī in 281 (894); with the support of the Rabiʿ tribe of the ʿAbd al-Kāis, al-Djannābī seized the whole of al-Aḥsā (286 = 899) and made it an independent state, the bulwark of Ḳarmaṭian power and the terror of the Caliphate of Baghdad. His son and successor Abū Ṭāhir Sulaimān (301—332 = 914—943) began to lay waste Lower Mesopotamia, cut the pilgrim routes and finally seized (Mekka on the 8th of Dhu ʿl-Ḥijja, 317 = Jan. 12, 930), from which he carried off the Black Stone six days later to take it to al-Aḥsā. Abū Ṭāhir, like his father, was only the emissary of a secret organisation, its “commissary for foreign affairs” for al-Aḥsā; while waiting the opportunity to enthrone the expected Imām there, he appointed a representative council over it, the *Sūda* (i.e. the elders of the tribe) for the political administration of home affairs. This organisation was still in existence in 422 (1030) after the decline of the military power of the Ḳarmaṭians; it seems to have maintained local autonomy down to the xviiith century, when the revival of propaganda took the form of a new Ismāʿīlī dynasty (Makramis). The capital was al-Muʾminiya (new name given to Ḥaḍjar; on the site of the present Hufuf).

In Yemen, Ḳarmaṭian propaganda, directed from 266 (879) by Maṣṣūr al-Yaman (title of Ibn Ḥawshab) with the *dār al-ḥidjra* near ʿAdanlāʿa, failed against the resistance of the local Zaidī chiefs and could only found some little principalities, the Ṣulāhiṣ of Ṣanʿā and the Makramis of Naḍjran (texts studied by Griffini).

In Ḳhurasān the movement began in 260 (873) at Raiy with Ḳhalaf; then it spread to Marw al-Rūdh and Ṭalākān in Džūzdžān, where the Amir became a Ḳarmaṭian adept. Dailam which was to become a bulwark of the Ismāʿīlī dynasty (see the art. ALAMŪT, ASSASSINS), was next taken for the cause, finally Muḥammad al-Nasafī al-Baradḥafī (d. 331 = 942) undertook the conversion of the Sāmānid rulers. His execution destroyed the political hopes of the party: the small Ḳarmaṭian centres of eastern Ḳhorāsān — if we except the works of Naṣir-i Ḳhusraw — only produced a moderate literary activity (texts studied by Iwanow).

In Syria the centre seems to have been Salamiya; but, except for some biased Sunnī records, we do not know what happened there after the insurrection of 288 (901), nor the part played in it by the future ʿUbaid Allāh, the first Fāṭimid Caliph. Syrian Ḳarmaṭianism is still dormant, without showing any signs of activity nor of contact with the Druzes, who are its distant brethren.

The small local bodies, among which Ḳarmaṭian manuscripts have survived down to our days (for a list of them see the art. ISMĀʿĪLIYA, ii. 549 sqq.), have not been the scene of any serious doctrinal activity apart from the writings of the Syrian Rashīd al-Dīn Sinān (xivth cent.), the *Dābistān* of the Indian Maḥmūd Fānī (Mobed Shāh) (xviith cent.) and the Turkish and Persian texts of the Ḥurufis (xvth—xviiith cent.).

II. The position of the Ḳarmaṭians relative to the Fāṭimids.

The general tendency of Ḳarmaṭian doctrine was to consider ʿAlid legitimacy as a means rather than an end. The Imāmate, the supreme authority, is not a hereditary monopoly transmitted in a dynasty; it is an intellectual characteristic, a divine

investiture, an imperative mandate (*ṣūr al-amr*) conferred (*tafwīd*) on the new holder of the title from among the initiates by a sudden illumination of his intellect, which makes him “substituted” or “spiritual son” of his predecessor. Such is the justification, given in the formula of initiation in the Druze books, for these alleged “usurpations” of genealogy, which are the rule in the annals of the Ḳarmaṭians from ʿAbd Allāh b. Maimūn down to Ḥasan ʿAlā ḍḥikrihi ʿl-salām. And this is the meaning of the definitions of the imāmate given by adepts like Ibn Masarra, Ruṣīnī, Ibn Ḥanī and the *Iḳhwān al-Ṣafāʾ*. Indeed, when the *Ṣāhib al-Nāḩa* in 288 (900), and ʿUbaid Allāh in 297 (909) had assumed a Fāṭimid dynastic title, neither the one nor the other plainly indicated their genealogical connection with the ʿAlid Ismāʿīlī line (cf. al-Makrīzī, *Itṭiʿāz*, ed. Bunz., p. 7—11). And if this claim was of importance with respect to the public, in the opinion of their enemies, it seems that it hardly interested those initiated into the true doctrine, who expected above all else a chief, possessing a special divine appointment, of the “intellectual order”, whether he was ʿAlid or not.

The official version of the ancestry of the family of ʿUbaid Allāh compiled by his Ḳaḍī, the Mālīkī al-Nuʾmān b. Abī Ḥanīfa al-Tamīmī (born 259, d. 363 aged 104), is a laudatory and lying composition specially written in reply to a Buwaihid attack. The versions of two Sunnī anti-Ḳarmaṭian pamphlets by Muḥammad b. Rizām al-Ṭāʾī, president of the “Maẓālim” in Baghdad in 329 A. H., and by Muḥammad Aḫḫ Muḥassin Ibn al-ʿAbid, an ʿAlid of Damascus, who died about 375 A. H., are hardly of any more value. S. de Sacy, Guyard and de Goeje thought they could rely on them as Ibn al-Nadīm, al-Nuwairī and al-Makrīzī had done. But a result of a comparison with the statements contained in the biographical collections (*ṭabaqāt*) of orthodox Imānī *muḥaddithūn*, in which the early Ḳarmaṭian propagandists have a prominent place, shows that there are serious errors in the exposé by these two opponents. Maimūn Qaddāh (d. about 180 A. H. at latest) was not a “Bardesian”; he was a client of the Makhzūmī clan (Ḳuraish), a native of Mekka, a well-known theologian, the official *rāwī* of the fifth and sixth Imāms, Bāḳir and Ṣādiḳ. His son ʿAbd Allāh, who was official *rāwī* of Ṣādiḳ (which provoked the irony of the poet Abu ʿl-ʿAlāʾ al-Maʿarri), did not die in 250 A. H. but in 210 at latest, “in prison in Kūfa under al-Maʿmūn”; Qindān (and not Zaidān) is the sobriquet of a known Imānī author, Aḥmad b. al-Ḥusain al-Ahwāzī, who died about 250—270 A. H., etc. In these circumstances the statements made in the two Sunnī sources mentioned regarding the assassination of ʿAbdān, the illegitimacy of ʿUbaid Allāh and the usurpation of the soi-disant “son” of ḍḥikrawāh in 288—291 A. H. have to be received with caution.

After the proclamation of the Fāṭimid Caliphate in the Maghrib the general attitude of the Ḳarmaṭians in al-Aḥsā as in Yemen and in Ḳhurasān was one of expectancy, which the assassination of the *Ṣāhib al-baḥr* (267 = 909) by ʿUbaid Allāh amply justified. Let us take al-Aḥsā for example: Abū Saʿīd had from the first paid the fifth to the *Ṣāhib al-Nāḩa*; after various evasions, which the intrigues of the court of Baghdad do not quite explain, Abū Ṭāhir sent it to al-Ḳāʾim; but with so little conviction of his legitimacy, that he welcomed and enthroned in 319 (931) as the

expected Imām a madman, Abu 'l-Faḡl al-Zakari al-Tammānī (a kind of Heliogabalus, soon put to death). The Black Stone was restored to the Meccans in 340 (951) by order of the Fāṭimid Caliph al-Manṣūr; but in 360 (970) the Karmāṭian chief Ḥasan b. Aḥmad thought it no breach of his oath of initiation to give his Buwaihid allies a document, which was solemnly read at Damascus, testifying to usurpation of civil authority by the first Fāṭimid Caliph. In 422 (1030) the Druze writer Muḡtana^c in vain urged the Karmāṭian *Sādū* of al-Aḥsā to rally to the cult of Fāṭimid Ḥākīm.

On the other hand there are abundant proofs of the adoption of Karmāṭian doctrine by the Fāṭimid dynasty. It was at the *dār al-ḥidjra* of the Maghrib, Ikidjīdjan (or Guedjā) founded by the Karmāṭian *Ṣāḥib al-baḡār*, that 'Ubaid Allāh took refuge before his proclamation as Caliph. The oraisons of Mu'izz (publ. by Guyard) are pure Karmāṭian in style as well as the ritual of the lodge of initiation (*maḡwīl*; the present masonic term is *maḡfīl*) which he founded in Cairo. The Druze religion is simply a Karmāṭian heresy. The introduction by 'Ubaid Allāh of the *Ṣalāt 'ala 'l-Nabī* at the end of the *adhān* (Ibn Ḥammād, in the *J. A.* of 1855, p. 542) is to be traced to the part of *nāṭiḡ*, recognised in the Prophet by the Karmāṭians.

III. The Karmāṭian Doctrine.

It is no longer possible to rely, as used to be done, on the accounts of Karmāṭian doctrine given by the Sunnī anti-Karmāṭian writers on heresies; al-Mas'ūdī has judiciously said of the latter that they contradict one another and that the Karmāṭians themselves recognise nothing of their doctrines in them. Except for a few lines that are accurate in the *Tanbīh* of al-Malaṭī (d. 377 = 987) we have to come down to the xiith century of our era to find a conscientious author, al-Shahrastānī, able to give us authentic Karmāṭian fragments, some quite old (of Maimūn Qaddāḡ and Aḥmad Kaiyāl) from original sources, which he does not mention, but which Fakhr Rāzī (*Masā'il 'aṣḡr*) has identified with the *Fuṣūl arba'a* of Ḥasan Sabḡāḡ (on Sabaeism: ii. 47—155 of the Cairo edition of 1317) and the *Ṣunwān al-Ḥikma* of Abū Dja'far Sidjī b. Būya († 370/980) (on Hellenism: ii. 155—193, of the Cairo edition of 1317).

To deal with the problem more minutely one must search the polemical literature of the Imāmis and particularly the apologetic treatises in which the various extremist sects endeavour to convert one another, starting from their common technical terms. Lastly the encyclopaedic collection of the *Iḡhwān al-Ṣafā'*, which has not yet been thoroughly studied since Dieterici, is invaluable for the synthetic understanding of Karmāṭian thought.

According to them, the world is a sum total of phenomena which repeat themselves in cycles, playing and replaying the same drama to us time after time: — this spectacle, presented to intelligences (invariable in number) so that they may be illuminated, is the gradual disappearance of the material veil, perceptible by our senses, a multi-form and transitory mirage; then the intelligences are born (*ḡhalḡ ṡḡānī*) by gaining consciousness of a pure intellectual evidence of a unique and impersonal thought, which is divinity itself.

The divine essence, in fact, outside of which nothing exists, is only the evidence of a single idea, an authentication of indifferentiated intelligibility and devoid of all content; the *via remotioris*

(*tanẓīh*) of the Karmāṭians, still more rigorous than the *taṡīl* of the Dīḡmīya, denies all divine attributes and postulates an absolute monism of fundamental intellectualism.

True worship consists in knowing how to recognise — as the result of a graduated initiation — what have been the stages of the creative evolution of the universe outside of God; what exactly leads the initiated by a process of inverse gnostic involution to forget these stages and to become absorbed in God.

a) Creative evolution: — the divine essence or supreme light (*nūr 'ulwī*), alone in the beginning and in the end, gives forth first of all the *nūr ṡḡā-ṡḡānī*, "glistening" and "victorious (*ḡāḡir*) light" which then engenders the universal intelligence (*'aḡl kullī*) and the soul of the world (*nafs*); the latter under various modes produce human intelligences (those of the prophets, imāms and elect; the others are only phantoms of nothingness). The *nūr ṡḡāṡḡānī* in the second degree gives forth the *nūr ṡulwānī* "tenebrous light"; that is matter, passive, "vineible" (*maḡḡūr*), destined to disappear; it appears in various modes as stars at the skies (*aṡṡāk*), as perishable bodies on earth.

b) Gnostic involution: — the intelligences of the prophets, imāms and their adepts are sparks of "sparkling light" suddenly illuminated in the midst of the tenebrous light, blind and unreal matter like reflections in mirrors, following the cyclic intermittances of the initiatory illumination; these sparks shine, on becoming conscious of their divine identity, in a liberating intuition, in which, losing all individuation, they find themselves "delivered from the five tyrants": — the sky, which makes day alternate with night, nature, which gives desires and regrets, law, which commands and forbids, the state, which controls and punishes, necessity, which forces one to daily labour."

c) The immaterial succession of initiatory investitures (*nuḡla, taṡwīḡ*). Initiatory illumination makes the separated intelligences cohere, divine sparks individualised for a moment, following two convergent hierarchic series; decreasing, of the initiators (*nāṡiḡ, ṡāmit, bāb*); and increasing, of the initiated (*dā'ī, ḡudīḡā, imām*). Historically the list of their titulars was classed in cycles of limited number; the intelligences, in invariable number, "transmigrate" from cycle to cycle (without "finding" again "their" personality, since they have only the appearance of individuality).

d) Planetary denominations of the cycles of transmigration (*akwār, adwār, ḡirūnāt*). The cycles just mentioned are named from their material veils, i.e. from the planetary revolutions, periods and conjunctions. This is a very fine point which must be appreciated. The Karmāṭians are nominalists; they do not believe that the name determines the thing and they unanimously assert that the planetary bodies have no directing influence on the intelligences; but the divine volition (*kun*) which regulates the intermittances of the initiatory illumination makes them coincide inevitably with the astral periods which form the tracing, the shadow cast by these cycles of illumination, and provides the horoscope of intelligences which form part of it (change of cults, *milāl*, every 960 years, of empires every 240 years, of sovereigns every 20 years, of epidemics every year, of genethliac subjects every

month and every day). When the moment comes for the final cassation of every action (*bikār* = *daidjūr* of the Ḥadīth, *ṣaiḥūr*) cycles and periods will cease together.

e) The degrees of individual initiation. Initiatory illumination is transmitted to the adept by degrees as in the ancient initiations (Greek, Manichaean) and in modern freemasonries. It emanates from the divine volition following a method of irrefutable and infallible authority (*ta'lim*, whence the name *ta'limiya* given by al-Ghazālī to the Karmaṭians). The adept submits himself for it (in the fourth degree) by a declaration — a solemn contract with a clause (*ṭalāk mu'allak*) of triple repudiation of his favourite wife if he should reveal the secrets (*ifshā' al-sirr*, which constitutes Karmaṭian adultery, *zinā*). Its formula has been studied by Goldziher (cf. the art. SURAJIYYA). We find it first used during the revolt of the Zandj (al-Ṭabarī, iii, 1750) and Usāma alludes to it in his *Memoirs*. The Sunnī heresiographers record 3, 5, 7 ('Abdān and Ibn Ḥamdān) or 9 degrees; but the names which 'Abd al-Kāhīr al-Baghdādī gives them are doubtful: *tafarrus*, diagnostic of the future adept, described as "fertile" or "sterile" earth, *ta'nīs* (taming), *taṣḥkik* (apprenticeship to methodic doubt), *ta'lik* (taking of the oath), *raḥṭ*, *taḍlīs*, *ta'sīs*, *khaṭ'* and *salkh*. The programme for the five high grades (secret) is little known. The "letter of 'Ubaid Allāh to Abū Ṭāhīr", an apocryphal curiosity (recalling certain modern anti-masonic productions), analysed by al-Baghdādī, puts in various maxims of cynical impiety, among others the mediaeval parable *De Tribus Impostoribus* (the earliest reference to it; cf. R.H.R., 1920) Al-Maḥrizī's reference to the *maḥwīl* of Cairo (transl. by de Sacy and Casanova) shows that initiation simply amounted to showing that the exterior rites (*ṣāhīr*) of all the revealed cults conceal under equivalent and inadequate allegories the same hidden meaning (*bāṭin* whence the name *Bāṭiniya* of the Karmaṭians), purely negative and without mystery; initiation being reduced to teaching of the use of wholly speculative philosophical reasoning, which propounds without practical differentiation the antithesis, opposite conceptions like "law" and "breach of law", "*tawḥīd*" and *taḥkīd*"; cf. DRUZES). But this is only, as we have seen, one aspect of the fundamental intellectual monism of the Karmaṭians.

IV. Its Imāmī technical vocabulary; its criticism of the other extremist *Shi'ī* sects (Ghulāt).

Terrified by the wide and rapid spread of Karmaṭian doctrines in the most cultivated centres of the Muslim world the Sunnī heresiographers strove to discover and denounce an anti-Muslim offensive in it, originating in a foreign religion — Mazdeism, Mazdakism (*Khurramiyya*), Manichaeism —, in racial hatred, setting Iranian against Arab, the tribe of Rabi'a against that of Muḍar (*Shu'ubiyya*). They quoted parallelisms which are not very convincing.

The hypothesis of the Sabaeen origin of the Karmaṭians, which is also found among them, is more attractive. It seems to have been put forward by the Karmaṭians themselves with a view to gaining citizenship in the Sunnī Muslim state, presenting their syncretism as the heritage of Abraham (*khaliliyya*) from these mysterious "Sabaeans" mentioned by the Qur'ān. Such is probably the leading idea in the Sabaeen tale developed

among others by al-Shahrastānī in some pages borrowed without acknowledgment from the Karmaṭian Iḥāsān Ṣabbāḥ. The documents hardly permit us to connect effectively the Karmaṭians with the pseudo-"Sabaeans" of Ḥarrān or Wāsiṭ.

In reality an examination of the Karmaṭian technical terms shows that this doctrine was formed before the end of the second century A. H. in the Imāmī circles of Kūfa. The Karmaṭians retained, embedded in their system, various series of Imāmī special terms, which we find again among other extremist sects, *lshāḳiyya*, *Shari'iyya*, *Namiriyya* (*Nusairiyya*), *Khasakiyya*, *Halladiyya*; e. g.: *nūrānī*, *nafsānī*, *rūḥānī*, *djismānī*, *shā'shā'ānī*, *waḥdānī*, *nāmūs*, *lāḥūt*, *nāsūt*, *djabrūt*; *faiḍ*, *ḥulūl*, *zuḥūr*, *djavalān*, *takwīn*, *ta'yid*; the mystic sense of the 28 letters according to the *djāfr*. The last orthodox Imāmī Muḥaddithūn received into the Karmaṭian *isnād*'s are Mufaḍḍal b. 'Omar and Muḥammad b. Sinān al-Zāhiri (also admitted by the Nusairis).

The first clearly Karmaṭian author is Abū 'l-Khaṭṭāb Muḥammad b. Abū Zaynab al-Asadī al-Kāhili (d. 167 = 783 at Kūfa); he substituted in place of the "personifying" Qur'ānic exegesis of the early *Shi'is* an abstract allegorical exegesis; in cosmogony he replaced the use of letters (cf. Mughira) by their corresponding numerical values (mystic meanings of *djāfr*); it was he also who seems to have invented the pledge guaranteeing the secret of initiation: for the *Khaṭṭābiyya*, his adepts, are the only Imāmī sect whom al-Shāfi'ī (*Kitāb al-Shahādāt*) will not allow to take the oath on the ground that they make of the *taḳīya* (negative practice of secrecy) a positive precept justifying false testimony (to keep a secret).

After him, Abū Shākir Mainūn al-Qaddāh al-Makḥzūmī (d. towards 180 = 796) gave definite dogmatic form to the Karmaṭian doctrine of emanation; he substituted the abstract first principles for the five *aitām* (deified historical personages), demiurges of the first Ghulāt. He denies that the divine essence has any attributes and defines the "eternal Qur'ān" as a pure divine illumination in intelligences.

If one compares Karmaṭian dogma with the preceding Imāmī systems, their naively "materialising" (*taḍjīm*) and "personifying" (*taṣakhkhūs*) notions and their idolatry of 'Alī and his descendants, we see at once after the connection a transposition: here they are intellectualised, objectified in abstractions. Finally the Karmaṭians, considering only rank and the external role played, restore to Muḥammad priority over 'Alī. Not that they in turn deify Muḥammad — it is simply his predestined role of pre-eternally foreseen messenger or herald (*nāṭīk*) that they look at. They are (to use the exact term) not *Muḥammadiyya* but *Mimiyya* (the letter *mim* means in *djāfr* the name, *ism*: that is to say the mission of onomaturge, *nāṭīk*, devolved on the prophet), in opposition to the *'Ainiyya* (the letter *'ain* in *djāfr* means the original sense, *ma'nā*, whence: the hidden meaning, the "silent" (*sāmīṭ*) role of "tacitly designated" chief, devolved on 'Alī), like Dūsī and Nakḥa'ī.

During the polemics that went on in Kūfa between Imāmī writers down to the third century A. H. the Karmaṭian authors, Abū 'l-Khaṭṭāb, Faiyād and Nahikī, were "Mimiyya"; they place Muḥammad (*nāṭīk* = *aḳl* = *kā'im* = *nabī*) above 'Alī (*sāmīṭ* = *nafs* = *walī* = *waṣī*). The Nusairi Kha-

sibi, modifying the doctrine of the 'Ainiya to suit the exigencies of controversy, maintains 'Alī (*mā nā = imām*) above Muḥammad (*ḥiḍḡāb = ḥuḍḡja*) and Salmān (*ism = bāb*). To the Nuṣairi arguments that Muḥammad is the "veil" uncovering the divine appearance called 'Alī, the Druzes reply with good Karmaṭian logic that a "veil" only covers and that Muḥammad has given more perfect evidence of God by his words than 'Alī by his silence. Internal sanctity is set aside in favour of the gift of prophecy and sinlessness neglected for infallibility.

It is the same polemical attitude which dictates to Maimūn Qaddāh the order in which he associates his two first principles (followed in that by Kaiyāl, Baradḡāṭ, the Druzes and Ḥasan Ṣabbāḡ); first the intellect (*'aql = nafs nāṭika = awḡal = sūbiḡ*) and secondly the soul (*nafs = nafs ḥaiwānī = thānī = tāli = tāḡiḡ*). Then comes the "fiat" (*kun, ḡjadd*), the central sign of divine intervention, before the second pair of principles, simply reduplication of the first among the Druzes (*'aql* and *nafs*) and in Ḥasan Ṣabbāḡ (*fath* and *ḡhayāl*). The identification of the five Karmaṭian first principles with those of the Hellenistic philosophers, like the physician Rāzī (intellect, soul, matter, space and time) does not seem to be primitive and represents a later effort at syncretic conciliation.

In psychology the Karmaṭians deprive each human individuality of all definitive reality; his body being removed *a priori* like an unreal veil, there only remains a momentary principle of individuation to which they refuse any name implying internal finality, like *rūḡ, nūr, ma'nā* (employed by the early Imāmis); they substitute for it the term *'aql* "intelligence", indicating a simple causation on the part of God, "ab extra", a role of an observer who takes no actual part in what he sees.

They criticise the gross materialism of the first ḡhulāt (and of the Nuṣairis) who believe that souls are fallen stellar bodies, fallen from the higher heaven (of which the sun or the moon is the threshold) and destined to return there by that same predestined attraction which caused them to adore the divine apparitions imperfectly seen in the course of the cycles of bodily transmigration (*tanāsukḡ*). For the Karmaṭians there is no corporeal transmigration even for the damned (they have only been phantoms) in the bodies of animals and we cannot even speak of true spiritual "transmigration" for the elect, since the immortality of the intelligence is only impersonal whether it assumes modes as "sparks" or not.

Contrary to the Nuṣairis, who refuse initiation (and immortality) to women, the Karmaṭians admit them (*ṡisālūt al-niṡā* in the Druze canon).

The Karmaṭians profess an integral nominalism; the letters of the alphabet are only intellectual symbols; the name is the mask of the thing, not its manifestation (Nuṣairi view); each symbol ought to be destroyed to permit access (*taḡṡil*) to the pure Idea. The obligatory duties of religion etc. are only supererogatory counsels leaving free play to all human faculties (*ibāḡa*).

V. Its connections with Hellenistic philosophy.

Karmaṭianism preserved from its place of origin an old stock of primitive Islāmic terms, Qur'anic and others, in which it retained the archaic special meanings they had before the third century A. H.

(e.g. *amr, ḡl, 'ard, kun, sam', ṡahid, balāḡḡ, ḡḡya, yaḡin, istiḡāma, ikḡlās, ridā, taslim*). From the same period it retained an ignorance of certain problems, which were only put forward later, among the Imāmis after Ibn al-Ḥakam, among the Sunnis after Naẓẓām, such as the perception of sensation, the conceptual process, the modality of a harmony between the movements of the limbs and the intentions of the heart which accompany them. The Karmaṭians on these three points profess a kind of fatalism, a blind occasionalism, something like that of Ḍjahm.

They, however, like the Mu'tazilis in another field, marked the very first awakening of Muslim philosophic reflection at its contact with Hellenistic science: by the systematic employment of the word *'aql*, intelligence, to designate the principle of individuation which constitutes man. This brought them not only to the abstract allegorical exegesis analysed above, in which dialectic gives place to logic, but also to the direct acceptance of scientific bases, of natural constants — viz. consideration of arithmetical properties (numbers 3, 5, 7, 9, etc.) permitting the calculation of the astronomical calendar (new-moon festivals: against the Sunnis) —, of the four elements and the "humours" (*ṡabā'ir*), specific remedies (*'aḡḡḡir*), the foundation of medicine.

Without going further or assimilating the whole corpus of Hellenistic philosophy, as the *Iḡḡwān al-ṡafā* attempted to do, Karmaṭianism prepared many minds to understand it; it presented to them as divine prophets the ancient philosophers of Greece: Pythagoras, Empedocles, Plato, the masters of hermetism (Agathodaemon, etc.), stimulating in consequence its adepts to read works coming from these foreigners as freely as the Qur'ān.

The same licence was to a less degree allowed for certain Persian sources (books of Ḍjāmāsp; the "amshapands", being regarded as prophets) and much later for Hindu sources also.

VI. The role of Karmaṭianism in the evolution of the Islām.

The influence of Karmaṭian authors, especially of the encyclopaedia of the "Faithful Friends" (*Rasā'il Iḡḡwān al-ṡafā*), on diverse Muslim thinkers belonging to the Sunna or to orthodox Imāmism has been considerable.

In philosophy, it inspired the political theory of idealistic imāmism (*istiḡād lil-nubuwwa*) of al-Fārābī and Ibn Sinā (Rāzī had polemics on this subject with Kaiyāl), the emanation theory of the ten *'uḡl* (Ibn Sinā). The famous parable of the self-taught (Ḥaiy b. Yaḡẓān) would also be of Karmaṭian origin (cf. the art. DRUZES).

There were in the same way various infiltrations into dogmatic theology: abstract allegorical exegesis of the Qur'ān, *tanāsukḡ* of Ibn Ḥa'it and Ibn Yanūsh, and the *nūr Muḡammadi*.

In mysticism, it is still clearer from Sahl al-Tustarī [q.v.] to Suhrawardī of Aleppo (*nūr ḡāḡir*). The mystics who attack Karmaṭianism use its vocabulary (al-Ḥallāḡ, al-Tawḡidī, al-ḡhazālī; [q.v.]). Ibn Taimiya rightly pointed out the adoption of Karmaṭian theses in works of the Andalusian school of Sunni mystics, Ibn Barradḡān, Ibn Ḳasī, down to their pupil, the great mystic Ibn al-'Arabī [q.v.]. When he defined the five periods of creative evolution and of gnostic involution (same number in al-Farḡhānī; three times in 'Abd al-Karīm Ḍjilī) and when he identified the spirit (*rūḡ*) with in-

telligence (*ʿaql*) in his monist descriptions of the fundamental unity of being (*waḥdat al-wuḍūd*) in reference to the Kor'ānic themes of the covenant (*mithāq*) and the Nocturnal Ascension (*ḥab ḥusain*), — Ibn al-'Arabī only took up Karmaṭian exegesis again in a more moderate form.

The remarkable organisation of trades and Muslim guilds goes back to the Karmaṭians (cf. the art. *ṣūf*).

KARMISĪN. [See KIRMĀNSHĀH].

KARNĀK. [See AL-UḲṢUK].

KARNĀL (1). A town of 23,559 inhabitants (1901); situated a few miles W. of the Djamnā R. in 29° 41' N. 76° 59' E. The town is the administrative centre of a district of the Panjāb, but historically and ethnologically it belongs to Hindustān rather than the Panjāb. The language commonly used by the inhabitants is a dialect of Western Hindi. It is no doubt a place of great antiquity, and the name is traditionally derived from Karna of the *Mahābhārata* (Karnālaya = Abode of Karna). But it was not of great importance in early times, and is not mentioned in the accounts of the invasions of India by Maḥmūd Ghaznawī and Mu'izz al-Dīn. Its prosperity seems to have commenced with the construction of the canal from the Djamnā by Feroz Shāh Tughlak (see Shams-i-Sirāḍj, *Tarikh-i Firōz Shāhi*, Elliot and Dowson, *Hist. of India*, iii. 300). The country became productive and rich, and being on the direct road to Dihli from the north became an object of attention to invaders and rebels. Thus in 980 (1573), while Akbar was engaged in Guḍjārāt, Karnāl, Pānipat, and Sonpat were plundered by Ibrahim Ḥusain Mirzā. Djahāngir halted at Karnāl in 1013 during his pursuit of his rebellious son, Khusrāw (Elliot and Dowson, *o. c.*, VI, 296, also Beveridge's trans., *Jahangir's Memoirs*, Vol. i.). In 1120 (1708) during the reign of Bahādur Shāh, Karnāl was attacked and plundered by the Sikh rebels (Elliot and Dowson, *o. c.*, vii. 419). But the most noteworthy event in its history was the great victory of Nādir Shāh over Muḥammad Shāh 1152 (1739) which was fought just outside the walls of the town. The imperial army was before the battle encamped on the banks of the canal, where it was re-enforced by the 30,000 cavalry of Burhān al-Mulk, Nāzim of Awadh (Oudh). But Nādir Shāh's army was under better discipline and provided with abundant artillery, and the

defeat of Muḥammad Shāh's forces was sudden and complete. After the break-up of the Mughal empire following on this invasion (and those of Aḥmad Shāh Durrāni and the Mahrāttas), Karnāl and the surrounding district again became a prey to the Sikhs. Gaḍipat Singh of Lūnd took possession of it in 1763 after the battle of Sirhind but Nadjaf Khān recovered it in 1775. After this the Sikhs and Mahrāttas contended for its possession with varying results. The intrepid adventurer, George Thomas, drove out the Sikhs in 1798, but only held it for a short time. Gurdit Singh, the Sikh chief of Lādwa, then held it for a space until driven out by a British force under Skinner in 1803, after Lake's defeat of the Mahrāttas at Dihli.

After these events Karnāl became the headquarters of a British district and was for several years the most advanced military post towards the north-west. Partly on account of its unhealthiness and partly owing to the advance of the British frontier to the Satlāj it was given up as a military post in 1841, but remained the centre of a civil district. When the mutiny of 1857 broke out, Karnāl was held by the British with the assistance of the Sikh Rājā of Lūnd and the Muslimān Nawwāb of Karnāl, and remained an important link in the chain of communications between the Panjāb and Dihli. Its later history is uneventful. The canal originally constructed by Feroz Shāh and afterwards extended by 'Alī Mardān (whose name it bore) in the reign of Shāh Djahān I, was entirely remodelled by British engineers and now irrigates a very extensive tract. The only building of importance is the tomb of the Saint Bū 'Alī Ḳalandar, locally said to have been built by Ghiyāth al-Dīn (probably Tughlak), but the architecture shows it to be a much more modern building. Bū 'Alī Ḳalandar died in 725 (1323) and Ghiyāth al-Dīn died the following year, so the tradition as to the original foundation of the tomb is probably correct. Both Pānipat and Karnāl claim to have this saint's tomb.

2. A district in the province of the Panjāb lying between 29° 11' and 30° 15' N. and 76° 11' and 77° 17' E. Area 3153 sq. m. Population (1901) 883,225 of which 241,412 are Muslims. Its eastern boundary is the R. Djamnā, the District of Dihli lies to the S., that of Ambāla to the N., and the territory of Paltāla and other Sikh States to the W. In addition to the Djamnā, the small rivers called Čitāng and Saraswatī flowing from N. E. to S. W. traverse part of the district. The first named is absorbed in the Western Djamnā canal system. The Saraswatī joins the Ghaghar and the joint stream is lost in the Rāḍiputāna desert although, when the Saraswatī held a greater supply of water, it was a famous river, and the stream probably joined the old course of the Satlāj, otherwise called the Hakra. It gave its name to the town of Sarsutī or Sirsa. The territory in the N. of the Karnāl district was the Kurukshetra of the *Mahābhārata* still locally called Kulchētar. Stānēśwara (now Thānēsar) was the principal town. Towards the end of the 6th cent. it became the centre of a powerful kingdom to which Harshavardhana succeeded in 606 A. D. He spread his rule over Northern India from the Bay of Bengal to the Satlāj and Guḍjārāt and was an enthusiastic supporter of Buddhism. He was visited by Yuan Čwang at his camp at Kanawdj in 635

A. D. who also visited the capital Sthānēswara before his reception by Harsha. After Harsha's death his empire rapidly broke up and Thānēsar lost its importance. It was sacked by Mahmūd Ghaznawī, and traversed by Mu'izz al-Dīn Muḥammad b. Sam whose defeat and subsequent victory over Prithwī-Rādj took place at Tirāori, a small town farther to the south near Karnāl in 588 (1192). This place is called Tarām and Talāwari by the chroniclers, but Tirāori is the actual name in use at the present day. At this place there is a fine serāi of the Mughal period converted into a fort by the Sikhs in the 18th cent. A few miles from Karnāl is also the small town of Kundj-pura founded by Nidjābat Khān, an Afghān claiming Ghorghushti descent, in the time of Muḥammad Shāh. It was a fort in a marsh, and was called by its founder Kundj-pura, or the Crane's town; hence the family takes its present name of Kundjpuria. Nidjābat Khān afterwards took the side of Nādir Shāh but fought against Aḥmad Shāh Durrāni. All the sovereign powers of the Nawwābs were taken from them in 1849. Nawwāb Muḥammad 'Alī Khān upheld the authority of the British Government during the mutiny of 1857. The family, though reduced through family feuds, still holds a good position. The Mandal family of Karnāl also has the title of Nawwāb. It claims Afghān origin, but is probably in reality Djaṭ [q. v.]. The Nawwāb Aḥmad 'Alī Khān did good service to the British Government in 1857, and received substantial *djāgirs*. The family still continues prosperous.

In the South part of the district the principal place is Pānipat [q. v.].

The Muslim families of Pānipat are of a good stamp. Among them is a branch of the Sayyids of Bārḥā. The Nawwāb of Pānipat is the head of the local Anṣārīs descended from Khwādja 'Abd Allāh of Herāt, whose son settled at Pānipat in the reign of 'Ala' al-Dīn Mas'ūd Shāh 639 (1241). Nawwāb Bakr Allāh Khān in the early part of the 19th cent, and his son N. Amān-Allāh Khān, both did good service to the British Government, and the present Nawwāb holds large estates.

The other principal Muslims of the district of Karnāl are Rādjputts of the Čawhān, Mandhār, Ghōrēwāha and Juriwar clans. Some of these clans have sections which still retain the Hindū religion. The conversion to Islām is generally asserted to have taken place in the reign of Firōz Shāh Tughlak.

KARNĀTAK. [See CARNATIC].

KARRĀMIYA, sect, called after Abū 'Abdallāh Muḥammad b. Karrām (or Karām or Kirām; see *Mizān al-Fitdāl*, iii. 127, and for further ancestors Ibn al-Aṭṭar, *Kāmil*, vii. 149). Of this person, who

is called al-Sidjistānī, a fairly full biography is given by al-Sam'ānī in the *Ansāb*, 476^b, 477^a. According to this, he was of the Banū Nizār, was born in a village of Zarandj, was brought up in Sidjistān, and afterwards went to Khorāsān, where he attended the courses of Aḥmad b. Ḥarb, the Ascetic (d. 234); at Balkh he heard Ibrāhīm b. Yūsuf al-Mākiyānī (d. 257), in Merv 'Alī b. Ḥadjar (d. 244), and in Ileiāt 'Abdallāh b. Mālik b. Sulaimān; and he recited many traditions on the authority of Aḥmad b. 'Abdallāh Djawybārī (d. 247) and Muḥammad b. Tamīm Faryānānī: "had he known these two, he would have left them alone", both being notorious fabricators. After spending five years in Mekka he returned to Sidjistān, where he sold all his possessions. He proceeded to Nisābūr, where he was imprisoned by the governor Muḥammad b. Ṭāhīr b. 'Abdallāh (according to the *Tādj al-Arūs* on two occasions); after his release in 251 he left Nisābūr and proceeded to Jerusalem, where he ended his days in 255. The sanctuary of his followers there, called Khāniqāh, is mentioned by Muṭahhar b. Ṭāhīr (*Livre de la Création*, cd. Huart, v. 149) a hundred years later, as also by al-Muḥaddasī.

2. Doctrines. The opinions of this person were set forth in a work called *Adhāb al-Kabr* "The Torment of the Tomb", of which some citations are given in the *Farḡ bain al-Firaḡ*, pp. 202—214, where there is the fullest account of the sect, with some of whose members the author held debates. His chief theological doctrine, which caused the inclusion of his sect among the Mushabbihā, was that the Divine Being is a Substance (*Djāwḥar*), for which some of his followers substituted Body (*Djism*), though without human members, and in contact (*munāssa*, for which the euphemism *mulāḡat* was substituted) with the Throne, which is located in space. This was apparently a deduction from the Qur'anic 'ala 'l-'arshi 'starwā, and, indeed, the rest of his theology would seem to have been an endeavour to work the Qur'anic texts into certain parts of the Aristotelian philosophy, notably the distinction between Substance and Accident, and that between *dynamis* and *energeia*. Thus his followers could maintain that God was "speaking" before He spoke, and could be worshipped before there were any worshippers. The doctrine of the eternity of the world was reconciled with the Qur'anic creation by some subtle expedients; God, he held, was subject to certain Accidents, such as willing, perceiving, speaking, coming in contact; over such accidents He has power, but not over the world and the objects therein, which were created not by His will, but by the word *kun*. Thus, it would seem, the tense in *kun fayakūnu* could have its proper meaning.

Another doctrine to which allusion is often made in *kālam* works is that faith (*īmān*) is constituted by a single utterance of the two *shahāda's*, and involves neither conviction nor works. This view, through similar to the chief thesis of the Murdji'a, is said to have been held by no one before him (Ibn Taimiya, *Kitāb al-Īmān*, Cairo 1325, p. 57, who refutes it at length). The rest of his opinions, as recorded in the *Farḡ*, seem to have been in the direction of moderation. Thus the infallibility of Prophets was confined within certain limits, and a reason was found (somewhat in the style of Ibn Ṭufail) why those

whom no prophetic message had reached ought to believe in prophetic missions; he held that there might be two *Imām*'s simultaneously, and that each would have a right to his followers' allegiance, even when the two were at variance. His innovations in the *furū'* were such as to render the law more flexible.

3. History of the Sect. It would seem that the Karrāmī doctrine spread chiefly in Khorāsān, and in 370 the author of the *Farḡ* debated with a member of the sect in the presence of the Sāmānīd commander Muḥammad b. Ibrāhīm b. Sīmdjūr. It was favoured by Sabuktakīn of Ghazna out of respect for the asceticism of Abū Bakr Ishāk b. Maḥmashādh (d. 383), the chief of the Karrāmīs in his time, who is said to have converted some 5,000 *dhimmīs*. This person's son Muḥammad encouraged Maḥmūd b. Sabuktakīn in a violent persecution of the Bāṭinis; of this there seems to be an echo in the Life of the Ṣūfī Abū Sa'īd (357—440; ed. Jhukovski, 1899, i. 84—91), where Ishāk b. Maḥmashādh makes common cause with the qaḍī Sa'īd (a Ḥanafite) against the saint; the numbers of the Karrāmīs in Nisābūr at the time are given as 20,000. In 403, however, this qaḍī, who had made the pilgrimage, and been favoured by the Caliph Kādir, complained of the Karrāmī heresy before Maḥmūd at Ghazna; Muḥammad b. Ishāk thereupon repudiated the doctrine, while those who openly adhered to it were penalized. Many, however, continued to hold it at Nisābūr; Ibn al-Aṭhīr in 488 records a civil war in that city between the Karrāmīs and the joint forces of the Ḥanafīs and Shāfi'īs, the leaders of the first and second of these being descendants of the leaders in Maḥmūd's time. Yāqūt (s. v. Bidjīstān) mentions a Karrāmī preacher who acquired popularity at Nisābūr in the middle of the sixth century; and 'Abd al-Qādir Dīlānī (d. 561; *Ghunya*, Cairo 1288, i. 81) speaks of them as still numerous in Khorāsān. Fakhr al-Dīn Rāzī (d. 606; *Asās al-Taḥdīs*, Cairo 1328, pp. 96—98) apparently thinks of them as still existing. It is probable, however, that the sect was practically exterminated when the lieutenants of Činghiz Khān massacred the inhabitants of Khorāsān; and when writers of a later time allude to its doctrines (e.g. Ibn Taimiya and the author of the *Mawāḳif*) they probably derive their knowledge from earlier works.

4. Literature of the Sect. In the *Farḡ* it is stated that the sect was subdivided into three minor sects, which, however, were mutually tolerant; these were called Ḥaḳḳākiya (?), Tārā-iḳiya (?), and Ishākiya. Shahrastānī mentions twelve minor sects, of which he enumerates six: Ishākiya (as above), 'Abidiya, Nūniya, Zaribiya, Wāḥidiya, and Hāisamiya. On these the first was doubtless named after that Ishāk who was mentioned above; whereas the last was named after one Muḥammad b. al-Hāṣam, who is called their *Mutakallim* in the *Mizān*. The works wherein the founders of these minor sects put forth their views seem to have obtained little notoriety; the author of the *Bayān al-Adyān* (485; Schefer, *Chrestomathie Persane*, i. 152 text), though living at Ghazna, just knows the name of the main sect; and 'Abd al-Qādir (*loc. cit.*) in giving the names of Karrāmī authorities is in error in each case. The work of the founder *'Adhāb al-Qabr* seems to be known only from the citations in the *Farḡ*.

Orientalistes*, Paris 1899, 3rd sect., p. 114; Houton, *Die philos. Systeme*, p. 340 sqq.; Barthold, *Turkistan*, p. 306.

(D. S. MARGOLIOUTH)

KARS, a town in Armenia, called Kars in Ibn al-Aṭhīr, Kars in Yāqūt and Ḥamd Allāh al-Qazwīnī, Kārs in Shāraf al-Dīn 'Alī Yazdī and later. According to a doubtful etymology, the name comes from the Georgian *kari* "gate"; *kari-kalaki* is said to mean "town at the gate" (from its situation on the frontier between Armenia and Georgia). The town (τὸ Κάρις) is first mentioned by Constantine Porphyrogenetes (*De administr. imperio*, ch. 44) as the capital of the chief of the Armenian princes (ἀρχων τῶν ἀρχόντων). From 961 Mušegh, a brother of the king of Ānī, Ashot III (cf. above, i. 355^a), ruled in Kars, and his successors. A manuscript of the Gospels found in Jerusalem with miniatures of importance for the history of culture dates from the last of these princes, Gagik (1028—1064). The king, queen and their daughter are represented seated in Oriental fashion and wearing Oriental costume; Kars, although it did not then belong to the Caliph's empire, was apparently under the influence of its culture. Gagik continued to hold his principality even after Ānī had been incorporated in the Byzantine empire (1044). It was only when danger threatened from the Turks that he was induced to renounce his rights voluntarily in favour of the Emperor Constantine X Ducas (1059—1067) and received in return a town in the Cilician Taurus. But even the Byzantines could not avert the danger, for in the very same year Ānī and Kars were both conquered by the Turks. Kars remained a Muḥammadan town till 603 (1206—1207), when it was taken by the Georgians (Ibn al-Aṭhīr (ed. Tornberg, xii. 169). It was besieged in vain by the Khwārizmshāh Dīlāl al-Dīn (cf. above, i. 1004) in 623 (1226) and taken by the Mongols in 1239 and, according to Ḥamd Allāh al-Qazwīnī (*Nuḥat al-Kulūb*, ed. Le Strange, p. 93), it belonged at a later period with Ānī to the province of Georgia (Gurjīstān wa-Aḅkhaz) in the kingdom of the Ilkhāns (cf. above, ii. 465 sq.) and later again apparently to the kingdom of the Dīlāir (cf. above, i. 1003^a). Unlike Ānī, Kars was never a Muslim mint. In 1386 Kars was captured by Timūr; it is said to have been levelled to the ground (*Zafar-Nāme*, i. 400). The town was then in the possession of a prince named Krüz-Bakht, who does not appear to be mentioned elsewhere. It was not till the year 1579 (according to Ḥādījī Khalifa, *Djihān-numā*, p. 407, however, 988 = 1580) that Sulṭān Murād III (1574—1595) had Kars rebuilt as an Ottoman fortress by Lālā Muṣṭafā Pasha; during the operations a marble slab is said to have been found with an inscription recording an earlier erection of the time of Sulṭān 'Izz al-Dīn (probably Kīlīdj Arslān II, 1156—1188). Kars was raised to be the capital of an eyalet of six sandjaks under Ottoman rule and also became a place of pilgrimage; the tomb of the Ṣūfī Abū 'l-Ḥasan al-Kharakānī (d. at the beginning of 425 = Nov., 1033) was shown there (cf. Sam'ānī, ed. Margoliouth, fol. 194 b), but he can never have been in Kars. The tomb is said to have been revealed by the saint himself in a dream — a story often told of other places. The

first Friday mosque was built by Lalā Pasha over the tomb of the saint.

Kars was conquered by Shāh 'Abbās in 1604 and in 1616 rebuilt by the Turks, attacked in vain in 1628 and 1744 by the Persians and captured for the first time by the Russians on June 23 (July 5), 1828. On Nov. 16 (28), 1855, Kars had to surrender to the Russians after a long defence under General Williams (later Sir Fenwick Williams of Kars). In the war of 1877—1878 Kars was stormed in the night of 6/18 Nov., 1877, and ceded to Russia by the peace of 1878; in 1918 it was returned to the Turks by the treaty of Brest-Litowsk; this cession remained in force even after the treaty of Brest-Litowsk became void.

The number of inhabitants of Kars about 1860 was 12,300 (*Ritter's Geogr.-statistisches Lexikon* 5, s.v.), in 1878 only 8,672 (according to the *Encyclopaedia Britannica*). Under Russian rule the number seems to have fallen considerably at first and then to have risen again rapidly (1889 only 3,941, in 1897 20,805, in 1908 18,397, mostly Armenians). The old Armenian church which had become a mosque (probably the Kizil Kilisa monastery mentioned by Ewliyā Celebi; as a mosque called Husain Katghudā Djāmi'i) now became a Greek Orthodox church. There were, in addition, two Armenian churches and three mosques (two Sunni and one Shi'i). No accurate information is available in Russia regarding conditions since the restoration of Turkish rule; this fact is said to have been fateful for the Armenian population.

KARSHĪ, an Uighur word for "castle, palace", probably borrowed from a native language of Eastern Turkestan and later adopted by the Mongols. The town of Nakhshab or Nasaf [q.v.] has taken its modern name of Karshī from a palace built for the Khān Kabak (1318—1326; see the art. ČAGHATAI KHAN), 2 farsakh from the town, all trace of which has long since disappeared. Cf. Sharaf ad-Dīn Yazdī, *Zafar Nāme*, ed. Muḥ. Ilāhdād, Calcutta 1887—1888, i. 111; G. Le Strange, *The Lands of the Eastern Caliphate*, Cambridge 1905, p. 470 sq.

(W. BARTHOLD)

KARSHŪNĪ is the name, the origin of which has not yet been explained, for the Syriac alphabet adapted to suit the Arabic language. Yūsuf Daryān, Archbishop of Ṭarsūs, wrote recently on the name in the *Mashriq*, 1904, vii. 785—790, but his suggested derivation of the name from an unknown Syriac *karkūn*, diminutive of *karkā*, which would describe the alphabet as the "small", "round", is quite improbable. Just as the Jews used their alphabet to reproduce the language of the countries that afforded them hospitality, not only for the sake of secrecy but also as a sign of nationality, so also the Syrians must have written the language of their conquerors in their own alphabet soon after they had adopted Arabic

for everyday use. The letters lacking in the Syriac alphabet were supplied by pointing those already in existence, but in doing this more attention was paid to the sound than the shape of the Arabic letters. *Khā* and *ghayn*, for example, are usually reproduced by Syriac *kāf* and *gāmal* with *rakkākhā*, *dīm* by the Jacobites usually by a point inserted in the letter, by the Nestorians by a hook below it. *Zā* and *ḡād* are written by the Nestorians after the Arabic fashion with points over *zā* and *ḡādāi*, but among the Jacobites often by a point in the *zā*, because they had come to be identical in pronunciation. The feminine ending is usually represented by *hē* with two points above it in the Arabic fashion. Vowels are placed, sometimes in the Syriac, and sometimes in the Arabic way, but *ū* and *ī* are almost always represented by *ḡamma* and *kasra*. Whether there were different rules in different periods and localities can only be ascertained after an accurate examination of manuscripts but nothing of the kind has so far been attempted. (C. BROCKELMANN)

KART, the name of a dynasty which ruled Herāt from 1245 to 1389 A. D. It was founded by Shams al-Dīn Muḥammad I, Kart, who was descended from the Shansabānī house of Ghūr, the family to which the brothers Ghiyāth al-Dīn Muḥammad and Mu'izz al-Dīn Muḥammad b. Sām belonged. As Herāt recovered from the devastating raids of the armies of Čingiz Khān, Shams al-Dīn gradually gained power, and by 1245 had established himself as ruler of the state, and used the title of Malik, borne by his descendants. In 1251 Mangū, the Great Khān, when reorganizing the administration of his empire, confirmed Shams al-Dīn Kart as governor of Herāt, Sistān, Balkh and the country lying between those provinces and the Indian frontier. During the latter part of Shams al-Dīn's reign his son Rukn al-Dīn acted as his coadjutor, but predeceased him, dying in 1283, and when Shams al-Dīn himself died, in 1285, he was succeeded by Rukn al-Dīn's son, Fakhr al-Dīn. As the power of the Mongol Īl-Khāns of Persia declined, that of the Kart Malikis of Herāt increased, and Fakhr al-Dīn befriended the powerful Amīr Čubān, who had been regent of Persia during the minority of Abū Sa'īd Bahādur Khān, the fourteenth Īl-Khān. When Abū Sa'īd Bahādur, apprehensive of the growing power of this family, attacked it, Amīr Čubān sought an asylum with Ghiyāth al-Dīn, who received him but in 1327 treacherously put both him and his son Djalaw Khān to death. Ghiyāth al-Dīn himself died in 1328 and his two elder sons, Shams al-Dīn II and Hāfiz, who succeeded him in turn, died in 1329 and 1331. The historian Hamd Allāh Mustawfī attributes their deaths, following one another at such short intervals, to the divine displeasure incurred by Ghiyāth al-Dīn's treachery towards Amīr Čubān.

Hāfiz was succeeded by a third brother, Mu'izz al-Dīn, who sent an army to the assistance of Malik Kuṭb al-Dīn of Kirmān, driven from his capital by the Amīr Mubārīz al-Dīn. This army was defeated and a second army sent to the aid of Kuṭb al-Dīn was shut up in Kirmān and compelled, at the end of 1340, to capitulate. Mu'izz al-Dīn, who died in 1370, left two sons, Muḥammad, who held the government of Sarakhs, which he retained after his father's death, and Ghiyāth al-Dīn Pir 'Alī, who succeeded him in Herāt. In 1380 the Amīr Timūr sent an envoy to Herāt, to claim the

allegiance of its ruler and his presence, with a contingent, at the forthcoming muster of his army, but Ghiyāth al-Dīn Pir 'Alī detained him on various pretexts while he provisioned the city and completed its defences. The envoy was obliged to return to Samarkand and report the failure of his mission, and in the spring of 1381 Timūr marched to Herāt and captured the city, its ruler and his eldest son, Pir Muḥammad, after a few days' siege. Some of its leading citizens were deported to Shahr-i Sabz and its defences were dismantled, but the Malik and his two sons, the younger of whom had been induced to surrender the strong fort of Ishkalā, were pardoned, and Ghiyāth al-Dīn Pir 'Alī was permitted to retain Herāt as a vassal of Timūr until 1389, when the dynasty was extinguished.

KARTĀS. [See KIRTĀS].

KĀRŪN, the largest river in Southern Persia. It rises in the north-eastern part of the district of 'Arabistān (earlier called Khūzistān), a little above 32° N. lat. on the Zardeh-Kūh (Kūh-i Zard, mentioned as early as the xvth century by Ḥamd Allāh Mustawfī; see the *Bibliography*), which belongs to the Bakhtiyārī mountain system, to be more accurate on one of the range named Kūh-i Rang, one of the highest mountains in S. W. Persia (estimated at 13,000 feet). The actual source of the river, according to Sawyer (*Bibl.*; *op. cit.*, p. 486, with a picture), is about 10 miles above the place called Ser-i Česhme-i Kurang "main source of the Kurang (Kuran)". The Zā'indeh or Zēndeh-Rūd, also called Isfahān-Rūd, likewise rises on the Zardeh-Kūh and flows eastwards towards Isfahān (on it see Ritter, *op. cit.*, ix. 22; G. Le Strange, *op. cit.*, p. 207; cf. also ii. 529^a and the article ZĒNDE-RŪD). As the source of the Kārūn is only about 100 miles from Isfahān, Shāh 'Abbās I, the Great, thought of leading the Kārūn into the Zēndeh-Rūd by a tunnel through the mountains. The work although almost finished at his death, was not continued by his successors, however; the remains of it may still be seen at the present day; cf. Layard, *op. cit.*, p. 50 sq.

The valley of the Kārūn is not yet sufficiently known, particularly in its upper course; among those who have explored it are Kinneir, Rawlinson, Selby, Ainsworth, Layard, Chesney, Loftus, Houtum-Schindler, Mackenzie, Lynch, Bateman Champain, Wells, Sawyer and Graadt van Roggen. We may call the upper part its course down to its exit from the mountains at Shuster, the middle course from Shuster to Ahwāz or Naṣriye, where it breaks through the spurs of the Djabal Ḥamrīn; its lower course runs through the alluvial plain formed by the Kārūn system. As a result of the great windings, which the river takes in its course, it covers about 500 miles from its source to its mouth in the Shaṭṭ al-'Arab, while a straight line between the two points is only about 150 miles. In its upper course the Kārūn makes two great loops in about 32° N. lat. Shuster which is a little

above this line and only a little south of the source of the river is in a straight line only a third of the distance the river has covered from the source. The course of the Kārūn is at first a south-easterly one; it then runs from east to west, while the next section runs north-west to Sūsān where the second smaller loop is formed towards the south-west and then the river runs north-west again. This direction is maintained till Chamani Yorga (20 miles as the crow flies N. E. of Shuster) is reached. From there to its mouth the Kārūn runs S. W., although at times it describes very wide curves.

At Shuster, a little above the town, the Kārūn divides into two navigable arms which unite again about thirty miles away at the village of Band-i Kīr (near the mediaeval 'Askar Mukram; see above, i. 488^b) and thus form an island. The western arm is the main stream, the Kārūn proper; it is now called Āb-i Shāṭṭī (popular for Shūṭī = little river; cf. i. 970^a for the same name for a bed of the Tigris) and further down also Āb-i Buzurg Shuster (= great water of Shuster). The east arm is artificial in origin and is now called Āb-i Gerger; the Arab geographers of the middle ages know it by the name of Masrukān (Mashrukān, Musrukān) which is explained as a corruption of the Persian Ardashīr-Kān (= Ardashīr's trench). The form Ardakhshīragān is noteworthy: it occurs in a Syriac chronicle edited by Guidi in the *Actes du 8e Congrès des Orientalistes*, Leiden 1891, p. 32, and cf. theon Noldeke in the *Sitz.-Ber. Ak. Wien*, 1893, cxxviii, Abh. ix. 42). The first Sāsānian king is said to have been the maker of this water-course. The Persian geographers of the xvth century call the western water-arm, which carries the bulk of the water, Čāhar Dānikah (= 4/6), the eastern Dū Dānikah (= 2/6); cf. Le Strange, *op. cit.*, p. 236. These names are still known locally, according to Layard (*op. cit.*, p. 27). It may further be noted that in the xth century, according to Arabic sources, the Masrukān canal did not enter the main stream, the Kārūn proper, at 'Askar Mukram, but ran parallel to it and reached the Persian Gulf by a course of its own.

The Kārūn delta begins a little above the village of Sābla. Three channels break off from the main arm, which continues its course till its junction with the Shaṭṭ al-'Arab at Muḥammara; these all run S.-E. to the Persian Gulf and finally end their course in estuaries (*Kharvor*, *khōr*) which are at times swamps. Their names are:

1. The Shaṭṭī (or Rūd) al-Kadīmī (= the old stream) which leaves the Kārūn an hour's journey above Sābla and broadens out into the Khōr Mūsā (also called Khōr Mōi Allāh; *mōi* in 'Irāk Arabic = water). In it we have probably the oldest course of the Kārūn.

2. The Shaṭṭ al-Amaya (as it is usually written on maps) or al-'A-mā = the blind stream, probably so called because its bed is usually choked with mud. In Ritter (ix. 159, 166, following Renouard) the name is wrongly explained as "wanderer" (the form *al-Amara* in Ritter, xi. 1028, 1030, is certainly wrong). The same name is also given to an arm of the Shaṭṭ al-Hai, below Kūt al-'Amāra (see Ritter, x. 169; Ainsworth, *op. cit.*, ii. 259, and the maps). Cf. also the analogous name Didjla al-'Awra for the present lower course of the Tigris; see above, i. 970^b, as well as

Islām, xiv. 22 (a different explanation of 'Awra is proposed by Reinaud, *Journal asiatique*, 1861, xviii. 208). It is also called *Shatt Kōbān* (Gobān) from the district of Kōbān (Gobān) which lies on its right bank; Portuguese writers of the xviii century reproduced the name as Rio de Gabão (cf. Tomaschek, *op. cit.*, p. 75 sq.). This second arm begins at Sābla and finally expands into the *Khōr Siliḡ* (Seluge in Kinneir, *op. cit.*, p. 292); it is perhaps the second oldest arm of the Kārūn.

3. The *Shatt Bamishir* (Bahmishir, Behemshir) which leaves the Kārūn 6 miles below Sābla and expands into the *Khōr Bamishir* before entering the sea. This third branch from the Kārūn is considerably wider and holds more water than the other two. According to the *Persian Gulf Pilot*, p. 284; see the *Bibl.*) it is 54 miles long (40 as the crow flies). This may now be regarded as the natural mouth of the Kārūn. Bamishir is a corruption of Bahman-Ardashir, the name of the first Sāsānian king, to whom is ascribed the making of a whole series of canals in southern 'Irāk. The most southern district of this province, on the coast, was called Bahman-Ardashir after him, as was a town opposite Ullula (cast of Basra) on the left bank of the *Didjla al-'Awra* (*Shatt al-'Arab*; cf. Yāḡūt, *Muḡjam*, cd. Wustefeld, i. 770. 20, where the arabicised form Bahmanshir is also given). It appears as if in the middle ages Bahmanshir was regarded as the Persian equivalent of *Didjla al-'Awra*. Different scholars (like Rawlinson, Ainsworth, Le Strange) have made the further deduction that the *Shatt Bamishir* is to be identified as the old mouth of the Euphrates or Tigris (before the formation of the modern *Shatt al-'Arab*). But it is very easy to suppose that the name Bahmanshir (Bamishir) was at a later date transferred from the *Didjla al-'Awra* (*Shatt al-'Arab*) to its eastern neighbour, the third branch of the Kārūn. For Bahman-Ardashir and *Didjla al-'Awra* cf. especially Reinaud, *op. cit.*, p. 207 sq.; Tomaschek, *op. cit.*, p. 78; Ainsworth, *op. cit.*, ii. 173, 182; G. Le Strange in the *J. R. A. S.*, 1895, p. 300 and *op. cit.*, p. 43.

The two western branches of the Kārūn, the *Shatt al-A'mā* and the *Bamishir*, form two long islands with the *Shatt al-'Arab* which runs parallel to them, the main Kārūn in the north and the Persian Gulf in the south. The eastern one, bordered by the *Shatt al-A'mā* (Kōbān) and the *Bamishir* is called *Kōbān* (Gobān, Gobban); the western between the *Bamishir* and the *Shatt al-'Arab* is now usually called *Djazira 'Abbādān*, a name it already had in the middle ages, from the town of 'Abbādān (see above, i. 7^a) which probably lay at the mouth of the Delta originally. The latter island is also called *Djazirat al-Khiḡr* after the prophet al-Khiḡr [q. v.] highly revered in Muslim popular belief especially in the 'Irāk as a patron of water, who had or still has a sanctuary near 'Abbādān (Chodder Abbādan in Niebuhr, *Reisebeschreibung nach Arabien* etc., ii., Copenhagen 1778, p. 206) which is mentioned as early as the xiiith and xivth centuries by al-Dimashki (*Nukhbat al-Dahr*, ed. Mehren, p. 97, 18) and Ibn Baṭṭūta (ed. Defrémery and Sanguinetti, ii. 19, 3). With 'Abbādān the most important place in it in the middle ages seems to have been al-Muḡiẓa (Muhriẓā) and the island seems to be occasionally called after it; in Portuguese sources of the xviii century the island is therefore called "ylha Murzique"; cf. Tomaschek, *op. cit.*, p. 76; for Muḡriẓa see Yāḡūt,

i. 502, 13; 712, 13; iii. 598, 9; iv. 709, 5; al-Dimashki, p. 97, 6; al-Kazwini, *Āthār al-Bilād*, ed. Wustefeld, p. 280, 14. The Persians gave this island the name *Miyān Rūdān* (= between the rivers, *Μεσοποταμία*); see e.g. Yāḡūt, iv. 708, 23, and Le Strange, *op. cit.*, p. 48.

It has already been pointed out that the Kārūn at an earlier period probably entered the sea through the *Shatt al-A'mā* — apart from the river-bed represented by the *Shatt al-Ḳadimi*, which is perhaps the oldest bed. According to the Arab geographers of the middle ages, the different branches and tributaries of the *Dudjail* (Kārūn) united at a place called *Hiṣn al-Mahdi*. Whether the *Nahr Sidra* (= Lotus-river) which also enters there must be considered the main arm of the Kārūn from Ahwaz onwards, is doubtful: cf. Le Strange, *op. cit.*, p. 237; Schwarz, *op. cit.*, p. 306. The reunited Kārūn called *Nahr Hiṣn al-Mahdi* (see Schwarz, *op. cit.*) then enters its estuary (*Faḡḡ Dudjail*) which ends at *Sulaimānān* on the coast. On *Hiṣn al-Mahdi* and *Sulaimānān* cf. Le Strange, *op. cit.*, p. 48, 243, and in the *J. R. A. S.*, 1895, p. 302; Schwarz, *op. cit.*, p. 306, 329—330, 400). *Hiṣn al-Mahdi* perhaps lay in the neighbourhood of the present Sābla; *Sulaimānān* is perhaps to be located somewhere in the region of the *Khōr Siliḡ*; the end of the course of the Kārūn in the middle ages would thus coincide practically with the modern *Shatt al-A'mā*. In the middle ages there must have been several other separate smaller mouths of the Kārūn. In these topographical investigations it should not be forgotten that southern 'Irāk and *Khūzistān*, the delta of the great rivers, has undergone far-reaching changes in its hydrographic structure in the course of thousands of years. In ancient times the Persian Gulf extended much farther into the mainland, so that the Kārūn, *Kerkhā*, Euphrates and Tigris had all separate mouths; cf. above, i. 675 sq., and Andreas in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, i. 1394, 2811. During the middle ages and in modern times the coastline had been steadily advancing southwards.

The bed of the Kārūn from Sābla to *Muḡammara* seems to be the work of human hands. In the tenth century the *Būyid* 'Aḡud al-Dawla (see above, i. 143) had a canal made, which was called 'Aḡudi after him, to secure direct communication between the Tigris and Kārūn (= Basra and Ahwāz). As in those days apparently the Kārūn flowed into the Persian Gulf through the *Shatt al-A'mā*, the 'Aḡudi in its main lines probably corresponded with the present course of the Kārūn between Sābla and *Muḡammara*. It is very doubtful if the work of the *Būyid* Sulṭān was something quite new; it is more likely that he undertook the restoration of an older channel which had fallen into neglect and become silted up. A century earlier we have evidence from the Arab geographers of the existence of a canal called *Nahr al-Djādid* (= New Canal) which led from *Hiṣn al-Mahdi* (near Sābla?) to the Tigris and may well have coincided with the 'Aḡudi. From a still earlier period we have the *Bayān* canal (see above, i. 970^b); considering its course it may wholly or in part have coincided with the 'Aḡudi or *Nahr al-Djādid*. Whether there was in ancient times — about the period of Alexander — an artificial channel connecting the Kārūn and Tigris following the same direction cannot be ascertained with certainty; on this question cf. Andreas in Pauly-Wissowa, *op.*

cit., i. 1394. In modern times the name *Ḥaffār* (usually written *Ḥafar* in books of travel and in maps) has come into use for the stretch of the *Kārūn* between *Sābla* and *Muḥammara*, which suggests that here we have a work of human hands, not a natural bed dug out by the river itself. At the present day, however, this name is limited to the short stretch, only about an hour's journey long, from the beginning of the *Shatt* *Bamishir* (the mouth proper of the *Kārūn* at the present day) to *Muḥammara*. This lower *Ḥaffār* is (according to *Stolze-Andreas*, *op. cit.*, p. 48) about 600 yards broad and 20—25 feet deep, while the *Kārūn* above *Sābla* before the beginning of the delta is a mile broad and 25—30 feet deep. It should also be noted that in the second half of the xviiith century *Sulaimān*, the powerful *Shāikh* of the tribe of *Ka'b* (on him see below) destroyed the connection between the *Kārūn* and the *Shatt* al-*Arab* by placing a dam (*band*) across the *Ḥaffār* at *Sābla* and led the water into the *Shatt* al-*A'mā*. The district of *Kobān* was thereby soon raised to great prosperity. But at *Karim Khān's* [q. v.] second invasion the dam in the *Ḥaffār* was destroyed (cf. *Kinneir*, *op. cit.*, p. 90). On the communication between the *Kārūn* and *Tigris* by the *ʿAḍudi*, *Nahr al-Djādid*, *Bayān* and *Ḥaffār* canals see *Kinneir*, *op. cit.*, p. 90, 293—294; *Layard*, *op. cit.*, p. 55—56; *Tomaschek*, *op. cit.*, p. 76—77; *Ainsworth*, *op. cit.*, i. 174, 184; *Persian Gulf Pilot*, p. 296; *Le Strange*, *op. cit.*, p. 48, and in the *J. R. A. S.*, 1895, p. 308—309; *Schwarz*, *op. cit.*, p. 309, 311, 390.

While still in the mountains the *Kārūn* receives a number of abundant tributaries, for example above *Sūsān* the *Āb-i Bāzuft* on the right and the *Āb-i Bars* (*Bors*) on the left. A little above *Chamani Yorgha* the *Talak* joins it. But the most important tributary is the river of *Dizfūl* [q. v., i. 983 *sq.*], the *Dizfūl-Rūd* or *Āb-i Diz*. This has no name of its own at the present day; it was the same in the middle ages as it figures in the Arabic sources simply as the "river of *Djundai-Sābūr*". On *Djundai-Sābūr*, which must have lain to the S. E. of *Dizfūl*, see i. 983 *sq.* and more recently *Schwarz*, *op. cit.*, p. 346 *sq.* The *Dizfūl-Rūd*, which, like the *Kārūn*, has a very winding course, rises out of the confluence of two little streams in the district of *Burūdjird* in Little *Lūristān* (cf. *von Bode*, *op. cit.*, ii. 274). It joins the *Kārūn* at *Band-i Kīr*; in earlier times the confluence seems to have been a little further south (cf. *Le Strange*, *op. cit.*, p. 239); it may have at one time flowed into the *Kerkhā* [q. v.], as modern tradition still says (see *Layard*, *op. cit.*, p. 65). As to the *Kerkhā*, which now loses itself in the marshes below *Hawiza* [q. v., ii. 294^b], it must be assumed from the statements of the Arab authors and the ancient river-bed, which can still be traced, that the bulk of its waters joined the *Kārūn* a few hours' journey below the town of *Ahwāz* (on this see also *Billerbeck*, *op. cit.*, p. 30). Another arm of the *Kerkhā* but hardly the main stream (contrary to *Rawlinson*; cf. *Andreas* in *Pauly-Wissowa*, *op. cit.*, i. 1394) may have at one time entered the *Shatt* al-*Arab* in the region of *Qurna*.

The *Dizfūl-Rūd*, the upper course of which still requires more thorough geographical exploration, has as its principal tributary the *Bālā-Rūd* which enters it about 7 miles S.W. of *Dizfūl*. Another important tributary of the *Dizfūl-Rūd* is the *Shāwūr*

(*Shāpūr*, also written *Shaur*, *Shover*), a narrow but deep water-course which rises a few miles above the ruins of *Sūs* [q. v.] and falls into the *Dizfūl-Rūd* about 15 miles (as the crow flies) west of *Band-i Kīr*. In the middle ages the *Shāwūr*, like the *Kerkhā*, was called the "river of *Sūs*" because it flowed past this town — which, it may be noted, is at the point where the *Kerkhā*, *Dizfūl-Rūd* and *Kārūn* are nearest one another. The *Shāwūr* and the *Dizfūl-Rūd* were at one time and in part still are connected with the *Kerkhā* and the *Kārūn* by canals. On the *Dizfūl-Rūd* and *Shāwūr* cf. *Hamd Allāh Mustawfi*, *Nuḥat al-Kulūb*, ed. *Le Strange*, p. 215, 11; 218, 13, 15; *G. Le Strange*, *op. cit.*, p. 233, 239, and in the *J. R. A. S.*, 1895, p. 312; *Schwarz*, *op. cit.*, p. 303—305; *Ritter*, ix. 193 *sq.*; *Layard*, *op. cit.*, p. 56 *sq.*; *v. Bode*, *op. cit.*, ii. 193; *Lofthus*, *op. cit.*, p. 329, 342, 346; *J. Dieulafoy*, *op. cit.* (see the *Bibliography*), *passim*; *Sawyer*, *op. cit.*, p. 490 *sq.*

The *Kārūn* is not only connected with the *Tigris* and *Kerkhā* in the west but in the east it is linked up with the *Djerrāhī* or *Kurdistan-Rūd* or *Āb-i Kurdistan* (the *Tāb* of the Arab geographers; see *Le Strange*, *op. cit.*, p. 270; *Schwarz*, *op. cit.*, p. 5 *sq.*; see also the article *ARRADJĀN*, above, i. 460). At *Sābla* a canal navigable by boats leaves the *Shatt* al-*A'mā* and runs to *Dawraḳ* (*Dōraḳ*)-*Fel-lāhiye* (see the art. *DAWRAḳ*) on the *Djerrāhī*.

The more important towns on the *Kārūn* in mediaeval as in modern times lay on its central course between *Shuster* and *Ahwāz*. At the two termini of this stretch stood the two capitals of the mediaeval province of *Khūzistān*, *Ahwāz* and *Tustar* (*Shuster*). *Ahwāz*, formerly the capital proper of this district, has a very important situation. This is at the gateway of the *Kārūn* where the river breaking through its last barrier, the *Djabal Hamrīn* range, enters the plain and henceforth offers no impediment to navigation to the sea. The later place of this name is built near the ruins of the old city; a mile south is the modern town of *Naṣriye*, which is growing rapidly (cf. *Herzfeld*, *op. cit.*, p. 77). Cf. on *Ahwāz* above, i. 208, and *Schwarz*, *op. cit.*, p. 315 *sq.*, and *Graadt van Roggen*, *op. cit.*, p. 202 *sq.* (with plans); for *Tustar* see the article *SHUSTER* and on the site (particularly the bifurcation which begins there) *Graadt van Roggen*, *op. cit.*, p. 174 *sq.*

Places worth mentioning between *Shuster* and *Ahwāz* are: the large village of *Wā'is*, where a dead arm of the *Kārūn* runs to the east, and *Band-i Kīr* (usually pronounced *Kīl*), a place of considerable importance owing to its situation at the junction of the two arms of the *Kārūn* and the mouth of the *Dizfūl-Rūd*. *Band-i Kīr* is the successor of the mediaeval 'Askar *Mukram*, the ruins of which (called *Lashkar*; *Lashkar* is the Persian equivalent of the Arabic 'Askar) lie 3 miles north of it. On 'Askar *Mukram* see above i. 488^b, and *Schwarz*, *op. cit.*, p. 377 *sq.*

The lower course of the *Kārūn* from *Ahwāz* to *Muḥammara* has no places of great importance on its banks. Among them are *Ismā'iliya* and *Sābla*, remarkable for its situation at the beginning of the bifurcations of the delta; it has the ruins of a castle which was at one time the favourite resort of *Sulaimān*, the influential *Shāikh* of the *Ka'b* already mentioned (cf. *Kinneir*, *op. cit.*, p. 87). *Muḥammara* [q. v.] at the junction of the *Kārūn* and the *Shatt* al-*Arab* is, however, a place of unusual

importance. It is undoubtedly the best harbour in Persia, easily accessible at any time, and is destined to have a still greater future. The fact is noteworthy that all the places of any importance that we have mentioned on the central and lower Kārūn lie on its east bank.

In the mountainous upper course there are no longer any towns of importance. In late antiquity and in the middle ages the most prominent were Sūsān (also called 'Arūdī or 'Arūh and Djabālīk; see the art. SŪSĀN) on the right bank and Idhādī or Māl-Amī [q. v.] opposite on the left bank. Both are famous for the very fine remains dating from the Elamites and Sāsānians. Along the upper course in parts runs a road protected by many forts, now mostly in ruins. The Kārūn in general is one of the most historically interesting rivers in Persia owing to the numerous ruins from ancient times which are everywhere found on its banks.

The dwellers on the Kārūn in its upper course and on its middle course to beyond Shuster are the Bakhṭiyārīs [q. v., i. 603a], one of the three principal tribes of the Great Lūrs. In the lower half of its central course and the whole of the lower stretch the powerful Arab tribe of Ka'b (popularly pronounced Tsha'b, Sha'b, Sha'ab) are predominant; their Shaikh lives in Dawrak-Fellāhiye. On this tribe which has only become important in these regions since the xviiith century see Kinneir, *op. cit.*, p. 85—87, 91; Buckingham, *Travels in Assyria, Media and Persia*, London 1830, ii. 195 sq.; Selby, *op. cit.*, p. 214; Layard, *op. cit.*, p. 36 sq.; v. Bode, *op. cit.*, ii. 110—120; Loftus, *op. cit.*, p. 285 sq.; Ainsworth, *op. cit.*, ii. 205—218; Ritter, *op. cit.*, ix. 159—160, xi. 1038, 1063—1064. From Ahwāz to Muḥammara we find also Bawī and Idrīs tribes who are subject to the Ka'b (cf. Selby, *op. cit.*).

In the military history of the middle ages the Kārūn basin only occasionally occurs as the scene of fighting; cf. thereon Schwarz, *op. cit.*, p. 299—300. During the World War of 1914—1918 the possession of this territory became very important on account of its oil-fields; cf. thereon Schweer, *op. cit.*, p. 140—144, and the section relating to the 'Irāk and southern Persian fronts in books on the war.

As early as the Sāsānians powerful dams (*shadhrawān's*) with the necessary sluices had been erected at various places to enable the water thus dammed back to be led by numerous small canals to fields on a higher level, especially on the central stretch of the Kārūn. During the whole of the middle ages this irrigation system was kept in excellent repair and transformed the land it watered into flourishing gardens. Since then, however, most of these works have fallen more and more into ruins as a result of neglect and great stretches of once fertile country have become desert again. The most celebrated was the gigantic dam at Shuster, which was regarded in the east as one of the wonders of the world. Its erection is ascribed to the Sāsānian king Sapor I (241—272 A.D.). It is very probable that the tradition is correct which says that Roman prisoners of war were forced to build it for him; the modern name, Band-i Kaīsar = Caesar-dam, also points to its Roman origin. On this great system of dam and sluices here, which after considerable restoration is still partly in use to-day, see Ritter, *op. cit.*, ix. 186 sq.; Noldeke, *Geschichte der Araber und Perser zur Zeit der Sāsāniden*, Leiden 1879, p. 33; Justi in the *Grundriss der*

iran. Philologie, ii., Strassburg 1896 sq., p. 318; Le Strange, *The Lands of the Eastern Caliphate*, p. 235; Schwarz, *Iran im Mittelalter* etc., p. 296. At Wā'is, a few hours' journey below Band-i Kīr, the ruins of a great dam may still be seen (cf. Herzfeld, *op. cit.*, p. 76). In Ahwāz, at the rapids there, considerable remains of a triple ancient system of dams still exist. Band-i Kīr (= Bitumen-dam) has got its name from the ancient dam coated with bitumen. At the beginning of this century the Persian government thought of restoring the province of 'Arabistān to its former high degree of prosperity by restoring the old system of canals with dams and sluices. It was intended to begin with the island formed by the Āb-i Shaṭṭ al-Kārūn and the Āb-i Gerger between Shuster and the Band-i Kīr and the Dutch engineer Graadt van Roggen was appointed to make a survey. He published the valuable results of his investigations in an important treatise illustrated with numerous plans and sketch-maps (*Notices sur les anciens travaux hydrauliques en Susiane in the Mém. de la Délégation en Perse*, vii., Paris 1905, p. 167—207); he also went fully into the old irrigation systems of Shuster and Ahwāz. Unfortunately political jealousies have prevented the execution of this most useful project of the Persian government.

The Kārūn is the only river of Persia that admits of navigation. Communication is maintained with the Persian Gulf through the Shaṭṭ al-'Arab and the Shaṭṭ Bamishīr. There is evidence as early as the Umayyad period that there was regular traffic up the river as far as Ahwāz (cf. Schwarz, *op. cit.*, p. 300). The Kārūn is navigable as far as Shuster. The only obstacle is the rapids caused by the gypsum rocks below Ahwāz (see the very full description by Wells, *op. cit.*, p. 156 sq.) which make unloading and reshipment necessary; in 1891 a little railway was put in use for this purpose. The Āb-i Gerger is also navigable; but in it also reshipment is necessary at Shilīlī (6 miles below Shuster). One can sail up the Dizfūl-Rūd as far as the vicinity of Dizfūl (cf. *Persian Gulf Pilot*, p. 298). The first to show that steamers could ascend the Kārūn as far as Shuster was Selby in 1842, accompanied by Layard, although in 1836 Major Estcourt, accompanied by Ainsworth, had previously reached Ahwāz in a steamer of smaller size. In 1888 the Kārūn was opened to international navigation. At the present day there ply on its boats of the firm of Lynch who have long had a concession, the Persian Nāṣiri company founded in 1889 and a Persian government steamer. If the bed of the river received a certain amount of regulation and the caravan roads from Shuster to Isfahān were improved, we should have an important route for traffic, which would shorten by about half the journey from the Persian Gulf to Isfahān, the centre of Persian commerce, which now mainly follows the difficult road from Būshīr via Shirāz. Steamers of an average size can go as far as Ahwāz; from there to Shuster only small boats of shallow draught.

The shipping on the Kārūn has in the last few years become specially important for the transport of the petroleum obtained in Southern Persia. The Kārūn valley possesses a series of oil-wells, e.g. at Ahwāz. The oil-fields of Maidāni Naftūn (east of Shuster) are particularly productive, perhaps the richest in all Persia. The exploitation and

development of the Persian oil-fields is now in the hands of the Anglo-Persian Oil Company. The yield of the oil-fields, where the most modern methods are now in use, has grown to such an extent that the transport of oil down the Kārūn in tank-ships is now no longer sufficient and two special pipes have had to be laid in addition. On the oil industry in the Kārūn valley the best authority is Schweer, *op. cit.*, p. 22 sq., 110 sq., 177 sq.

We conclude by dealing with the names of the Kārūn; in its upper course it is called Āb-i Kurang = "water of the Kurang". Kurang (cf. Wells, *op. cit.*, p. 146; Le Strange, *op. cit.*, p. 232) is said to be a corruption of Kūh-i Rang = "variegated hill", the name of the mountain already mentioned in which the river rises. Whether this explanation is correct, need not be discussed here. Kurang, or Kuran, seems to have become Kārūn in the mouths of the Arabs. Among the Portuguese historians of the xviith century we find the name as Rio Caron; cf. Tomaschek, *op. cit.*, p. 83. They presumably only refer to the lower course of the river, which alone is called Kārūn at the present day. This name is quite unknown to the Arab and Persian writers of the middle ages. They give the river various names. It is usually called Dudjail (= little Tigris) by the Arabs, apparently because it was near the larger river. As the name Dudjail was also found elsewhere (for example a Tigris canal above Sāmarrā; cf. i. 970^s; a water-course near Kūfa, see Schwarz, *op. cit.*, p. 299, note 6) it was more accurately specified as Dudjail al-Ahwāz = the Dudjail of Ahwāz (Khūzistān or its capital; see the art. AHWĀZ, i. 208). According to Ḥamza al-Isfahānī in Yāqūt (ii. 555, 21), Dudjail represents the translation of the Pahlavi *Dīdā Kūdak*. The Kārūn was also called "river of Khūzistān or of Ahwāz" (Āb-i Ahwāz is still usual for the stretch near the town of Ahwāz; see above, i. 208). It was also called "river of Tustar" (Shuster) after the second principal town of the mediaeval Khūzistān; in Ibn Baṭṭūṭa (ii. 24, 1) we find the name Nahr al-Azraq = "the blue river", from the blue colour of its mountain water which was generally esteemed for its remarkable freshness. We have already discussed above local names for particular parts or arms of the river, for example in the bifurcation between Shuster and Band-i Kīr and in the delta. Brief reference may be made to the cuneiform names Ulai (also in O. T.), Iddīdē, Ḥudhūd and to the names found in Greek and Roman literature: Atlana, Eulacus, Hedyphon, Koprates, Pasitigris, which were used not only for the Kārūn itself, but also for its tributaries, like the Dizfūl-Rūd with the Shāwūr. For the cuneiform inscriptions cf. Streck, *Assurbanipal*, Leipzig 1916, p. cccxxxix., 26, 787, 788, 813; for the classical references cf. Pauly-Wissowa, i. 435—436, 1393, v. 2459, vi. 1661—1663, vii. 2594, xi. 1363.

(M. STRECK)

KĀRŪN occurs in Qurʾān xxviii. 76—82; xxix. 38; xl. 25. In the second and third passages he, with Hāmān, is an unbelieving minister of Firʾawn in oppressing the Israelites; he behaves proudly towards Mūsā and says that he is an enchanter and a liar. In Qur. xxviii. he is the Biblical Korah (Num. xvi.) and he behaves proudly towards the people of Mūsā but it is because of his immense wealth which he believes to have been given to him on account of his knowledge (*ʿalā ʿilmih* 'indi). He makes a great public display

of his wealth and is swallowed up by the earth with his palace (*dār*). He is thus an example of those who prefer the fleeting wealth of this world to gaining by alms and humility and righteousness the abiding riches given by Allāh in the world to come. This is apparently a moralized echo of a story heard and remembered vaguely by Muḥammad. To this the commentators and the compilers of prophetic *ḵiṣāṣ* have added a long and involved legend derived in whole or in part from rabbinic literature. For this, on the rabbinic side, see the *Jewish Encyclopedia*, vii. 556 sqq. and, on the Muslim side, the notes in Sale's translation of the Ḳur'ān and al-Tha'labī, *Ḳiṣāṣ*, Cairo 1314, p. 120 sqq. It is plain that Hamaṇ has become a minister of Pharaoh because he is bracketed with Korah in rabbinic literature for rapacious wealth. The legend of Ḳarūn has had two special developments. 1. From his wealth and knowledge (above and Ḳur. xxviii. 78) he has become one of the founders of alchemy. See the preliminary statement of the *Fihrist* on alchemy (p. 352, l. 1); and al-Maṣ'ūdī alludes to this (*Mu'ūdj al-Dhalaḡ*, viii. 177). 2. He is associated in Egypt with lakes. Thus what is left of Lake Moeris in the Faiyūm bears his name (Baedeker, *Ägypten*, p. 184; Joanne, *Égypte*, p. 611; Herodotus, ii. 149). Also, beside the Birket al-Fil to the south of Cairo, near the Mosque of Ibn Ṭūlūn, there was formerly a Birket Ḳarūn which had evidently associations of supernatural legend. Al-Maḳrīzī describes it (*al-Ḳhiṭāṭ*, ed. 1325, iii. 261 sq.) and tells that Kāfir who buildt beside it was said to have been driven from his house by *djinn*. It figures also in the Story of Djudar the Fisherman in Zotenberg's (cf. *Not. et Extr.*, xxviii, i. 167 sqq.) Egyptian Recension of "The 1001 Nights" (Nights 606—624) as a place where spirits take refuge from magicians. Von Hammer suggested in a note to his transl. of this story (*Der Tausend und Einen Nacht noch nicht über-setzte Märchen*, etc., trans. Zinslerling, ii. 32; trans. Trébutien, i. 291) that Ḳarūn had here become combined with the Egyptian Charon.

(D. B. MACDONALD)

ḲARWĀN (older former *kar-bān*, "He who protects trade") the original of the word caravan, means in Persian a number of merchants who organise themselves into a body to defend themselves against robbers and brigands (Ar. *ḵaṣṣa*). The beasts of burden are camels, horses and mules: the camels are usually arranged in files of seven animals (*ḵaṭār*): the camel-driver rides on an ass at the head of the procession. The caravan drivers are slow and do not hurry, but their work is hard and trying; a man has often ten or twelve camels to watch and guide: sometimes thirty or forty are managed by three men. The men have to unload their beasts on reaching a stage and feed and tend them: it is only when this has been done that they can think of themselves. In the middle ages the signal for departure was given by beating kettledrums (*ḵās*).

In desert regions, the caravan camps under the tents that it carries with it; but sovereigns and

generous benefactors have had built from stage to stage and at the resting-places, buildings called *ḵarwānsarāy* "caravan-houses". Their plan is always practically the same; — a square courtyard surrounded by walls with no windows looking outwards, upon which abut a series of rooms each with a door and window or sometimes little huts without a roof, intended to serve as a lodging for the night for the merchant and his goods. The beasts of burden remain hobbled in the courtyard. These caravanserais are as far as possible supplied with running water or at least a well. In Persia the bulk of these buildings still standing date from the Ṣafawid dynasty and are traditionally attributed to Shāh 'Abbās the Great. There is nothing there but the four bare walls; the travellers carry everything that is necessary with them, beds, carpets, cooking utensils, etc. In the towns especially, however, there is to be found near the caravanserais a caterer who has always ready the dishes loved by Orientals.

The Shī'is consider it a work of piety to be interred near the mausoleum of 'Alī at Nedjef (Meshhed 'Alī) and of Husain at Kerbelā (Meshhed Husain), both places situated in Ottoman territory. For this purpose corpse-caravans have been organised, which carry from the remotest corners of Persia dead bodies by thousands. The bodies placed in wooden coffins or rolled in mats or carpets are tied in twos, threes or fours to the back of a horse. At every stage the corpses are loaded and unloaded like packages. As the journey lasts several weeks, these caravans give out an unbearable stench and never camp at less than three or four miles from the villages they pass.

ḲARWĀSH B. AL-MUḲALLAD ABU 'L-MANĪ', MUṬAMID AL-DAWLĀ, an 'Uḳailid. After the murder of al-Muḳallad in 391 (1000/1) he was succeeded as Amīr by his eldest son, Ḳarwāsh. In 392 (1001/2) the latter sent an army against al-Mada'in, which then owed allegiance to the Būyids. The 'Uḳailids, however, had soon to retreat and when they made an alliance with the Banū Asad under Abu 'l-Ḥasan 'Alī b. Mazyad, Bahā' al-Dawla's [q. v.] deputy, Abū Dja'far al-Ḥadīdī, at once took the field against them and summoned the Banū Ḳhaḡadja to help him. In Ramaḡān of the same year (July–August, 1002) the armies met; Abū Dja'far was defeated but gathered his forces together again and soon inflicted a heavy defeat on the 'Uḳailids near Kūfa. In the year 397 (1006/7) Ḳarwāsh undertook an expedition against Kūfa but was defeated. A few years later (401 = 1010/11) he abandoned the 'Abbāsids and had the *ḵuṭba* read for the Fāṭimid caliph, al-Ḥākim bi-Amrī 'llāh, but on the approach of an army under Bahā' al-Dawla's general, Ḥasan b. Uṣṭadh Hormuz, at once returned to his allegiance. In 411 (1020/1) Ḳarwāsh was attacked and defeated by the Mazyadis and the Caliph's troops and was only allowed to retain his position by the Caliph's grace. But peace did not last long. The Banū Ḳhaḡadja invaded Ḳarwāsh's lands and when he took the field against them they made an alliance with Dubais b. 'Alī b. Mazyad (417 = 1026/7). An army from Baghdād also joined the

allies. The vanguards met near Kūfa; Karwāsh took to flight and the allies for the time being occupied the town of al-Anbār. Internal feuds then broke out. Two 'Ukailids, Nadjdāt al-Dawla Kāmil b. Kurād and Rāfi' b. al-Ḥusain, who were joined by Badrān, a brother of Karwāsh and lord of Naṣībīn, made an alliance, advanced against Karwāsh with a strong army and the two forces soon met. In the midst of a desperate conflict, however, a reconciliation was effected on the battlefield and Badrān was allowed to retain Naṣībīn. In the meanwhile Manī' b. Ḥassān, commander of the Banū Khafādja, plundered the town of al-Djāmi'ain, which belonged to the Mazyadis, whereupon Dubais made peace with Karwāsh. After Manī' had twice burned down the town of al-Anbār, he submitted to the Būyid Abū Kālidjār [q. v.], while Karwāsh assisted the people of al-Anbār to fortify their town. In the struggle between the Turkish prince Barstoghan and the Būyid Djālāl al-Dawla [q. v.] Karwāsh was on the side of the latter. In the year 432 (1040/1) they quarrelled for various reasons, but friendship was soon restored after Djālāl al-Dawla had sent an army against al-Anbār and Karwāsh had to pledge himself to obedience. In the years 432 and 433 Mesopotamia was invaded by the Ghuzz [q. v.] (cf. the article MARWĀNIDS); on Ramaḍān 20, 435 (April 21, 1044), however, they were defeated by Karwāsh in combination with the other 'Ukailids and Dubais at Ra's al-Aiyil and had to retire to Diyār Bakr and Aḥharbaidjān. Karwāsh had also to wage war on his brother Abū Kāmil Baraka. Their good relations were interrupted by 440 (1048/9); their nephew, Kuraish b. Badrān, joined his uncle Karwāsh and put Abū Kāmil to flight. In Muḥarram, 441 (June, 1049) it came to fighting between the two brothers; but as several of the followers of Karwāsh went over to Abū Kāmil, the latter had little difficulty in taking him prisoner and bringing him to al-Mawṣil. Although Karwāsh continued to be nominally recognised as suzerain, he no longer played an active part in politics, and as Abū Kāmil found him too independent, Karwāsh was deprived of his freedom in 442 (1050/1), although he was still treated with respect. After the death of Abū Kāmil in 443 (1052) his nephew Kuraish was recognised as Amīr. Karwāsh died on Radjab 1, 444 (Oct. 27, 1052) in the fortress of al-Djar-rāhiya near al-Mawṣil. According to one story, Kuraish had him assassinated.

KARYA, a village or small town (*balad*). It is not now used of a large town or city (*madīna*) unless it is qualified by an epithet denoting greatness; but in the Qur'ān, where the word is of frequent occurrence, it is applied without a qualifying epithet to cities of whatever size, including Mekka and Jerusalem. It is now used chiefly of such villages and small towns as are in India styled *mawḍi'*, that is to say fiscal units which are not the chief town of any district or local area.

Bibliography: The lexica s. v.

(I. W. HAIG)

AL-KAṢĀB, a town in South Arabia in the Wādi Baiḥān. The town comprises 12 strong castle-like buildings and 400 houses — the Jewish quarter 50 houses — and is surrounded by palm-groves. It has four main streets with shops in which a busy trade is carried on. The goods come mainly from 'Aden and are brought via Bāl-Iḥāf. Cotton, which is much grown here, is used for the manufacture of excellent cloths which are much sought after in South Arabia. Indigo is also much cultivated and a number of dyeworks produce the well-known blue-coloured material which is in great demand throughout the south. There are also seven sesame-mills in the town. In addition to cotton and indigo, the fertile soil yields wheat, barley, millet, the red variety (*pennisetum spicatum Körn.*), and summer-millet, dates, grapes and vegetables. The Jews of al-Kaṣāb, the capital of Baiḥān, are, as almost everywhere in South Arabia, mainly silversmiths and leather workers.

Bibliography: C. Landberg, *Arabica*, v., Leiden 1898, p. 30—34. (A. GROHMANN)

KAṢABA means primarily the interior part of a country or town and hence a fortified castle, such as is occupied by a commander and his forces, and the town in which such a castle stands, the chief town of a district. It is also applied to a new well. In India, where it is locally pronounced *kaṣba*, it is applied to the chief town of a *pargana* or *maḥall*, which is the smallest subdivision of a fiscal district, and is distinct from the *mawḍi'*, the village or small town which is a complete fiscal unit, and from the *mazra'* or hamlet, which is included in the area and in the fiscal accounts of the *mawḍi'* of which it is an off-shoot.

Bibliography. Besides the lexica: *The Imperial Gazetteer of India*, Oxford.

(T. W. HAIG)

In the Muslim East, the name is especially applied to the citadel in fortified towns in opposition to the rest of the town. It is the centre of defence and also the governor's residence. Sometimes it is a town beside the town. It is not uncommon to find the two parts of the city taking opposite sides and having violent quarrels. The history of Fez, Tara or Rabat give numerous examples of this. The *kaṣba* developed in the Maghrib especially after the Almohad period (twelfth century); the great ornamental gateways (usually single and simply swung, differing from the outer, more complicated of towns), which were built at this time between a town and its *kaṣba* (a dialectical form of the word) are among the most beautiful monuments that survive from this brilliant period (e.g. the gate of the Kaṣba of the Udaiya at Rabat, Bāb Agnāw at Marrākush).

Under the Sherifi dynasties of Morocco (from the xvth century) and especially under the 'Alawids (xviith century to the present day) the word was commonly used to designate little forts of very simple plan, built here and there in the country where the sovereign maintained small garrisons to watch the country; the name is also given near the towns to the different cantonments supplied by particular tribes liable for military service (Kaṣba of the Filāla, K. of the Shirārda at Fez &c.).

Europeans extend the word more or less legi-

timately in the country to the dwellings of important *kā'id*s or to large fortified towns in the Atlas — and in certain towns (Algiers, for example) to the native quarter. (H. BASSET)

KASAM (A.) (verb *aḵsama*), is with *yamin* the general term for oath. As *ḵasama* means "to divide", we seem to have here the usual transition between the meanings "to cut" and "to decide" so that *ḵasam* would be the deciding, strong word (cf. *ḵḍḍ*), while *ḵilf* (verb *ḵalafa*), which also

means swearing, would be used in special circumstances (see the art. *ḪILF*).

The oath plays a great part in the social life of the Arabs and is mentioned by Zuhair (*Dirwān*, i. 40) as the principal means of ascertaining the truth, along with interrogation by a person in authority and absolute clearness. The oath is the word into which the person taking it puts his whole strength. As the tribe forms a moral unit with joint responsibility, the oath in important matters becomes a tribal oath. This, called *ḵasāma*, consists in 50 men of the tribe swearing to their being right; this may be the oath of an accuser (*Ḥamāsa*, ed. Freytag, p. 25; Abu Hishām, ed. Wüstenfeld, p. 777 sq. etc.) or an oath of purgation (Zaid b. 'Alī, ed. Griffini, p. 230, 9 sqq.; al-Bukhārī, *Manāḵib al-Anṣār*, bāb 27). Those participating swear not as witnesses — on the contrary, they need not have been present at the deed — but as responsible persons. That the swearer stakes his whole soul on his word is often expressly stated in the wording of the oath. He swears upon his soul or upon his life (*binafsi*, *biḥayātī*, *la-ʿamrī* or simply *ʿamrī*), upon his honour and strength or upon particular things with which honour is associated, for example the forelock or the lance (*Ḥamāsa*, p. 441, verse 5); this oath is exactly the same as that by the tribe or by kinship (Sūra iv. 1; Tarafa, *Dirwān*, No. 4, verse 72, in Ahlwardt, *The Diwans of the six ancient Arabic Poets*, etc.) or the very common oath by the fathers (*wa-abī*, *wa-ʿjaddika* etc.) and by the god who supports the life of the swearer, in the *Ḥidjāz* especially by Manāt, al-ʿUzzā and al-Lāt (Wellhausen, *Reste arab. Heid.*, 2, p. 26, 34; Ibn al-Kalbī, *Kitāb al-Aṣṇām*, ed. Aḥmad Zakī Bāshā, Cairo 1332 [1914], p. 14, 16 sq., 19); among Muslims one also swears by the faith. The man taking the oath puts all that he values on his word. It is assumed that falsehood and injustice are negative forces so that a false oath imperils the soul and all that is precious to it. The oath is a pledge to God (*ʿahdu ʿIlāhi*, *mithāku ʿIlāhi*, *dhimmatu ʿIlāhi*) and if the person taking it lies or does not keep his promise (*waḥḍ*) he imperils his own soul and offends the divine being. The oath therefore has often the form of a hypothetical surrender of (*barʿa*) the things the swearer values most, e. g. *anā barʿun min ḥawli ʿIlāhi wa-ḵuwwatiki in faʿaltu kadḥā* (cf. al-Ṭabarī, iii. 618, 10; 622, 5, 9 sq.; al-Masʿūdī, ed. Paris, vi. 296; al-Yaʿqūbī, ed. Houtsma, i. 505 sq., 509 sq.). Formulae of this kind are common in the official oath taken by different ranks in the Mamlūk kingdom (al-ʿUmārī, *al-Taʿrif bi ʿI-Muṣṭalah al-Sharif*, Cairo 1312, p. 146—164; al-Kalkāshandī, *Subḥ al-Ashā*, xiii., Cairo 1337 [1918], p. 205 sqq.). The *barʿa* oath is connected with another kind of oath, invoking a curse upon oneself in certain contingencies. This is a formula like the fol-

lowing: "May Allāh slay me if I do not kill thee"; "I will eat blood if I do not do such and such a thing". Of frequent occurrence is this formula: "May my hand waste away if I do this (or do not do it)" e. g. al-Nābigha, v. 39; Ibn Hishām, p. 830, 18). Ibn al-Fārīd, for example, swears with the exclamation *ḥadhī yadī* "this hand of mine!" (line 264 of his *al-Taʿrīyat al-kubrā*, ed. Kairo 1319). The Prophet said on one occasion: "May I be wretched and despised if I am not just" (al-Bukhārī, ii. 306, 8; cf. al-Kaṣṭallānī, vi. 57). This form of oath is used in the *liʿān* ceremony when married people take oaths in giving evidence against one another in cases of alleged adultery (Sūra xxiv. 6—9; cf. Juynboll, *Handbuch des islamischen Gesetzes*, p. 192). A curse can also have a positive value and be used to strengthen an assertion, as in *ḵatalahu ʿIlāhu mā asʿjjaʿahu*, i. e. "May Allāh slay him. How brave he is". The curse is here used *li-l-taʿadjjud*, as in Sūra lxxiv. 19, 20 (see al-Baidāwī on the passage). The expression already mentioned "May my hand waste away" is often used in this way.

The taking of a vow is connected with the invocation of a curse upon oneself under certain conditions. It is especially common as an oath of vengeance among the Arabs; thus Imruʿu ʿl-Kais says he will neither eat meat nor drink wine nor anoint himself with oil nor touch a woman nor wash the *ʿdjanāba* off his head until he has taken vengeance (*Aghānī*, viii. 68, 17 sq.; cf. 68, 2; ix. 149, 2; xiii. 69, 8; Ibn Hishām, p. 980, 3 sq.; 543, 5 sq. etc.). To take this vow (*naḥḥ*) is called *naḥḥara*. The man concerned dedicates himself thereby and takes an increased obligation (*ʿahd*) upon himself. Such oaths are as a rule taken before a battle (*Ḥamāsa*, p. 301; 'Antara, xxi. 84 etc.). Vice versa, one may give force to one's word by taking a special obligation upon oneself in case of breaking it. This pledge, of course, must be inviolable in character and usually takes one of three forms: giving of camels to be sacrificed, releasing of slaves (male or female) or divorce from a wife. These pledges may be made more or less severe; thus one can promise to divorce or release present and future wives and slaves (e. g. al-Yaʿqūbī, p. 505 sq., 509 sq., and in the oaths taken by officials of the Mamlūks), a kind of oath which was banned by al-Shāfiʿi but nevertheless often occurs (cf. "he swore by his wife", Zaid b. 'Alī, ed. Griffini, p. 205, 10 sq.). In taking the oath one must endeavour to remember its character as a serious, sacred expression. It is best to swear at sacred places, in ancient times at the holy stone or idol (*Aghānī*, ix. 9 sq.). In pre-Islāmic days and later the Kaʿba was a particularly favourite place for taking an oath (Ibn Hishām, p. 317, 18; Ibn al-Kalbī, p. 19; al-Ṭabarī, iii. 861, 4 sqq.), especially by al-Ḥaṭīm (al-Ṭabarī, i. 3464, 10); this oath is still considered a very strong one (Snouck Hurgronje, *Mekka*, ii. 306; al-Batanūnī, *al-Rihlat al-Ḥidjāsiya*, Cairo 1329, p. 127). One swears by the tombs of saints at the same time laying a hand on the tomb (see e. g. Jaussen, *Contumes des Arabes au pays de Moab*, p. 311; Musil, *Arabia Petrea*, iii. 338, 342), just as a hand is laid on the northern window of the tomb of the Prophet in Medina, in taking an oath (*Shibāk al-Tawla*, see e. g. al-Batanūnī, *op. cit.*, p. 246). Oaths are taken in the mosque, for example, especially on the *minbar* (e. g. al-Ṭabarī, ii. 92, 18 sq.). Special seasons make the oath more serious,

notably the period after the *ṣalāt al-aṣr* (see Goldziher in the *Archiv für Religionswissenschaft*, ix. 297 sqq.). There is evidence of oaths in connection with sacrifice from the pre-Islamic period (Zuhairi, i. 50; *Ḥamāsa*, p. 423, 10). Swearing by the sacrificial animals is common, still more frequent by the lord of the sacrificial animals (e.g. *Ḥamāsa*, 715, verse 6). Among the traditional forms of oath is the *hūla*. According to al-Djāwharī, *Ṣiḥāḥ*, s. v., it consists in taking the oath by the fire of the tribe into which salt is thrown. This ceremony, referred to by al-Kumait (*al-Ḥaṣḥimiyāt*, ed. Horowitz, No. 4, verse 36), still survives (Landberg, *Arabica*, v. 133 sq.).

The magic circle is often used at the present day; this, which is sometimes divided by lines at right angles, often has something put in it, such as dung, ashes or a piece of cloth. One solemn oath consists in sticking a sword in the ground in the centre of the circle and placing ants beside it; this is the *shemle wa-nemle* oath. Sometimes one takes a piece of wood in the hand and swears "by the life of this wood"; this is the *din al-ʿūd*. Other popular customs could be mentioned, such as laying a hand on the tent-pole, taking bread and coffee in the hand, turning towards the *qibla* etc. (see the works of Musil, Jaussen, Landberg, Burckhardt and Doughty). Increasing the gravity of the oath by various procedures is acknowledged in official Islām and called *taghliz al-yamīn* or *taʿzīm al-yamīn*; for example, the Qurʾān or al-Bukhārī's *Ṣaḥīḥ* is placed in the bosom while the oath is being taken (cf. Goldziher, *Die Zāhiriten*, p. 115; Lane, *Manners and Customs* 3, i. 168, 470). Great oaths are called *Aimān bāliḡa* (Sūra lxviii. 39; cf. *Djāhid aimānīhim*, Sūra v. 58; vi. 109; xvi. 40).

The oath formulae give the substance of the oath. Apart from special kinds of oaths such as the curse and the vow, the usual formula is for that by which one swears to be introduced by a particle. The most common particles in this connection are *bi*, *ta* and *wa*, which are all used in solemn oaths (*waṭṭāhi*, *wa-bi-ʿUllāhi wa-taṭṭāhi*); the two last mentioned are not so freely used as *bi*. The particle *bi* is the common preposition "in combination with"; *ta* is probably the termination as in *amānata* or *ḥayyita*; *wa* is an intensive particle like *la*, which is used particularly in the formula *la-ʿamrī*, *la-ʿamruka* "by my (thy) life", etc.

Other demonstrative particles occur in oaths such as *a*, *hā*, or sometimes the simple accusative is used; abbreviations of *aimunun* like *aimu*, *īmu*, *um*, *mu* etc. are also sometimes used as particles in oaths. There are several linguistic peculiarities associated with oath formulae; for example, a negative can be omitted after the oath; vice versa, we find occasionally in the Qurʾān a negative *lā* before the oath, which is apparently intended to give it particular emphasis. A further intensification of the oath is expressed by prefixing *la* to the following verb (on the grammatical point cf. *al-Mufaṣṣal*, ed. Broch, p. 163 sqq.; Ibn Yaʿīsh, ed. Jahn, p. 289 sqq.).

Just as an oath is taken at a holy place or at a sacrifice, so we find oaths taken by the place or by the sacrifice (or by its lord). The Kaʿba and all that belongs to it as well as the pilgrimage are used in oaths in continually changing phrases. The old Arabs swore specially by their gods and father. The *kāhin*'s often swore by natural phenomena (Ibn Hishām, 11, 4). It is in keeping with the character of the oath that in Islām swearing

by Allāh is alone permitted, but that, on the other hand, swearing by fathers, saints and especially by the Prophet (by the tomb of the Prophet, *Aghāni*, vi. 91, 13) is found in everyday life. Swearing by one's father was particularly forbidden by the Prophet (al-Bukhārī, iv. 263) but it is sometimes used by ʿUmar and Abū Bakr (al-Bukhārī, ii. 444, 6) and even by the Prophet himself (Muslim, commentary of al-Nawawī, iv. 99). It is a good Muslim oath to swear "by the Lord of my father" (al-Bukhārī, ii. 203, 15) or "by the Lord of the Kaʿba, of the sacrificial animals" etc. The Prophet also swears by his honour (Zaid b. ʿAlī, ed. Griffini, p. 104, 4). The formula may call God to witness, as, for example, "God knows that I am not lying", "God is witness that I am saying this", etc. God is often referred to by some descriptive phrase; for example, "by Him Who sent Muḥammad with truth", while a Jew says "Mūsā" for "Muḥammad". The oath can also be adapted to particular situations; many have their favourite oaths; the Prophet, for example: "by Him in Whose hand my soul is", etc. The oath is intensified by repeating the formula three or more times.

One is freed from an oath to fulfil a vow, when one has performed it (*abarra* or *hallala yamīnan*). "Discharge from the oath" (*taḥillat al-kasam*) may mean a small quantity or a short period of time, literally: sufficient for release from the vow (cf. al-Bukhārī, i. 316, 11; iv. 265, 12, with Sūra xix. 72; Umayya b. Abi ʿl-Ṣalt, ed. Schulthess, xxiii. 14). The man, to whom someone has vowed to do something, may, however, release the latter from his oath. The latter is allowed to disregard his oath if higher considerations demand it. There is evidence from the Muslim as well as the pre-Muslim period that such a solemn promise was accompanied by the taking off or rending of certain articles of clothing (al-Wākidī, transl. by Wellhausen, p. 197; al-Ṭabari, iii. 862, 14 sq.). Release from a vow is obtained among the modern Beduins by a sacrifice. One may bind others with an oath if one conjures them. The formula is often of this kind: "I call (*naṣḥada*) God to thee" or "I mention (*dhakkara*) God to thee". But it is an oath of the speaker and it depends upon the relation between the latter and the person adjured whether the latter will fulfil the vow; in such forms of oath appeal is often made to mutual friendship or relationship (e.g. *Lisān*, vi. 428, 7 sq.; *Ḥamāsa*, p. 254 middle). One can also appeal to God. "A servant of God is one whose oath God redeems when he appeals to him" (al-Bukhārī, ii. 168, 19, 204, 2). God is more pressingly conjured, if the appeal is made through one of His favourites, like the Prophet (*awassul bi-ʿl-Nabi*). Maʿrūf al-Karkhī is said to have advised a disciple to call upon God through him (al-Kushairi, *Risāla*, Cairo 1330, p. 9, 23).

Between the popular use of the oath among the ancient Arabs and in Islām there is no essential difference, as is clear from what we have already said. But there are special rules regarding the oath in Islām. In the Qurʾān, especially in the older Sūra's, the oaths taken by the *kāhins* by natural phenomena are usual (Sūra Ivi. 74; lxxxi. 15—18; lxxvii. 1; lxxix. 1—3; xc. 1—7 etc.); we also have instances of swearing by the Qurʾān (xxxvi. 1; xxxviii. 21; xliv. 1; l. 1), by the angels (xxxvii. 1), by the Last Day (lxxvii. 1) etc. Iblis swears by

God's majesty (xxxviii. 23) and we have evidence (Zaid b. 'Alī, ed. Griffini, p. 286, 7 sq.) that God swears by His majesty and grandeur (cf. for the oaths in the *Kur'ān* Ibn al-Ḳaiyim, *Kitāb Aḡsām al-Kur'ān*, Mekka 1321). Two passages in the *Kur'ān* are of special importance for the use of the oath. In *Sūra* v. 91 and ii. 224 sq. it is said that inconsidered expressions (*laghaw*) in oaths can be (broken and) expiated. The context in both passages makes it probable that the references are to vows of abstinence, sometimes from food, sometimes from women. Vows of the last mentioned kind, called *ilā'*, are limited to four months (ii. 226), in connection with ii. 224 sq., after which time they must be expiated or the man must divorce the wife. A particular vow of this kind (*ḡihār*) in which the husband says "Thou art henceforth as the back of my mother to me (*ka-ḡahri ummī*)" is especially condemned in *Sūra* xxxiii. 4; lviii. 2, 4 sq. (see Juynboll, *Handbuch des islamischen Gesetzes*, Leiden and Leipzig 1910, p. 224 sqq.; Sachau, *Muh. Recht*, 1897, p. 13, 68 sqq.).

The practice of atonement for such oaths after repenting of having taken them seems to be taken from the Jews (cf. *Mishna*, *Nedarim*, and *Lev.*, v. 4 sq.). In *Sūra* lxvi. 2 we read "God hath prescribed you the dissolution of your oaths" and this prescription is applied to a case in which the Prophet had sworn to his wife Ḥaḡṣa not to touch the slave-girl Māriya, which he later regretted (cf. al-Ṭabarī, *Tafsīr*, xxviii. 90 sqq.).

Among hadīths first place must be given to a saying of the Prophet: "I never take a vow without being prepared to expiate it if I see that another is better and adopting the better". In this and similar sayings, which are collected by al-Bukhārī, Muslim and other traditionists (see *Kitāb al-Aimūn wa-l-Nuḡhūr*), the expiation of vows is recommended in cases other than vows of abstinence. On the other hand it is insisted that one should keep one's oath (*Sūra* xvi. 93, 96; cf. iii. 71; lviii. 15, 17, 19 etc.) and carrying out what one has sworn to do (*ibrār al-muḡsam*) is mentioned by al-Bukhārī, ii. 99, 3, among the seven principal requirements. It is only in Paradise that there are no such pledges, for there vows are fulfilled and oaths disposed of (Umayya b. Abi 'l-Ṣalt, ed. Schulthess, xli. 23). But an oath must always give place to a higher consideration. It is therefore recommended not to take an oath without adding the *istihnā'* (the formula "if God so will") (al-Bukhārī, iv. 280; Muslim, comment. of al-Nawawī, iv. 106; Zaid b. 'Alī, ed. Griffini, p. 463).

These statements in the *Kur'ān* and in the *Sunna* form the foundation of the *Fīḡh* system on the subject. According to this, the person taking the oath must be *mukallaḡ*, he must be acting deliberately as a free agent and intend the oath. He must not take an oath to commit a sin; views are divided on the question whether such an oath is valid at all. One can only swear by God, either by His existence or by one of His names or attributes. The oath by the Prophet is recognised by some Ḥanbalis but in general is not considered a binding oath. The *barā'a* oath already mentioned is not recognised by the *Fīḡh*. The breaking of a vow (*hinṡ*) is considered a duty in certain cases, when one has sworn to commit a sin. The *ilā'* already referred to must be broken within four months if the man does not divorce his wife; after the *ḡihār* the wife

must at once be divorced or the vow must be expiated.

Expiation (*kaḡḡāra*) consists, according to *Sūra* v. 91, in setting free a slave, feeding ten poor men or clothing the same number; for those who cannot afford this, three days' fasting is equivalent. The things to be done are described in detail in the *Fīḡh* books. In the *ilā'* the expiation is the same as in other oaths while in the *ḡihār* it consists in releasing a slave who is a believer or fasting for two months or feeding 60 poor people (*Sūra* lviii. 4—5). The Muslim law recognises the oath of affirmation as well as the vow to perform. The former only occurs in lawsuits. A special case is formed by the *kaṣāma* already mentioned which was taken over from the ancient Arabs. It is limited in Islām to trial for murder and consists of 50 oaths which can be sworn by one or more individuals. The oath is imposed on the accuser but only in connection with certain indications (*lawṡḡ*) which must be regularly ascertained. If the accuser refuses to take the oath, the 50 oaths are applied to the accused; if he refuses they apply again to the accuser. In other cases the principle in Islām is that the onus of proof is on the accuser and the accused has to take the oath. Witnesses as a rule do not take an oath; witnesses to the will of a testator who has died in a foreign country are an exception (*Sūra* v. 105). If the plaintiff has only one of the two necessary witnesses, the oath of one of the parties may take the place of the second witness (al-Bukhārī, ii. 158 sq.). When the plaintiff has not valid proofs, the oath is put to the defendant; if he declines to take it, it is put to the plaintiff (*yamin al-radd*). Perjury on account of some crime is called *yamin al-ḡhamūs* by Muslim scholars, an expression which originally meant a peculiarly binding oath. Such oaths can be expiated in the above fashion, according to the *Shāfi'ī* school, if they are false, according to other views they cannot. The latter hold that expiation only applies to vows.

The formalism of the legal system opens the way for all kinds of artifices by which an oath can be broken, yet formally kept. There thus arose a whole literature regarding such subterfuges; the best known work is al-Ḳhaṣṣāf's *Kitāb al-Hiyal wa-l-maḡhārīdī* (ed. by Joseph Schacht [autogr.], Hannover 1923; printed Cairo 1314).

AL-KAŠAŠ "the story", title of *Sūra* xxviii. of the *Kur'ān*, taken from vs. 25. See further KAŠSA.

KASB. The root occurs a large number of times in the *Kur'ān* with the meanings, "seek", "attain", "earn", "work" (good and evil); see C. C. Torrey, *The Commercial Theological Terms in the Koran* (Leiden 1892), p. 27 sqq. and Nöldeke's note there. Stems i. and viii. are used synonymously although al-Baiḡāwī on *Kur'ān* ii. 286 (Fleischer's ed., i. 143, 21), following al-

Zamakhsharī on the same passage, tries to show that there is more personal, reflexive force (*ʿitimāl*) in viii. Hence *kasb* and *iktisāb* mean much the same. There are two technical usages. I. It is equivalent to the *iktisāb* of the Ashʿarites. "The action of a creature is created, originated, produced by Allāh but it is 'acquired' (*maksūb*) by the creature, by which is meant its being brought into connection with his power and will without there resulting any effect from him in it or any introduction to its existence, only that he is a locus (*maḥall*) for it" (al-Djurdjānī on *al-Mawāḥiḥ* of al-Idjī, Bulāḳ 1266, p. 515). Al-Ghazālī, perhaps desiring to emphasize the personal acceptance, apparently preferred *iktisāb*; see his statement in the *Iḥyāʾ* (ed. with comm. of al-Murtaḍā al-Zabidī, ii. 165 sqq.) and the elaborate commentaries thereon. Al-Rāzī on *Qurʾān* ii. 286 (ed. Cairo 1308, ii. 388) states the different views as to the two terms. Al-Sanūsī in his *Muḥaddima* (ed. Luciani, p. 68 sqq., also note p. 237) uses *iktisāb* only twice and evidently in the same sense as *kasb*; his statement is an extension of that of al-Djurdjānī. This is the most subtle question in all Muslim *Kalām* (*adaḥḥ min kasb al-Ashʿarī*) but it may be guessed that al-Ashʿarī wished only to explain our consciousness of freedom to choose and that his explanation was that this consciousness is a separate creation by Allāh in the mind; man for him was an automaton with consciousness as part of the machinery. The later mutakallims, especially under the influence of the more ethical Māturīdite system, turned it otherwise; cf. e. g. al-Taftāzānī in his commentary on the *Aḳāʾid* of al-Nasafī (a Māturīdite), Cairo 1321, p. 98 sqq. II. *Kasb* and *iktisāb* are applied to that knowledge (*ʿilm*) which belongs to created things and is attained by the voluntary (*iḥṭiyārī*) application of secondary causes (*asbāb*), (a) like reason and consideration of premises in deduction and (b) like listening and turning the eye in sense perception. They are thus wider than *istidlālī* which applies only to reasoning. *Ḍarūrī*, "necessary", is sometimes opposed to *iktisābī* and sometimes to *istidlālī*. Others arrange thus: knowledge in a created being is of two kinds, (a) *ḍarūrī* and (b) *iktisābī*; in the acquisition of (b) the *asbāb* are of three kinds, the healthy senses, reliable narrative, rational consideration (*naḡar*); *naḡar* is of two kinds, immediate intuition (*baḍiḥa*) and *istidlālī*, deduction (al-Taftāzānī on the *Aḳāʾid* of al-Nasafī, p. 39 sq.; also al-Djurdjānī on *al-Mawāḥiḥ*, p. 16, 21).

KASF. [See KHUSŪF.]

KASH, the modern SHAHR-I SABZ ("green town", on account of the fertility of its surroundings) a town in Bukhārā on what was once the great trade route between Samarkand and Balkh. According to Chinese authorities, Kash (Chinese transcription K'ia-sha or Kié-shuang-na, also K'iu-sha, as a town Ki'-she) was founded at the beginning of the seventh century A. D.; cf. J. Marquart, *Chronologie der alttürkischen Inschriften*, Leipzig 1898, p. 57; *Ērānshahr* etc., Berlin 1901, p. 304; E. Chavannes, *Documents sur les Toukine (Turcs) occidentaux*, St. Petersburg 1903, p. 146. Yāqūt's statement (*Muḍjam*, ed. Wüstenfeld, iv. 274) on the authority of Ibn Makūlā, who died in 473 (1080/1), that in Mā warāʾ

al-Nahr the name was everywhere pronounced *Kāsh* is very doubtful; for the later period the pronunciation *Kash* is proved by the frequently recurring expression *Kash-i Dikesh*. The accounts of the Arab conquest are discussed by Marquart in particular (*Ērānshahr*, see Index). The *Kash* of the Sāmānid period is described very fully by the Arab geographers (*Bibl. Geogr. Arab.*, ed. de Goeje, i., al-Iṣṭakḥī, p. 324; ii. Ibn Hawḳal, p. 375 sq.; iii., al-Muḳaddasī, p. 282). The town in those days was a third of a *farsakh* (about a mile) in length and breadth: the old city (*madina*, Persian *shahrīstān*) as well as the citadel (*kūhandiz*) were already deserted, only the outer town (*rabad*) was inhabited; in the vicinity of the earlier Kash a new town was arising. This suggests that the modern town has a site different from that of the Kash which existed before the Muslim conquest. Nothing is known of other transferences of the site. Kash is never mentioned in the history of the Mongol conquest, so that it must have submitted to the Mongols (617 = 1220) without resistance. The name Shahr-i Sabz first appears — on coins also — about the middle of the eighth (fourteenth) century. Many buildings were erected in Kash by Timūr, who belonged to the district of Kash, and his contemporaries; thereon cf. W. Barthold in *Zapiski vost. otd. arkh. obsht.*, xxiii. 1 sq. Especially famous is the palace Ak Sarāy built at the end of 782 (beginning of 1380) by builders from Khwārizm; cf. Sharaf al-Dīn Yazdī, *Zafar Nāme*, Calcutta 1887—8, i. 301 sq., and the notices by Nizām al-Dīn Shāhī and ʿAbd al-Razzāk Samarḳandī in W. Barthold, *L'inghég i ego vremya*, Petrograd 1918, p. 23; very little survives of this palace; on the inscriptions cf. N. Sitnyakowsky in *Protokoll Turk. Kruška Lyub. Arkh.*, v. 114 sq. As late as the tenth (sixteenth) century Kash or Shahr-i Sabz is described by Hāfiz-i Tānīsh (*ʿAbd Allāh Nāme*, MS. of the Asiat. Museum, 574 age, f. 87b) as an important town usually governed by a prince of the ruling house, while the administration of Nasaf or Karshī [q. v.] could be left to a military official (*Darughā*). At the present day the situation is reversed and Shahr-i Sabz is an unimportant town in comparison with Karshī, the result of the political changes in the twelfth (eighteenth) century. The district of Shahr-i Sabz is surrounded by hills on north, south and east, so that it can hardly be expected that this region will be soon linked up with the railway system, while Karshī is already connected by railway with Bukhārā and Termedh; the town of Shahr-i Sabz has therefore little prospect of renewing its prosperity.

BARTHOLD)

KASHĀN (in Arab authors often Kāshān), a town in ʿIrāk ʿAdjamī (al-Djibāl, Media) three days' journey from Isfahān and twelve *farsakh*'s from Kūm. It is an ancient town which is said to have been rebuilt by Zubaida, wife of Hāṭim al-Rashīd. The heat there is excessive in summer, but the winter is very mild. Water, which is scarce, is brought by an aqueduct from the spring at the castle of Fin outside the town, to which

the inhabitants go on pilgrimage once a year. The melons and figs of this locality are esteemed. Large numbers of big, black and very dangerous scorpions are found there. The natives are all *Shi'is* and were already noted for their devotion to the twelve Imāms at a time when this part of the world was still *Sunni*. In expectation of the return of the hidden Imām, they used to go out every morning with great ceremony to be ready to meet him; after a long wait they returned home disappointed but not discouraged. Almost the same thing was done at Hilla (Cl. Huart, *Histoire des Arabes*, ii. 324—5).

The town was destroyed by an earthquake in the reign of the Wakil Karim Khān Zand, who had it rebuilt. Situated in the centre of a fertile plain, it was surrounded by walls flanked with towers, with a deep ditch running all round; it had six gates. Although not very important (15,000 inhabitants of whom 300 were Jews at the beginning of the nineteenth century), it is one of the prettiest towns in Persia; its streets are clean and paved. According to A. Williams Jackson, *Persia Past and Present*, New-York 1906, p. 410, it has now about 20,000 inhabitants. Its manufactures are cauldrons, silks embroidered with gold and silver flowers, plain stuffs with strips of colour and a kind of velours. Gold, silver and steel are worked there. It has become especially famous for the plaques of faience called *Kāshī* [q. v.], of which there was no longer any trace as early as 1808.

KĀSHĀNĪ. [See 'ABD AL-RAZZĀK].

KĀSHĀNĪ, HĀDJĪ Mirzā DJĀNĪ, the Bābī historian, was a merchant of Kāshān who, with two of his three brothers, HādjĪ Mirzā Ismā'il Dabih and HādjĪ Mirzā Aḥmad, was among the earliest disciples of Mirzā 'Alī Muḥammad, the Bāb. When the Bāb, in 1847, was being conducted from Isfahān to his prison at Mākū the brothers bribed his escort to allow him to be their guest for two days and two nights at Kāshān. In the following year Kāshānī, with Bahā' Allāh, Ṣubḥ-i Azal and other prominent disciples, attempted to join the Bābī insurgents of Shaikh Ṭabarsī near Bārfurūsh in Māzandarān but was captured by the royal troops and imprisoned for some time at Āmul, until ransomed by two merchants of Kāshān. "We find him always impelled, as it would appear, by religious zeal, now at Bārfurūsh, now at Mashhad, now at Tīhrān." The Bāb was put to death on July 9, 1850, and Kāshānī occupied the next two

years in writing his history of the movement, for which task he was qualified by personal acquaintance not only with the Bāb, but with Ṣubḥ-i Azal, Bahā' Allāh and almost all the early apostles of the Bābī religion and by detailed and accurate information of every event connected with the movement during the first eight years of its existence. His history (which, for some mystical reason not readily comprehensible he styled *Nuḳḥat al-Kāf* "the Point of Kāf"), is accurate, but is disfigured by fulsome and almost idolatrous adulation of his hero and by coarse abuse of his persecutors. When Nāsir al-Dīn Shāh resolved to strike a blow at the adherents of the new religion, Kāshānī was forcibly removed from the shine of Shāh 'Abd al-'Azīm, about six miles south of Tīhrān, where he had taken sanctuary, and thrown into prison, where he shared the cell of Bahā' Allāh. On Sept. 15, 1852, he was put to death at Tīhrān in company with twenty-seven of his co-religionists. As an act of policy, in order to divert vengeance from himself and his minister, the Shāh handed the heretics over to various communities for execution and Kāshānī was delivered to Ākā Mahdī, Malik al-Tudjdjār ("chief of the merchants"). According to one account he suffered death by the bowstring, and according to another the merchants and shopkeepers of the city inflicted wounds on him until he perished.

Of his brothers Ismā'il died at Tīhrān and Aḥmad, who, after the death of the Bāb, recognised Ṣubḥ-i Azal as his successor, was slain at Baghdād by some Bahā'īs, followers of Bahā' Allāh.

(T. W. ILAIG)

KASHF, "uncover", has two technical uses. I. In prosody it is the elision of the seventh vowel letter in the foot *maf'ūlātu*, changing it to *maf'ūlā* and farther to *maf'ūlātun* — a combination of *wakf* and *kaff*. This is often called *kashf*, "cut", which is more probable; but that root has unlucky associations (Freytag, *Darstellung der arabischen Verskunst*, p. 87; De Sacy, *Grammaire arabe*², ii. — *Traité de la Prosodie*, Tab. iii.; Garcin de Tassy, *Rhétorique et Prosodie*, p. 241; al-Djurdjānī, *al-Ta'rifāt*, under *kashf*). — II. In the emotional religious life (*taṣawwuf*) it is the broadest term for the unveiling of the mystic. When this is analyzed more carefully it is commonly divided into three: (i.) *muḥādḍara* in which reason (*'aql*) is the means by proof (*burhān*); (ii.) *mukāshafa* in which taught knowledge (*'ilm*) is the means by explanation (*bayān*); (iii.) *muṣṭahada* by means of immediate, personal experience (*ma'rifa*). By (i.) '*ilm al-yaqīn*' is reached by the *arḥāb al-ṣuḳūl*; this is still in the realm of reason and is not really *kashf*. By (ii.) '*ain al-yaqīn*' is reached by the *aṣḥāb al-utūm* and by (iii.) *ḥaḳḳ al-yaqīn* is reached by the *aṣḥāb al-ma'ārif*; the last is the immediate Vision of God and is sometimes called *ma'āyana* (al-Kushairī, *al-Risāla*, ed. with commentaries of Zakariyā al-Anṣārī and al-'Arūsī, Būlāk 1290, ii. p. 79 sqq.; on this cf. R. Hartmann, *al-Kushairī's Darstellung des Ṣūfismus* (*Turk. Bibl.*,

xviii.), p. 72 sqq.; Hudjwiri, *Kashf al-Mahjūb*, transl. Nicholson, p. 373 sqq. and by index.

Bibliography: Is given above; add for both uses *Dict. of Techn. Terms*, ii. 1254.

(D. B. MACDONALD)

KĀSHGHAR, a town in Chinese Turkestan, called Su-le in the oldest Chinese sources; the same name is still used in Chinese official documents. The name Kāshghar first appears in Chinese transcription (K'iu-cha) in the *T'ang-shu*; cf. E. Chavannes, *Documents sur les Tou-Kiue (Turcs) occidentaux*, St. Petersburg 1903, p. 121 sq. On the pre-Muhammadan Kāshghar and the ruins of Buddhist buildings in the vicinity see A. Stein, *Ancient Khotan*, Oxford 1907, i. 52 sq.; do., *Serindia*, Oxford 1921, p. 80 sq. Arab armies did not reach Kāshghar; the story of Kutaiiba's campaign in 96 (715) is, as H. A. R. Gibb (*Bulletin of the School of Oriental Studies*, ii. 467 sq.) has shown, a mere legend. On the flight of a prince of Farghāna to Kāshghar in the time of the Caliph al-Manṣūr (755-775) see the article *FARGHĀNA*. In the Sāmānid period a *Dihkhan* of Kāshghar with the name or title Tughān Tegin is mentioned (Ibn al-Athīr, ed. Tornberg, viii. 37), with whom the rebel prince Ilyās b. Ishāk took refuge; whether this *Dihkhan* had already adopted Islām is not mentioned. At a later date Satuḳ Boghrā Khān is mentioned as the first Muslim Khān of Kāshghar; in the oldest reference to him that we have (Djamāl Kūrashī in Barthold, *Turkestan w epokhu mongolskago nashestwiya*, i., St. Petersburg 1898, p. 130 sq.) the date of his death is given as 344 (955). This story already contains features which are certainly legendary; in the story of the building of the first mosque we have the well-known folklore motif of the cutting of an ox-skin into strips. The later legend, reproduced by F. Grenard (*Journ. As.*, Ser. 9, vol. xv. 1 sq.), has not this feature but contains many other legendary traits and absolutely false dates. The year 344 A. H. is perhaps too early as probably the story of the adoption of Islām by a numerous Turkish people (200,000 tents) in 349 (960) must be referred to the Turks of Kāshghar; this story is found not only in Ibn al-Athīr (viii. 396) but also in Ibn Miskawayhi (*The Eclipse of the Abbasid Caliphate*, ed. Margoliouth and Amedroz, Oxford 1921, text ii. 181, translation v. 196); the original source is probably Thābit b. Sinān al-Ṣāhī (cf. Ibn al-Athīr, viii. 476 and 491; *The Eclipse* etc., *Index*). The tomb of Satuḳ Boghrā Khān is in Artūc (now pronounced Artush) north of Kāshghar, where it is still shown.

Under the rule of the Ilēk-Khāns [q. v.] Kāshghar was politically the most important town in what is now Chinese Turkestan; perhaps it was also the most important from the point of view of culture. In the fifth (eleventh) century there was already in existence a work in Arabic on the history of the town, composed by Abu 'l-Futūh 'Abd al-Ghāfir (or 'Abd al-Ghaffār) b. Husain al-Alma'i al-Kādighari (sic!); the author's father, who survived his son (according to al-Sam'āni by about ten years), died in 486 (1093). On father and son and the works of the latter see al-Sam'āni, *Kitāb al-Ansūb*, ed. Margoliouth, Leiden-London 1912, f. 470a and 472a; Djamāl Kūrashī in Barthold, *Turkestan* etc., i. 123 sq. The rulers were buried in a special mausoleum (Arabic *al-djunbadha al-khāṣniya*) on the bank of the Tūmen;

the first prince buried there died in Muḥarram, 424 (Dec. 7, 1032—Jan. 5, 1033) and the last in Radjab, 601 (Feb. 22—March 23, 1205). During Mongol rule a madrasa was built in Kāshghar by Mas'ūd Beg (cf. the art. BUKHĀRĪ); in its library was the copy of the *Shāh* of al-Djawhārī used by Djamāl Kūrashī for his translation (E. Sachau and Ethé, *Cat. of the Persian . . . Manuscripts of the Bodleian Library*, Oxford 1889, col. 983). Kāshghar was later under the rule of the Dughlāt Amirs [see the article *Dughlāt*]; the last of them, Abū Bakr, reigned till 920 (1514), according to the statement of his relative Haidai Mirzā [q. v.] forty-eight years (*Tārīkh-i Kashgari*, English translation, London 1895, p. 253 and 326); but this is contradicted by the author himself, who says that Kāshghar was not conquered by Abū Bakr till 885 (1480/1). Abū Bakr is the founder of the modern town. He destroyed the old fortress and in the last years of his reign rebuilt it on a new site, on the other side of the Tūmen on the tongue of land between this river and the Kīrīl Šu (*ibid.*, p. 286 sq. and 295).

Under the rule of the "Mongol" Khāns (cf. the *Bibliography* to the art. ČAGHATAI-KHĀN) and later under that of the Kalmucks and Chinese the capital of the district was no longer Kāshghar but Yārkand; it is only quite recently, since the reconquest of the country by the Chinese in 1877, that Kāshghar has again attained considerable importance as the residence of the Tao-T'ai, who is over the western and southern part of Chinese Turkestan as far as the oasis of Čerčen, and the residence of the Russian and English consuls. On Kāshghar in 1873 see H. W. Bellew in Sir T. D. Fousyth, *Mission to Yarkand in 1873*, London 1875. On modern conditions see especially Kornilow, *Kashghariya*, Tashkent 1903 (review by W. Barthold in *Zapiski vost. otd. arkh. obsht.*, xv. 131 sq.) with plan of Kāshghar on p. 268, and M. Hartmann, *Chinesisch-Turkestan*, Halle a/S. 1908, especially p. 45 sq., 89 sq., with plan of the town from Kornilow. The most important building in Kāshghar and vicinity is Iḥdrat Apāk, the tomb of the famous saint of the eleventh (seventeenth century) Kāshghar is now also of greater importance than Yārkand for its intellectual life; Yārkand, "which, down to the conquest of Kaschgaria by the Chinese, was the political capital and also the principal centre of learning and sanctity, has now fallen behind Kāshghar. Its day is over" (M. Hartmann, *op. cit.*, p. 49). The number of its inhabitants is said to be about 50,000.

(W. BARTHOLD)

KĀSHĪ (in Yākut: KĀSHĀNĪ, KĀSHĪ; in Ibn Baṭṭūta: KĀSHĀNĪ), the name derived from that of the town of Kāshān [q. v.] in Persia, given to square, sometimes hexagonal, plaques of faience used in the exterior decoration of buildings or of interior walls.

It is one of the most ancient arts of nearer Asia (already known to the Assyrians and then to the Achaemenids) which survived in Persia in the middle ages, and more especially, it appears, in the town of Kāshān. The monuments of modern Persia from the time of the Ṣafawids to our day (those that are older are in ruins) are covered with these plaques of faience decorated with conventional flowers (*kāshī-kārī*), in which the predominant colours are indigo blue, turquoise blue, green, less frequently red and yellow. Those

with figures in relief are the rarest and the most esteemed.

When this industry was brought to the town of Damascus by Persian artisans — perhaps Christians (some plaques bear inscriptions in Syriac) — the Syrians called these plaques *ḫishānī* (from the Arabic orthography *Ḳāshān*). The art disappeared perhaps over a century ago; the ruins of the factory which made them are still shown outside the *Bāb Sharḳī*. These faïences were imitated in Turkey at Iznik and Kutāhiya. Recently an attempt has been made to revive this last factory, but the modern work is far from equalling the beauty of the ancient pieces; it is the same in Persia where the beautiful models of past ages are clumsily imitated at the present day.

(CL. HUART)

AL-KĀSHĪ, DJAMSHĪD P. MAʿŪD B. MAHMŪD, GHUYĀTH AL-DĪN, a Persian, was the first superintendent of Ulūgh-Beg's observatory in Samarḳand and a collaborator with this prince in the preparation of his astronomical tables. Besides his astronomical and mathematical researches he also studied medicine; he must have died about the year 840 (= 1436/7). Of his works there have survived: (1) *Ziḍj-i Ḳhāḳānī* (the *Ḳhāḳānī* tables), in Persian, in a manuscript in Constantinople (Aya Sofya), a supplement to the *Ilkhānī* tables (of Naṣīr al-Dīn al-Ṭūsī); (2) *Miftāḥ al-Ḳhisāb* (key to arithmetic), in Berlin, Leiden, British Museum, India Office, etc.; the preface to it was translated by F. Woepcke (see *Bibliography*); (3) *al-Risāla al-Kamālīya*, also called *Sullam al-Samāʾ* (the ladder of heaven), on the magnitudes and distances of the heavenly bodies, in Oxford, Leiden, India Office; (4) *Risāla fī Istikhṛāḍī Djaib daradja waḥida*, etc. (an essay on the calculation of the sine of a degree), in Cairo; in this al-Kāshī solves an equation of the third degree by an interesting process of approximation (cf. below Hankel's work).

KĀSHIFĪ, MUHAMMAD SHARĪF B. SHAMS AL-DĪN, with the *takhalluṣ* KĀSHIFĪ KUMĀIT, a Persian man of letters of the xith (xviith) century. What is known of his life comes mainly from the *Ḳhātima* of his *Ḳhazān u Bahār*. The author's father, Shams al-Dīn Muḥammad, also known as Shams-ī Shirāzī, was living at Karbalā when his son Muḥammad was born and left it for Iṣfahān in 1006 (1597/98) to escape persecution from the Sunnis. Muḥammad, the son, was then three years old so that he was born in 1003 (1594/95). In 1008 (1599—1600) Shams al-Dīn went to Mashhad and returned seven months later to Iṣfahān. These dates are given by the Brit. Mus. MS., according

to Rieu's *Catalogue*; from Rosen's description of the St. Petersburg MS. it seems to make the author five years old in 1006 and to put the journey to Mashhad in 1010 (1601/2). After a stay of 23 years in Iṣfahān the family moved to Ray where the father died in 1035 (1625/26). Muḥammad Shāif himself was Ḳādi of Ray for 15 years.

In the *Tadhkira-i Naṣrābādī* (synopsis in Sprenger, *Catal. of the manuscripts of the Libraries of the King of Oudh*, i. 88 sqq.) there is a notice of Kāshif and his two brothers, Ismāʿīl Muṣṣif and Muḳīmā. The date of our author's death is unknown but must be after 1063 (1652/53). This date is given by the chronogram at the end of the *Ḳhazān u Bahār* in the London MS. as the date of completion of the work; he mentions his other works in the *Ḳhātima* as already written so that the *Ḳhazān* is the last.

Works. Kāshif, who, as he himself tells us, had a literary training and devoted a considerable period to study, wrote both prose and poetry. He composed three epics, two of which (the *Lailā Maḍnūn* and the *Haft Paikar*), like very many epic poems of the later period, deal with subjects very popular since Nizāmī's time. The third was called *Abbās-nāma*, probably a panegyric on the Ṣafawid 'Abbās II (?). Then there are his shorter poems, *ḳaṣīda's*, *rubāʿī's* etc. His prose works are: *Sirādī al-Munīr*, a work inspired by Sa'dī's *Gulistan*, composed in an ornate style with verses interspersed. The text is divided into 20 sections (*lamʿa*) and deals with the different virtues and moral qualities which are illustrated by anecdotes. The London MS. gives 1030 (1620/21) as the date of completion of this work, but it is probable that this date refers to the time of copying the MS. and the work itself is a few years older. *Ḳhazān u Bahār*, his last book, is a collection, also in ornate prose, of tales which his young brother Muṣṣif urged him to compile. Most of the stories are taken from the earlier *al-Faradī ba'd al-Shidda* of Ḥusain al-Dihistānī, but he details, for example, also an incident that happened to his father Shams al-Dīn. The work consists of a preface (*muḳaddama*), fourteen sections (*asās*) and a conclusion (*ḳhātima*) (lithogr. Tabriz 1294). Two other prose works from his pen are recorded, namely *Durr-i Maḳnūn* and *Hawāss-i Bāṭin*.

KĀSHIFĪ, ḤUSAIN WĀʿIZ, a prolific writer, who flourished in Hirāt (during the reign of Sulṭān Ḥusain Mirzā [q. v.] and died in 910 (= 1505). Among the best known of his writings are (i.) a work on ethics, entitled *Akhṭāk-i Muḥsinī*, dedicated to Abu 'l-Muḥsin, a son of Sulṭān Ḥusain Mirzā, and completed in 900 (= 1495); it was printed for the first time in Calcutta, 1809, and frequently since; (ii.) a modernised version of Naṣr Allāh b. Muḥammad b. al-Ḥamid's [q. v.] earlier Persian translation of *Kahilak wa-Dinnah* [q. v.]; he undertook this task at the suggestion of Nizām al-Dīn Amīr Shaikh Ahmad al-Suhailī (ob. 907 or 908 = 1501—1503) and entitled it *Anwār-i Suhailī*; it is written in a very artificial style, overlaid with rhetorical ornament, and has on this account been much admired in the East;

MSS. are common, and it has been printed several times, for the first time in Calcutta, 1804. His other works comprise *Djawāhir al-tafsīr li-tuhfat al-amīr*, a Persian commentary on the Kur'ān, compiled at the request of Mir 'Alī Shīr in 899, but he only completed one out of the four volumes he had planned, and broke off this work to compile for his patron a shorter commentary, entitled *Mawāhib-i-'aliya*, but usually styled *Tafsīr-i-Husaini*; — *Rawḍat al-Shuhadā*, a history of the martyrdom of 'Alī and his family (abridgments exist under the titles, *Dah Madjilis* and *Muntakhab-i-Rawḍat al-Shuhadā*); — *Bad'at al-Afkar fī Ṣanā'ī al-Ash'ar*, a treatise on figures of speech and poetic artifices, as well as faults in poetic composition; — *Makhsan al-inshā'* (compiled in 907 and dedicated to Husain Mirzā) and (later) *Ṣaḥifa-i-Shāhi*, two works containing models of epistolary composition; — *Kiṣaṣ wa-Āthār-i-Hātim Ṭā'i* (or, *Risāla-i-Hātimiyya*), completed in 891, giving the story of Hātim Ṭā'i [q. v.]; — *Tuhfat al-ṣalawāt*; — *Risāla al-'aliya fī 'l-aḥādith al-nabawiyya*; — selections from Djalāl al-Dīn Rūmī's *Mathnawī*, entitled *Lubāb-i-ma'nawī*, from which shorter extracts were made, entitled *Lubb-i-Lubāb*. Several of the above works have been translated into Turkish, and the first two into English.

KASHISH-DAGH (in Turkish "mountain of the priests"), a name given by the Ottomans to Olympus in Mysia, at the foot of which is built on the north the town of Brussa [q. v.]. Its slopes are covered with forests now much diminished; its summit is covered with snow which only melts in summer (height 6,200 feet). Its massif is formed of granite, marble and felspar. At the time of the Ottoman conquest, Olympus was covered with convents and hermits' cells whence its Turkish name. The Christian monks were replaced by dervishes. The poet Lāmī'ī has described the two monasteries Geikli Baba and Doghlu Baba. At the foot of the mountain in a quarter of the town of Brussa is the tomb of Shaikh Shams al-Dīn Muḥammad b. 'Alī of Bukhārā, better known by the name Sultān Amir Walī; a mosque is built over the tomb.

KASHKĀI, a Turkish people in Persia. The name is said to be the Turkish *kashkā* "horse with a white spot on its forehead" (W. Radloff, *Versuch eines Wörterbuches der türk. Dialecte*, ii. 395). The *Kashkāi* are said to be descended from the Turkish Khaladj (cf. also *B.G.A.*, i. 158: Khaladj) mentioned by al-Iṣṭakhri (*B.G.A.*, vol. i.) and later writers in the country between India and Sistan. The *Khaladj* are said to have migrated first to the Persian 'Irāk where a district near Sāwa is still called *Khaladjistān*; there is still said to be a Turkish speaking people there

(private information from V. Minorskiy). The *Kashkāi* are said to have come from the 'Irāk to Fārs where they lead a nomadic life at the present day. Their winter quarters are in the southern part of this province, especially around Firūzābād, where the chief of their tribe (Ilkhānī) is regarded *ex officio* as governor; the stronghold of Parwiza was built there by the Ilkhānī Ṣawlat al-Dawla (from 1324/5 = 1906/7). In summer they wander as far as Kunīsha and Gaudemūn in the southern part of the province of Iṣfahān. According to Curzon (*Persia and the Persian Question*, London 1892, ii. 112 sqq.), the *Kashkāi* were a numerous people down to about 1870 (60,000 families; in case of war about 120,000 horsemen) but they suffered greatly from the famine of 1871 and 1872; at the time of Curzon's journey (1889) the number of families was said to be 25,000, while he put it at really some 10—12,000. The number 12,000 is also given by Tumanskiy (1894) for the tents of the *Kashkāi* proper, but he says the number of all the nomads for whom the Ilkhānī of the *Kashkāi* paid the taxes was double (24,000). Larger figures are given by later travellers: 35,000 (1906) and 55,000 (1914). In 1914 the *Kashkāi* formed a well armed division of an army of about 20,000 men and took part in the world-war on Germany's side against England. All the *Kashkāi* are fanatical Shi'is. The men are engaged in horse-breeding (the breed is related to the Arab); the women weave carpets. A few *Kashkāi* have gone over to a settled life in the south at Dārāb and in the north at Kumīshe. According to Curzon, the *Kashkāi*, in spite of their Turkish descent, were considered to belong to the Lūr family; in their customs also they differ little from the Bakhūyārī and Kutgelū (the Turkish tribe of the Aghācherī also belongs to this Lūr tribe); but the language of the *Kashkāi*, as the songs written down in 1914 by A. Romaskevič show, is a Southern Turkī dialect closely related to the Turkoman and Aḡharbaidjāni.

Bibliography: A. A. Romaskevič, *Piesni Kashkaicev* (in the *Sbornik Muzeya Antropologii Etnografii pri Ross. Akad. Nauk.* = *Publications du Musée d'Anthropologie et d'Ethnographie près l'Acad. des Sciences de Russie*, v.ii.; so far only available separate, p. 573—610; in it the literature is given from A. Dupré, *Voyage en Perse*, Paris 1819, to G. Demorgny, *Les réformes administratives en Perse. Les tribus du Fars* (*R.M.M.*, 1913, xxii. 92—100) and B. V. Miller, *Kočeviya plemena Farsistana* (*Vostochny Sbornik*, 1916, ii. 213—218; reports for 1906).

(W. BARTHOLO)

KASHKŪL (p.), an oval bowl of metal, wood or cocoanut (calabash), worn suspended by a chain from the shoulder, in which the dervishes put the alms they receive and the food which is given them. The etymology of this word is obscure; a popular one is given by the Persians: *kash* "draw" (imperative) and *kul* "shoulder", "what one draws over the shoulder"; but as we find a form *khačkūl* attested in the older poets (Anwārī, Saif Isfarangī), this explanation can hardly be accepted. The dictionaries give as the first sense "beggar" and then "beggar's bowl". We are not able to say whether they are right.

In literature the word means an album, a collection of different pieces from different sources, and is applied particularly to the *Kirāb al-Kashkūl*

of Bahā' al-Dīn al-ʿAmīlī [cf. above s.v. AL-ʿAMĪLĪ].

G. Browne, *A Year amongst the Persians*, p. 52. (CL. HEART)

KASHMĪR (1). The name *Kashmīr* (in Arabic works also *Qashmīr*) has from early times been employed to denote the valley situated in North-west Himalaya between 33° 30' and 34° 40' N. Lat. and 74° and 75° 30' E. Long. This valley has a length from N. W. to S. E. of about 84 miles and a breadth from N. E. to S. W. of 20 to 25 m. The area is about 1900 sq. miles. It is separated from the outer hills of *Djammū*, *Rādjawārī* and *Pūnē* by the lofty *Pir Pandjal* Range of which several peaks are more than 15,000 feet in height. On the North-west side ranges which come nearest to the valley rise to greater heights, the principal peaks being *Gwash-brārī* (17,800 ft.), *Amarnāth* (17,321 ft.) and *Haramukh* (16,903 ft.). Beyond these is an extensive mountainous district through which the passes connecting the valley with *Ladākh*, the Upper Indus valley, and Central Asia are few and difficult. The *Zādji* Pass (11,300 ft.) is the principal means of communication with *Ladākh*, and the *Burzil* Pass (13,500 ft.) with *Astōr* and *Skārdū*. With the plains of India the most direct pass is via *Bhimbar* over the *Pir Pandjal* (11,400 ft.), but the easiest and only route open throughout the year is that by *Bāramulla* where the R. *Djehlam* or *Bēhat* leaves the valley. This may be approached now most easily by the good road from *Rāwal Pindī* via *Marri*, which follows the gorge of the *Djehlam*, but the *Abbottābād* route which joins the other at *Muzaffarābād* (the confluence of the *Kishangangā* with the *Djehlam*) has more natural facilities and was most used in early days. The geography and geology of this isolated valley are fully described by *Drew*, *Lydekker* and *Oestreich*, and the historical geography has been elucidated by *Cunningham* and *Stein*.

The valley is shown to be a lacustrine basin formed by the *Djehlam* R. and its tributaries, of which the *Sind* and *Lidar* are the principal. The drying up of the lake which filled the valley is due to the removal of the rocky barrier which must have closed the exit at *Bāramulla*, and no doubt the general progressive dessiccation of this part of Asia contributed to the result. The *Wular* Lake is the principal remaining sheet of water, and the smaller *Māpasbal* Lake and the *Srinagar Dal* also deserve mention.

The surface of the valley lies between 5000 and 6000 ft. above sea level, it is nearly level and of great fertility, and seems to have attained prosperity at an early period, although its remoteness and inaccessibility protected it from many of the storms of invasion which have swept over Northern India. The people of *Kashmīr*, although of fine physique, have generally been stigmatized by travellers and rulers alike, from *Yuan Čwang* to *Abu 'l-Faḍl* [q. v.] and *Gulāb Singh*, as an unwarlike, cowardly and cunning race, but, as *Lawrence* has pointed out, these defects have been exaggerated by persistent oppression. It is evident that a race which maintained its independence for so many

centuries could not, even though assisted by the great natural difficulties of approaching the country, have been altogether destitute of a manly character.

Although historical information does not go back to a very early period, yet for the last two thousand years *Kashmīr* is exceptionally well supplied with sources of historical information. The principal of these is *Kalhana's Rājataranginī*, a metrical chronicle composed in the xiith century, which is almost unique in India, and which as edited, translated, and annotated by *Stein* is the main source of our knowledge. Other authorities are the Chinese pilgrim, *Yuan Čwang*, who visited *Kashmīr* in the viith century, the chronicle of *al-Birūnī* [q. v.] in the xith century, the *Pin-i Akbarī* of *Abu 'l-Faḍl*, the diary of the Emperor *Djahāngīr*, and the accounts of many modern travellers, beginning with the French physician *Bernier*, who accompanied the Emperor *Awrangzēb* [q. v.] on his visit to the valley. There is also a very complete series of coins illustrating the history of *Kashmīr* from the 6th century till the present day through the period of the *Ephthalites*, the *Hindū* kings, the *Muslimān* sultāns, the *Mughal* Emperors, the *Durrānīs* of *Afghanistan*, the *Sikhs* and the present rule of the *Hindū Dogras* of *Djammū*, under British suzerainty.

The most noticeable point in the history is the immunity of the valley from the great historic conquerors. *Alexander* did not touch it, and it repelled the attack of *Maḥmūd* of *Ghaznī*. *Čingiz Khān* [q. v.] and *Timūr* passed it by as did *Bābūr* [v. *BĀBER*]. It fell easily into the possession of *Akbar* after he had consolidated his power over the whole of Northern India, and it was unmolested by *Nādir Shāh* even when the *Mughal* power had crumbled away under his attacks. Yet the disorganised country succumbed at once to the attacks of the mountainbred *Afghāns* of *Aḥmad Shāh Durrānī*, and the later *Durrānīs*, divided among themselves, were easily defeated by the *Sikhs*. In these cases the people of the valley, regarded simply as subjects for extortion, had no ground for preferring one set of conquerors to another, and they took no part in these later struggles.

No information about *Kashmīr* can be derived from classical sources before the time of *Ptolemy*, as the Greek historians or *Alexander* do not even mention it. *Ptolemy* (in the middle of the 2nd cent. A. D.) describes it as a very powerful state extending far beyond the limits of the valley, and it is evident that it formed part of the great kingdom of the *Kushāns* which spread over Northern India at that time. He calls it *Kaspeiria*, and states that it lies below the sources of the *Bidaspes*, the *Sandabal* and the *Adris*, i. e. the *Vitastā* (*Vēhat*, *Bēhat* or *Djehlam*), the *Čandra-bhāga* (*Cināb*) and the *Airawatī* (*Rāvi*), a very accurate description.

Before this time however, although there is no contemporary information, there is good ground for believing that *Kashmīr* formed part of the dominions of *Aśōka* about 250 B. C. The defeat of *Selenkos* by *Čandragupta* had enabled the *Maurya* monarchs to extend their power northward, and the spread of Buddhism made it easy for *Aśōka* to extend his influence into *Kashmīr* when he adopted that creed. No inscription of his edicts has been found in the valley, but that at *Man-sēhra* was situated close to the most obvious route

to Bāramulla through the Pakli plain forming part of Uṣā (Hazara), and Yuan Čwang tells us that he erected four stūpas in the valley.

This is confirmed by the *Rājataranginī* (i. 104), which shows the tradition still existing in Kalhapa's time. It represents Aśoka as a king who built numerous stūpas, and founded the city of Srinagari, the name of which is preserved in the modern capital Srinagar, although its actual site is marked by the temple of Pāṇḍiṭhan (i. e. Pīrānādhithāna "ancient capital"), three miles away. The chronicle again embodies an actual tradition when it comes to the kings Kanishka, Djuṣhka, and Hushka, who correspond very closely to the Kushāns Kanishka, Vāsishka, and Huwishka, known from coins and inscriptions. We know from the Chinese and other Buddhist records that Kanishka called together the second great Buddhist council in Kashmīr, and it seems probable that this took place, if the Buddhist tradition is correct, 400 years after Buddha's death, viz. the last half of the 1st century B. C. Even if the theory identifying Kanishka's date with the Śāka era should prove correct, this council cannot be dated later than the first cent. After the decay of the great Kushān kingdom it is probable that Kashmīr remained under the rule of minor chiefs of that race who were overthrown by the Ephthalites or White Huns in the early part of the 6th century.

All through this early period the name Kashmīr or some similar form seems to have been in use. Stein shows that Ptolemy's Kaspeiria corresponds with a Prakṛit form Kasvira, which is preserved in the modern Kashmīrī form Kashīr, while the older Sanskrit form Kāśmīra has survived almost unaltered in India and Persia as the appellation of the country. The derivation from a supposed Kāśyapa-pura advocated by Wilson and Lassen is not now generally accepted, and the Kaspatyros of Herodotos certainly does not refer to Kashmīr but to some place bordering on the Indus. He places it in the province of Paktyikē which must have been the later Pakhlī, the hilly district lying between the Indus and the Djeḥlam which gave its name to a *sarkār* of the Mughal empire under Akbar). Hekataios also mentions Kaspapyros as a city of the Gandarians. In the 7th cent. the Chinese pilgrims adopted the name Ki-pūi for Kashmīr, but Yuan Čwang also uses the form Ka-si-mi-lo.

The Ephthalite occupation of Kashmīr does not seem to have formed part of the direct invasion of India, which came from the west. Their king Mihira-gula seems to have been established at Sākala (Siyāl-kōt) in 520 A. D., when the Chinese pilgrim Sung-yun found him making war on Kashmīr. How far he succeeded is not clear, but after his defeat in Central India in 528 A. D. he appears to have retired into Kashmīr, and seems to have gradually obtained possession of the country, whence he attacked his brother who had usurped his throne in Gandhāra. Yaśodharman, his Indian conqueror, appears to have followed him into Kashmīr and struck coins there, but probably Mihira-gula remained in possession, as coins in the Kashmīr style are found in the names of his successors, Khingila and Tōramāna. Yuan Čwang, who visited Kashmīr early in the next century, states that Mihira-gula was a tyrant and oppressor of Buddhists. He was favourably received by the king then reigning, whose name he does not give, probably

Durlabha the founder of the Kārkoṭaka dynasty, and found 100 Buddhist monasteries still existing. Shortly afterwards king Harsha of Kanawdj [q. v.] extorted from Kashmīr the tooth-relic of Buddha, but did not invade the country. Relations with China were frequent during the 7th century. An embassy from China arrived in 713 A. D. After 720 A. D. the kings of Kashmīr were recognized by the Chinese emperors. The last recorded embassy from China was in 759 A. D. The Kārkoṭaka dynasty was then in possession, and the embassy in 713 A. D. seems to have been due to an application by the king Candrapīḍa for assistance against the Arabs, who now appear for the first time. Muḥammad b. Qāsim after the conquest of Sindh had advanced to the foot of the Himalaya, but no further advance was made. The regular coinage of Kashmīr reproducing that of the later Kushāns (with gradual degradation of designs) begins with the Kārkoṭakas and continues till the supersession of the Hindū by the Musalmān kings in the 14th century. The earlier kings of this race had possessions extending far beyond the limits of Kashmīr including Pakhlī, Pūnē, Rājapuri, Taxila and the Salt Range.

The extension of the Kashmīr style of architecture, which is found almost unaltered in the ancient temples of the Salt Range, may probably be referred to this period. Hindūism and Buddhism flourished side by side in Kashmīr, as we learn from Yuan Čwang, and even as late as the 12th century when Kalhapa wrote; and the style of architecture used for the Hindū temples was probably identical with that of the Buddhist *vihāras*. Foucher (*L'Art Gréco-Bouddhique*, p. 136—145) has proved its derivation from the Gandhāra architecture of the 1st and 2nd centuries. The double pyramidal roof, its distinguishing feature, has been perpetuated in Muḥammadan mosques up to the present day. The mosque of Shah Hamadān in Srinagar shows this feature.

It is also in his account of this period that references to the Shāhīs of Gandhāra begin to appear in Kalhapa's chronicle, and (as was the case with China) the growth of Islām appears to be the cause of the alliance between Gandhāra and Kashmīr. In addition to the progress made in Sindh attacks were being made on the Gandhāra border towards Kābul. Al-Ṭabari tells us that as early as A. H. 23 'Āsim b. 'Amr reached Kandahār (Gandhāra) and the Indian frontier, and under al-Manṣūr, 136—158 (754—775), according to al-Balādhurī, Hishām b. 'Amr al-Taghlibī, governor of Sind "conquered Kashmīr and Multān . . . then he came in boats to al-Kandahār and conquered it", and al-Ya'qūbī confirms this. The territories of Kashmīr which were conquered were no doubt outlying portions of the dominions between the Indus and Djeḥlam, and not the valley. It was no more than a raid without permanent effect on Kashmīr, where the Hindū kings continued to rule undisturbed for some centuries. The most remarkable of these kings was Avantivarman (A. D. 855—883), founder of Avantipur, where the ruins of his temples still exist. He also carried out extensive works to regulate the floods of the Djeḥlam. The alliance with the Shāhīs is again met with in his son's time, and becomes closer as time goes on. Gopāla-varman (902—904) helped Tōramāna or Kamaluka, the Kamalūā of al-Birūnī, to recover his capital from a rebel,

and Kshēma-gupta (950—958) married Diddā, grand-daughter on her mother's side of Bhima, successor of Kamaluka. Diddā exercised great influence in successive reigns, and ultimately became queen herself. She was a member of the ruling family of Lohara in Pūñc, and through her influence this dynasty became rulers of Kashmīr. In 404 (1013) Maḥmūd of Ghazni destroyed the Shāhi kingdom. The last king, Triločan-pāl, assisted by a Kashmīr force, was defeated and put to flight, but Maḥmūd's attempt to penetrate into Kashmīr itself was brought to a stop at the hill-foit of Lohara, the Lawhūr of al-Birūnī which he describes as the strongest place he had ever seen. Even after the destruction of the Shāhi kingdom princes of that family continued to exercise influence in Kashmīr. The Lohara dynasty reign throughout the Ghaznavi period. The half mad king Harsha (1089—1101), according to Kalhana, was under Musalmān influence, employed Turkish soldiers and destroyed Hindū and Buddhist images. The employment of 'Turushka' or Turkish troops is attributed partly to the incapacity of the Kashmīris. It is evident that the country was distracted at this period by frequent plots and rebellions caused by misgovernment, and it is probable that foreign troops were employed quite as much on this account as for the reason alleged. Kalhana's chronicle comes to an end in 1149, and it is evident from the continuation by Dīnārādja that the condition of affairs became worse, and also that a gradual conversion of the people to Islām was in progress. An invasion from the north by Tātars under Dhu 'l-Kadr Khān (Zulzū) took place in 706 (1305), and it is stated that after plundering Kashmīr, this army perished in the snows while returning northwards. This perhaps made the way easier for the next Musalmān adventurer, Shāh-Mīr Swātī (probably an Afghān), who seized the crown and brought in Muḥammadan rule under the title of Shams al-A'zam in 735 (1334). The change seems to have been accepted by the bulk of the nation, and the Hindūs, mainly Brahmans, who retained their religion were treated with toleration, still continuing to hold official posts. In the reign of Sikandar Shāh, 788—813 (1386—1410), a change took place, and this fanatical ruler commenced a violent persecution and reduced the ancient temples to the ruined state in which they still remain. His nickname But-shikan (Iconoclast) commemorates these deeds. Zain al-Ābidin, who reigned 820—872 (1417—1467) reverted to the policy of toleration, and was an excellent ruler in every respect. His reign is looked back upon by Kashmīris of every class as a golden age in which justice prevailed. He constructed roads, canals, and bridges and in every way promoted the prosperity of the country. Under his successors misrule again prevailed. The Shī'ah Ćaks who, according to Lawrence, probably came from Dardistān, obtained great power, and ultimately displaced the later kings of the legitimate line. Ghāzī Khān Ćak was king in all but name, and Husain Shāh, Muḥammad 'Alī, and Yūsuf, as shown by their coins, took the title of Bādshāh in rivalry of the Mughal emperors, and not that of Sultān used by the former kings.

After Bābur's conquest of northern India the emperors turned their eyes on Kashmīr, which offered great attractions to a race accustomed to a cool climate, running streams, and gardens. Bābur

himself sent a small expedition into the country which met with no success. In 947 (1540), the year in which Humāyūn was driven from power by Shēr Shāh's rising, his cousin, Haidar Shāh Dughlāt, a member of the family ruling at Kashghār [see DUGHĪLĀT], a man of great ability and famous as a historian [see HAIDAR MĪRZĀ] persuaded Humāyūn to attempt the conquest of Kashmīr, and thus to obtain a safe refuge from his opponents. Humāyūn, however, found himself unable to carry out the project, but Haidar Mīrzā went on with the expedition, and receiving much local support established himself as ruler in Humāyūn's name. He maintained himself till 958 (1551) when he was killed in an outbreak. This was probably organized by the Sūrī kings as a coin of Islām Shāh struck in Kashmīr in 957 is known. The Ćaks continued to rule until Akbar invaded the valley. In spite of the determined opposition of Ya'kūb Khān, son of Yūsuf Shāh, all resistance was overcome in 995 (1586) when Kashmīr became part of the Mughal empire. It became one of the favourite resorts of the Emperors.

Akbar's first personal visit was in 997 (1589) by the Pīr Pandjāl Pass, the next in 1000-1001 (1572) when he was accompanied by Niẓām al-Dīn, author of the *Ṭabaqāt-i Akbarī*. On his third visit he had a land-settlement carried out by his financier, Todar Mal, and fortified the hill at Srinagar on which now stands the fort of Hari Parbat. A full description of Kashmīr under Akbar is given by Abū 'l-Faḍl in the *Ā'in-i Akbarī*. Dīhāngir as a prince accompanied his father to Kashmīr, and indulged his fondness for the country to the full after he became emperor. He erected numerous summer palaces and laid out gardens, of which the Nishāt Bāgh on the shores of the Dal, Achibal where the springs of one branch of the Dīehlām gush from the rocks, and Vērñāg are the best known. To please his consort, Nūr Dīhān, he is said to have introduced the *chinār* or plane-tree from Persia, her native country, and the fine groves and avenues of this tree are still one of the beauties of Kashmīr.

His successor Shāh Dīhān also laid out many gardens, and under his reign 'Alī Mardān Khān built serais along the Pīr Pandjāl road. His son, Dārā Shīkōh [q. v.], built the Pari-Mahall or Fairy Palace of which the ruins still stand on the mountain side above the Dal. Here as elsewhere the intolerant policy of Awrangzēb brought in trouble. He only visited the valley once, and some mosques erected by him still exist. The outward splendour of the empire was still undiminished, and the condition of Kashmīr is vividly described by Bernier who accompanied the emperor on his visit.

Under the later emperors the administration became very bad. Nādir Shāh's invasion, although he did not touch the valley, brought in anarchy. Its *sūbaqār*'s became practically independent. About 1752 Aḥmad Shāh Durrānī [q. v.] took possession and in 1756 he appointed Buland Khān Sadōzai to be *subadār* of Kashmīr. Coinage however continued in the name of the emperor 'Ālamgir II till 1174 (1760) and Aḥmad Shāh's first Kashmīr coinage is dated 1176. (The coin of 1162 mentioned by Rodgers is shown by Whitehead to belong to the Mughal Emperor Aḥmad Shāh and not to Aḥmad Shāh Durrānī).

The condition of Kashmīr under the Durrānis was thoroughly bad. They were barbarous and uncivilized rulers, and their governors looked on Kashmīr simply as a field for plunder and extortion. The internal wars between claimants to the throne, especially between Maḥmūd Shāh and Shudjā' al-Mulk, are faithfully reflected in the coinage. From the time 1227 (1814) when Fath-khān Bārakzai obtained possession of Kashmīr by the help of Randjit Singh, the Sikh ruler of the Panjāb, the nominal rulers were Maḥmūd Shāh and afterwards Aiyūb Shāh, but the real power was in the hands of the Bārakzai chiefs, especially Muḥammad A'zam Shāh, by whom the coins in the name of Muḥammad (1227—32) were probably struck. In 1223—1225 the anarchy prevailing is shown by the issue of coins in the name of the popular local saint, Nūr al-Dīn, instead of any nominal king. This state of affairs was brought to a close by the invasion of Randjit Singh in 1234 (1819), who annexed Kashmīr to the Sikh kingdom. The Sikh rule also was harsh and oppressive but firmer and better than that of the Durrānis. Hari Singh was a governor noted for his severity, and Miyaṇ Singh was the most just and efficient. Moorcroft, the traveller, visited Kashmīr during this period and gives an unfavourable account of the condition of the people under Sikh rule.

Under Randjit Singh a Dōgra family of Djamunū consisting of three brothers, Dhiyān Singh, Gulāb Singh, and Suṣēt Singh, had risen into notice. They were not Sikhs but orthodox Hindūs. The Dōgras are a Rājput race of the outer hills, but not of the Kashmīr Valley. Dhiyān Singh, became one of the chief officials of the Sikh state, while Gulāb Singh was invested with the Djamunū Rāj, which had been confiscated by Randjit Singh about 1820. In Randjit Singh's name he annexed one hill-state after another, increasing thereby his own power, and his influence in Kashmīr itself. In this way he added Kishtwār and Ladākh to the Sikh dominions. After Randjit Singh's death in 1839 and the dissensions which followed it, Dhiyān Singh's position was for a time a very powerful one, and through his help Gulāb Singh was able to consolidate his power in the mountain country. After the murder of Dhiyān Singh with Mahārājā Shēr Singh, by the Sindānwālī's (1844), Gulāb Singh after a time withdrew to his mountain possessions, but previous to this he had been sent into Kashmīr to put down a mutiny in which Miyaṇ Singh, the governor, had been killed (1842). This he did successfully, but the country had again fallen into anarchy, and the rebellious Bomba tribe defied the Sikh army. In 1845, when the Khālsa army plunged into war with the British government, Gulāb Singh took no part in it, and after the war he acted as representative of the young Mahārājā Dalip Singh in the negotiations which followed. Ultimately, on the advice of Major H. Lawrence (Sir Henry Lawrence), Kashmīr and the adjoining territories between the Indus and the Rāvi were separated from the Panjāb and formed into a separate state of which Gulāb Singh became Mahārājā on payment of a subsidy and recognition of British suzerainty. The treaty in which these terms were embodied was signed in 1846. From this date begins the modern state of Djamunū and Kashmīr.

Gulāb Singh did not obtain peaceful possession

of his new dominions. The governor Imām al-Dīn allied himself with the turbulent Bombās. Gulāb Singh's troops were defeated, and he was able to assert his authority only after a British force had entered Djamunū. The Bombās continued to resist for several years. Ultimately all the rebellious tribes submitted. These movements had not had any hold on the agricultural population whose only desire is to live quietly and escape excessive demands from officials. Gulāb Singh's rule was on the whole firm and just, and the condition of the country gradually improved. He died in 1857 and was succeeded by his third son Ranbir Singh, a good and well meaning ruler, but lacking the strong character of Gulāb Singh. The famine of 1877—79 caused great misery in the country and the earthquake of 1885 enormous losses. Ranbir Singh was succeeded in 1885 by his eldest son, the present Mahārājā Partāb Singh, who is a pious and conservative ruler. In 1893 the famine and earthquake were followed by one of the most disastrous floods in record. In spite of these catastrophes the preservation of peace and an orderly administration has caused an enormous increase in prosperity. One of the principal contributory causes has been the establishment of a regular system of land revenue administration under the settlement made by Mr. Wingate and Mr. W. Lawrence in 1887—92, after the model of the settlements in British India. These have been since improved and developed by Mr. W. S. Talbot, settlement commissioner. The development of communications by the construction of a good road through the Djeḥlam Valley to Bāramulla and more recently the cart road from Bāramulla to the capital has been a great benefit to the country.

Kashmīr is divided for administrative purposes into the districts of South Kashmīr, North Kashmīr and Muzaḥfārābād. The first two comprise the valley with the smaller river valleys and mountain slopes immediately adjoining it. The third consists of the narrow valley of the Djeḥlam below Bāramulla and that of the Kishn-gangā which joins it at Muzaḥfārābād. This tract has from time immemorial been treated as part of Kashmīr. North Kashmīr was formerly known by the name of Kāmraḍj, and South Kashmīr as Marāḍj. The Kashmīrī language extends down the Djeḥlam some distance below Bāramulla, but not to Muzaḥfārābād or the Kishn-gangā valley where the dialect spoken is a form of Lahndā or Western Panjābī.

The population was 1,295,201 in 1911. It consists of about 94 per cent of Musalmāns and 6 per cent of Hindūs, including a small number of Sikhs. The Hindūs are mainly Brahmans, commonly called Paṇḍits, whatever their occupation may be. The aboriginal agricultural population has become Musalmān, there has been little or no admixture of foreign races, and the original castes survive among them, but intermarriage between them is permitted, and family names (*krām*), often nicknames in their origin, have to a considerable extent superseded caste-names.

There is a great deal of artistic talent, and a natural gift for craftsmanship among the Kashmīris. The old established industry of shawl-weaving for which Kashmīr was once famous, has died down to very small dimensions, plain *pashmina* woven from the *pashm* or wool of the Tibetan goat has to some extent taken the place of

the shawls of the same material. Other industries have however sprung up, carpets, embroidered felts and tablecloths are made in considerable quantities, while the products of the wood carving, lacquered and painted wood and papier-maché, silverwork, and copperwork all find a good market in Europe and among tourists.

A considerable class, the Hāndjis or boatmen, live entirely on boats on the rivers and lakes, and form a very distinct element in the population.

Kashmīr has always had an attraction for visitors, and the improvement of communications has increased the number of visitors. It has become one of the principal summer resorts for European residents in India as well as for tourists from all parts of the world, who travel about the country in camps or house boats on the rivers or settle in the upland valley of Gulmāry, 8000 ft. above sea-level. Game large and small in the mountain valleys formerly attracted many sportsmen, but it is no longer abundant, and seekers after trophies now seldom visit Kashmīr.

The language of Kashmīr known as Kashmīri or Kāshur is a Prakritic tongue differing much from the dialects of the Pandjāb, and showing so much affinity in some respects with the Shīnā language of Dardistān that it is classed by Grierson with the Pisācha group of languages.

The principal travels in Kashmīr which may be consulted in addition to the earlier authorities prior to the 17th century which have been mentioned above are those of Francisco Xavier (who accompanied Akbar to Kashmīr), François Bernier (who accompanied Awrangzēb in 1664), George Forster in 1783 (during the reign of Timūr Shāh, Durāni), William Moorcroft and George Trebeck (through Ladākḥ and thence into Kashmīr in Randjīt Singh's time 1819—25), Victor Jacquemont (1831), Von Hugel (1835), and Vigne (1835). For more modern time the best general descriptions are those of Drew and Lawrence and for ancient history the works of Stein.

(2). A name frequently given to Srinagar, the capital of the country of Kashmīr. It was the name applied to the mint-town under the Muḥammadan Sultāns, the Mughal emperors, the Durāni Shāh's, and even as late as 1835 von Hugel speaks of the City of Kashmīr. The ancient name of Srinagar which, according to Kalhana, was given by Aśoka, has been revived by the Hindū rulers in modern times and is now in general use.

(3). The extensive dominions of the Mahārājās of Djamū and Kashmīr are now frequently included under the name Kashmīr in atlases and official publications such as the *Census of India*. These include vast tracts not only in the outer hills, southwest of the Pir Pandjāl Mts., including Djamū and Rājāwari, but in the inner Himalayas comprising the conquests made in the name of Randjīt Singh and those made by the Mahārājās of Kashmīr in more recent times. This region extends 32° to 37° 30' N. Lat. and from 73° to 80° E. Long and has an area of 84,432 sq. miles and a population of 3,158,126 in 1911. Of this population however 2,895,061 is comprised within the narrow limits of Kashmīr and Djamū, while the outer enormous area, the greater part of which consists of mountains, contains only 265,060. The countries of Ladākḥ, Skardū (Baltistān [q. v.], Čilās, Gilgit

[q. v.], Hunza-Nagar [q. v.], and Yāsīn are comprised in this region and will be found described under their own names, the connection with Kashmīr being purely modern.

(M. LONGWORTH DAMES)

KAṢĪDA, not infrequently also *Ḳaṣīd*, is the name given to a form of Arabic (also Persian, Turkish etc.) poem of some length. The name is derived from the Arabic root *kaṣada* with the meaning "to aim", because in the earlier times it contained the praise of the poet's tribe and attacks upon its adversaries, later the praise of a person or family by a poet who expects and openly asks for presents for his eulogies. From the earliest times the elegy (*marthiya*) does not appear to be included under the same designation, but poems of insult (*hidya*) are frequently by older poets called a *kaṣīda*, though the latter probably had frequently not the characteristics which come into the scheme of a proper *kaṣīda*. We can form the best opinion by taking as the basis for investigation the poems of the authors who lived in the first century of the Hījra, instead of beginning with the poems preserved from the time of Paganism, though the latter formed the model of the former. A perfect *kaṣīda* should contain three essential parts. First the *nasīb* or erotic introduction in which the poet describes his visit to the erstwhile abode of his lady and his yearnings at finding the place forsaken. Secondly follows a description of his ride to the persons whom he intends to praise. This gives him ample scope for describing the terrors of the desert and the comparison of his camel with various animals of the deserts. At last comes the chief portion of the poem containing praise, or abuse of the person or tribe aimed at. Some poets, when so inclined, finish up with some moral reflection.

An Arabic (or Persian etc.) *kaṣīda* is a very artificial composition; the same rhyme has to run through the whole of the verses, however long the poem may be. In addition the composition is bound by a metre which the poet has to to guard most scrupulously through the whole course of the poem. The result is that we cannot expect very much beautiful poetry; the description of the desert and its animals and terrors may have a certain charm at first, but when the same descriptions recur in endless poems expressed in the same manner, only with different words, the monotony becomes nauseous. The difficulty was keenly realised by the poets themselves and accounts for the fragmentary character of most poems, which required much time in their composition. The poet Dhū l-Rumma stated that for a long time he could get no further than the first verse of his now celebrated poem (No. 1 of his *Dirwān*) and that it was only when he visited Isfahān that the remaining verses (128 in the edition) came to him with ease (*Asās al-Bulāgha*, s. v. *s-t-f*). The poet Djarir, though stirred to his soul by the attacks of Djandal, the son of al-Rāʿī, composed at first only about 80 lines of his reply, though rhyme and metre are the easiest possible in the Arabic language, and completed the remainder at a later time (*Naḳāʾid*, ed. Bevan, p. 430). We can likewise be sure that al-Ṭirimmāḥ composed only a portion of his renowned poem against the tribe Tamim and al-Farazdaq and that the additional

verses sometimes included in the poem are by the poet himself and not interpolations by others. When a poet had composed a *kaṣīda* he would recite it whenever an occasion offered and it is quite natural that he should add or cancel verses himself, especially if a reply to his poem opened fresh avenues of attack. Many poets certainly never rose to composition of a poem containing all the essential portions of a *kaṣīda*, and it is foolishness to assume in each case that part of a poem has been lost if only a certain part is recorded. Such a poem was sent into the world before the poet had time to complete it and it is equally certain that lampoons in particular did not lend themselves easily to the complete scheme. Very early poets also composed poems which, though called *kaṣīda*, did not contain the essential portion, the praise or insult. As such we must take e. g. the poems of ʿUmar b. Abī Rabiʿa and some poems of al-Ṭirimmāḥ. Some of the latter's compositions were made to display the art of description and were never intended to be *kaṣāʾid* in the proper sense of the word. The Arabic *kaṣīda* was naturally imitated by poets who wrote in other languages and the Persian poets Anwarī and Khakānī are celebrated as masters of this style. The form of the *kaṣīda* has survived to modern times and I have specimens by poets still living where we find the absurdity of a description of a desert-ride by persons who live in Cairo and travel by railway and steamer.

The *kaṣīda* by its references to persons and events is also a source of historical information. This, however, must be handled with the utmost care, as false statements, by design or through ignorance, are frequent and the mention of a battle-day does not necessarily imply that the poet was present. As an example I mention only that the Asadī poets ʿAbid and Bishr b. Abī Khāzim, probably a century distant from one another, both boast that their tribe was victorious at al-Nisār and al-Djifār.

(F. KRENKOW)

ḲĀSIM, the name given by the Ottoman Turks to St. Demetrius whose festival falls on Oct. 26 of the Julian calendar. It was formerly the beginning of the winter semester, during which the fleet took up its winter-quarters at the Golden Horn.

(CL. HUARI)

AL-ḲĀSIM b. ʿĪSĀ AL-ʿIDJLĪ, usually called Abū Dulaf, a Muslim general. When in 195 (811) the Caliph al-Amīn sent an army under ʿAlī b. ʿĪsā b. Māhān against al-Maʾmūn's general Ṭāhir b. al-Husain, Abū Dulaf went with him. When Ibn Māhān had fallen, Abū Dulaf came back to the neighbourhood of Hamadhān and, although he declined to pay homage to al-Maʾmūn, Ṭāhir left him in peace in al-Karadj. In 214 (829/830), when al-Maʾmūn came to Raiy, he sent for him. His friends advised him not to go, but he went and the Caliph received him with the greatest goodwill. In al-Muʿtaṣim's reign, Abū Dulaf was arrested by al-Afshīn [q. v.] who was jealous of his bravery and eloquence. Al-Afshīn accused him of murder

and treason and on the evidence of false witnesses he was condemned to death but reprieved at the last minute by the intervention of the chief *ḳāḍī* Aḥmad b. Abi Dū'ād [q. v.]. As soon as the latter heard of the danger threatening Abū Dulaf he hurried to al-Aḥṣīn and said the Caliph had ordered him to spare Abū Dulaf. When the latter had been released, Aḥmad went to the Caliph and told him that he made up the story to save the life of the innocent accused, whereupon al-Muṭaṣim forgave him and pardoned Abū Dulaf. The latter died in 225 (839/840) or 226 (840/841) in Baghdād. He left several works. He was also famed as an exceedingly ardent devotee of the Caliph 'Alī. On his descendants see the article DULAFIDS.

AL-ḲAṢĪM, a district in Central Arabia, on the high plateau of the Arabian desert. It owes its fertility to the Wādī Rumma², which runs to the north-east and whose course is barred by a series of parallel sand-dunes and hills from 1600—2000 feet high, which run from north-west to south-east. The water, richly provided by the spring and summer rains, sinks into the valleys and even in dry periods is preserved for years at a little depth under the red or yellow sandy soil and this supplies the essential requisite for a rich vegetation. The plateau is therefore covered in spring and summer with a rich crop of grass and affords excellent pasture for the great herds of camels and cattle and the numerous smaller animals. The sand-hills are covered with tamarisks (*athl*, *tamari nilotica* Ehrbg.) and varieties of acacia indigenous to Arabia (*ḳaraṣ*, *acacia Arabica* W., *ḳaṣād*, *acacia Senegal* W.). Millet, maize, wheat, vetches, etc. grow in the fields. Fruit-trees of all kinds yield plentiful crops. So early a writer as Yāḳūt makes special mention of the figs, peaches, grapes and pomegranates. The most important and most cultivated fruit-tree is, as elsewhere, the date-palm, which is represented in al-Ḳaṣīm by a particularly fine variety.

Among plants of economic importance may be mentioned the cotton-tree, which supplies local requirements. In the western part of al-Ḳaṣīm rock-salt is found. This mineral, so important for the cattle-breeders, is sold in the towns, especially in Boreida and 'Aneiza.

Al-Ḳaṣīm plays an important part in the caravan traffic of Arabia on account of its wealth in camels and its enterprising population. Of the population, estimated by Palgrave at 25—30,000 souls, at least a third devote themselves to caravan traffic either hiring out animals or acting as attendants or as small merchants. The caravan business takes them through the Wādī Dawāsir and Wādī Nadīrān to the Yemen, from which the best coffee is exported, to Ḳuwait, al-Baṣra, Baghdād and Djebel Shammar, to Mekka and Syria via Khaibar. It is in the nature of things that many natives of al-Ḳaṣīm settle in the frontier districts or in one of the towns just mentioned and many have attained prosperity and wealth. Al-Ḳaṣīm also plays an important part in the trade in race-horses. Al-Djarad,

also called Djarad al-Ḳaṣīm, in olden times the chief town of al-Ḳaṣīm, a day's march from 'Aneiza on the road to al-Baṣra, has been identified by A. Sprenger with the *Tpazz* of Ptolemy. The ancient settlements of this area which al-Hamdānī includes in al-Yamāma are all in ruins; the modern larger towns date from the late middle ages.

The district which lies in the centre of Arabia has had a lively history. One of the battle-“days” of the Arabs is called after it. Zuhair, Akḥṭal, 'Aws b. Hadjar and other poets know and mention al-Ḳaṣīm. The young faith of Islām found al-Ḳaṣīm at first on the side of the anti-prophet Musailima, but in the decisive encounter between the Muslims and the followers of the Prophet of al-Yamāma we find al-Ḳaṣīm on the side of Khālid, the “Sword of Allāh”; in the struggle for the Caliphate, Nadīd and al-Ḳaṣīm were on the side of 'Alī but the victory of the Umayyads brought the whole of Central Arabia under their sway and there was no change with the 'Abbāsids. It was not until the revolutionary movement led by the Ḳarmāṭians that Nadīd was lost to the 'Abbāsids. In the eleventh century, Dārim, a native of al-Rass in al-Ḳaṣīm, was able to conquer a large part of Nadīd and Yemen and unite it with al-Ḳaṣīm. His kingdom was inherited by his sons and successors but the increasing power of the chiefs of al-Yamāma and 'Arid conquered Dārim's kingdom bit by bit, till finally it was again reduced to al-Ḳaṣīm. Al-Ḳaṣīm was from the first somewhat hostile to the Wāḥḥābī movement; but 'Abd al-'Aziz b. Sa'ūd of al-Darīya succeeded in gaining possession of Boreida, al-Rass and Tannūne. The other villages then rose and in 1772 slew all the Wāḥḥābīs they could capture. In 1780 a new rising broke out against Ibn Sa'ūd, which he was only able to put down after much fighting with varied fortunes. Ibn Sa'ūd's kingdom soon found itself faced with an extremely dangerous opponent: Mehmed 'Alī of Egypt had been commissioned by the Sublime Porte to take measures against the Wāḥḥābīs and sent his son Ṭūsūn to Arabia, where in a rapid succession of victories he conquered the whole of the west coast (1811—1813).

After the death of Ibn Sa'ūd (1814) the Egyptians extended their intrigues against Ibn Sa'ūd's kingdom to the interior of Arabia, and in 1815 Ṭūsūn marched into Central Arabia and captured the fortress of al-Rass in al-Ḳaṣīm after gaining over the greater part of the country by bribery. The peace concluded between Ṭūsūn and 'Abd Allāh b. Sa'ūd was, however, not confirmed by Mehmed 'Alī, who ordered Ibrāhīm to conquer Arabia; in 1817 he took al-Rass, Boreida and 'Aneiza and thus became master of al-Ḳaṣīm. 'Abd Allāh b. Sa'ūd had to retire to Darīya, was taken prisoner and in 1818 beheaded in Constantinople. Al-Ḳaṣīm was now under Egyptian suzerainty and formed a strong base for Mehmed 'Alī. But by 1822 the Arabs of Central Arabia had begun their war of liberation from the Egyptian occupation which ended in 1841 in the Egyptian-Turkish troops being driven out. Al-Ḳaṣīm was now for a time under the protection of the Grand Sharif of Mekka; in 1855 Zāmal Āl Salīm, who resided at 'Aneiza, was recognised by Ibn Sa'ūd as independent ruler of al-Ḳaṣīm, but in 1861 the district was again paying tribute to Ibn Sa'ūd. After six years al-Ḳaṣīm was again able to attain its independence and in 1879 Ibn Sa'ūd surrendered his claim to suzerainty over al-Ḳaṣīm in favour of Ibn Rashīd,

lord of Hā'il. A rising against Muḥammad b. Rashid in 1891 ended in disaster and Zāmal Āl Salīm lost his life in battle. The Turks then took advantage of the fierce feud between Ibn Sa'ūd and Ibn Rashid to gain a firm footing in al-Kāsim again, all the more easily as the people of al-Kāsim were weary of the long struggle and anxious for peace, and even Ibn Rashid would rather have the Turks in al-Kāsim than the governors of his enemy Ibn Sa'ūd. Aḥmad Faizī Pasha therefore invaded Central Arabia in 1905 and occupied al-Kāsim also. Soon the position of the Turks became untenable, especially as Ibn Rashid now sided against them; the Turkish troops had to evacuate al-Kāsim and Aḥmad Faizī Pasha's successor, Sāmī Pasha, was no more able to restore Turkish authority. In 1906 al-Kāsim belonged to Ibn Sa'ūd; in 1911/12 there were again attacks on Ibn Sa'ūd, especially by the Grand Sharif of Mekka, but since 1913 al-Kāsim has formed a province in the wide kingdom of Ibn Sa'ūd.

KĀSİM AGHA, called **QODJA** (the old), an Ottoman court architect. He was appointed court architect in 1032 (began Nov. 5, 1622) in succession to the distinguished architect Meḥmed Agha, who built the Aḥmad mosque in Stambul (on him cf. the *Risāla-i mi'māriye* [in MS.] of Dja'far Agha), relieved of his duties in 1053 (began March 22, 1642; cf. J. von Hammer, *G. O. R.*, v. 335) and his office given to Muṣṭafā Agha, known as *Meramettđji*, lit. "mender". But after a few months only he was restored to the office as the result of a low estimate (cf. Na'imā, *Tārīkh*, ii. 46; J. von Hammer, *op. cit.*, v. 338 sq.). His manly intervention on behalf of Koprulu Meḥmed Pasha, afterwards Grand Vizier, cost him his office and dignities very soon after the Sultāna-mother Mah-Ṭeiker (Kösem Wālide, q. v.) had appointed him to manage her affairs (*k'aya*) in October, 1651, on account of his honesty. He was imprisoned in the Seven Towers and soon afterwards banished to Cyprus (Na'imā, *op. cit.*, ii. 333 sq.). He was later released and after being unsuccessful several times finally succeeded in the summer of 1655 (Na'imā, *op. cit.*, ii. 551) in getting for Meḥmed Pasha the Grand Vizierate. He died, apparently at a great age, in 1070 (began Nov. 18, 1660). None of his buildings seem to have been of great importance. His work did not apparently extend to public buildings. It is only known that he was engaged in 1651 in building the Yeñi Wālide *Djāmi'* but hardly as the chief

architect. The part which he played as a politician in Ottoman history is more important and the historian of the empire, Na'imā, in particular, deals very fully with it.

Babinger, *Quellen zur Osmanischen Kunstgeschichte in der Jahrbuch der Asiatischen Kunst*, Leipzig 1924, p. 37. (F. BABINGER)

KĀSİM-I ANWĀR, MU'IN AL-DIN 'ALĪ, called **KĀSİM-I ANWĀR**, a Persian mystic and man of letters, born in 757 (1356) in Sarāb near Tabriz. For Sarāb (in Yāqūt Sarāw) Dawlatshāh, *Tadhkira*, p. 346, gives Surkhāh; this name is not found in Yāqūt, but Dawlatshāh has three times the phrase *Surkhāh-i Tabriz*; the name is once found in a play on words (in a *rubā'i* of Kamāl-i Khudjandī in Dawlatshāh, *op. cit.*, p. 326). According to the Persian lexicographers, Surkhāh is a hill near Tabriz (Vullers, *Lexicon Pers.-Lat.*, s. v., No. 7). Kāsim's family came from Adharbaidjān. His religious teachers were Šadr al-Dīn Ardabili (an ancestor of the Šafawids) and Šadr al-Dīn 'Alī-i Yamāni, who was a pupil of Awḥad al-Dīn-i Kirmāni. As *Djāmi' (Nafahāt al-Uns*, p. 690) tells us, mention was made of Yamāni but not of Ardabili in a work on Kāsim's *ḥudat*, which came from the circle of his intimates. This circumstance might suggest that Kāsim did not think so highly of Ardabili's instruction. The facts given in Browne, *Hist. of Pers. Lit. under Tartar Dominion*, p. 473, contradict this, however. Among Kāsim's own *murīd's* there must have been several free-thinkers, as *Djāmi'*, *op. cit.*, p. 690, mentions that the teacher himself was, however, free from this imputation. The truth is that he — although it cannot absolutely be proved that he was a *Hurūfī* — strongly sympathised with this sect (Browne, *op. cit.*, p. 479). He travelled a great deal; he first of all lived in Gilān: Gilāni expressions are several times found in his poetry. From Gilān he migrated to Khurāsān where he lived first in Nishābūr and later in Herāt. He was expelled from the latter town when the king, Shāh-Rukh, was murdered by a *Hurūfī* in 830 (1426/27). It was assumed that Kāsim was connected with the murderer, had harboured him and knew of the attempt beforehand. A singular story is given by Dawlatshāh, *op. cit.*, p. 346 sq., according to which he had already been expelled from Herāt once previously: some individuals had complained to the king that the *murshid* was gathering many young pupils around him, which aroused misgivings among them on moral grounds. Shāh-Rukh, according to the story, then intervened and banished Kāsim. The latter then travelled to Balkh and Samarkand but returned later to Herāt. This story is not very probable but it is evidence at any rate of the great popularity of the teacher in Herāt. Whether the libellous reason given for his expulsion is true cannot be proved either, but it must be confessed that at that time also there were great rascals among the *Sūfis*. It seems to be certain that Kāsim found a protector after the banishment in 830 in Ulugh Beg in Samarkand. As we also find Samarkand mentioned in the story in Dawlatshāh, it may be suggested that the story in Dawlatshāh is an invention duplicating the story of his actual banishment.

Kāsim later returned to Khurāsān again and settled in Khardjird in the district of Djam. There through the support of well-to-do friends he was able to lead a life of freedom from care down to his death in 837 (1433/34). Dawlatshāh, *op. cit.*, p. 348, makes him die in 835, differing from the other authorities. In addition to what Rieu says (*Catalogue*, p. 636) on the date of Kāsim's death see also Rosen, *Les Manuscrits persans de l'Institut*, p. 121, where a chronogram on his death is quoted from a St. Petersburg MS.

Kāsim was buried in Khardjird; Dawlatshāh says that in his time 'Alī Shīr began to embellish the site of the tomb with buildings. The same authority tells us that Kāsim in his youth practised asceticism to such an extent that he injured his health. But in later years he altered his views — for example he said to someone who could not help expressing surprise at his prosperous appearance that he was no longer *āshik* but *ma'shūk*; he had once been a beggar but now he was a king.

Works: The author, who, according to Dawlatshāh, *op. cit.*, p. 303, was a great admirer of the poetry of Hāfiz, left a *Divān* behind him containing ghazal's, kitā'a's, rubā'i's, elegies on mystics and mathnawis. Some pieces are composed in Gilāni and Turkish. His other works, *Anīs al-'Arifin* and *Anīs al-'Ashikīn* (also called *Kisūlat al-Amāna*) are treatises on mysticism in prose and verse. Finally we may mention his extracts from Sa'ādi's *Bustān* entitled *Khulāṣa-i Bustān*.

These writings are unpublished; judging from the not very extensive specimens in Browne and the few pieces in Dawlatshāh (Bland's *Century* where ten of Kāsim's ghazal's are published I have not seen) we can agree with Browne when he says "the poetry of Qāsimu 'l-Anwār, so far as a foreigner may venture to judge it, is only of average merit". One cannot deny his ability to write pleasing Persian verse but we look in vain for anything out of the way which would give him a claim to a place among the great names of Persian literature. A just verdict on his literary activity, however, will only be possible when his works have been published.

Phil.*, ii. 295, 299, 301; Browne, *History of Persian Literature under Tartar Dominion*, p. 352, 366, 438, 473—486; Rieu, *Catalogue*, p. 635—637; Sprenger, *Catalogue of the manuscripts of the libraries of the King of Oudh.*, p. 532 sq.; *Catalogue Bankipore*, ii. 14 sq. (V. F. BUCHNER)

KĀSIM PASHA, usually called Güzel-dje Kāsim Pasha, an Ottoman statesman. The son of Christian parents (*Is* [i.e. Ayās Pasha and Kāsim Pasha] *sont tous venus de chrétiens*, in C. D. Schepper, *Tagebuch, in Missions diplomatiques de Corn. Dpl. de Schepper, dit Scepperus, de 1523 à 1555*, par le Brn. de St-Génois et G. A. Yssel de Schepper, in vol. xxx. of the *Mémoires de l'Académie de Belgique*, Brussels 1861, p. 169 infra), he was born in the reign of Bāyazid II and brought up in the Imperial Serāi (Ewliyā, i. 169). He attained the rank of a *rikāb aghasi* ("stirrup-gha"), accompanied Selim I on his campaign to Egypt, was appointed governor of Hamā on its capture in August, 1516 (sandjakbeyi) (cf. L. Forrer, *Die osm. Chronik des Rustem Pascha*, Leipzig 1923,

p. 55; not in Hahl Edhem, *Tagebuch der ägypt. Expedition des Sultans Selim I., aus Feriduns Sammlung der Staatsschriften*, Weimar 1916, p. 15), and soon afterwards governor of Adana. A few years afterwards, he became Beylerbeyi of Anatolia and Rumelia, probably as early as the first year of Sultān Suleiman Appointed second vizier in 927 (began December 12, 1520) Kāsim Pasha held a command in the expedition against Rhodes (*Chronik des Rustem Pascha*, p. 62 at the top). When on Radjab 12, 929 (May 27, 1523) the Egyptian governor Muṣṭafā Pasha was dismissed, Kāsim succeeded him but lost the office with 34 days (on Sha'bān 16, 929 = June 30, 1523) (cf. J. von Hammer, *G. O. R.*, iii. 35). A few months later, when in Rabi' II (February, 1525) the traitor (khā'in) Ahmed Pasha, his successor, was slain in a rising, he went to Cairo as governor for a second time but was again dismissed by March, 1525. Down to 935 (beginning September 15, 1528), when he once more became second vizier, he seems to have held a governorship ("Budin", i.e. Ofen [?], according to some sources, but which could only have been a temporary appointment). In May, 1533, the Fleming C. D. Schepper, envoy of the Hungarian royal widow Maria, saw him in Stambul as vizier along with the Grand Vizier Ibrāhīm Pasha [q.v.] and Ayās Pasha (d. July 13, 1539): *Cassim Bassa a la face plus grande et rouge et n'est si grand que le dict Ayas* (*op. cit.*, p. 169). In 1537 he was governing the Morea and sandjakbeyi at Modon; in the summer of this year he attacked unsuccessfully the two last bulwarks of Venetian rule in the Morea, Napoli di Romania and Malvasia (cf. Zinkeisen, *G. O. R.*, ii. 771, 783). He may have then fallen into disgrace and lived in exile. The date of his death is uncertain. In 959 (began December 29, 1551), however, he seems to have lived in the Morea in non-activity; cf. 'Atā'i, *Dhail* on the *Shakā'ik al-Nu'māniya*, p. 23. In 944 (began June 10, 1537) he had a madrasa built for the poet Surūrī [q.v.] in the garden of the *türbe* of Mehmed Yazidji Oghlu [q.v.] which is now burnt down (cf. 'Atā'i, *op. cit.*, p. 27); he cannot have, therefore, died in 939 (1532). It is certain, however, that he was buried in Gallipoli.

Kāsim Pasha earned lasting fame from a series of pious foundations and by building a mosque, a madrasa and a bath in Stambul. To this day one of the most important quarters in Constantinople, the Byzantine "Suburb of the Spring" (*krenides* or *pegai*) is called after him *Kāsim Pasha mehallesi* (cf. J. v. Hammer, *Constantinopolis und der Bosporus*, Pest 1822, p. 55 sqq.; Ewliyā, *Siyāhet-nūme*, i. 169, 416 sqq.; *The Travels of Evliyā*, transl. by J. v. Hammer, London 1834, i.; Hāfiz Husain, *Hadīkat al-Djāwāmī*, ii. 2 sqq.; J. v. Hammer, *Geschichte des osmanischen Reiches*, ix. 106 sqq.). His daughter Nefise Khatun also endowed a school and is buried in it; cf. *Hadīkat al-Djāwāmī*, ii. 4, 3).

Postel, *La tierce Partie des orientales Histoires*, Poitiers 1560, p. 61 sq. (*Cassun Bassa du temps qu'il estoit Bassa, avoit 20 mille ducats, il en peut avoir autant, de Sangeacly de Morea. Maintenant en son lieu est Moustapha Bassa*).

(FRANZ BABINGER)

KASIMOV, in Russian originally GORODEZ or GORODOK MESHČERSKIY, in Tatar KHĀN KARMĀN, formerly the capital of the Tatar princes subordinate to the Czar of Moscow and now a district capital in the gouvernement of Ryazan. It took its name from Kāsim, son of the founder of the kingdom of Qazān, Ūlū Muḥammad. In the war between the brothers that followed the assassination of Ūlū Muḥammad (1446), Kāsim was induced to enter the service of the Russian Grand Duke. The town, which bears his name, was granted him about 1452 (not later than 1456); there he built a mosque (of which only the minaret still exists) and a palace of stone (no longer standing; it was seen as late as 1768 by Pallas). After his death about 1469, his son Dāniyār reigned till about 1486. Kasimov was next under the rule of prince Nūr Dawlat of the Girāy dynasty and his sons Satilghan and Djanay. About 1512 Shaikh Awliyār (grandson of Khān Kučuk Muḥammad), descended from another branch of the descendants of Djuči, is mentioned as prince of Kasimov. In 1516 his minor son Shāh 'Alī (he is so called in his epitaph, but is usually known as Shaikh 'Alī, Russian Shigaley Shigaliyarič) was reigning (nominally). After a life of vicissitudes (he was repeatedly appointed Khān of Qazān by the Czar and then deprived of all his dignities and condemned to the severest imprisonment, then pardoned and again restored to his principality), Shāh 'Alī died childless, aged sixty-one, on Monday, Shawwāl 10, 974 (April 21, 1567). The *takya* built by him in Ramaḍān, 962 (July–August, 1555), in which are his tomb and the tombs of several of his relatives, has been several times described, first by Pallas in the year 1768, most recently by Welyaminov Zernov in 1863. During his rule in Qazān, his brother Djan 'Alī represented him in Kasimov and later ruled for a short time (1532–35) in Qazān also until he was murdered during a rising there.

The "Czar" Shāh 'Alī was succeeded in Kasimov by his distant relative Sāyin Bulāt, great-grandson of the Khān of the Golden Horde Aḥmad. In 1573 he adopted Christianity, received the name of Simeon, moved to Moscow and was there given by Ivan the Terrible the title of "Czar of all the Russians". He died in 1616 as the monk Stephen. It was not till 1585 that a successor to him was appointed in Kasimov, Muṣṭafā 'Alī, whose father, 'Abd Allāh b. Aḳ-Kubak, also a great-grandson of Khān Aḥmad, died in 1570 and was buried in Kasimov. About 1600 we find mentioned as prince of Kasimov Uraz Muḥammad of the family of Khāns of the Kirgiz Kazak, who afterwards took part in the fighting during the civil war in Russia and was killed in 1610. The last rulers of Kasimov were Arslān (grandson of the last Siberian Khān Kučum) and his son Saiyid Burhān, descended from the house of Siberian rulers; the latter, first mentioned as ruler in 1627, was baptised between 1653 and 1655 (he received the name Wasiliy) and yet remained prince of Kasimov till his death soon after 1678. To this period belongs the forcible conversion of a part of the Tatars by Misayil, Archbishop of Ryazan (1651–56); in one of these attempts at conversion the Archbishop was killed by the enraged populace. The verse from the Qur'ān (iii. 52), constantly quoted in epitaphs in Kasimov, seems to have been placed there in antagonism to the zeal of the Christian missionaries.

Even under Wasiliy the administration of Kasimov was in the hands of a Russian woyewoda; the Tatar prince exercised only nominal rule. The mother of Wasiliy, Fātuma Sultān, was recognised as ruler in the years following Wasiliy's death on these terms; she is last mentioned in 1681. After this there was no "Czar" or "Czarevitch" (sometimes one, sometimes the other title is used) of Kasimov any longer. In the modern district capital of Kasimov the Tatars only form a comparatively small part of the population, according to the census of 1897, 13,545 souls (according to Reclus, as many as 14,100 in 1870), including 1,539 Tatars, in 1909, 17,075, including 2,000 Tatars. The Bulghar industries (tanning and shoe-making; cf. above, i. 789a), introduced to the Russians through Tatar intermediary, are especially followed in Kasimov.

Bibliography: The most thorough and still indispensable, although several new documents have since been made available, is Wilyaminov Zernov's great work "*Istoriya Kasimovskikh Zarey si zarevitchey*" (4 vols., *Trudi Vost. Otd. Imp. R. Arch. Obšč.*, ix.—xii.), on which is based almost all that has been written about the princes of Kasimov elsewhere, especially H. Worth, *History of the Mongols*, ii. 429 sqq. Cf. more recently N. Lilejew, *Simeon Bekbulatowicz*, Trier 1891, review by D. K(obeko) in the *Zap. Vost. Otd.*, viii. 335 sq.; N. Shishkin, *Istoriya giroda Kasimowa*, 1889; review by V. R(osen), *ibid.*, v. 122 sq. (W. BARTHOLD)

KĀSIYŪN, a bare and rocky massif — the summit is over 4,000 feet high — commanding in the north-east the Ghūṭa [q.v.] and dominating Ṣālihiya, the suburb of Damascus. It lies between the valley of the Baradā [q.v.] and that of the Halbūn. The Nahr Yazid which flows out of the Baradā runs along the foot of Kāsiyūn. "There they venerate the birthplace of Abraham on the slope adjoining the village of Barza. This mountain has been famous since remote antiquity as a place of ascension and retreat of prophets" (Ibn Djuḅair). Adam is said to have stayed there, Cain killed Abel there, whose body was buried on this "sacred and most venerated mountain" (Yāḳūt), which is covered with sanctuaries. The encyclopaedists and the historians of Damascus associate with it several thousands of martyrs and prophets buried between the Bāb al-Farādis and the slopes of Kāsiyūn.

Bibliography: Yāḳūt, *Muḍjam*, ed. Wüstenfeld, i. 557, ii. 588, iii. 363, iv. 13–15; Ibn 'Asākir, *Tarikh*, ed. 'Abd al-Qādir Badrān, i., Damascus 1329, p. 231–237; Ibn Djuḅair, ed. Wright-de Goeje, p. 273, 274.

(H. LAMMENS)

KASKAR, the name of a town in the 'Irāk. When al-Ḥaǧǧǧādī [q.v.], the governor of the 'Irāk appointed by the Caliph 'Abd al-Malik, had put down the rebellion there, he began in 83–86 (702–705) to build a new town which was called Wāsiṭ ("centre") because it was midway between the two older Arab capitals of this province, Kūfa in the north and Baṣra in the south. For the site of the town he chose the vicinity of the town of Kaskar on the Tigris, which had played a not unimportant part in the Sāsānian period. The new Muslim town was built on the east bank of the Tigris, while Kaskar lay opposite it on the west side; a bridge of boats linked the two halves of the city. Neither Wāsiṭ nor Kaskar

exist at the present day and until quite recently their exact situation was uncertain. In looking for the site we must not think of the modern course of the Tigris in Central and Southern Babylonia; in the days of the Caliphs this river ran much farther to the west; its course in those days probably corresponded for a good part to that of the *Shatt al-Haiy* (cf. i. 677a, 970a). Kaskar-Wāsiṭ certainly lay somewhere in the neighbourhood of the modern Kūt al-Haiy (cf. i. 677a, 970a). According to the results of an archaeological journey by Count Aymar de Liedekerke-Beaufort (see *Babylonia*, vii., Paris 1922, p. 115) the now insignificant ruins of Wāsiṭ lie almost 25 miles west of Haiy on the dry Tigris bed of *Shatt al-Khōder*. On the other hand the map of Mesopotamia (Sheet Baghdād, 5 d) published by the General Staff in Berlin in 1917, puts Wāsiṭ about 15 miles N.E., as the crow flies, of Kūt al-Haiy. On the modern ruins of Wāsiṭ see also the notes by Massignon based on information given by a native of the district in his *al-Hallaj, Martyr mystique de l'Islam*, Paris 1922, p. 23. For further information on Wāsiṭ, see the article.

As to Kaskar, it probably dates back into the Assyrian period. It may be recalled that we seem to have a Babylonian town Ka-as-ka-ri mentioned in a fragment of an inscription probably of the time of Assur-banipal, in the British Museum ([18] 82:3—23:128; see Bezold, *Catalogue*, p. 1824); cf. Streck, *Assurbanipal*, Leipzig 1916, p. lxxxviii. and 790. The place is perhaps also mentioned in the Babylonian Talmud (*Yōmā*, fol. 10a, where *Bashkar* has probably to be corrected into Kaskar); see Marquart, *Erānshahr, Abh. G.W. Gott.*, New Series, iii., No 2, Berlin 1901, p. 164. In any case Kaskar called Kaskhar in Syriac and Christian Arabic sources, is one of the oldest Christian towns in Babylonia. It frequently appears in the ecclesiastical history of this region. The episcopal diocese of this name was considered second in importance within the Nestorian church. Its occupant was the right arm of the patriarch of Seleucia — Ktesiphon (see MADĀ'IN) and his representative when the office was vacant.

Among the signatories to the acts of the Syriac councils we find bishops of Kaskhar from the period 410—790 (Guidi in *Z.D.M.G.*, xliii. 411 and Chabot in the *N. F.*, xxxvii, Paris 1902, p. 675). According to the Syriac "chronicle of Arbela" there was a bishop in Kaskhar as early as the first half of the third century A.D. The Christian Arabic "Chronicle of Seert" also mentions an occupant of the episcopal see there of the period before 410 A.D. On the bishopric of Kaskhar and a list of its occupants see J. Labourt, *Le Christianisme dans l'empire Persé sous la Dynastie Sassanide*, Paris 1904, passim (s. the Index s. v.); Sachau, *Die Chronik von Arbela* (= *Abh. Pr. Ak. Wiss.*, 1915, No. 6), p. 21; Sachau, *Zur Ausbreitung der Christentums in Asien* (= *Abh. Pr. Ak. Wiss.*, 1919, No. 1), p. 30—31.

The town of Kaskhar, like the bishopric which bore its name, was the home of many founders of monasteries, as may be seen from the work compiled in the eighth century by Jeshūdēnah, entitled *K'ṣābā de Nakhḥūfā* (ed. Chabot in *Mélanges d'archéol. et d'histoire de l'Ecole Française de Rome*), xvi., Paris 1896), p. 225 sq.; the Great Abraham (d. 588) was especially famous, s. Jeshūdēnah No. 14; Labourt, *op. cit.*, p. 315;

A. Baumstark, *Gesch. der syrisch. Literatur*, Bonn 1922, p. 130. One of the most influential personalities at the court of the Sāsānian King Khusrāw II Parwēz (590—628) was Ābā of Kaskhar; on him see Baumstark, *op. cit.*, p. 123. On other Syriac writers who belonged to Kaskhar ('Abhdi-shōf, Grighō, Eliyā) see Baumstark, *op. cit.*, p. 30, 128, 420. For the Syriac sources on Kaskhar see also the indices in Wright, *Catalogue of the Syriac Manuscripts in the British Museum* (London 1870) and Wright, *Catal. of the Syriac manuscr. in Cambridge* (Cambridge 1901), p. 1284, also in Sachau, *Katalog der syrisch. Handschr. in Berlin* (Berlin 1899), p. 923.

In the Arsakid period there seems to have been a little kingdom of Kaskar, which was destroyed by the first Sāsānian Ardashir I; cf. Nöldeke, *Gesch. d. Arab. und Perser zur Zeit der Sasaniden*, (Leiden 1879) p. 13 note 5. In the Sāsānian division of the 'Irāk, Kaskar is mentioned as one of the 72 administrative districts; see Streck, *op. cit.*, (see *Bibl.*) p. 15, 18. It probably — as later under the Muslims — comprised roughly the district east of the Tigris, from the modern Kūt al-Amāra in the north to the region of the mouth of the Tigris. Sometimes it is mentioned as equivalent to the district of Maisān [q. v.]. On this cf. Schaefer in *Islam*, xiv. (1924) p. 17 sq. The bishopric of Kaskhar must have coincided pretty much with the Sāsānian district of the same name; cf. the map in Sachau, *Die Chronik von Arbela*, p. 16.

Kaskar is also given as the name of the capital of Dailam, which was usually called Dūlāb; cf. G. Le Strange, *The Lands of the East. Cal.*, p. 174; de Morgan, *Miss. scientif. en Perse*, i. (Paris 1894), p. 276.

Bibliography: *B.S.A.*, passim; al-Balādhuri (ed. de Goeje), p. 582; Yūḫūt, *Mu'djam* (ed. Wüstenfeld), iv. 274; al-Ḳazwīnī, *Athār al-Bilāw* (ed. Wüstenfeld), ii. 299; Ḥamd Allāh Mustawfi, *Nuzhat al-Ḳulūb* (Gibb Mem. Ser., xxiii./i. p. 162, 6; G. Le Strange, *The Lands of the Eastern Caliphate* (Cambridge 1905), p. 39, 43, 80 and do. in *J. R. A. S.*, 1895, p. 44 sqq.; Streck, *Babylonien nach den arab. Geograph.*, ii. (Leiden 1902), p. 318 sq., 321 sq.; Ritter, *Erdkunde*, x. 191.

KASR. [See KASRA].

KASR, fraction, a mathematical term which is used in Arab mathematics for the relation of two indefinite numbers as well as for that of distances, surfaces etc. In geometry, however, the term *al-kasr* is very rarely used; usually one says *nisbat a ilā b ka-nisbat c ilā d* ($\frac{a}{b} = \frac{c}{d}$).

While in the Arab astronomers the sine of the angle is referred to the radii of the circle which contain 12 or 60 parts, al-Bērūnī gives the radius the value 1 and the values of the sine thus appear as actual fractions in his work. In his *Kānūn Mas'ūdī* we read: "..... wa-yakūnu maḳām al-kisār allatī maḳhāridjuhā min al-ithnaini ila 'l-asharati wa-li-dhālika sammaw tilka 'l-awṭār ummahāt ka-mā sammaw hādhihi 'l-kusūr r-r'āsān" (and the fractions follow in regular series which start with the [numbers] 2 to 10 and therefore they [the mathematicians] call those chords "mothers" just as they call these fractions "heads" (see Berl Arab. MS., Okt. 275, p. 63b).

Kasr is more frequent in Algebra. The so called "expressible" fractions are the fractions with

the denominators 3 to 10, i.e. *thulth* ($\frac{1}{3}$), *rub* ($\frac{1}{4}$), *khum* ($\frac{1}{5}$), *suds* ($\frac{1}{6}$) etc. In other cases, e.g. instead of $\frac{1}{11}$, one writes "five out of eleven parts". If the denominators can be broken up into factors, the following formula is used: $\frac{1}{33} =$ one sixth of one eighth. The fraction $\frac{1}{2}$ is expressed by *nisf* (half).

KĀSR, a palace, castle, mansion or pavilion, in which sense it is synonymous with the Turkish *küşk*. The word occurs in the *Qurʾān* three times, once in the singular and twice in the plural (*kusūr*), and is applied twice to castles on earth and once to the abodes of the faithful in Paradise. It is the common word for the palace of a king in his capital or of a governor in the chief city of a province, e.g. *Kasr-i Qādīr*, the Palace of the Qādīr, near Tīhrān. The word, with the article, has been naturalized in Spanish as *alcazar* and is applied to old Moorish castles, such as the alcazar of Segovia and the alcazar of Seville.

Bibliography: E. W. Lane, *An Arabic-English Lexicon*, s.v.; Stanley Lane-Poole, *The Moors in Spain*, London 1887.

(T. W. HAIG)

KĀSR FIRʿAWN is the name given by the Moors to the ruins of the Roman city of Volubilis, which lie in a little valley of the Djabal Zarhūn about 20 miles N. of the present Meknès. Volubilis, at the entrance to the fertile plain of the Wādī Rdom in a district where the olive-tree flourishes, was the principal Roman centre of the interior, although it lay almost on the southern edge of the zone effectively occupied by the Romans. It was still a flourishing town in the fourth century A.D. In the fifth the Vandals, without establishing themselves there, put an end to Roman power in Morocco. The Byzantines, when they reconquered the country in the seventh century, had no effective authority outside of the north coast. There is reason to believe, however, that Volubilis left to itself was not depopulated but there grew up there, as in other parts of North Africa, a kind of state, comprising the remnants of the urban population, romanised Berbers for the most part, and the surrounding tribes under the authority of a native chief. Little by little, in the course of these two centuries this region became the centre of the great Berber confederation of the Brāneš, the dominant tribe of which at that time was the Awrāba (Warba) and the chief, at the time of the Muslim conquest, Kosaila (whose capital some authors have tried to locate in the Awrās, which is untenable). When the Berbers, who under the leadership of this chief, had overcome ʿOkba b. Nāf and succeeded in driving the Arabs out of the whole of Africa Minor (63 = 683), had to abandon Kairawān again five years later, the Warba contingents having lost their chief and having been severely punished, returned to Walīlī (Ulīlī = Volubilis (68 = 688)). These events much diminished the power of the Warba. Henceforth they lived quietly, taking no part in the great Khāridjī risings which began in 122/740, but recuperating their strength, until the day when, after the battle of Fakhkh, Idrīs b. ʿAbd Allāh b. al-Ḥasan b. ʿAlī (cf the art. IDRIS I, above, ii. 450) settled in Ulīlī, where he was received by Ishāk b. Muḥammad, chief of the Warba (172 = 788/9). He

was soon recognised as sovereign by the Warba and ultimately by all the surrounding tribes either voluntarily or under compulsion. Ulīlī became the capital of a state stretching from the Atlantic to the region of Tlemcen, the first Muslim empire in Morocco and the centre of intense missionary activity among the heretical tribes and those which had remained Jews, Christians or pagans. It was there that Idrīs died in 177 (793), poisoned, it is said, at the instigation of Harūn al-Rashīd. His son Idrīs II [q.v.] continued his policy of conquest and conversion, but in 192 (808) abandoned Ulīlī for Fās which he had just founded, no doubt in order to escape from the tutelage of the Warba, whose chief Ishāk b. Muḥammad he had killed. When he himself died in 213 (823) he was buried beside his father in Ulīlī, according to most of the early authorities. But in 841 (1437) his tomb or at least a tomb reputed to be his was discovered, conveniently for political reasons, in the Djāmiʿ al-Shurafāʾ in Fās; and this tomb has become the most popular sanctuary in the town founded by him.

After the building of Fās, Ulīlī lost all political importance. The Zarhūn remained a much visited place of pilgrimage. Around the sanctuary of Idrīs rebuilt two centuries ago by Sulṭān Mūlay Ismāʿīl, two miles from the ruins of Volubilis in a very picturesque situation on two mounds commanded by higher hills, stands the town of Mūlay Idrīs of the Zarhūn with about 9,000 inhabitants, the majority Idrīsīd sharīf's.

The Idrīsīd town of Ulīlī, of which no remains seem to survive, probably lay on the site of the present town, a remarkable natural fortress. Excavations systematically conducted since 1915 in the Roman town have already yielded interesting results, bringing to light inscriptions very important for the history of the settlements of the Romans in this region and works of art of the first rank.

IDRIS, IDRISIDS), especially al-Bakrī, *Kitāb al-masālik*, Index; Fournel, *Les Berbères*, Paris 1885, vol. i.

(HENRI BASSET)

AL-KĀSR AL-KABİR (KĀSR AL-KEBİR), a town in Northern Morocco, about 50 miles south of Tangier on the right bank of the Wādī Lakkos, which at one time ran through it, but the course of the stream was diverted to prevent inundations. Lying in a vast plain commanded on the east by heights it is divided into two parts, al-Sharīʿa in the north and Bāb al-Wād on the south, between which lies the *sūq* or market-place. The only buildings of any importance are the great mosque which is pre-Almohad, the mosque of Sīdī al-Azmīrī and the Djāmiʿ al-Saida, finished in 1689. Within and around the town are many *kubba*'s dedicated to local saints. The most venerated marabouts are Abu 'l-Ḥasan al-Kurshī (Kūrashī), a native of Spain who came towards the end of his life to teach in al-Kāsr where he died in 568 or 573 (1172—73 or 1177—78), Sīdī Ben Aḥmed, Sīdī ʿAlī b. Khlef b. Ghālīb, usually called Mūlay ʿAlī Bū Ghālem and regarded as the patron saint of the town, and lastly Sīdī Bel-ʿAbbās, who is really a Jewish rabbi, Yūda Yabalay.

The population numbers about 9,000 belonging for the most part to the *Khlot*, *Tlik* and *Djabala*. It also includes Rifans, a few families originally from Tetwan and Fās as well as Algerians who left Tlemcen and Oran as a result of the French occupation. The Jews number 2,000. Many of them have settled in the town quite recently in such numbers that the *Mellāḥ* was too small for them and they had to live among the other inhabitants. They speak Arabic and Spanish but Muslims use only the former language. Industry at one time flourishing is now limited to the manufacture of cloths for local needs. Agriculture, on the other hand, is prosperous in the country around as a result of the system of combination between townsmen and triehsmen. Al-Ḳaṣr is thus a busy market for corn, barley, beans and flax.

History. The site of al-Ḳaṣr perhaps corresponds to that of a Roman town (*Oppidum novum*?) which had already disappeared by the time of the first Muslim invasions. In the second century A.H. a fortress was built in these regions by the *Danhādja*, a branch of the *Ketāma*. According to al-Ziyānī, it was built in 102 (720—721) by the Amīr 'Abd al-Ḳarīm al-Ketāmī whence the name Ḳaṣr 'Abd al-Ḳarīm (al-Idrīsī, *Description de l'Afrique*, ed. Dozy and de Goeje, text p. 78; transl. p. 89; *Kitāb al-Istibṣār*, ed. von Kremer, Vienna 1852, p. 78; transl. Fagnan, Constantine 1900, p. 140; as well as Ibn Khaldūn, *Hist. des Berbères*, ed. de Slane, i. 401; transl. ii. 323) or Ḳaṣr Ketāma which the town kept for several centuries. Al-Bakrī, however, makes a distinction between *Sūḵ Ketāma* "a large and magnificent town situated on the river Lukkos with a *djāmā*" and a very busy market" and Ḳaṣr *Danhādja* "a castle built on a hill and commanding a large river". Ibn Khaldūn, on the other hand (*op. cit.*, text i. 188, transl. ii. 291), connects Ḳaṣr Ketāmī with the *Danhādja* (cf. also *Kitāb al-Istibṣār*). *Sūḵ Ketāma* was the capital of the state governed by Idrīs b. al-Ḳāsim h. Ibrāhīm. Al-Muḳaddasī (*Bibl. Geogr. Arab.*, iii, 219, 7) mentions *Sūḵ al-Ketāmī* among the towns dependent on Fās. Although eclipsed by the rapid development of Fās, al-Ḳaṣr seems to have retained a certain amount of commercial importance. Al-Idrīsī (*loc. cit.*) mentions its very busy bazaars. But it was only under the Almohads that the town rose out of the semi-obscure in which it was vegetating. Ya'qūb al-Manṣūr surrounded it with a fortified wall and made a hunting-ground and a hospital called *Ḥārat al-Muḳjārīn*. This is perhaps why he was regarded by Leo Africanus and Marmol as the actual founder of al-Ḳaṣr. Under the Marinid dynasty, the town was given a madrasa by Abū 'Inān which attracted many students and was still frequented in the xth (xvth) century. Al-Ḳaṣr recognised the authority of the Marinids from 620 (1223—1224). In 687 (1288—1289) the latter appointed as its governor the Ra'īs Aḥu 'l-Ḥasan b. Aṣḥkilūla, whose descendants for long remained lords of the town. The memory of this local dynasty, whose members, in alliance with the Banu 'l-Aḥmar of Granada, distinguished themselves in the holy war, is still alive to-day.

The period following the disappearance of the Banu Aṣḥkilūla was one of calamities. The Portuguese, established on the coast, threatened the town. The inhabitants did not dare to cultivate the soil more than six miles from the walls. In

1503 the governor of Aḳila, Don Juan de Menecez, attempted to take it but without success. In the century following, al-Ḳaṣr became the most advanced post of the "volunteers of faith" (*Muḳjāhidīn*) who harassed the Christians settled on the coast. During the period of anarchy that preceded the establishment of the Filālī dynasty, the town became the residence of the Ḳā'id Ghilān, who had gained possession of all Ḡharb. Driven from his capital by Mūlāy al-Raṣhīd in 1078 (1668) Ghilān was able to return to it on the death of this prince. He held out there till 1084 (1673) when he was defeated and killed by Mūlāy Ismā'il. Al-Ḳaṣr fell again, this time finally, into the hands of the Sharif, who dismantled its walls.

AL-ḲAṢR AL-ṢAGHĪR, a town in Morocco, now in ruins. It lay on the south bank of the Straits of Gibraltar, 14 miles W. of Ceuta, 23 miles E. of Tangier, at the head of a bay sheltered by a spur of the *Djehel Ghomari* at the mouth of a navigable river.

In ancient times this site was perhaps occupied by a Phoenician factory and then by a Roman town (*Lissa* or *Exilissa* of Ptolemy). A fortress was erected there quite early in the period of Muslim occupation, in 90 (708/9), according to al-Ziyānī, *Archives Marocaines*, vi. 494, on the territory of the Maṣmūda whence the name of Ḳaṣr Maṣmūda (cf. Ibn Khaldūn, *Hist. des Berbères*, ed. de Slane, i. 280, 13, transl. ii. 134) which is given it by the author of the *Kitāb al-Istibṣār* and by al-Idrīsī. Al-Bakrī calls it al-Ḳaṣr al-Awwal to distinguish it from al-Ḳaṣr al-Kahīr [q. v.]. According to him, it was inhabited by the Banū Tarīf and surrounded by great plantations. Under the Almohads it took the place of Marsā Mūsā as the port of embarkation for Spain. Many authors call it therefore Ḳaṣr al-Madja (*Geogr. d'Aboul-fēda*, transl. Reinaud, ii/i. 185; Ibn Khaldūn, *loc. cit.*), or Ḳaṣr al-Djāwā "Castle of the crossing" (Ibn Abi Zar', *Rawḍ al-Kirfās*, ed. Tornberg, p. 138, 143, 146). The Almohads erected important buildings in it and established naval dockyards there. But the prosperity of the town declined in proportion as the rulers of the Maghrib lost their hold on Spain. Deprived of the income which the transport of the armies had assured them, the inhabitants turned to piracy. Al-Ḳaṣr therefore became one of the first towns that the Portuguese sought to capture. In 1458 King Alfonso V attacked it with a fleet of 80 ships and an army of 17,000 men; after repelling

two assaults, the Muslims, overwhelmed by the Christian artillery, capitulated. They were, however, granted permission to retreat with their arms and baggage. Alfonso V entered the town on Oct. 19, 1458. The great mosque was turned into a church, the fortifications were strengthened and a garrison installed under the command of Don E. de Minenez. Two attempts made by the Sulṭān of Fās in 1458 and 1459 to recapture the town did not succeed. In 1463 the tribes of Andjera recognised the suzerainty of Portugal and in 1471 Sulṭān Mūlay Saʿīd signed a treaty by which he ceded al-Ḳaṣr to the king of Portugal.

Al-Ḳaṣr remained in Christian hands till 1540 but during this period it was continually being attacked by the Moors. John III therefore decided to evacuate it after previously dismantling it. Some years later (1559) a French prince, Antoine de Bourbon, king of Navarre, obtained al-Ḳaṣr in exchange for the men-at-arms that he was to supply to the Sharif of Fās but the intrigues of the king of Spain, Philip II, prevented the treaty from being carried out. Since that date no attempt has been made to rebuild the town. The inhabitants abandoned it and the harbour became silted up and no longer used except by smugglers. The site is marked by the ruins, still imposing, of the Portuguese fortress, by ditches, the remains of the wall and the ruins of the gate through which the citadel communicated with the town proper.

(G. YVER)

ḲAṢR-I SHĪRĪN, a town in the south-western part of the district of Ardilān or Persian Kurdistan (cf. ARDILĀN) in 34° 30' N. lat. and 45° 30' E. Long. (Greenwich) on the right bank of the Hūlwān-rūd or, as the Kurds call it, the Ālwān or Ālwānd. This river alters its course, hitherto east to west, at Ḳaṣr-i Shīrīn to a southerly one and enters the Diyālā [q.v.] at Zengābād. To the west and south-west of Ḳaṣr-i Shīrīn lies the great range of Agh-Dagh; in the S.E. also on the left bank of the river run imposing mountain chains. Ḳaṣr-i Shīrīn was an important caravan station from the earliest times. The most important route through it is the very old road from Baghdād to the Iranian highlands — the *Tarīq Khurāsān* of the Arabs of the middle ages (cf. above, i. 926a). Ḳaṣr-i Shīrīn lies about halfway between the two stations of Khānūkin [q.v.] in the south-west and Sar-i-pul (in mediaeval times Hūlwān, S. of Sar-i-pul; see

SARPUL-I ZOHĀB) in the east. Less important roads also branch off here to north, north-west and south-east.

The modern Ḳaṣr-i Shīrīn (1600 feet above sea-level) is an insignificant town surrounded by a wall of earth and stone. Outside the walls on the east is a commodious caravanserai; to the west is a fort of modern style which, according to Aubin (*op. cit.*; see the *Bibl.*), Djowān Mir built at the beginning of the sixteenth century and plundered passing pilgrims to Kerbelā and merchants from it until he was captured and killed. The population of the town, which de Morgan estimated at 3,000—6,000, is Kurdish. Shāh ʿAbās I (1587—1628) transplanted to the region of Ḳaṣr-i Shīrīn to guard the Turco-Persian frontier 900 families of the Kurdish tribe of Sandjābī (on which see Rawlinson in the *J. R. G. S.*, ix. 33; for a Lur branch of this tribe cf. Rabino, *Les Tribus de Luristan*, Paris 1916, p. 17). A Kurd chief acts as Persian governor of Ḳaṣr-i Shīrīn. Since the beginning of the sixteenth century there has been a small customs house here. Opposite the town on the left bank of the river lies the Bāgh-i Shāh = "King's Gardens", a park laid out with date palms, orange and pomegranate trees by Naṣr al-Dīn Shāh on the occasion of his pilgrimage to Kerbelā.

The most remarkable feature at Ḳaṣr-i Shīrīn, which makes it one of the most interesting places in Persia to the historian or archaeologist, is the extensive system of ruins dating from the Sāsānian period in its vicinity. The name Ḳaṣr-i Shīrīn, "Shīrīn's Palace", dates from the later period of the Sāsānian empire. Shīrīn, a Christian, was the favourite wife of Khusrāw II Parwēz (560—628) who called the great palace built by him as a summer residence after her. Ḳaṣr-i Shīrīn and the neighbourhood was the scene of the unhappy love-story of Shīrīn and the royal architect Farhād, which plays a great part in the romantic poetry of Persia; cf. above, ii. 67, and Justi, *Iranisches Namenbuch*, Marburg 1895, p. 102b. A rock tomb south of Ḳaṣr-i Shīrīn, for example, is popularly known as Ūṭāk-i Farhād = "Farhād's chamber"; see Sarre and Herzfeld, *Iranische Felsreliefs*, p. 10. The famous lute-player, Bārbud (on him see Vullers, *Lexic. Persico-Lat.*, i. 168, and Justi, *op. cit.*, p. 63) also spent some time at the imperial court at Ḳaṣr-i Shīrīn; he also plays an important part in the cycle of legends which centre round Khusrāw Parwēz. Among the 30 melodies or songs which he composed for the king (see the list of them in Vullers, *op. cit.*, ii. 369) there is one (No. 4 in Vullers) entitled *Bāgh-i Shīrīn* = "Shīrīn's Garden"; another (No. 30 and cf. also Vullers, ii. 1299b) is entitled *Nakh-čigānī* = "Hunting Song", probably the *Bāgh-Nakhčirgān* in Yāqūt, iv. 113, 12. Both songs obviously refer to Ḳaṣr-i Shīrīn, the summer-residence and hunting-palace of the Sāsānian ruler.

The period of Ḳaṣr-i Shīrīn's glory was only a brief one. Ten years after the death of Khusrāw II the Sāsānian empire collapsed before the onrush of the Arabs and in the Muslim period the palaces of Ḳaṣr-i Shīrīn seem to have been no longer inhabited. They fell quickly into ruins, mainly as the result of the poor quality of the building-material used. Al-Yāʿqūbī (*B. G. A.*, vii. 270) as early as 278 (891) talks of the ruins. Ibn al-Athīr (ed. Tornberg, viii. 388) mentions

that as a result of an earthquake in 345 (956) the walls of Kašr-i Šhīrīn cracked. The Arab and Persian authors, like Ibn Rosteh, Yāqūt, al-Kāzwinī and Ḥamd Allāh Mustawfī, emphasize the great scale of Kašr-i Šhīrīn with its halls, hermitages, treasure houses etc. and the splendid gardens containing very rare animals roaming at large in them, but give no detailed descriptions. Yāqūt and al-Kāzwinī give especially the story of the origin of the palace, which the former (*Mu'djam*, iv. 113) actually regarded as one of the wonders of the world.

We owe the most accurate description of the modern ruins to the French expedition of J. de Morgan. The main ruins lie on a broad plateau N. E. of the modern town. Near the latter is the quadrangular citadel of Khusrāw flanked by 6 round towers (called Kal'a or Kašr-i Khusrāw, also Kal'a-i Khusrāw) surrounded by a ditch. Built as barracks for the ruler's troops, we have preserved in it one of the rare perfect examples of the military architecture of the Sāsānians. North of the Kal'a are further mounds of ruins the object of which we do not know. About 500 yards to the N. E. we reach the wall of a gigantic park in shape a not quite regular oblong, enclosing the summer-residence proper of the king, measuring, according to de Morgan, 300 acres. The wall round it which also served as an aqueduct, the highest part of which reaches 20 feet, is about 6,000 paces in extent. Another aqueduct-wall divides the park into two parts. The requisite water for the irrigation of the gardens was brought from the Hulwān-Rūd and, as already observed, led farther along the top of the miles' long surrounding wall; the aqueduct can still be traced in the Hulwān-Rūd valley until it is lost in the maze of ruins of Ḥawsh Kūī. In the centre of the whole scheme is the main palace, now called 'Amārat-i Khusrāw (= house of Khusrāw) or Ḥādjdī Kal'e-sy (= pilgrim palace). It is a vast building lying east to west (1080 feet long, 625 feet broad) with vaulted rooms and a long terrace in front which is still most imposing with its huge dimensions and colonnades. Before the palace still exists a 600 yards long stretch of the aqueduct flanked by two kiosks. West of the 'Amārat-i Khusrāw stands a smaller similar vaulted building with 4 doors and a square principal chamber. It is now called Čuār Kapu or (pure Persian) Čār Dārwarā = "Four Doors", or Kal'a-i Čuār Kapu = "Palace of the 4 Gates". The object of this building (perhaps for audiences?) is obscure.

About 3 miles E. of Kašr-i Šhīrīn is another late Sāsānian ruined palace, called Ḥawsh Kūī = "House of the Horses" (so the name is explained: *kur* = probably Pers. *kurrāh*, *kurāh* = colt; Rich gives the name Ḥawsh Kerek), because it is popularly believed to contain the stables of the horses belonging to the palace of Kašr-i Šhīrīn. These ruins which consist of a palace 600 feet long with annexes and another mound of ruins are the latest of all the palaces of Parwēz so far known.

Kašr-i Šhīrīn is, of course, a town of much greater antiquity than the time of this Sāsānian king. A site so favoured by nature must always have invited settlement. So far it has not been ascertained what ancient city — which must have practically occupied the site of the present town — stood here. It was still thought — e.g. by

Malcolm, Kinneir, Ker Porter — that Dastadjird was here, but this is certainly to be located in the ruins of Eski Baghdād (cf. above, i. 926). This erroneous identification was previously attacked by Buckingham, Rich (see *Bibl.*) and Ritter, ix. 484, 509. The ancient Artemita, a town of Apolloniatis, has also been suggested — e.g. by Kinneir (see *Bibl.*) —; but this is much better located in the region of the later Dastadjird [q. v.]; and Herzfeld in Sarre-Herzfeld, *Archaeol. Reise im Euphrat- u. Tigrisgebiet*, ii., Berlin 1919, p. 78. Herzfeld, *op. cit.*, ii. 329, suggests with all reserve an identification of Kašr-i Šhīrīn with the station Danas of the *Tabula Peutingeriana*; but see against this view my article DANAS in Pauly-Wissowa, *Realencykl. der klass. Altertumswiss.*, Suppl., i. 337. Kašr-i Šhīrīn has not the slightest connection with Kinkīwar or Kašr al-Luṣūš, although there was a great palace built by Khusrāw Parwēz there also (cf. on this G. Le Strange, *op. cit.*, p. 188; Schwarz, *Iran im Mittelalter*, p. 494 sq.); the latter place lay much farther east between Kirmān-Šāh and Hamadḥān. This corrects Caetani, *Annali dell' Islām*, v. 17, vi. 144 (where Kašr-i Šhīrīn and Kinkīwar are regarded as one and the same).

There is a village 12 miles north of Kašr-i Šhīrīn called Kēnd-i Šhīrīn. A short hour's journey above it are some oil-wells, not, however, very rich, which form part of the Anglo-Persian Oil Company's concession. On them see de Morgan, *op. cit.*, ii. 81 sq., and Schweer, *Das türkisch-persische Erdölorkommen*, Hamburg 1919, p. 21, 46, 110, 112, 143—144.

Down to the Great War the Turco-Persian frontier, which was not minutely defined, ran about two hours' journey S. W. of Kašr-i Šhīrīn. On the Persian side the frontier was guarded by the fort of Kal'e-i Selzi where a detachment of Sandjābī cavalry was stationed (cf. Aubin, *op. cit.*). On the place see also Rich, *op. cit.*, ii. 263 (where it is wrongly called Kalai Selzi; Buckingham calls it Khallet el-Subzey). An hour's journey beyond it is the Turkish frontier-station Kal'e Rediffye.

KASRA, lit. "break"; name of the sign of the vowel i; the vowel itself is called *kasr*.

AL-KAŞTALLĀNĪ, ABU 'L-'ABBĀS AḤMAD B. MUḤAMMAD B. ABĪ BAKR AL-KHAṬĪB SHU'ĀB AL-DĪN AL-SHĀFĪ'Ī, an authority on tradition and theologian, born on Dhu 'l-Kāda 12, 851 (January 20, 1448) in Cairo where he spent his life as a preacher — apart from two stays of some duration in Mekka — and died on Friday, Muḥarram 7, 923 (January 31, 1517). He owes his literary fame mainly to his exhaustive commentary on the *Ṣaḥīḥ* of al-Bukhārī entitled *Irshād al-Sūri fi Sharḥ al-Bukhārī*, which exists in numerous MSS. and printed copies; of these latter the earliest may be that of Bulāḳ of 1267 and next the Lucknow edition of 1869 (others in Brockelmann, *Geschichte der arabischen Litteratur*, i. 159). The Cairo edition in 1325/6 gives the glosses of Yahyā al-Anṣārī and the Cairo edition of 1279 those of Ḥasan al-'Idwī (d. 1203 = 1887). In the field of Ḥadīth he wrote a *Muḥaddima* which was printed at Cairo (n. d.) with the commentary of 'Abd al-Ḥādī al-Abyārī (d. 1305 = 1883). Great popularity is enjoyed in the Muslim world by his history of the Prophet entitled *al-Mawāḥib al-laduniya fi 'l-Mināḥ al-Muḥammadiya*, which he completed on Sha'bān 15, 899 (May 22, 1494) and which caused him to be accused of plagiarism by al-Suyūfī. It exists in numerous MSS. and has also been printed several times, e.g. Cairo 1281, several times commented on, e.g. by al-Zurkānī (d. 1122 = 1710), printed in 8 vols. Bulāḳ 1278, 1291, and translated by 'Abd al-Bāki into Turkish, printed Istanbul 1261. Not long ago al-Nabhānī, the President of the Court of Justice in Bairūt, prepared a synopsis of it entitled *al-Awṣar al-Muḥammadiya min al-Mawāḥib al-Laduniya*, Bairūt 1310—1312. Finally in the same field he prepared a commentary on the *Kitāb al-Shamā'il* of al-Tirmidhī (*Geschichte der arab. Litt.*, i. 162). Besides studying the science of tradition he worked also at the readings of the Qur'ān. His principal work on the subject is entitled *Laṭā'if al-Ishārāt li-Furūn al-Kirā'āt*. He also wrote a biography of the teacher of Qur'ān reading, Abu 'l-Kāsim al-Shāṭibī (*G. A. L.*, i. 409), and a commentary on the *Muḥaddima* of al-Djazarī on *Tadwid* (*op. cit.*, ii. 202). Finally he also wrote on mysticism and personal piety; among his works in this sphere are his *Maḳāmāt al-'Arifin*, *Maṣālik al-Ḥunafā' ilā Maṣḥarī al-Ṣalāt* 'ala 'l-Nabī al-muṣṭafā, and his commentary on the *Burda* of al-Buṣīrī (*G. A. L.*, i. 265).

Bibliography: 'Alī Bāshā Mubārak, *al-Khiṭaṭ al-tawfiqiya*, Bulāḳ 1306, vi. 11; Wüstenfeld, *Die Geschichtsschreiber der Araber*, N^o. 509; Brockelmann, *Geschichte der arabischen Litteratur*, ii. 73. (C. BROCKELMANN)

KAŞTALLĀNĪ (KESTELĪ), MUŞLIḤ AL-DĪN MUŞṬAFĀ, Ottoman theologian and Ḥanafī

jurist. Mewlānā Muşliḥ al-Dīn was a native of Kestel (from Latin *Castellum*), a village not far from Brussa, where in after life he built a mosque. From his native place he took the name of Kesteli or, more impressive, Kaşta'llānī. In his youth he attended in Brussa the lectures of the celebrated theologian Khidr Beg and on the conclusion of his theological and legal studies was appointed teacher in various medreses, for example in Mudurnu, Demotica (medrese of Urudj Pasha), and finally "guardian". Next he was for some time kaḍī of Brussa, Adrianople and in 886 (began March 2, 1481) of Stambul, but in the same year was appointed military judge of Rumelia with the rank of a fourth vizier. He was the first to hold this office separately: it had previously been combined with that of military judge of Anatolia (cf. the art. KĀZĪ-'ASKER). At the same time Ḥājjdī Ḥasanzāde Mehmed Efendi was appointed the first independent military judge of Anatolia (cf. J. von Hammer, *G. O. R.*, ii. 246). In 891 (1486) he was deprived of his office. He died in 901 (1495—1496) in Stambul where he was buried in the cemetery of Eiyūb. — The Ḥanafī Kaşta'llānī composed a number of legal works in Arabic including highly esteemed marginal glosses on the commentary of al-Taftāzānī on the *Aḳā'id* of al-Nasafī (cf. Ḥājjdī Khalifa, *Kaṣḥf al-Zunūn*, iv. 226, as well as Brockelmann, *G. A. L.*, i. 427, which, however, belongs to ii. 196; MSS. in Berlin, N^o. 1973, and Leiden, N^o. 1998) as well as an essay on seven doubtful matters (*Ashkāf*) in al-Djurdjānī's commentary on al-Idjī's *Kitāb al-Mawāḳif fi 'l-Im al-Kalām* (Ḥājjdī Khalifa, vi. 240), also a work *Tanfiḍ al-Ma'ālīm* (Ḥājjdī Khalifa, ii. 442), an essay on the orientation of the Kibla (*Risāla fi Dīḥat al-Kibla*; cf. Ḥājjdī Khalifa, iii. 387) and lastly a work called *Yakāza Dharwī 'l-I'tibār* (cf. Ḥājjdī Khalifa, vi. 511).

Bibliography: Tashköprüzade, *Shakā'ik al-Nu'māniya*, Turkish ed. by Medjidi, p. 161 sqq., Stambul 1269; *Sidjill-i Othmāniye*, iv. 491 sq.; 'Ashikpashazāde, *Tārikh*, p. 224, Stambul 1332. (FRANZ BABINGER)

KAŞTAMÜNİ (in the Arab geographers — Abu 'l-Fidā', al-Dimashqī, Ibn Baṭṭūta —, Ibn Bibi and on the coins Kaştamūniya with variants; al-Idrisi, ed. Jaubert, ii. 312; Kaştamūnī; *ibid.*, p. 393; Tāmūnī; the *Κασταμών* of the Byzantines, in Chalcocondylas, corresponding to the oriental form, *Κασταμών*, *Κασταμών*; corrupted in various ways by Western writers: Albertus Aquensis: *civitas Constamnes*; Clavijo: *Castamea*; Benedetto Dei: *Chastarmina*, *Castimania*; Menavino: *Castemol*; with modern Greeks and Europeans: *Kastamboli*; cf. Leunclavius, *Hist. Musulm.*, col. 313, 40), a town in N. W. Asia Minor, capital of the wilāyet of the same name, which corresponds to the ancient Paphlagonia. The town is not mentioned in classical literature although the rock tombs there show that the place was settled in historical times. In the middle ages Kaştamūnī was famous as the family stronghold of the Comnenoi, who waged a desperate warfare with the Dānishmand-oghlu and the Saldjūks for its possession until it was finally lost to the Byzantines about the middle of the xiii century A. D. The town then passed, along with the other possessions of the Dānishmand-oghlu, under the sway of the Saldjūks of Kōnya and formed a beylerbeylik, which was hereditary in the family of Ḥusām al-Dīn Cōbān. On the break-up of the Saldjūk

empire, the Turkoman Isfandiyyar-oghlu of Afşani seized the region of Kaştamünî and made the town their capital. It was taken from them by Bayazid I in 795 = 1392/3 but restored to them by Timür after the battle of Angora (804 = 1401/2) and remained in their possession till they were ousted by Mehemmed II (864 = 1459/60). Henceforth Kaştamünî formed a sandjak of the eyâlet of Anadolu, in more recent times a wilâyet, which besides the so-called *merkez sandjak* included the sandjak's of Boli, Kianghri and Sinüb (Sinope). The Kaştamünî of the early Isfandiyyar-oghlu is described by Ibn Baţţûta (ed. Paris, ii. 341 sqq.); Chalcocondyles (xvth century) calls it a "flourishing and strongly fortified town" (p. 260, Bonn edition); the description in Hâdjî Khalîfa's *Djihân-nümâ* (p. 648 of the first edition) dates from the beginning of the xviiith century. Kaştamünî was first visited by European travellers in the beginning of the xixth century, first of all by Kinneir in 1814.

The erstwhile family stronghold of the Comnenoi with its Byzantine and Saldjûk fortifications was abandoned and left to fall into ruins after the Turks had maintained a garrison and artillery in it down to a century ago. There are no antiquities in existence that date from the classical period but numerous buildings survive from the times of the Saldjûks and Isfandiyyar-oghlu. The town contains no less than 62 large or small mosques (*djami*^c and *masâjid*), 16 medreses, 12 dervish monasteries, 4 libraries and 30 tombs of saints. The oldest dated building is the tekiye of the Rifâ'i (called Yilanli Tekiye) of the year 671 = 1272/73; from the same period dates a mosque built in 672. The following are also worthy of special mention: — the Djami^c's of Ghâzi Atâbeg with medrese, of Hâdjî Naşr (of the year 754 = 1353/54), that of Khwâdja Şalâh al-Din (of the year 806 = 1403/1404), and of the last Isfandiyyar-oghlu, Ismâ'il Beg, dated 855 = 1451/52, but these monuments have not yet been scientifically examined. They bear witness to the way in which the former lords of the land fostered Muslim culture; Ismâ'il Beg himself, after his dispossession, composed a much esteemed theological work, the *Hulûwiyât-i Sultânî* (cf. Rieu, *Cat. Turk. MSS.*, p. 12 sqq.). Latîfi [q. v.], the biographer of poets, belonged to Kaştamünî. Hâdjî Khalîfa calls Kaştamünî the "lofty citadel" (*kâ'ida*) of the Turkomans and the dialect of Turkish spoken there still survives. The population of the town was estimated at about 30,000 including 1500 Turkish speaking Greeks and 500 Armenians but the latter may have emigrated since the war.

(J. H. MORDTMANN)

KAŞTİLİYA, the name given by Arab writers to the district of Tunisia adjoining the Shutt's and to Tawzer, the most important area in Tunisia. Its boundaries are rather difficult to determine. The descriptions by Ibn Ḥawḳal and al-Idrîsî refer only to the town of Kaştîliya. Al-Bakrî, on the other hand, distinctly distinguishes between the town and the district. "The land of Kaştîliya", he says, "contains several towns, such as Tawzer, al-Ḥamma and Nefta. Tawzer, which is its metropolis, is a large town". In another passage he refers to Tawzer as marking the eastern limit of the land of Kaştîliya. 'Abd al-Wāḥid al-Marrākushî opposes the land of Kaştîliya, "formed by Tawzer and the cantons attached to it" to the "Zāb, which includes Biskra and its dependencies". Ibn Khaldūn (*Histoire des Berbères*, ed. de Slane, i. 646; transl., iii. 156) includes among the dependencies of Tawzer the "cantons" of Kaştîliya, to the south of the Shutt al-Djarid and Nefzāwa. The same indications are given by al-Zarkashî. Ibn Khaldūn (*op. cit.*, i. 122; transl., i. 192), on the other hand, seems to identify the Bilād al-Djarid with the land of Kaştîliya. After enumerating among the towns of the Bilād al-Djarid, Nefta, Tawzer, Gafsa (Kaḥṣa) and the places in Nefzāwa, he adds: "All this country is called the land of Kaştîliya." The Shaikh al-Tidjānt, in his turn, applies to Tawzer the description "capital of al-Djarid". From the fifteenth century onwards, we no longer find the terms Kaştîliya and land of Kaştîliya as the name of a district or of a town, but only those of Tawzer and Djarid, still in use at the present day. The enumeration of the towns of Africa given by al-Kairawānî (*Kitāb al-Mu'nis*, transl. Pellissier and Remusat, p. 28) in which Kaştîliya is mentioned is probably taken from an earlier writer. In brief, the land of Kaştîliya seems to correspond very well with the present Djarid, i.e. to the group of oases (Nefta, Tawzer, al-Udyāna and al-Ḥamma) occupying the isthmus which separates the Shutt al-Djarid from the Shutt al-Gharsa and perhaps to al-Nefzāwa.

The Arab authors are unanimous in praising the wealth of the land of Kaştîliya. The cultivation of dates and other fruit-trees, watered with great care, was very flourishing there. Flax, indigo and *hinnā* were also grown. The fields of sugar-cane, noticed by Ibn Ḥawḳal, were beginning to disappear by the time of al-Bakrî and soon afterwards vanished. Commerce was active and prosperity general. In the time of al-Bakrî the taxes of this area amounted to 200,000 dinārs a year.

The population was composed for the most part of Berbers, many of whom professed Khāridjî doctrines or, as at Nefta, Shī'a doctrines. Al-Muḳaddasî (*Bibl. Geogr. Arab.*, iii. 243, 12 sqq.) and al-Bakrî mention that cynophagy was practised among them. According to al-Tidjānt, there lived alongside of the Berbers the descendants of the Rūm, who occupied this region at the Muslim conquest. When this Shaikh visited Tawzer the remains of Christian churches were still to be seen. Ibn Khaldūn (*op. cit.*, i. 646—647; transl., iii. 156) says that there were in al-Nefzāwa and the land of Kaştîliya people of Frānkish origin, whose ancestors had come from Sardinia and settled in the country as tributaries of the Muslims to whom they paid poll-tax.

KĀṬ, DJĀṬ (A.), ĊĀṬ, (Amharic, Galla), ĊĀ'ĪŪ (Kaffa), is the name of a smooth-stemmed shrub, of the family of Celastraceae (represented in Central Europe by the spindle-tree: *Catha edulis*, Forsk. [or *methyscophyllum glaucum*, Ecklon et Zeyher]), reaching a height of 12 feet, which is found in East Africa from Cape Colony to north of Lake Tānā (Šānā) and in the Yemen. The leaves are called *kaṣṭa* in Arabic. These and the skins of the young shoots contain an alkaloid, *katin*, which accounts for the stimulating or intoxicating effect of these parts of the plant (or a decoction made from them) and the widely spread use of *kāt* in the Muslim lands of Abyssinia and South-West Arabia.

In Abyssinia, as well as in S.-W. Arabia, the leaves and young shoots of the *kāt* are chewed; more rarely a decoction is used, which is either taken as "tea" or added to the Abyssinian honey-wine (Amharic *ṭāḍjī*). The most esteemed are the tender shoots and young leaves which have a pleasant, sweetly aromatic flavour and are merely stimulating and anti-soporific and slightly intoxicating only in large doses, while the older tough leaves are unpleasantly astringent and have a much stronger effect. All accounts agree that the use of *kāt*, as ordinarily taken, which has become regular in all classes of society in the Yemen, undermines the physical and moral health of the people and also does the greatest damage from the economic point of view.

As a result of the enormous consumption of *kāt* leaves (about 30,000 tons are exported annually from Abyssinia and the adjoining countries) the cultivation of the shrub, which is propagated from cuttings, is very important. In the Yemen, Djabal Šabir, Djabal Raima and 'Uḍen are mentioned as the centres of its cultivation. The *kāt* twigs, which are not plucked till the plant is in its fourth year, are tied in bundles for transport (Arabic *kitwāt*, pl. *kalawīt*) and, in order to keep them fresh as long as possible, are bound up in moist, leafy branches and banana leaves.

Kāt is first mentioned in "The Military Exploits of the Ethiopian King 'Amda Šeyōn against the Muslims" of the year 1332/33, which puts the following words into the mouth of 'Amda Šeyōn's opponent, King Šabr al-Dīn: "I will make.... his royal palace Mar'ādē (Arabic Mar'adā) my residence and plant *ṭāt* there." Al-Maḡrīzī († 846 = 1442) mentions the *ḡṭāt* as a plant found in Awfāt (Ethiopic *Īfāt*, in Eastern Shoa [Shaua]), the leaves of which are eaten. The Shaikh 'Abd al-Kādir al-Djazīrī, who wrote in 996 (1587), says that 'Alī b. 'Umar al-Shādhilī (al-Masha'ī, † 827 = 1424), as is still said in West and South Arabia, introduced coffee into the Yemen, which took the place of *kaṣṭa*, i.e. the *kāt* leaves, previously in use. Ibn

Ḥaḍjar al-Haitamī († 974 = 1567) wrote at the instigation of people from Šan'ā and Zabīd a treatise in which he, without taking up a definite attitude to the contradictory opinions of reputable scholars regarding the effects of the *kāt*, includes the enjoyment among the *shubuhāt*, from which one should refrain. Among European travellers Niebuhr and his botanist collaborator Forskāl give the earliest accounts of our plant and its use.

KĀṬ' (A.), a cut. The Arabic verb *k-ṭ'* has, as the dictionaries show, undergone a remarkably varied development of meaning both in its original and metaphorical senses. Here we only deal with cases which are of importance for the history of religion, etc.

The infinitive form *kaṭ'* is not found in the Qur'ān but the verb occurs in the literal meaning (Sūra v. 42: "cut off the hands of a thief, male or female" — the well-known law adopted in the Fikh, sometimes briefly known as *Kaṭ' al-Liṣṣ* —) and in a more metaphorical sense (Sūra ii. 25 and xiii. 25: "cut asunder what God hath ordered to be bound together").

The old reciters of the Qur'ān (*kur'ān*) gave the name *kaṭ'* or *waḳf* to a pause in reciting whether required by the sense or for another reason. Later reciters distinguished between the brief pause necessary to take breath and other pauses required by the sense: *kaṭ'* was only applied to the first (according to others only to the last).

The grammarians give the name *alif al-kaṭ'* to the strong hamza which cannot be elided in contrast to the *hamzat al-waṣl* (cf. the article ALIF). *Kaṭ'* is also the deliberate division of a syntactical combination in a sentence for special reasons, e.g. for *al-ḥamidu li-'llāhi 'l-ḥamīdī: al-ḥamdu li-'llāhi 'l-ḥamīdu* (= *wa-huwa 'l-ḥamīdu*) or *'l-ḥamīda* (= *ānī 'l-ḥamīda*).

In prosody *ḳaḥ* means the elision of the end of certain feet, e.g. the abbreviation of *fā'ilun* to *fā'il* = *fa'lun* or of *mustaf'ilun* to *mustaf'il* = *maṣ'ūlun*. This shortened form is then called *maḳṭū'*.

The conic section *ḳaḥ* *al-mukhūṭ* is of importance in mathematics and the varieties are *ḳaḥ* *zā'id*, the hyperbola, *ḳaḥ* *nāḳis*, the ellipse, *ḳaḥ* *mukāfi*, the parabola and *ḳaḥ* *mukāfi muḡṣṣam*, the paraboloid.

In astrology *ḳaḥ* = abscissio = ἀντίπερις, or conrecte, κλιμακτής, the great danger.

Ḳaḥ *al-waraq*, meaning a format of paper, has acquired some importance in the history of administration. According to the Arab accounts, *ḳirṭās* (papyrus-paper) was probably not used before the third or fourth century; cf. above, i. 385a) was used from Mu'awiya's time for documents in the chancellery of the Caliph and at quite an early date we find five different formats used: (*ḳaḥ*) *ṭhuluthai* (*al-tūmār*, "sheet", called *ṣaḳḥa* at a late date in Mamlūk Egypt), *niṣf*, *ṭhuluth*, *rub'ī* and *sudus*. The chancellery of the Caliphs in Baghḍād had its own formats different from those used in Syria and even after Cairo had become the capital of the Caliphs and the chancellery there had adopted the Baghḍād formats, forms peculiar to Syria continued to be distinguished. For the Mamlūk period we are most minutely informed by al-Ḳalkashandī regarding the formats usual in the chancellery of the Mamlūk court in Cairo and those used in the province of Syria. He distinguishes, giving exact particulars regarding the size and particular uses, of nine formats in use in Cairo: *ḳaḥ* *al-baghḍādī* *al-kāmil*, *ḳaḥ* *al-baghḍādī* *al-nāḳis*, *ḳaḥ* *al-ṭhuluthain min al-waraq* *al-miṣrī*, *ḳaḥ* *al-niṣf*, *ḳaḥ* *al-ṭhuluth*, *al-ḳaḥ* *al-ma'rūf bi 'l-manṣūrī* (*rub'ī*), *al-ḳaḥ* *al-ṣaḡhīr* or *ḳaḥ* *al-'ūda* (*sudus*), *ḳaḥ* *al-ṣhāmī* *al-kāmil*, *al-ḳaḥ* *al-ṣaḡhīr* (*min waraq al-tair*); also four Syrian formats: *ḳaḥ* *al-ṣhāmī* *al-kāmil*, *ḳaḥ* *niṣf al-ḥamarī*, *ḳaḥ* *al-'ūda min al-ṣhāmī*, *ḳaḥ* *waraq al-tair*. The smallest formats were used for the pigeon post. Al-Ḳalkashandī only gives quite general observations for other countries.

In the history of religion the expression *ḳaḥa yaminan* meaning "to take an oath", which Pedersen (*Der Eid bei den Semiten*, p. 46; cf. also p. 12, note 5) compares with the Hebrew *ḳarāṭ berit*, is interesting. It is perhaps through the influence of this expression that *ḳ-ḥ* comes to mean "to settle, to decide", as do verbs meaning "to cut" in other Semitic languages. In logic we find it meaning "to assert something with confidence, to refute someone completely", etc., or e. g. *'alima ḳaḥan* or *'ala 'l-ḳaḥi* "to be absolutely sure of something", *dalīl ḳaḥi* "a decisive proof".

A small *Shī'ī* sect is called *Ḳaḥīya* because it "cuts short" the list of Imāms at the death of Muṣā 'l-Kāzīm.

ḲATABA, a town in South Arabia. This town, the capital of the district of the same name in Yemen, lies in the Wādi 'l-Djahabān, in the plain between the Djabal Djihāf and the Djabal Mirais, in a very fertile area which produces all kinds of cereals, including a particularly noted wheat, and also coffee, ḳāt, tobacco, fruit, including peaches, apricots and winegrapes. The town, the population of which may be estimated at about 1,500, consists of about 100 not particularly well built houses and huts, two mosques, a bath and a bazaar. The Jewish quarter is not important. Its inhabitants are mainly engaged in the manufacture of cloth from the cotton brought from 'Aden.

(ADOLF GROHMANN)

ḲATABĀN, the name of a country or kingdom and people in S. W. Arabia of whose existence we have evidence from about 500 B.C. to 200 A.D. in the ancient South Arabian inscriptions and in Greek and Roman literature. The oldest records, which at the same time give us the first accurate information regarding Ḳatabānian economic conditions, constitution and laws, have only become known in quite recent years from the hitherto published Ḳatabānian inscriptions in the wealth of material left by E. Glaser. Along with those not exactly numerous epigraphical documents which only give us a few further isolated details of the history of the country and a geographical name or two, the scanty references in Greek and Roman literature, the only source for our knowledge before the South Arabian inscriptions were known, still retain their value for the matter they contain. On a basis of the inscriptional evidence alone one could not obtain an idea of the geographical boundaries of the land, certainly not of the configuration of the ancient kingdoms of South Arabia.

The first known mention of Ḳatabān by the Greeks is found in Theophrastus (about 300 B.C.), *Hist. Plant.*, ix. 4, 2 — the earliest Greek source for South Arabian history —. This passage, however, as the Greek botanist, who was able to use the reports of the various journeys of exploration sent to the Arabian coast by Alexander, was only concerned with districts of Arabia that yielded aromatic plants, tells us nothing more than that Kitibaina (Ḳatabān) and the lands of Saba, Hadramyta (Ḥadramūt) and a certain Mamali are the South Arabian localities for frankincense, myrrh, cassia and cinnamon. The manuscripts of Theophrastus also give the form *Ḳarāḥana* alongside of *Ḳirīḥana*. D. H. Müller's suggestion in Pauly-Wissowa's *Realenzyklopädie d. klass. Altert.*,

s. v. Catabanes and Chatramis, to read *Καταβανία* in Theophrastus need not be accepted. Glaser wrongly supposed (*Skizze der Geschichte und Geographie Arabiens*, Berlin 1890, ii. 6, 8) that *Καταβανία* (or, as he incorrectly writes, "Kittibaina") lay on the Persian Gulf.

Later and fuller is the reference to Katabān in the synopsis in Strabo, xvi. 768, of Eratosthenes (end of the third century B. C.), who, in addition to the sources available to Theophrastus, had at his disposal itineraries of seafarers and travellers by caravan in Egypt and Petra. According to this, the *Καταβανείς*, who are given after the Minaeans and Sabaeans in order from north to south of the four principal Arabian peoples and before the Chatramotites (inhabitants of Ḥaḍramūt), whose lands stretched farthest east, dwelled down to the straits and entrance to the Arabian Gulf (*πρὸς τὰ στενὰ καὶ τὴν διὰβασιν τοῦ Ἀραβίου κόλπου*); their capital was *Τάμνα*. From Strabo's information it may be assumed that the Katabānians in the time of Eratosthenes lived in the part of the west coast south of Saba' and in the western parts of the south coast of Arabia, being the western neighbours of the Sabaeans. From Strabo's account of their lands which refers to the straits of Bāb al-Mandab, it is clear that the boundary for the kingdom in Glaser (*op. cit.*, p. 19), who sought to locate the Katabānians "mainly east of the Djabal Šabir" with the Gebanites west of them and the Ḥimyars south of the Katabānians and Gebanites, was not correct. This could have been deduced from the fact that in the time of Eratosthenes the Ḥimyars did not form an independent kingdom (cf. the art. SABA') but belonged to Katabān, which Glaser, who later modified his views considerably, had to confess in his book *Die Abessinier in Arabien und Afrika*, Munich 1895, p. 112. The *Γαβαῖοι* of Strabo (xvi. 768), the Gebanitae of Pliny (vi. 153), were presumably at this date still a part of the kingdom of Katabān (see the article GABAIOI in Pauly-Wissowa's *Realencykl.*) and only became independent about Pliny's time and at that time were, it is true, the neighbours of the Katabānians but not on the west, as Glaser supposed, but on the south-east between Katabān and Saba'. The statements in Pliny, *Nat. Hist.*, v. 65, are also in agreement with Eratosthenes, according to which the Katabānians lived in the S. W. of Arabia Felix. From the idea we get of the geography of their lands from Eratosthenes, which is nowhere contradicted, we see the impossibility of the mixture of right and wrong in the location of the four principal kingdoms in Glaser, *Punt und die süd-arabischen Reiche*, *M.V.A.G.*, 1899, iv/ii. 21, according to which Katabān in the old period was the land south and S. W. of Saba', bounded by N. W. Ḥaḍramūt and later stretching to the straits of Bāb al-Mandab so that it originally included the land of the Ḥimyars and would appear as early as Theophrastus as the immediate neighbour of Ḥaḍramūt on the west. Glaser at the same time also assumed in the passage in Theophrastus the alteration *Σαρά* in the text (said to be = *Shehrāt*, *Shehr*, "frankincense coast") for *Σαβά*, which, however, is wrong (cf. the art. SABA'), and further altered his early views on the frontiers of Katabān (cf. below). That Eratosthenes mentions the Katabānians between Saba' and Ḥaḍramūt and that the Katabānian inscriptions found by Glaser, ac-

cording to his own words (*Abessinier*, p. 111), "all came from the region between Mārib and Šabwat" (M. Hartmann's [*Die Arabische Frage in Der islamische Orient*, vol. ii, Leipzig 1909, p. 169, 1] observation on this statement, that the description of the find-spot of Glaser's inscription N^o. 1693, "which is of Ru'aini provenance", is not in keeping with it, can now be more easily estimated at its true value; cf. the topographical data in N. Rhodokanakis, *Katabanische Texte zur Bodenkulturschaft*, Series 2 [*S. B. Ak. Wien*, 1922, CXCVIII/ii., p. 57 sqq.]) is, as the expression quoted *πρὸς τὰ στενὰ* . . . *κόλπου* in Strabo shows, not sufficient evidence for the conclusion that the land of the Katabānians was limited to the territory between Saba' and Ḥaḍramūt and does not prevent — neither does another circumstance — the assumption that the kingdom of Katabān surrounded in north and east by Saba', the gradually increasing bulk of which came to include the S. W. corner of Arabia, in the time of Eratosthenes stretched to the N. E. as far as between the Wādī Harīb (S. E. of Mārib) and the Wādī Baiḥān al-Ḳaṣāb. The expression in Strabo *καθ' ἑκόντες πρὸς τὰ στενὰ* etc. ("stretch up to the straits") is quite reconcilable with the assumption that Katabān was not only the land directly on the coast but also stretched into the interior, towards the upper Yāfi'a. — A. Sprenger's view (*Die alte Geographie Arabiens*, Bern 1875, p. 64, 254 sq., 264, 273 sq. etc.) that the Katabānians were the Arabian tribe of *Ḳuḍā'a* was absurd. Obsessed with this view, he recognised the definition of the land of Katabān in Eratosthenes as only correct "in a limited sense". When J. Halévy and J. H. Mordtmann established the identity of the land named Katabān in the South Arabian inscriptions with the similar name of a land and people mentioned by the Greeks and Romans, any linguistic connection of Katabān with *Ḳuḍā'a* and the localisation of the original nucleus of the Katabān kingdom far to the east (near the Kawr range) were ruled out (see also D. H. Müller, *Die Burgen und Schlösser Süd-arabiens*, vol. ii. [*S. B. Ak. Wien*, 1881, xcvi/iii.], p. 1028 sq.). Nevertheless Sprenger again at a later date in his *Bemerkungen zu Mordtmanns Anzeige von Glaser's Skizze* in the *Z.D.M.G.*, xlv. 505, 1, maintained a connection between the names Katabān and *Ḳuḍā'a*. Relying on the similarity in sound of the Katabān of the inscriptions to the name of the plain of *Ḳatāb* in the vicinity of *Zafār* (near *Yarim*), the later capital of the Ḥimyars, D. H. Müller endeavoured to locate the Katabānians there, assuming that "they exercised their power in the place where traces of their existence have survived in the name of the place and where those who followed them in power had their capital" (*op. cit.*, p. 1029); cf. for this view so early a writer as Ch. Forster, *Historical Geography of Arabia*, London 1844, vol. i., p. lxxx. and 84; K. Müller in the index to his edition of Strabo, p. 769, and Sprenger, *Bemerkungen*, loc. cit.

In support of the form of the name *Καταβανείς* against *Καταβανείς* of most MSS. of the passage in Strabo is the form *Καταβανία* of the name of the land, a few lines below in the majority of manuscripts in the passage from Theophrastus quoted above, the form quoted below from Pliny, the *varia lectio* in Ptolemy with single *ι*, finally also the Arabic original form. The form *Καταβανείς* has influenced the error *Κατάβανον* in the MSS.,

an error in copying the equally erroneous *Καβά-
ραων* (and *Καβάρων*) of the other MSS. in the
note immediately following in Strabo on the capital
of the Chatramotitae, the name of which was first
restored by Groskurd as *Σαβάρων* (= *Shabwat* of
the inscriptions) (following him Kramer, Mcineke,
K. Müller, etc.) On the etymology of the name
nothing definite can be asserted. Forster's [(*op. cit.*,
vol. i., p. lxxvi., 35, 83 sq., 87, 89, 91 sq., 105, 115;
vol. ii. 154) also quoted by K. Müller (*op. cit.*)]
connection of the name with the *Ḥanī Kaḥṭān* and
his derivation (i. 83) from *katāba* in the sense
of *scribae* or *notarii*, according to Bochart, is
simply one of the curiosities with which his book
is filled. Even C. Landberg's (*Arabica*, Leiden
1898, v. 62) derivation from *ḥatab* (pack-saddle)
in reference to the wealth of the region of Baiḥān
al-Kaṣāb in camels, is not exactly probable.

Eratosthenes calls the capital of Katabān Tamna.
That the Katabānians had a monarchical constitution
like the Minaeans, Sabaeans and Chatramotitae
is known from the South Arabian inscriptions.
Sprenger, who (*Geographie*, p. 160) identified *Támuva*
with *Θούμυα* in Ptolemy, vi. 7, 37, and (p. 268,
300) consequently sought it between the Sabaeans
capital Mariaba and Sabatha, the capital of Ḥaḍ-
ramūt, had, as a result of his preconceived notions
regarding the Katabānians, as he himself said (p.
268) "some difficulty in finding the bulk of the
kingdom". Of the earlier writers Glaser came nearest
to settling the question of the situation of the
capital. While, according to his opinion expressed
in the *Skizze*, ii. 18 sq. (in correction of *Skizze*,
i. 48), Tamna was identical "either with Dumnat
Ḍjabā or more probably with Dumnat Khadīr....
not very far E. S. E. of (the highest part of) the
Ḍjabal Ṣābir on the road from the Turkish frontier-
customs-station of Ṣurra (Kaida) to Ta'izz", he later
(*Abessinien*, p. 112, 115) said that Tamna' (Timna')
of the Katabānian inscriptions was Tamna' in the
Wādī Baiḥān al-Kaṣāb and this was not only the
Támuva of Eratosthenes but the Thomna and Thomala
of Pliny and also the *Θούμυα* of Ptolemy, thus abandon-
ing his idea that the massif of the Ḍjabal Ṣābir
was the frontier of the Katabānian kingdom. Of
these attempts at identification Landberg (*Arabica*,
v. 81 sq. [on the land of Ḥarīb], especially p. 100)
said that Glaser, after looking for Tamna here and
there almost found it when in his paper *Zwei
Inschriften über den Dammbruch von Märib* (*M.
V. A. G.*, 1897, II/vi. 58) he wrote a propos
of the name Temna' mentioned in the Ṣirwāḥ in-
scription (Glaser 1000) "Temna', the former capital
Tamna or Thumna of the Katabānians, is in the
Wādī Baiḥān". This identification of Glaser's, who
(*Abessinien*, p. 112) expressly stated his conviction
of the correctness of his location of the Tamna'
of the inscriptions, was corrected by Landberg
(p. 107 sq.) when he fixed the position of the
present Timna', the site of the ancient capital of
the Katabānians, in the land of Ḥarīb in a plain
by the Wādī Ablah, a tributary on the left of the
Wādī 'Ain, which is bounded in the S. S. E. by
the hills of Rokḥama, in the S. E. by the Kawim
Āl Djenāh, in the midst of which rises the hill of
Ḥaid Waḍū; the Wādī Waḍū waters the part
of the plain called Ṭin Timna'. Following this, Hommel
(*Grundriss der Geographie und Geschichte des alten
Orients*, Munich 1904, p. 137 [656]) identified
Támuva and the town of the inscriptions as Timna',
"in a tributary Wādī of Baiḥān al-Asfal S. E. of

Märib". M. Hartmann (*op. cit.*, p. 168) was wrong
in objecting to the location S. E. of Märib "in
spite of the view expressed by Hommel with ab-
solute conviction"; he sought Tamna' east of Yarim,
on a hypothesis which is quite without foundation.
Rhodokanakis (*Die Inschriften an der Mauer von
Kohlān-Timna' in der S. B. Ak. Wien*, 1924, cc/li.
8), identifies Timna', the capital of Katabān, with
Kohlān, by combining mentions in the inscriptions
with a study of photographs taken by G. W. Bury,
who in 1900 visited Kohlān (Kahlān) on the left
bank of the Wādī Baiḥān and took impressions
and photographs of inscriptions there for the South
Arabian expedition of the Vienna Academy and
also gave an account of the ruins. Sprenger, relying
simply on the Ptolemaic location for Thomna
(between Mariama and Sabatha) had come very
near to the identification proposed by Landberg.
It may safely be concluded that not only the royal
residence but also the original home of the Katabā-
nians lay not far from the frontier of Saba' and
the gradual expansion of the tribe of Katabān
— now also known from inscriptions — into the
kingdom took place towards the S. W. The equation
of *Támuva* with Thomna, which Pliny (vi. 153; xii.
63) calls a town of the Gebanitae, proposed by
D. H. Müller (*op. cit.*, p. 1028), Mordtmann (review
of Glaser, *Skizze*, vol. i., in the *Z.D.M.G.*, xlv. 184),
Glaser (*loc. cit.* and *Punt*, p. 57) and Landberg
(*op. cit.*, p. 109 sq.), has a certain probability in
spite of the phonetic difference in the initial dentals
of the two names, which we also have between
Θούμυα and *Támuva*, which had already been equated
by K. Müller (*op. cit.*). But it should be remembered
that Ptolemy may have referred two names of
similar sound to one place. In favour of the identi-
fication of *Θούμυα* and Thomna we can quote — in
addition to the form of the name — Pliny's remark
(xii. 63) on the frankincense route. Of the town-
names of similar sound in Pliny, it may here be
remarked that neither can Thomna, the capital of
the Gebanitae, be identical, as Glaser suggests, with
Thomala, which Pliny (vi. 154) expressly calls a
town of the Sabaeans, nor can Thomala be altered
to Thomna, as Mordtmann (review, p. 186) pro-
posed. The latter (*ibid.*) and Hommel (*Die alt-
israelitische Überlieferung*, Munich 1897, p. 274)
assumed that the name of the Katabānian capital
and that of the Edomite tribe of Timna' (*Gen.*,
xxxvi. 40) were connected.

Strabo's further remark that *Καταβανία* (var.
Καταβανία, the same form as in Stephanus By-
zantinus, s. v.) produced frankincense, has recently
been wrongly taken to mean that, according to
his authority, frankincense was not found in other
parts of South Arabia (cf. the art. *SABA'*, below,
iv. 6a). Glaser's suggestion (*Skizze*, ii. 26) that
there is "obviously some confusion" in Strabo
may be met by the statement in Pliny (xii. 69),
which is based on authentic information, as well
as the corroborative statements of modern tra-
vellers, like C. Niebuhr, *Beschreibung von Ara-
bien*, Copenhagen 1772, p. 283, and Th. Bent,
Southern Arabia, London 1900, p. 77, 91, 254.
Glaser himself acknowledges the possibility "that
even by the time of Eratosthenes individual Ka-
tabānians owned lands in the frankincense areas"
(similarly in *Abessinien*, p. 111 sq.; previously
Sprenger, *Geographie*, p. 264; cf. K. Müller, *op.
cit.*; in *Punt*, p. 46 (cf. 50 sq., 57) Glaser speaks
of Katabānian suzerainty over the frankincense

country. His deductions (*Abessinier*, p. 112 sq.) that Ḳatabān perhaps also had possessions in the African frankincense area and that the whole of Azania belonged to it may be emphatically rejected.

Pliny twice mentions the Ḳatabānians; v. 65: Catabanes (this is the better reading, not Cattabanes) Arabes and, in another form, vi. 153: Catapani, a divergence which is probably explained by the use of different sources. According to the first passage (also Solin, ed. Mommsen, Berlin 1895, § 707), they are to be regarded as the possessors of the south-west of Arabia Felix. Glaser (*Skizze*, ii. 291) wrongly says that by Pliny's time there was no longer a Ḳatabānian tribe. He is possibly correct in saying that they and the Ḥadramōtites had inherited the southern Minaean territory and could only hold out by continually fighting the Sabaeans. Whether there still was a kingdom of Ḳatabān, as known to Eratosthenes, in Juba's time is doubtful. Glaser (*Abessinier*, p. 114) denied that the Ḳatabānian kingdom was still in existence at the time of Gallus and thought (*Punt*, p. 56) that it no longer existed by 81 A. D. and that the Ḳatabānians "disappear completely from the scene as an independent people" in the first half of the first century B. C. (*ibid.*, p. 48; cf. *Abessinier*, p. 77; for the time of Gallus see D. H. Müller, *Burgen*, ii. 1030). This view must be considerably modified, if only on account of the mention of the Ḳatabānians in Pliny and Ptolemy (see Glaser's own limitation, *Punt*, p. 48, 1). Against Hommel, who (*Grundriss*, p. 139, 142) placed the end of the kingdom of Ḳatabān in the second century B. C. (on this chronology see Glaser, *Abessinier*, p. 115), Hartmann (*op. cit.*, p. 164; cf. 168) said that Ḳatabān does not disappear before 80 B. C. That the references in Ptolemy from the time of Juba refer only to the people of the Ḳatabānians and no longer to the now weakened kingdom, cannot be asserted with certainty. But it may have been included in the Ḥimyar kingdom at the beginning of our era (on the supposed beginning of the Ḥimyar epoch see the art. SABA², below, iv. 8).

This question is bound up with that of the connection between Ḳatabān and the Geb(h)anitae of Pliny (vi. 153, xii. 63, 68 sq., 87 sq., 93), the Gabān of the inscriptions, into the details of which, as they would require a special article, we cannot go here. Sprenger's view (*Geographie*, p. 256, 268, 282) that the Ḳatabānians lived in S. W. Arabia before the Gebanitae and were driven out by them in Juba's time was supported by D. H. Müller (*Burgen*, ii. 1028 sq.) (also Glaser, *Punt*, p. 36, 48, 50). In my articles *Gabaioi*, and *Gebbanitae* in Pauly-Wissowa, *Realencykl.*, it has been suggested that the Gebanitae, called *Γαβαίοι* by Eratosthenes (Strabo, xvi. 768) and therefore known to him alongside of the Ḳatabānians, were settled in Ḳatabān or close to its frontier (for other errors of Sprenger see *ibidem*). Glaser, *Punt*, p. 35, 60, regarded the Gebanitae as a subdivision of the Ḳatabānian people. But it is not quite clear even for the time of Juba whether the Gebanitae are not still to be regarded as neighbours of the Ḳatabānians. D. H. Müller's other considerations are discussed in another connection (see the *Bibliography*). The Gebanitae, like the Ḳatabānians, also became a part of the Ḥimyar kingdom, probably not before Pliny's time. Hartmann's proposal (*op. cit.*, p. 410; cf. 22) to alter *Gebanitae* in Pliny,

xii. 63, to *Catabanitae* cannot be accepted. This unobjectionable reading is amply supported against emendation by vi. 153; and besides Pliny never uses the form of the name which Hartmann's conjecture would introduce.

That the *Periplus Maris Erythraei* (cf. the art. SABA², iv. 9), presumably composed between 40 and 45 A. D., does not mention the Ḳatabānians — a fact on which Glaser (*Abessinier*, p. 115) laid stress in support of his view that their kingdom came to an end at an early date — like the non-mention of the Minaeans, means nothing, especially as the much later Ptolemy — and Pliny also — mentions the Ḳatabānians along with the Sabaeans, Minaeans and Chatramotites (vi. 7, 24, *Κοτταβανοί* [var. *Κοτταβανοί*, vulg. *Κατταβανοί*]), i.e. all the four main peoples of South Arabia known to Eratosthenes. This is at any rate an argument against those who hold that the Ḳatabānian people had entirely disappeared from history by the time of Gallus and was therefore a view at first challenged by Glaser. That the Ptolemaic map placed them between the frankincense region and the modern 'Omān is explained to mean they had also lands in the former. The *Κιθιβανῖται* mentioned in the same passage by Ptolemy were originally considered by Glaser — who wrote their name erroneously "Kittibaner" — (*Skizze*, ii. 4, 6, 8, 268 sq.) to be the inhabitants of the *Κριθιανὰ* of Theophrastus, said to be situated on the Persian Gulf, and regarded them as well as the *Κοτταβανοί* as different from the Ḳatabānians. This was only intended to serve as a basis for his assertion that even by Pliny's time there was no longer a Ḳatabānian tribe (see above). Later (*Abessinier*, p. 111) he abandoned his view that the Ḳatabānians are not mentioned in Ptolemy and (p. 115) conceded the possibility at least that they are the *Κιθιβανῖται* so that he now took up an intermediate position. On the question of the relation of the two peoples with similar names to one another no definite answer can be given. According to Mordtmann (review, p. 187), they were identical, and it is in fact not improbable that Ptolemy refers to the Ḳatabānians under two different forms of the name, just as in one passage (vi. 7, 10) he calls the people of Ḥadramōt *Ἀδραμίται* (var. *Ἀδραμίται*) and in another (vi. 7, 25, 26), *Χατταμωῖται*. The capital of the Ḳatabānians can be recognised in his *Θομνα* (Thomna in Pliny). Mordtmann was wrong in his view that Ptolemy erroneously — as a result of different estimates of the distance — had given Thumna twice (31 and 37) in his map.

The mentions of Ḳatabān in the later literature of the Greeks are of no value, such as Dionysius Periegetes, ed. K. Müller, verse 959, who — perhaps from the geographical didactic poem of Alexander Lychnus of Ephesus — in the phrase *ἀρχήνιοι Κλεταβηνοί* rightly describes the Ḳatabānians as neighbours of the Sabaeans mentioned just before. This mutated form is a misreading of *ΚΑΤΑΒΗΝΟΙ* of the original source; it appears also in the Latin paraphrasers of Dion. Periegetes and as Cletabis in the Geographer of Ravenna, ed. Pinder-Parthey, Berlin 1860, ii. 7.

The references to Ḳatabān in South Arabian inscriptions were down to the last decade of the sixth century very limited, e.g. the Minaean inscription Halévy 504 (= Glaser 1087) in which a Ḳatabānian king is mentioned as a contemporary of Minaean kings, and Fresnel 56 (= Glaser 481)

in which there is mention of a peace between Saba' and Ḳatabān. A deeper knowledge of the past of Ḳatabān was first obtained from the rich finds of inscriptions made by Glaser, who, in his fourth journey to South Arabia (1892—1894) before which no Ḳatabānian inscription had been known, brought back squeezes of about 100 Ḳatabānian inscriptions, one particularly remarkable result of his journey of exploration. Hommel's conjectural dating of these inscriptions "from about 1000 B.C. to the end of the Ḳatabānian kingdom (2nd century B.C.)" (*Grundriss*, p. 139) is too early in both its limits. The beginning is not earlier than that of the Minaean kingdom (see the art. SABA'), on the latter see above. Hommel (*ibid.*) was only able to say further that there were about 18 Ḳatabānian kings' names in these as yet unpublished texts, out of which Glaser had, however, already gathered much valuable information, and that, apart from a few passages in inscriptions which Glaser himself published (e. g. *Punt*, p. 58 [beginning of Glaser 1392]; *Zwei Inschriften über den Dambruch*, p. 105 [contents of Glaser 1693]) or Hommel utilised for his researches in the history of religions (from Glaser 1599, 1600 and 1604), some of his inscriptions were again squeezed by Arabs, one for the Greek Kallisperis (published by Hommel, *Z.D.M.G.*, 1899, liii. 98 sqq., the first Ḳatabānian inscription made generally accessible), three others for 'Aden, whence they were sent to Paris (publ. by H. Derenbourg, *Nouveaux textes yéménites inédits*, R.A., 1902, v/iv. 117 sqq. [Nº. ii, iii, iv; new edition with emendations in the *Répertoire d'Épigr. sem.*, 1903, i, Nº. 310 sqq.]) Ditlef Nielsen in the *M.V.A.G.*, 1906, xi/iv., published in his *Neue katubanische Inschriften*, a German version of his *Studier over oldarabiske Indskrifter*, Copenhagen 1906, 5 Ḳatabānian texts (Glaser 1600, 1402, 1119, 1581 and one fragment) (which he had received from Glaser) with notes (critically reviewed by O. Weber, *Studien zur sudarabischen Altertumskunde*, in *M.V.A.G.*, 1907, xii/ii. 1—22); at the same time Glaser in his *Allgemeine Nachrichten*, Munich 1906, p. 60 sqq. and 162 sqq., published the first of these inscriptions and Glaser 1606, of which Nielsen Nº. 5 was a fragment. The article following the above mentioned one by Weber was his *Neue sudarabische Inschriften* (p. 23 sqq.) (Landberg 1—5) (Nº. 1 already published by H. Derenbourg in *Nouveaux envois du Yemen* [despatched in 1903] under Nº. 3; Landberg 3 is identical with the first third of Glaser 1230 [in Glaser, *Allgem. Nachr.*, p. 147 sq.]).

On the basis of the earliest publications from Glaser's papers, research was at once begun on individual problems of Ḳatabānian antiquity. Hommel, for example (*Grundriss*, p. 85 sq., 140 sq.), first proposed hypotheses regarding the religious system of the Ḳatabānians. Hartmann gave his views on the constitution, from the important inscription Glaser 1606, and on historical questions (from Glaser 1359/60, 1693 etc.; *op. cit.*, p. 430 sqq.; cf. also 164 sqq.). It is a noteworthy fact that the kingdom of Ḳatabān appears also in the inscriptions as existing contemporaneously with those of Ma'in, Saba' and Ḥaḍramūt, just as we find it in Eratosthenes. As regards language, Ḳatabānian is nearer Minaean than Sabaean; Hommel said the Ḳatabānian dialect was practically Minaean. The traces of Sabaean in it are due to contact with

the neighbouring people. Weber had already pointed out (*Studien*, p. 2, 63 sq.) in the epigraphy certain peculiarities from the few reproductions available to him. It is unnecessary to go further into the details of this earlier literature, especially in view of the comprehensive edition of Glaser's Ḳatabānian inscriptions which is being undertaken by Rhodokanakis (see the art. SABA', iv. 12). The latter had already published in his *Der Grundsatz der Offenlichkeit in den sudarabischen Urkunden* (S. B. Ak. Wien, 1915, CLXXVII/ii. 33 sq.) the Ḳatabānian inscription Glaser 1606, already discussed by Glaser (see above) and Hartmann, (*op. cit.*, p. 431), with very thorough notes; he then published some hitherto unknown inscriptions in *Katabanische Texte zur Bodennutzung* in the S. B. Ak. Wien, 1909, cxci/ii., namely Glaser 1601, 1602, 1395 = 1604 = Nº. 84 of the inscriptions collected by the South Arabian expedition (S.A.E.), Glaser 1412 = 1612 = S.A.E. 81, Glaser 1413 = 1613 = S.A.E. 82; in the already mentioned second series of *Katab. Texte* the three inscriptions Glaser 1396 = 1610 = S. A. E. 83, S. A. E. 48, of which the Kallisperis inscription (see above) forms one part, and Glaser 1693; lastly in the already mentioned treatise *Die Inschriften an der Mauer von Kohlān Timna* the inscription S.A.E. 77 = Glaser 1404 = 1614, S.A.E. 80, 80A = Glaser 1397 sqq. and, in elucidation of the title of Muzarrib among the Ḳatabānians, S.A.E. 94 = Glaser 1405, S.A.E. 85 + S.A.E. 60, Glaser 1410, and in the appendix S.A.E. 86; a new edition of S.A.E. 78 sq. = Glaser 1605 sq. has appeared in *W.Z.K.M.*, xxxi. 22 sqq. These publications mark an extraordinary advance not only for the accurate reproduction of the texts of the inscriptions and the very full commentary but also for the systematic investigation here attempted for the first time of problems of law, constitution and economy (see the art. SABA', iv. 12), as well as, for example à propos of the discussion of inscriptions Glaser 1601 and 1693, of details of the earlier history of Ḳatabān; for example, in *Katab. Texte*, i. 26 sq., 34 sq. (supplement in *Katab. Texte*, ii. 98 sq.) a chronological order is proposed for some groups of Ḳatabānian kings (cf. A. Grohmann, *Katabanische Herrscherreihen* in the *Anz. Wien*, x., 1916, p. 42 sqq.; older attempts in Nielsen, *op. cit.*, p. 42; Weber, *Studien*, *op. cit.*, p. 9 sq.; Hartmann, *op. cit.*, p. 165 sqq., 601). Our knowledge of the history of ancient South Arabia is for the first time enlarged on many points by a combination of these newly published inscriptions with those already known. We see that certain smaller countries were dependent on Ḳatabān, with which they for some time formed a great power. In Glaser 1396 there is mention of the dependence of the Ma'in tribe on the leading tribe Ḳatabān. The inscription Halévy 504 (quoted above) shows that Ma'in was dependent on Ḳatabān. On the other hand, from the Minaean inscription Glaser 485 Ma'in appears as the vassal of Saba'; Ḳatabān was for some time one of the enemies of Saba'. But in the period after the Sabaean inscription Glaser 418/419, in which Ḳatabān is mentioned along with Ma'in among the enemies conquered by Saba', it was weakened by Saba'. At the time of the Siṛwāh inscription, Glaser 1000, which mentions a campaign of Saba' in which Ḳatabān was on its side, it had lost political control over considerable territory (cf. Glaser 1600 and

1620). A war lasting many years between Katabān and Saba' (Glaser 481 = Fresnel 56 [see above], Glaser 1693) in the course of which (according to Rhodokanakis' supposition) there was a rupture of the alliance between the two powers ended in a peace. References to Katabān being included in the kingdom of the Himyars may also be gleaned from inscriptions. None of the inscriptions concerned can be definitely dated in a known era, but it is possible to bring some of them into a chronological series relative to one another.

The publication of new material alone will show whether the unsettled problems will be cleared up or remain unsettled.

Bibliography: the books and articles of Glaser, Rhodokanakis, Hommel, Derenbourg, Hartmann, Landberg, Weber, D. H. Müller, J. H. Mordtmann, Sprenger etc. are already cited in the text; reference need only be made here to my article *Saba* (*Realenzyklopädie* s. v., esp. coll. 1425 sqq., 1448 sqq., 1457 sqq., 1492 sq.). (J. TKATSCH)

KATĀDA B. IDRĪS, ancestor of the Sharifs of Mekka from the beginning of the 13th century A.D. onwards. In 1201, 1202 or 1203 A.D. he overpowered the then ruling family of the Hawāshim and established his authority in the Holy City. The last Sharifs of the Banū Hāshim had lived in continual family strife and quarrels. Meanwhile Katāda (for his pedigree cf. Snouck Hurgronje, *Mekka*, i., Stammtafel I between p. 24 and 25 and Stammtafel II between p. 74 and 75) had enlarged his estates from Yanbu' southward in the direction of Mekka, thus preparing his attack on this city. When the Mekkans were out of the town in order to assume the *ihrām* [q.v.] for the 'umra on the 27th of Radjab, the commemoration day of Muḥammad's Ascension, he made use of this occasion to establish his power in the town. According to another story, however, his son Hanzala captured the town and prepared his father's entry.

Katāda, in contradistinction to the Banū Hāshim, his predecessors in the Hūdūd, was a man of political genius, who pursued the idea of founding the independent principality of the Holy Land of Islām. He repaired the walls of the town which had fallen to ruins, captured Ta'if and brought the Thakīf-tribes under his dominion. He continued the war with the Sharifs of Medina, built a fortress at Yanbu' and organised his army with peculiar care.

His attitude towards the Aiyūbids, the caliph and the Zaidites of Yaman is to be viewed in the light of his central political idea. He did not suffer manifest signs of any foreign power in his territory, so that relations often became strained and sometimes even ended in open hostility. Nevertheless the caliph once invited him to visit Baghdād. It is said that Katāda started on his journey to the capital, but returned to his own country when he was met by an embassy of the caliph which had in its train fettered lions. Be this legend or fact, this much is certain, that Katāda embodied his idea of the "splendid isolation of Hūdūd" in verses which are a typical illustration of his negative attitude towards foreign powers. Probably his encouragement of the Zaidite occupation of Yaman is to be viewed in the same light.

In his last days he undertook an expedition

against Medina. Illness, however, induced him to return to Mekka, where he was killed in 1221 by his son Ḥasan, who suspected him of favouring one of his relatives as a candidate for the throne. His descendants were ruling Sharifs at Mekka, until in 1916 Ḥusain converted the sharifate into a kingdom.

KATAK (CUTTACK), a district in Orissa [q.v.].

KATANGA, a province in the Belgian Congo.

Geography and History. Katanga is the most southern, richest and least populated of the four provinces of the Belgian Congo. It lies between 5° and 13° 30' S. Lat. and 21° 30' and 30° 30' E. Long. It is bounded on the north by the eastern province and the province of Congo Kasai, on the east by Lake Tanganika which separates it from the former German East Africa (now under British mandate) and by Northern Rhodesia; in the south by Northern Rhodesia and Portuguese Angola; in the west by Angola and the province of Congo Kasai. The area is 200,000 square miles, about a quarter of that of the Belgian Congo. Its native population is about a million and a half of Southern Bantus (Balubas, Lundas, Basonge, Bango-Bango, Warua, Watumbwe, Babui, Baholoholo, Kanioka and Batschok), while its white population is about 4,500, of whom the great majority are Belgians, about fifty Dutch, a few English, Americans, French, Italians, Portuguese, Greeks and Scandinavians. In 1922 there were forty-nine Hindus, eight Turks and fifteen Arabs and Zanzibaris. These figures have since been considerably increased.

The province of Katanga is divided into four districts — Upper Luapula, Lomami, Lulua and Tanganika Moero. A number of towns — Elisabethville, Likasi, Albertville, Kongolo, Kabinda, Sandora and Kambove — have arisen in it as a result of the economic conditions of which we will give a general account below.

We may add that Katanga enjoys a fairly temperate climate, especially south of the tenth parallel, in which the altitude varies from 3,500 to 5,500 feet and that it is well watered by rivers and streams, such as the majestic Luapula (upper reaches of the Congo river) which runs through it from south to north and is fed by many tributaries of which the most important are the Lubudi, Lufira, Luapula, Luvua, Lovoi and Lukuga, which flow from Lake Tanganika. If the soil of Katanga, which is covered with a forest of more or less dense brushwood, is far from having the great fertility of the immense central depression which constitutes the most extensive part of the Belgian

Congo, and if it does not offer to the fascinated eye of the traveller the imposing beauty of gigantic forests, its soil, on the other hand, possesses wealth immeasurable. It is to the exploitation of this that the economic policy of the Belgian colonisers has been primarily directed.

Deposits of tin are abundantly distributed between Lualaba and Lake Tanganika; two important coal-mines are worked at Albertville and Luena; auriferous dykes, pipes of kimberlite and alluvial diamond-bearing deposits have been discovered in various places. Since 1922 the Mining Union has been working an extremely rich deposit of uranium which was found at Shiukolobive. In 1923, 450 tons were exported which enabled Belgium to produce several grammes of bromure of radium.

But the principal source of the wealth of Katanga is certainly the copper found in profusion in immense deposits worked by the natives before, the Belgians came, which the earlier travellers simply could not help discovering. The richness of the ore, the density of which is 14%, and the intelligent organisation of the industry have enabled 80,000 tons of raw copper to be exported in 1924. This production, like economic development in general, will certainly make new strides ahead when "white coal", the reservoir of hydraulic energy of enormous power abundantly distributed through the province, has been controlled and put at the disposal of industry.

The first methodical exploration of Katanga dates from 1890. Famous explorers — Burton, Speke, David Livingstone, H. M. Stanley in the Cameroou, Böhn and Reichard and certain Belgian expeditions of the Association Internationale Africaine, representatives of which — Popelin, Ramakers, Storms and Becker — founded the stations of M'Toa, Karema and M'Pala on Lake Tanganika — had, of course, visited it previously. But it was only at the end of the nineteenth century, just when Cecil Rhodes was pushing his railway and British influence northwards, that the Congo Free State began to take notice of the urgent necessity of recognising and organising the most southern part of its vast territory. King Leopold II, sovereign of the new state, whose colonial plans did not meet with very great approval in Belgium, to realise this scheme had to have recourse to a private society, the *Compagnie du Congo pour le Commerce et l'Industrie*, with which he founded the *Compagnie du Katanga*.

This society was essentially a body for exploration and occupation, whose duties and rights were defined by the convention of March, 1891, which imposed on it the following obligations:

The placing of a certain number of craft on the Upper Congo — the building of stations — giving assistance in the suppression of the slave-trade and the trade in spirits and prohibited arms — the organisation of a sufficient police service — the eventual exercise by its agents of the functions of the different branches of government service.

In return it received:

- 1) Full possession of a third of the lands belonging to the domain of the State, in the part of the valley of the Upper Congo lying to the south of the fifth parallel.

- 2) The right of exploitation of the soil of the ceded lands for a space of ninety-nine years.

But the division of the lands between State and Company raised serious difficulties and the neces-

sity soon appeared of putting the properties of the contracting parties under joint ownership. There was therefore created in 1900 the special Committee of Katanga to which the State and the Company entrusted the management of their affairs. The resulting agreement provided that "all the advantages or benefits to be gained from the exploitation and all expense, charges and losses would be divided by the Committee in proportion of two-thirds for the State and one-third for the Company; the Committee would further have the most extended powers of administration and alienation without exception or reserve".

A decree of 1910 deprived the special Committee of the delegation of the functions of the executive powers, but made no essential modification in its functions as regards the administration of the patrimonial rights of the State and of the Katanga company.

This is the regime that is still in control; our reason for giving at length the circumstances that brought it into being is that it is at bottom extremely original and that — contrary to what is often thought — the position of the Katanga Committee is totally different from that of great companies like the Chartered Company of Rhodesia, or the British East Africa Company, and of other distant possessions. Nowadays Katanga has made great progress, thanks to the policy of the Belgian government and the activity of private initiative. The railway, which runs from Bukama to Sakania and connects the mining region with Lualaba and with the railways of Rhodesia, has been equipped in a very up-to-date fashion and soon a new line will link it up by the Kasai river with the port of Matadi and the Atlantic Ocean.

Muhammadan penetration, the slave trade and the anti-slavery campaign.

History tells us that even before the Hidjra Arab barques were traversing the ocean between the Red Sea and the Persian Gulf. But it was only when the great Muslim movement had made its immense advance into North Africa and caused the migration on a huge scale of the disciples of the Prophet, that we find the Arabs devoting themselves to the methodical conquest of the lands round the Indian Ocean and building up important sultanates there, of which those of Sofala and Zanzibar have from time to time had bursts of splendour and passed through periods of power and brilliance.

But this power soon began to degenerate and assume a new character. It passed into the hands of traders and exploiters for whom, as Privelle said, "the normal state of society was the choice by them of the most convenient and most remunerative method of exploitation".

It is then that we find chiefs penetrating into the very heart of East Africa where the weak and poorly armed natives offered them no resistance and where they found vast riches, from ivory to human cattle, for whom the American planters and the Asiatic Muslims offered handsome prices.

Setting out from Zanzibar and the coast of Mozambique, the movement reached Lake Tanganika at the beginning of the nineteenth century. It reached Katanga by the bay of M'Toa and spread through the whole of the eastern province by the road from M'Toa to Kabambare and

Kasongo. A regular Arab power extending from the banks of Tanganika to Stanleyville was established by the chief Tippo-Tip and his nephew Rashid.

We know (Stanley and Livingstone have given terrible pictures of it in their works) the horrors which accompanied this invasion and the rapid disintegration of native communities which was produced by the constant wars, flights, endless migrations and continual rupture of the most sacred links of family life. Europe was moved. Cardinal de Lavigerie preached a holy war and on the initiative of Leopold II the civilized nations met in an anti-slavery conference in 1889. War was declared on the chiefs Rashid, Sefu and Kumlalizi. While Dhanis was fighting them in the south of the Congo, Commandant Jacques and his lieutenants fought fierce battles with them on the banks of Lake Tanganika, at Katakai, Albertville and M'Pala, which were to liberate for ever the native population from the scourge which had fallen upon them. What influence did this activity of the Muslim world leave upon the Bantu peoples of Katanga?

From the shores of Lake Tanganika to Stanley Falls, we find at the present day negroes who profess Islām. They are called arabicised "wangwana". There is no reason to doubt that the Arabs used to make and still make serious efforts at conversion to Islām; nor is there any reason to doubt that a religion which, like Islām, preaches hatred of the *kūfir* and recommends polygamy is specially suited to attract the natives of Africa.

We must say, however, that if we consider this influence serious in the eastern province, where we have important groups of arabicised natives at Kasongo, Miangwe, Kirundu and Stanleyville, and if it is revealed as fairly considerable in the residencies of Ruanda and of Urundi (former German districts, now under Belgian mandate) it is perhaps not quite the same in Katanga. For if there are still a few arabicised negroes on the shores of Lake Tanganika and along the old Arab roads, they are really very few in number and their religious education is of the most rudimentary nature. They like to wear a white dress to show their superiority over the other negroes and sometimes perform their *ṣalāt* turned towards Mekka and fast in Ramaḍān, but for the rest they are ignorant and still believe, like their pagan kinsmen, in spirits, witchcraft, superstitions and in the power of malevolent magic.

Is an influence of this kind worthy of the attention of colonising nations? We think so, for one thing is certain, that the arabicisation of the negro very quickly gives him a contempt for the *kūfir* and for European authority and the Muslims do not hesitate to encourage these sentiments.

Alongside of the arabicised negroes there remain in Katanga a certain number of Arabs who have been joined by Muslim Indians. They devote themselves to trading with untiring industry and some of them possess substantial shops, doing a big business and have prospered exceedingly. Indeed, we are at the commencement of a powerful economic offensive, the strength and meaning of which we must try to estimate.

Economic penetration from the East.

Dār al-Salām [q.v.] and Zanzibar lying at the crossing of the routes from Europe, Africa and Asia, have become by force of circumstance depots for Asiatic merchandise of all kinds which eastern commerce intends for East Africa, into which they

penetrate as a result of the activity and business skill of the immigrant Arabs and Hindus. To give an idea of the importance of this trade, it will be sufficient to consider that in 1922 Bombay and Zanzibar sold in Tanganika Territory (under British mandate) goods worth £ 674,000, the total imports being at most £ 1,386,300 and Great Britain herself participated to the extent of £ 292,000. The goods which reach Katanga by this route are mainly cloths, articles of clothing, blankets and a certain amount of foodstuffs, soap and miscellaneous articles.

As regards textiles, the Hindu and Arab merchants import the most varied kinds, but especially the white cottons called "Americani" and "chader", which sell very well in the markets of Katanga. Not only do the importers attach a great importance to the quality and variety of their goods, but they pay special attention to the measurements of their cloths and pay careful attention to the caprices and changing tastes of a clientèle so fickle as the native population. As a result they were able to import in 1922 at the port of Albertville alone, 18,000 kilograms of chader, 27,000 kilograms of Americani and 8,000 kilograms of cotton printed and dyed, as well as a considerable quantity of blankets and other goods.

Their activity is not confined to imports alone. They also export and it will give an idea of the magnitude of this branch of their trade if we say that a single Arab house in Albertville in 1923 exported almost millions of francs worth of ivory. Several of these firms extend their activity from Zanzibar or Dār al-Salām to Albertville and from Albertville to the Stanley Falls. They have branches in the more important stations and have agents in their service and petty traders who are of great value to them, sober and active, living almost like natives, carrying on business at insignificant expense and thoroughly acquainted with the soul of the negro with its vices and weaknesses, which they can flatter when necessary even — and particularly — to the detriment of the prestige of the European; they carry into the remotest corners eastern influence with their wares.

In Katanga we can see an attempt at economic penetration which will have great developments and the figures which we have given ought in our opinion only to be regarded as stages in an increasing progression which, if European commerce does not take care, will assume considerable importance.

Is this economic influence susceptible of having a serious repercussion in other spheres? I should be premature to try to answer this question definitely. But we know that the demands raised by Orientals in the Kenya Colony in 1923 created profound uneasiness there and that the commercial strike begun at the beginning of the same year by Hindu and Arab merchants in Tanganika Territory seriously disturbed the economic and political atmosphere of this colony. And then — and this is a thing which no colonising nation can afford to neglect — we are at the present watching the evolution of a phenomenon which an American author has styled "the rising tide of colour" and which may perhaps be a subject for grave anxiety for humanity to-morrow.

AL-KAṬAR, a peninsula on the east coast of Arabia on the Persian Gulf. It has an area of about 2,000 square miles and 2,600 inhabitants. The cape at the end of the peninsula, which runs northwards, is called Rās Rikken and forms a fairly steep tongue of land surrounded by rocks; it is an obstacle not without danger to navigation. The summit is crowned by an old fortress which belongs to a village situated in an adjoining ravine. The coast of the peninsula is steep everywhere, but not high, and is dotted with fishing villages. Its appearance is rather depressing. The soil is poor, nothing but gravel and marl with sand. A few springs provide water for the wells, which have been dug with difficulty in the heavy soil. The climate is remarkably dry and the air unhealthy as a result of the stagnant sea-water along the coast. The few gardens are small and yield but little. There are no extensive cornfields or date palm groves; only here and there do we find a few palms and bare crops. For miles low, bare hills parched by the sun rise from the muddy strand covered with driftsand and seaweed. Inland beyond these eminences stretch barren dunes which are scantily covered with vegetation; behind them lie groups of low miserable huts made of earth and palm leaves. These villages are surrounded by walls to protect them from the raids of robber Beduins of the tribes of Menāṣir and Āl Murra; the dunes have towers on them and here and there is a building of some size that has been fortified.

In contrast to this poverty is the almost inexhaustible wealth yielded by the bay on the Persian Gulf surrounded by al-Kaṭar, in which lie the islands of al-Bahrain celebrated for its pearls. Food and sustenance is amply supplied by the sea, on which the inhabitants of the bay spend half the year seeking for pearls, while the other half is devoted to fishing and trading. Zabāra is the largest place on the peninsula and al-Beda' is regarded as the capital. The latter, like all the places on the peninsula, is chiefly inhabited by fishermen, but in the long narrow, dirty market place there are also a few merchants and artisans from al-Bahrain.

The houses of the town are huddled together in narrow, dirty, irregular streets; two mosques and the ancient castle are the only buildings of any importance in al-Beda', which may have about 6,000 inhabitants. Dawḥa, which lies north of al-Beda', is but half as large; it lies in a deep little bay which affords a rather picturesque view through the cliffs 60–80 feet high in the background. The houses of Dawḥa are still more unprepossessing and poorer than in al-Beda' and the market place even smaller and filthier. Two forts command the town — one on a rock beside it and the other in the town itself. Al-Wakra is more pleasing and stands higher. It also shelters a number of merchants and artisans from al-Bahrain. The town has, on the whole, a prosperous appearance.

The peninsula was of some importance even in ancient times on account of its important situation commanding the Gulf of al-Bahrain. A. Sprenger has sought to identify the Cataraci of Pliny (*Natural History*, vi. 28, § 147) with the inhabitants of al-Kaṭar. The peninsula used to belong to the Sultānate of 'Omān. From 1872 till 1914 it was under the suzerainty of the Turks, who had a garrison in al-Beda' down to October, 1914, and belonged to the province of al-Aḥsā', forming the qaḍā of the same name in the sandjaḥ of Naǧd. Since 1913 'Abd Allāh al-Thānī has been lord of the peninsula. But parts of it became independent earlier. For example, in 1882 Dawḥa made a treaty with England accepting her protectorate; in 1892 and in 1914 other places followed this example. Al-Kaṭar is now under the control of the ruler of Central Arabia, Ibn Sa'ūd, who has thus regained the position once held by the Wahhābi kingdom to the peninsula, which the Turks had for a time usurped.

(ADOLF GROHMANN)

KAṬARĪ B. AL-FUDJĀ'A, the last chief of the Azraḳī Khāridjīs (cf. above, i. 542). He belonged to a clan of the Tamīm (the tribe which furnished one of the most noteworthy contingents to these rebels), the Banū Kābiya b. Hurkūš b. Māzin (Wüstenfeld, *Geneal. Tabellen*, i. 14). The name of his father, al-Fudjā'a, is said to have been a surname and his real name was Dja'wana. Like other Arab chiefs, al-Kaṭarī had a double kunya (cf. Goldziher, *Muh. Studien*, i. 267): Abū Muḥammad in peace and Abū Ma'āma in war (Djāḥiz, *Bayān*, i. 131, ii. 126). Of his youth we only know that he took part under the command of 'Abd al-Raḥmān b. Samura, along with several other chiefs among whom was al-Muḥallab b. Abi Šufra al-Azdī, destined later to become his bitter enemy, at the submission of Sijidjān in 42 A. H. (al-Balādhurī, *Futūḥ*, ed. de Goeje, p. 396; Khalifa b. Khayyāt in Ibn 'Abd al-Barr, *al-Istī'āb*, Ḥaidarābād 1318, p. 405; Ibn Ḥadjar, *Iṣāba*, Cairo 1325, iv. 161). He must have reached a fairly mature age when, 27 years later, he was acclaimed "Caliph" of the Azraḳīs when the latter, defeated by al-Muḥallab and his lieutenants, were passing through a very serious crisis. Kaṭarī, endowed with tremendous energy and indifferent to danger, was able to arouse the enthusiasm of his partisans, and after leading back the remnants of the army into the mountains of Kirmān, reorganised them; he then went down again into the 'Irāḳ, occupied Ahwāz and threatened Baṣra. Kept for a long time in check by Muḥallab, he nevertheless succeeded in maintaining his position on the left bank of the Dūdjaīl even after the 'Irāḳ, as a result of the defeat of Muṣ'ab b. al-Zubair at Maskin (72 A. H.), had fallen into the hands of 'Abd al-Malik. Finally al-Ḥadīdī b.

Yūsuf, appointed governor of the 'Irāk, decided to reappoint Muhallab to the command against the Azrakīs, in which he had been replaced without success by other chiefs. Muhallab soon drove the rebels across the Dujail and assuming the offensive, pursued them into the very centre of their power, Kirmān. Kaṭarī nevertheless was able to hold out for a long time in his lines (it is to this period that a silver coin with a legend in Pahlavi and Arabic of the year 75 struck in the name of Kaṭarī as *Amīr al-Mu'minin*, refers [Z. D. M. G., 1858, xii. 52, No. 303]). The dissensions that broke out within the Azrakī army between Arabs and Mawālī resulted in a split: Kaṭarī had to leave the town of Dīraft which was the Azrakī head-quarters and take refuge along with the Arabs in Tabaristān, while the Mawālī continued to hold Dīraft under the command of their chief, 'Abd Rabb or 'Abd Rabbihī (there are two individuals of this name among the Mawālī distinguished by the epithets *al-Kabīr* and *al-Saghīr* and the sources give the rank of commander sometimes to one and sometimes to the other or even distinguish two groups of the Mawālī which separated successively from al-Kaṭarī and were led by 'Abd Rabbihī the Great and the Less respectively). This division proved fatal, for Muhallab had no difficulty in routing the Mawālī and killing their chief; al-Ḥadīdī sent the Kalbī warrior Sufyān b. al-Abīad against Kaṭarī: or rather the latter (according to a tradition recorded by al-Ya'qūbī) as governor of Raiy received the appeal which the *isphābādī* (local chief; cf. A. Siddiqi, *Studien über die Pers. Fremdwörter im klass. Arabischen*, p. 784) addressed to him on behalf of the people of Tabaristān who were exasperated by the rigid application of the *dīzīya* tax by Kaṭarī. The Azrakīs surprised by Sufyān's troops in a defile in the mountains suffered a decisive defeat. Kaṭarī who fell under his horse and was abandoned by his followers was discovered and killed by a native. His head was cut off and borne in triumph to Kūfa and then to Damascus to be presented to the Caliph. The remnants of the Azrakīs under 'Abīda b. Hilāl al-Yashkurī fled to Saḡhawwar, a stronghold near Kūmis (Yāqūt, iii. 62) where they sustained a long siege from Sufyān; having exhausted their supplies, they made a desperate sortie and were wiped out. The chronology of these events is far from certain: the sources which say that Kaṭarī was in command for 13 or even 20 years are of no value. According to Wellhausen (cf. *Bibl.*), the election of Kaṭarī as Caliph probably took place at the end of 69 A.H. and his death in 78 or 79.

Kaṭarī b. al-Fudjā'a represents in striking fashion the type of Khārīdī intransigent and also that of Arab *Saiyid*, half cavalier and half brigand. Like the other Azrakīs, as a result of his fanatical zeal, he preached and practised *istī'rād* (assassination of anyone who did not accept the Khārīdī creed) and declared the *ka'ad* (singular *kā'id*) infidels, that is to say those who, while professing the Khārīdī doctrine, refrained from taking part in the war against their adversaries. On the other hand, he was proud of his Arab blood and of his Bedouin character; like several other illustrious Khārīdīs, he had a real talent as orator and poet. One of his speeches is recorded by Dīhāz, *Bayān*, i. 196, 197; *ʿAḥḍ*, ii. 195—196 (cf. also *Fihrist*, p. 125, 15); the fragments of his poetry that have survived to us, of which the most celebrated is the fragment

Ḥamāza, p. 44 (frequently quoted, with numerous variations), are remarkable for the elevated style and a heroic contempt for death and place their author in the first rank of Khārīdī poets.

KĀTH, the ancient capital of Khwārizm, the modern Khiva; according to Yāqūt, *Mu'djam*, ed. Wustenfeld, iv. 222, the name meant a wall (*ḥā'it*) in the desert in the language of the Khwārizmis, even if there were no buildings within this. The fullest accounts of the old town and citadel of Fil or Fir, which was gradually washed away by the Āmū-Daryā (the last traces of it are said to have disappeared in 384 = 994), are given in al-Birūnī's [q.v.] *Kitāb al-Aḥḥār al-Bākīya*, p. 35, on which E. Sachau based his *Zur Geschichte einer Chronologie von Khwārizm* (*Sitzungsber. der phil.-hist. Cl. d. K.K. Akad. der Wiss.*, lxxiii, Vienna 1873, esp. p. 489 sq.). On the description of the town by the geographers of the ivth (xth) century cf. G. Le Strange, *The Lands of the Eastern Caliphate*, Cambridge 1905, p. 446 sq.; W. Barthold, *Turkestan w epokhu mongolskago nashestwiya*, ii., St. Petersburg 1900, p. 143 sq.; the fullest information is given by al-Mukaddasī², ed. de Goeje, 1906, p. 287 sq. The town lost its political importance when the dynasty of the first Khwārizmshāh was destroyed by the prince of Gurgāndj, Abu 'l-'Abbās Ma'mūn b. Muḥammad, in 385 (995); cf. W. Barthold, *Turkestan*, etc., ii. 275 sq. Kāth is mentioned by Ibn Baṭṭūṭa (called al-Kāt by him; cf. ed. Defrémery and Sanguinetti, iii. 20) as the only inhabited place between Khwārizm and Urgenē (the ancient Gurgāndj). In the viiith (xivth) century Kāth along with Khiva before the rise of the native dynasty in Khwārizm, belonged to the kingdom of the Čaghatai (*Zafar-Nāma*, Calcutta 1887, i. 232); this is shown for example also on the Chinese map of 1331 (in Bretschneider, *Mediaeval Researches from Eastern Asiatic Sources*, 1888, ii. 63). On the storming of Kāth by Timūr in 1372 cf. *Zafar-Nāma*, i. 237 sq.; for the assertion of P. Lerch, *Khiva oder Khwārizm*, St. Petersburg 1873, p. 21) that the army crossed the Āmū-Daryā between Se-Pāya and Kāth, which would mean that Kāth even then was on the left bank of the river, there is no authority in the text. In the xith (xviiith) century Kāth was on the bank of a dry canal; Anūsha, Khān of Khiva (1663—1687), therefore built a new Kāth west of the main stream on the bank of the Yarmīsh canal which he

himself had dug (W. Barthold, *K' istorii orosheniya Turkestana*, St. Petersburg 1914, p. 95, from the MS. of the Asiatic Museum 590 ob, History of Khiva, fol. 33^a). The ruins of the old Kāth east of the Āmū-Daryā are now called after the alleged tomb of a saint of the earliest period of Islām, *Shaiḡh* 'Abbās Walī; they were visited in 1873 and described by A. Kuhn (*Materiali dlya statistiki Turk. Kraya*, iv. 252). Besides the tomb of the saint, the only building adorned with glazed bricks, there are mentioned here a half destroyed minaret and the remains of the city wall, all of baked bricks. The modern village (200 houses, 15 shops, 2 mosques with schools) occupies only a small part of the ancient site and the modern fort only a quarter of the old citadel. According to V. Masalskiy (*Turkestanskiy Kray*, St. Petersburg 1913, p. 749), the ruins are 31 versts from Petroalexandrovsk (called Turtkul since the revolution) and 7 versts from the present right bank of the Āmū-Daryā. (W. BARTHOLD)

KATHAI, KHITAI. [See CHINA].

KATĪĀ [See KĪTĀ].

KĀTĪB, writer or scribe, is probably derived from the word *kitāb* (book) and from both was later formed the verb *katāba* (he wrote). The word was perhaps imported with the art from the Northern Aramaic neighbours of the Arabs. We not only find the word in the earliest poetry preserved, applied to those who wrote the Arabic script but also ancient poets speak of Ḥimyarī kātibs. In the time before Islām the art of writing, though apparently practised in all parts of Arabia, was the accomplishment of the few, and Ibn Sa'd in his *Ṭabaqāt* makes a point of mentioning each time when he states that a certain Ṣahābī could write, that the art of writing was little known at that time. Among the Companions at Medina some ten are stated to have been kātibs, and Ka'b b. Malīk in a tradition preserved by Aḥmad Ibn Ḥanbal (iii. 458) mentions that he is a kātīb as a particular accomplishment. It is further recorded that several prominent men in Mekka also were kātibs and we may assume that the kātibs of the court of al-Ḥira (like 'Adī b. Zaid) were employed in drawing up the safe-conducts (mentioned by Ṭufail al-Ḡhanawī) or *ḥilf*-contracts referred to in the *Naḡā'id* and in the *Mu'allaka* of al-Ḥārith b. Ḥilliza and written in Arabic. Of far greater importance from an Islāmic point of view were the men who wrote down the revelations of the Prophet; they are named *Kātīb al-Waḡy*. Such men were Ubayy b. Ka'b, Ibn Mas'ūd and Zaid b. Ṭhābit. These same men were also employed for writing the various letters sent by the Prophet to prominent men in Arabia inviting them to embrace Islām. The office of kātīb was one of great honour and the rank, which was later occupied by the wazīr, was filled during the whole time of the first four Caliphs and the Umayyads by men who had the simple title of kātīb, and it was only under Abu 'l-'Abbās that the title of wazīr was first employed. By this time, on the model of the Persian chancellery, a complicated system of government offices had developed. The chief secretary had the title of *Kātīb al-Sirr* "Private secretary", others were employed to make the first drafts of official documents; these were called *Kātīb al-Inshā'*. The control of the army with the payment of the troops was regulated by the *Kātīb al-Djāish*, which we might equate with the "Secretary for War". Other secretaries were employed for the supervision of

the landed property of the ruler. The whole system of kātibs was the *Diwān* [q. v.]. This class of men became all-powerful and it was from them that the highest officers of state were recruited. They appear to have kept themselves apart from the other men of education, for only rarely find we any of them mentioned among the innumerable traditionists and theologians, though many are found among the men who made a mark as poets or authors in other branches of learning. As they were required to have a general knowledge of all manner of subjects, authors early began to compose books for the benefit of this class and as this office maintained its importance the works for their benefit have come down to us in many copies. The chief works on the education of the kātīb are the *Adab al-Kātīb* of Ibn Kūtaiba [q. v.], the *Kitāb al-Kutūb* of Ibn Durustawaihi, the *Adab al-Kātīb* of al-Ṣūlī and especially the voluminous work of al-Ḳalkāshandī. While the first three works give us an insight into the requirements of a competent kātīb in the earlier centuries, the *Subḡ al-A'ṣḡā* of al-Ḳalkāshandī contains practically all that it is necessary to know on the subject. We can trace step by step how the kātīb influenced the whole of Arabic prose literature; from the simple and clear letters of the earlier periods we come gradually to the bombastic composition of later times in which it is frequently difficult to discover the purpose of a document in the volume of sounding words. The disease was due to the zeal of the kātīb to outdo his colleagues or predecessors in the imagined elegance of his diction. We may owe many useful works to their authors' desire to supply the kātīb with the material for his compositions, but the whole striving for grandiose language has been the cause for making so much Oriental literature so indigestible to our taste. This is perhaps aggravated by Persian, Turkish and Indian kātibs. They were proud too when they could solve the meaning of the tangle of words and we get a glimpse at that mentality when a renowned kātīb like the Ṣahīb Ismā'il b. 'Abbād objected to a letter being sent to him, because the words were properly pointed and vocalised, as he considered it an insult to his intellect. Though the kātibs rose to high positions, they appear as a class to have been of a cowardly disposition, and could only intrigue; and I believe no one ever rose to become a ruler, which so many bold spirits succeeded in doing during the last twelve centuries.

Bibliography: Ibn Kūtaiba, *Adab al-Kātīb*, ed. Grūnert and several Oriental editions, especially the Commentary of al-Baṭalyūsi entitled *al-Iḡtidāb*; Ibn Durustawaihi, *Kitāb al-Kutūb*, ed. Cheikho; al-Ṣūlī, *Adab al-Kātīb*, ed. Beirut; al-Ḳalkāshandī, *Subḡ al-A'ṣḡā*, ed. Cairo in 14 volumes and the abridgment of the latter entitled *al-Daw'*. (F. KRENKOW)

KĀTĪB CELEBĪ. [See ḤĀDĪDĪ KHĀLĪFA].

KĀTĪB-I RŪMĪ. [See 'ALĪ B. HUSAIN].

KĀTIBĪ, SHAMS AL-DĪN MUHAMMAD B. 'ABD ALLĀH, a Persian poet, born at Taraḡ Werāwesh, a village of Turshiz in Khurāsān, studied at Nishāpūr, went to Herāt to the court of the Timūrids, where he did not receive the welcome he expected, and lived for a long time in Shirwān where the prince Mirzā Shaiḡh Ibrāhīm (d. 820 = 1417) had taken him under his patronage. He then lived in Adharbaiḡjān, where he was not appreciated by Iskandar b. Kara Yūsuf, and in Isfahān, where

he immersed himself in the study of mysticism, and died of the plague at Astarābād between 838 and 839 (1434—1436). It was in the last-named town that he undertook to compose a *khamsa* "a group of five poems" in imitation of Niẓāmī and Amīr Khosraw but he only finished the *Gulshan-i Abrār* "Rosebush of Pious Men" and his *Lailā u-Madīnūn* of which the only known manuscript is in St. Petersburg. In the field of ethical and didactic poetry he wrote a book entitled *Dih Bāb* "The ten Chapters" or *Tad̲j̲nīsūt* "Puns"; he also left a *Diwān* of which ten ghazels were published and translated by Bland in his *Century*, p. 18—21, the *Si-Nāma* "Thirty Letters", devoted to mystic love, and among the *Mathnawī* of allegorical and epic matter the *Madjma' al-Bahrain* "Confluence of the two Seas", which has a double rhyme, and can be read in two different metres and represents the mystic love of two personages named Nāẓir and Manzūr, and the *Dilrubāi* "Ravishing of Hearts", an allegorical history of Kōbād, king of the Yemen, and of his minister, fertile in ruses. His poetical surname of Kātibī probably comes from the fact that he was a calligrapher, having received lessons in Nishāpūr from Mawfānā Sīmī, who later quarrelled with him. He spent the whole of his life in poverty as a result of the foolish prodigality which made him spend in a few days the sums he received from the munificence of his patrons.

(CL. HUART)

AL-ĶAṬĪF, a seaport on the coast of the Persian Gulf in the bay of the same name. The latter, which faces due east, is about four miles broad at the entrance, and enclosed on the north by a narrow promontory, shaped like a mussel-shell, on which lies the fortress of Dārim. Its point is called Rās Tannūra. The south side of the bay is confined by a jutting horn of land, called Zahrān, from a hill on it shaped like a sugar-loaf, which forms an excellent landmark for ships entering the bay. On this side of the bay lie the fortifications of Dammān. Towards the mouth of the bay lies the island of Tārūt, four hours' journey in length from north to south, well provided with water and thickly planted with palm groves. This island lies exactly opposite al-Ķaṭīf. The best and safest passage to the harbour of al-Ķaṭīf is through the deep channel on the north between the island of Tārūt and Rās Tannūra; the channel south of the island is shallow and difficult to navigate. The waters of the Gulf are shallow almost everywhere in the bay, and only show a level surface of water at high tide; when the ebb sets in sandbanks appear, and little islands, shallows and bushes of sea-plants, among which wind narrow channels filled with mud. The coast is very flat; except at a few places it is almost level with the sea.

It is significant of the change in the coast-line that Abu 'l-Fidā' (d. 1331) tells us that in his time Tārūt was still part of the continent and was only surrounded by the sea and became an island at high tide. As soon as the sea went back a part of the land between Tārūt and al-Ķaṭīf appeared, so that people could pass along it to the mainland. According to him, Tārūt was half a day's journey from al-Ķaṭīf and rich in vineyards with excellent grapes. Al-Mas'ūdī (d. 956) puts the distance between Tārūt and al-Ķaṭīf at a mile. As Tārūt is now an island, the sea has swallowed up part of the coast here. On the land side al-Ķaṭīf is surrounded by a broad girdle of gardens and orchards. The flourishing crops in the gardens far surpass those of the best watered places in the interior, e.g. at Ilufhūf. The date-palm does exceedingly well here in a soil richly irrigated, partly by salt water, which the flood-tide carries far into the interior, and partly from the fresh water springs of the adjacent hills. Cereals, wheat, barley, rice, and all kinds of vegetables, figs, apricots, mangoes, pomegranates, grapes, citrons and lemons also flourish here. Through an uninterrupted succession of palm-groves, which it takes several hours to traverse in either direction, wind snake-like lines, the arches and canals of an old irrigation system, which date from the Ḳarmaṭian period, and formerly supplied al-Ķaṭīf with better water than could be had in the immediate neighbourhood of the town. The whole length of the system, now in ruins, must have been about five miles. Al-Ķaṭīf has walls and towers. The western gate has a high stone arch of delicate work and is flanked by towers and walls which are now in ruins. Just outside the gate are two cemeteries. The town, which is about a quarter of a mile long, is damp and filthy, and with its suburbs has about 6,000 inhabitants; the whole district, according to Sadlier, had nine walled and seven open villages, the population of which including al-Ķaṭīf he put at 25,000. The continual fighting, of which the town has been the scene, has much affected its appearance. It now has a dismal, broken-down look. The market-place, on which the products of the country are to be amply had, is large. At the inner bend of the small bay already mentioned, stands the powerful citadel said to have been built by the Ḳarmaṭian Abū Sa'īd al-Djannābī, later used by the Portuguese, the high massive walls of brick and stone of which come down almost to the water's edge, so that only a narrow path along the shore is left, on to which opens the main gate defended by an outwork. Close to the shore there is now also the customs-house. The outer court of the citadel forms a quadrangle and is surrounded by high walls with towers at the corners, and protected on the land-side by a ditch. At the south-west corner stands the old palace of the Ḳarmaṭians, of which part has fallen in and been taken away and part has been very clumsily restored. The entrance is through a great archway in the Moorish style, supported by slender pillars, three arches deep and five long with fine cross-vaulting with arabesques in stucco, which have now for the most part fallen down. This archway leads into a long gallery, formerly covered, of which the side walls and pillars and a few arches remain. One next enters the inner court, which is surrounded by a series of chambers still fairly well preserved. A lofty room, long and

broad, served as reception room, with fine pillars in the centre and windows in the Persian style, divided into sections by little pillars. At the back of the room a raised throne still stands. Behind it follows a regular labyrinth of rooms, galleries, corridors and chambers, in three successive stories. The rich architecture of the windows, which are filled with pretty lattice work in stone in varying patterns, shows much taste. Behind the reception room is a court with large round pillars and remains of decoration.

The climate of al-Kaṭīf is very unhealthy; fever and other diseases have given the coast a bad reputation. The harbour, which was once accessible to heavily laden ships, is now for the most part silted up, and accessible only to small vessels at high tide. The sand-banks which run out on either side make entrance difficult, nay even dangerous. To the west and south the bay is well sheltered by the promontories and the islands of Tārūt and Suwaik. It is also favourably situated for trade with the islands of al-Bahrain, Būshehr and other places. Al-Kaṭīf might again attain some importance as a harbour, if it were dredged and kept in order and given better communications with the interior. The inhabitants of al-Kaṭīf are mainly engaged in pearl-fishing and in trading. Their type shows the strong Persian stamp, which dates from the pre-Muḥammadan period.

History. A. Sprenger has identified the bay with the *Sinus Capensis* of Pliny, *Nat. Hist.*, vi. 28, § 147. Before the days of Islām, al-Kaṭīf, like the whole of al-Bahrain, was under Persian suzerainty. Shāpūr II about 320 A.D. conquered the whole Arabian coast beginning at al-Kaṭīf. In the early days of Islām there were still many Persians (Magians), Jews and Christians in al-Kaṭīf, as well as in the other towns of al-Bahrain. In al-Kaṭīf, however, the 'Abd al-Qais were predominant in those days. The whole country of al-Bahrain including al-Kaṭīf then submitted to the Prophet in al-Medina and came under the administration of al-'Alā' b. al-Ḥaḍramī. But when the general rising broke out against the Muslims after Muḥammad's death, al-Bahrain was one of the first districts to proclaim its independence from the lord of al-Medina. In 11 A.H. the rebels under al-Ḥuṭam b. Duba'ā occupied al-Kaṭīf, but the rebellion soon collapsed. In 67 A.H. there was an encounter at al-Kaṭīf between the 'Abd al-Qais and Nadjda b. 'Amir al-Hafnī, in which the former were decisively beaten. Nadjda took prisoner the people of al-Kaṭīf, who had risen against him, and took up his headquarters there. Much more momentous for the town than this transitory feud was the invasion by the Ḳarṡāṡian Abū Sa'īd al-Ḥasan b. Bahrām al-Djannābī in 286 A.H. Many inhabitants perished. Abū Sa'īd had pitched his camp in the town and then undertook a bold campaign against al-Baṡra. The governor of al-Bahrain, Ibn Bānū, gave battle to the Ḳarṡāṡians at al-Kaṭīf in 290 A.H.; the latter were defeated and suffered heavy losses, including Abū Sa'īd's successor designate. The town was taken by Ibn Bānū and Abū Sa'īd had to abandon his campaign against al-Baṡra and hurriedly return. Al-Kaṭīf fell again into the hands of the Ḳarṡāṡians, who were now masters of almost all al-Bahrain with Ḥaḍjar, al-Aḥsā', al-Kaṭīf and al-Ṭā'if. When at the period of decline of Ḳarṡāṡian power in 378 A.H., al-Aṡfar with a section of the Banu 'l-Mun-

tafiḳ made war on the Ḳarṡāṡians, he plundered al-Kaṭīf and carried off great booty in slaves, goods and cattle to al-Baṡra. Al-Idrīsī and Benjamin of Tudela, who visited the east between 1169 and 1172, describe al-Kaṭīf as a fine, large town. The latter's estimate that there were 5,000 Jews in al-Kaṭīf must be considered an exaggeration. Ibn Baṡṡūṡa also calls it a fine, large town. Alfonso d'Albuquerque who captured Hormūz in 1507 mentions Catifa as the harbour of Lahaḡah (al-Aḥsā') and says that the best horses are exported from here. He obtained a large quantity of provisions and supplies in al-Kaṭīf and there were many merchants there. In 1521 the lord of al-Aḥsā' (Lasah) refused to pay the Portuguese tribute for the lands of Catifa and Bahārem (al-Bahrain). Antonio Corrēa thereupon conquered al-Bahrain at the end of July, 1521, and al-Kaṭīf also fell into the hands of the Portuguese. In 1550 the citadel was taken by the Turks, whereupon Dom Antāo de Noronaa conducted a bold campaign against the Turks of al-Baṡra and al-Kaṭīf. Not till 1622 were the Portuguese driven out of al-Bahrain by Shāh 'Abbās I of Persia, and the Dutch were now able as a result to establish their factories in the Persian Gulf. At the end of the xviiith century the Wahhābis succeeded in entering upon the heritage of the Ḳarṡāṡians. Sa'ūd b. 'Abd al-'Azīz in 1792 defeated the ruler of al-Ḥasa (al-Aḥsā') and thus obtained al-Kaṭīf, but the Turkish governor, Sulaimān Paṡha, obtained the assistance of the head chief of the Muntafiḳ, Thwēnī b. 'Abd Allāh Āl Sa'ūdūn; the latter advanced against al-Ḥasa in 1796 with an army of Turkish soldiers and volunteers and transformed al-Kaṭīf into a fortress. But the campaign took an unexpected favourable turn for Sa'ūd when Thwēnī was murdered in 1798. After the overthrow of the Wahhābis in Central Arabia by Ibrāhīm, al-Kaṭīf also was again occupied by the Turks in 1819, but had to be abandoned again in 1823. In 1838 the Turks once more invaded the coast of the Persian Gulf; the governor of Djidda, Khurshid Paṡha, occupied al-Huḡḡūf and was threatening al-Kaṭīf, when a protest from England postponed the Turkish conquest of al-Bahrain. The increased power of the Wahhābis enabled Faīṡal as early as 1844 to conquer the whole district of al-Ḥasa including al-Kaṭīf, which now remained in the hands of the Wahhābis. It was only when hostilities broke out in 1871 between 'Abd Allāh b. Faīṡal and Sa'ūd b. Faīṡal that Miḡḡat Paṡha, governor of Baghḡdād, obtained an opportunity to assert the old claims of Turkey. He occupied al-Kaṭīf, which now became a kaḡḡā of the sandjaḡ of Nadjd and received a garrison. Turkey occupied this territory down to May, 1913, when 'Abd al-'Azīz b. Sa'ūd at the head of his warriors occupied al-Ḥasa and drove the Turkish garrison out of al-Kaṭīf also.

(ADOLF GROHMANN)

KATĪN, KADĪN (T.), [see KHATUN].

KATL (A.), killing, putting to death, used in the two principal meanings of the word — the crime of murder and the punishment of execution.

I. Katl as a crime.

1). In the *Qur'ān* unlawful slaying is forbidden in a series of verses, which date from the second Mekkan period to nearly the end of the Medina period. The passages may be arranged chronologically as follows (cf. Th. Nöldeke—Fr. Schwally, *Geschichte des Qur'āns*, vol. i., and II. Grimme, *Mohammed*, vol. ii.; when the exact order in the particular periods cannot be ascertained, the passages are here arranged in the order of the *Sūras* and verses): — xvii. 33, 35 (second Mekkan period; according to O. Procksch, *Über die Blutrache*, p. 74, note 4, later than vi. 152): "Kill not your children for fear of being brought to want; We will provide for them and for you; verily the killing them is a great sin.... Neither slay the soul which God hath forbidden you to slay unless for a just cause; but whosoever shall be slain unjustly, We have given his next of kin (*wali*) power (to demand satisfaction) but let him not exceed the bounds of moderation in the killing; indeed he is protected"; xxv. 68 sqq. (second Mekkan period): — (and the servants of the Merciful are those) "who slay not the soul, which God hath forbidden to be slain unless for a just cause.... for he who does this commits sins (or: will bring retribution upon himself); his punishment will be doubled on the day of the Resurrection and he shall remain in it covered with ignominy for ever; except him who repents and believes and performs good works; for them God will change their evil deeds into good".... (here killing and unbelief

are considered together so that the question, what happens to a believer who kills unlawfully, is left quite out of the question); vi. 152 (third Mekkan period; similar to xvii. 33, 35); iv. 94 sq. (about the years 3—5; according to Procksch, *op. cit.*, p. 80, to be dated between the treaty of al-Hudaiyya and the capture of Mekka): "it is not lawful for a believer to kill a believer unless by mistake (by *khata'*); but if anyone kill a believer by mistake he shall set free a slave who is a believer and pay a *diya* to the next of kin of the dead man, unless they waive it....; but if the person slain belong to a people hostile to you, but a believer, a slave who is a believer shall be released; but if he belong to a people with whom ye have a treaty, a *diya* must be paid to his relatives and a slave who is a believer set free; if anyone cannot afford to do this, he must fast for two successive months so that Allāh may look upon him again....; but if anyone kill a believer deliberately (with *'amd*) his reward is hell in which he shall remain for ever and Allāh wrathful against him and curse him and shall prepare a great punishment for him" (the true interpretation is undoubtedly this, that every Muslim who kills another Muslim with *'amd* is condemned to eternal hell-fire and that Allāh will not accept his repentance, a view which is ascribed to Ibn 'Abbās, Ibn Mas'ūd, Zaid b. Thābit and al-Dahhāk; the view held by 'Ikrima and others that the verse refers to the particular case of a *murtadd* who has killed a believer is not to be accepted; this is already a transition to the view that has finally prevailed, which tones down the literal wording of the passage, either by adding with Muḡjāhid "unless he repents" or by holding, as has become usual, that Allāh will not leave a Muslim eternally in hell, and can even remit entirely the threatened punishment of hell-fire; but this is only the result of speculation and combination with other passages in the *Qur'ān* [e.g. xi. 108—110; xxxix. 54] and is therefore to be rejected; iv. 33 sq. (from about the same time; similar to iv. 95); ix. 12 (probably dates from soon after the treaty of al-Hudaiyya; similar to xvii. 33).

There are further two passages, in which it is asserted that Allāh forbade the Jews to kill: ii. 78 sqq. (from about the first half of the year 2 A.H.) and v. 35 (probably of the year 6 or 7; according to Grimme, to be dated before the battle of Badr).

There are also a number of verses in which killing is not exactly forbidden but is more or less strongly deprecated and represented as a mark of the unbeliever, just as committing no murder is a sign of the believer, e.g. lxxxi. 8 sq. (first Mekkan period); ii. 28 (probably third Mekkan period; according to Grimme, Medinese, before the battle of Badr); vi. 138, 141; xvi. 61; xl. 26 (same time); viii. 30 (after the battle of Badr); v. 33 (shortly before the capture of Khaybar). In numerous passages in this connection the unbelievers are reproached with the slaying of prophets, e.g. ii. 58, 81, 85 (from the first half of the year 2); iv. 154 (after the outbreak of open war with the Jews of Medina); iii. 177, 180 (probably soon after the battle of Uhud); xx. 108 (shortly before the war with the Banu 'l-Naḡīr?); v. 74 (later Medina period).

2) Supplements to the *Qur'ān* passages from the *Sira*, accounts of the life of Muḡammad.

In the so-called ordinance of the community, which dates from the first Medina period, it is laid down that no believer may kill a believer on account of an unbeliever; in another passage it is said: "If anyone kill a believer and is convicted, then vengeance for bloodshed must be done, unless the *wali* of the man slain waive it". In all probability Muḥammad had in mind in the murderer a non-Muslim member of the community (Procksch, *op. cit.*, p. 71): this agrees with the development given above. In the *ba'ā*, the initiation into the community, the initiate had to pledge himself, among other things, not to commit an unlawful act of slaying (cf. *Qur'ān*, iv. 12). Once Muḥammad cursed a murderer (cf. the art. *ḲIṢṢ*). In the so-called first temple-speech (of the year 630), the genuineness of which is not absolutely certain, however, on every point and seems doubtful on this particular point, there appears the by no means exactly defined conception of *Ḳall shabah 'amd* (see below, sub 5c); Muḥammad is also said to have declared there that all blood-guilt attached to a Muslim dating from the period of paganism was to be cast off, which extends the corresponding passage of the ordinance of the community. Finally it is to be mentioned that the *Sira* knows of several cases of deliberate and of unpremeditated slaying; so far as they are liable to be punished, they are dealt with in the article *ḲIṢṢ*.

3) Comparison of the views of authoritative circles in the Muslim community in the older period as preserved in *Ḥadīth* (tradition). It is obvious that in the *Ḥadīth* also the slaying of a Muslim is strictly forbidden; by the adoption of Islām (and of monotheism at all) life and property are protected. The life and property of a Muslim are as inviolable (*ḥarām*) as the day of sacrifice in *Dhu 'l-Hijja* in the sacred territory of Mekka (al-Bukhārī, *Ḍiyāt*, bāb 8, etc.). All blood-guilt, which has weighed a man down from an earlier period, is thus wiped out by the adoption of Islām, even if the crime was committed just before conversion to Islām. Only if a Muslim kills another, or, to be more exact, if he commits a crime worthy of death, can he be slain. Everyone is perfectly agreed that killing with *'amd* is one of the deadliest sins (*kabā'ir*); it is usually considered the gravest sin, along with the *shirk* (polytheism; e.g. al-Bukhārī, *Ḍiyāt*, bāb 1, 2), whether it is asserted of killing with *'amd* in general or of the killing of new-born girls usual among the heathens. Therefore many *Ḥadīth*'s express disgust at killing; e.g. "the slaying of a Muslim is to Allāh like the cessation of the world"; or "the cessation of the world is even less to Allāh than this"; "if someone is killed in the east and another in the west approves of it, he is guilty of the person's blood"; "man is a work of Allāh; cursed be he who destroys Allāh's work". The first murder which introduced killing into the world is the subject of special condemnation: Cain is accessory to every later murder. Murder is punished in the next world as well as on earth; on the Day of Judgment cases of the shedding of innocent blood will be judged first. As to the punishment itself, a whole stratum of *ḥadīth*s reflects the already mentioned view of Ibn 'Abbās and others regarding the eternalness of punishment in hell for slaying with *'amd*; e.g. "whosoever sheds blood in an unlawful way, for him there exists no way of escape"; "whosoever contributes though only by a word to the slaying

of a Muslim must despair of the mercy of Allāh". In several passages the deliberate murder of a Muslim is considered equivalent to unbelief (*ḥadīth*s in which a warning is simply uttered against murder being a sign of the unbeliever are, of course, not dealt with here). It is even said: "if two Muslims attack one another with swords and one kills the other, both go to hell (unless it was a case of legitimate self-defence), the slayer for his deed and the slain because he wished to kill the other" (cf. e.g. al-Bukhārī, *Ḍiyāt*, bāb 2); and: "if all the inhabitants of heaven and earth together had killed someone they would all go to hell". In these two passages it is not exactly demonstrable that eternal punishment in hell is meant but it is very probable. In several of the traditions mentioned, Ibn 'Abbās appears as the authority. Such *ḥadīth*s were naturally rendered harmless by "interpretation" by the representatives of the other view, if they were not entirely suppressed, which did happen to not a few. Thus the description of deliberate murder as unbelief is sometimes interpreted to mean that it is a very grievous sin and sometimes taken as a reference to the refusal of the protection of Islāmic law, which occurs in both cases, to the life of the slayer or of the unbeliever. This was not found sufficient, however, but traditions were put into currency to prove the contrary, namely that Allāh would accept the repentance of a murderer, even if he had committed several murders; one of these traditions is provided with a grotesque story, the object of which is quite apparent, as corroboration. In one tradition the *kaffāra*, especially the liberation of a slave, is represented as a means to save the murderer from the merited punishment of hell, obviously by someone who demanded it even in case of *Ḳall* with *'amd* (see below sub 6a). It is even asserted in public controversy against the views of the other side that after the Day of Judgment no Muslim will go to hell and that, on the contrary, all sins will be forgiven them. — The killing of a *mu'āhad*, a non-Muslim under the protection of the Islāmic state, is threatened with punishment in the next world (e.g. al-Bukhārī, *Ḍiyāt*, bāb 30; al-Dārimī, *Siyar*, bāb 60; the *Qur'ān* is silent on the question); but, as might be expected, the view is very rarely expressed that this punishment is eternal. — The prohibition of suicide, which we do not find laid down in the *Qur'ān*, is given in the *Ḥadīth* and the suicide is threatened with eternal punishment in the next world.

As an appendix to the above we may briefly mention the connection of several kinds of animals with *Ḳall*, which is also dealt with in tradition. Muḥammad had, as is related, recommended the slaughter of dogs but later withdrew the order, although the dog always remained subject to certain exceptional regulations (cf. the art. *KALB*); the *sunna* further orders the killing of the *wazaḡh*, a kind of lizard, but if possible it should be done with one blow: on the other hand the killing of ants and of cats is forbidden (among the authorities for this last tradition is Abū Huraira); on the killing of snakes cf. Guillaume, *The Traditions of Islam*, p. 116 sq.

As regards the value of the traditions just quoted, the genuineness of none of them can be proved; while the falsity of those, which seek to save the murderer of a Muslim from hell, is

apparent, it is also probable of those which hold the contrary view.

4). The controversy regarding the punishment of the murderer of a Muslim centres round a passage in the *Kur'ān*, which in itself could and must form a foundation for it, and is in part at least independent and original. This controversy and the conception of *Katl* in general are, however, very closely connected with the disputes aroused by the *Khāridjīs*, *Kadārīs* and *Mu'tazilīs*; for details see these articles; here it is sufficient to recall the following questions: — "is the committing of deadly sins — and killing with 'amd is certainly one of them — unbelief?" "Does man create his own actions, including sins, himself, or do they happen through *kadar*?" "Can man by his intervention interfere with Allāh's decision, for example by killing another shorten the period predestined for the latter's life?" We have more than one example of these questions being applied to *katl*, and they have been cited in discussing *katl* (cf. e. g. Goldziher, *Vorlesungen über den Islām*¹, p. 98 sq.; sec. ed., p. 92 sq.). But the *Mu'tazilī* view of the eternalness of hell-punishment for him who commits a deadly sin and does not repent, is specially important in this connection; al-Zamakhsārī gives an explanation of the verse of the *Kur'ān* in question from this point of view. Finally the consensus of orthodox opinion agreed that the deliberate killing of a Muslim is certainly a deadly sin, but the slayer, on the other hand, if he repents and voluntarily submits to the punishment prescribed, will not be further punished in the next world and, even if he does not repent, will in no case remain in hell eternally (agreement was reached on this point even before the rise of the *Fikh*-schools; therefore there is no *ikhtilāf* of the *madhāhib* on this question); this view has found its way into all text-books of *Fikh* and of doctrine.

5) A statement of the prevailing *Ḥanafī* views on killing. *Katl* in the *Fikh* is the act of a man whereby the life of a fellow-man is brought to a close (the death need not immediately follow the act). It may be qualified by any of the five "legal categories": — duty or necessity (*wājib*), e. g. the killing of the *murtadd*; recommended (*mandūb*), e. g. when the *ghāzī* kills his unbelieving kinsmen if they insult Allāh or his Prophet; permitted (*mubāh*), e. g. when the *Imām* kills the unbelieving prisoner of war, in the case when the reasons for killing him exactly balance those for granting his life; killing in self-defence is also allowed i. e. in defending oneself against an illegal attack on one's life, person or property, in defending oneself or some one who comes to help, if the attack cannot otherwise be averted (on further questions there is *ikhtilāf*, also on the question whether a man who surprises another in adultery with his wife or endeavouring to see into his harem, and kills or mutilates him, is acting legitimately or not; one tradition on the subject is interpreted in different ways); disapproved (*makrūh*), e. g. when the *ghāzī* kills his unbelieving kinsmen without their having insulted Allāh or his Prophet; illegal and therefore forbidden (*ḥarām*).

Illegal killing as the result of actions in themselves legal may take place in five ways:

a) as 'amd, i. e. someone wilfully makes an-

other the direct object of an action in general fatal so that the other dies as a result; according to one view, the intention of killing is necessary for the conception of 'amd, which, however, is always presumed in the case of any act generally fatal in its result, which is illegally inflicted on another; so that, for example, any one, who strikes a blow at the hand of another with an instrument adapted in general for killing, but inadvertently hits his neck and kills him, *ceteris paribus* is unanimously regarded as equally guilty with the man who strikes another in the neck with the same instrument, wilfully intending to kill him and slays him: this killing is a sin (*ma'tham*) and in general is punished by *kiṣās*, or else the slayer is bound to pay the heavier *diya* and to lose any possible legacy from the deceased to himself;

b) as *khaṭ'* (or *khaṭa'*), i. e. there is no intention of committing an act illegally on the other as in the case of a), while the action itself is premeditated: two kinds are distinguished, according as the *khaṭ'* (mistake or misadventure) which shows that the killing is not wilful, is in the intention of the doer (*fi 'l-kaṣd*) or in the carrying out of the action (*fi 'l-fi'l*). The former is the case when someone treats another as a wild beast or a *ḥarbī*, (an infidel not enjoying the protection of the Islāmic state, against whom the *djihād* is to be waged) the killing of whom is not illegal, and kills him; the latter when someone unluckily hits another, while shooting at a target or at a *ḥarbī*, so that he dies, or strikes at the hand of another person but inadvertently hits the neck of a third person and kills him; this killing is not sin but brings with it (without *kiṣās*) the obligation upon the 'āqila of the killer to pay the smaller *diya* and to lose any claims to any inheritance from the deceased as in a); besides the obligation of the killer to perform the *kaffāra*;

c) as *shabah* (or *shibh*) 'amd = similar to 'amd, i. e. someone intentionally makes another the direct object of some action, not always but sometimes fatal, and death results. Actions which experience has shown not to be fatal at all are thus quite excluded, such as striking the hand with a reed pen; if anyone dies as a result of such an action as this, it is an unfortunate accident, which is not followed by any penal consequences. This killing is a sin and brings with it (without *kiṣās*) the obligation upon the 'āqila of the slayer to pay the heavier *diya* and to lose any possible inheritance from the deceased as in a), and in addition the slayer is bound to perform the *kaffāra*. This category only exists in cases where death actually results; in cases of bodily injury, which, by the way, are similarly classified, the action is regarded as 'amd;

d) as *djārī madjra* 'l-khaṭ' (or *mudjra madjra* 'l-khaṭ' or *kā'im maḳām al-khaṭ'*) "equivalent to *khaṭ'*," i. e. the factor of deliberation is lacking in the action (and also the intention of directing the action illegally against another) in the circumstance of b) and c), for example: someone falls upon another in his sleep or falls from a roof upon him and kills him; the legal results are the same as in b);

e) as *katl bi-sabab* "indirect killing," i. e. someone brings about the death of another without doing anything directly against him; e. g. he digs a well and someone falls into it and dies as the result; sometimes this category is treated as a subdivision

of *d*); but it is a matter of indifference, whether the act, which indirectly results in the death of another, is deliberate or not, intentional or unintentional, even if the action has been planned in some very cunning way such as setting a savage beast on another person with the intention of causing his death, it does not alter the situation. The legal consequences are in any case limited to the obligation upon the *ʿāqila* of the doer to pay the lighter *diya*; larger works on *Fikḥ* usually discuss very fully the question what acts are to be considered direct causes of death and which are *ḥatl bi-sabab* and in which there can be no question of a causing of death so that no legal consequences result.

Two cases are especially dealt with in the *Fikḥ* books: α) The causing of a premature birth or abortion and β) killing through giving false evidence.

α) If in causing an abortion or premature birth, the embryo — which must be sufficiently developed to be of human form — is brought into the world dead or dies after the birth or the mother dies, it is not a case for the application of *ḥiṣās*; there is in any case no *ḥatl ʿamd* in the mother whose killing is dealt with under the above rules and the embryo before completion of birth is legally not in full possession of its powers but is usually regarded as a limb of the mother. [Hence we have the following law: if the head of a child appears out of the mother's womb at birth and the child cries (and is therefore certainly alive) and then someone cuts off its head, it is not a case for *ḥiṣās* and only the punishment prescribed for producing an abortion is to be inflicted]. Different amounts are to be paid for the embryo according to the different cases and if it comes alive into the world and then dies the person who causes its death is liable to *kaffāra*; he also loses any inheritance that might have come to him.

β) If anyone is killed on evidence which shows that a crime deserving death has been committed and then the witnesses recall their evidence or in other ways it is proved that their testimony was false, *ḥiṣās* cannot be executed on the witness; the *diya* must be paid, the heavier if the false evidence was deliberately given, the lighter if otherwise.

6) We may add the following — taking only the most important points — to the above exposition of the Ḥanafī system, with reference to *ikhtilāf* (difference of opinion among the schools).

a) On *ʿamd*: the difference of opinion within the Ḥanafī school already mentioned, regarding the part of the intention to kill in *ʿamd* is also found outside the Ḥanafī school; among the Shāfiʿis the view which does not demand the existence of the intention to kill has become predominant, and the evidence for the other views is sometimes interpreted as meaning a presumption of intention. Abū Yūsuf and al-Shaibānī, in agreement with Mālik, al-Shāfiʿi and Aḥmad Ibn Ḥanbal, assume *ʿamd* if the action is as a rule fatal; Abū Ḥanīfa, on the other hand, limits it to the use of a weapon or of a thing which can be used like a weapon to cut off limbs; among such he includes fire; deliberate killing, for example with a large unsharpened stone, or a big stick, which in the ordinary way would kill, or by drowning in water, which would be generally regarded as of sufficient depth to do so, is therefore considered by the former as *ʿamd*, but by Abū Ḥanīfa as

ṣabab ʿamd, relying on a passage in the so-called first temple speech of Muḥammad, which the champions of the other view naturally interpret otherwise, and this view was later considered the better by the Ḥanafīs. The qualification of the various actions generally differs sometimes considerably and the Ḥanafīs often make use of *istiḥsān*, exercise of discretion. In the Mālikī and Ḥanafī view no *kaffāra* is to be performed for *ʿamd*; al-Shāfiʿi, on the other hand, demands it if the *ḥiṣās* is not executed and both views are given on the authority of Aḥmad Ibn Ḥanbal.

b) On *ḫaṭʾ*: that *ḫaṭʾ* is not a sin is more exactly explained to mean that it is neither permitted nor forbidden but that this killing is rather *fiʿl al-ghāfil*, "action of a thoughtless person", and is to be judged in the same way as the act of a mentally defective person or of an animal. Except in the Ḥanafī madhhab, categories *d*) and e) [sub 5] are not distinguished from *ḫaṭʾ*, which also was the earliest Ḥanafī view (*Z.D.M.G.*, lviii. 338) and *ḥatl bi-sabab* has generally the same legal consequences as *ḫaṭʾ*; we thus have three kinds of *ḥatl*: *ʿamd*, *ṣabab ʿamd* and *ḫaṭʾ*, of which *ṣabab ʿamd* is considered to be composed of *ʿamd* and *ḫaṭʾ*.

c) On *ṣabab ʿamd*: this category is also called *ʿamd ḫaṭʾ*, *ḫaṭʾ ʿamd* or *ḫaṭʾ ṣabab ʿamd*; in contrast to it, *ʿamd* is also called *ʿamd maḥd* and *ḫaṭʾ* also *ḫaṭʾ maḥd* (pure *ʿamd* or *ḫaṭʾ*); the application of *ḥiṣās* is said to be permissible by al-Shāfiʿi if the killer, for example, repeats the blow with an instrument not normally adapted for killing so frequently that the person attacked dies; the act is then considered *ʿamd*; one of the two opinions handed down on the authority of Abū Yūsuf and al-Shaibānī is to the same effect while the view that became predominant in the school was to the contrary. Mālik allows *ḥiṣās* in *ṣabab ʿamd* in general.

d) On *ḥatl bi-sabab*: Mālik, al-Shāfiʿi and Aḥmad Ibn Ḥanbal demand *kaffāra* in addition, if the placing of the cause of the death was illegal.

e) Different views also prevail as to the amount to be paid for the killing of an embryo.

f) On causing death through false witness: if the false evidence was deliberately given, according to al-Shāfiʿi and the better known opinion of Mālik, *ḥiṣās* can be executed on the witnesses.

7) Notes on the question of permission, request, compulsion and assistance in illegal killing. a) If someone kills another by his request or with his permission there is neither *ḥiṣās* nor obligation to pay *diya*.

b) No definite punishment is laid down for the case of a request to kill someone; such a request does not mean the exculpation of the slayer; only if the person requested is a minor or a slave claims may be made from the *ʿāqila* of the minor, or from the proprietor of the slave.

c) A forces B to kill C; then, according to Abū Ḥanīfa, the *ḥiṣās* is executed on A, according to Mālik and Aḥmad Ibn Ḥanbal on B; as to al-Shāfiʿi's view, there is no doubt that A is liable to *ḥiṣās*; as regards B both possible views are transmitted, of which the one that ultimately became predominant in the school makes him also liable to *ḥiṣās*. Mālik further makes A also liable to *ḥiṣās* if the compulsion comes from a person having authority, or from a master to a slave.

d) A holds B and C kills him while he is held; in this case Abū Ḥanīfa and al-Shāfiʿi make C liable to *ḥiṣās* and A to *taʿzīr*, which is more definitely defined as imprisonment. According to Mālik, both are to be regarded as culprits and therefore liable to *ḥiṣās* if the holding was necessary to facilitate the slaying and B was not able to escape after being held. Aḥmad Ibn Ḥanbal's opinion is given in two versions; according to the one, *ḥiṣās* is executed on C and A is punished with imprisonment for life, according to the second opinion, A and C are both liable to *ḥiṣās*.

II. Katl as punishment.

The punishment of death may be described quite generally as *katl*; in the following account cases in which it is applied are given seriatim; in contrast to *raḍm* and *ṣalb* (cf. below) *katl* is also used in the narrower sense of execution with the sword.

1) In the cases of illegal killing described in detail above, the nearest relative of the dead man, who in this capacity is called *walī al-dam*, is entitled to kill the culprit in retribution if certain definite conditions are fulfilled. This punishment is called *ḥiṣās* or *ḥawad*, names which also cover retribution exacted for wounds which are not fatal; for further information see the article *ḤIṢĀS*.

2) There are special regulations regarding sorcerers (*sāḥir*), about whom there are also various traditions. Mālik, al-Shāfiʿi and Aḥmad Ibn Ḥanbal recognise sorcery (*siḥr*) as an actual force. Abū Ḥanīfa disputes this, but there is a consensus of opinion that it is forbidden to study it; it is even described as unbelief (*kufʾ*) almost as a general rule. Mālik and Aḥmad Ibn Ḥanbal say that the sorcerer is to be killed with the sword simply for studying, teaching and practising magic; al-Shāfiʿi limits this punishment to the case in which someone has been killed by sorcery (i.e. he makes it a case for *ḥiṣās*, which in practice is only justified by the confession (*ikrār*) of the guilty person; while the punishment in Abū Ḥanīfa, Mālik and Aḥmad b. Ḥanbal is regarded as *ḥadd*); two different, more lenient views are credited to Abū Ḥanīfa. Opinions differ on particular questions, such as whether the conversion of the sorcerer effects a remission of the punishment, whether a woman is to be punished equally with a man, how sorcerers of the *Ahl al-Kitāb* are to be treated, how far soothsaying is to be considered sorcery.

3) The punishment of death by stoning (*raḍm*) — in certain circumstances also by the sword (*katl*) — occurs as *ḥadd* in certain cases of immorality; on this see the article *ZINĀ*.

4) Highway robbery (*kaf al-tarīk*) may also in certain circumstances be punished with death. The authority for this is *Qurʾān*, v. 37 sq. (from about the year 6 or 7, before the capture of Khaybar; Grimme puts the verse before the battle of Badr): "The punishment of those who fight against Allāh and His prophet and create ruin upon the earth is that they shall be slain or crucified or have their hands and feet cut off on the opposite sides or be banished from the country. This is their humiliation in this world and in the next world they shall be severely punished — unless they repent before ye have them in your power" It can be asserted with certainty that this refers to the unbelievers, very probably to the Jews; ruthless war is ordered to be waged on them and their repentance is the adoption of Islām. There are still traces of this

interpretation in the commentaries. But in general this passage is connected with Muḥammad's attitude to certain *murtadd*'s which will be dealt with in section 5); this cannot be correct, if only because the procedure there practised does not entirely conform to these rules, so that they were forced to restore harmony in a different fashion. Those *murtadd*'s were considered as highway robbers, from the point of view of the later definition rightly and only in this way could a law for the punishment of highway robbers be found in the *Qurʾān*.

The more important laws of the *Sharʿa* are the following. Only such persons as are adults in full possession of their faculties and who are able to be dangerous to travellers are to be considered highway robbers. According to Abū Ḥanīfa, highway robbery can only take place in the open country, according to Mālik, al-Shāfiʿi and Aḥmad Ibn Ḥanbal in the town also. Mālik gives the Imām — and this is certainly the correct interpretation of the passage in the *Qurʾān*, which is also found in the commentaries — absolute freedom in the choice of punishment, even in the contingency of a cumulative application, whatever form the robbery may have taken; but if the person concerned has killed someone (in this connection killing implies a murder to which *ḥiṣās* might be applied), he must at least be executed with the sword. The three other Imāms grade the punishment to fit the different forms of robbery on the highway; according to Abū Ḥanīfa, the criminal is put to death if he has caused the death of his victim; if he has also robbed him (and in such a way, it must always be understood, that the *ḥadd* for theft can be carried out; cf. the art. *SĀRIK*), he may be further punished by cutting off his hands and feet on alternate sides and with crucifixion (*ṣalb*) which in that case takes the place of killing with the sword; if he has only committed a robbery, we have only the cutting off of hands and feet on alternate sides; according to al-Shāfiʿi and Aḥmad b. Ḥanbal, he is killed, if he has killed his victim; if he has also committed a robbery, he is crucified after being put to death; if he has only committed a murder, he is punished by cutting off his hands and feet on alternate sides; if he has only made the neighbourhood unsafe, then, according to Abū Ḥanīfa, al-Shāfiʿi and Aḥmad b. Ḥanbal, he is put in prison; whether this must be done in another place is a debated point. In Abū Ḥanīfa and Mālik (also in some Shāfiʿi's but their view is rejected by the school) crucifixion consists in the criminal being tied alive to a cross or a tree and his body ripped up with a spear so that he dies, and this is certainly the more original form; according to al-Shāfiʿi and Aḥmad b. Ḥanbal, he is first killed with a sword and then his corpse is ignominiously exposed on a tree or cross. All these punishments are *ḥadd* and a right of Allāh; therefore any renunciation by the *walī al-dam* of the *ḥiṣās* is of no avail even though it is he who has the right to carry out the *katl*. If the criminal repents before he falls into the hands of the authorities (what exactly is meant by repentance is disputed) these *ḥadd* punishments are dropped; but claims by individuals to *ḥiṣās* etc. can still be enforced against him.

5) The *murtadd*, that is the renegade from Islām, is liable to the death-penalty if his apostasy is proved. If we leave out the passages dealing with the *munāfiq*'s [q.v.] who are separately dealt with — their execution is, however, described under

certain conditions in Ḳur'ān, iv. 91 — there is no such law in the Ḳur'ān referring specially to the *murtadd*, although xvi. 108 (third Mekkan period), ii. 214 (of the year 2), iii. 80—84 (Medina; placed by Grimmé shortly before or after the battle of Uhūd), 102 (soon after the battle of Uhūd), iv. 136 (of the same period) threaten the eternal punishment of hell for all those who apostacise from Islām and do not repent, as well as for all unbelievers, and in iii. 95 sq., 142, and ix. 67, a warning against apostacy is uttered. Among the traditions we find in various forms the story that Muḥammad, contrary to the rules of the Shari'a, cruelly mutilated and killed some *murtadd*'s, who had killed one or more of his herdsmen and driven away the camels, but the tradition is probably correct just for this reason. This contradiction was felt and an endeavour was made in the ḥadīth's to justify the cruelty of the punishment, and even the text was altered. Of 'Alī also a cruel act, of another kind, however, is recorded in a similar case, but Ibn 'Abbās is said to have protested against it. Two *murtadd*'s, each of whom had killed a Muslim, were executed by Muḥammad's orders after the capture of Mekka; a third man, against whom there was nothing but his apostacy, was also placed on the list of the proscribed; his foster-brother 'Uthmān, however, obtained security (*amān*) for him although Muḥammad would gladly have seen someone kill him before immunity was granted; he later became a Muslim again. There is also a saying of Muḥammad's: "Slay anyone, who changes his religion" or "He who secedes from you shall die", and others similar, e. g. that the blood of a Muslim could only be shed for apostacy, *zinā* and *ḳatl 'amd*; there is also a story that Mu'adh b. Ḍjabal killed a *murtadd* because Allāh and His Prophet had so ordained; Muḥammad is also said to have ordered that conversion should first of all be attempted and a period of three days allowed for this; but all this can hardly be genuine. There are also the traditions regarding the *Ahl al-Ridda* (cf. the art. RIDDA) who refused the *zakāt* and were treated as apostates by Abū Bakr. The tradition "He who is a good Muslim will not be punished for his sins from the pagan period but he who is a bad Muslim will have them counted against him" does not refer to the *murtadd*, as it is usually said to do.

The punishment of death laid down by the *shari'a* for the *murtadd* is sometimes described as *ḥadd*, sometimes not; in the latter view he is simply killed as an unbeliever (*kāfir*) and the punishment need not be carried out in every individual case. Only an adult in full possession of his faculties and not acting under compulsion can become an apostate from Islām; opinions are divided regarding a man who apostacises while intoxicated or a minor (on the verge of his majority) capable of discernment (*murāḳib, mumayyis*). There is also difference of opinion regarding the attempt at conversion and the granting of a period, usually fixed at three days, for reflection. If the *murtadd* does not repent, he is to be beheaded with the sword; torture and cruel methods of execution are forbidden. According to al-Shāfi'i, his punishment is left to his owner, if he is a slave. Abū Ḥanifa and his school limit the punishment of death to male apostates and the consensus of opinion excludes the minor; a woman (and

also a minor) is imprisoned and beaten every three days till she repents; according to Abū Ḥanifa (contrary to Abū Yūsuf and al-Shaibānī) she may also be made a slave and this is recognised as right by the school. Anyone who puts to death a *murtadd* of whatever kind without powers granted by the authority, is generally liable not to *ḳiṣās*, but only to *ta'zir*. The same rules generally hold for repeated apostacy.

Similar to the punishment of the *murtadd* is that of the *zindīk*, i. e. anyone who, professing to be a Muslim, is really an unbeliever or any who belongs to no religion (cf. Massignon, *Al-Hallaḳ*, i. 186 sqq.). The conversion of a non-Muslim to another non-Muslim religion is similarly dealt with, although such an one is not called *murtadd*. He can only escape punishment by adopting Islām; on the whole of this cf. Goldziher, *Muhammedanische Studien*, ii. 215 sq.

How exactly one becomes an unbeliever and therefore a *murtadd* is disputed in particulars, especially the question how far this is the case with irreverent utterances regarding Allāh or one of His prophets; there are various special enactments regarding the latter, which threaten the death penalty to non-Muslims and in part allow a Muslim no remission of punishment if he recalls the words.

For further information see the article MURTADD.

(6) There is no law in the Ḳur'ān for dealing with a man who omits the *ṣalāt* (ritual prayer) (*ṭarik al-ṣalāt*), where its performance is, on the other hand, often strictly enjoined, and not a single unequivocal ḥadīth on the subject can be found — quite apart from any question of genuineness. The *Shari'a* lays down the law as follows: — Anyone who does not perform the *ṣalāt*, as in duty bound, without denying its obligatoriness (anyone who does this is *murtadd*) and has no — even invalid — excuse for this, according to Mālik, al-Shāfi'i and the more popular of the two views credited to Aḥmad b. Ḥanbal, if he does not atone, i. e. makes good his omission and says he will never commit the fault again, is to be executed with the sword. This punishment is also sometimes described as *ḥadd*. According to Abū Ḥanifa, the culprit is imprisoned till he again performs the *ṣalāt*. In all these views he is considered a Muslim, while the other view attributed to Aḥmad b. Ḥanbal deals with him entirely as an unbeliever, i. e. a *murtadd*; but these regulations are modelled on those for apostacy (cf. the remarks on the *Ahl al-Ridda* above).

There are two more cases in which the suppression (*ḳiṭāl*) of the enemies of orthodox Islām is prescribed; killing, of course, plays the main part and therefore we must discuss this aspect of the process here.

(7) Firstly, the fighting of the *bughāt* is prescribed. It is said in Ḳur'ān, xlix. 9 (late Medina period): "If two parties of the believers contend with one another, make peace between them; but if one oppresses the other (*bughat* — from which *bughāt* is the plural of the participle), fight against the party which oppresses until they again obey Allāh's command; and if they do this, make peace between them with equity and act with justice" (this refers to a quarrel among the *anṣār*). Oppression is often forbidden and disapproved of elsewhere. But Muḥammad at any rate did not know the later conception of *bughāt*, although

its development begins at a point closely connected with this. Some traditions on the *bughāt* are in agreement with the legal enactments.

The *Sharī'a* understands by *bughāt* sectarianising Muslims who reject the authority of the Imām, are able-bodied, so that they might offer resistance, and justify their attitude, although erroneously, with their dogmatic conviction (they are to be distinguished from highway robbers, for example — individual *bughāt*, who are guilty of breaches of the law are punished like them —, on the one hand, and unbelievers on the other). If they do not attack the orthodox community, they need not be attacked; otherwise their suppression is a duty of the Imām (the head of the Islāmic community) and a *fard al-kifāya* for the Muslims (cf. the art. *FARD*). This punishment is also sometimes called *ḥadd*. In general the rule is that only participants in the actual battle can be killed during the fighting. Fugitives, wounded, those who surrender and prisoners, as well as women and children, cannot be put to death. According to Abū Ḥanīfa, the Imām may kill a prisoner if he knows that he would again join the *bughāt* if spared; according to him, a captured slave who has been fighting by the side of his master can also be killed.

(8) Regarding the *Ḍijhād* see that article; there are also traditions regarding the following regulations. If the unbelievers with whom war is being waged are not among those from whom the *ḍizya* can be taken — who exactly those are is a matter in dispute — the men are killed, if they do not adopt Islām and the women and children enslaved. If, on the other hand, they refuse Islām and will not pay the *ḍizya*, they are to be fought. All able-bodied men can be killed so long as they are not taken prisoners; men incapable of bearing arms, as well as women and children, cannot in general be so dealt with unless they take part in the fighting or assist in it in some way; they are to be taken prisoners and enslaved. The free, able-bodied prisoners may be (a) executed with the sword if they will not now adopt Islām; (b) made slaves; (c) exchanged for Muslim prisoners; (d) ransomed; (e) or set free without a ransom being paid (in all these cases by the Imām). Anyone who kills a prisoner without authority is only punished with *ta'zir*.

Every unbeliever who does not pay the *ḍizya* or does not belong to a people which has a treaty with the Muslim community or is not a *musta'min* (on these cf. the art. *KIṢĀS*) is *ḥalāl al-dam* (to be killed with impunity) and may at any time be killed by any Muslim without his being liable to *kiṣās* or to pay any *diya* or perform *kaffāra*. This enactment is only the natural consequence of the *Ḍijhād* law and Muḥammad himself not infrequently made use of it.

(9) The views of the Shī'īs on all the points dealt with above agree almost entirely with one or other of the Sunni views. It would take up too much space to deal with them in a similar fashion.

(10) The infliction and execution of the death penalty was in practice very often in strong contradiction to the regulations laid down in the *Sharī'a* (cf. the art. *ADHĀB*; Snouck Hurgronje, *Verspreide Geschriften*, ii. 200, etc.). The historians afford many examples for the actual practice and so do accounts of European travellers; on the conditions in the empire of the caliphs in the tenth

century see Mcz, *Die Renaissance des Islāms*, p. 347 sqq., also Massignou, *Al-Hallaj*, i., especially p. 220 sqq., 292 sqq.; on those in Egypt in the first half of the nineteenth century see Lane, *Manners and Customs of the Modern Egyptians*, end of the chapter on *Religion and Law*; on those in Persia in the same period see Polak, *Persien*, i. 328 sq.; on those in the Ottoman empire of the eighteenth century see Mouradega d'Ohsson, *Tableau Général de l'Empire Ottoman*, especially vol. vi. (1824), p. 244 sqq.; for Turkey the *Kānūnnāme's* are also useful (cf. *Mitteilungen zur osmanischen Geschichte*, i. 13 sqq.); among the published sources quoted there are of special importance: Digeon, ii. 245, 262; v. Hammer, *Staatsverfassung*, i. 125, 133, 143—150; T. O. E. M., iii. (1328), Appendix i. 27 sq., ii. 1—4, 7, 9; M. T. M., i./ii. 341 sq.) and from the *Kānūnnāme* itself (edited there; p. 19—21, 32—34).

Bibliography: The *Fikḥ*-books, the works given in the article 'ADHĀB, especially Juynboll, *Handbuch des islāmischen Gesetzes*, p. 284—309, and the literature there given; the articles MURDER and EXECUTION in T. P. Hughes, *A Dictionary of Islam*. Besides the articles already referred to, the article 'ADHĀB and those dealing with the Arabic expressions not explained above should be consulted. (J. SCHACHT)

KAṬRĀN B. MANŠÜR, a Persian poet. 'Awfi calls him Kaṭrān al-'Aḍudī al-Tabrizī; according to Dawlatshāh, he was born in Tirmidh. Others say he was born in Djabal-i Dailam; Djabāl is also found as his *nisba*. Dawlatshāh says that he spent some time in Balkh and later lived in the 'Irāk. The period of his literary activity lies about the middle of the eleventh century A. D. Nāsir-i Khusraw mentions in the *Safarnāma* that he met Kaṭrān in Tabriz in 438 (1046); a well-known poem by Kaṭrān commemorates the earthquake in Tabriz in 434 (1042/43). According to a *tadhkira* quoted in Rieu, *Supplement*, p. 140, our poet died in 465 (1072). He was the panegyrist of the rulers of Dailam and of Ādharbaidjān; among his patrons are mentioned the Amirs Fadlūn, Wahsūdān, Abū Naṣr Mamlān b. Wahsūdān, who was appointed over a part of Ādharbaidjān by the Saldjūk Sultān in 450, and Muḥammad b. Kumādī (according to Dawlatshāh, governor of Balkh and Sandjar; if this is correct he long survived the poet) and further the Būyid 'Aḍud al-Dawla, as is indicated by the epithet 'Aḍudī given by 'Awfi.

Works. Kaṭrān left a *Diwān* (manuscripts of which are found in European collections) and a *mathnawī* called *Ḳaws-nāma*. The poems of Kaṭrān are sometimes wrongly attributed to Rūdāgī in manuscripts; the confusion is caused by the similarity of names of their respective patrons (Naṣr b. Aḥmad the Sāmānid in the case of Rūdāgī and Abū Naṣr Mamlān in the case of Kaṭrān). On this question cf. Rūdāgī and Pseudo-Rūdāgī by E. Denison Ross in *J.A.R.S.*, 1924, p. 609 sqq. Criticisms on the poetry of Kaṭrān are given by Nāsir-i Khusraw and Waṭwāt. The former says, curiously enough, that Kaṭrān did not know Persian well but otherwise was a good poet; Waṭwāt (in Dawlatshāh) places him very high and allots him a special position with regard to the other poets. 'Awfi's verdict on Kaṭrān means very little for us, as this author regularly introduces each of his biographies of poets (if we may so call his inflated empty prose) with a rhetorical eulogy of the person

in question. But he is at least to the point when he says that Kaṭrān was fond of rhetorical artifices and particularly of the kind called *taḍjīs* (cf. Ibn Kaïs al-Rāzī (*Muḍjam*, Gibb Mem. Ser., x. 309 sqq.). The only quotation from Kaṭrān given in Ibn Kaïs's manual of poetics (p. 312) is quoted to illustrate one of the varieties of *taḍjīs* (*taḍjīs-i nākiḥ*). On Kaṭrān's skill in managing the more difficult poetic forms cf. also Dawlatshāh, p. 67, 14 sq.

Although the *Diwān* is not yet published one can form a fair opinion of the skill of the poet from what is in print. A few *ḥaṣīda*'s and fragments of *ḥaṣīda*'s are given in Schefer, *Chrestomathie Persane*, ii. 240 sqq.; others in Browne's edition of 'Awfi's *Lubāb al-Albāb* (ii. 214 sqq.). All that is given in Dawlatshāh (ed. Browne, p. 67 sq.) is also found in 'Awfi, only Dawlatshāh gives much less and has a few unimportant variants. The oft occurring substitution of Arabic terms for the rarer Persian words is also found in him; thus the less well known *shamar* (= pond; 'Awfi, ii. 215, 10) becomes in Dawlatshāh (p. 68, 1) *thamar* and the verse is, of course, nonsense (or it may be that we have simply a copyist's mistake). It may be assumed that Dawlatshāh, as far as the poems are concerned, simply copied 'Awfi.

In the poems printed in Schefer, rhetorical artifices are not more used than in the other panegyricists, for example Minuḥīrī or Azrakī; we find among other figures *Tabyīn wa-Tafsīr*, p. 245 paenult., p. 246, 6 sq., *muwāzana*, p. 246, 1. These poems have something in common with the old panegyrics; the three fragments of *ḥaṣīda*'s describing spring, autumn and winter, contain themes already known from Minuḥīrī, such as the comparison of wine-grapes with persons, namely negroes and Rūmī's, while Minuḥīrī compares them with little girls.

Kaṭrān gives more prominence to the epic element in his panegyrics than do his predecessors. The first poem in Schefer (ii. 240) is noteworthy in this respect; its *madḥ* commemorates a victory of the Amīrs Wahsūdān and Mamlān, and the often quoted song (p. 243) to Mamlān, the *taḥṣīb* of which contains the description of the earthquake which demolished the town of Tabriz in 434 (1042), is equally noteworthy; this description is in this case the main thing. The fragments in 'Awfi are obviously chosen to illustrate the use of *taḍjīs* by the poet, which is discussed in the prose notice of Kaṭrān by this author. The *taḍjīs* found here is almost exclusively the *taḍjīs-i muzdawidj* (Ibn Kaïs, p. 313); the *taḍjīs-i nākiḥ* (cf. Ibn Kaïs, p. 312) is also found (p. 214, 14: *gilaūr gulzār*) and *taḥrīr* (cf. Ibn Kaïs, p. 315) in the second part of the distich ('Awfi, ii. 214, 21). The rhetorical effect achieved by means of homonyms (*taḍjīs-i tāmm*; cf. Ibn Kaïs, p. 309), of course, occurs, e. g. 'Awfi, ii. 216, 9—11, where the word *tir* is repeated four times each time with a different meaning. In contents these fragments offer nothing new or noteworthy.

The prominence deliberately given to the narrative element in the court-lyric may be an innovation of Kaṭrān's own. That his lead was followed is shown by Dawlatshāh, who not only calls Anwarī a pupil of Kaṭrān's but also mentions others (Rashīdī, Rūhī, etc.) and "most poets of Balkh and Transoxiana".

AL-KATTĀNĪ, MUḤAMMAD B. DĪ'FAR B. IDRĪS, a member of the important family of the Kattāniyin and Sharīf in origin, a contemporary Moroccan writer (he was still writing in 1314 A.H.). He is the author of a number of works including a book in honour of his ancestor Idriṣ (*al-Azhār al-Ātirat al-Anfās bi-dhikr ba'd Maḥāsin Kuṭb al-Maghrib*, Fās 1314 A.H.). The most important is his *Ṣalwat al-Anfās wa-Muḥādathat al-Akyās mimman ukhbra fi 'l-'Ulamā' wa-'l-Ṣulahā' bi-Fās* (3 vols., Fās 1316 = 1898—99). The first part of this book is devoted to showing the merit which is acquired by visiting *zāwiya*'s and tombs of saints. He then proceeds to give, quarter by quarter, the illustrious men who have lived in Fās or are buried there and this part of the book contains valuable information on the historical topography of the town. He consulted a considerable number of books a list of which he gives at the end of the third volume. We know no details of his life, not even the date of his birth.

Basset, *Recherches bibliographiques sur les sources de la Salwat al-Anfās*, Algiers 1905; Codera y Zaidin, *Considerable numero de libros antiguos y modernos existentes in Marruecos*, *Actes du XIVe Congrès international des Orientalistes* (Algiers), iii/ii., Paris 1908, p. 587—590.

(RENÉ BASSET)

KAWĀLA (also Cavalla), a seaport on the Aegean Sea, opposite the island of Thasos on the boundary between Macedonia and Thrace. In ancient times Neapolis lay here, the port of the town of Philippi, just as Kawāla is now the harbour for the district of Drama. The town is partly built on a promontory which is still surrounded by walls which date from the middle ages; there is a harbour on both sides. An aqueduct has also survived from the middle ages. Kawāla was captured by the Turks from the Byzantines in the reign of Murād I, who conquered Thrace. Murād had sent the sandjak-bey Deli Balban to besiege Seres; soon afterwards he sent Lala Shāhin to assist him; the latter then captured Kawāla, Drama and Seres. This event is usually placed in the year 775 (1373/74) (Sa'd al-Dīn, *Tadh al-Tawārikh*, Constantinople 1279, i. 91, and von Hammer, *G.O.R.*, i. 181, whose statements are inaccurate in other respects); the anonymous chronicler, ed. Giese, p. 26, on the other hand, gives the date 787 (1385/86). He adds that nomads from Sarukhan were then settled here and in the Vardar plain. Not much more is heard of Kawāla in Turkish history; Sulaimān I fortified it before beginning his campaign against Rhodes. The population probably always remained predominantly Greek. Muḥammad 'Alī, the Egyptian Khedive, was probably born here; at any rate he lived here in his youth (born about 1769; Dj. Zaidān, *Mashāhīr al-Shurk*, Cairo 1910, i. 1). Muḥammad 'Alī later endowed the town with a school (Muḥendis-khāne) and other foundations, for the upkeep of which he set aside the revenues of the island of Thasos.

In the sixteenth century Kawāla attained great importance as an exporting harbour and the main depot for the tobacco grown in the neighbourhood and in the whole hinterland (Drama, Seres and Xanthi). In the years before 1912 this brought the Turkish Tobacco Regie an annual profit of over 10 million francs; the tobacco is for the most part manufactured in Kawāla and every year 5,000—6,000 people from the surrounding country come into the town for five months for this work. This is probably why the figures given for the population differ so much (cf. e.g. Sāmi, *Kāmūs al-A'lām*, v. 3704). According to an accurate calculation, before the Balkan war there were 17,000 Greeks, 13,000 Turks, 1800 Jews and 800 Bulgarians in Kawāla (Nicolaidēs, *Griechenlands Anteil an den Balkankriegen*, Vienna and Leipzig 1914, p. 222). The town at that time was the capital of a qaḍā of the same name in the sandjak of Drama in the wilāyet of Salonika.

The treaty of San Stefano (March 13, 1878) had already given Kawāla to Bulgaria. In the first Balkan war the town fell into the hands of the Bulgarians (Nov., 1912) but in the second Balkan war it was taken by the Greek fleet (July, 1913) and finally incorporated in Greece by the peace of Bucharest (Aug. 10, 1913) in spite of Bulgaria's protests (Nicolaidēs, *op. cit.*, p. 367 sqq.). Since then many Greeks have migrated thither from Xanthi and the number of Turks in the population must have been considerably reduced.

(J. H. KRAMERS)

KAWĀR, a group of oases situated in the Sahara (Bilma, the most southern oasis, is in 18° 41' N. Lat. and 13° E. Long.), to the west of the massif of Tibesti on the caravan route from Tripoli to the country round Tchad via Fezzān [q.v.]. On this route Kawār is nearly halfway between Fezzān and Kanem, separated from the former by a ḥammāda and from the latter by a region of sand-dunes. It owes its formation to a continuous chain of cliffs running from north to south, which bounding it on the east shelters it from the dreaded winds from the north-east. It is a couloir of oases, about 50 miles long from north to south and never more than 2 to 3 miles broad. The water is at no depth and fairly abundant but usually brackish. In all the oases together there are about 100,000 palm-trees; the inhabitants, whose number does not exceed 3 or 4,000, are Tubu by race, considerably mixed with Kanūri blood (the common language is Kanūri); they are sedentary and peace-loving, unlike their kinsmen who live in Tibesti. They are scattered up and down in a dozen villages of which the chief are Anai, Ashnuna, Dirku and Bilma; these villages consist of wretched huts but beside each one on a cliff inaccessible except by ladders a place of refuge is prepared, a precaution which until quite recently was far from being unnecessary. The inhabitants live on the produce of their palm-trees, the poor crops which they raise and particularly by trading. The caravan route from Tripoli to Tchad via Fezzān, although hard, is the shortest of those that cross the Sahara; it was at one time very busy and Kawār was the place where it was joined by the roads from Zinder and Agadès; its inhabitants were destined to become caravan-men. But their principal revenue came from their salt-pans. Those of Bilma are especially famous. The salt which the waters

bring to the surface of the soil is treated by evaporation and pressed into cakes of great purity. Some is sold to the Tuaregs who come to buy it on the spot along with dates; the remainder is exported to all quarters of the Sūdān from the Niger to Dārūr. The salt-pans of Kawār are of the same importance for the country as those of Taodeni for the region of Timbuktu and the western Sahara.

The history of Kawār is very obscure. The caravan route on which it lies was already in use in ancient times although we have no formal evidence of this. In any case this group of oases was already in existence at the time of the conquest of North Africa, if we may rely on the stories of the Arab historians who attribute its conquest to the legendary hero of the conquest, 'Ukba b. Nāf'. He is said to have taken the castles of Kawār one after the other. Al-Idrisī, in the twelfth century, several times mentions the importance of the trade through these regions. He mentions inexhaustible mines of alum; there must be some confusion with the salt-deposits. It seems that at this time Kawār was under independent local chiefs. Later when the kings of Kanem extended their authority over Fezzān, they certainly held Kawār; this is the situation described by Ibn Khaldūn following Ibn Sa'īd; for the rest, local traditions seem to preserve the memory of migrations from the south. It is certain that a strong power at one or other extremity of the caravan route would try to control the whole route.

In the sixteenth century, Kawār was visited by several European travellers; first in January, 1823, by the Denham, Clapperton and Oudney expedition and then by Vogel, Barth, Rohlf and Nachtigal and lastly by Monteil. In the closing years of last century Kawār was in a somewhat wretched condition. It was under the nominal authority of a chief (*maʾ*) elected by the notables; in reality each village ruled itself. Kawār had been seriously affected by the general decline of trade in the Sahara; it was still more affected when the French occupation of the Tchad region put an end to the slave-trade, the principal source of business. The inhabitants paid tribute, apparently to the Tuaregs; they were nevertheless plundered and blackmailed by them and raided by the Tubu and Awlād Sīmān. The Kawār then became the centre of political aspirations. The Sanūsīya had had a zāwiya there for quite a long time; it was a necessary station for them when they were endeavouring to extend their influence in the countries of Central Africa and when the Sanūsī Shaikh dreamed of creating a regular principality bounded by the two sides of the Sahara. The Turks also tried to make their authority recognised in the Kawār as they tried to do at Djanet and in Tibesti. The occupation of the Kawār by French troops from the Tchad region in July, 1906, and the establishment of a permanent post there put an end to these efforts, at the same time giving the inhabitants of this group of oases effective protection from the exactions of their turbulent neighbours.

(HENRI BASSET)

KĀWĪN (p.), marriage, dowry, see MAHR, NIKĀH.

KAWKAB, star, in Arabic astronomy the general term for a luminous heavenly body. The five planets known to the Arabs (Mercury to Saturn) were called *al-kawākib al-khamsa* (*al-muṭahayyira*). The general term for the sun, moon and the five planets is *al-kawākib al-djūriya* or *al-kawākib al-saiyāra* (i.e. the moving stars), in contrast to the fixed stars (*al-kawākib al-thābita*). The name *kawkab shamālī* is applied to the star α of the Little Bear, which is nearest the north pole of the heavens. In al-Bīrūnī it is called *ṭarf al-dhanab wa-huwa dīdy al-kibla* (= tip of the tail, i.e. the little goat [for ascertaining] the kibla). This presupposes that from a knowledge of the north pole (direction of north) one can ascertain the diametrically opposite south, which is identical with the direction of the kibla (*samt al-kibla*). This method of ascertaining the kibla is only correct in regions which lie approximately north of Mekka (cf. Reinaud's note in his introduction to *Geographie d'Aboulfida*, p. cxv: „Or, la Mecque est au midi de la Syrie ainsi que d'une partie de la Mesopotamie et de l'Égypte (!), le mot Kiblah est devenue pour les musulmans de ces contrées, le synonyme de midi et il a été employé ailleurs avec la même acception"). Finally it may be mentioned that the stars α, β and γ of Cepheus were, according to Ulugh Beg, also called *kawākib al-firk*, i.e. stars of the flock (of sheep).

A catalogue of fixed stars, of which the Arab astronomers had several, is called *Djāwal al-kawākib*.

Bibliography: al-Bīrūnī, *al-Kānūn al-Mas'ūdī*, Berl. arab. Mscr. 80 275, p. 194^a; L. Ideler, *Untersuchungen über den Ursprung und die Bedeutung der Sternnamen*, Berlin 1809, p. 3 and 44. On the Kibla cf. C. Schoy, *Abhandlung von al-Hasan ibn al-Hasan ibn al-Haitam (Al-hazen) über die Bestimmung der Richtung der Qibla* (Z. D. M. G., 1921, p. 252—254); do., *Abhandlung von al-Faḍl b. Ḥatīm an-Nairizī über die Richtung der Qibla* (Arab. Hdschr. N^o. 2457, 17^o der Bibl. nat. in Paris) in the S. B. Bayr. Ak., math.-phys. Kl., 1922, p. 55—68; do., *Gnomonik der Araber*, Berlin 1923, p. 33—44.

(C. SCHOY)

KAWKABĀN, the name of several places in South Arabia.

1) The name of a sanctum mentioned in the inscription Halévy N^o. 686, 3—4, copied from a building in 'Aden by J. Halévy (*mihrabān Kawkabān*). Cf. also F. Hommel, *Grundriss der Geographie und Geschichte des alten Orients*, ii., Leipzig 1925, p. 707.

2) The name of a castle near Zafār north of Nā'at. It was called Kawkabān, the two stars, i.e. star-castle, because it was adorned with silver stripes outside, the roof was covered with white slabs of stone, the interior panelled with cypress wood and paved with mosaic, different gems, onyx and corundum, which shone like stars at night. This marvellous building was naturally ascribed to the Djinn. This castle is perhaps also mentioned in the inscription Glaser N^o. 238, 3 (*Bait wa-Kawkabān*), which comes from Bait Ghufir in the vicinity. The castle is said to be still standing.

3) A little village on a great cliff on the right side of the Wādī Salāma, N. E. of Ḥadja and called Kawkabān-Ḥadja to distinguish it from other places of the same name.

4) Capital of the province of the same name, N.W. of Saṇ'a'. The town of Kawkabān lies at a height of 8,750 feet above sea-level in 15° 31' 42" N. Lat. on the southern part of the ridge which begins about half a mile S. E. of the town of Kawkabān at the left towards 'Awila and runs S. E. to N. W. for several hours' journey. It is part of the great Maṣāna'a plateau and is called Djabal Dula'. The south-eastern part of the range, the especially precipitous part, is separated from the main massif by an almost straight ravine, the Wādī Nabḥān, which runs from Shibām past the one gate of the town of Kawkabān (Bāb al-Ḥadid) to the Wādī Na'im west of the Djabal Kawkabān. Two roads run over this mountain, cut off only by the ravine of the Wādī Nabḥān, the one through the town of Shibām, following the very deep ravine of Nabḥān which is bridged over, an old winding narrow path of steps hewn out of the rock, and the second, an easier one, running in the Kā'a Dula' and crossing a bridge over the Wādī Nabḥān just before reaching the Bāb al-Ḥadid. The town of Kawkabān stretches from the Bāb al-Ḥadid to the S. E. and runs quite close to the eastern slope of the cliff all along that side. This part seems to be the oldest. Not very far from the gate on the great open square in the centre of the town (in the northern part) is a double wall for the most part now in ruins. Between the two walls a great number of skilfully walled pits have been cut out of the ground, which served as granaries for the old inhabitants. Similar granaries, but of more recent date, are to be found in the southern part and outside the town. The town itself consists of a large number of excellently built houses of red stone the architectural effect of which is often striking; the doors of the houses are often ornamented with fine iron work. The houses of the former Imāms now for the most part decayed or shot to pieces are particularly striking with their splendid façades. Besides the principal mosque with minaret, the only one in the town, there are seven small mosques. The water supply is provided from two huge and finely built reservoirs; the one, called Mu'allā, lies in the south, exceedingly deep and enclosed on the west side by a wall 60 to 80 feet high. The second, to the east of it, begun but not quite finished by Saiyid 'Abd al-Karīm about 1840, is called Barik al-Ziyādī. There are also four smaller cisterns. This water-supply would suffice for a town three times the size of Kawkabān. The Jewish quarter lies E. S. E. outside the town but consists almost entirely of low stone houses with little windows and doors.

A stone bridge with huge arches led across the Wādī Nabhān to the Bāb al-Ḥadīd but it was blown up by the Arabs in 1872.

Kawkabān is an ancient city dating from the Ḥimyar period, as inscriptions found there show. Al-Ḥamdānī mentions a stronghold of Kawkabān on the summit of the Djabal Dhukhār which is certainly identical with the old town of the modern Kawkabān. In troubled times its strength made it a desirable place of refuge — in 1569 the Turks besieged the stronghold in vain — and for centuries Kawkabān has been important as a capital and residence of the Imāms of the principality of the same name. The latter comprised in addition to Kawkabān the towns of Shibām, Ḥadja, Ṭawīla, the *Khābt* Mirwāḥ (between Kawkabān and Ḥarrāz), the lands of Miswar, Sarīf, Ḥofās, Milhān, Aḥdjir, 'Arūs, Banū Khayyāt, al-Shahdhiya Lā'a, a part of the Banū Ḥubāish, the Banū Nāshir and of al-Aḥmar. The old dynasty of the country, which traced its descent from the Imām Ḥādī of Ṣa'da, was able to retain its imāmate even during Turkish rule and to maintain its independence from the imāms of Ṣan'ā' after the Turks were driven out in 1630. C. Niebuhr (*op. cit.*, p. 256; see the *Bibliography*) has given a genealogical survey of the princes of Kawkabān. When the Turks again invaded Yaman in 1872 and subjected the country, Kawkabān after a seven months' severe siege also passed to the Turks but only after capitulation. The last ruler of Kawkabān, Saiyid Aḥmad b. 'Abd al-Raḥmān, who had bravely defended the town against the Turks, afterwards lived in Ṣan'ā' on a pension given to him by the Sublime Porte. At Glaser's visit in 1883 his brother Saiyid Yahyā still lived in the old ancestral home in Kawkabān, which is remarkable for the splendid stucco-work of the interior and the rich ornamentation of its façade. The windows and doors had all sorts of varied shapes, colours and ornaments.

Kawkabān is now almost depopulated; although the houses, which in spite of much destruction are still imposing, afford accommodation for some 30,000 people, there are barely 100 now in the town; from the town one gets a splendid view over the fertile fields and valleys of the country around, especially the plain of Shibām, a part of the plain of Ṣan'ā' and the surrounding hills.

5) Kawkabān al-Sbā'a is in Maḥwīd, west of the town of Kawkabān 4), but belongs to Ṭawīla, a small place of no special importance.

(ADOLF GROHMANN)

KAWM (A.), plural *aḳwām*, *aḳāwim*, *aḳāyim*, people. The word occurs also in Nabataean, Palmyrene and Sāfaitic inscriptions in the name of the deity *Shai'* al-Kawm "support of the people", see Lidzbarski, *Ephemeris für semitische Epigraphik*, i., Index s. v. — According to some lexicographers the word applies in the first place to men; evidence for this opinion is afforded by passages from literature where *K.* is used in opposition to *nīsā'* (women). The term does not primarily suggest the meaning of nation. A man's *K.* are his *sh'ra* and his *ash'ra* (*Lisān*). In this limited sense the word occurs also in the well known tradition: "Who clings to a *K.* without the permission of his *mawālī* (*patroni*), is cursed by Allāh, the angels and the prophets" (*Bukhārī*, *Faḍā'il al-Madīna*, bāb 1). — Used without article it has the same meaning as English "people", French "gens" and German "Leute", e. g. *sūra* 5, 63: "People who do not understand"; cf. 8, 66; 9, 61 (also with the article 12, 87). The plural has the same meaning. In a tradition it is said: "There will be people (*aḳwām*) in my community, who will proclaim licentiousness regarding women and wine" (*Bukhārī*, *Aḥrība*, bāb 6).

In the *Kurān* the term is chiefly used in connection with the prophets, Muḥammad's predecessors: the people of Ibrāhīm, Lūṭ, Nūḥ (e. g. 7, 146; 11, 91; 22, 43; 26, 105, 160; 38, 11), i. e. their unbelieving contemporaries. In this sense it

C 35

No. 148/25

is also used in connection with Muhammad himself: "Thy people declare Him a lie, though He is the Truth" (sūra 6, 66). The same use of the term is to be found in Ḥadīth, e. g. Bukhārī, *Anbyāʾ*, bāb 19, 31, 54 etc.

K. is, however, also used in a sense that comes nearer to the modern conception of "people", e. g. in the tradition referring to one of the festivals: "Every K. has its festival, and this is ours" (Bukhārī, *ʿIdūn*, bāb 3). Al-Kawm with the article has sometimes an emphatic meaning, e. g. Aḥmad b. Hanbal, *Musnad*, v. 72, where Ṭufail, one of ʿAʿīsha's brothers, relates a dream which he had. He dreamt that he passed by some Jews and said to them: "Verily, ye would be the people, were it not that ye pretend that ʿUzair (Ezra) is the son of Allāh". They answered: "And ye would be the people, were it not that ye say: *Mā shāʾ Allāh wa-mā shāʾ Muḥammad*", etc.

In Atchin (Atjeh) the term has acquired a peculiar form and use: *kawōm* has here the genealogical meaning of "all those who descend from one man in the male line", see Snouck Hurgronje, *The Achehuese*, Index s.v. *kawōm*.

For special meanings of the word see Dozy, *Supplément*, s. v. (A. J. WENSINCK).

AL-KAWS = the bow; in Arabic geometry the arc of the circle; in astronomy the constellation of Sagittarius, the ninth sign of the Zodiac (Greek *τοξότης*, Latin *Arcitenens* or *Sagittarius*). (H. SUTER)

KAWS KUZAH (A.), the rainbow. The ancient Arabian deity Kuzah [q.v.] who is described as *shaitān* (devil) was a thundergod who shot hail-arrows from his bow and then hung the latter on the clouds. He is found in the combination *Kaws Kuzah*, rainbow. *Kuzah* is also in popular belief the angel who looks after the clouds. Other names of the rainbow are: Allāh's bow, the bow of the prophet of God, bow of the heavens, bow of the clouds (*ghamām, nuẓn*), signs of heaven (*ʿatāʾim al-samāʾ*). It is also called *kaws kaziʿ* (*kazaʿ* are the separated parts of a cloud). Quite different in origin are the names *kustān* (dust), *kustāni*, *kustalāni* and *kustalāniya*. Muslim scholars include the rainbow among the *ʾathār al-ʿulwiya*, the upper phenomena. The rainbow is usually opposite the spectator, while the sun is at his back and there is a dark cloud or wall behind drops of water; the drops may be in a cloud or formed at springs, water-wheels, in turbulent rivers where spray is formed, in the steam of baths or in water which is ejected from the mouth in a spray (see *Beitr. V.*, loc. cit.). Frequent reference is made to a description by Ibn Sinā (see E. Wiedemann and M. Horten, loc. cit., among others) who was on the top of a very high hill at the foot of which lay a vast bank of mist. The sun was above the hill and Ibn Sinā saw a rainbow on the mist below him.

Numerous descriptions of rainbows occur in literature e. g. in the *Ḥamāsa* (F. Tuck, *Z. D. M. G.*, iii. 200 sqq.), also by the Ḥamdānid Saif al-Dawla (333—356 = 944—967) and by the poet Waʿwāʾ († 390 = 999; see F. Dieterici, *Mutanabbi und Saif al-Dawla aus der Edelperle des Thaʿālibi dargestellt*, Leipzig 1847, p. 129 and 175).

The more or less strictly scientific studies of the rainbow are also numerous. Ḥādīdī Khalifa (*Kashf al-Zunūn*, iv., N^o. 9,640) quotes a special *ʿilm Kaws Kuzah* (science of the rainbow) he

deals with all questions that can arise. According to him, "it investigates how the rainbow is formed, the reason why it is formed and why it is circular; further the reason for the difference in its colours, why it appears after rain at the end of a day and why it is often seen by day but only rarely at night by moonlight. It further investigates the astrological significance (*al-aḥkām*) of its appearance". Descriptions on similar lines are found, for example, in the works of al-Kazwīnī (*ʿAdjāʾib al-Makhlūqāt*, ed. Wüstenfeld, p. 98; *Kosmographie*, transl. Ethé, p. 201), in the *Rasāʾil Iḥwān al-Ṣafāʾ*, Bombay 1305, ii. 52 sqq. (cf. F. Dieterici, *Die Naturanschauung der Araber*, Berlin 1861, p. 87); also by Shihāb al-Dīn Aḥmad b. Idrīs al-Karāfi († 684 = 1285/1286) in his *Kitāb al-Istibṣār fīmā tudrikuhu ʿl-Abṣār*; and in the *Risāla fī Kaws Kuzah* of Ḥusām al-Dīn al-Taḳāṭī (about 850 = 1446; see Berlin Catalogue by Ahlwardt, N^o. 5691); two anonymous works are published by Cheikho (*al-Machriq*, 1912, xv. 736—744). A considerable section in a meteorological work (Ahlwardt, Berlin Catalogue, N^o. 6054) and no doubt many other passages deal with our phenomenon. The most important and most comprehensive work, however, is from the pen of Ibn Sinā in his *Shifāʾ* (see the *Bibl.*).

The descriptions of the rainbow are in general very accurate. Not only the simple rainbow but also the double and even triple are described. The first is said to be produced by the sun's rays themselves, the second by the rays shining through the rays from the first and the third by the rays from the first two; the bows therefore are successively weaker. It is emphasised that the rainbow is not always composed of the same colours, a phenomenon which has recently been fully investigated by M. Pernier. It is also mentioned that the rainbow is particularly beautiful when the sun is on the horizon.

The older treatment of the theory of the rainbow goes back to Aristotle, with whose meteorological works the Arabs were acquainted. Thābit b. Kurra is said to have translated a commentary by Athārūdiṭis = Epaphroditos (?) on Aristotle's essay on the rainbow (Ibn al-Kifī, p. 59). Aristotle is followed by Ibn Sinā, Ibn al-Haiṭham, al-Karāfi etc., although in many details they make additions and corrections to his views. It is always assumed that the rainbow is produced by beams of light or visual rays which are regularly reflected on the raindrops, on very minute reflecting surfaces. Later Kamāl al-Dīn al-Fārisī [q. v.] gave a brilliant exposition of the correct explanation, as far as was possible in the general state of knowledge in his day, when the dispersion of light was unknown. Like us he says that the light is once or twice reflected in the interior of the globule of water and then radiates out from it; thus we have the main and secondary rainbow. He also endeavours to investigate the cause of the colours although, of course, not satisfactorily. By experiments he proves the correctness of his results, which are on a much higher level than those of Theodoricus of Freiberg (about 1300).

From *kuzah* comes a word *taḳāʾiḥ* (the word is not *taḳāʾigh*, as I said in the *Archiv für die Geschichte der Naturw. und Technik*, 1902, iii. 9). It means "showing the colours of the rainbow" or briefly "the colours of the rainbow". It is defined by Kamāl al-Dīn as "different graduated

colours in the region between blue, green, yellow, red, smoke-coloured white, that is, as regards sensual perception".

The rainbow is also given an astrological significance according to the zodiacal sign in which it appears. In the ram it means plague and death (Ahlwardt, Berlin Catalogue, N^o. 5906, *al-Kawl 'alā Ṭul Kaws Kuzah*). In another MS. (N^o. 5915, 2) it is said that in September a rainbow indicates great tyranny and oppression.

(E. WIEDEMANN)

KAWSARA, a small volcanic island in the Mediterranean Sea between Sicily and Tunis (60 miles south of Cape Granitola and 45 miles east of Cape Bon [Ras Addar]; area 40 sq. miles), now called Pantellaria. The name Kawsara (variously written in the MSS.) goes back to the classical Cossyra (cf. Pauly-Wissowa's *Realencyklopädie der klass. Altertumswiss.*, xi. 1503). The island, famous for its antiquities (cf. Orsi, *Pantellaria in Monumenti dei Lincei*, 1899, ix. 450—539), was already important in ancient times for intercourse between Sicily and the African coast and played an important part during the conquest and rule of the Arabs in Sicily, which was always attacked from Africa. The first conquest of Kawsara by the Arabs as well as their expedition to Sicily under Mu'āwiya b. Khudāidj in the time of the Caliph Mu'āwiya (Ibn Khaldūn, *K. al-'Ibar*, i. 211; Yāqūt, *Mu'djam*, iv. 200, according to the Aghlabid Ibn al-Kattā'; al-Balādhuri, ed. de Goeje, p. 235, does not mention the island) was only transitory; the Byzantines soon recaptured it (al-Bakrī, *K. al-Masālik*, *Bibl. Arabo-Sicula*, p. 13). According to Ibn Taghribirdi (ed. Juynboll, Leiden 1885, i. 136) 'Alī's murderer, Ibn Muldjam, was banished to Kawsara. 'Abd al-Malik b. Kaṭan, the general of the Caliph 'Abd al-Malik, recaptured the island from the Rūm (al-Tidjāni,

Rihla, *Bibl. Ar.-Sic.*, p. 375) but Muslim rule was only firmly established under the Aghlabid Ziyādāt Allāh whose representative, Asad b. al-Furāt, captured Sicily (210—213 = 825—828) and Kawsara (Ibn Khaldūn, *loc. cit.*). In 220 (835) an expedition against the island was once again necessary (Ibn al-Athīr, *Kāmil*, ed. Tornberg, vi. 239). In the two following centuries Kawsara was partly converted to Islam. Its harbour was a naval base for the Arabs. Their ships were often wrecked in its vicinity. When the power of the Muslims began to decline, Kawsara was again exposed to raids by Christian states (e.g. 481 = 1088 by the Pisans and Genoese; Ibn al-Athīr, *Kāmil*, x. 110). When Sicily had entirely passed out of Muslim hands, the island was taken in 516 (1122/23) by George of Antioch, Roger II of Sicily's admiral, on his first campaign against the Zirid al-Iḥāsan b. 'Alī [q. v.] in Mahliya; the island served him as a base for the capture of this town in 543 (1148) (Ibn al-Athīr, *Kāmil*, xi. 82).

The Arab geographers tell us very little about Kawsara. The distance from Sicily and the African coast is usually given as a day's journey; the harbour is celebrated (al-Idrīsī). The production of figs, cotton and mastic is often mentioned (Abu 'l-Fidā'). The Muslim inhabitants remained there after the Norman conquest as *dhimmi*'s of the Franks (al-'Umari, *Masālik al-Absār*; al-Andalūsī). Down to the xviiith century the Arabic language was spoken on the island of Pantellaria; it has exercised a considerable influence on the local Italian dialect (above, i. 419; Gregorio and Seybold in *Studi glottologici italiani*, ii. [1901], 225—238). Amari has published a tomb inscription from Pantellaria (*Le epigrafi Arabe di Sicilia*, Palermo 1879, p. 118 sqq.).

Bibliography: M. Amari, *Bibliotheca Arabo-Sicula*, Leipzig 1887, and the Italian translation, Turin and Rome 1880—1889; cf. Index, s. v. Pantellaria; do., *Storia dei Musulmani di Sicilia*.

(J. H. KRAMERS)

KAWTHAR, a word used in Sūra cviii. 1 after which this Sūra is called *Sūrat al-Kawthar*. *Kawthar* is a *fa'w'al* form from *kathara*, of which other examples occur in Arabic (e.g. *nawfal*; further examples in Brockelmann, *Grundriss der vergleichenden Grammatik*, i. 344). The word, which also occurs in the old poetry (e.g. the examples in Ibn Hishām, ed. Wüstenfeld, p. 261, and Nöldeke-Schwally, *Geschichte des Qurans*, i. 92), means "abundance" and a whole series of Muslim authorities therefore explain al-Kawthar in Sūra cviii. 1 as *al-khair al-kathir* (see Ibn Hishām, *op. cit.*; al-Ṭabarī, *Tafsīr*, xxx. 180 sq.). But this quite correct explanation has not been able to prevail in the *Tafsīr*. It has been thrust into the background by traditions according to which the Prophet himself explained Kawthar to be a river in Paradise (see so early as Ibn Hishām, p. 261 below, and notably al-Ṭabarī, *Tafsīr*, xxx. 179) or Muḥammad says that it was a water-basin intended for him personally and shown to him on his ascension to Paradise (al-Ṭabarī, *Tafsīr*, xxx. 180), which latter view al-Ṭabarī considers the most authentic. Even the earliest Sūra's (lxxvii. 41; lxxxviii. 12 etc.) know of rivers that flow through Paradise, but it is not till the Medina period that they are more minutely described, notably in Sūra xlvi. 11: "there are rivers of water which does not smell foul; rivers of milk the taste whereof does not change;

aud rivers of wine, a pleasure for those that drink, and rivers of clarified honey." These rivers correspond to the rivers of oil, milk, wine and honey, which had already been placed in Paradise by Jewish and Christian eschatology; the only difference is that Muḥammad replaced oil by water; in Arabia pure water was not to be taken for granted and besides it was necessary to mix with the wine of Paradise (see Horovitz, *Das koranische Paradies*, p. 9). When, after the Prophet's death, eschatological explanations of the "abundance" of Sūra cviii. 1 began to be made, al-Kawthar was identified as one of the rivers of Paradise and when we find in one of the versions quoted in al-Ṭabari's *Tafsir* that "its water is whiter than snow and sweeter than honey" or "and its water is wine", etc. we have obviously an echo of Sūra xlviii. 11. But they did not stop at simply transferring these Qur'anic descriptions to the Kawthar but the imagination of later writers gave the river of Paradise a bed of pearls and rubies and golden banks and all sorts of similar embellishments. According to a later view (see *Aḥwāl al-Kīyāma*, ed. Wolff, p. 107), all the rivers of Paradise flow into the *Ḥawḍ al-Kawthar* which is also called *Nahr Muḥammad*, because, as we have seen above, it is the Prophet's own.

Bibliography: given in the article.

(J. HOROVITZ)

KAWUḲLU, "the man with the *kawuḳ*", a character in the Orta Oynu.

The Turkish word *kawuḳ* means the inner cap-shaped part of a certain kind of headgear, a rather high cap around which the headdress proper, the *şarık*, is wound; a cap like this could be of different shapes; it either culminated in a rounded top or in a flat surface; sometimes also it was wider at the top than on the bottom. It was usually made of wadded felt in perpendicular strips narrowing towards the top. These *kawuḳ*'s were worn by officers of different ranks in the Janisseries. They varied in form, colour and name according to rank. For further details see Mahmūd Şhawket, *Osmanlı Teshkilât ve-Kiyafet-i askerîyesi*, Sımbul 1325, i. 29 sqq. Other professions also had particular *kawuḳ*'s; thus there were *molla*, *kâtib* and *paşalıḳ kawuḳu* or, from the shape, one talked of *tepeli kawuḳ*, while *dal kawuḳ* acquired the special meaning of parasite. The word *kawuḳ* (plur. *kawuḳwıḳ*) has even penetrated into Arabic.

Kawuḳlu, "the man with the *kawuḳ*", has acquired a special significance as one of the two principal characters in the Turkish folkplay of Orta Oynu. It is not till last century that we are at all minutely acquainted with the Orta-play and the names Orta and Kawuḳlu do not seem to be any older. According to a tradition, the character of the Kawuḳlu was first introduced by a certain otherwise unknown Şhükri, in place of a character called Nekre whose main feature is said to have been a fondness for opium. Kawuḳlu is the real comic figure in the Orta-play and plays a part like that of Karagöz [q. v.] in the shadow-play. Peşhekâr, the other principal character in the Orta Oynu, is, on the other hand, the real director of the piece, a kind of stage manager, who always appears first on the stage and corresponds roughly to the Hadjiwad of the shadow-play.

The costume of the Kawuḳlu is sometimes de-

scribed in the pieces themselves. Its chief feature is a high *kawuḳ* on his head. This is usually flattened above, red in colour and made of strips (*dilimli*) sewn together, almost like a top-hat without the lower brim. The *kawuḳ* is jokingly compared to a *tandır*, the Turkish stove of similar shape. A shawl called *agabani*, made of wool and silk, is wound round the *kawuḳ*. The kaftan (*djübbe*) of the Kawuḳlu and his trousers are also of red cloth while his under-garment (*entari*) is of striped woollen cloth or silk (*şam şetarişi* or *allî parmak*). An ordinary shawl is used as girdle. The Kawuḳlu wears yellow Turkish saffron leather slippers (*cedik papuşi*) usually with heels, over the leather stockings called *mesî*. He usually carries an umbrella made of different coloured parts. In modern times more and more of the old dress has been lost and even the *kawuḳ* has had to give place to a fez with a long tassel.

In the play the Kawuḳlu is usually a shop-keeper, artisan or a servant. Like Karagöz he is responsible for the grotesque and comic element. He misunderstands the remarks of the other players, especially the Peşhekâr, in substance as well as language, carries out orders in a stupid fashion, coarsens sentiments or twists them into the obscene. He is tactless and stupid, especially when he has to be on good behaviour among high class people, but in his turn demands exaggerated respect even from his friend, whom he treats badly, and is very capricious. If he describes his experiences, he exaggerates tremendously but unmercifully disparages any presents that have been given to him etc. If he is caught in a trick he usually succeeds in escaping by some of his thousand shifts. A further favourite source of humour is the imitation of foreign voices and dialects, *taḳlîd* (Ewliya, i. 645 sqq., gives the name to Orta-like plays of his time), sometimes with the addition of disguises. It seems that the players were originally foreigners and non-Muslims and in the older period the business was still considered unseemly and it is regretted when a Muslim earns his livelihood in this way.

All his pranks have to be improvised by the player, only a rough outline of the piece being given. The part of the Kawuḳlu makes the greatest demand upon the player and only a few really great actors have succeeded in playing the part to the general satisfaction. The most famous was a certain Hamdi at the end of last century and in most of the texts known to us from that period the Kawuḳlu is often addressed simply as Hamdi.

(WALTHER BJÖRKMAN)

KĀWURD B. DĀ'UD ĆAGHRIBEG, sometimes also called Kārā Arslānbeg, the founder of the line of Saldjūks of Kirmān. The first year of his reign is usually given as 433 (1041). Perhaps it was he and not Ibrāhīm Ināl (cf. Ibn al-Aḥfir, ed. Tornberg, ix. 349) who led the Ghuzz, who came to Kirmān in 434, but he did not succeed in establishing himself there then, for the lord of this province, the Būyid Abū Kālīdjār [q. v.], was informed of the raid and sent troops who put the Ghuzz to

flight. It was not till some years later (440 = 1048) after the death of Abū Kālidjār, that the capital of the country, Bardasīr, where Bahrām b. Lashkarsitān commanded for the Būyids, was taken and henceforth the land belonged to Kāwurd. By a stratagem he was able to subjugate the rude tribes of the Kuṣṣ and Kufadj, who dwelled in the Garmsīr (the hot region). He also waged war in Sistān and in Fārs, in the latter country with the chief of the Shabānkāra Faḍloya — on him cf. Ibn al-Balkhī, ed. Le Strange and Nicholson, p. 166 — and with the assistance of the Amīr of Hormuz even sent troops across the Gulf to the coast of Arabia who conquered 'Omān so that his successors ruled there till 537 (1142—43). He was an energetic ruler in every respect and maintained order in the land and acquired merit by making wells and building towers to serve as landmarks in the desert. One of these towers still stands between Gurg and Fahradj (cf. P. M. Sykes, *Ten Thousand Miles in Persia or Eight Years in Irān*, p. 418). But in the end his ambition proved his downfall. Even during the reign of his brother Alp Arslān, he could scarcely bring himself to acknowledge his suzerainty but when the latter came twice to Kirmān (456 = 1064 and 459 = 1067) he did not dare throw down the gauntlet but showed himself submissive. But as soon as he heard that his brother had fallen (1072) and that his son Malik-shāh had succeeded him he collected his forces and marched against him. The two armies met near Hamadhān. Kāwurd's troops were put to flight, he was taken prisoner and strangled. The best account of this battle, which was fought on Djumādā I 26, 466 = Jan. 27, 1074 (according to Ibn al-Athīr, x. 53, in Shābān = April), is contained in the *Zuhdat al-Tawārikh*, B. M. MS., fol. 33. The victor, however, left the sons of Kāwurd in possession of Kirmān.

Bibliography: In addition to the sources quoted in the article: *Recueil de textes rel. à l'histoire des Seldj.*, i. 2 sqq.; cf. in addition Houtsma in the *Z. D. M. G.*, xxxix. 367 sqq.

KAWWĀS, an Arabic word meaning originally archer, then arquebusier, finally, like the French *archer*, came to mean military police. The form *kawwās* (with *šād*) is found in the *1001 Nights* (Dozy, *Suppl.*). The word is applied in the Levant specially to the military police, called in French *cawas* or sometimes *janissaires* (because before the abolition of the latter, they were chosen from their ranks), detached to act as guards to embassies and consulates. They go in front of the head of the embassy or consulate when he goes into the town, whether officially or not, and make way for him in the crowded streets and bazaars. In Turkish they are called *yasaḳ-ī*. In terms of articles 45 and 50 of the renewal in 1740 of the treaty between France and the Ottoman Empire, known as the capitulations, the ambassadors and consuls may employ such janissaries as they please without their being forced to use any who do not suit them (T. X. Bianchi, *Nouveau Guide de la Conversation*, Paris 1852, p. 273—274). The regulations of Ṣafar 23, 1280, fixed the number of natives that the consulates could employ, on account of their privileges, at 4 *yasaḳ-ī* for consulates general and consulates in the chief towns of provinces, 3 for ordinary consulates and 2 for vice-consulates or consulate agencies. Their appointment is notified to the governor-general of the province

who keeps a register of the names of those employed (Aristarchi-bey, *Législation Ottomane*, Constantinople 1873—1888, iv. 15 sqq.).

Bibliography: *Descr. de l'Égypte*, Paris 1822, xviii. 1, 326—327. (CL. HUART)

KĀYA. [See KERKHUDĀ].

KĀYĪ, the name of one of the 24 tribes of the Ghuzz [q. v.] or Oghuz from which the Ottoman ruling house is descended. Cf. the pertinent text of the *Tawārikh-i Āl-i Seldjūḳ* and the *Kitāb-i Dede Ḳorkūd* in the *Zap.*, xix. 077. Maḥmūd Kāshgharī (*Divān lughāt al-Turk*, i. 56) still has the old form *Qayigh*, which refutes the identification proposed by J. Marquart (*Abh. Ges. W. Gottingen, Neue Folge*, xiii./i. 39 sqq.) with the *Kāi* mentioned by al-Bīrūnī and al-'Awfi in the extreme east. The *Kāi* are regarded by Marquart as turkicised Mongols (*op. cit.*, p. 88) which also (he says, *op. cit.*, p. 191) explains "the rôle which the blood-stained and fratricidal race of Osman and Ottoman people have played in history". That the *Kāi* were Mongols is very probable. They are cited by Maḥmūd Kāshgharī (*op. cit.*, i. 30) with the *Tātār* and others among the peoples who speak a language of their own, although they also knew Turkish; but the Oghuz tribe of *Qayigh* or *Kāyī* had certainly nothing to do with the *Kāi*.

(W. BARTHOLD)

KĀZ (t.), goose, occurs also in geographical names such as *Kāz Dagħ*, the Caucasus [see *ḲABĶ*].

KĀZA. [See *KADĀ'*].

KĀZAK (t.), robber, disturber of the peace, adventurer; on these and other meanings see W. Radloff, *Versuch eines Wörterbuchs der türk. Dialecte*, ii. 364. The existence of the word in Turkish can be first shown in the ninth (xvth) century. During the civil turmoils under the *Timūrids* the pretenders, in contrast to the actual rulers, were called *ḳazaḳ*: those who would not accept the verdict of fortune but led the life of an adventurer at the head of their men; cf., for example, the mention of the *ḳazaḳ* years (*ḳazaḳlīḳ*) of Sultān Iḥusain, afterwards ruler of *Khurāsān*, in the *Bābur-Nāma*, ed. Beveridge, p. 173 b, *infra*. The name *ḳazaḳ* is also applied to whole bodies of people, who had separated from their princes and kinsmen; in the *Tārīkh-i Rashīdī* (transl. E. D. Ross, especially p. 82 and 272) the *Özbeḡ*, who had abandoned their *Khān* Abu 'l-Khair (cf. the article), are called *Özbeḡ-Kāzak* or simply *Kāzak*; the latter name has been retained by their descendants as an ethnic to the present day (cf. the art. *KIRGIZ*). In Russia the word *ḳazaḳ* first appears about the same time as in Central Asia (in the second half of the xvth century) and is probably borrowed from Turkish although it appears in Russian in a larger number of meanings; thus individuals without kinsmen or possessions were called *ḳazaḳ* even although they did not lead a wandering or marauding life; the word, therefore, had not yet the exclusively military meaning which it had afterwards. The word *Cossack*, used in Western Europe, is the result of the Little Russian and Polish pronunciation. No certain etymological explanation of the word *ḳazaḳ* has yet been given. The last suggestion by N. Marr (*Žurnal Min. Nar. Prosv.*, 1915, June, p. 286), according to which the old Caucasian ethnic *Kasog* mentioned in the Russian annals under 6473 = 965 is preserved in *Kāzak*, is a hypothesis which can hardly be accepted by the historian. (W. BARTHOLD)

KAZĀN, also written *Kāzān*, in the xvth and xvth centuries the capital of a Tatar principality, in the xixth century a Russian university town, now capital of the Tatar Soviet Republic. According to legend, the town was built by Bātū. In 1391 *Kāzān* was destroyed by Russian freebooters from Novgorod, and again in 1399 by the Prince Yvriy Dmitriyevich. About 1445 a powerful kingdom was founded here by Ulu-Muhammad and his son Mahmūdēk (in Russian works *Makhmūtek*) who had been banished from the Golden Horde; in the same year (1445), in which Ulu Muhammad captured the Russian Grand Duke Wasiliy, *Kāzān*, where a prince called 'Alī Beg was ruling, was captured by Mahmūdēk. In 1446 Ulu Muhammad was killed by Mahmūdēk; two other sons of Ulu Muhammad, Kāsim and Ya'kūb, had to flee to Russia from their brother, where Kāsim founded a local dynasty in Kasimov [q. v.] which is called after him. Like many later pretenders who sought refuge in Russia, Kāsim took part on the Russian side in the wars against *Kāzān*. Mahmūdēk died about 1464 and was succeeded by his sons, first *Khalil*, then *Ibrāhīm*. In 1468 even *Viabka* had to submit to *Khān Ibrāhīm* but in the following year the campaign took a more favourable turn for Russia; *Ibrāhīm* had to make peace and restore their freedom to all the Russian prisoners in *Kāzān*. *Ibrāhīm's* successor was his son *Ilhām*; in 1487 his brother Muhammad Amin appeared before *Kāzān* with a Russian army; after a siege of three weeks *Ilhām* had to surrender and was sent with his wife to Wologda; Muhammad Amin was installed as *Khān* in his place. In 1496 the *Khān* and with him the Russian party was driven out by an invasion of Siberian Tatars under Mamuk; after the victory of the Russians — at the request of the people of *Kāzān* — it was not Muhammad Amin but his brother 'Abd al-Latif that was installed as *Khān* but by 1502 'Abd al-Latif was brought back to Russia and the throne restored to *Khān Muhammad Amin*. In 1505 the *Khān* rebelled against Russian suzerainty and killed or robbed the Russian merchants who came to the annual fair in *Kāzān*; the Tatars advanced as far as Nijni-Novgorod. In 1506 a Russian army was defeated; while a second campaign was being prepared the old relations were restored by a treaty of peace in 1507. Muhammad Amin died in 1518, 'Abd al-Latif had died the previous year; with them the dynasty founded by Ulu Muhammad became extinct.

The following decades were a period of almost uninterrupted fighting between the pretenders supported by Russia, the brothers *Shāh 'Alī* (so on his tomb in Kasimov, not *Shaikh 'Alī*) and *Djān 'Alī*, who had come from Astrakhan to Russia, and the national party supported by the Crimean Tatars and the *Noghai*. The latter won their biggest victories in 1521; *Shāh 'Alī* was driven out by prince *Şāhib Girāi* who came from the Crimea; the brothers Muhammad Girāi from the Crimea and *Şāhib Girāi* from *Kāzān* advanced up to Moscow; the Grand Duke Wasiliy abandoned his capital; a peace was concluded in his name by the Tatar prince Peter, a convert to Christianity, by which the Russian government bound itself to pay tribute to the *Khān* of the Crimea. The Russian prisoners were sold as slaves by the Crimean Tatars in Kafa and by the people of *Kāzān* in Astrakhan. In 1524 *Şāhib Girāi* went

to the Crimea and left his thirteen year old son *Şafā Girāi* in *Kāzān*. The only original document that survives from the period of the principality of *Kāzān* dates from the brief reign of *Şāhib Girāi*: it is a decree dated *Şafar* 13, 929 (= Jan. 1, 1523), confirming a family as *Ta'khān's*, that is nobles freed from all taxes. The taxes are detailed so that the document is of some importance for the domestic history of the principality.

After vain efforts to come to an agreement with Russia, *Şafā Girāi* was driven from the throne by the Russian party in 1530; at the wish of the people it was not *Shāh 'Alī* but *Djān 'Alī* that was elected *Khān*; he was killed in 1535 in a rising of the national party, *Şafā Girāi* recalled and supported by his father *Şāhib Girāi*, then *Khān* of the Crimea. The Russian attempts to restore their suzerainty had therefore for a long time no success; it was only in the year 1546 that *Şafā Girāi* was driven out and *Shāh 'Alī* put in his place; but *Şafā Girāi* returned immediately after the departure of the Russians and held the throne till his death in 1549. He was succeeded by his two year old son *Ötemish*, who was taken to Russia in the following year, christened by the name of Alexander and lived till 1566. The brief and cruel reign of *Shāh 'Alī* ended with his banishment. *Yādiyār Muhammad*, a prince born in Astrakhan, was summoned from the land of the *Noghai* to *Kāzān* as *Khān*. The Grand Duke Iwan who had already conducted two unsuccessful campaigns (1548 and 1550) against *Kāzān* now appeared before the town with a larger army; after hard fighting *Kāzān* was stormed on Oct. 2, 1552, and all armed men put to death.

The conquered town retained its former appearance and its military importance under Russian rule for a long time. The town had ten gates and a citadel separated from the other quarters of the town by a ditch; the old wooden wall was replaced by one of stone in 1555. The town was then about 600 cubits (= a mile) in length and 500 cubits (1500 yards) in breadth. To injure the commercial importance of the city, the Russian government as early as 1524 had founded the annual fair at Nijni-Novgorod; at the same time merchants were forbidden to go to the fair at *Kāzān*. Christianity was industriously preached. *Kāzān* was the see of an archbishop from 1555 and later of a metropolitan. The immigration from Russia proper assumed considerable importance.

Little is left of the old town; a tower in the citadel still bears the name of the princess *Sūyūnbigi*, wife of *Şafā Girāi* (she was previously married to *Djān 'Alī* and later to *Shāh 'Alī*). Under the influence of national Tatar movement the memory of this princess is kept green; in 1914 a biography of her appeared and a periodical for women is published under her name; but it is not definitely known when and how the tower received this name, and what parts date from the Tatar period and what from the Russian. During the xviiith century *Kāzān* had lost all military importance and was easily taken — with the exception of the citadel — by *Pugačev* in July, 1774; there were then 2,867 houses in it. Even at this date *Kāzān* was of much greater importance than Nijni-Novgorod as a centre of government and of culture. The university founded in 1804 became famous especially for its Oriental faculty (strictly the Oriental section of the faculty

of history and philology). In 1855, as a result of the opening of the Oriental faculty in the University of St. Petersburg, instruction in Oriental languages in the university of Kāzân was stopped and the library and other accessories for the most part brought to St. Petersburg.

Instruction in Muhammadan languages was resumed in the university of Kāzân in 1861. According to the census of 1897, Kāzân had 131,508 inhabitants, in 1911 182,477, of whom 30,781 were Tatars.

(W. BARTHOLD)

KĀZBĒGĪ. A Persian copper coin worth, according to Chardin, the tenth part of a *shāhi*. It is now obsolete. Chardin says, iv. 279 (Rouen, 1723), the name means "the King's money", but see the titles *Gosbeck* and *Cosbeague* in *Hobson-Jobson* (revised ed.). Another form of the word seems to be Kāzbīnī from Kāzbīn where they were coined.

(H. BEVERIDGE.)

KĀZERŪN, a town in Persia in the province of Fārs, between the sea and Shirāz and 55 miles from the latter at a height of 3,000 feet. It is supplied with water from wells and pipes as the district has no river. Its industries used to be flourishing; it manufactured a kind of cotton called *shatawi* (Yākūt, iii. 288); it had a rich trade carried on by merchants for whom 'Aḡud al-Dawla the Būyid had built a bourse and who had luxurious dwellings and pleasure-houses in the town and vicinity. A kind of date called *djilān* was gathered there. At the present day it is surrounded by tobacco-fields; there is a horse-market there frequented by the nomad tribes. The principal mosque was built on a hill commanding the bāzār. Among the tombs of saints venerated there, mention is made of that of Shaikh Abū Ishāḡ Ibrāhīm b. Shahriyār Kāzerūnī, patron of the sailors in Indian and Chinese seas, their protector from storms and pirates, a capacity which brought his *zāwiya* abundance of *ex-voto's* (Ibn Baṭṭūta, ed. Paris, ii. 89). Twenty miles to the north are the ruins of Sābūr; Kāzerūn began to rise in importance from the time Sābūr fell into ruins. The district was called *Shūl*, a name that survives in the modern name *Shūlistān*. In the vicinity there is a very salt lake full of fish which in the fourth (tenth) century was called Buḡairat Mūz (or Mūrak).

Bibliography: Yākūt, ed. Wüstenfeld, iv. 225; Barbier de Meynard, *Dictionnaire de la Perse*, p. 472 and note 1; G. le Strange, *The*

Lands of the Eastern Caliphate, p. 266; J. P. Morier, *Second Journey*, London 1818; E. S. Waring, *A tour to Sheeraz*, London 1807, p. 22. (CL. HUARI)

KĀZĪ-ASKER (A.T.), military judge, one of the highest offices in the judicial system of the Ottoman empire; its holders took precedence immediately after the Shaikh al-Islām, the chief of the *ulamā'*; they are entitled *ṣadr* [q.v., iv. 50]; they are equal in rank to the vizier and *muḥsir*. They are entitled in written petitions to be addressed as *semāhet-lu* "your benevolence". There are two Kāzī-Asker, one of Rūm-ili and the other of Anatolia. Before the reforms, the first was inspector-general of all the dedicated properties (*wakf*) except those of the two holy cities, when they become vacant (*maḥlūl*) by the decease of their administrators (*mutawalli*); since the *tanzīmāt* this duty has fallen upon the Minister of the Awkāf.

The title Kāzī-Asker was created in 763 (1362) by Sultān Murād I in favour of the Kaḍī Kara Khalīl Djendere-ili; this judge followed the Sultān in the army and exercised his functions in camp. After the capture of Constantinople, Mehmed II in 885 (1480) duplicated the post on the advice of the Grand Vizier Karamānī Mehmed Pasha [q.v., ii. 745], jealous of the credit enjoyed by Mānisā Celebesi; Muḥliḡ al-Dīn Kaṣtallānī and Hādīdji Hāsanzāde were the first holders of these new offices. The Shaikh al-Islām or Grand Mufti did not have precedence over them until the reign of Sultān Sulaimān al-Kānūnī. They had the right to appoint all the kaḍī's and *muḍarris's* (professors of theology) except those of Constantinople, Brusa and Adrianople, the three successive capitals of the empire; these nominations were reserved for the Grand Vizier.

The Kāzī-Asker of Rūm-ili dealt with the cases of Muslims in questions belonging to the capital while those of non-Muslims were left to the Kāzī-Asker of Anatolia. The importance of the first of these posts put the second to the background. His competence extended to cases relating to estates, to debts of the state and interests of the treasury; down to the reign of Maḥmūd I his sphere of jurisdiction included the three Barbary regencies; his authority over the kaḍī's of the Crimea was recognised by the treaty of Kainardje (1775) and the convention of Aineli-Kawaḡ (March 21, 1779).

(CL. HUART)

KAZI KUMUKH. [See KŪMŪK].

KĀZIMAIN, a town near Baghdād, one of the most celebrated of Shī'a places of pilgrimage. It is a little over a thousand yards from the right bank of the Tigris, which there describes a loop. It is separated from the river by a girdle of gardens. Kāzīmain itself is prettily situated among palm-groves; there are also gardens almost without interruption in the direction of Baghdād. It is connected by a horse-tramway with the west side of Baghdād (Karshiyakā; see the art. AL-KARKH) about three miles away, which was laid down by the governor Midḡat Pasha, who did a great deal for Baghdād (1869—72; cf. i. 568a). Quite recently Kāzīmain has also become a station on the Baghdād-Sāmarrā railway, which runs along the right bank of the Tigris. Down to the World

War Kāzīmāin was the seat of a *kā'im-makām* and the capital of a *qaḍā* of the sandjak of Baghdād with a population of 25,000 (of whom 5,000 are Shi'is); see Cuinet, *op. cit.* The number of inhabitants of the town itself Cuinet estimated at 6,000, Aubin (1907) at 7—8,000, of whom two-thirds were Persians. They are very fanatical; access to the sanctuaries is strictly forbidden to Christians. The Arab Beduin tribe of al-Madjama' encamps along the Tigris as far as Kāzīmāin (see M. v. Oppenheim, *op. cit.*, ii. 71).

The name Kāzīmāin, a so-called *dualis a potiori* (cf. Wright, *Grammar of the Arabic Language*³, i. 190), means "the two Kāzīm's". The reference is to the two 'Alids buried here, Mūsā al-Kāzīm (d. 186 = 802) and Muḥammad al-Djawād (d. 219 = 834), the seventh and ninth Imāms of the Shi'a sect of the "Twelvers"; [cf. *ḤIKMA' ASHARĪYA*, ii. p. 563]. The place is often briefly called Kāzīmī (also Ghadīm in books of travel) or Kāzīmīye (Kāzīmīye); the name Imām Mūsā is also found. There is evidence of pilgrimage to these 'Alid tombs as early as the seventh (thirteenth) century (in Ibn Khallikān). At the present day Kāzīmāin is one of the four greatest sanctuaries of the Shi'a. Its favourable position at the junction of the roads to the three other Shi'a places of pilgrimage, Sāmarrā in the north and Kerbelā and Najaf in the south, accounts for the fact that many thousands of pilgrims pass through it annually. Frequently 25—30,000 believers assemble here on one day. The throng is greatest during the first ten days of the month of Muḥarram, which are specially dedicated to the memory of Ḥusain and the 'Alids generally. One of the four Muḍtahids, the principal spiritual leaders of the Shi'a, lives in Kāzīmāin.

The sanctuary of Kāzīmāin is one of those exceedingly splendid and rich temples which the 'Irāq owes to the Shi'a and for which Persia and Shi'a India supplied the necessary millions. With its domes covered with gold, the drums and the spires of its minarets it is visible to the traveller a long way off. Its present form faience covered, is due to the Ṣafawid Ismā'il I (908—930 = 1502—1524), whose family claimed descent from the Imām Mūsā al-Kāzīm (cf. above, ii. 544^b). The inscription published by Massignon, *op. cit.*, p. 99, of the year 926 (1519) refers to the complete transformation of the old building by the Shāh. The restoration not quite completed by Ismā'il was finished by the Ottoman Sultān Sulaimān I, who visited Baghdād in 941 (1534). The covering of the domes with golden tiles was done — according to the inscription in 1211 (1796) — by command and at the expense of Shāh Agha Muḥammad Khān [q. v.], the founder of the Qājār dynasty. On the occasion of his pilgrimage (1870) Shāh Naṣr al-Dīn had the gold plating on the principal dome and on the roofs of the minarets renewed; cf. Cuinet, *op. cit.* The double cupola flanked by four minarets shows that two saints are buried beneath it. Close to this mausoleum stands an isolated pavilion under which are shown the graves of Dja'far (formerly supposed to be that of Ismā'il) and Ibrāhīm, sons of the Imām Mūsā. The cupola of this building is modern and a gift of the general of division Salīm Pasha; cf. Massignon, *op. cit.*, p. 100. It may be noted here that there is also at Ḥadīṭha on the Euphrates (between 'Ana

and Hit) a small sanctuary which is said to contain the tomb of Muḥammad, son of Mūsā al-Kāzīm; see Herzfeld in Sarre-Herzfeld, *op. cit.*, ii. 321. On the tomb of a certain Ḥamza b. Mūsā al-Kāzīm in Qaryat al-Bāshīya (in the 'Irāq) cf. Massignon, *op. cit.*, p. 60. In the vicinity of Astarābād [q. v.] there is also an Imām-zāde (tomb-chapel) where a descendant of the Imām Mūsā called Imām Kāzīm is said to be buried; cf. Melgunof in the *Z. D. M. G.*, xxi. 235, and in *Das südliche Ufer des kaspischen Meeres*, Leipzig 1868, p. 119—120.

Like the sepulchral mosques of other great places of pilgrimage that of Kāzīmāin also is surrounded by a very broad court-yard (*ṣaḥn*) enclosed by a wall. This latter was rebuilt in 1298 (1880), with the permission of the Turkish government, by a wealthy Persian named Farḥād Mīrzā and adorned with ceramic work and inscriptions containing whole sūras; cf. Massignon, *op. cit.*, p. 110. In the great court, in course of time, extensive buildings for the housing of numerous pilgrims have grown up, especially along the enclosing wall. In 1907 Aubin estimated the number of bazaars and caravanserais within the area of the sanctuary at forty-five. There are also a number of pretty coffee-houses.

Adjoining the wall of the court-yard is a Sunni mosque with the tomb of the famous Ḥanafī lawyer Abū Yūsuf (q. v., d. 182 = 798); cf. Massignon, *op. cit.*, p. 57, 100. It is a mistake, as Le Strange (*Baghdad*, p. 161 sq., 350 sq.) does, to locate the grave of Zubaida, wife of Ḥārūn al-Rashīd, in or near this Kāzīmāin; cf. against this Massignon, *op. cit.*, p. 110 sq., and Herzfeld, *op. cit.*, ii. 111, and also the article *AL-KARKH*.

In the time of the Caliphs, extensive cemeteries lay on the west side of Baghdād above the Ḥarbiya quarter. The two 'Alid graves were in the cemetery of the Quraish (*Maḳābir al-Quraish*); the names Shūnīziya and cemetery of the Bāb al-Tibn are also found for it. When Yāqūt wrote (623 = 1226), Maḳābir al-Quraish was a fairly populous suburb surrounded by a wall. Ḥamd Allāh Mustawfī about a century later found that this place, formerly reckoned a suburb of Baghdād, was now an independent little town. Who first built the 'Alid sanctuary at Kāzīmāin is unknown. We know that princes of Shi'a tendencies, like the Būyids, frequently bestowed gifts upon it. But in the course of time, especially during the frequent fighting in the capital between Shi'is and Sunnis, it was repeatedly burned and plundered, notably in the years 443 (1051) and 622 (1225). At the conquest of Baghdād by Hūlāgū in 656 (1258) it was again laid in ashes. It may be mentioned that in 1801 on the occasion of the Wahhabī invasion the treasures of the sanctuary were removed from Kerbelā to Kāzīmāin; see Jacob in A. Nöldeke, *op. cit.*, p. 48, note 1.

Opposite Kāzīmāin, on the left bank of the Tigris, connected with it by a bridge of boats, is the suburb of al-Mu'azzam (see above, i. 568^b—569a), a stronghold of the Sunnis and a kind of national sanctuary of the Turks. In this place of about two thousand inhabitants is the highly venerated sepulchral mosque of Abū Ḥanīfa, the founder of one of the four orthodox schools of Muḥammadan law (q. v., d. 150 = 767). On this tomb cf. M. von Oppenheim, *op. cit.*, ii. 241; Streck, *op. cit.*, i. 162; Le Strange; *Baghdad*,

p. 190—192; Langenegger, *op. cit.*, p. 61—62; Massignon, *op. cit.*, p. 78—79. It is from the epithet of Abū Ḥanifa, al-Imām al-A'zam or al-Mu'azzam (= the highly venerated Imām) that this suburb of Baghdād takes its name.

KĀZIMĪ, the name given by Tipū Sulṭān of Mysore (1197—1213 = 1782—1799) to the 1/16 rupee (1 anna) in silver; it commemorates Mūsā al-Kāzim, the seventh Imām. (J. ALLAN)

KAZIMOF. [See KASIMOW].

KĀZWĪN (formerly Kash-win), a town in Persia in the province of Irāq 'Adjami 100 miles from Teherān at the foot, on the south, of Mount Alburz [q. v.] at a height of 4,000 feet above sea-level; present population about 25,000.

The etymology of the name is uncertain. Al-Balādhuri (p. 321; cf. Ibn al-Faḡih and Qudāma) says that *Kash-win* means "the boundary which one watches", i. e. "well guarded"; it may also be explained as "the one who watches the corner", but this seems to be a popular etymology. It has been connected with *Caspian* (Spiegel, *Erān. Alterthumskunde*, i. 74, note 1).

Founded by Shāpūr I (Ibn al-Faḡih) and called Shād Shāpūr by him, it was besieged by al-Barā' b. 'Adib in 24 (644) and surrendered to him. The people adopted Islām to escape the imposition of the *ḡziya* (poll-tax). This strong place, which in Persian times had served as a barrier against the inroads of the mountaineers of Dailam, was used by the Mnslims as the starting point

for their campaigns against the latter. Muḡammad b. al-Ḥadīdīdī b. Yūsuf built a mosque there called Masjīd al-Thawr "mosque of the bull". The Caliph Mūsā al-Ilādī built a new town opposite the old one, called Madīna Mūsā. Mubārak al-Turkī, a freedman of al-Ma'mūn or al-Mu'taṣim, built a fortress there called Mubārakiya in which he put a garrison. When Hārūn al-Raṣhīd passed through the town on his way to Hamadhān the inhabitants of Kāzwīn asked and obtained a relief from their tithes, alleging that, living on the frontier, they had to fight for the faith. Hārūn built a mosque there and began to restore the ramparts which work was continued by the Amīr Abū 'Alī al-Djā'fari in 411 and finished by Ṣadr al-Dīn al-Marāghī, minister of Sulṭān Arslān, in 572. Ruined by the Mongol invasion at the beginning of the viith (xiiith) century Kāzwīn revived again under the Ṣafawis. Tahmāsp I lived there for long and 'Abbās I adorned it with fine buildings. In 1723 its inhabitants drove back the Afghāns. Kāzwīn has retained a certain importance as the roads from Tabriz and from Resht to Teherān meet there; the latter is fit for carriage traffic and is used by motors. Kāzwīn is a depot for the silks of Gilān and Shīrwān and manufactures carpets.

AL-KĀZWĪNĪ, ABU ḤĀTIM MAHMŪD B. AL-ḤASAN AL-ṬABARĪ, a Shāfi'ī jurist, teacher of al-Shīrāzī. He belonged to Āmul in Ṭabaristān where he began his studies. In Baghdād he studied under Abū Ḥāmid al-Isfarā'īnī († 406), the law of inheritance under Ibn al-Labbān († 402) and the *Uṣūl* under Ibn al-Baḡillānī († 403). He taught in Baghdād and Āmul in 440 (1048/49). Al-Shīrāzī describes him as his best teacher. Of his works the following are mentioned: 1) *Kitāb Taḡrīd al-Taḡrīd*, a synopsis of the legal work of the same name by al-Mahāmīlī († 415); 2) *Rawḡat*, a synopsis of the *Lubāb al-Fiḡh* of al-Mahāmīlī (Ḥādījī Khalifa, *Kashf al-Zunūn*, No. 5702); 3) the *Kitāb al-Hiyāl fi 'l-Fiḡh* (ed. Jos. Schacht, Hanover 1924), the only one that has survived and one of the oldest works of the scanty Shāfi'ī literature on legal quibbles (*hiyal*). The book, unlike the Hanafī works of the same name by al-Shaibānī, al-Khaṣṣāf etc., was very little used for the practical purpose of getting round the Shari'a, but was rather primarily intended to point out legal quibbles which were forbidden or disapproved of, in keeping with the stricter Shāfi'ī standpoint, which regards the *hiyal* used by the Hanafīs as contemptible.

(HEFFENING)

AL-ĶAZWĪNĪ, ZAKĀRIYĀ B. MUḤAMMAD B. MAḤMUD ABU YAḤYĀ. For his genealogy, prae-nomina, etc., regarding which tradition varies (e.g. as early as Ḥādīdī Khālifa, *Kashf al-Zunūn*, ed. Flügel, iv. 189), cf. S. de Sacy, *Chrestom. Arab.*, iii. 445 sq.; Reinaud, *Géographie d'Abulféda*, i., Paris 1848, p. cxlviii. sq.; Wustenfeld in the *G. G. A.*, 1848, i. 347, and in his edition of al-Ķazwīnī, vol. ii., p. iii.; Ahlwardt, *Verzeichn. d. arab. Hss. d. kgl. Biblioth. zu Berlin*, v. 453.

We learn very little about his life from the Arabic biographical works and the brief references in his two main works. Al-Ķazwīnī was born about 600 (1203) at Ķazwīn [q.v.]. He belonged to a pure Arab family which had, however, been long settled in the cast. He left his native town at some date not exactly known, apparently not entirely of his own free will. In 630 (1233) he was living in Damascus where he made the acquaintance of the celebrated mystic Ibn al-ʿArabī [q.v.]. In the reign of the last ʿAbbāsīd Caliph al-Mustaʿīm (640—656 = 1241—1258) al-Ķazwīnī was living in the ʿIrāḳ where he filled the office of ḳāḍī of Wāsiṭ and Hilla. He died in 682 (1283). On the biography of al-Ķazwīnī cf. de Sacy, *op. cit.*, p. 448 sq.; Reinaud, *op. cit.*, i. p. cxliii. sq., and Wustenfeld, *G. G. A.*, 1848, i. 349 sq.

We possess two works by al-Ķazwīnī of approximately the same size, a cosmography and a geography which are two quite independent books. They both have something of the character of compilations but nevertheless reveal a very varied training not only in the various branches of natural science but also in political and literary history. Al-Ķazwīnī's essential merit lies in the fidelity with which he reproduces the results of his reading while his own observations and researches are not nearly so valuable. In spite of much that is fabulous that is contained in it, his *Cosmography* must be deemed a work of fundamental importance and is quite the most valuable book that the Arab middle ages have given us on this field. Of all the Arab geographers, al-Ķazwīnī best deserves the name of the mediaeval Herodotus or of the Arab Pliny, whom, however, he does not surpass in method or critical powers. The great prestige enjoyed especially by the *Cosmography* in the East down to modern times is shown not only by the large number of manuscripts in existence, but also by the Persian and Turkish translations and the very numerous quotations in al-Damīrī's [q.v.] *Ḥayāt al-Ḥayawān*.

Al-Ķazwīnī's style differs considerably from the classical language; it is swarming with solecisms. This style is perhaps to be explained from the fact that Arabic was not al-Ķazwīnī's mother-tongue.

1. The *Cosmography*. It bears the title *ʿAdjāʾib al-Maḥlūḳāt wa-Gharāʾib al-Mawjūdāt*. *ʿAdjāʾib al-Maḥlūḳāt* was the name of a cosmographical work in Persian used by al-Ķazwīnī compiled a hundred years earlier by Aḥmad of Tūs. There are a number of other books with this title in Arabic literature; but the most famous of all and at the same time the only one whose title has the addition *wa-Gharāʾib al-Mawjūdāt* is that

of al-Ķazwīnī; cf. Pertsch, *Verzeichn. d. türk. Hss. in Berlin*, 1889, p. 197, note 2.

The *Cosmography* consists of two parts the first of which deals with heavenly things and the second with terrestrial. After a very full introduction the heavenly bodies (sun, moon, stars etc.) are described; next the inhabitants of heaven (the angels) are dealt with; the first part concludes with a chapter on chronology. The second section discusses sub-lunar phenomena and the elements in general, especially the sphere of fire, air and water, natural history in the three kingdoms (minerals, vegetable and animal) and lastly man. The *Cosmography* also contains a great deal that is purely geographical as it describes the more important mountains, islands, seas, rivers and springs; in the *Geography* to some extent the same things are again dealt with, usually in the same words.

The manuscripts of the *Cosmography* differ very much from one another. There are longer and shorter versions and further abbreviated editions or more or less modified versions, sometimes published under another title. References to the manuscripts of the *Cosmography* are given by Pertsch, *Die arab. Hss. der Bibl. zu Gotha*, iii. 126—127; supplementary information in the *Cat. codd. Arab. Bibl. Lugdun. Batav.*, ii. 14. The oldest copy of the text is Cod. Monac. 464, which, according to Seybold, was written in 678 (1280) i. e. three years before the death of al-Ķazwīnī (cf. *Isl.*, iv. 260). Almost identical with it is the Cod. Sarre prepared about 1420 (see Taeschner, *Die Psychologie des Ķazwīnī*, 1912, p. 6; Saxl in *Isl.*, iii. 152).

Wustenfeld (see his edition of al-Ķazwīnī, vol. i., p. iii. sq.) distinguishes three different editions of the *Cosmography* all of which he believes to have been prepared by al-Ķazwīnī himself: the first of the year 661 (1263), the second of 674 (1176), much enlarged and considerably rewritten, and a third which is represented only by a single codex the latter part of which is incomplete (Gotha, N^o. 1508). The third edition on which Wustenfeld based his edition of the text has two titles, an earlier, *Tuḥfat al-Ķāʾinān*, and a later, *Mirʾāt al-Ķāʾinān*. In it, apart from other minor additions, we have two entirely new sections (on the different races of mankind and the various arts).

This idea of Wustenfeld's is, however, untenable, as Ruska has shown in his important *Ķazwīnī-Studien in Islam*, 1913, iv. 14—66, 236—262 (a summary of his researches was given in his article *Über den falschen und echten Ķazwīnī* in the *Mitteil. zur Gesch. der Medizin und Naturwissenschaft.*, 1914, xiii. 183—188). As a result of his analysis of the structure of the text of the anthropological and mineralogical chapters (especially of the section on the rain-stone) of the *Cosmography* based on a number of Arabic MSS. and Persian translations of the text Ruska comes to the conclusion that we must distinguish not three but four recensions of the *Cosmography*. Of these I (= Wustenfeld's II) is so far known only from two Gotha MSS.; II (Wustenfeld's I) is represented in many — some very old — MSS. and in the text of the *Cosmography* given on the margin of the printed edition of al-Damīrī. To this second recension also belongs the already mentioned oldest MS. of al-Ķazwīnī (Monac. 464) and the Codex Sarre. The Arabic original of Rec. III is lost; it is not certain what its relation was to the two preceding.

Its characteristic feature is the addition of chapters 7 and 8 on the races of men and on the arts. The Arabic original of Rec. III — of which the date and compiler are unknown — must also have been the original of the Persian translations as well as the basis for the version preserved in Rec. IV. The idea of a Persian version without an Arabic basis, i. e. of a retranslation of Rec. IV from the Persian, may be set aside as quite improbable. Rec. V, which is only represented in the already mentioned Cod. Gothanus 1508 defective at the end, represents a version of Rec. III. It is quite different from the text of the Persian translations in contrast to which it has marked interpolations; many chapters are amplified by considerable additions. It alone contains the extracts regarding the Turkish hordes of the tenth century from the journal of Mi'sar b. al-Muhalhil [q. v.] and Ibn Faḍlān's [q. v.] notes on the Slavs, Khazars, Russians, etc., as well as the excerpts on jewels from al-Khāzinī's book. This Rec. IV (= Wüstenfeld's III) cannot be from the pen of al-Ḳazwīnī himself. Gotha 1508, besides, as has already been mentioned, has a different title from the other three recensions and, indeed, expressly describes itself as a commentary (*sharḥ*) on al-Ḳazwīnī. Gotha 1508 is perhaps original; at any rate it was compiled by someone with a thorough knowledge of the old literature.

Wüstenfeld's edition of the text of the Cosmography therefore does not contain the genuine text of al-Ḳazwīnī but a much later recension of the xviiith century. Almost the whole of Wüstenfeld's volume (p. 73—368) follows the text of the recension o. Cod. Goth. 1508. But portions are omitted from this and replaced by portions from other manuscripts, which have also been used to fill up other gaps. Wüstenfeld's procedure has therefore given us an entirely arbitrary edition of the text. To obtain the true text of al-Ḳazwīnī's Cosmography it would be best to choose the older, shorter Rec. II (= Wüstenfeld's I) which also seems to have been the most widely disseminated. Among the numerous manuscripts of this recension the oldest Cod. Monac. 464 should be taken as a basis.

Extracts from the Cosmography also exist. One with the title *Kitāb al-Durar muntakāt min 'Adjā'ib al-Buldān* is in the Paris Bibliothèque Nationale; cf. de Sacy, *op. cit.*, iii. 449 sq., and de Slane, *Cat. des Mss. arabes de la Bibl. Nat.*, N^o. 2183. A similar abbreviation *ibid.*, N^o. 2419(3). The anonymous work '*Adjā'ib al-Makhlūqāt al-Sughrā*', i. e. "the little Cosmography" (also in Paris; de Slane, N^o. 2181) has much in common with the Cosmography.

On account of its relatively succinct form yet containing all essential information generally popular at the close of the middle ages, al-Ḳazwīnī's Cosmography was translated into various foreign languages, notably Persian and Turkish. As to the Persian translations their relation to the Arabic original has already been briefly discussed. But two or more recensions or paraphrases have to be distinguished among the Persian versions, the relation of which to each other and to the Arabic original requires still to be more closely investigated. One of them is called *Tuḥfat al-Ḡharā'ib* (Vienna MS., N^o. 1438; see Flügel, ii. 506 sq., and cf. thereon Pertsch, *Verz. der pers. Hss.* . . . zu Berlin, p. 367). On the Persian translations cf.

de Sacy, *op. cit.*, iii. 436; Wüstenfeld's edition of al-Ḳazwīnī, vol. i., p. xi., and Ruska in *Isl.*, N^o. 17, 260. There are also abbreviations e.g. London, British Mus. (Rieu, 1883, p. 463, N^o. 7). In Cambridge is a manuscript which also contains excerpts from the Geography of al-Ḳazwīnī; see Browne, *Catal. of the Persian Mss.*, 1896, p. 208 sq., N^o. 126. Ḥamza Ḍḥurī Asfarā'īnī Djalāl al-Dīn (d. 866 = 1461) composed a poetical synopsis of the second part of the Cosmography entitled *Ḡharā'ib al-Dunyā*. Of this the Bodleian in Oxford (Catalogue by Sachau-Ethé, col. 401—403) and the India Office in London (Ethé, *Cat.*, 79 and 191) have each 2 MSS. This synopsis forms the second part of a much more comprehensive poetical cosmology in four chapters which Ḍḥurī published under the title *Mir'āt*.

There are also various Turkish translations; on them cf. Taeschner in the *Z. D. M. G.*, lxxvii. 35. There is one by Aiyūb b. Khalīl finished in 977 (1570) in MS. in Vienna (Flügel, *Katal. der Hofbibl.*, ii. 508); it is entitled *Tadhkirat al-'Adjā'ib wa-Tardjamat al-Ḡharā'ib*. Another translation was made by the famous theologian al-Surūrī (d. 969 = 1561); there are manuscripts of it in London, British Mus. (Rieu, p. 107—109; Add. 7894 and Add. 24,954). The anonymous Turkish translation in the Berlin Library N^o. 177 (see Pertsch's Catalogue, p. 197—198) is probably different; its author has dealt very freely and arbitrarily with the Arabic original, has omitted many articles and added others in their place. The original work has been much abbreviated throughout and the arrangement of the matter is different. Another Turkish translation made by Ismā'il Pasha and dating from the year 1109 (1697) is only known from Ḥādīdjī Khalīfa (ed. Flügel), vii. 154, N^o. 14,608. The Berlin and London translations (Brit. Mus., Rieu, *Catalogue*, p. 206—209) also differ from the Arabic original and from almost all the Persian translations in that they include a book of countries, a synopsis of the Geography, as in the Cambridge Persian Codex mentioned above. Aḥmad Biḍḍān Yāzīdjī-Oghlū's work, '*Adjā'ib al-Makhlūqāt*', is probably only a free version of al-Ḳazwīnī's Cosmography; cf. Pertsch, *Katal. der arab. Hss. zu Gotha*, iii. 127, and Pertsch, *Verzeichnis der türk. Hss. . . . zu Berlin*, p. 199.

There is apparently a Čaghatai version of the Cosmography in the St. Petersburg Library (Chanykow, N^o. 108); see Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 127.

2. The Geography. The Geography exists in two editions with different titles; the older is called '*Adjā'ib al-Buldān*' and the later *Āthār al-Bilād wa-Akḥbār al-'Ibād*. The first recension represented by MSS. in Berlin (see Ahlwardt's Catalogue, v. 370) and Paris (de Slane, p. 392) dates from the year 661 (1263). The second, much enlarged and on some points completely altered edition dates from the year 674 (1275). On the two recensions and their relationship to each other see Wüstenfeld in his edition of the Geography, p. viii. sq.; he based his edition on the second recension which exists in numerous manuscripts. On the MSS. see the references in Wüstenfeld, *op. cit.*, vol. ii., p. iv. sq., and Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 152 sq.

In this work al-Ḳazwīnī gives a description of the earth following the Ptolemaic division into

seven climes or longitudinal zones (see the art. *IKLİM* and cf. also Taeschner in the *Z.D.M.G.*, lxxvii. 51 sq.). Within the seven climes the separate countries, towns, mountains, islands, lakes, rivers etc. are arranged in alphabetical order. Their remarkable features are described and many historical events connected with them are given. Considerable space is taken up by the sections on the life and work of famous men born in the various places. The book is therefore, like Yāqūt's Geographical Dictionary, loaded with historical and biographical material. In arrangement it is a geographical lexicon, like Yāqūt; only, as a result of the division into seven sections, it is less easy to consult. Many articles such as those on various mountains, lakes, rivers etc., are also found in the Cosmography usually with identical text.

There are also Persian translations of the Geography; manuscripts of them exist, for example, in St. Petersburg (Chanykow, No. 107; see Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 153) and in Oxford (Sachau-Ethé, *Catalogue of Pers. MSS.*, col. 401, No. 401). It has already been mentioned that a synopsis of the Geography of al-Kazwini exists in a Persian translation (MS. in Cambridge) and seems to have been inserted in several MSS. of a Turkish version of the Cosmography.

A synopsis of the Geography of al-Kazwini was made about 806 (1403) by al-Bākuwī 'Abd al-Rashīd b. Šalīh b. Nūrī, entitled *Talkhīṣ al-Aḥbār wa-Adwāib al-Malik al-Kahhār*. The inconvenient alphabetical arrangement of the names within the seven climes is retained; on al-Bākuwī and his book see Hājjdji Khalifa, ed. Flügel, ii. 399, No. 3529; Reinaud, *Géographie d'Aboulféda*, i., p. clxi.—ii.; Wüstenfeld in Lüdde's *Zeitschr. für vergleich. Erdkunde*, i., 1841, p. 59, and in his edition of al-Kazwini, ii., p. viii.; Aumer, *Katal. der arab. Hss. . . zu München*, p. 402; Brockelmann, *G. A. L.*, i. 481, ii. 213. A translation of this book based on a Paris MS. was given by de Guignes in the *N.E.*, ii. 386—545. On the relationship of al-Bākuwī's synopsis to al-Kazwini's original see especially Juynboll, *Lexic. Geograph. Marāsid al-Iḥṭā'*, vol. iv., p. lxxvii.—xcii. Al-Bākuwī usually adds the latitude and longitude to the places mentioned, which are lacking in al-Kazwini. He is also of use in correcting wrong readings in al-Kazwini and coming to a correct opinion on doubtful ones.

We may here say a little about the illustrations found in many MSS. of al-Kazwini's works, astronomical figures and tables, etc. Painted pictures are, it appears, only found in MSS. of the Cosmography. We may assume with certainty that the originals of al-Kazwini were full of such pictorial embellishments and of tables. Indeed, almost all the larger MSS. of the Cosmography are embellished in this way. Manuscripts which show gaps deliberately left for the insertion of pictures must also have been copied from illustrated originals; such are Gotha No. 1508 (cf. Ruska in *Isl.*, iv. 261) and London, India Office (*Catal.* by Roth, p. 209 sq., No. 725). Rude pictures are contained e.g. in Gotha 1507, Munich 463 and Vienna 1436; better Gotha 1506 and Vienna 1437; numerous fine illustrations in Munich 464 and Cod. Sarre (see supra); cf. thereon the Catalogue of Aumer (Munich), p. 192 sq.; Flügel (Vienna), ii. 505 sq., and Pertsch (Gotha), iii. 128 sq. The

Persian versions of the Cosmography also are usually adorned with miniatures e.g. the two Berlin Codd. 345 and 346 (see *Catal.* by Peitsch, p. 367 sq.) and London, Brit. Mus., No. 8 (*Catal.* by Rieu, col. 464), the latter with illustrations in the Indian style. Although these pictures with their illustrations of plants, animals, marvels of the sea etc. are very often quite fantastic in character and not infrequently pure invention, they ought not to be simply ignored in any future new edition of the Cosmography, as Wüstenfeld did, who has only reproduced the astronomical and other figures and tables in his editions of the Cosmography and Geography (cf. thereon Wüstenfeld, *Kosmographie*, p. iv. sq.). So far only a few facsimiles have been published by Moller in the old Gotha Catalogue, vol. i., from Gotha No. 1507. The miniatures in al-Kazwini's Cosmography have, however, been used in the discussion of important problems, e.g. by Saxl in his investigations into the history of the representation of the planets (in *Islam*, iii. 151 sq.). There he discusses the seven pictures of planets of Codex Monac. 464, which he also reproduces (Pl. 4, fig. 1—4 and 5, 6—8). Sarre in *Munchener Jahrbuch der bildenden Kunst*, i. 18 sq., discusses the somewhat different figures of the Cod. Sarre.

In criticising al-Kazwini's two works, it is also important to know what sources were used for them. A list of the authorities quoted in the Cosmography was compiled by Moller and there are two MS. copies of it in the Gotha Library; see Pertsch, *Katal. d. arab. Hss. . . zu Gotha*, iii. 131, No. 1509—1510. Wüstenfeld in the *G. A.*, 1848, i. 351—353, briefly discusses the sources known to have been used for the Geography (practically the same as for the Cosmography). According to him, about 50 authors are quoted in the Geography, including the more important geographers and historians. The following are specially cited for the geography of Spain: al-Qharnāṭi Muḥammad b. 'Abd al-Rahīm (d. 563 = 1168; on him see Wüstenfeld in Lüdde, *Zeitschr. f. vergleich. Erdk.*, i. 43) and al-Udhri Aḥmad b. 'Umar (d. between 476 and 478 = 1083—1085; on him see Jacob, *op. cit.*, i. 33 sq.). Abū Ḥamid al-Andalusī, d. 565 (1169), the author of a Cosmography entitled *Tuḥfat al-Aḥbāb* (on it see Jacob, *op. cit.*, iii. 69—94), is often quoted. The already mentioned Persian Cosmography of Aḥmad al-Tūsī (on it see Reinaud, *Géogr. d'Aboulféda*, vol. i., p. xlvi., and Peitsch, *Die pers. Hss. . . zu Berlin*, p. 366) is also found among the sources. Further may be mentioned the works of Avicenna, the so called *Petrology of Aristotle* wrongly ascribed to Aristotle (cf. the two works by Ruska; see *Bibl.*) and the *Kitāb al-Hayawān* of al-Djāhiz. Ibn Faḍlān and Mī'sar al-Muḥallil have already been mentioned. Many of al-Kazwini's sources e.g. the African travels of al-Djāhiz are now lost to us. Al-Kazwini also utilised oral information from foreigners e.g. al-Multānī Abū 'l-Rabī' Sulamān who had travelled in the interior of Africa. The remarkable information regarding various French and German towns which al-Kazwini owed to the Spaniard Ibrāhīm al-Tartūshī (d. 477 = 1085) was also probably communicated orally and not taken from a book; on this cf. Jacob, *op. cit.*, i. (third edition entitled *Ein arabischer Berichterstatter aus dem 10. Jahrh. über Fulda etc.*, Berlin 1896) iv. 137 sq.

As to the printed editions of the two works of al-Ķazwīnī, the first and only complete European edition is that of Wüstenfeld. The Geography (published as the second part of al-Ķazwīnī) appeared in Göttingen in 1849 and the Cosmography (= Part i.) in 1848. The value of the latter has already been discussed above. In the east the Cosmography has been repeatedly printed on the margin of al-Damīrī's *Kitāb al-Hayāt al-Hayawān*, e. g. in Cairo 1305, 1309 and 1330. An edition of al-Ķazwīnī printed in 1331 in Cairo (only the Cosmography) is mentioned in Harrassowitz, *Bericht über neue Erwerbung*, No. 2337. On earlier editions and translations of parts of the two works of al-Ķazwīnī cf. the references in de Sacy, *op. cit.*, iii. 431, 435, 450; Wüstenfeld in Lüdde's *Zeitschr. f. vergleich. Erdk.*, i., 1842, p. 49, and in his edition of the Cosmography, i. p. vi.; Pertsch, *Katal. der arab. Hss. . . zu Göttingen*, iii., 1881, p. 126. Of earlier editions of parts of the Cosmography we may mention: de Sacy, *op. cit.*, iii. 385—516, with Arabic text, p. 168—207 (sections on minerals, plants, men, with translation and full notes); L. Ideler, *Untersuchungen über den Ursprung und die Bedeutung der Sternnamen*, Berlin 1809, p. 373—405 (the text of the description of the stars with annotations); Volck, *Calendarium Syriacum Arabicum Latinumque edidit et notis instruxit*, Leipzig 1859 (dealing with the chapter on the Syriac months).

Of translations alone we may also note: Ethé's translations of the Cosmography, part i., Leipzig 1896; this only covers about the first half of the Cosmography (Wüstenfeld, i. 1—208); of especial value is the very full appendix of notes (with many textual emendations by Fleischer); J. Ruska, *Das Steinbuch aus der Kosmog. des Ķazwīnī*, Heidelberg (*Progr. der Oberrealschule*), 1896 (translation of Wüstenfeld, i. 208—245); cf. with this also J. Ruska, *Das Steinbuch des Aristoteles*, Heidelberg 1912, p. 81 sq.; J. Ansbacher, *Der Abschnitt über die Geister und wunderbaren Geschöpfe . . .*, transl. and annot., Erlangen (dissert.), 1905 (transl. of Wüstenfeld, i. 368—374, 448—451); Taeschner, *Die Psychologie Ķazwīnī's*, Tübingen dissert., Kiel 1912 (transl. of Wüstenfeld, i. 301—322).

Valuable material for a commentary on al-Ķazwīnī is further given by the works of G. Jacob and E. Wiedemann, who have translated and elucidated various shorter articles from the works of al-Ķazwīnī. Special mention should be made of Jacob's *Studien in arabischen Geographien*, part I—4, Berlin 1891—1892 (of which part I appeared in a third enlarged edition in 1896); E. Wiedemann has made many contributions on the subject to the *Mitteil. zur Gesch. der Medizin und Naturw.*, S.B.P.M.S. Erl., and to other periodicals; cf., for example, the references by Ruska in *Ist.*, iv. 336 (No. 303), xii. 270 (No. 76) and 277 (No. 129).

In conclusion, attention should be drawn to the fact that in preparing a new edition of al-Ķazwīnī's works Fleischer's own copy of Wüstenfeld's edition of the text, containing numerous emendations, which is preserved in the MSS. Dept. of the Berlin Library, should be utilised.

Bibliography: Besides works already quoted above: Hādījīr Khālifa, *Kashf al-Zunūn*, ed. Flügel, i. 154, No. 71; 188, No. 8072; iv., No. 8061; vii. 1259, No. 9340; Wüstenfeld in Lüdde's *Zeitschr. für vergl. Erdk.*, 1842, i. 49; Wü-

stenfeld in the *G. G. A.*, 1848, i. 345—355; Reinaud, *Géographie d'Ibn al-Batūta*, i., Paris 1848, p. cxlvii—ix; Rieu, *Catal. Géogr. . . in Musée Britannique*, ii., London 1871, p. 403, and *Suppl.*, London 1894, p. 473; Brockelmann, *Geschichte der arabischen Literatur*, i. 481—482 (M. Streck).

AL-ĶAZWĪNĪ. HAMD ALĀH B. ABĪ BAKR B. AHMAD B. NAṢR AL-MUSTAẒFĪ AL-ĶAZWĪNĪ, a Persian geographer and historian. He belonged to an old family of Ķazwīn of which he himself (*Tārīkh-i Ķazida*, ed. Browne, p. 839—842, 848) gives a full account. It was a Shī'ī family, which traced its descent from Hurr b. Yazid al-Riyāhī who fought at Karbala and had held the governorship of Ķazwīn since the time of the Caliph al-Mu'taṣim with only a brief interruption under the Sāmānids. In the time of Maḥmūd of Ghazna this office was taken from them, Hāmid Allāh's great-grandfather was accountant (*mustawfi*) of the 'Irāq, hence the family name. The author himself was appointed financial supervisor of the districts of Ķazwīn, Abhar, Zanjān and Tārimān (*Tārīkh-i Ķazida*, p. 598; cf. *Nuzhat al-Kulūb*, ed. Le Strange, p. 27; Engl. transl., p. 33) by the vizier Rashīd al-Dīn. In 677 (1278/79) another Mustawfi, Fakhr al-Dīn Aḥmad, was once more governor of Ķazwīn, but jointly with a certain Ḥusām al-Dīn al-Shīrāzī.

The year of al-Ķazwīnī's death is not given. The date of his birth can be easily calculated from the following data. We know that he finished his *Zafarnāma* in 735 (1334/35), worked at it for 15 years and began the book when he was 40 years of age (Rieu, *Supplement*, p. 173). This work was interrupted by the composition of the *Tārīkh-i Ķazida* (Rieu, *op. cit.*, p. 173; *Tārīkh-i Ķazida*, p. 5); the time spent on this is probably included in the 15 years. He was therefore 55 years of age in 735 and was born in 680 (1281/82).

Works. His intercourse with the celebrated vizier and historian Rashīd al-Dīn Faḥl Allāh († 718 = 1318), to whose entourage he belonged (his brother Zayn al-Dīn was *Nā'ib-i Diwān-i Wizarat* under the same vizier; see Rieu, *Cat.*, i. 81), aroused in al-Ķazwīnī a desire for historical studies (*Tārīkh-i Ķazida*, p. 4). About 720 therefore he began a great historical epic, the *Zafarnāma*, finished in 735, which was intended as a continuation of Firdawsī's *Shāhnāma*. Further details are given in the description of the unique MS. of the work in the Brit. Mus. in Rieu, *Supplement*, p. 172 sqq. The poem contains 75,000 *baits* and deals in three sections with the life of Muḥammad and the history of the Caliphate, the history of the Persian dynasties, and the history of the Mongols. The author gives no literary sources; according to Rieu, his statements regarding historical facts are very accurate and the Mongol part gives valuable information, which the author owes in part to his great-grandfather Amin Naṣr al-MustaẒfī. The last event which is mentioned is of the year 734 (1333/34). From the few specimens in Rieu it is not possible to pass judgment on the language and style. We are therefore grateful to Browne for giving in his *History of Persian Literature under Tartar Dominion*, p. 96 sq., a passage in 24 distichs dealing with the devastation of Ķazwīn by the Mongols. We can see the slavish copying of Firdawsī's style (a rhyme like *kushda shud-bargashda shud* is not without its parallel in Firdawsī's text as we

have it). Mention must also be made of the critical work which al-Ḳazwīnī (probably before he began work on the *Zafarnāma*) did on Firdawsī's *Shāhnāma*. The London MS. of the *Zafarnāma* has the text of Firdawsī edited by our author on the margin (Rieu, *op. cit.*, p. 172). Work on the *Zafarnāma* was interrupted by the compilation of a compendium of universal history, the *Tārīkh-i Guzīda* (finished 730 = 1330). This work comprises the history of the Muḥammadan world from the creation to 729 (1329) and is written in a very simple, indeed arid style, except for the preface which contains a dedication to Ghiyāth al-Dīn, son of the vizier Rashīd al-Dīn. The preface is followed by an introduction (*fātiḥa*) dealing with the creation of the world and then come six sections (*bāb*) dealing 1) with the prophets, 2) the old Persian kings, 3) Muḥammad and the Caliphs, 4) the dynasties of the Muslim period in Persia and adjoining lands, 5) scholars and poets, and 6) history and topography of Ḳazwīn. A *khātima* follows containing genealogical data and genealogies, which latter, however, are wanting in most MSS., according to Browne. Some of these manuscripts, like Brit. Mus. Add. 22,693 and that published by Browne in facsimile, have between *bāb* 4 and 5 a synopsis of the history of the Muzaḥfarid dynasty which is not by al-Ḳazwīnī (Rieu, *Catalogue*, i. 82; Browne, Gibb Mem. Ser., xiv/ii. 151 *sqq.*). The compendium must have enjoyed great popularity on account of its wealth of matter, for it has often been copied in the East and is therefore of frequent occurrence in European collections also. Browne, *J. R. A. S.*, 1900, p. 725, gives a list of the most important manuscripts; the one published in facsimile by him is not included; it was written in 875 (1453) and comes from a private Persian collection (Gibb Mem. Ser., xiv/i. p. xv.). The sources on which the book is based are given by the author (ed. Browne, p. 8). On this cf. Browne in the Gibb Mem. Ser., xiv/ii. 1 *sq.*, and *Hist. of Persian Literature under Tartar Dominion*, p. 87 *sqq.* They include the celebrated historians al-Tabarī, Ibn al-Aṭṭār, Ḥamza al-Iṣfahānī etc., also Persian authors of a later period, like Djuwainī, Niẓām al-Mulk's *Si-yāsat-nāma*, also the *Shāhnāma* and a *Tadhkirat al-Awliyā*, which, according to Browne, is the well-known work of the same name by Farīd al-Dīn 'Aṭṭār. The main source seems to have been Rashīd al-Dīn's *Djāmī' al-Tawārīkh*, with the second part of which the *Guzīda* agrees in arrangement (ed. Browne, p. xiii. *sq.*). Another work now lost, the *Saldjūknāma* of Ḳāḥirī of Nīshāpūr was used by al-Ḳazwīnī and by Rāwandī also in his *Rūḥat al-Sudūr*; on the relation of the *Rūḥat* to the *Guzīda* cf. Muḥammad Iḳbāl in his introduction to the edition of the first mentioned work (Gibb Mem. Ser., New Ser., ii. 30 *sq.*). The *Guzīda* itself is five times quoted in Dawlatshāh's *Tadhkirat al-Shu'arā*, among other things for the well-known story of the Sāmānid vizier Naṣr and Rūdāgī (Dawlatshāh, ed. Browne, p. 31, = *Guzīda*, ed. Browne, p. 382). Dawlatshāh once (p. 105) expressly quotes as his authority the *tadhkira* of poets preserved in the *Guzīda*. On the relation between Dawlatshāh's *Tadhkira* and the *Guzīda* see also Browne in the *J. R. A. S.*, 1899, p. 39 *sq.* Lastly it may be mentioned that the *Guzīda* itself is one of the sources of Mir-ḳhwānd's *Rawḍat al-Safā*.

Al-Ḳazwīnī's last work, the *Nuzhat al-Ḳulūb*, completed in 740 (Rieu, *Catalogue*, i. 419), is mainly geographical. It is divided into an introduction (*fātiḥa*), which deals with cosmography, and three sections (*maḳāla*), which deal with natural history, anthropology and geography. Then follows a concluding section (*khātima* or *kitāb al-khawātim*) on wonderful things and curiosities in Irān and other lands. As in the case of the *Tārīkh-i Guzīda* there is a large number of MSS. of this work (a survey of them is given in Le Strange's preface to his edition in the Gibb Mem. Series, xxiii/i., p. xiv. and xx.). On the sources of the *Nuzhat* cf. Rieu, *Catalogue*, i. 418; Browne, *Hist. of Pers. Lit. under Tartar Dominion*, p. 99. They include, as might be expected, the famous geographer Yāqūt, the older Kazwīnī, Ibn Khurdādhbih and others not so well known. The statements regarding Fārs are taken from Ibn al-Balkhī's *Fārsnāma*. That he, as Le Strange supposes, made use of official documents, taxation lists, as is to be expected from his position as finance officer, is very probable.

Bibliography: On his life see *Tārīkh-i Guzīda*, ed. Browne, p. 3 *sqq.*; Rieu, *Catalogue*, i. 80 *sq.*; *Supplement*, p. 172—174; the prefaces by Browne and Le Strange to their editions of the *Guzīda* and the *Nuzhat*; Browne, *History of Persian Literature under Tartar Dominion*, p. 87 *sqq.*

Tārīkh-i Guzīda: edition by Browne, Gibb Mem. Ser., xiv/i (facsimile of a manuscript), xiv/ii. (very full synopsis of contents in English and Index by R. A. Nicholson). Separate parts had been previously published: the greater part of the description of Ḳazwīn by Barbier de Meynard in the *J. A.*, 1857 (Ser. 5, vol. x. 257 *sqq.*); the section on the poets of Persia by Browne, *J. R. A. S.*, 1900, p. 721 *sqq.*, and *J. R. A. S.*, 1901, p. 1 *sqq.*; the history of the Islāmic dynasties of Irān and the adjoining lands in J. Gantin, *Tārīkh-e Gozīde*, i. (1903; no more publ.), text and French transl. Two portions from a St. Petersburg MS. (Ḥasan-i Ṣabbāḥ and sayings of Buzurjdmihr) in Salemann-Żukowski, *Persische Grammatik*, p. 3 *sqq.*, 41 *sqq.*

Nuzhat-i Ḳulūb: editions: Bombay 1311 (1894; I have not seen this, an edition of the whole work); *The geographical part of the Nuzhat al-Qulūb* . . . , ed. by G. Le Strange, Gibb Mem. Ser., xxiii/i. (text), ii. (Engl. transl.) 1915 and 1919. A part of the text had been previously published by Schefer, *Siasatnamèh*, Supplément, 1897, p. 141—235 (not accessible to me).

(V. F. BÜCHNER)

AL-KEF (الكف), a town in Tunisia, 110 miles S.W. of Tunis and about 20 from the Algerian frontier, situated in 36° 11' N. Lat. and 8° 30' E. Long. The population in 1911 was 6,312, including 1,200 Europeans and 800 Jews. Many of the latter are descended from the Jews who used to live among the Beduins, whose customs and dress they had adopted.

The word *kef* means "rock". It is given on account of the situation of the town on a spur of the Djabal Dyr at a height varying from 2,486 feet in the S.W. to 2,853 in the N.E. Before the establishment of the French protectorate, it was surrounded by a wall now in part destroyed. The area circumscribed by the wall contains many

buildings now in ruins and empty spaces, in compensation a European town is in process of formation on the plain near the station on the railway now connecting al-Kef with Tunis. At the foot of the wall rises an abundant spring, the 'Ain al-Kef, an object of veneration to the inhabitants and regarded by them as "marabout". Commanding the principal roads from Algeria to Tunisia, al-Kef was for long one of the busiest markets of the Regency; in economic importance the town ranked next to Tunis and Sfax. This is no longer the case since the building of the Tunis-Constantine railway to the towns in the valley of the Medjerda. Nevertheless the mineral resources of the adjoining country assure to al-Kef the elements of its future prosperity. The town was, and still is, a religious centre. The two most popular brotherhoods in the Regency, the Kādīriya and the Raḥmāniya, have each a much frequented *zāwiya* there.

Al-Kef is the ancient Sicca Veneria, a Punic town which became a Roman colony under Augustus. Very prosperous during the early centuries of the Christian era, it was in the Byzantine period one of the strongest places in Africa. There still survive many ruins, columns, capitals, fragments of statues, inscriptions, remains of temples, baths and Christian basilicas. The cult of Tanis, identified with Venus, whose name is found in that of the ancient town, may even have left some traces in local superstitions.

Sicca survived the Arab invasion of the seventh century A.D. The ancient name of the town continued in existence in the form *Shikḳa Banāriya*. This is the name used by al-Bakri (ed. de Slane, p. 33; transl. p. 82) in the *Kitāb al-Istibṣār* and even in Ibn Khaldūn (*Hist. des Berbères*, ed. de Slane, i. 220, 256, ii. 20; transl. ii. 42, 98, iii. 209). We know very little of the history of the town till the seventeenth century. Ibn Khaldūn, however, tells us that it was governed at the beginning of the sixth (twelfth) century by a certain 'Iyād b. Naṣr Allāh, who succeeded in protecting it against the incursions of the Illālās and whose son submitted to 'Abd al-Mu'min in 554 (1159—1160). In the following century the Sulaim settled in this region and incorporated the Howāra Berbers, who had been settled there since the beginning of the second century A.H. In the beginning of the sixteenth century A.D., al-Kef and the surrounding country were occupied by the 'Ulād Sūla, a section of the Banū Shennūf, who attached themselves to the Muhalhil, one of the two great families into which the Sulaimī Ku'ūb were divided.

Under Turkish domination, the region of al-Kef played an important part in the fighting between Algerians and Tunisians, especially in 1628, 1685, 1694, 1705, 1746 and 1756. The rulers of Tunis during this period tried to make al-Kef strong enough to bar the invader's road to the capital. Muḥammad Bey scattered the Banū Shennūf, put in their place a makhzen formed by the 'Ulād Ya'qūb, and stationed a *smala* of spahis near the town. The Bey 'Alī built a *kaṣba* in 1675, so strong that the place was able to repulse an Algerian attack four years later. In 1739—1740 'Alī Pasha built a wall round the town and placed forts on the cliff which commanded the *kaṣba*. In spite of these precautions, al-Kef, which had been unsuccessfully attacked by the Algerians in 1746, was taken by the Dey's troops in 1756 after a siege of thirteen days. In

the beginning of the nineteenth century a new *kaṣba* was built (1813) by Hamada Pasha, who said that "if his body was at Tunis, his head was at al-Kef". The garrison was put under the command of an *aḳha* independent of the *zāwiya* or civil governor. The taking of Constantine in 1837 by the French, by holding the Regency of the dangerous proximity of the Turks, lessened the military importance of al-Kef, the fortifications of which were now only used to protect the town against Beduin raids. During the Tunisian expedition, the French troops entered the town without striking a blow on April 25, 1881.

KELĀT. [See KALĀT].

KELEK (P.), a raft consisting of beams bound together with rope and placed upon inflated sheepskins. These rafts are chiefly used on the Tigris where this river is not navigable for ships. They are described as early as Herodotus (i. 194) and Xenophon (*Anabasis*, i. 5, 10; iii. 5, 9 *sqq.*). They are still used at the present day and are mentioned by nearly all travellers in Mesopotamia.

KEMAKH (KAMAKH, KAMKII, Greek Κέμαχ), a fortress situated on the southern bank of the Euphrates (Kara Su) in its course North-East to South-West, before it takes a sharp turn to the South. The river is here confined between high rocks to such a degree that there is no longer room for the highway that has hitherto accompanied its course. The town, which till late in the sixth century was one of the fortified places of Asia Minor, is situated on the mountain-slope and surrounded by gardens and orchards. In spring the many mulberry trees attract myriads of quails, a phenomenon which is looked upon as something miraculous. The river is still utilized by the natives for floating down-stream timber which is cut in the forests in the neighbourhood. The salt, cheese and linen manufactured at Kamakh had a high reputation.

Higher up the mountain is situated the fortress which, chiefly on account of its natural position, was considered to be impregnable. It is said to have borne the name of Ani and to have been one of the chief places of the Armenian kings as well as of the Arsacids who had here their temples, treasury, state-prison and who were also buried in

this place. The descriptions of Ani as a royal residence have some resemblance to those of the other place of the same name (see the art. ANI) situated on the Arpa Çai.

Kemākh was taken by 'Umar b. al-Ḥubāb al-Sulamī in the year 59 A.H. It has, however, from that time onwards often changed its master. In 133 (751/52) it was besieged by the Emperor Constantine. The 'Abbāsī caliph al-Manṣūr tried to strengthen his hold on it by a restoration of the citadel; it is said that he intended to use it chiefly as a bulwark against the invasions of the Khazars. In 177 (793/94) it was besieged by the Byzantines. Ḥamd Allāh Mustawfī (born 680 = 1281/1282) mentions it as a small town. The Ottoman Emperors Bāyazīd and Selīm took it after a siege, the former, at the hands of his general Timurtash, in 1396, the latter in 1515. Tīmūr belcaguered it for seven months, without being able to take it. According to J. Brant, who visited the town about 1830, its population consisted at that time of 400 Turkish and 30 Armenian families; it was the residence of one of the last Derebays [q.v.]. Kemākh is the chief place of the Kaṣā of the same name, Sandjāk Erzindjān, wilāyet Erzerūm. It is the residence of a *kā'im maḳām*. In the vicinity are numerous *turbās*. At the present day it is still an important centre of commerce and industry.

The population of the Kaṣā consist of 14,547 Muḥammadans, 3,503 Greek Armenians, 189 Protestant Armeuans and 633 orth. Greeks (Cuinet).

KEMAL AL-DĪN ISMĀ'IL, a Persian poet of Iṣfahān, son of Djamāl al-Dīn 'Abd al-Razzāk, was one of a group which devoted its eulogies to the family of the Sā'idis (also called Āl-i Khudjandī) which kept political and judicial power in its control in Iṣfahān. Surnamed *Khallāk al-Ma'āni* "creator of thoughts", he dedicated his odes mainly to the judge Rukn al-Dīn Sā'id b. Mas'ūd, but also to the Khwārizmshāhs ('Alā' al-Dīn Takash, Muḥammad, his son, Djalāl al-Dīn and Ghiyāth al-Dīn, his grand-sons) who ruled in 'Irāk-Adjami, as well as to the Atābeks of Fārs who ruled at Shirāz (Sa'd b. Zangī and his son Abū Bakr). In the end he retired from the world and devoted himself to the mystic life under the guidance of Shaikh Shihāb al-Dīn 'Umar b.

Muḥammad al-Suhrāwardī. He was tortured and put to death on Djamādī I 2, 635 (Dec. 21, 1237), at the capture of Iṣfahān by the Mongol soldiers of the army of Ogoṭai, son of Čingiz Khān, who hoped to find hidden treasure in his house. His *Diwān* has been printed at Bombay (n. d.); there are partial translations by Louis H. Gray, put into English verse by Ethel Watts Mumford (*Hundred Love Songs*, New-York 1904) and by Theodosius Garrison (*Lippincott's Mag.*, lxxv. 783), of the 15 quatrains published by Salemann-Shukovski, *Persische Grammatik*.

(CL. HUART)

KEMĀL KHODJANDĪ (KAMĀLA-DĪN MAS'ŪD), a Persian lyric poet, born in Khudjand in Transoxania. He followed the mystic path, went on a pilgrimage to Mecca and on his return settled in Tibriz the climate of which had pleased him. On the capture of this town by Toktamish-Khān, he was taken to the town of Sarāi at the request of this prince's wife. He remained there four years. Having returned to Tibriz the Djālā'irid Sultān Ḥusain, son of Sultān Uwais, had a house built for him. He likewise received favours from Miān Shāh, son of Tīmūr and governor of Ādharbāidjān, who paid his debts. He died there in 792 (1390) according to Dawlat Shāh, or 803 (1400) according to Khondemir. He was buried in the Farah-bakhsh quarter where his tomb became an object of pious visits. Ten of his *ghazals* have been published by Bland, *Century*, p. 9—12. There is, in the national library of Vienna, a very beautiful manuscript of his poems illuminated with miniatures (Flügel, *Die arab., pers. u. türk. Handschr. zu Wien*, i. N^o. 581).

Bibliography: Dawlat Shāh, *Tadhkirat al-Shu'arā'*, p. 325; Luṭf 'Alī Beg, *Ātesh-kada*, in the section on Tūrān (not paginated); Ridā Kuli Khān, *Madjma' al-Fuṣṣahā'*, ii. 29; J. von Hammer, *Schöne Redekünste Persiens*, p. 255; Khondemir, *Ḥabib al-Siyar*, iii. 3, p. 90; Sir Gore Ouseley, *Biographical Notices of Persian Poets*, p. 192—194; H. Ethé, in the *Grundriss d. iran. Philologie*, ii. 304.

(CL. HUART)

KEMĀL MEHMET NĀMIK, one of the most important of Turkish poets, stylists and authors, the principal leader of the Turkish moderns, creator of the modern Turkish prose language and the most notable Turkish patriot of modern times. Kemāl, born on Dec. 21, 1840 (Shawwāl 26, 1256), in Rhodosto on the Sea of Marmara, belonged to an old aristocratic family which could be traced back through his father, the astronomer Muṣṭafā 'Āsim Bey, his father Shāms al-Dīn Bey, the first Chamberlain of Sultān Selīm III, and his father, the admiral Kapudan Aḥmad Rātib Pasha, to the Grand Vizier Topal 'Oṭmān Pasha, the conqueror of Nādir Shāh of Persia. His father belonged to Yeni Shehir in Anatolia and his mother to Konica in Albania. The Albanian strain in him was of the highest importance and explains much in his

indomitable character and his strong passionate nature. In appearance he was quite like a European. He was liberal, open-hearted and attractive.

Kemāl had a rather irregular, unsystematic education at home; he had only nine months' regular schooling in Constantinople at the Bāyazid-Rüşdiyye and the Wālide-Mektebi. He was trained in Arabic, Persian and French by private tuition. In 1852 he was with his grandfather Shams al-Dīn Bey in Kars and later in Sofia where he began to write poems although only 14 years of age, quite in the style of Sūmbül-Zāde, whose *Diwān* had to serve him as a model for lack of other patterns. Returning to Constantinople in 1857/8 he entered the translation bureau of the Suhlīme Porte and soon became a member of the then flourishing group of poets of the old school: Nā'ili, Māzlum Pasha-Zāde Memdūh Fā'ik, Hālet, Hersegli 'Arif Hikmet, Ghālib and Kāzim, who imitated Neẓ'ī and Fehīm chiefly. Kemāl quickly won an honoured place among them. He put together a slim *Diwān-i Müretteb* of not very original poems. In his poems he took the pen-name of Nāmīk. It is remarkable that the last incomplete *ghazal* of the *diwān* is the first of his patriotic poems.

He only entered upon the field he was to make his own through Shināsi Efendi, who had studied in Europe and was now in Constantinople endeavouring to attract men of intellect to western culture and ideas, mainly in his capacity as editor of the influential newspaper *Taṣwīr-i Efkiār*. Kemāl became friendly with him and soon fell completely under his influence, which directed him from the imitation of classical models to the spirit of the west. Kemāl grasped with ardour the new ideas, the importance of which he at once realised. He made it his aim in life to bring about a literary, political and scientific renaissance in old fossilised Turkey and to secure her a place among the nations of the West. He began his troubled career by writing for Shināsi's paper. Henceforth he wrote under the name Kemāl, which soon gained the greatest popularity.

When Shināsi [q.v.] fled to Paris in 1864 he left the editorship of his paper entirely in the hands of the young Kemāl, who at first found it a very difficult task. For a year he published almost nothing but translations from the French. Then important political questions (the Polish rising and the American Civil War) helped him to raise the standard of the paper which had gone down very much. He now took the field with political articles of his own which aroused the greatest interest on all sides and made the *Taṣwīr-i Efkiār* the most influential newspaper. It was in its pages that the expression "Young Turk" first appeared.

Kemāl became more and more embarrassing to the government. Although only 23 years of age, he had already been given the müteşarriḫlik of Kāle-i Sultāniye (Gallipoli) for a short time and next they wished him to become ambassador to Persia in order to get him away from Constantinople. But he did not accept this post. It was only with difficulty that he escaped being sent to Erzerūm. Kemāl had joined the Young Turk committee founded by Ziyā among the elements in favour of reform, the main object of which was to raise Turkey from her backward state and obtain a constitution. When the members were threatened with arrest, Ziyā, Kemāl,

Nūrī, Rifat and 'Alī Su'āwī fled from Turkey in 1866 to London where they settled down. At the time of this his first voluntary exile Kemāl was expecting the birth of his first child, who afterwards became the poet 'Alī Ekrem. In London Kemāl published the paper *Mukhbir* ("The Correspondent") on behalf of the party; it was later transferred to Paris and then replaced by the *Hürriyet* ("Liberty"). In Paris he studied law and economics and translated important French works into Turkish.

His stay in Europe was of overwhelming influence on his political and literary development. Henceforth he came back again and again to the subject of civilization. When, after the death of the Grand Vizier 'Alī Pasha, it became possible for the Young Turks to return home, Kemāl undertook the editorship in Constantinople of the Young Turkish paper *İbret*. He succeeded by his articles, which are of permanent value, in making the paper one of the most important in Turkey. At the same time he contributed to a number of other papers and periodicals and thereby completely influenced and revolutionised public opinion.

When Kemāl became inconvenient to the government by his political activity, especially through his patriotic drama *Waṭan*, which aroused unbounded enthusiasm, he was banished to the fortress of Famagusta in Cyprus. At first he was in the closest solitary confinement, where he planned in his subterranean cell his drama *'Akif Bey*, which he wrote out and printed as soon as the rigour of his imprisonment was slackened. He was detained in Famagusta for 38 months until the accession of Murād gave him his liberty and permission to return to Constantinople. But Murād only reigned 93 days. With the accession of 'Abd al-Hamid a limit was soon put once more to Kemāl's activity. Kemāl took part in the preparation of the constitution and shared in the deliberations with Midhat Pasha and Ziyā Pasha.

His liberal activities aroused the deepest mistrust in 'Abd al-Hamid. He was arrested and spent 5½ months in the common prison in Constantinople where he spent most of his time in historical study in preparation for a history of the Turkish army. In spite of his acquittal after a trial, 'Abd al-Hamid sent him to detention in Mytilene (Chios). This enforced inactivity was a great trial to him after the disastrous conclusion of the war with Russia and he expressed his feeling in songs like the touching Mühādjir song *Allāh iṣṣen öldür beni*.

After two years' detention during which he wrote the *Diḡāl* and the *Djesmī*, he was appointed müteşarriḫ of Chios. There the disease of the lungs, which was to cause his premature death, first broke out. When Chios became the capital of a wilāyet, he was moved to Rhodes, where the more favourable climate restored his health and revived his creative powers which had somewhat abated. With the assistance of a splendid library, for the enlargement of which at great personal expense he had agents in India, Persia, Egypt and Europe, he set about the preparation of a history of the Turkish empire.

From Rhodes he went to Chios, as müteşarriḫ again. He worked at his history with a feverish activity and, in spite of the fact that his health was much affected, displayed considerable literary activity in all other directions. The order forbidding the printing or continuation of

his history which came from Constantinople as the result of a treacherous denunciation of him was therefore a frightful blow and he died during the night after receiving the order, Dec. 2, 1888, in Mytilene.

His body was first of all interred in Mytilene in front of the mosque and then solemnly removed by his son 'Alî Ekrem to Bulair, 8 miles north of Gallipoli and there buried with military honours in the *türbe* of Sülaîmân Pasha, a worthy honour for the great patriot. 'Abd al-Hamid built a splendid *türbe* for Kemâl. While Sülaîmân Pasha's *türbe* was already a place of pilgrimage, Kemâl's *türbe* became to a still greater extent the goal of many Ottomans, who saw in him the incarnation of their ideals. The first thing done after the revolution of 1908 by the "Committee of Union and Progress" was to go solemnly from Salonica to his tomb at Bulair as to the grave of the "founder of the building of liberty" and pay homage to his manes. The unexampled moderation with which the victorious party proceeded was also a tribute to the influence of Kemâl.

The supreme and unique position occupied by Kemâl in Ottoman literature can hardly be too highly appraised. His influence on his own and the following generation was tremendous. He was perfectly aware of the difficulty of his task but always believed in a successful result, which was quite in keeping with his sanguine temperament. His personality — he was a born agitator and thoroughly revolutionary in spite of his aristocratic birth — with his unusual energy and inflexible and undaunted strength of will exercised an overwhelming attraction on the masses. He was filled with a deep, almost fanatical religious spirit, thoroughly Islâmic in its attitude and he believed in his people, his country and their future. Basing himself on the idea of the true Islâmic culture with a strong leaning to pan-Islâmic ideas which he endeavoured to realise by going back to primitive Islâm and rejecting the Islâm of the past which did not satisfy him, he evolved the idea of the Ottoman fatherland and was able to impose it on his "lethargic" people. It was Kemâl who first awakened his countrymen to the conception of *Waṭan* (fatherland), which was later replaced by the Turkish *Yurt*, and to the conception of *Millet* (nation) and *Hürriyet* (liberty) which the Young Turks took as their watchwords.

Kemâl remained faithful to his task which he regarded as a kind of apostolic office, in spite of the most difficult conditions. His talent as an author was certainly not small but this does not completely explain the almost magical influence which he has exerted down to our own day. The most recent Ottoman literary criticism is rather inclined not to estimate him so highly. But what no critic can deny him, what places him high above all others is his thirst for freedom, his patriotism, and the fearlessness with which he expresses his ideas and above all his masterly command of language. When he began writing, he found the language in a chaotic condition, at his early death he left it a wonderfully modelled instrument. The creation of the modern Turkish prose language is undeniably Kemâl's work.

In his political and literary essays Kemâl is vigorous and convincing when he wants to defend any view. No one has surpassed Kemâl in his essays.

His longer works have a tendency to resemble a series of collected articles rather than a consecutive whole.

The admiration in which he was held found expression in his many imitators.

Works. Kemâl was not primarily a poet. Besides his *Divân* written in the old style, although already showing traces of new features (love of country and people) and adopting modern ideas (theatre, steamer), in the *ghazal* he composed a not very large number of powerful poems which passed from mouth to mouth like revelations. He was readily followed simply because he still paid part tribute to old ideas in his poems. Many poems are scattered through his works and many went unprinted from hand to hand. They all show his deep patriotism.

In his *Wavaila* ("groaning, wail", reprinted 1326=1908) Kemâl laments his fatherland which is wrapped in a winding sheet. His *Bârîke-i Zafar* ("Flash of Victory", 1872) written in an elaborate style is a panegyric on the conquest of Constantinople. His enthusiastic *Waṭan Manzûmesi* did not appear till 1326 (1908).

Kemâl's main success as an author was won by his dramas of which he wrote six. He might be regarded as the creator of the Turkish drama. In the play by Abu 'l-Ziyâ Tewfik, his most devoted friend and follower, *Edjel-i Kâdâ* ("The Threatened Fate", 1288=1871/72), the first national Turkish drama, he was a silent collaborator although his name was never mentioned. He then tied his skill independently and wrote:

1. *Waṭan yâkhod Silistra* ("Fatherland or Silistria"), a play in 4 acts first printed in 1872 and often since (transl. into Russian by W. D. Smirnow in the *Wiestnik Ewropi*, 1876, ix, 151; German by L. Pekotsch, Vienna 1887). The play, which is important from the sociological and psychological points of view, depicts heroic scenes in the defence of Silistria in 1854. The piece aroused tremendous enthusiasm and was the main cause of his banishment to Famagusta.

2. *Zavallî Çocuğ* ("The Poor Child"), a drama in 3 acts (1873). It describes the consequences of the abuse of parental authority over the child and is an attack on the traditional manner of arranging marriages. Kemâl deals with the new idea of the freedom of women to feel and to love. The influence of "La Dame aux Camelias" is unmistakable.

3. *Âkif Bey*, a drama in 5 acts (1874). In this the patriotism of the Turkish naval officer is emphasised and contrasted with the faithlessness and inconstancy of his wife who abuses the absence of her husband.

4. *Gül-nihâl*, a drama in 5 acts (1875), probably based on Hamlet, extolling the motive of vengeance, especially woman's vengeance and rebellion against despotism.

5. *Djâlâl al-Din Khwârezm-shâh*, a tragedy in 5 acts (1875), with a long literary introduction (*mukaddeme*) on the defects of Ottoman literature and the technique of the drama, first published by Rodoslı Sâlih Djemâl, then printed in Cairo without the introduction in 1292 (1875); the *mukaddeme* alone is printed in *Medjmu'a-i Abu 'l-Ziyâ*, No. 41 (1885), and *Kitâbkhâne-i Abu 'l-Ziyâ*, No. 69. It is a romantic tragedy from Persian history in the style of Hugo's "Cromwell" and "Hernani". *Djâlâl* is thought to mark the zenith of Turkish romanticism. It is a drama intended to be read

only, a passionate protest against the government system of the Ottoman Sultāns. On account of its obvious bias the piece was always suppressed by the censor.

6. *Qara Belâ* "Black Misfortune", first published in the *K'ulliyât* in 1908, written in Famagusta in 1875, describes the violation of an Indian Emperor's daughter by a negro who has smuggled himself into the harem as a eunuch and takes the place of her lover. The dishonoured lady commits suicide by poisoning herself on the eve of her marriage after killing the black monster.

Smirnow seems to be wrong in ascribing a drama *Anadolu K yleri* to Kem l, for which the Sult n is said to have granted him a special reward.

Kem l's dramas suffer from a lack of naturalness, a want of lucidity in the inner motives, from sentimentality, too much patriotic pathos and from tirades. But he knows how to grip the attention of his audience and carry them with him. A certain psychological depth cannot be denied him. The Turkish theatre was then something quite new. The plays are great achievements for their time and circumstances, in spite of all their dramatic and technical defects, especially as Kem l was mainly concerned with using the drama as a medium to carry his ideas to the masses and to arouse the feelings dormant in the people. For him the theatre is "an amusement useful to influence the people".

He followed similar lines in his two novels, which have the same defects. But in them we have the typical features of Turkish life and thought vividly and realistically portrayed. From the point of view of style they reveal great beauty. The influence of his novels was great; they became the model for a whole school whose most ardent representative was Wedjhi. The two novels are:

1. *Intib h y k d 'Al  Beyi n Serg zesht * "The Awakening or 'Ali Bey's experiences" (1874; the original title is said to have been *S n Peshim nl k*). It is the description of the adventures of a rich spoiled mother's darling, who falls into the clutches of a harlot, deluded by her intrigues heartlessly sacrifices his innocent sweetheart and is completely ruined, until finally he kills his mistress, after the sweetheart whom he has abandoned has saved him at the cost of her own life, and ends in prison.

2. *Diezm *, a historical novel (1297 = 1880, printed 1305 = 1887/1888), the romantic love story of ' dil Girai of the Crimea and the sister of the Sh h of Persia during ' dil Girai's captivity in Persia in the xvth century. The main facts are taken from history; *Diezm * marks an important technical advance on *'Al  Bey* in the compactness of its style and its wealth of colour. Panisl mic ideas are very evident in it.

The most noteworthy of Kem l's historical works are: 1) his biographies *Ewr k-i Perish n* "Scattered Leaves" (1301) in 4 parts in which he gives accounts of the lives of four remarkable Mu ammadan men, writing in a learned style in the European manner, in the further development of his Isl mic tendencies; the four are: the Aiy bid Sal h al-D n, the Ottoman Sult n Mehmed II, Selim I Yawuz and the Emir Newr z Bey. The collection is considered a classic among the Turks, both in language and learning although it is only a good compilation, mainly taken from European

sources. In vividness of description and vigour of style they take almost the first place among his works; 2) *Der r-i Istil * "The Period of the Invasion"; 3) *K ni a*, the story of the capture of the fortress of Kanisza in Hungary, written in 1290 (1873) in Famagusta and printed anonymously the same year.

4) Kem l was a passionate believer in the vitality of Isl m. There is, however, in his views a certain lack of coherence between the Muslim ideas and the Rousseauian formulae which he has adopted. He endeavours to prove the equal worth of Isl m with the ideals of modern civilisation, which are in the end ideals of Isl m also; Isl m was in no wise backward down to the xvth century, and had only to give way to the superiority of Europe with the rise of experimental science. In reply to Ernest Renan's attempt to prove the hostility of Isl m to education, Kem l wrote a defence *Ren n Mud f 'a-n mesi* published in the *K'ulliy t*, which is based on much sounder foundations than the other Mu ammadan pamphlets combatting Renan's views.

5) *Med k l*, the history of ancient Rome and the history of Isl m which comes down to 438 (1046), were intended as an introduction and a foundation for his Ottoman history. The latter runs from the beginning of the empire to the death of Sult n Selim I Yawuz in 926 (1520).

6) *K y * "The Dream", the most vigorous and inspired of his writings, which every Turk must have read at the time of the reaction, dreams of the days when the chains will fall in the fatherland. It has been often reprinted, for example twice in Cairo (*I jti h d*) in 1907 and 1909.

7) *Serg zesht * (1326 = 1908) also describes a dream.

Kem l was above all a publicist (see above). He raised the * bret* to be an ideal newspaper. His articles which appeared in it are still reprinted again and again and put into collections. The separate numbers of the newspaper are still carefully preserved.

As a critic he also displayed a comprehensive activity, an appreciation of which has been given by Gibb. He mercilessly shattered the old Parnassus and helped the new school to victory. There is much criticism in his essays and in his *M kaddeme*. When Ziy  Pasha, his old comrade in arms, made a rather unfortunate selection in an anthology of Turkish literature in his three volumes *K har b t*, Kem l wrote two vigorous criticisms of the first two volumes, *T k rib-i K har b t*, 1298 = 1881, and *T k rib-i K har b t*, reprinted in 1303, which Gibb considers among the best essays in Turkish.

Kem l's letters are of great importance, as he corresponded with almost all the leading personalities in Turkey, political as well as literary. Unfortunately they are only in part published so far, for example the letters to Mid hat Efendi, 'Irf n Pasha, a part of those to Abu 'l-Ziy  Tewfik, 'Abd al-H k k H mid and others. He wrote naturally and vigorously and was the first to teach his people the epistolary style.

We must not omit his official papers. However conventional and crabbed Ottoman official style is, he nevertheless succeeded in giving it lucidity and clearness. The number of official documents which he composed in his different official positions is legion. They are essays on the

creation of the state and its reforms, the rights of the people, its intellectual and ideal requirements, on law, history, political economy, social philosophy, schemes, protocols, semi-official documents, etc.

Finally we may mention his numerous translations: *Behâr-i Dâniş* ("Springtime of Knowledge"), translated with a literary introduction from the work of the Indian *Shaiḡh* 'Ināyat Allāh. He also translated from the French of Victor Hugo, Lamartine, Montesquieu, J. J. Rousseau, Condorcet, Volney, etc.

A complete edition of his works was begun by his son 'Alī Ekrem. But his scheme was too ambitious and he broke down in the middle of it. The biography of Kemāl promised by 'Alī Ekrem has, so far as I know, not yet appeared. It is unfortunate that the essay on Kemāl's place in literary history by Dr. Rizā Tewfik has not yet been published.

Constantinople 1632; Eshref, *Hasb-i Ḥāl yakḡhoa Eshref we-Kemāl*, Constantinople 1908; Emin 'Othmān, *Hadīḡatü 'l-'Udeba*, Constantinople 1299 and 1327; Sheḡhāb al-Dīn Süleimān, *Tāriḡh-i Edebiyāt-i 'Othmāniye*, Constantinople 1328, p. 325—331; 'Abdu 'l-Ḥalim Memdūh, *Tāriḡh-i Edebiyāt-i 'Othmāniye*, Constantinople 1306; Midḡhat Djemāl, *Nef'is-i Edebiye Manzūme Ḳlsmīl*, Constantinople 1329; do., a drama *Kemāl*. The complete edition intended to fill 7 volumes which Kemāl's son, 'Alī Ekrem, undertook to edit in 1910/11 was, according to the prospectus, to be as follows: first series 1) *Renan Müdaf'ā Nāmesi*; 2) *Ḳara Belā*; 3) *Maḡālāt-i Siyāsiye we-Edebiye and Rāyā*; 4) *Waṡan, Gülnihāl, 'Akif, Zāwallī Çodjuḡ*; 5) *Esh'ār-i Kemāl*; 6) *Djelāl al-Dīn Khwārezm-Shāh with the Mukaddeme*; 7) and 11) *Mekhtātib-i Khūṡūṡiye*, 2 volumes correspondence; 8) *Ewraḡ-i Perishān Medjmu'asī* (the biographies of Fātiḡh, Sültān Selim, Salāḡh al-Dīn Aiyūbi and of Emīr Newrūz; and *Dewr-i Isīlā*); 9) *Müntakhabāt-i Muḡarrerāt-i resmīye*; 10) *Djczmi and Intibāḡ*; 12) *Ta'ḡib u-Takhrir-i Khavābāt* and the critical writings. Second series: *Medḡhel* (introduction to history), *Tāriḡh-i Isīlām* and *'Othmanlī Tāriḡhi*; further his scattered papers, his numerous translations etc.; of the first series there were published 1, 2, 3 (6 parts); of the second series 4 volumes of the Ottoman history. (TH. MENZEL.)

KEMÂL-PASHA-ZÂDE, the usual name of the Ottoman historian, lawyer and stylist SHAMS AL-DĪN AḤMAD B. SULAIMĀN B. KEMĀL PASHA, often also called Ibn Kemāl-pasha.

Kemāl-pasha-zāde belonged to a distinguished family of Adrianople where he was born as the son of the wealthy Süleimān Pasha. His grandfather was Kemāl-pasha who, like his father, had taken part in repeated campaigns against the infidels and attained great prestige (on him see *Sidṡill-i 'Othmāni*, iv. 78). Kemāl-pasha-zāde served at first in Bayazid's army but was induced to take up a legal career by an experience which is minutely reported by Taḡhḡprūzāde. He was one day in the Grand Vizier's Diwān when Aḡmad, the son of Ewrenos [q. v.], entered and was received with great respect. Soon afterwards there appeared a man with shabby clothes and no head-dress, to whom the vizier, to Kemāl-pasha-zāde's surprise, showed even greater respect and even gave him the seat before the son of Ewrenos. He was the celebrated jurist Luṡfi of Toḡat (d. 904 = 1498). The ambitious youth, surprised at the preference shown to a *muderris* with 30 aspers over a nobleman of the empire, at once made up his mind to abandon the army and became Luṡfi's pupil. The latter lectured at the Dār al-Ḥadīḡh in Adrianople together with other celebrated professors, like Kaṡtallāni [q. v.], Khaṡib-zāde, Mu'arriṡ-zāde, on Muslim law subjects. After completing his studies, Kemāl-pasha-zāde was appointed teacher in the far famed medrese of 'Alī Beg in Adrianople but was soon afterwards summoned to Üṡküb as *muderris*, finally to return to Adrianople to the Ḥalabiya medrese. After a great deal of hostility from the Chief Justice Ḥadṡidṡi Ḥasan-zāde, who was jealous of all rising talent and put every obstacle in its way, he was appointed by the Sültān, on the advice of the poet Mu'aiyed-zāde (*takḡalluṡ Ḥātīmī*, d. 922 = 1516), teacher in the Taḡhliḡ High School (= 'Alī Beg Medrese) at

Adrianople on a salary of 30,000 aspers. The influential patronage of Mu'ayyed-zāde procured him all sorts of liberties, so that he was able to spend some time in Sofia and some time in Dupnitsa (Bulgaria), to carry out with the greatest leisure the composition of the Ottoman history entrusted to him by the Sulṭān and at the same time to write the most varied works, sometimes on law, sometimes on history, sometimes on poetry and sometimes on rhetoric. Over 300 treatises etc. are said to have come from his pen in this period.

In the reign of Sulṭān Selim I, Kemāl-pasha-zāde in 1516 finally attained the rank of military judge of Anatolia and in this office accompanied the Padishāh on his Egyptian campaign. On the march he was commissioned to translate into Turkish, among other things, two works of the Arab historian Abu 'l-Mahāsīn b. Taghribirdī [q.v.] on the lands of the Caliphs. Every morning he handed his master an instalment of the translation, which, according to Hādījī Khalifa (N^o 5,878 and 13,616), was called *al-Kawākib al-Bāhira min al-Nudjūm al-Zāhira* (on this cf. Brockelmann, *G.A.L.*, ii. 42), and took the opportunity to enlighten the Sulṭān regarding the feeling in the army through a soldier-song, made up by him, expressing the desire for a speedy return home. Although Selim saw through the plan, he pardoned the poet and even gave him a present of 500 gold pieces as a mark of honour (cf. J. v. Hammer, *Gesch. des osm. Reiches*, ii. 519; H. F. v. Diez, *Denkwürdigkeiten aus Asien*, i. 283; also the *Defterdār* Abu 'l-Fadl's supplement [*Dhail*, part 4] to *Hesht Behisht* of his father Idrīs Bitlīsī, MS. of the Vienna National Library H.O. 16 d., fol. 126). After the return home, Kemāl-pasha-zāde resumed his old position as teacher in the Dār al-Hādīth, then at the Bāyazīdiyya in Adrianople and at the same time resumed his scholarly and poetical activities. On the lines of Sa'dī's *Bustān* and *Gulistān* he wrote in Persian the *Nigāristān* (i.e. "picture-gallery") (cf. Hādījī Khalifa, *Kashf al-Zunūn*, vi. 381, and *Der Islam*, vii. 118; extracts in German are given by Count v. Harrach in the *Funkgr. des Orients*, i. 401 sqq., ii. 107 sqq., iii. 47 sqq.). Kemāl-pasha-zāde is the author of an Ottoman history which begins in the year 836 (accession of Bāyazīd II) and goes down to the first Hungarian campaign of Süleimān the Great in 933. Manuscripts of the complete work seem to be exceedingly rare. The Sächsische Landesbibliothek in Dresden seems to have most parts of it (cf. J. H. Mordtmann's collation in *Der Islam*, xiii. 153 sq.), while in Vienna, for example, there are only fragments of the whole work which was perhaps written and issued in separate parts dealing with particular periods from time to time (part at least as early as the reign of Bāyazīd II) (cf. G. Flügel, *op. cit.*, ii. 220; on the work cf. H. Khalifa, *Kashf al-Zunūn*, ii. 111, N^o 2153). An edition would be very desirable and of considerable value in solving the problems of the old Ottoman chronicles. That Kemāl-pasha-zāde prepared a translation of the *Hesht Behisht* of Idrīs, as is stated in the *ʿIlmiye Sālnāmesi*, p. 347, is probably a mistake. Kemāl-pasha-zāde subjected the campaign of Mohács to a very full review, which was published for the first time with a French translation by Pavet de Courteille (*Hist. de la Campagne de Mohacs*, Paris 1859). There is a very good manuscript of it in the Dresden Public Library.

His poetical masterpiece is the story of Yūsuf and Zulāikha often dealt with before (e.g. by Ḥamdī, q.v.) and after him, but his treatment of the subject is peculiarly felicitous; his other poems, in which his sharp wit much admired in his lifetime and his intellectual nimbleness are revealed, are collected in a separate *Diwān* which appeared in 1313 in Stambul (cf. Gibb, *Hist. of Ottoman Poetry*, ii. 347—363, where a full appreciation of his literary activity is given). He further wrote a number of philological works of which we may mention here a dictionary to elucidate difficult Persian phrases, called *Daḡā'ik al-Ḥaḡā'ik* (cf. G. Flügel, *op. cit.*, i. 130). Of legal works special mention must be made of his *Risāla fi Ṭabaḳāt al-Muḡlitahidīn* which deals with the various classes of jurists (cf. G. Flügel, *Die Klassen der hanefit. Rechtsgel.*, in the *Abh. der Kgl. Sächs. Gesellsch. der Wiss.*, 1861, viii. 279, 280, 281, 346; MSS. of it in Vienna; cf. G. Flügel, *Die arab., pers. u. türk. Handschr. . . zu Wien*, ii. 612).

He left a vast number of commentaries on the *Hidāya*, *Taḡrīd*, *Miftāḥ*, *Tahāfut*, notes on the *Kur'ān*, marginal notes on the *Kashshāf* etc. which are represented in most eastern collections of Oriental MSS. (cf. e.g. G. Flügel, *op. cit.*, i. 130, 132, 133, 251, 291, 524, 710, 714, 722, 723; ii. 220, 221, 612; iii. 179, 215 sqq.; list of several treatises in Ahlwardt, *Berliner Kat.*, i. 12, N^o 19; collection of 59 treatises in the *Fihrist al-Kutub al-'Arabiya al-mahfiṭa bil-Kutubkhāna al-khādīwiya al-Miṣriya*, vol. vii., Cairo 1309, p. 435—444; also *Defter-i Kutubkhāne-i Aya Söfya*, Stambul 1304, N^o 4794, 4797, 4820; *Defter-i Kutubkhāne-i Laleli Džami*, Stambul 1300, N^o 2433, 3645, 3647. A collection of 36 treatises entitled *Rasā'il* appeared in two parts at Stambul in 1316 (lk-dām-press); cf. *Zeitschr. d. deutsch. morgenl. Ges.*, lxi. 525.

He even wrote on the subject of *bāḥ*, as his *Kitāb Rudjū' al-Shaiḡh ilā Shibāḥ fi 'l-Kuwwa 'alā 'l-Bāḥ* shows (printed Cairo 1316 and 1335; Turkish version: lithogr., n.d., 90 pp. in 8°).

Kemāl-pasha-zāde died on Shawwāl 2, 941 (April 6, 1535), at Stambul and was interred outside the Adrianople Gate in the monastery of Maḥmūd Celebi, where one of his pupils, Maḥmūd Bey, who died as Kāḡī of Cairo, erected a stone monument to his memory. Three chronogrammatic verses (*ta'rikh*) in Arabic were inscribed on his coffin, his shroud and his tombstone, the numerical value of which was each 941 (cf. *Ḥadiḡat al-Djāwāmi'*, i. 180, 181, and Ewliyā Celebi, *Şiyāḡat-nāme*, i. 345, esp. 359; cf., on the other hand, J. v. Hammer-Purgstall in the *Z.D.M.G.*, vi. 282, and *Sitzungsber. der Wiener Ak. der Wiss.*, 1851, vi. 326—328, according to which the date is 940, which is certainly an error).

Brockelmann, *Gesch. der arab. Lit.*, ii. 449—453 (where most of his works are given under their titles).

(FRANZ BABINGER)

KEMĀL RE'IS, Turkish corsair and sea-captain during the reign of Bāyazid II. In his youth he had been given as a present to the Sultān by the Kapudan Pasha Sīmān, after which he was brought up as a page at the court. He began his career as a chief of 'azabs, then took to the Mediterranean and captured in 892/1487 a Maltese Prince (*Sidjill-i 'Othmānī*, iv., 78). In 896/1490, by order of Bāyazid, he raided the Spanish coast in order to support the last Naşrid of Granada Mulay Hasan, who, in his critical situation had invoked the Sultān's aid. This expedition is only recorded by Hādjdji Khalifa in his *Takwīm al-Tawārikh* but not in his Story of the Naval Wars (*Tuhfat al-Kibār*) and it seems to be unknown to the other historians; in any case it cannot have been of much importance in view of the great difficulties of the Ottoman Empire occasioned at the time by the wars against Egypt and Austria. In 903 = 1497/1498 we find Kemāl Re'is marauding in the Eastern part of the Mediterranean with other corsairs; he took several Christian ships and brought his booty to the bey of Alexandria (ʿAshīk Pasha Zāde, p. 250); at this time therefore he probably was not serving the Sultān. But in the war of the Turks against Venice (905/1499) he was one of the admirals of the fleet. The Turkish fleet had three newly equipped unusually large battleships (turkish: *kāke*) of which one was commanded by the Kapudan Pasha Dāʿūd, and the two others by Kemāl Re'is and Burāk Re'is (Munedjdjim Bashī writes Budāk, so also Leunclavius: Budacus). In the naval battle of Sapienza (23 July 1499) the Venetians took the latter's ship for that of Kemāl Re'is on whom they particularly wanted to take revenge. Burāk Re'is was boarded by two big and some smaller Venetian ships; he defended himself with burning naphtha, until he, and his enemies, were blown up together: the island of Sapienza was called after him Burāk Re'is Adası. After this battle the Turkish fleet took Lepanto (Ine-Bakhtī). In the next year, after the towns of Koron and Modon had been taken by Turkish sea-power, Kemāl Re'is was sent with 40 ships to Navarino (Turkish Awārīn) of which town he captured the citadel from the Venetian commander Contarini. He died, according to Sāmī (*ʿĀmūs al-Aʿlām*, v. 3886), in the beginning of the xth century, perishing by a ship-wreck (*Sidjill-i 'Othmānī*).

Reiches*, Pest 1828, ii. p. 295, 316, 318, 327, 602; Leunclavius, *Annales Sultanorum Ottomanidarum*, Frankfurt 1596, p. 196.

(J. H. KRAMERS)

KEMĀNKESH (i. e. "Archer") ʿALĪ PAŞHA, an Ottoman Grand Vizier. He was born in the Anatolian district of Hāmīd-eli [q. v.], came early to Stambul, where he was brought up in the imperial palace. In 1030 (1620/1621) he was appointed governor of Diyār-bakr and soon afterwards of Baghdād. Next year he was given the rank of third vizier of the dome (*kubbe vezīri*). In Dhū'l-Ka'da, 1032, he was given the imperial seal in place of the dismissed Grand Vizier Mere Husain

Pasha, mainly through the efforts of the Shaikh al-Islām Yahyā Efendi, but also as a reward for his readiness in assisting in deposing the incapable and imbecile Sultān Muṣṭafā I. Kemānkesh ʿAlī Pasha, weak, timid and common in character, began by getting rid of his enemies and rivals by throwing the viziers Gurdji Mehmed Pasha and Khalil Pasha into prison and dismissing the Mufti Yahyā. His greed and avarice prompted him to the most contemptible embezzlements and frauds on the Treasury; he had coins minted with a slight proportion (barely one-fifth) of silver, put the pay of the Janissaries into his own pocket and in other ways let the state go to ruin. Within six months he had made a huge fortune by depreciating the currency and selling offices. Sir Thomas Roe who describes the Grand Vizier at his accession to office in a despatch of August 23, 1623, as "a man quietly honest, but of untried and therefore suspected ability for so great a charge" (cf. *The Negotiations of Sir Th. Roe in his Embassy to the Ottoman Porte, from the year 1621 to 1623*, London 1740, p. 173) talks on April 3, 1624, of "his owne sordid covetousnesse, who in six moneths had heaped up infinite treasure, by portsale of all justice and offices, which hath weighed him to the ground" (*op. cit.*, p. 230) and a Venetian report of August, 1624, puts his wealth at a "somma di 700,000 scudi in contanti, molto opportuna" (cf. J. v. Hammer, *G. O. R.*, v. 21).

The terrible state to which the empire was reduced (rebellions in Asia Minor and Egypt, the threat from Persia, the fall of Baghdād on November 28, 1623, concealed from the Sultān, Stambul without food, the currency depreciated, the treasury exhausted, the Janissaries out of hand) aroused to the highest pitch the wrath of the youthful Murād IV against the Grand Vizier responsible. Kemānkesh ʿAlī Pasha was summoned to the palace on Djumādā II 14, 1033 (March 24, 1624), and summarily beheaded. His body was buried in the forecourt of the mosque of ʿAtīk ʿAlī Pasha (cf. *Hadīkat al-Djāwāmiʿ*, i. 150; J. von Hammer, *G. O. R.*, ix. 75, N^o. 312). His successor was Çerkes Mehmed Pasha. Kemānkesh ʿAlī Pasha was married to a daughter of the celebrated Kādī-asker and Shaikh al-Islām, Bostānzāde Mehmed Efendi.

Bibliography: ʿOthmān-zāde Aḥmad Tāʾib, *Hadīkat al-Wuzarāʾ*, Stambul 1271, p. 72; *Hadīkat al-Djāwāmiʿ*, i. 150 sq. (with short sketch of his career); J. v. Hammer, *G. O. R.*, and J. W. Zinkeisen, *G. O. R.*, under Kemankesh Ali Pascha; Naʿīmā, *Tārikh*, Stambul 1280, ii. 294 sq.; Hādjdji Khalifa, *Fedhlike*, ii. 52 (execution); *Sidjill-i 'Othmānī*, iii. 510.

(FRANZ BABINGER)

KENĀ, a town in Upper Egypt, on the east bank of the Nile (23,357 inhabitants in 1917 against 17,485 in 1875, 15,402 in 1884 or 27,500 in 1897). It is the capital of the province (*muḍirīya*) of the same name which is divided into seven districts (*markaz*), namely: 1. Dishnā, 2. Isnā, 3. Kenā, 4. Kūsair, 5. Kūs, 6. Luksur, 7. Nadj Hāmādī. In 1897 the population of the province was 711,457 of whom 120,330 are in the province of Kenā. — The region produces cotton and cereals; in the town, cloth and sweet-stuffs are manufactured. But Kenā is especially noted for its porous pottery; the jars (*kulla*) which are made there are called

balīās from the name of a place a few miles to the south.

The Arabic name, written *lknā* by some geographers and *kūnā* in the Copto-Arab *scalae*, comes from the Coptic **ΚΩΝΗ** which give rise to a play on the Greek *καὶνὴ πόλις* "new town", a name which did not last long as it is never found in the Byzantine period. The identity of this town with the Neapolis of Herodotus has been seriously urged; it is rather the modern Minsha'a, the ancient Ptolemais. On the other hand it has been conjectured with much probability that at the end of the third century it received the name Maximianopolis.

In the first Arab period, the *kūra* of Kenā extended to the east of the Nile between that of Fāw on the north and Kīṣt in the south, in front of that of Dandara from which it was separated by the river. The first author to mention it, Ya'kūbī, gives a very unflattering description of the district: he says it is a little town rapidly going to ruin, deserted by its inhabitants who feared the raids of the Beduin robbers and brigands. Therefore when the new provincial divisions were made under Mustanṣir it was Kūṣ which gave its name to the district (*'amal*) and became its capital. Kenā remained unimportant for some time as Ya'kūbī only gives it a brief note and Abu 'l-Fidā' does not mention it.

Its prosperity was not long in beginning owing to the tomb of the saint 'Abd al-Raḥīm which became an object of pilgrimage while pious Muslims settled in its vicinity. Some years previously Ibn Džubair had mentioned Kenā as a pretty little town with houses of a dazzling whiteness; he makes special mention of the virtue of the women who never appeared in the streets. After Ibn Baṭṭūṭa, Aḍfuwī gives us an account of the merits of 'Abd al-Raḥīm; he describes the houses of the town as spacious and very high and mentions two *madrasa*'s in Kenā and a number of hospices (*ribāṭ*), Ibn Dūkmāḳ only copies Aḍfuwī. In the Turkish period Kenā was the residence of a *Kāshif* but it is only in modern times that it has assumed the administrative position which it owes to its present steadily increasing prosperity.

The town situated at the point where the Nile comes nearest to the Red Sea had become the point of departure for caravans in the direction of Kuṣair. This route took the place of the one used in the middle ages between Kūṣ and 'Aidhāb which in turn succeeded the ancient Copto-Berenice road. The continual intercourse between Egypt and Arabia and India gave these roads great value: it is by this route that many of the Muslims of North Africa go to Mekka and even during the Crusades it was the only pilgrim road. In 1831—1833 Muḥammad 'Alī had the wells inspected on the Kenā-Kuṣair road; some were deepened so that they would provide water at all seasons (cf. *L'Égypte Moderne*, collection *L'Univers*, p. 164—166; Barron and Hurne, *Top. and Geology of the East Desert of Egypt, Central Portion*, Cairo 1902).

The saint who is the object of Muslim veneration, 'Abd al-Raḥīm b. Aḥmad b. Ḥaḍjdjūn, twelfth descendant of Dja'far al-Ṣādiq, was born in the environs of Ceuta in Morocco. After a journey to Mekka where he spent seven years he settled in Kenā and died there on Ṣafar 9, 592 (Jan. 13,

1196). Honoured during his life for his reputation for sanctity and asceticism he has become one of the principal saints of Egypt along with Aḥmad Badawī, Ibrāhīm Dasūkī and Abu 'l-Ḥaḍjdjādī Aḳ-suri. At one time a pious formula used to be handed down which if recited beside the tomb hastened the realisation of a desire or brought about cures. According to some travellers, the pilgrims who came to Kenā made circuits (*ṭawāf*) of the tomb of 'Abd al-Raḥīm similar to those made by the pilgrims at the Ka'ba (Aḍfuwī, *Taṭīf Sa'id*, No. 231; Goldziher, *Muh. Studien*, ii. 315; *R.H.R.*, ii. 284; Gaudefroy-Demombynes, *Le pèlerinage à la Mekke*, p. 224). — There were descendants of 'Abd al-Raḥīm living in Egypt for two centuries: they were particularly jurists and professors (Aḍfuwī, Nos. 29, 117, 129, 308, 402, 405, 476, 553; al-Maḳrīzī, *Khīṭaṭ*, ii. 423).

Maspero and G. Wiet, *Matériaux pour servir à la géogr. de l'Égypte*, p. 130, 147—149, 153, 173, 175, 177—182, 184, 185—191; al-Batānūnī, *al-Khiṭaṭ al-Ḥiḍḡāsiya*, p. 31—32.

(G. WIET)

KEN'ĀN PASHA, also called **ŞARİ K. PASHA**, an Ottoman Grand Admiral. He was a Russian (? Circassian) by birth and came as a slave into the service of Bakīrdjī Aḥmad Pasha, Ottoman governor of Egypt. On the latter's execution he was taken by Sulṭān Murād IV into the Serai and educated there. He was promoted to be Agha of the stirrup-holders (*Rikāb-dār aghası*) (Chronicle of Wedjiḥī, fol. 91b of the Vienna MS.), became a favourite of Sulṭān Ibrāhīm after his accession (Febr., 1640) and married his daughter 'Ātike Sulṭāne. He was at the same time appointed third vizier but banished soon after Ibrāhīm's death (Aug. 18, 1648) to Crete. In Sept., 1652, he returned to Stambul and was appointed to the charge of the defences of the Dardanelles. On Sept. 9, 1653, he was given the governorship of Ofen, but deprived of it on Sept. 22, 1655, and on Febr. 9, 1656, appointed governor of Silistria. On May 3 of the same year he was appointed Grand Admiral (*Kapudān Pasha*, q.v.). On June 26, 1656, while in command of the Ottoman fleet sent out against the Venetians, he suffered a severe defeat in the Dardanelles, the greatest naval reverse inflicted on Turkey since the battle of Lepanto (cf. J. v. Hammer, *G.O.R.*, v. 649 sqq.). The whole weight of the Sulṭān's wrath fell upon Ken'ān Pasha who was immediately thrown into prison. He was finally released on the intercession of his Russian countrywoman, the Sulṭāna-mother (Kösem Wālide; q.v.) but was dismissed from the office of Grand Admiral almost immediately, on July 18, 1656. Two years later, on June 23, 1658, he was appointed Kā'im-maḳām [q.v.] but the very next month, on July 16, 1658, dismissed again and sent to Brusa as commander of the garrison (*Muḥāfiẓ*) (cf. J. von Hammer, *G.O.R.*, vi. 37; Na'imā, *Tārīkh*, first ed., ii. 660). He set out from here by arrangement with the Anatolian rebel 'Abāza Ḥasan with whom

he closely allied himself, only to share his fate, treacherous assassination, on Febr. 17, 1659, in Aleppo (cf. Na'imā, *Tārīkh*, ii. 685). His head was brought to the *Diwān* in Stambul on March 9, 1659.

If this is the Ken'ān Pasha mentioned by Ewliyā Čelebi, *Siyāhat-nāma*, iii. 366 (and he certainly never was governor of Oczakov any more than was Kōdjā Ken'ān Pasha [d. 1052 = 1651/52] who is also often confused with the Grand Admiral e.g. in the *Sidjill-i 'Othmāni*, iv. 83), he was also an author and composed a *Şaltık-nāma* in honour of Şaif Şaltık Baba [q. v.]. His own warlike exploits, especially his military operations in the years 1036—1038 (1626—1628), were celebrated in a rhymed *Pasha-nāma* by the poet and judge Tulū'ī Ibrāhīm Efendi (of Kalkandelen) of which there is a copy in the Brit. Mus. (Sloane MS. 3584); cf. Ch. Rieu, *Catalogue of the Turk. MSS.*, p. 191 sq., with detailed summary of contents. The possibility that it celebrates the above mentioned Kōdjā Ken'ān Pasha who had a very similar career to his namesake and contemporary (both were, for example, governors of Ofen) has always to be remembered. The biographical data regarding Şaif Ken'ān Pasha are much confused, as the article on p. 65 sq. in Rāmiz Pasha-zāde Mehmed, *Āharīṭ-i Kapudānān-i Deryā* (Stambul 1285) and Sāmī Bey Frashcri, *Kāmūs al-A'lām*, p. 3900, who follows it, show. According to this authority, Ken'ān Pasha was buried beside the school not far from Kırk Çeshme.

KENEZ. [See KNEZ].

AL-KERAK, a fortress east of the Dead Sea in the ancient Moab. The name goes back to the Aramaic *karākā*, "town", which the Targum gives for *kīr* in the Moabite place-names Kīr Mō'āb (Is., xv. 1) and Kīr Hārās (Hārāsūt; Is., xvi. 7, 11; Jer., xlviii. 31, 36). It is found as *Καρακ* in Ptolemy (v. 16, 4) on the mosaic map of Mādaba, in Stephanus Byzantinus, etc. Its situation on a steeply sloping spur only connected by an (artificially deepened) saddleback with the main ridge makes al-Kerak an unusually strong fortress. It is remarkable that it is not mentioned in connection with the Muslim conquest of the East Jordan country or in the following centuries; only with the Crusading period, after it had been fortified by King Fulco's former cupbearer, Payan, does it begin to play a part, and that a prominent one. The Christians of that time, who were not well read in geography, sought the ancient Petra here and called it Petra deserti. As it commanded the pilgrim road from Damascus and all traffic between Syria and Egypt, it caused the Muslims much trouble and was therefore repeatedly but vainly besieged from 565 (1170) onwards by Nūr al-Dīn and Şalāh al-Dīn until finally it was so starved out that the garrison surrendered in 584 (1188) to Şalāh al-Dīn's brother al-Malik al-Ādil, to whom it was allotted after Şalāh al-Dīn's death. In the years that followed it belonged to various Aiyūbids and even after the rule of most kings

of this family was over, al-Mughith 'Umar still held out in al-Kerak until Baibars captured it by treachery and put him to death (661 = 1263).

Behind the strong walls of the fortress the Mam-lūk Sultān Nāşir found shelter in 708 (1309) when he escaped from Cairo to found a real power. At this time al-Kerak was capital of one of the *mamlūkāt* into which Syria and Palestine were divided; its territory lay chiefly to the south of it. How powerful the fortress, the majority of whose inhabitants were still Christian, then was, is seen from the descriptions by al-Dimashkī, Yāqūt, al-'Umari and K̄halil al-Zāhiri. Under Turkish rule it lost its importance until quite modern times when the Ottoman government put a strong garrison into it and made al-Kerak capital of a separate administrative district. The walls date mainly from the middle ages, while the lower strata go back to an older period.

(FR. BUHL)

KERBELĀ'. [See MESHED HUSAIN].

KERČ (KERTCH), a town and fortress on the Crimean peninsula; according to the census of 1897, it had 28,982 inhabitants. In ancient times it was the site of the Greek colony of Pantikapaion, later called Bosphoros as the capital of the Bosporan kingdom, from the end of the seventh century the residence of the Khazar governor (with the title Tudun) of the eastern part of the Crimea (the western with the capital Khersonesos still belonged to the Byzantine empire). The name Kerč first appears in Muslim sources and is variously written; to the references to the texts (for the forms Karz and al-Karsh) in J. Marquart, *Ost-europäische und ostasiatische Streifzüge*, Leipzig 1903, p. 506, may be added Rukn al-Dīn Baibars in W. Tiesenhausen, *Sbornik Materialov, otnosyashchikhsya k istorii Zolotoi Ord'*, St. Petersburg 1884, p. 89, 5 (there Kardj). In Marquart, *op. cit.*, the derivation of the name from the Greek *Kάριος* or *Κυρίος*, "as a monastery near Kerč is called", proposed by Russian scholars (Wassilyewski, Bruun, Kunik, Harkavy), is also given. In old Russian sources the town is called Korčew; for example in the well known inscription of the year 6576 (1068) quoted by Karamzin, *Istoriya gosudarstva Rossiyskago*, ii. note 120).

After the final destruction of the Khazar empire by the combined forces of the Byzantines and Russians about 1016 the eastern part of the Crimea with Kerč belonged to the Russian principality of T'mutarakan, the capital of which of the same name lay on the peninsula of Taman opposite

Kerç. About a century later the possession of the steppe territory passed to the Kıpçak or Komans and that of the seaports to the Byzantines. As Yu. Kulakowski (*Proshloye Tavrii*², Kiev 1912, p. 93, on the authority of Miklosich and Müller, *Acta et dipl. gr. medii ævi*, iii. 25, suggests, the town of *Ῥωρία* mentioned in the treaty of 1169 between the Emperor Manuel Komnenos and the republic of Genoa is to be identified with the Russian Korčew. From the xiiith century the Crimean peninsula belonged to the Tatar kingdom of the Golden Horde; in the year 698 (Oct., 1298—Sept., 1299) Kerç with some other towns of the Crimea was destroyed by Noghai to avenge his grandson who was killed in Kafa (Tiesenhausen, *op. cit.*). In the xvth century Kerç came into the hands of the Ottoman Turks. After the conquest of Azov, Peter the Great, during his stay in Vienna in 1698, asked that Kerç should be ceded to Russia by the Turks in the peace negotiations then about to begin. But this demand was not granted. After the peace of Carlowicz concluded in the same year, Kerç remained in the hands of the Turks (J. von Hammer, *Geschichte des Osmanischen Reiches*², iii. 909; S. Solowyew, *Istoriya Rossii, ind. tovar. Obščestv. Pol'za*, iii. 1171). On account of the danger threatening from the Russians, Sultān Muṣṭafā II in 1702 had a new fortress built not far from Kerç (now Yeni-Kale) (v. Hammer, *op. cit.*, iv. 47). In 1771 Kerç and Yeni-Kale were occupied by the Russians without resistance; Abaza Pasha, who was sent to defend Yeni-Kale, did not once dare to expose his troops and returned to Sinope (*op. cit.*, iv. 622; Solowyew, *op. cit.*, vi. 738). The cession of Kerç demanded by the Russians during the peace negotiations in Bukharest (1773) was steadily refused by the Turks (v. Hammer, *op. cit.*, iv. 638) but had, however, to be granted after the treaty of Kučuk Kainardje (1774). Henceforth Kerç was a Russian fortress of the second class; during the Crimean war it was occupied by the Allies in May, 1855.

The town, which is world-renowned for its monuments of the Greek, Roman and early Christian periods, had no longer the same importance in the Muḥammadan period and has therefore no Muslim buildings of importance.

(W. BARTHOLD)

KERESŪN (ancient *Κέραρος*, Cerasus), on the maps Kerassoude, a town and harbour in Asia Minor, on the Black Sea. It is the chief town of a *kaṣā* of the wilāyet and the sandjak of Trebizond, 70 miles west of this last town. The population is 8,440 (3,588 Muslims; 3,906 Greek orthodox and 946 Armenians). It is built at the end of a rocky cape. The botanist Tournefort found still there the forest of cherry-trees which gave their name to the town, for it was from there that Lucullus imported them to Europe. This source of revenue is now replaced by the export of nuts (5,000,000 lbs. produced annually) and of beans (a million oke = 2,825,000 lbs. annually). There are ruins of the ancient walls, of a citadel and of a city-gate. The remains of an amphitheatre may be seen some distance off. The ruins of a mole to the north of the town could be cleared away at small expense and the area made into a harbour which would facilitate the export of the produce of the provinces of the interior. The town contains 11 mosques, 1 tekke, 9 Greek churches, 2 Armenian churches; it has

also barracks and an arsenal. — The Kerasos of Xenophon lay in the valley of the Keresun-dere: the present town is built on the site of the one founded by Pharnaces I, grandfather of Mithradates VII, King of Pontus, who called it Pharnaceia after himself.

The *kaṣā* of Keresün includes 138 villages and 4 *nāhiya*'s; it has a temperate maritime climate; mountains of volcanic origin, covered with forests, cover about half the area of the district. The inhabitants are fishermen on the coast and miners in the interior (mines yielding argentiferous lead, iron, copper and antimony). The total population is 64,526 (51,704 Muslims and 11,884 Greek Orthodox).

Bibliography: 'Ali Djawād, *Djoğhrāfiya Iuhāti*, p. 658; V. Cuinet, *Turquie d'Asie*, i. 73 sqq.; Ch. Texier, *Asie Mineure*, p. 619, col. 1. (CL. HUART)

KERKHA, a river in Khūzistān, whose sources lie to the east and south of Nihāwend in 'Irāk 'Adjamī. The *Čaṣhm-i Kāzim* is regarded as the source proper and rises in the Kūh Čihil Nabilighān. The map shows a little stream called Sura Kunč here, which receives the Kar Sara from the east, then near Nihāwend the Āb-i Kulan from the east which rises in the Kūh-i Ferūzan and next the Sīrwān Rūd from Dawlatābād. In this district the river is known as the Gamasāb, more accurately Gamasiāb (corrupted to Garasiāb).

The direction of the river, at first N. W., gradually changes to the west. Before it reaches Bisutūn it is joined by the *Shādju Rūd* reinforced by the Kangarshāh. It then turns to the south and is joined by the *Kara Šū*, the river of Kirmānshāhān and later by the Āb-i Karind, which itself has a number of important tributaries. While the tributaries so far mentioned are all on the right side, on the left it has the Kashgan Rūd which has as tributaries the Madian Rūd on the right and the Rūd Khorramābād with the Rūd Kulkū on the left. Next come, also on the right, the Lailum Rūd and the Āb-i Zāl. The direction of its course now changes from southern to westerly for a short stretch and then to south-west. On this latter stretch the river is called the Kerkha (Karkha), a name which it temporarily exchanges between Lailum Rūd and Āb-i Zāl for the name Āb-i Šaimere. This name preserves the name of the town Šaimara [q.v.] which lay west from the river and some distance from it. After the confluence with the Āb-i Zāl the river again turns southwards; as soon as the region of Pā-i pul is reached we have canals linking it with the Āb-i Diz and its tributaries, the Nahr Tabal Khan and the Nahr Daghdari. The ruins of Susa lie on one of the eastern watercourses which is later called R. Shawr. The Kerkha ends its course in the region south of Nahr Hashim, where it receives the water of the *Shatt al-Djamuz*. At an earlier period the river ran north-west from here to Hawiza (Huwaiza).

Among the roads which follow the course of the river from time to time, we may mention the great highway connecting Hamadhān and Mesopotamia in the region of Bisutūn, and also the road from Hulwān to Šaimara.

The ancient geographers called this river the Choaspes. The name Kerkha is not found in the Arab geographers; according to Rawlinson, it first appears in a xivth century Persian text. It is, however, probably older. Ibn al-Athīr mentions a

Karkhānā under the year 553 (1158). If the reference is to this river the name must go back to the xiith century. Ibn al-Aṭṭār, who usually avoids geographical details as much as possible, must have taken the name from an older contemporary source. Karkhānā must be Aramaic and mean "the [river] of Karkhā" i.e. Karkhā de Lēdan.

The river is certainly twice mentioned in the Arab geographers although not by name. According to Ibn al-Faḥīh, a particularly esteemed kind of black sealing-clay was obtained on its bank near Nihāwend. The "large river" near Bisutūn mentioned by Ibn Rosteh must also be the Gamasiāb. The bridge between Šaimara and Tarḥān, considered a marvel of architectural skill, may also correspond to the Pul-i Khusraw over the Kerkha. The Kerkha is usually called the "river of Sūs", e.g. as early as Ibn Khordādhbih. The geographers have no reliable information regarding its sources; Ibn Khordādhbih says it rises in Dinawar and Ibn Wāḍih at Hamadhān, which is true, at least for the tributaries of the Gamasiāb, if we take these names to refer to provinces. The river, according to the Arab geographers, flows into the Dūdjal of Ahwāz. Mention is made of the fact that at high tide the river is about two *mil* broad at Sūs. According to Ibn Wāḍih, the river was called Hinduwān. Probably the "river of Baṣinnā" or "Dūdja of Baṣinnā" which drove 7 water-mills and ran a bowshot from the town of Baṣinnā, mentioned by al-Muḥaddasī and Yāḳūt, is identical with the Kerkha.

KERKINA (KERKENNA), a group of islands off the eastern coast of Tunisia on a level with Sfax in 34° 35'—34° 50' N. Lat. An arm of the sea about 25 miles broad and full of shallows which make navigation impossible for ships of large tonnage separates them from the coast. The islands are two in number — Sharkī (Charki; the Cercina of the ancients) to the N. E. and Gharbī (Cercinitis) to the S. E. The first is 15 miles long and 4½ miles broad on an average. The coast is much indented and fringed on the north with small islands. The second, more massive in form, is 10 miles by 4½. The strait which separates them is only 1000 yards across so that in ancient times it was possible to join them by a bridge. Barley, wheat, lentils, the vine and large areas of *ħalfa* (*lygeum spartum*) are grown on the islands. The population, which consists of Berbers mixed with foreign elements and has never been organised into a tribe, amounts to 8,000 people. The natives live in numerous villages especially on Charki or scattered in isolated dwellings. They follow agriculture and stock-breeding, make ropes, mats, basket-work, etc., but the main industry is fishing. The shallows adjoining the islands are very rich in fish and sponges are gathered in abundance.

Traces of ancient buildings have been found in Charki; the episcopal register of Byzacene mentions an *episcopus Circitanus*. In the middle ages the

possession of the Kerkenna islands was on several occasions disputed between Christians and Muslims. The Normans of Sicily seized them in 540 (1145—1146) — according to al-Iḍrīsī in 548 (1153—1154) — but held them for only a short time. In 1289 they were ceded by the Pope to Roger Doria who built a castle there. The descendants of Doria ceded them to the King of Sicily who entrusted their government to Ramon Muntaner (1311 A.D.). They were finally abandoned by the Christians in 1335. The Sicilians, however, once more made a descent on them in 1424 and carried off 3,000 prisoners.

KERKŪK. [See **KIRKŪK**].

KERKŪR, a heap of stones, especially a sacred heap of stones. The cult of heaps of stones is extremely ancient and distributed all over the world. It seems to come not from an act of litholatriy in the strict sense but from a rite of transference or expulsion of evil; the individual, picking up a stone, causes the evil of whatever kind that afflicts him to pass into it — as the case may be, fatigue, physical or moral suffering, sin, the dangerous power that attaches itself to a man in certain sacred neighbourhoods, or all these things together — and gets rid of it by throwing it or depositing it with the stone on a place suitable for absorbing it; the accumulation of these expiatory pebbles forms the sacred piles of stones which rise all along the roads, at difficult passes and at the entrances to sanctuaries. Alongside of these, the throwing or placing of a pebble or the building of a little pyramid of stone often becomes one of the obligatory rites of the pilgrimage and the rite losing its primitive character has been sometimes taken for a true offering-rite (cf. R. Dussaud's view, *La Matérialisation de la prière en Orient*, in the *Full. et Mém. de la Soc. d'Anthr. de Paris*, 1906, p. 213—220). The kerkūr are often built at the place where a man has been killed and buried; this has been explained from the desire to bury more deeply a dead man whose spirit might be tempted to come out and avenge itself or, less plausibly, as a kind of homage to the dead; but this casting of stones can also be explained rather as a rite for the expulsion of evil (a dangerous place, the infection of death, proximity of disturbing magical forces). It appears therefore that we always find rites of purification in the origin of the kerkūr.

Pre-Islāmic Arabia knew the rite of casting stones and sacred heaps of stones. The rites of the ḥajj have preserved evidence of this. It may be asked if there is not a rite of this kind in the origin of the lapidations at Minā (for other explanations see the art. **ḤAJJ**, ii. 201), and in any case, as G. Demombynes (*Le Pèlerinage à la Mekke*, Ch. i.) has recently shown, the raised

stones or *raḍjam* which stand at the *marwāḥit* marking the *ḥaram* of Mekka are exactly comparable to the kerkūr which are found from Central Asia to North Africa along the roads at points where one begins to approach the great sanctuaries; there are also examples of this practice to be found equally in Christian countries.

Islām found the cult of piles of stones in all or almost all the lands that it conquered and although orthodoxy looked askance at it, it had to accommodate itself, as to so many other popular practices, which owed their origin to paganism in the remote past. The kerkūr are especially numerous in certain regions, Syria for example, but nowhere has their cult been so developed and is so vigorous as in North Africa, especially in the south or Morocco, where it has been especially studied by E. Doutté. There, one may say, there is not a pass, or ravine or cross-roads which has not its little pyramids of stones or its great kerkūr to which every passer-by adds his pebble, not a rustic sanctuary but has its sacred piles of stones.

Sometimes the kerkūr itself, as in other cases a spring, a tree or a rock, has given rise to a sanctuary which has become islamised in a marabout fashion. It is also very common to find under the aegis of a saint several of these cults combined, — strange sanctuaries which perpetuate the ancient rites of paganism, still vigorous after twelve centuries of Islām.

Bibliography: The bibliography of the subject is very extensive. What is essential from the general point of view is given in Frazer, *Golden Bough*, third ed., part vi., *The Scapegoat*, p. 8—30, where also are given a certain number of references to Muslim countries; from the Muslim standpoint in Doutté, *Merrakech*, Paris 1905, p. 58—108; do., *Magie et religion dans l'Afrique du Nord*, Algiers 1908, ch. x. Since the publication of this last work, E. Westermarck, *The Moorish Conception of Holiness (Baraka)*, Helsingfors 1916, p. 26 sqq. (on Morocco). (HENRI BASSET)

KERRĪ, a village and district on the right bank of the Nile, fifty miles north of Khartūm. In the xvth century the governorship of the surrounding territory was conferred by the Fūndj ruler, 'Umāra Dunḳās, on 'Abd Allāh Djama'a (d. 1554—1562) of the Arab tribe of Rufā'a. His descendants, the 'Abdallāb, maintained their position as a semi-independent dynasty with the title of Māndjil or Māndjilak until the Egyptian conquest, but transferred their seat from Kerrī to Ḥalfāyat al-Mulūk after the rise of Shendī in the latter part of the xviii century.

KERSH. [See KERČ].

KETĀMA (or **KOTĀMA**), one of the great Berber families; when Islām was introduced into North Africa, they occupied all the northern part of the modern department of Constantine, between the Awrās [q. v.] and the sea, that is the region containing the towns of Ikdjān, Setif,

Bāghāya, Ngaus (Nikāwus), Tiguist (Tikist), Mila, Constantine, Skikda (Philippeville), al-Ḳoll (Collo), Djidjelli [q. v.], Bellezma, and the part of Kabylia in the department of Algiers, i. e. the region between Wcd Sahel and the Seban. One legend flattering the national pride makes them descended from the Hīmyarites brought there by Ifriḳos. Katām, the eponymous ancestor of their race, was said to be the son of Bernes. He had two sons, Gharsen and Issūda, from whom are descended all the tribes of the Ketāma. They do not seem to have played a part in the civil and religious wars which desolated North Africa from the time of 'Uḳba to the days of the Aghlabids; we do not find them among the Khāridjis. When 'Ubaid Allāh gave himself out to be the Mahdī, his emissaries met some Ketāma pilgrims in Arabia and converted them to Ismā'ili doctrines. The principal convert was Mūsā, chief of the Sakyān, a branch of the Djemila whose name survives in the town of this name. The missionary (*dā'i*) Abū 'Abd Allāh al-Shirī [q. v.] settled in Ikdjān and succeeded in maintaining his position there in spite of the efforts of the Aghlabids. From there he was able to extend his conquests and to deliver the Mahdī who was a prisoner at Sijilmāsa. The empire of the Fātimids was then founded with the help of the Ketāma. It was they who furnished its main strength and supplied the means of conquering Egypt. But these continual efforts exhausted them. Those who remained in the Maghrib after the exodus of al-Mu'izz were forced to submit to local rulers, as Ibn Khaldūn tells us. In our day the principal representatives of the Ketāma are the Zuwāwa of the Djurdjura and the population around Djidjelli and in Little Kabylia. We do not know at what date Ismā'ili doctrines disappeared from among them but long afterwards their attachment to this teaching was regarded as a subject of obloquy and for this reason the powerful tribe of Sedwikish of Ketāma origin renounced all connection with this family. At the present day all the Berbers of this region are Sunnis.

Bibliography: Ibn Khaldūn, *Kitāb al-'Ibar*, iv. 32 sqq., vi. 148—152; *Hist. des Berbères*, transl. de Slane, i. 291—299, ii. Append., p. 510 sqq.; Fournel, *Les Berbères*, ii. 51 sqq., and the authors quoted. (RENÉ BASSET)

KETKHUDĀ (p. *kedh* "house", *khudā* "master, lord"), originally meant the master of the house or head of a family; the name came to be given in Persia in the villages to the headman or bailiff and in the towns to the "dixenier de quartier" (Chardin, *Voyages*, 1811, iv. 77) or "district tithe-man", a kind of police officer whose duty it was to inspect his district and who was responsible to the *kalāntar* [q. v.]. The administrative reforms recently introduced into Persia have aimed at making the *ketkhudā* the representative of public authority (mayor) in the *ḥarya* (village), the smallest territorial division. Unfortunately these officials, whose duties were formerly confined to the levying of dues, are powerless in face of the great landed proprietors (*R.M.M.*, June 1914, xxvii. 194) whose stewards they are and who appoint them; there are, however, some villages where this agent is appointed by the governor or even elected by the inhabitants.

The word has passed into Ottoman Turkish where it has been corrupted to *kehaya*, *kiaya* and means the "steward of a house". *Esnāf kiaya-si*

is the chief or syndic of a workman's guild. The *kiaya kadin* is the first lady of the palace, the housekeeper who has charge of the domestic arrangements and the servants. The *kapu kiaya* is the representative, the agent of the governors of provinces at the Ottoman Porte. The name *dewlet kiaya-si* used to be given to an official whose function corresponded to the minister for home affairs in modern constitutions; *kul kiaya-si* was the inspector of the Janissaries, lieutenant of the Agha and his chief of staff, who could only be dismissed with the consent of the whole *odjak*; he himself had an agent with the Agha who had to transmit the chief's orders to the commanders of fortresses and was called *kiaya-yerî*, "the inspector's lieutenant".

KHĀ, the seventh letter of the Arabic alphabet, representing the harshest of the gutturals, with the numerical value 600. It belongs to the sounds peculiar to the Arabic alphabet (in which it is distinguished from *hā* by a diacritical point), in so far as the Hebrew and Aramaic scripts do not distinguish it from *hā*. In Aethiopian, on the other hand, *Kharm* in contra-distinction to *Hawt* is denoted by a sign of its own; it is, however, to be observed that in the MSS. the two signs are often interchanged and that in the modern languages of Abyssinia there is little or no difference in the pronunciation of the gutturals. In Minaean and Sabaeen *khā* is denoted by a sign which slightly deviates from *hā*. In the Assyrian script the sound corresponding to *khā* is usually distinguished from the softer gutturals.

Bibliography: Comparative grammars of Semitic languages (Wright, Zimmern, Brockelmann, Cohen etc.); A. Schaade, *Sibawaihi's Lautlehre*, Leiden 1911, p. 19 and note 48.

KHABAR (A.), plural *akhbār*, *akhbūr*, report, news. The word is not used in any special context in the Qur'ān. In the Hadith it occurs among other passages in the tradition which describes how the djinn by eavesdropping obtain information from heaven (*khubar min al-samā*) and how they are pelted with fiery meteors to prevent them from doing so (al-Bukhārī, *Adhān*, bāb 105; Muslim, *Ṣalāt*, trad. 149); al-Tirmidhī, *Tafsīr*, Sūra lxxii., trad. 1).

In his collection al-Bukhārī has a chapter entitled *Akhbār al-Āhād*, which, as the *tardjama* indicates, deals with the validity of traditions regarding *adhān*, *ṣalāt*, fasting, the law of inheritance, and judicial procedure, which are only given on the authority of one man.

Al-Ghazālī gives the name *akhbār* to the traditions that go back to Muḥammad. He distinguishes the sayings of the Companions by the term *āthār* (see his *Ḥyā*, passim). On such and similar technical distinctions see Lane's *Lexicon* s.v., and *Dict. of Techn. Terms*, ed. Sprenger and Nassau Lees, s.v.

Akhbār is further often found in the titles of historical works; see Brockelmann, *Gesch. d. arab. Litt.*, Index ii.

Sāhib al-Khabar was the title of one of a sultān's officers in provincial capitals whose duty it was to report to his master all new happenings, the arrival of strangers etc. The postmaster was

often given this office; see Dozy, *Suppl.*, s.v., and the literature there given. — As a technical term in grammar *khābar* is predicate.

(A. J. WENSINCK)

KHABN, a term in prosody, indicating the suppression of the second letter when quiescent of a foot beginning with a *sabab khafif* (see the art. 'ARŪḌ). It affects: 1^o. *fā'ilun* (> *fa'ilun*), 2^o. *mustaf'ilun* and *mustaf'ilun* (*mutaf'ilun* = *maf'ilun*), 3^o. *maf'ulātu* (*ma'ulātu* = *fu'ulātu*), 4^o. *fa'ilātun* (*fa'ilātun*). It is found in the metres *ma'id*, *basit*, *radjaz*, *ramal*, *sarīf*, *munsariḥ*, *khafif*, *muḥtadab*, *muḥtathth* and *mutadarak*.

Bibliography: cf. the article 'ARŪḌ.

(MOH. BEN CHENEB)

KHĀBŪR, the name of two rivers.

1. The larger Khābūr is one of the chief affluents of the Euphrates, which it joins at Karḥisiyā [q. v.]. In classical literature the name is written in various ways: Ἀβωρρας, Χαβωρρας, Ἀβωρας, Ἀβωρρας, Ἀββωρρας, Βούρρας, Chaboras. Xenophon calls it Ἀράγγες.

It takes its origin in the Northern Mesopotamian mountains (the Izala M. and Masius M. of the classical authors), flows through the plain of Mesopotamia, passes between Djabal 'Abd al-'Aziz and the Sindjār mountains, where it takes a southern direction which it changes in the last part of its course into a south-western one.

Its springs, as well as those of its numerous affluents, are chiefly connected with three important towns, Ra's al-'Ain (Resh'aina of the Syrians) in the Northwest, Mārdin in the North and Naṣībīn in the Northeast. The springs at Ra's al-'Ain are said to be three hundred in number; they were shut off by iron grills, in order to prevent people from being drowned in them.

Downstreams from Ra's al-'Ain the Khābūr is joined by the river of Mārdin, which by the Arab geographers is called Ṣawr; on Sachau's map it bears the name of Nahr Zrgān. Just before passing between Djabal 'Abd al-'Aziz and the Sindjār mountains it is joined by the river of Naṣībīn, which in classical literature is called Mygdonius; the Arab geographers apparently mean this river when speaking of the Hirmās; on Sachau's map it is called Djaghdjagha. The course and the nomenclature of this and other affluents are still uncertain.

The Arab geographers mention several more or less important places situated on the Khābūr between Djabal 'Abd al-'Aziz (classical Gauzanitis) and Karḥisiyā, such as Shā'a, Tunainīr (upper and lower T.), Ṭabān (also on Sachau's map), 'Arbān or 'Arabān (also on Sachau's map), Sukair, al-Shamsāniya (probably Sachau's Shemisan), Makisin ("the custom-house"), al-Ghudair ("the pool"), and Ṣuwar (Sachau's es-Ṣawar). At Makisin there was a bridge of boats. "Much cotton was grown here and by it lay the small lake of deep blue water called al-Munkharik, said to be unfathomable" (Le Strange).

The whole region through which the Khābūr flows, chiefly in its lower course, was renowned for its fertility. Its trees are mentioned in Arabic poetry, its fruits were exported to the towns of the Irāk. But al-Idrisi already speaks of the plundering raids of the Beduins which cast a shadow over these natural riches. Sachau calls the tribes residing in the plain near Sheddādiya Djabūr. When he travelled there (1899), the large fertile

valley was devoid of towns, villages and human beings in general.

II. The lesser Khābūr, one of the affluents of the Tigris which takes its rise on the mountains of Southern Armenia, south of Lake Wan and west of Lake Urmiya. It passes between the mountain ranges which are now called Djabal Harbāl (North) and Zākhā Dagh (South). The latter mountains derive their name from the town of Zākhū (classical Azochis). The Khābūr joins the Tigris between Maghāra and Mazra. The Arab geographers often call it Khābūr al-Ḥasaniya, after the town of this name. Here the river was spanned by a magnificent stone bridge which was looked upon as a miraculous piece of masonry. Al-Ḥasaniya probably survives in the hamlet of Ḥasan Agha.

KHADHLĀN (KHIDHLĀN, A.), nomen actionis from the root *kh-dh-l* "to leave in the lurch", a technical term in Muhammadan theology, applied exclusively to Allāh when He withdraws His grace or help from man. The disputes regarding it first appear in connection with the quarrel over *ḥadar* [q. v.]. A starting point is found in Sūra iii. 154: "but if He abandon you to yourselves (*yakhdhulkum*), who will help you after Him? Let the faithful therefore trust in God". On this al-Rāzī observes: "The Companions deduce from this verse that belief is exclusively a result of Allāh's help (cf. John, vi. 65), while unbelief is a result of His *khadhlan*. This is obvious as the verse points out that the matter is entirely in God's hands".

A more detailed exposition is given by Ibn Ḥazm: "Right guidance and assistance consist in God's preparing (*taisir*) the believer for the good for which He has created him; while *khadhlan* consists in His preparing the *fāsiq* for the evil for which He has created him. Linguistic usage, the Qur'ān, the force of logic, and the attitude of the *fakīhs* and those in the past who handed down traditions and of the companions and successors as well as of those who came after them and of the whole body of Muslims with the exception of those whom God has led astray as

regards their intelligence, namely such as belong to the followers of slanderers and outcasts, like al-Nazzām, Ṭhumāma, al-ʿAllāf and al-Djāhiz, are all unanimous". Then follows this reasoning: Allāh has given man two forces, hostile and opposed to one another, *tamyiz* (power of discrimination) and *hawā* (passion, desire). When Allāh protects the soul, *tamyiz* prevails by His help and power. But when He leaves the soul to itself (*khadhala*), He strengthens the *hawā* with a strength which amounts to leading astray (*idhlāl*).

Khadhlan is therefore, according to Ibn Ḥazm, the opposite of *hudā* and *tawfiq* and the conception approaches that of *idhlāl*. The Mu'tazilis (as already indicated by Ibn Ḥazm's words) see in it a contradiction to Allāh's justness: according to them, Allāh does not urge a man to evil. In their terminology *khadhlan* therefore means the refusal of divine grace (*man' al-luff*), while, according to the Ash'aris, *khadhlan* is "the creation of the ability to disobey".

KHADĪDJA, Muḥammad's first wife, was a daughter of Khuwailid of the Quraysh family of 'Abd al-'Uzzā. The authorities are unanimous in saying that when she made Muḥammad's acquaintance and took him into her service she was a well-to-do merchant's widow who was carrying on business independently. She had been twice married previously and had children of both marriages. The one husband was a Makḥzūmī, the other a Tamīmī, Abū Hāla, whose real name is variously given; but this Abū Hāla is also mentioned by others among the followers of Muḥammad, which — if both stories are true — would make Khadīdja a divorced woman. When she discovered the brilliant qualities of her young employee — the story of this is adorned with all sorts of legendary features — she proposed marriage to him according to the generally accepted story, her father was dead by this time, according to another, still alive and opposed to the marriage, so that she only obtained his consent after making him intoxicated — a favourite motif in fiction (cf. the art. **DIADHĪMA**). Most authorities make Muḥammad twenty-five at this time and Khadīdja forty, which, in view of the fact that Arab women age early and that she bore him at least five children (see the art. **MUḤAMMAD**), is not even probable, although in later times extraordinary capabilities in this direction were ascribed to the Quraysh women (cf. al-Djāhiz, *Tria Opuscula*, ed. van Vloten, p. 78). Otherwise we do not need to doubt the essential accuracy of the tradition, for the alteration in Muḥammad's circumstances has witness borne to it in the Qur'ān (xciii. 6 sq.) and the fact that in spite of his later so marked sensuality he was content with one wife so long as Khadīdja lived is best explained by her superior social position which she perhaps used to insist on in this condition. Her wealth must have been a great help to him during his struggle and her death (which is said to have taken place three years before the Hijra) after she had probably suffered

considerable losses through the hostility of the great merchants, contributed to make his position still less endurable. But her personality seems to have been of even greater weight with her husband; in any case tradition draws a very attractive picture of the moral support which she afforded him during the excitement and agitation of the first revelation. That Waraka b. Nawfal [q. v.] was her cousin must have helped to make her sympathetic to Muḥammad's aims.

(FR. BUHL)

KHĀDIM (A.), servant; in Turkish often used with the secondary meaning of "eunuch". The word is applied to male and female, freemen or slaves alike; as to the latter see the art. 'ABD. The collective is *khādām* and the plural *khuldām*. *Khādim al-Haramain al-sharifain* (servant of the two sacred areas i. e. Mekka and Medina) was one of the titles of the Sulṭān of Turkey (see Barthold, *Isl.* vi. 1916, p. 379, sqq.).

There have always been free servants alongside of slaves in Islām. Anas b. Mālik [q. v.] entered Muḥammad's service as a youth (al-Bukhārī, *Djihad*, bāb 74 etc.) and he records it to his master's credit that the latter had never said a harsh word to him nor even ever asked him for an explanation of his doings (al-Bukhārī, *Waṣāyā*, bāb 25). Servants were used on journeys especially, and put up the tents, etc. These servants are called *farrāsh* (lit. spreaders of the carpets), a name which is, however, given to servants who look after the beds and the house generally (Lane, *The Thousand and One Nights*, London 1859, ii. 202, note 16).

In Egypt in Lane's time there was an organisation of servants. They were under special *shaiḥs* to whom anyone who required a servant had to apply; these *shaiḥs* were responsible for any dishonesty or breach of trust by their people (Lane, *Manners and Customs*, London 1899, p. 139). There were also free female servants who performed the lowest household duties (*op. cit.*, p. 147, 197) for a very small wage (p. 168). Some of the male servants used to shave their beards (p. 573).

In Turkish houses of the upper classes these people, who are usually addressed by their name followed by Agha, work as cooks, gardeners, janitors, etc., and they have to avoid the women's apartments in the house with which they communicate by the swivel-box (*dolab*). If they are married they do not live in their master's house.

The women servants in the konaks live in the women's apartments and have very little personal freedom. They sometimes belong to impoverished Turkish families or are the children of former servants and slaves. They are called *kalfa* (from *khālifa*) or *halāṭīk* (from *khālāṭīk*) and the men *ushak*, *deftiyer*, *hizmetkar* (*khidmetkar*). The servant

girls (*hidmetdji* = *khidmetdji*) are usually Greeks or Armenians.

Uniformed officials in the imperial and official services were divided into various corporations (chamberlains, janitors, musicians) and were included under the general name *hadama* = *khadama* (information supplied by Dr. Kramers). On such corporations see also v. Hammer, *Constantinople und der Bosporus*, Pest 1822, ii. 395 sqq.

In North Africa, especially in Algeria, conditions have become considerably influenced by European customs. In place of *khādim*, *ṣahab*, plur. *aṣḥāb*, is commonly used; this honourable designation is applied to the clients of prominent Moroccan families who are employed in various duties from the lowest to the most confidential missions. They usually receive no regular salary but live on the bounty of their master. They accompany him on the road, look after his mount, and order illumination for trips at night, etc. If their master is a great *kā'id* or the head of a brotherhood he appoints one of his *aṣḥāb* to accompany travellers who are passing through the areas over which his authority extends. This is a sign that they are under his protection.

In the *zāwiyas* servants of this type form a guild to which is entrusted the care of pilgrims and of the buildings; cf. Depont and Coppolani, *Les confréries religieuses musulmanes*, Algiers 1897; Doutté, *L'Islam algérien en l'an 1900* (information supplied by Prof. H. Basset).

The Ḥadīth has handed down various sayings of Muḥammad which endeavour to secure good treatment for servants; in these it is not always possible to distinguish whether the reference is to freemen or slaves. The *khādim* is responsible for his master's possessions (al-Bukhārī, *Waṣāyā*, bāb 9); on the other hand alms which he bestows out of his master's property bring him a heavenly reward (al-Bukhārī, *Zakāt*, bāb 25). One should be ready to forgive one's servant (al-Tirmidhī, *Birr*, bāb 32); he should neither be beaten nor cursed (al-Tirmidhī, bāb 30, 31, 85); and the servant who has prepared a meal has a right to partake of it (al-Bukhārī, *Aḥḍima*, bāb 55; al-Tirmidhī, *Aḥḍima*, bāb 44, etc.) (A. J. WENSINCK)

AL-KHAḌIR (AL-KHIDR), the name of a popular figure, who plays a prominent part in legend and story. Al-Khaḍir is properly an epithet ("the green man"); this was in time forgotten and this explains the secondary form *Khidr* (about "the green"), which in many places has displaced the primary form.

Legends and stories regarding al-Khaḍir are primarily associated with the Kur'ānic story in Sūra xviii. 59—81, the outline of which is as follows. Mūsā goes on a journey with his servant (*fatā*), the goal of which is the *Maḍīna al-Baḥrāin*. But when they reach this place, they find that as a result of the influence of Satan they have forgotten the fish which they were taking with them. The fish had found its way into the water and had swum away. While looking for the fish the two travellers meet a servant of God. Mūsā says that he will follow him if he will teach him the right path (*ruḥūd*). They come to an arrangement but the servant of God tells Mūsā at the beginning that he will not understand his doings, that he must not ask for explanations and as a result will not be able to bear with him. They set out on the journey, however,

during which the servant of God does a number of apparently outrageous things, which causes Mūsā to lose patience so that he cannot refrain from asking for an explanation, whereupon the servant of God replies: "Did I not tell you that you would be lacking in patience with me?" He finally leaves Mūsā and on departing gives him the explanation of his actions, which had their good reasons.

This servant of God is called al-Khadiir by the majority of the commentators. Others, however, identify him with Mūsā's servant (see below). Both interpretations have their roots in Oriental legends. The Qur'anic story may be traced back to three main sources: the Gilgamesh epic, the Alexander romance and the Jewish legend of Elijah and Rabbi Joshua ben Levi. The two first are, of course, again closely related to one another; at the same time it should be noted that the fish episode is lacking in the epic and is only found in the romance (cf. R. Hartmann in the *Z. A.*, xxiv. 307 sqq.).

The main features which the three sources have in common with the story in the Qur'an are the following:

The Gilgamesh epic. Overcome with melancholy at the death of his friend Engidu, the hero Gilgamesh sets out on a series of travels to look for his ancestor Utnapishtim (Khasisatra, Xisouthros) who lives at the mouth of the rivers and who has been given eternal life. Gilgamesh wants to ask him about the plant of life which will save man from the power of death.

The Alexander romance. The fish episode (with which we are here concerned) which shows Alexander on the search for the spring of life is found in greatest detail in Syriac literature, in the Lay of Alexander (cf. C. Hunnius, *Das syrische Alexanderlied*, in the *Z.D.M.G.*, lx. 169 sqq., line 188 sq.). Alexander is accompanied by his cook Andreas (cf. the article *IBRIS*). During the laborious journey through the land of darkness Andreas on one occasion was washing a salted fish in a spring; the contact with the water made the fish live again and it swims away. Andreas jumped in after it and thus gained immortality. When he told Alexander his adventure the latter at once realised that this was the well of life. All attempts to find it again failed: Alexander is denied the immortality which becomes the lot of the unfortunate cook, who does not know what to do with it.

The Jewish legend (printed in Jellinek, *Be' ha-Midrash*, v. 133—135) tells how Rabbi Joshua ben Levi goes on a journey with Elijah under conditions laid down by Elijah, like those above of the servant of God in the Qur'an. Like the latter, Elijah does a number of apparently outrageous things which affects Joshua as it did Mūsā. Zunz, *Gesammelte Vorträge*, x. 130. (not accessible to me) first pointed out the similarity of this story to the Qur'anic legend. A comparison of the main features of these three sources with Sūra xviii. 59 sqq. suggests the following conclusions, questions and hypotheses.

The chief figure in the Qur'anic story is called Mūsā. Some commentators doubt his identity with the great prophet (see below). There is not, however, the slightest hint of another Mūsā anywhere in the Qur'an. On the other hand, we have no

legends of Moses, which make him, like Gilgamesh and Alexander, go on the great journey. We might suggest the following explanation of the difficulty. The figure of Joshua ben Levi, with which Muḥammad first became acquainted through the Jews and which does not again appear in Muslim legend, was identified, as we shall see, with Joshua b. Nūn. This identification may have resulted in a confusion of his master Elijah with Joshua b. Nūn's master Moses. Mūsā thus represents Gilgamesh and Alexander in the first part of the Qur'anic story and Elijah in the second.

The figure of the travelling-companion is not connected with the Gilgamesh epic where it is not found, but with the Alexander romance and the Jewish legend. It probably comes in the first place from the romance. This is suggested by the fact that the companion is called *ḡafā* (here practically "servant"), a term that points to Alexander's cook rather than to Rabbi Joshua; the fish episode, which also is only found in the Alexander romance, points in the same direction.

The *Maḍjma' al-Baḥrain* is given as the goal of the journey. The expression has no direct original either in the epic or the romance, although there are points of contact in both. Utnapishtim lives *ina fī narati*, i.e. at the mouth of the rivers. It is not quite certain what this expression means, but it is probable that the place in the extreme west is meant where the sources of all running water are. This, however, still leaves the dual in the Qur'anic expression unexplained. This is still the case, if we attempt to trace it to the Alexander romance where (i.e. in the Syriac Alexander legend; see Budge, *op. cit.*, p. 259) Alexander with his army crosses a strip of land between the eleven bright seas and the ocean. It is also possible that the expression goes back to none of these but to another story unknown to us, which perhaps never found its way into literature, in which there was mention of the meeting-place of two seas. According to western Semitic cosmology, this is the end of the world where the oceans of earth and heaven meet.

We can likewise only guess at the origin of the rock (verse 62). It also belongs to cosmology (see A. J. Wensinck, *The Ocean in the Literature of the Western Semites*, in the *Verh. Ak. Amst.*, xix., N^o. 2, p. 26 sqq.). It is found neither in the epic nor in the romance, again an indication that the Qur'anic story borrowed from other sources also.

The servant of God at the *Maḍjma'* recalls Utnapishtim-Khasisatra. He is called (verse 64) one to whom God's mercy had been shown, to whom divine wisdom had been granted. This sounds almost like a translation of the name Khasisatra and the granting of divine favour is perhaps an echo of Utnapishtim's immortality.

The test of patience to which he subjects the newcomer comes from the Jewish legend only; the servant of God in this respect thus represents Elijah.

II

The commentators, Hadīth, and historians have collected a mass of statements around the Qur'anic story, additions which, like the story itself, came for the most part from the three sources already mentioned.

The first question discussed is whether the principal character is Mūsā b. 'Imrān or

Mūsā b. Miṣḥā (= Manasseh) b. Yūsuf b. Yaʿqūb, i. e. a descendant of the patriarch Jacob (al-Rāzī, *Mafātīḥ al-Ghaib*, iv. 333; al-Zamakḥsharī, *Kashshāf*, on verse 59). Commentators are almost unanimous in favour of the former alternative and base their opinion on the following legend which is transmitted in several forms. When Mūsā, the famous prophet, was one day preaching to the children of Israel he was asked if there was any man wiser than he. When he replied in the negative, Allāh revealed to him that his pious servant al-Khaḍīr, was wiser than he. He thereupon decided to visit this wise man. The story comes from Jewish legend; it is found in a considerable number of Arabic sources (al-Bukḥārī, *ʿIm*, bāb 16, 19, 44; *Anbiyāʾ*, bāb 27; *Tafsīr*, Sūra xviii., bāb 2—4; Muslim, *Faḍʾil*, trad. 170—174; al-Tirmidhī, *Tafsīr*, Sūra xviii., bāb 1; al-Ṭabarī, ed. de Goeje, i. 417; *Tafsīr*, xv., 165 sq.; Fakḥr al-Dīn al-Rāzī, *op. cit.*, iv. 333).

The (salted) fish serves as a guide to the route; the place where it is lost or revived by contact with water is the spring of life where al-Khaḍīr lives (al-Ṭabarī, i. 417). A further indication of the spring of life is that it is marked by the rock, for it rises at its foot (al-Ṭabarī, *Tafsīr*, xv. 167; al-Bukḥārī, *Tafsīr*, Sūra xviii., bāb 4). The rock is also located before the river of oil or the river of the wolf (al-Baiḍāwī and al-Zamakḥsharī on Sūra xviii. 61; al-Ṭabarī, *Tafsīr*, xv. 164). Some connection between a river of oil and the spring of life is in itself not impossible. According to many statements, oil is a feature of Paradise rivers. Then ذئب would be an error in writing زيت which could easily arise. Völlers considers the reverse probable; he thinks that "river of the wolf" is a translation of the name Loukos, which is not uncommon in classical literature as a river-name. If this hypothesis is correct, one might think of the Lukkos in Morocco or the Lycus on the Syrian coast, two regions with which the idea of extreme west is associated, as we shall see directly.

The Maḍjmaʿ al-Baḥrain is explained in various ways. Some regard it as "the place where the Persian Ocean unites with the Roman Sea, to the east" (al-Baiḍāwī on Sūra xviii. 59; al-Ṭabarī, *Tafsīr*, xv. 163). This points to the Isthmus of Suez and is an echo of the idea that the coast of Syria was the extreme west (see A. J. Wensinck, *Bird and Tree as Cosmological Symbols in Western Asia*, in the *Verh. Ak. Amsterdam*, 1921, p. 17 sqq.). Others say that it is the junction of the Roman Sea with the Ocean (Tandja, Ifrikiya; al-Ṭabarī, *Tafsīr*, xv. 163, and al-Zamakḥsharī on the passage). This view reflects a later cosmological standpoint which regarded the Straits of Gibraltar as the extreme west. A far-fetched explanation is that the union of the two seas means the meeting of Mūsā and al-Khaḍīr, the two seas of wisdom (e. g. al-Damīrī, *Ḥayāt al-Ḥayawān*, i. 318).

When Mūsā first sees Kḥaḍīr he is wrapped up in his cloak, as the Qurʾān says, "because he was sleeping", says al-Ṭabarī (ed. de Goeje, i. 418). When he sees a bird drinking out of the sea he says to Mūsā: "Your wisdom is as insignificant compared with that of God as the amount the bird drinks is compared with the sea" (al-Ṭabarī, ed. de Goeje, i. 418; al-Bukḥārī, *Tafsīr*, Sūra xviii., bāb 3;

al-Rāzī, *Mafātīḥ al-Ghaib*, iv. 333 sq.). Al-Khaḍīr lives on an island (al-Ṭabarī, ed. de Goeje, i. 422), or on a green carpet (*ṭinfisa*) in the heart of the sea (*ʿalā kabīd al-baḥr*; al-Bukḥārī, *Tafsīr*, Sūra xviii., bāb 3).

The test of patience is embellished by the commentators with a wealth of detail. It would take up too much space to go into them here; cf. the commentaries on Sūra xviii. 59 sqq., and the works on history and tradition mentioned in the *Bibliography*.

As may be expected from what we have said above, another branch of tradition lays particular emphasis on the connection between al-Khaḍīr and Alexander's search for the spring of life. Friedländer, however, goes much too far when he says (*Die Chachirlegende*, p. 108 sq.) "that originally Chachir had nothing at all to do with the puzzling servant in verse 64 — who belongs to quite a different cycle of stories — but with the servant of Moses (Alexander) who has charge of the fish in verse 59 sqq., in other words he is identical with Alexander's cook whom we know so well from Pseudokallisthenes and the Syriac homily". For Kḥaḍīr is, as we have seen and will see further, connected with Utnapishtim as well as with Alexander's companion.

There is no translation of the Alexander romance in the Arabic literature known to us (cf. Weymann, see *Bibliography*). On the other hand, there are a number of, in part unedited, versions of the Alexander saga, which have been examined by Friedländer. It would take us too far to go into the differences between these versions with regard to our subject. These sources show their independence of the Qurʾān not only by the fact that they make Kḥaḍīr the companion of Dhu 'l-Karnain, but also by the complete absence of any reference to the *fatā* of the Qurʾān. Al-Khaḍīr usually appears as the commander of Alexander's vanguard on his march to the spring of life. In al-Sūrī's version he is called the king's vizier and has become the principal character, throwing the king himself into the background; in ʿUmāra he is Alexander's cousin, conceived and born in similar circumstances to him and at the same time. The usual account of the journey to the spring of life makes Alexander and al-Khaḍīr go their ways separately; in some versions, the latter has the fish with him and discovers the miraculous well through the fish's becoming alive when it touches the water; in other stories, on the other hand, there is no mention of the fish and al-Khaḍīr recognises the spring by other signs; in others again he dives into it without knowing its virtues (e. g. al-Ṭabarī, i. 414). In one version in Nizāmī, al-Khaḍīr does not go with Alexander but with Elijah to the spring, out of which both drink and both become immortal.

III

The descriptive character of the name al-Khaḍīr is so obvious from its meaning that tradition could not but give the hero's real name, as well as his genealogy and date. We find him most frequently called Balyā b. Malkān. In al-Masʿūdī (*Murūdj*, iii. 144) the latter is called a brother of Kaḥṭan and thus given a place in the South Arabian genealogy. This makes it probable that Malkān is identical with Malkam (I Chronicles, viii. 9), who is also included among the

South Arabian patriarchs. This genealogy is next traced back to Shem through Fālagh (Phaleg) and ʿĀbir (Eber) (e. g. al-Ṭabari, ed. de Goeje, i. 415; al-Masʿūdī, *Murūdj*, i. 92; al-Nawawī, on Muslim's *Ṣaḥīḥ*, v. 135). Is this Balyā (بليبا) perhaps

not a corruption of Elia (يليا), which is identical with a Syriac form of the name Elijah. On the other hand, Elijah is also given in the Muslim form Ilyās as al-Khaḍir's proper name and also Elisha, Jeremiah (cf. God's words in *Iṣāba*, p. 887), Khaḍrūn (al-Ṭabari, ed. de Goeje, i. 415; al-Diyārbakrī, *Taʾriḫ al-Kḥamīs*, i. 106, and Friedländer's *Chadhirlegende*, p. 333, under Chadhir).

Ibn Ḥaḍjar also gives the following genealogies (*Iṣāba*, p. 883 sq.): (1) He is a son of Adam (weak *isnād*); with this is connected the story (*Iṣāba*, p. 887 sq.; Abū Ḥatīm al-Sidjīstānī, *Kitāb al-Muʿammarīn*, p. 1) that al-Khaḍir took care of Adam's body and finally buried it after the flood; (2) He is a son of Kābil called Khaḍrūn; (3) He is al-Muʿammar (the Long-lived) b. Mālik b. ʿAbd Allāh b. Naṣr b. al-Azd; (4) He is Ibn ʿAmāʾil b. al-Nūr b. al-ʿIṣ b. Ishāk; (5) He is the son of Pharaoh's daughter; (6) He is a Persian, or his father was a Persian, his mother a Greek or vice versa; it is also said that he was born in a cave, fed there on the milk of wild beasts and finally entered the service of a king (al-Damīrī, i. 318; Ibn Ḥaḍjar, p. 891 sq.); cf. also his meeting "on the market-place of the Banū Isrāʾīl" with the man who asks him for alms *bi-waḍḥ Allāh* (*Iṣāba*, p. 894 sq.).

This does not, however, exhaust the traditions about his names and genealogy. We shall only quote here the following from Maracci, *Prodromi* to *Sūra* xviii. 57: Alchedrus, quem fabulantur Moslemi eundem fuisse, ac Phineas filium Eleazari, filii Aaron; cujus anima per metempsychosin emigravit primo in Eliam, deinde ex Elia in S. Gregorium, quem propterea Mahumetani omnes summo honore prosequantur. — The latter identification is probably due to a confusion with St. George, with whom al-Khaḍir has certain points of resemblance; cf. thereon Clermont-Ganneau in the *Revue archéologique*, vol. xxxii. sq., and Friedländer, *op. cit.*, p. 275. Clermont-Ganneau further pointed out the relationship between the consonants *kh-q-r* and the North Semitic group *h-s-r*. The name has also been taken as a corruption of Khasisatra (Guyard in the *R. H. R.*, i. 344 sq.) or connected with Ahasuerus, the wandering Jew (Lidzbarski in the *Z. A.*, vii. 116).

Very varying dates are given for al-Khaḍir's period. Sometimes he is called a contemporary of Abraham, who left Babel with him (al-Ṭabari, ed. de Goeje, i. 415); sometimes he is put in the period of Afridūn; he is a contemporary of Alexander and lived down to the time of Mūsā (Ibn Ḥaḍjar, *Iṣāba*, p. 886); according to others, he was born in the period of Nāshiyā b. Amūs (i. e. Isaiah b. Amos) (al-Ṭabari, *op. cit.*, p. 415 sq.). The divergence in these statements is partly connected with his immortality (see below).

More important are the explanations of the name given in the Oriental sources. He is said to have become green through diving into the spring of life and thus got his name (Ethiopic Alexander romance; cf. Friedländer, *op. cit.*, p. 235 sq.). As already mentioned, he lives on an island (al-Damīrī, *op. cit.*, p. 317); he is also said

to worship God on the islands (al-Ṣūri, sec Friedländer, *op. cit.*, p. 183; al-Ṭaḥṭabī, p. 197). This may point to al-Khaḍir's having originally been a marine being. The following circumstances point in the same direction: he is frequently called the patron of seafaring people (e. g. *Taʾriḫ al-Kḥamīs*, i. 107); he is said to be appealed to on the Syrian coast by sailors in stormy weather. In India he has become a regular river-god under the name *Khwādja Khidr* [q. v.], who is represented sitting on a fish. Clermont-Ganneau and Friedländer sought the origin of the figure mainly in this direction, the latter on the assumption that the Greek Glaukos legend reached the Muslims through a Syriac intermediary (*op. cit.*, p. 107 sqq.). But apart from the fact that we know nothing of any such intermediary, a connection between al-Khaḍir and Glaukos would only explain one aspect of the former; nor would it tell us anything about the origin of the figure, indeed one may doubt whether it is right to seek for the origin of a figure so complicated as al-Khaḍir, who has characteristics in common with Utnapishtim, with Alexander's cook and other figures.

There are other things to be considered. In a number of Arabic explanations of the name, al-Khaḍir is conceived not as belonging to the sea but to the vegetable kingdom. "He sat on a white skin and it became green" (e. g. al-Nawawī on Muslim's *Ṣaḥīḥ*, v. 135; cf. al-Ṭabari, *Tafsīr*, xv. 168). "The skin", adds al-Nawawī, "is the earth." Al-Diyārbakrī (i. 106) is still more definite. "The skin is the earth when it puts forth shoots and becomes green after having been bare". According to ʿUmāra, al-Khaḍir is told at the spring of life: "Thou art Chadhir and where thy feet touch it, the earth will become green" (Friedländer, *op. cit.*, p. 145). Wherever he stands or performs the *ṣalāt*, it will become green (al-Nawawī, *op. cit.*; al-Rāzī, *Mafātīḥ al-Ghaib*, iv. 336). These are statements (especially the last) which remind us of a Messianic passage in the Old Testament: "Behold the man whose name is the branch and he shall grow up out of his place" (Zachariah, vi. 12). Al-Khaḍir is really connected with two Messianic figures — with Elijah (cf. the art. *ILYĀS*) and with Jesus; these three form with Idrīs [q. v.] the quartette of those who have not tasted death (*Taʾriḫ al-Kḥamīs*, i. 107).

The variations in the character of al-Khaḍir result in different views regarding his nature. If he is a prophet (see *Iṣāba*, p. 882 sqq.) it remains doubtful whether he is to be included among the Apostles (al-Nawawī, *op. cit.*, p. 135). He is, however, also human, angelic, mundane and celestial (al-Ṭabari, ed. de Goeje, i. 544, 798). Popular piety as well as Ṣūfī circles readily regard him as a saint (*walī*). According to one Ṣūfī view, every age has its Khaḍir, in so far as the *Naḥīb al-awliyāʾ* for the time being is al-Khaḍir (*Iṣāba*, p. 891). As *walī*, if three times appealed to, he protects men against theft, drowning, burning, kings and devils, snakes and scorpions (*Taʾriḫ al-Kḥamīs*, i. 107; *Iṣāba*, p. 903). Sky and sea and all quarters of the earth obey his sway; he is God's *khalīfa* on the sea and his *wakīl* on land; he can make himself invisible at will (ʿUmāra in Friedländer, *op. cit.*, p. 145). He flies through the air, meets Elijah on the dam of Alexander and makes the pilgrimage to Mekka with him every year (cf. *Iṣāba*, p. 904 sqq.).

Every Friday he drinks from the Zamzam well, and Solomon's pond and washes in the well of Siloa (*Ta'rikh al-Khamis*, i. 107; Friedländer, *op. cit.*, p. 148 sq., 151); he can find water below the ground and talks the languages of all peoples (al-Šūrī in Friedländer, p. 184).

His immortality is particularly emphasised (cf. Rückert's poem "Chidher"; 'Umāra in Friedländer, *op. cit.*, p. 145; Abū Hātim al-Sidjīstānī, *Kitāb al-Mu'ammariin*, p. 1; *Iṣāba*, p. 887 sqq., 892, 895). According to the *Iṣāba*, p. 882, he was given immortality after a conversation with his friend, the angel Rafā'īl, in order to establish the true worship of God on the earth and maintain it. Ibn Ḥaǧǧar describes a meeting between al-Khaḍir and Muḥammad in various versions (*Iṣāba*, p. 899 sqq.). On meetings with individuals who lived at a later date see *ibid.*, p. 908 sqq.; on the table which was let down to him from heaven see *ibid.*, p. 919; on his presence at the battle of Kādisiya see *Murūǧi al-Dhahab*, iv. 216.

He lives in Jerusalem and performs his *ṣalāt* every Friday in the mosques of Mekka, Medina, Jerusalem, Kuḅā and on the Mount of Olives; his food is *kan'a* and water-parsley (*Ta'rikh al-Khamis*, i. 107; *Iṣāba*, p. 889 sq., 904).

On his marriages we have as early as classical Ḥadīth (Ibn Maǧǧā, *Zuhd*, bāb 23) a legend also mentioned by al-Tha'labī, *Kiṣṣa*, p. 193 sqq., which in its main features must have come from Christian sources. It is the motif of the pious youth who married by his parents against his will persuades his young wife to preserve her virginity (cf. the Syriac Acts of Thomas, 2nd Praxis). The story links up with that of Pharaoh's daughter's handmaid.

KHWĀDJĀ, a Persian word of uncertain etymology, an honorific title applied to personages of a town, not of military rank, bourgeois. It was generally borne by ministers of sovereigns who were chosen from among the learned. It was later used to designate eunuchs. It is found as early as the beginning of the viii (xiith) century in a verse by the poet Anwarī. The derivative substantive *khwāǧagī* in the sense of "merchant", "tradesman" is found in Meninski and the Sicilian documents published by Michele Amari (p. 212, 2).

It passed into Arabic in the forms *khwāǧā* and *khwāǧja*, the modern *khwāǧja* (eastern dialects) and means "Sir, Mr., Monsieur". It has been borrowed by Ottoman Turkish in the form *khoǧja* [q.v.] and here means "scribe, clerk, copyist, literate, private tutor"; it is found again in the western dialects of Arabic which have borrowed it with the same pronunciation and the same meanings. It is found in the *1001 Nights* (cf. Dozy, *Suppl.*). The title of *Khoǧja*, like that of *Shaikh*, is in Turkeṣtān only given to descendants of the Caliphs Abū Bakr and 'Umar and to those of 'Alī through his wives other than Fāṭima (Defrémery, *Mémoires d'histoire orientale*, ii. 407, No. 1; Malcolm, *Hist. of Persia*, Lahore 1888, p. 86).

(CL. HUART)

KHWĀDJĀ KHIḌR (or **KHIḌR** in India), is in many parts of India identified with a river-god or spirit of wells and streams. He is mentioned in the *Sikandar-nāma* as the saint who presided over the well of immortality. The name was naturalized in India, and Hindū as well as Muslims reverence him, it is sometimes converted by Hindūs into Rāǧja Kidār. On the Indus the saint is often identified with the river, and he is sometimes to be seen as an old man clothed in green. A man who escapes drowning is spoken of as evading *Khwāǧja Khizr* (Temple, *Legends of the Panǧāb*, i. 221). In a poem by a Balōč regarding a fight on the Indus a boat is unloosed "to float on the *Khwāǧja's* waves", and it is asserted "the *Khwāǧja* himself will remember that battle". (*Popular Poetry of the Baloches*, i. 74), and by one poet his name is substituted for that of Mikā'īl as one of the archangels. His principal shrine is on an island of the Indus near Bakhar, which is resorted to by devotees of both creeds (*Sind Revisited*, ii. 226). Manucci who was present at the siege of Bakhar in 1069 (1658) alludes to this shrine under the name of Coia Quitan. Burnes also mentions it in his "*Bokhara*".

The saint is believed to ride upon a fish, which was adopted as a crest by the Kings of Oudh, and appears on their coins. Possibly in this case there is also a survival of the fish-avatār of Viṣṇu. Muslims offer prayers to *Khwāǧja Khidr* at the first shaving of a boy, and a little boat is launched at the same time; also at the close of the rainy season. — See further **KHADIR**.

of the *Panjab*, i., Bombay 1884; Longworth Dames, *Popular Poetry of the Baloches*, London 1907; W. Irvine, *Storia do Mogor (Manucci)*, London 1907; A. Burnes, *Travels into Bokhara*, London 1834; J. Wise, *Muhammadans of Eastern Bengal*, *Journ. As. Soc. Bengal*, 1894 lxiii., Part iii., 38 sqq. (M. LONGWORTH DAMES) **KHWĀDJU KIRMĀNĪ**. [See KIRMĀNĪ].

KHĀF, a town in *Khurāsān*, more accurately *Khawāf*, is first mentioned by al-Muḥaddasī in the form *Khawāf* as a district of Nisābūr; he describes it as small, rich in pomegranates and grapes which were made into raisins, and he calls the capital *Salūmak*. According to Yāqūt, the district was bounded by Būshendj of Herāt and Zūzen of Nisābūr; it included 200 villages and three towns: Sandjān, Sirāwand, Khardjird. Al-Kazwīnī says that *Khawāf* was near Nāsā. According to him, it was large with many inhabitants, and had many villages, gardens and streams. It is perhaps to the same locality that Saiyid al-Murtaḍā refers as *Khāf* (without *w*), "a village in the land of the Persians (*adjam*)".

The modern *Khāf* lies on the southern road, which does not touch Nisābūr, from the Caspian Sea to Herāt, between Turshiz and Kelai Nāḍir on a tributary of the Hari-Rūd. Prellberg, following Macgregor, gives the total population as 15,000. According to Clerk, he describes the chief town *Khāf* as a town of 500 houses with several forts surrounded by pretty gardens; fields and villages stretch along the river for four miles from *Khāf*, of which latter the largest were Nāṣirābād with 300 houses and Salama and Sungun with 400 houses. Sungun must correspond to the Sandjān of Yāqūt; Salama may be the modern form of al-Muḥaddasī's *Salūmak* and would have been the capital of the district in older times. According to Yāqūt, Khardjird lay near Būshendj and must therefore have been in the eastern part of the district of *Khāf*, where in modern times there is no longer any settlement except the fort of Kelai Nāḍir. The total number of villages in the district of *Khāf* was given by Bunge as 26.

SCHWARZ)

KHAḌĀDJA, a subdivision of the *Ha-wāzin* tribe of *Uḡail* which remained as powerful Bedouins longer than most of the other tribes which inhabited the Arabian peninsula at the dawn of Islām. The genealogists give their affiliation to their kindred clans as *Khafādja* b. 'Amr b. *Uḡail*, and they were subdivided into eleven branches: *Mu'āwiya* *Dhu 'l-Qarh*, *Ka'b* *Dhu 'l-Nuwaira*, *al-Akra'*, *Ka'b* *al-Aṣghar*, 'Amir, *Mālik*, *al-Haiṭham*, *al-Wāzī'*, 'Amr, *Ḥazn* and *Khālid*. They had their territory in the time before Islām to the south-east of al-Madīna and owned one or two villages, among which *Sarw Lubn* and *Sharā'in* are mentioned. A hundred years later we find them mentioned much further east and at war with the tribe *Ḥanifa* in the *Yamāma* (*Agh.*, vii. 122). Probably the *Qarmaṭian* movement in the *Yamāma* in the early part of the fourth century of the *Hidjra* caused them to move further north towards the borders of the *Irāk*. Here we find

them towards the end of the fourth century established as masters of al-Kūfa under their amir *Thumāl* and his sons. They may have been at first allies of their cousins the *Banū Yuzid* (not *Bozid* as in Wüstenfeld's *Tabellen*, or *Yazid* as otherwise stated) who established themselves as rulers of al-Mawṣil and the surrounding country. They were rather in opposition to them. In the year 391 (1000) *Qarwāsh* attacked them in al-Kūfa and they were compelled to leave the country and move along the Euphrates towards Syria, where they remained only till the following year, when the 'Abbasid general *Abū Dja'far al-Ḥadj-djadj* called them to his aid when the 'Uḡailis besieged al-Mada'in. This brought them again back to their ancient dwelling-places and as the Baghdad government had probably supplied them with arms they utilised these a few years later, in 402 (1011), in an attack upon the caravan of pilgrims. They had seized the wells at *Wākisa* to the south-west of al-Kūfa a short distance into the desert, and prevented the pilgrims from approaching to the water and then fell upon them, slaughtering and plundering, making many of the survivors prisoners. Emboldened by this success they demanded the lands to the right of the Euphrates which had been in the hands of the 'Uḡailis, and marched under the command of *Sulṭān*, 'Ulwān and *Radjab*, sons of *Thumāl* to al-Anbār, laying the whole neighbourhood waste and besieging the town. An army sent against them from Baghdad and supported by the 'Uḡailis drove them out and *Sulṭān* was actually captured, but released upon the intercession of *Abu 'l-Ḥasan ibn Mazyad al-Asadi*. No sooner had he been released than in the following year 403, news was received at Baghdad that they were plundering the country round al-Kūfa under *Sulṭān*. An army was sent against them which was aided by *Abu 'l-Ḥasan ibn Mazyad* and they were surprised at the river *al-Rummān*. *Sulṭān* escaped but his brother *Muḥammad* was made a prisoner, but this defeat had the result that many of the pilgrims who had been captured in the year 403 were liberated and reached Baghdad, where they had been believed to have been killed. Meanwhile the 'Uḡaili Amīr *Qarwāsh* had been captured and released and he now tried to make common cause with the *Khafādja*, trying to join *Sulṭān ibn Thumāl*, but after they had joined they were attacked by troops sent from Baghdad and routed. They both asked for pardon which, strangely, was readily granted. This gave a few years of comparative peace but in 417 (1026) *Dubais* b. 'Alī b. *Mazyad al-Asadi* and *Abu 'l-Fityān Manī' b. Ḥassān*, now chief of the *Khafādja*, made a plundering expedition against the lands which belonged to *Qarwāsh* in the *Sawād* [q. v.], assisted by troops from Baghdad, and they encountered him near al-Kūfa of which he had made himself master. *Qarwāsh* fled towards the North and was pursued by the combined tribes of *Asad* and *Khafādja*, who actually took possession of al-Anbār, but after this success the two tribes dispersed again to the pasturing quarters. *Manī' b. Ḥassān* then marched, with his followers to al-Djāmi'ain a place between Baghdad and al-Kūfa, which belonged to *Dubais* b. *Ṣadaka* b. *Mazyad* and plundered the land round it; when pursued by *Dubais* they turned North and attacked al-Anbār. The inhabitants defended themselves for a while but

as the town was not protected by walls the *Khafāḍja* entered plundering and burning. When they learned that *Qarwāsh* was coming to drive them out assisted by troops from Baghdad they left the town, but soon returned and looted the town for the second time. When finally *Qarwāsh* was able to drive them out he spent the winter in the town and instructed walls to be built to protect the town from further surprise attacks. Now *Manī'* swore allegiance to the Būyid ruler Abū Kālīdjār and marched south to al-Kūfa where he had the *Khutba* said in the name of Abū Kālīdjār, for which he received jurisdiction over the waters of the Euphrates. This had the result that in 420 Dubais severed his allegiance to Abū Kālīdjār as he was afraid of the depredations of the *Khafāḍja*. In the following years the *Khafāḍja* held sometimes with one party and again with another and when in 425 (1033) Dubais had a quarrel with his brother Thābit they sided with the former but quarrels also arose among the *Khafāḍja* chiefs during which 'Alī b. Thumāl was killed and his nephew al-Ḥasan b. Abī 'l-Barakāt became chief of the tribe. When in 428 (1036) the ḥāḍib Bāris Ṭughān rebelled in Baghdad, the general of the Caliph, al-Basāsiri employed among others the tribe of *Khafāḍja* to quell the revolt, as a result of which Bāris Ṭughān was executed. We do not hear much about the *Khafāḍja* for some years, but in 446 (1054) they again made an inroad upon al-Djāmi'ain, belonging to Dubais, which they plundered; al-Basāsiri came to his assistance and the *Khafāḍja* retreated into the desert. They were pursued and their stronghold *Khaffān* was besieged and raised to the ground, except the citadel which was a strong building of cement. When al-Basāsiri rebelled against the Caliph in the same year he took al-Anbār after a prolonged siege and we find that among the prisoners he took there were 100 men of the tribe of *Khafāḍja*. Again followed a period of comparative peace, but when in 485 (1092) the pilgrims from Baghdad had passed al-Kūfa they were attacked by the *Khafāḍja*. The news having been received at Baghdad, troops were sent who caused great slaughter among them and this was the cause that in future they were no longer powerful enough to do serious damage. A few years later, in 499 (1105) the *Khafāḍja* came into conflict with the Taiyi' tribe 'Ubāda over some stolen camels and while the latter could muster about 500 warriors, the *Khafāḍja* were unable to place a similar number into the field, but they were assisted by Ṣadaqa b. Maṣṣūr [q.v.], the chief of Asad, and were victorious. This success was however of short duration as in the following year the tribe of 'Ubāda, now assisted by Badrān, son of Ṣadaqa, utterly routed *Khafāḍja* who were compelled to forsake their pasture grounds and wander north towards Syria, while 'Ubāda in future occupied the lands adjoining the Sawād. Again in 536 we hear of *Khafāḍja* making an inroad into the 'Irāk, but the troops sent against them easily drove them off, killing large numbers. How weak the *Khafāḍja* had become is evident from the fact that in 556 (1161) they assembled in the neighbourhood of al-Ḥilla and al-Kūfa, asking for the relief-food and dates which had apparently been granted them. The governors of the two towns refused to grant their request and Qaiṣar, the governor of al-Ḥilla sent 250 soldiers to drive them off, a

similar corps being sent by the governor of al-Kūfa. They pursued the fleeing *Khafāḍja* along, the river Euphrates as far as Raḥbat al-Shām where the *Khafāḍja* made a stand as they could not retreat any farther and in the fight which ensued Qaiṣar, the governor of al-Ḥilla, was slain while Arghash, the governor of al-Kūfa, took refuge with the governor of Raḥba. *Khafāḍja* then pleaded for forgiveness stating that they were constrained to fight by being driven to extremes. Their excuse was accepted as the wazīr Ibn Hubaira who had marched out against them saw the futility of pursuing them into the desert. The last time we hear of the *Khafāḍja* is in the year 588 (1192) when they came to the assistance of the town of al-Basra when the latter was threatened by the tribe of 'Amir. In addition to the events narrated we find that *Khafāḍja* were among the Arab tribes who assisted in the siege of Tiberias in 507 (1113) when Baldwin had taken refuge there after an unsuccessful raid upon Ḥalab.

According to al-Kalkashandī a branch of the tribe of *Khafāḍja* was settled in lower Egypt. Among the poets of this tribe in ancient time was Tawba b. al-Humaiyir, celebrated on account of his love for Lailā al-Akhyaliya and the elegies which the latter composed upon his death when he was killed in a raid.

(F. KRENKOW)

AL-KHAFAḌJĪ, AḤMAD B. MUḤAMMAD B. 'UMAR AL-KHAFAḌJĪ, called *Shihāb al-Dīn al-Miṣrī al-Hanafī*, was born near Cairo about the year 979/1571 and received his earliest education from an uncle on his mother's side, Abū Bakr al-Shanawānī, whom he calls himself the Sibawaih of his age, and under him he studied both Hanafī and Shāfi'ī law; the biography of the Prophet entitled *al-Shifa'* by the Kaḍī 'Iyāḍ [q.v.] he read under Ibrāhīm al-'Alkamī and he even studied medicine under Dā'ūd al-Baṣīr. Later he made the pilgrimage in the company of his father and took the opportunity to hear the lectures of the learned men in the two holy cities. After his return from the pilgrimage he made his first journey to Constantinople, where he found several teachers of outstanding merit, among whom he mentions Ibn 'Abd al-Ghanī, Muṣṭafā ibn 'Arabī and the Jewish Rabbi Dā'ūd under whom he studied mathematics and the books of Euclid. His principal master, however, was Sa'd al-Dīn b. Ḥasan, and when the latter died and his other teacher soon followed him in death, Constantinople became devoid of men of learning. He had meanwhile gained favour and received the post of Kaḍī of the province of Rūmelī and rising in rank he became Kaḍī of Ūsküb under Sulṭān Murād, who finally appointed him to the same office in Saloniki. These offices enriched him considerably and he was ultimately sent as Kaḍī 'Asker to Egypt. This post, however, he did not hold for long as through intrigues at Constantinople he was dismissed. This decided him to make another journey to Constantinople and on travelling there he passed through Damascus and Ḥalab, in

both of which cities he was entertained by the men of learning. His expectations in Constantinople were not fulfilled and he gave vent to his anger in the literary outburst which he entitled *al-Maḥamāt al-Rūmiya*. Instead of making matters easier for himself he incurred the hatred of the Mufti Yahyā b. Zakāriyā and was ordered to leave the city immediately. As an acknowledgment of his worth as a scholar he received the appointment of an ordinary Kāḍī at Cairo, but he seems to have devoted his remaining years to study and the composition of his works. He died in Cairo on Tuesday the 12th of Ramaḍān 1069 (3 June 1659). Al-Khafādji enumerates most of his works in his autobiography, many of them of considerable size, while he himself tells us that many of his treatises were never collected in book-form. His most extensive work is a commentary upon the *Tafsīr* of al-Baidāwī which he entitled *ʿInāyat al-Kāḍī*, and which has been printed in Cairo in four large volumes. The work follows the usual tedious method of explaining almost every word, and for traditions and explanations he adduces the statements of a large number of other authors who have treated upon the same subject. The same is the case with his second largest work, a commentary upon the *Shifāʾ* of the Kāḍī ʿIyāḍ, entitled *Nasīm al-Riyāḍ*, which we have seen, he studied under Ibrāhīm al-ʿAlkamī. Here again he quotes all accessible literature dealing with the biography of the Prophet, giving the various authorities who have recorded the same traditions. Neither of these works contain anything original, because the subject did not call for anything new. All that was required of the author was to bring together every detail on his subject he could find in the works on hand. This work has also been printed in Constantinople 1267 A.H. in four volumes. Of an entirely different nature are his two biographical works: *Khawāya ʿl-Zawāyā fi mā fi ʿl-Riḍāl min al-Baḥāyā* and *Raiḥānat al-ʿAlibba wa-Nuzhat al-Ḥayāt al-Dunyā*. The titles prepare us for the style in which these two books are composed, the evil influence of the *Yatima* of Thaʿālibī and the *Khawāḍa* of ʿImād al-Dīn is in both works apparent; we get instead of biographies an exuberance of verbosity without any noteworthy information and in most cases we can only infer that the persons named lived during, or shortly before, the time of the author, but the arrangement according to countries gives us the information where the persons lived. For biographical details both works are useless. We get however a fair amount of contemporary poetry to enable us to judge to what miserable depth the art of rhyming had sunk. While the first named work exists only in manuscript, the *Raiḥāna* has been printed three times in Cairo (1273, 1294 and 1306), which shows us that the work is appreciated in Egypt. The most valuable portion of this work is an autobiography of the author (in which he has omitted to state when and where he was born) and the *Maḥamāt al-Rūmiya* which is directed against the learned men of Constantinople. The autobiography has furnished the material for the account of his life above and in the work of al-Muḥibbī. Of more value are his *Ṭirāz al-Maḍālīs* and his *Shifāʾ al-ʿAlil*. The former is a work of the class called *amālī* in 50 sessions (*maḍālīs*), and he tells us in the introduction that Ibn al-Shadjarī, Ibn al-Ḥādjib, al-Kālī or even Thaʿālab would acknowledge its excellence if they

were able to see the book. Its value consists in having preserved extracts of older works now apparently lost or undiscovered. It is interesting to find him quote from the *Kitāb al-Maʿānī* of al-Ushnāndāmī (printed in Damascus 1340), the *Milāl* of Ibn Hazm, the *Fihrist* of Ibn Nadīm or the *Ansūb* of al-Zubair ibn Bakkar, considering how rare manuscripts of these books are. The book is in fact a curious collection of odd information from all kinds of sources. Apparently there are two editions of this book, one Cairo 1284 and a second without date printed in Tanṭa. The *Shifāʾ al-ʿAlil fi mā fi Kitāb al-ʿArab min al-Dakḥil* is, as indicated by the title, a work dealing with words of foreign origin in the Arabic language. The author has used for this purpose the *Muʿarrab* of al-Djawālīkī [q.v.] and similar works, but is not content with explaining, or simply mentioning, words of foreign origin, as he also gives ample specimens of vulgar errors in correct Arabic speech. Closely resembling this book is a commentary on the *Durrat al-Ḥawwās* of al-Ḥarīrī, which has been printed together with the *Durra* at Constantinople, in 1299. In this work he not seldom corrects al-Ḥarīrī and frequently gives useful additional information and this work together with his *Ṭirāz* are probably the best of his compositions. His *Diwān* is mentioned by al-Muḥibbī and has actually been preserved in manuscript in Copenhagen, but my knowledge of his poetry is confined to what al-Muḥibbī quotes or he himself cites in his own work. It is not of a high standard, but his whole works are typical of his period and vividly reflect what we may expect from his contemporaries.

KHĪWĀFĪ KHĀN (MUHAMMAD ḤASHIM NIZĀM AL-MULKĪ), historian; his title of *Khawāfī Khān* was given him by Muḥammad Shāh and is derived from a family connection with *Khawāf*, a district of eastern Persia, famous for its distinguished men. He was a son of *Khawādjā Mir* a confidential servant of Murād Bakhsh, youngest son of Shāh Djahān. The place and date of his birth are not known, but it seems probable that he was born in India, and a statement in his history (i. 739) implies that his birth took place about 1664. The statement is that 74 years after the death of Shāh Djahān's minister. Saʿd Allāh, he was 52 plus the age of discretion (14?). In other words he was 66 Muhammadan years old in 1728 (1066 + 74 = 1140 A. H.). His father was *Khawādjā Mir*, a confidential servant of Shāh Djahān's youngest son, Murād Bakhsh, and was severely wounded at the battle Samōgarh. *Khawāfī Khān* possibly, like Bernier's friend Dānishmand, began life as a merchant, or as an official's clerk, and it was in one of these capacities that he visited Bombay in 1693—94 and had an interview with an English official (ii. 424, and Elliot-Dowson, vii. 350). He served under Awrangzēb, Bahādur Shāh and Muḥammad Shāh in the Deccan and in Guḍjarāt, and was long stationed at Surāt. He also lived at Aḥmadābād, which he defends against the strictures of *Djahāngīr*, and at Rahūrī, in Siwdjī's country, and in the beginning of Bahādur Shāh's reign he was governor of Čampānir (i. 77). Probably he ended his days at Haidarābād in the service of Āṣaf Djah Nizām al-Mulk (hence our author's title of

Nizām al-Mulki) about 1732—33. He was an intimate friend of *Shāh Nawāz*, the author of *Ma'āthir al-Umarā'* (who was also a Ḥaidarābādī officer) (v. iii. 680 of the Bibl. Ind. ed. of that work, and *Khwaḥī Khān*, ii. 678).

Khwaḥī Khān wrote a history of the Indian branch of *Timūrid* dynasties, and called it *Muntakhab al-Lubāb* (the Choice Compendium). It is a standard work and is much admired, especially by Orientals, for its style, and its accuracy and impartiality, though it is often too grandiloquent for western taste. Still, it is by far the most human and interesting of native histories of India, with the doubtful exception of *Badā'ūni*, and ought to have been translated long ago. After an introduction beginning with *Turk b. Yaphet*, and describing the origins, etc., of the *Tartars* and *Mongols*, it gives short biographies of *Timūr*, his third son, *Mīrān Shāh*, and the descendants of the latter, who were the emperor *Bābur*'s ancestors. These are followed by a history of the emperors of *Āgra* and *Dihlī*, beginning with *Bābur*, of whom there is a tolerably full account, and ending with the beginning of the 14th year of *Muḥammad Shāh*. *Bābur* conquered India in 1526, and the 14th year of *Muḥammad Shāh* was 1732, so that the history covers a period of over 200 years. The last ten years of the history are given in a very abridged form. The most valuable parts of the work are the accounts of *Shāh Djahān* and *Awrangzēb*, for both of whom the author had a high admiration. The history has been published in the *Bibliotheca Indica* (2 vols), but the edition is not complete, for it wants the first part or volume. This last, however, is very rare, and perhaps does not exist in its entirety. There is only a portion of it in the British Museum. The author refers to it in vol. i. p. 49 of the printed edition. *Khwaḥī Khān* also wrote a history of the minor *Muḥammadan* dynasties of India, but this too has disappeared, though a small portion is preserved in MS. in the India Office Library (Ethé, *Cat.*, N^o. 407). It was apparently of little value, being mainly an abridgment of *Farishtā*.

The charm of *Khwaḥī Khān*'s history consists in his digressions and his frequent use of his own observations, and of information derived from his father and brother. He is a somewhat bigoted *Muḥammadan*, and he is too favourable to *Shāh Djahān* and *Awrangzēb*. Thus he slurs over *Awrangzēb*'s treacherous capture and subsequent execution of his younger brother, *Murād Bakhsh*. The capture he represents as a clever manoeuvre (it certainly was to the public advantage), but he is evidently half-ashamed of it, for he declines to give the particulars. In his account of *Murād Bakhsh*'s attempt at escape, and his trial and execution, which he got from his father, he does not plainly set down *Awrangzēb*'s reponsibility, and continues to pay him a compliment for his generosity in rewarding the man who declined to prosecute *Murād* for the murder of his father. He also deals lightly with *Shāh Djahān*'s conduct to *Khusrāw*, and to his competitors for the throne, and says nothing about his debaucheries. Still he is far more honest than *Abu 'l-Faḍl*. His accounts of *Shēr Shāh* and *Djahāngir* are very fair, and in the latter of them he has a very interesting account of *Nūr Djahān*. He says he got it at *Sūrat* in 1695—96 from a very old man, who as a child had accompanied *Nūr Djahān*'s father on his

journey from Persia to *Afghānistān* and India. *Khwaḥī Khān* too, though, like *Tacitus*, he may tell us too much about emperors and their wars, does not omit the more interesting subject of plague, and famine, and of internal administration.

Bibliography: Elliot-Dowson, *History of India*, vii. (which contains a very full abstract, by Prof. Dowson, of the 2nd volume of *Khwaḥī Khān*); Colonel Lees, *Materials for the History of India* (Hertford 1868), p. 57 sq.; there is a manuscript translation of vol. i. by Major Gordon in the British Museum (Add. 26, 617).

(II. BEVERIDGE)

KHAFĪF, the eleventh metre in Arabic prosody, containing three 'arūd and five ḍarb:

I	{	Fā'ilātun mustaf'ilun			
		fā'ilātun ∴	"	"	fā'ilātun
II	{	"	"	"	∴
		"	"	fā'ilā	∴
III	{	"	"	fā'ilā	∴
		"	"	mustaf'ilun	∴
	{	"	"	∴	mustaf'ilun
		"	"	∴	mustaf'il

All the feet lose their second quiescent letter when the last quiescent letter of the preceding foot is retained and vice versa. The foot *fā'ilātun* used as first ḍarb is often changed to *fālātun* (= *maf'ūlun*) by *tash'īth*. (MOH. BEN CHENEF)

KHAIBAR, an oasis on the road from *al-Medina* to *Syria*, 100 miles from *al-Medina*. Doughty, who stayed in *Khaibar* from November, 1877, to March, 1878, describes *Khaibar* as a group of wide, well-watered valleys, which lie together like a palm leaf on the edge of the lava region (*Ḥarra*) and all run into one main valley. These valleys are gashes in the lava-field, beneath which lies sandstone which, wherever it crops out, has a burned and discoloured appearance. The oasis lies 2,800 feet above sea level and Doughty puts its population at about 1,000 souls. The bottoms of the valleys are covered with rushes, the springs have a slightly sulphurous taste and are surrounded by incrustations of salt. In spite of its many palm trees, the land has an uninviting aspect and great stretches of ground lie untillied. The commanding height of *al-Ḥiṣn*, illustrated by Doughty on p. 104, consists of a great basalt rock, which rises out of the *Wādī Zaidiyya*, like an erratic block. The modern settlement is built on its south side. The length of the walled platform of the citadel is 200 paces and the breadth 90. The floor is deep mould, which may be partly of the old clay buildings that have melted away upon the uneven rock. In digging, potsherds, broken glass, eggshells and horse-dung are brought to light. Two ancient pyramids of clay bricks, the lower parts of which are cased with stone, enclose an ancient covered well, which was used to supply the garrison.

The name *Khaibar* is said by *Yāqūt* to have meant "castle" in the language of the Jews who lived there; according to *Sahl b. Muḥammad al-Kātib*, it took its name from *Khaibar b. Kāniya b. Mahlā'il*, who was the first to settle there. The ancient *Khaibar*, according to the old Arab geographers, lay in a very fertile district which was rich in palms and luxurious cornfields, and consisted of seven castles: *Ḥiṣn Na'im*, *Ḥiṣn Abi 'l-Ḥukayk*, *Ḥiṣn al-Shikk*, *Ḥiṣn al-Natāh*, *Ḥiṣn al-Sulālum*, *Ḥiṣn Waṭh* and *Ḥiṣn al-Katiba*. *Al-Bakri* further mentions *Ḥiṣn Wādīda*, in which there were palms and other trees and which later belonged to the Prophet *Muḥammad*, and the greatest stronghold

of Khaibar, Ḥiṣn al-Kamiṣ, which 'Alī b. Abī Ṭālib, afterwards Caliph, captured, the lower part of which was occupied by the mosque of the Prophet (also called al-Manzila), built after the conquest by 'Isā b. Mūsā. The spring in the fort of al-Shiḡḡ was called al-Hamma. The Prophet called it *Ḳismat al-Maṭā'ika* ("the angels' share"). It was much admired for the remarkable properties of its water. Two-thirds of its water flowed away in one channel and the other third in another. Both had the same direction. If three pieces of wood or three dates were thrown into the well, two went into the channel containing two-thirds and one into the other. No one could take more than a third of the spring water out of this channel and if anyone stood in the channel which took two-thirds in order to send more water into the smaller channel, the water overwhelmed him and flowed past him so that none went back into the second channel to increase its share.

The oldest mention of Khaibar in inscriptions is in the bilingual inscription of 568 A.D. of Ḥarrān in al-Ledja, of which E. Littmann has given the correct interpretation in *Osservazioni sulle iscrizioni di Ḥarrān e di Zebad*, in *R.S.O.*, 1911/12, iv. 193 sqq. The inscription bears the date "in the year 463 [viz. of the era of Boṣra], a year after the expedition of Khaibar". According to Ibn Ḳutaiba, *Kitāb al-Ma'ārif*, ed. Wüstenfeld, p. 313, this expedition took place under King al-Ḥārith b. Abī Shamir (al-Ḥārith b. Djabala), who reigned from 528 to 569/570 A.D.; the inscription now gives as the exact date for this event the year 567 A.D. Much more serious for the history of Khaibar and its Jewish population was Muḥammad's campaign; he set out in the beginning of the year 7 A.H. (628 A.D.) with about 1600 men against Khaibar, presumably with the object of obliterating the unfavourable impression made by the treaty of Ḥudaibiya and of offering his followers a rich substitute for the booty they had lost. The Jews of Khaibar had apparently prepared for Muḥammad's attack, but they were not united among themselves. The population was not a solid body living together within one area, but was scattered among the surrounding valleys, where they occupied in little groups fortified houses in the midst of rich palm groves and cornfields. Every settlement had its own particular name. The valley was divided into three territories, called al-Nataḥ, al-Shiḡḡ and al-Katiba. This strategically unfavourable mode of settlement was from the first a disadvantage, and the position of the Khaibaris became still more precarious when their allies, the Ḡhaṭafān, left them in the lurch, and their 4,000 auxiliaries left Khaibar for their homes. Muḥammad thus had a free hand. The advance was carried out by night and in the morning the Khaibaris found the Muslim troops confronting them; they had taken up their quarters behind the Ḥarra on the edge of the desert. It took Muḥammad about six weeks to conquer the whole district of Khaibar. Every strong house, every fortified place had to be besieged and stormed, frequently after heavy fighting. The castle of al-Nataḥ was the first to be attacked; it resisted for over a week. In revenge for the stubborn defence, Muḥammad had the splendid palm-trees around it cut down. 400 were destroyed before the politic Abū Bakr put a stop to further devastation. Al-Shiḡḡ was next stormed. The successes of the Muslims had already much weakened the

strength of the defence. Treachery had placed al-Nataḥ in the hands of the Prophet, and as engines of war had also been captured, in the use of which a Jewish traitor instructed the Muslims, the resistance of the Jews diminished considerably so that the other strongholds fell more quickly. The last bulwark of the defence, al-Katiba, fell almost without resistance. The Jews were sentenced to lose all their property and were left with their wives and children and allowed to till the soil which they had previously owned. Half of the harvest had to be handed over to Muḥammad. This tribute continued to be paid until the Caliph 'Umar b. al-Ḥaṭṭāb drove the Jews out of Arabia. Later, however, the Jews returned in certain numbers to Khaibar. Benjamin of Tudela says that in 1173 A.D. a Jewish colony, 1150 strong, which must have formed a closed community, lived in Khaibar. Not too much stress need be laid on his statement. Burckhardt, who saw Khaibar at the beginning of the sixteenth century, mentions that the Jewish community once settled here had entirely disappeared.

KHAIBAR PASS, the northern route between Afghānistān and India, leading from Kābul to Peshāwar. The pass runs from Dakka to Djamrūd and is about thirty-three miles long, its centre lying in 34° 6' N. and 71° 5' E. Its highest point, Landi Kotal, is 3,378 feet above sea-level.

Alexander the Great probably sent the division of his army under Hephaestion and Perdicas through the Khaibar, while he himself followed the northern bank of the Kābul river and crossed the Kūnar valley into Bādjawr and Sawād. Maḥmūd of Ghazna used the pass only once, when he marched to meet Dīalpāl in the Peshāwar valley. The Amir Timūr used it when invading India in 1398 and when retiring in 1399.

Bābur invaded India by the pass in 1525 and Humāyūn, after capturing Kābul, on his return from exile, traversed it. It was the route regularly used by Akbar and his successors between the Panjāb and Kābul, and Djalālābād, first fortified by Humāyūn, was named after Akbar. The pass was held in Mughal times, as now, by the Afridis, a turbulent tribe extremely jealous of foreign encroachment, and in the reign of Akbar their hostility was accentuated by the establishment in this region of a heretical and fanatical sect, the Rawshaniyas [q.v.], who commanded the adherence of the Afridis, Yūsufzais, and other tribes. In 1586, on the death of Mirzā Muḥammad Amīn, ruler of Kābul and younger brother of Akbar, Rājā Mān Singh, marching to take possession of Kābul in the name of the emperor, was obliged to force the pass, an operation which was performed with

difficulty, and the suppression of the Rawshaniyas cost much blood and treasure. In 1672 the tribes attacked Muḥammad Amīn Khān Awrangzībī, governor of Kābul, in the pass, annihilated his army of 40,000 men and captured the women and children and the imperial treasure and elephants.

Nāḍir Shāh, advancing by it to attack Nāṣir Khān ṣubadār of Kābul under the Mughal government, was opposed by the tribesmen, but led his cavalry through Bāzār, took Nāṣir Khān by surprise, and overthrew him near Djamrud. Aḥmad Shāh Durrānī and Shāh Zamān used the pass on several occasions when invading the Panjāb.

The British first used the Khaibar Pass in 1839 in the attempt to establish Shāh Shudjā in Afghānistān, and have since used it on several occasions, more than once suffering disasters in traversing it.

By the treaty of Gandamak (1879) between the British and the Amīr Yaḳūb Khān, the control of the pass was left to the former, who have exercised it latterly by maintaining an experienced political officer for the pass, at whose disposal are the Khaibar Rifles, a corps of militia composed of Afridis under British officers. The arrangement has not been entirely satisfactory, but was probably the best that could be made with so turbulent and treacherous a tribe.

KHAIR AL-DĪN, an important Turkish architect of the time of Sulṭān Walī Bāyazīd II (1481—1512). As a result of the habit of Turkish historians of mentioning favourably every pious founder, writer of chronograms, and calligrapher, but only exceptionally giving the name of the creator of a masterpiece of architecture, or even giving any biographical notice of him, Khair al-Din's activities are veiled in obscurity. It is certain, however, that he is a historical personality. He is said to have been the son of the architect Ustād Murād. His masterpiece is the Bāyazīd Mosque, a vigorous piece of architecture, in Constantinople (built between 1501 and 1507) (on which see Ewliyā, *Siyāhat-nāma*, Stambul 1314, i. 142; Sa'd al-Dīn, *Tādī al-Tawārīkh*, Stambul 1279, ii. 211; von Hammer, *Constantinopolis und der Bosphoros*, Pest 1822, i. 402; Skarlatos Byzantios, *Konstantinopolis*, Athens 1890, i. 421).

The popular Turkish view of the importance of Khair al-Din, who is considered the real founder of Ottoman architecture and is approached by none of his predecessors (Elyās b. 'Alī, Mehmed al-Madīnūn, Mūsā, etc.) or his successors (M. Kāsim, Kamāl al-Dīn) down to Sinān [q. v.], the greatest of Ottoman architects and one of the greatest of the world's architects, is confirmed by his masterpiece, the Bāyazīd Mosque.

The scheme of two half-domes supporting the

principal dome is modelled, it is true, on the Aya Sofia, but dominated by another conception and deliberately developed further. Pious legends are associated with the building.

There is also a little mosque by him which bears his name, not far from the *türbe* of the Grand Vizier Sinān Pasha at Parmak Kapusu. His tomb is in front of this *türbe*.

(TH. MENZEL)

KHAIR AL-DĪN (BARBAROSSA), the famous Turkish corsair and Beylerbey of Algiers and brother of 'Arūdj [q. v.]. In spite of the statement to the contrary by Haedo, it is he who is referred to by the epithet Barberousse (Barbarossa, Aenobarbus) in the diplomatic correspondence of the French court. Born at Metellin about 888 (1483) he was at first a pirate under the command of his brother and acquired a great reputation for skill and bravery. When 'Arūdj set out on his expedition against Tlemcen he gave his brother the governorship of Algiers, which he had just taken. When the news of the death of 'Arūdj arrived, Khair al-Din was unanimously chosen by his companions to succeed him. But he soon found himself in a very critical position. The towns of Cherchell and Tenès had rebelled; the Kabyls of Ibn al-Kāḍī, king of Kāko, deserted him; Abū Hammū, king of Tlemcen, had invaded the Chelif valley; finally the Algerians, tired of the cruelty of the Turks, were only waiting an opportunity to throw off the yoke. Thus feeling unable to cope with all his opponents with the forces at his command, Barbarossa sought the help of Selīm, Sulṭān of Constantinople. He paid homage to him for the lands conquered by his brother and promised to pay him tribute. The Sulṭān, who had just conquered Egypt (1517), eagerly seized this opportunity of placing the shores of the Western Mediterranean under his sway. He accepted the homage of Khair al-Din and gave him the ranks of Pasha and Beylerbey (cf. the article BEG). At the same time he sent 2,000 men with artillery to Algiers and authorised the enrolment of volunteers, to whom he granted the rights and privileges of the Janissaries [q. v.]. 4,000 Turks or Levantines thus came to serve under Barbarossa and formed the *odjak* or militia of Algiers.

The arrival of these reinforcements enabled Khair al-Din to meet the dangers which threatened him. A conspiracy of the Algerians who had agreed with the tribesmen to set fire to the fleet and massacre the Turks was put down and the heads of the ringleaders fixed on the gates of the Pasha's palace. A Spanish force under Ugo de Moncade was repulsed. The Christians landing at the mouth of the Harraṣh (al-Ḥarāṣh) had taken up their position on the heights of Kudyat al-Ṣabūn and began to bombard the town. Barbarossa succeeded in drawing them out of their entrenchments by attacking their ships drawn up on the shore and forced them to re-embark (1519). In the east, on the other hand, he was less fortunate. A Tunisian

army was advancing on Algiers. He set out against that and met the enemy in Kabylia on the territory of the Flissat Umellil. In the middle of the battle, the Sultān of Kūko, secretly won over by the Ḥafsid Sultān, deserted and turned against the Turks. The latter were cut to pieces and Barbarossa, with his road to Algiers barred, had to take refuge in *Djidjelli* [q. v.]. During this time the Kabyls laid waste Mitidja and occupied Algiers, while Chercell and Tenès again revolted (1520).

Taking refuge in *Djidjelli*, *Khair al-Din* began to reconstitute his army and to gather reinforcements. He resumed his old trade of pirate and from 1520 to 1525 he ravaged the coasts of the western Mediterranean, amassing considerable booty and gathering numerous adventurers around him. He was soon strong enough to seize Collo (1521), Bône (1522) and Constantine. He also secured the help of the natives of Little Kabylia by making an alliance with 'Abd al-'Azīz, chief of the Banū 'Abbās, rival of the Sultān of Kūko. Thus he was able in 1525 to resume the offensive against Ibn al-*Qāḍī*. Defeated at the Wādī Bugdura and again at the pass of the Banū 'Aīsha, the latter was killed by his own soldiers. Mitidja and Algiers were reoccupied by the Turks, the rebel chiefs of Tenès and Chercell were put to death and the inhabitants of Constantine, who had in 1527 expelled their *kā'id* and massacred the Turkish garrison, severely punished. Finally, Husain, who had succeeded Ibn al-*Qāḍī*, tendered his submission and agreed to pay an annual tribute (1528).

The capture of Peñon, a Spanish stronghold built on an islet within cannon-shot of Algiers, completed the restoration of Turkish power. In the beginning of May, 1529, Barbarossa began the bombardment of this fortress, the garrison of which the Spaniards had neglected to strengthen; it was taken by storm on May 27 when there were only 25 unwounded defenders left. *Khair al-Din* had the governor, Don Martin de Vargas, put to death and ordered the outer walls of Peñon to be razed to the ground. The debris were used to build a mole joining the island to the mainland. This jetty protected the roadstead from the west winds and enabled the corsairs to leave their ships in shelter which they had previously been obliged to draw up on shore during bad weather. This created the harbour of Algiers, a refuge and base for operations for the Barbary fleets. Disturbed by this new success of *Khair al-Din*, the Spaniards tried to secure a landing place on the coast by taking Chercell, but the expedition led against this town by Andreas Doria ended in failure (1531).

Now definitely installed in Algiers, Barbarossa set himself to increase still further his military forces by organising, alongside of the Janissaries, whose insolence and insubordination rendered them dangerous, bodies of troops personally devoted to him. He formed a guard of 500 renegades, for the most part Spaniards, raised 7,000 to 8,000 Greeks and Albanians, enrolled Kabyls, and entrusted the command of this new force and of his artillery to *ra'īs*, his old companions. He thus found himself able to undertake an expedition against Tunis, with the inhabitants of which he had long had secret negotiations. By taking this town he wished to anticipate the designs of the Spaniards and secure himself the control of all the eastern shore of Africa. The Sultān, to whom he had communicated his plans, gave him the required au-

thorisation and sent him auxiliaries. Leaving the government of Algiers to his *khālifa*, Hasan Agha, Barbarossa entered Tunisia, seized La Goulette (Aug. 16, 1534) and from there advanced on Tunis. Mūlāy Hasan, who tried to stop him, was defeated in a battle fought near the gate of al-Djazira, and had to flee (Aug. 18). The Turks entered Tunis and plundered the town. The rest of the kingdom submitted without resistance.

Barbarossa's success was, however, of short duration. In the month of June, 1535, Charles V appeared on the coast of Tunis. On July 14th the Spaniards captured La Goulette and on the 20th became masters of Tunis. The Christian slaves, whom *Khair al-Din* had refused to massacre, burst their chains and joined the attackers. Fearing he might be surrounded by the enemy, the Beylerbey fell back on Bône, where he found his fleet, which he had sent there on receiving news of the preparation of the Spanish expedition. From there he sailed for the Balearic Islands, sacked Mahon and brought back to Algiers 6,000 captives and considerable booty.

A little later, *Khair al-Din* went to Constantinople by order of Sultān Suleimān, who in 1533 had appointed him *Ḳapudan paṣha* and wished to entrust him with the direction of the naval campaign against Charles V and his allies. He had not to return to Algiers, where authority was exercised in his name by a *khālifa*. At Constantinople Barbarossa devoted himself entirely to his new office. He reorganised and increased the Turkish fleet and took an active part personally in the naval war. In 1537 he ravaged the coasts of Apulia, tried unsuccessfully to take Brindisi by surprise and took part in the siege of Corfu. Not having been able to capture the latter place, he turned his attention to the Venetian possessions in the Aegean Sea and occupied the islands of the Dodecanese. The following year he completed the conquest of the Archipelago by taking Sciatis, Scyros and Carpathos; he then made a descent on the island of Crete where he burned two towns and 80 villages. In the Ionian Sea he gained two victories over Andreas Doria, at Preveza and St. Maura. In 1539, with the help of his lieutenants, Hasan Corso and Dragut, he recaptured Castelnovo in the Gulf of Cattaro and Malvasia and Nauplia in the Morea. The Venetians were forced to submit to concluding a truce with the Porte.

These successes secured Barbarossa a position of preponderating influence in Constantinople. Honoured by the friendship of the Sultān, he persuaded Suleimān to continue the war in the Western Mediterranean. He was also decidedly in favour of the French alliance. From 1534 he had been in correspondence with Francis I; after the conclusion of the treaty of Baghdad, he was the confidant of the ambassadors of the most "Christian King" and leader of the French party in the Grand Diwān. Charles V endeavoured to win him over to his cause by secretly offering to recognise him as sovereign of the whole of North Africa on payment of a small tribute. Barbarossa, while pretending to lend himself to the Emperor's plans, at once revealed them to the Sultān. The disastrous end of Charles V's expedition to Algiers (1541) still further increased *Khair al-Din*'s prestige, although he had taken no share at all in the defence of the town.

Hostilities, suspended since the truce of Nice (1538), began again between Francis I and Charles

V (1541). Barbarossa was given command of the Turkish fleet, which was to co-operate with the French forces. In 1543 he operated along the Italian coasts, took Reggio, ravaged the coasts of Calabria, then, after joining the Duc d'Enghien at Marseilles, laid siege to Nice. The town of Villefranche, where the Turks landed, was taken and destroyed. Nice was occupied but the castle could not be taken. The arrival of Doria's fleet and the Marquis del Vasto's army forced the Turks to withdraw. A portion of their fleet wintered at Toulon while the rest went along the Catalanian coast and sacked Palamos and Rosas. The peace of Crespy (1544) ending the war, Khair al-Din returned to the Levant, pillaging the islands and shores of Tuscany and the Kingdom of Naples.

After this campaign, Barbarossa retired to Constantinople. He had great wealth in this town, including several palaces on the Bosphorus.

He died on July 4, 1546, at the age of 63, and was buried in the mosque which he had built at Büyük Dere (see the art. DERE). By his will he ordered all his slaves under 15 years old to be liberated and left the others, 800 in number, to the Sultān as well as 30 armed galleys. The rest of his wealth was divided between his nephew and his son Ḥasan, whose mother was a Moresco, and who on three different occasions filled the office of governor of Algiers (see the art. ḤASAN PASHA, above, ii. 281).

Barbarossa was not only a successful corsair and a remarkable soldier; he also possessed certain of the qualities of a statesman, an indomitable resolution which enabled him to surmount the greatest difficulties, and a very accurate sense of the conditions on which the establishment of a permanent state in Barbary depended. He understood that Turkish rule, being restricted to the coast, naturally tended to be precarious; he therefore tried to make himself master of the interior. His ambition was to unite in one vast state, of which he would be the sovereign, the whole of North Africa. If circumstances did not permit him to realise this plan, at least he finished the work begun by 'Arūdj, and he may be regarded as the real founder of the Regency of Algiers.

KHAIR AL-DĪN PASHA. [See ÇENDERELI].

KHAIR AL-DĪN PASHA, a statesman of the time of 'Abd al-Ḥamīd II. He was of Circassian origin, but spent his early years in Tunis, where he rose to important offices as a result of his brilliant abilities. He ultimately became *bash müdür*. His great aim was to achieve a closer relationship with Turkey, which was recognised in a firmān of Sultān 'Abd al-'Aziz. As a result of a quarrel with Šādīk Pasha, then Wali of Tunis, he left the Tunisian service and retired to Paris. In 1294 (1877) 'Abd al-Ḥamīd summoned him to Constantinople and appointed him president of the commission on financial reforms and later of the Council of State. In the difficult period after the loss of the Russo-Turkish war he was appointed Grand Vizier in 1295 (1878), the eighth in the short period 'Abd al-Ḥamīd had been reigning.

Khair al-Din was very liberal in his views and endeavoured to further the reform movement now beginning by introducing improvements, especially in the administration of justice, and tried to strengthen the Grand Vizier's power as much as possible in opposition to 'Abd al-Ḥamīd's wish to make the Grand Vizier a mere instrument for the execution of instructions given by the Yildiz Kiosk. He brought upon himself the opposition of the 'ulamā, who would only allow the Grand Vizier the right of presiding at the council of ministers. After only eight months of office he was dismissed. He died in Constantinople in 1307 (1889) at the age of nearly 70 and was buried in Aiyūb. He bore the reputation of being reliable, fearless, steadfast and liberal. He wrote an Arabic work entitled *Akwām al-Masālik fī Ma'rifat Ahwāl al-Mamālīk*, said to have also been translated into Turkish and French.

(TH. MENZEL)

KHAIRĀBĀD is a town in the District of Sitāpūr, United Provinces, India. Population (1901), 13,774. It was formerly a place of importance, and is said to have been founded by one Khaira, a Pāsī, in the xith century. It is, however, more probable that the name was given by Muḥammadans to an older town on the same site; and it has been identified with Masachhatra, an ancient holy place. A number of temples and mosques are situated here, some of them dating from the reign of Akbar, but none is of much

interest. It has been a municipality since 1869. Trade has suffered owing to the rise in importance of Sitāpūr, but there is a daily market, and a small industry in cotton printing survives.

At the time of Akbar the *Sarkar* of Khairābād consisted of 22 mahals or parganas, but many of these lay in the present districts of Kheri and Hardoi. This pargana consisted of the Southern portion of the country lying between the Gond and Zarayan rivers. It was bounded on the North by Hargram, on the east by Lakarpūr and Biswan, on the west by Sitāpūr and Ramkot, on the South-east by Machhrehta, and on the South-east by Pirnagar. The whole of the Southern half of the pargana is a high lying tract with a high soil and good natural drainage producing in favourable seasons fine crops of wheat. North of the road from Sitāpūr to Khairābād and from the latter to Biswan, the land lies low, the soil being stiffer and liable to flooding from numerous jhils and water-courses. However the cultivation is generally poor, the majority of the tenants belong to the inferior cultivating classes, the holdings are large, the cattle are wretched; many of the landlords are heavily in debt and means of irrigation are deficient.

KHAIRPŪR, a state in Sind, laying between 26° 10' and 27° 46' N. and 68° 20' and 70° 14' E. The state has no separate history until the fall of the Kalhora dynasty of Sind in 1783, when Mir Fath 'Alī Khān Tālpur, a Balūč chief, established himself as ruler of Sind. Subsequently his nephew, Mir Suhrāb Khān Tālpur founded the Khairpūr branch of the family. His dominions at first consisted of the town of Khairpūr and its environs, but he enlarged them by conquest and intrigue until they extended to Sabzalkot and Kashmor on the North, to the Džaisalmer desert on the East, and to the borders of Kačch Gandāva on the West. About 1813, during the troubles attending the establishment of the Bārakzai dynasty in Kābul, the Mirs withheld the tribute which they had hitherto paid to the rulers of Afghānistān and became virtually independent, but jealousy between Rustam, who had succeeded his father Suhrāb in 1811, and his brother 'Alī Murād, contributed to the crisis which led to British intervention. In 1832 the individuality of the state as a political entity was recognised by the British government, which secured for itself the use of the Indus and the roads of Sind. The Mirs of Sind were loth to permit the passage of British troops through their dominions during the first Afghān war, but 'Alī Murād of Khairpūr supported the British policy, and after the battles of Miāni and Daba, his state retained its political existence.

(T. W. HAIG)

KHAIRULLĀH EFENDI, an important Turkish historian. Born in Constantinople, of a family which had over 160 years unbroken service with the Sultān, the son of the famous 'Abd al-Hakḳ Efendi (d. 1270 = 1853/1854, a theologian and physician, who was thrice *Ser-i*

Aṭibbā and from 1269 bore the honorary title *Ra'is al-'Ulamā*), he began by following in his father's footsteps and adopted a theological career, his first office being Mollā of Smyrna (1258=1842). Later he turned to science, medicine and education. In 1265 he became a member of the Board of Education, the Agricultural Council and second president of the Academy of Sciences (*Endjumen-i Dānīsh*), president of various learned bodies, and filled high offices in the newly formed Ministry of Education, was for long head of the School of Medicine, till in 1281 (1864) he was sent as ambassador to Teherān, where he died suddenly in 1283 (1866).

His sons are 'Abd al-Hakḳ Hāmid, the most important poet and dramatist of the new Turkey, and 'Abd al-Khālīk Naṣūhī, who have both served their country as ambassadors and envoys.

Khairullāh left a large number of historical, geographical, medical, scientific and agricultural works, the latter of which are mainly translations; some of them have been printed, like the *Mesāl-i Hikmet*, *Bait-i Dihkāni*, his journey to Europe (*Awropa seyūhat-nāmesi*). But his importance rests on his work as a historian. Besides the *Waḳāyī-i Miṣriye*, he wrote a history, planned on a grand scale, of the Ottoman empire entitled *Dewlet-i 'Alīye-i 'Othmāniye Tārīkhī*, which began to appear almost at the same time as the excellent 12 volume history by the historian of the empire, Ahmed Djewdet [q.v.], which covers the period 1774—1826.

Khairullāh Efendi aims at giving the whole of Turkish history in one continuous work. He is the first Turkish historian to attempt to deal with Turkish history in its place in the world's history, in contrast to the method hitherto in vogue among Ottoman annalists of limiting themselves entirely to Turkish sources and affairs; he was actually the first to succeed to some degree in producing a *Tārīkh-i 'Umūmī*, a world history. With the exception of von Hammer-Purgstall's *Geschichte des osmanischen Reiches*, it is almost entirely French sources that he uses, as is obvious from the fact that he always writes foreign names as they are pronounced in French. At the same time he not infrequently draws upon hitherto not fully utilised Turkish sources.

A special volume is devoted to the introduction and to the early history of the Ottoman empire, the period before the reign of 'Othmān I. The further work is planned to have a volume to the period of each Sultān. At the same time a survey of contemporary Muslim and Christian rulers is always given. The treatment of the material is no longer annalistic but pragmatic. In comparison to the inflated style of early historians, his language is simple, clear and intelligible. His history is also meritoriously distinguished from those of his predecessors by the absence of bias and the lack of any fanatical hatred of non-Muslim culture and conditions.

Of his history, 15 volumes in all appeared (1271—1281 = 1853—1864), from 'Othmān I to the time of Ahmed I (1603—1617), when death put a stop to his work. 'Alī Shewḳī, inspector in the *Diwān-i Ahkām-i 'Adliye*, then tried to finish the book, of which Khairullāh had written barely half; but only three further volumes, 16—18, appeared (1289—1292 = 1872—1875) bringing the work to the time of Sultān Ibrāhīm (1639—1648).

AL-KHAIYĀT, YAḤYĀ B. GHĀLIB ABŪ ‘ALĪ, an Arab astrologer, pupil of Māhāllāh, often mentioned in Christian writers of the middle ages under the name of ALBOHALI. The exact dates of his birth and death are unknown but the latter may be put with some certainty between 210 and 230 (825–844). Of his works there still survive: *Kitāb Sirr al-‘Anāl* ("the book of the secret of action") dealing mainly with the formulation of astrological questions etc. (in Berlin); *Kitāb al-Mawālīd* ("book of births") (in Oxford and Cairo(?)). The book on births was translated into Latin by Plato of Tivoli (1136) and later again (1153) by Joh. Hispalensis; the latter translation was printed in Nürnberg in 1546 with the title: *Al-bohali Arabis astrologi antiquissimi ac clarissimi de iudiciis nativitatum liber unus antehac non editus. Cum privilegio D. Joanni Shonero concesso*. In place of Albohali simply we find in MSS. also Albohali Alghihac, Alboali Alchait, Albenahait, etc.

KHAKĀN, Arabic transcription of the Turkish regal title KAĞHAN. We find this title already borne by the rulers of the earliest people who called themselves "Turk" (vith cent. A.D.) and it had been taken by them from their predecessors, the "genuine Avars" or the Zoan-Zoan of the Chinese (Kiessling in Pauly-Wissowa, *Real-encyklopädie*, viii. 2587, s. v. HUNNI; also among the so-called Pseudo-Avars, cf. e. g. *Fragn. Hist. Graec.*, iv. 233). In one of the oldest inscriptions, that of Tonyukuk (W. Radloff, *Die alttürkischen Inschriften der Mongolei*, 2nd Series, St. Petersburg 1899), we find *Kan* alongside of *KAghan* with the same meaning, perhaps only the result of a contraction of *KAghan*. Later a distinction was made between *Kan* or *Khān* and *KAghan* or *Khākān* and *Khākān* used in the meaning of "Khān of Khāns", like the Persian *Shāhānshāh*; this we find as early as the fourth (xth) century in Abū ‘Abd Allāh al-Khwārizmī, *Mafātīḥ al-‘Ulūm*, ed. van Vloten, Leiden 1895, p. 120; the word *Kān* which appears in the Mongol period and was not used later has the same significance. *Khākān* is still regarded as the Turkish national title *kar-ēghān* and has been used quite recently by champions of the nationalist idea in Turkey in preference to *Sultān* and *Khalīfa*.

(W. BARTHOLD)

KHAKĀN. [See FATH ‘ALĪ SHĀH].

KHAKĀNĪ (AFDAL AL-DĪN IBRAHĪM HAKĀ‘IKĪ, surnamed Khākānī), a Persian poet, born at Gandja (Elisavetpol) in 500 (1106–1107), the son of a carpenter, ‘Alī, and a Nestorian wife whom he had purchased from a slave-dealer. His grandfather was a weaver. His uncle Kāfi b. ‘Uṭhmān, who was his benefactor, was a physician and druggist. He was taken charge of by him when his father, sunk in poverty, abandoned him. Trained in the school of Abū ‘l-‘Ulā, the latter accepted him as his son-in-law and obtained from the Khākān Manūčīhr permission to give him the *takhalluṣ* of Khākānī. Later they quarrelled most bitterly and exchanged scathing epigrams (between 538 and 540). It was then that the poet quitted his native town to go to Bākū where the Shīrwānshāh Akhsatān, son of Manūčīhr, was settled. Obtaining, not without difficulty, permission to perform the pilgrimage to Mekka he was well received on his return by the governor of Mosul, Djemāl al-Dīn, which earned him the disfavour of his patron and imprisonment in the fortress of Shābīrān. Retiring to Tibriz after the death of his wife, he died there probably in 595 (1200) and was buried in the cemetery of Surkh Āb. Although the majority of his biographers say that his name was Ibrāhīm, it should be noted that his father called him Badīl "the substitute" because he had come to replace the great mystic Hakīm Sanā‘ī.

The *Tuḥfat al-‘Irākān* = "Gift to the two 'Irāqs", a poetical description of his journey to Mekka and back, was autographed at Agra by Mirzā Abū ‘l-Hasan (1855). His *Diwān* entitled *Khulliyāt-i Khākānī* was lithographed at Lucknow in 1293–1295 (2 vols.); it is arranged in the order of subjects: — religious and moral poems, panegyrics, poems with refrains, funeral elegies, short mystical pieces, epigrams, satires; 44 *ḥaṣīda*'s were annotated at the beginning of the xth (xvth) century by Muḥammad b. Da‘ūd of Shādī-Ābād (= Mandū, capital of Malwa in India).

(1865), p. 296; Muḥammad ‘Awfī, *Lubāb al-Ālāb*, ii. 221; Dawlat-Shāh, *Tadhkirat al-Shu‘arā*, p. 78; J. von Hammer, *Gesch. der schönen Redekünste Persiens*, p. 125; Riḍā Kulīkhān, *Madjma‘ al-Fuṣṣahā*, i. 200–213; Djāmī, *Nafahāt al-Uns*, p. 707; Sprenger, *Cat. of the MSS. of the King of Oudh*, p. 461; *Mélanges asiatiques*, iii. 114; Ivanow, *Descriptive Catalogue As. Soc. Bengal*, Calcutta 1924, p. 201.

(CL. HUART)

KHAKĀNĪ, a Turkish poet of the second half of the xvth century. His proper name was Muḥammad Bey and he was a descendant of Āyās Pasha [q. v.] who was Grand Wazir under Suleimān I. His life was not eventful; according to *Sijfīll-i ‘Oṭhmānī* he was *mutafarriḳa* and *sandjāk-bey*. Khākānī owes his fame to a not very long *māthnawī* called *Hilya-i Sharīfa*, written in a tripodic *ramal*-metre. This poem is a paraphrase of an Arabic text known as *al-Hilya al-Nabawiya* containing a traditional account of the prophet's personal appearance; each of the enumerated features is commented on by the poet in twelve to twenty *bai*'s. According to Nāḍī the poem has acquired the same degree of popularity as the *Mawlid-i Sharīf* of Suleimān Čelebi. It was printed in Constantinople in 1264 and almost the whole

of it is incorporated in vol. iii. of *Diya Pasha's Kharabat* (Constantinople 1291). As *Khakani* states at the end of his poem, it was completed in 1007 (1598—1599); at that time he had already attained a great age. The poet *Djewri* (d. 1065) wrote a *nazira* to the *Hilya*. Of other poems by *Khakani* — he is said to have composed a *Diwan* — are only known a *mathnawi* called *Misfah al-Futuhāt* an a *ghazal*, both in a *Gotha MS.* (Cat., p. 171). He died in 1015 (1606—1607) and is buried in the cemetery of the mosque of *Edirne Kapl.*

Khakani is a striking figure in the transition period of Ottoman poetry after *Baki*, which is characterised by a growing taste for religious subjects.

(J. H. KRAMERS)

KHĀL (A.), maternal uncle. The *khāl*, although, according to the traditional patriarchal family law in Arabia, not actually considered a relative of his sister's son, was in popular regard equal to the latter's father and his father's relatives. It usually took a good deal of effort to fight on the side of one's paternal relatives against those of one's mother, and to avenge the death of paternal relatives also on one's *khāl*'s. Special stress was generally laid on the noble blood of one's *khāl*'s because the sister's children in particular were considered to inherit all noble or ignoble traits of character of their *khāl*'s.

The Muslim law, which, following the old Arab family law, paid most attention to paternal relationship, however forbids (on the authority of *Sūra iv. 27*) the *khāl* to marry his sister's daughter because the blood-relationship is too close.

The word *khāl*, which often has the more general meaning of "maternal ancestor", does not seem to go back to one of the original Semitic names of relationship.

(TH. W. JUVENOLL)

KHAL'A. [See *KHIL'A*.]

KHALADJ, a Turkish tribe; the Turkish name was probably *Kalač* (see below). As early as the fourth (tenth) century we find the *Khaladj* living much farther south than the other Turks, in the southern part of the modern *Afghanistan* between *Seistan* and *India*. They are said even then to have come thither "in ancient times" (*fi kadim al-aiyam*) (*al-Istakhrî*, ed. de Goeje, *Bibl. Geogr. Arab.*, i. 254). The word is variously vocalised in Arabic manuscripts, e.g. *al-Khaladj* in *al-Istakhrî*, p. 281 infra; *Khaladj* also in M. Longworth Dames (see the art. *AFGHANISTAN*, J. Marquart (*Erānsahr*, Berlin 1901, p. 253) connects the *Khaladj* with the *Xolātai* of the By-

zantine sources and the *Kūlas* of the anonymous Syriac narrative of the year 554—555 and proceeds to deduce an original pronunciation *Khūladj*. In favour of *Khalāč* we have two later Turkish popular etymologies, given in the legend of *Oghuz Khān* (cf. the art. *GHUZZ*): *kal āi* "remain hungry!" in *Rashid al-Din*, text and translation in W. Radloff, *Kudatku Bilik*, vol. i., St. Petersburg 1891, Introduction, p. xxi., and *kal āi* "remain open!" (imperative) in the anonymous legend preserved in the *Uighur* character (*ibid.*, text p. 240, translation p. xii.). The *Khaladj* are never mentioned as an independent political unit but always as mercenaries or guards of foreign rulers; their leaders, like those of other Turkish guards, sometimes succeeded in founding independent dynasties, especially in *India*, where the pronunciation *Khildji* for *Khaladj* prevails (see the articles following). It is usually assumed that the *Afghan* speaking *Ghalzai* of the present day in the upper valleys of the *Tarnak*, *Arghandāb* and *Afghasān* are *Afghanised* descendants of the Turkish *Khaladj*. This assumption is disputed by M. Longworth Dames (cf. the art. *AFGHANISTAN* and *GHALZAI*), although he grants that the *Ghalzai* have a good deal of Turkish blood. (W. BARTHOLD)

KHALAF B. 'ABD AL-MALIK [q. v.]. [See *IBN BASHKUWĀL*.]

KHALDĪ, the adjectival form of *Khaladj*, the name of a Turkish tribe which migrated from *Turkistan* at a period which cannot be precisely ascertained and settled in Western *Afghanistan*. From long residence in this country they were regarded, even as early as the end of the thirteenth century, when *Firūz Khaldji* ascended the throne of *Dihli*, as *Afghāns*. They bore a high reputation as statesmen and soldiers, many served the early kings of *Ghazni* and *Ghur*, and many afterwards attained to the highest rank in *India*, as, for instance, *Muhammad b. Bakhtiyār*, the conqueror of *Bengal*, *Firūz*, just mentioned, who founded the dynasty which reigned at *Dihli* from 1290 to 1320, and *Mahmūd*, founder of the *Khaladj* dynasty of *Mālwa* (1436 to 1531), who was descended from *Nasir al-Din*, the eldest brother of *Firūz*. The *Lodis*, the dynasty founded by *Bahmūd*, which reigned at *Dihli* from 1451 to 1526, were a clan of the *Khaladj*s.

The late Major H. G. Raverty objected strongly, but with little apparent reason, to the identification of the *Ghilzais* with the *Khaladj*s. Their identity cannot be conclusively established, but the *Ghilzais* claim a Turkish descent and are found in the region where we should expect to find the *Khaladj*s; the corruption of the name is not unnatural among *Afghāns*, and if the *Ghilzais* are not *Khaladj*s it is difficult to say where the latter are to be sought, for no trace of them is found elsewhere, and there is no record of their extermination.

Bibliography: *Minhādji Sirāji Tabakāt-i Nāsirī*, and translation by H. G. Raverty, London, 1873—1881; *Nizām al-Din Ahmad, Tabakāt-i Akbarī*, and translation by B. Dhé (Bibl. Ind. Series, A.S.B.); *Muhammad Kāsim Firishta, Gulshan-i Ibrāhimi*, Bombay 1832. (T. W. HAIG)

KHALDĪ or **KHILDĪ**, the dynasty of *Dihli*, was founded by *Djalāl al-Din Firūz* (see *FIRUZ SHAH KHILDĪ*) of the *Ghilzai* or *Ghildjai* tribe of *Afghanistan*. A Turki descent has been claimed for this tribe but they had long been domiciled in *Afghanistan* and were regarded as *Afghāns*.

Djalāl al-Din Firūz ascended the throne in Kilkari on June 13, 1290, and was murdered at Karra by his nephew and son-in-law, 'Alā' al-Din Muḥammad, on July 19, 1296. 'Alā' al-Din ascended the throne in Dihli on Oct. 3, 1296, and captured the two sons of Djalāl al-Din Firūz, Arkatī Khān, governor of Multān, and Qadr Khān, who had been proclaimed emperor in Dihli under the title of Rukn al-Din Ibrāhīm. Having blinded his two cousins and imprisoned their mother, 'Alā' al-Din punished with death and confiscation those *amirs* who had deserted his uncle for himself. He annexed Guḍjarāt, Ranthambhor, and Čitor and in a series of expeditions to the Dakhan commanded by his favourite eunuch Kāfir Hazzārdināri, entitled Malik Nā'ib, the Kingdoms of Warangal and Dvāravatipūra were added to the empire. Five rebellions which occurred early in his reign were crushed with merciless severity and vigorous laws were issued with the object of suppressing disaffection. 'Alā' al-Din was dissuaded from a design of declaring himself a prophet and promulgating a new religion. The most famous decrees of his reign were those by which he regulated the price of all the commodities of life and its most disgraceful act was the massacre of between twenty and thirty thousand Mughul converts to Islām, suspected of disaffection. After 'Alā' al-Din's death on Jan. 2, 1316, the eunuch Malik Nā'ib, having set aside Khidr Khān, the heir apparent, raised to the throne Shihāb al-Din 'Umar, 'Alā' al-Din's youngest son, a boy of five or six years of age, and attempted to blind Kuṭb al-Din Mubārak, the second son, but the prince corrupted the eunuch's emissaries and persuaded them to murder their master. Kuṭb al-Din Mubārak then assumed the regency, and, on April 1, 1316, blinded and imprisoned his young brother and ascended the throne. The new emperor gained a fleeting popularity by the reversal of all his father's harsher measures but his debauchery soon converted the love of his people into contempt. Like his father he was addicted to unnatural vice and was entirely ruled by Khusraw Khān, a vile favourite belonging to one of the scavenger castes of western India. A rebellion in Guḍjarāt was suppressed and in 1318 Kuṭb al-Din marched to Dewagiri, where he put to death Harpāl Dewa, son-in-law of Rāmacandra and appointed a Muḥammadan governor to Dewagiri. On his return the emperor caused his three brothers, Khidr Khān, Shādī Khān, and Shihāb al-Din 'Umar, to be put to death, and, after scandalizing his court by indecent debauchery, proclaimed himself supreme pontiff and vicegerent of God under the title of al-Wāḥiḳ bi-llāh.

Khusraw Khān, who had been recalled from the Dakhan under a just suspicion of treasonable designs soon regained his master's confidence and on April 14, 1320, caused him to be murdered in the palace and ascended the throne under the title of Nāsir al-Din Khusraw. His brief reign was marked by the advancement of his profligate caste-fellows and an attempt to restore the predominance of Hinduism in Dihli, but Malik Fakhr al-Din Djawnā fled from the capital to Multān and persuaded his father, Ghāzi Malik, governor of that province, to march to Dihli for the purpose of restoring the supremacy of Islām. Khusraw marched out to meet him but was defeated at Indarpat and captured and beheaded. On the following day, Sept. 6, 1320, Ghāzi Malik was proclaimed emperor

under the title of Ghiyāth al-Din Taghlaḳ Shāh.

KHALDJI (KHILDI), the dynasty of Mālwa, was founded in A.D. 1436 by Maḥmūd Khildji, of the same tribe as the Khaldjis of Dihli [q. v.]. Dilāwar Khān, founder of the Ghori dynasty [q. v.], had been accompanied to Mālwa by his cousin, Malik Mughith, and on the deposition of Dilāwar Khān's grandson, Ghaznin Khān (Muḥammad Shāh), Maḥmūd offered the crown to his own father, Malik Mughith, who declined it in favour of his son. Maḥmūd's long reign was at first disturbed by rebellions on behalf of the late dynasty, fomented and supported by Aḥmad I of Guḍjarāt and the rānā of Čitor. After the suppression of these he was engaged in almost continuous warfare with Guḍjarāt, Čitor, Khāndesh, Kherla, the Dakhan, Dihli and Djawnpur, and was usually successful, except against the Dakhan. He died on May 30, 1469, and was succeeded by his eldest son, Ghiyāth al-Din, a mean-spirited monarch who occupied himself chiefly with the administration of his harem, for the management of which he drew up elaborate regulations, leaving the affairs of the kingdom in the hands of his advisers and, latterly, of his elder son, Nāsir al-Din, whom he made his prime minister. The later years of his reign were troubled by quarrels between Nāsir al-Din and his younger brother 'Alā' al-Din, who was supported by Rāni Khurshid, the mother of both princes. The King, too feeble to keep the peace, fell alternately under the influence of either faction until, in the autumn of 1500, Nāsir al-Din captured Māndū, put his brother to death, imprisoned his mother, and seized the crown. A few months later Ghiyāth al-Din died, poisoned, it was suspected, at the instigation of his son. Nāsir al-Din's warlike qualities found employment in the suppression of rebellions among his *amirs*, due to his harshness and in war with the rānā Rāyamāl Simha of Čitor. His later years were disgraced by debauchery and cruelty, his victims being chiefly his most faithful servants. He nominated his second son, Shihāb al-Din, his heir, passing over Šāhib Khān, the eldest, but Shihāb al-Din rebelled and fled from his father's wrath and Nāsir al-Din was succeeded on his death (May 2, 1511) by his third son, who ascended the throne as Maḥmūd II. Maḥmūd was brave to rashness, but possessed no other virtue and was entirely devoid of political wisdom and administrative ability. He first forfeited the allegiance of his *amirs* by the elevation of unworthy favourites, one of whom avenged his dismissal by proclaiming Maḥmūd's eldest brother, Šāhib Khān, king, under the title of Muḥammad Shāh. Muḥammad, the creature of a faction, reigned nominally and intermittently from 1510 to 1515, and issued coins. The adherents of Shihāb al-Din, Maḥmūd's next elder brother, also rebelled and proclaimed their leader king, and on his death professed allegiance to his son, whom they styled Hūshang II. After the removal of these pretenders Maḥmūd II became a mere instrument in the hands of Medni Rāya, a Rājput whom he raised to the position of prime minister of the kingdom and who could command a force of 40,000 horse. He made spasmodic attempts to free himself from his ignominious

position but the result of these was to throw the Rāḍipūts into the arms of Sangrama Simha, rānā of Ītor, and Mālwa would have become a Rāḍipūt state but for the first apprehensions of a coalition of the neighbouring Muḥammadan states. In 1517 Maḥmūd II was compelled to implore the aid of Muẓaffar II of Guḍjarāt against the Rāḍipūts and, having been restored to his throne, reigned as a vassal of Guḍjarāt. After his restoration Maḥmūd II, aided by a contingent from Guḍjarāt, made war against Ītor but was totally defeated and made prisoner by the rānā Sangrama Simha, Bābur's Rānā Sangā, who, from motives of policy and generosity, restored him to his throne. His ingratitude to Sangrama's son Ratan Singh and his foolish encouragement of a pretender to the throne of Guḍjarāt, where Muẓaffar II had been succeeded by his son Bahādur II, drew on him the wrath of Bahādur Shāh, who invaded Mālwa, captured Māndū, and imprisoned Maḥmūd, who was slain on April 12, 1531, by his guards, who suspected an attempt at a rescue. The Khaldjī dynasty ended with Maḥmūd II, and Mālwa became for a time a province of Guḍjarāt.

(T. W. HAIG)

KHĀLID B. 'ABD ALLĀH AL-KASRĪ, governor of the 'Irāk. The Kās family to which Khālīd belonged was a branch of the tribe of Baḍjila [q. v.]; his mother was a Christian. In the year 89 (707/708) or 91 (709/710) he was appointed governor of Mekka by the Caliph al-Walīd. Here he remained during the life time of al-Walīd; after the accession of Sulaimān in 96 (715), however, he was dismissed and lived in retirement until in Shawwāl, 105 (March, 724), Hishām appointed him successor of the governor 'Umar b. Hubaira and gave him the administration of the whole of the 'Irāk. He made his headquarters in Wāsīt. Khālīd had been brought up in the school of al-Hadīdjādī, and if he was not the latter's equal in ruthlessness he was not lacking in vigour or tenacity. He did not hesitate to express his opinions freely to the Caliph, and, when Hishām was planning to exclude his nephew al-Walīd from the succession in favour of his son Maslama, Khālīd vigorously resisted this scheme. In place of winning military glory he preferred to devote himself to peaceful activities and to the economic development of his province, and during his long tenure of office peace and quiet prevailed generally in the 'Irāk. He paid special attention to the improvement of agriculture. The marshes were drained and great stretches of virgin soil made arable. With this fertile activity for the welfare of the state he was at the same time very successful in furthering his personal interests, and in time acquired immense riches, which, however, aroused the envy and dissatisfaction of the people. Other circumstances also contributed to make the doughty Khālīd unpopular. His predecessor in office, 'Umar b. Hubaira, had been a prominent champion of Kaṣī opinions. Khālīd's appointment as 'Umar's successor made the Kaṣīs regard him as an intruder who had driven 'Umar from the

position to which he was entitled, and from the first created an unsympathetic feeling against him, which in spite of his impartiality estranged him from the Kaṣīs and threw him closer to the Yamanīs. His tolerance of members of other creeds brought upon him the charge of religious indifference. To please his mother he built a church in Kūfa and granted Christians and Jews generally the privilege of building churches and synagogues, and did not hesitate to give Zoroastrians posts in the government. Khālīd was very little troubled by rebels. In 119 (737) there was a conspiracy of a few Shi'īs led by al-Mughīra b. Sa'īd in Kūfa, but it was promptly discovered and the culprits were publicly burned. In the same year a Khāridjī named Bahlūl b. Bishr preached a rebellion against Khālīd in the neighbourhood of al-Mawṣil and twice defeated the troops sent against him, but was finally overcome. About the same time a certain Wazīr al-Sakhtiyānī was active around Kūfa, where he was responsible for assassinations and incendiarism. When he fell into the hands of Khālīd he succeeded by his eloquence and his knowledge of the Qur'ān in so moving the governor that the latter wished to spare him, but the Caliph was inexorable and had him executed forthwith. In the same year the Khāridjī al-Ṣahārī b. Shabīb collected a force and rendered the region of Djabbul on the Tigris unsafe, but was soon overcome and put to death with his followers.

Hishām could not in the long run resist the pressure of Khālīd's enemies. In 120 (738) he dismissed him and appointed as his successor Yūsuf b. 'Umar al-Thakafī, who had been for long governor of the province of Yaman. In Djumādā I (April-May, 738) the latter arrived in Kūfa. Khālīd was arrested and taken from Wāsīt to al-Hīra, where he was kept in prison with his family for eighteen months, and had to defend himself against charges of embezzlement. After his release in Shawwāl, 121 (Sept.-Oct., 739), he wanted to go to the Caliph but was not allowed. In the following year he settled down in Damascus. Here also he was followed by the hatred of Yūsuf but was able to live in freedom during the last years of Hishām's reign. He was again thrown into prison by Hishām's successor al-Walīd, and sold for a vast sum to his mortal enemy, Yūsuf, who had him brought to Kūfa and there tortured to death. Khālīd died in Muḥarram, 126 (Oct.-Nov., 743), and was buried in al-Hīra. According to another statement, he was dead by Dhū'l-Ka'da, 125.

(K. V. ZETTERSTÉEN)

KHĀLID B. AL-WALID B. AL-MUGHĪRA AL-MAKHZUMĪ, a contemporary of Muḥammad and a Muslim general. In the battle of Uhud,

where Khālīd commanded the right wing of the Mekkan forces, and by his intervention at the right moment decided the battle in favour of the enemies of the Prophet he first displayed that brilliant talent for leadership to which in later days Islām owed so many successes. After Khālīd had gone over to Islām with ʿAmr b. al-ʿĀs at the beginning of the year 8 (629) he took part in the unsuccessful campaign against the Byzantines, and after the defeat at Muʿta it was with difficulty that he succeeded in bringing back the defeated army to Medina. As a reward the Prophet gave him the title of honour "Sword of God", and in the same year he took part in the entry of the Muslims into Mekka. After the capitulation of the town he is said to have destroyed the sanctuary of the heathen goddess al-ʿUzzā by order of Muḥammad. He was soon afterwards sent as ambassador to the Banū Djadhima [q.v.] and in Radjab of the next year (Oct./Nov., 630) he undertook an expedition against Ukaidir, the Christian king of Dūmat al-Djandal (see the art. DJAWF AL-SIRHĀN). At the beginning of the year 10 (summer of 631) Muḥammad sent him to Naǧrān to convert the Banu ʿl-Hārith b. Kaʿb to Islām, which was also done without bloodshed. In the following year he was sent by Abū Bakr against Tulaiha b. Khuwailid and defeated him at Buzākha (see the art. ASAD) and next turned his attention to the Banū Tamīm who dwelled in the vicinity. One clan, which was under Mālik b. Nuwaira, was at feud with the others. When the latter submitted, Mālik also laid down his arms but was nevertheless taken prisoner and put to death and Khālīd then married his widow. When an accusation was laid before the Caliph against Khālīd he is said to have excused himself by saying that the incident was due to a misunderstanding. He said he had ordered warm clothing to be given to the prisoners and had therefore said to the soldiers: "*adfi ʿu asrākum*" which was interpreted by the Beduins to mean "kill your prisoners". In any case Abū Bakr was satisfied with administering a reprimand to him and kept him in office in spite of vigorous protests from ʿUmar. Soon afterwards Khālīd took the field against the false prophet Musailima. At ʿAkrabā, on the frontier of al-Yamāma, the latter was defeated and killed, whereupon his followers submitted (beginning of 12 = beginning of 633). Khālīd was then sent against the Persians. In Rabiʿ I, 12 (May—June, 633), or perhaps some months later he conquered al-Hira and soon afterwards occupied the whole Euphrates area. The Byzantines are said to have finally crossed the Euphrates and to have been defeated at al-Firāḍ (Dhu ʿl-Ḳaʿda, 12 = Jan., 634) and in Muḥarram of the following year (March/April, 634) or, according to others, not till Rabiʿ II (June) Khālīd set out on his campaign against Syria. In Djumādā I or II (= summer of 634) the Byzantines were completely defeated at Adjnādain and retired to Damascus. Defeated again by Khālīd, they were surrounded and besieged and in Radjab, 14 (Aug./Sept., 635), Damascus had finally to surrender. About the same time Khālīd was deprived of the supreme command and replaced by Abū ʿUbaida b. al-Djarrāḥ [q.v.] but continued to take part in the military operations in Syria. In the battle of the Yarmūk on Radjab 12, 15 (Aug. 20, 636), he commanded the cavalry and contributed largely to the victory of the Muslims. Hims was recaptured

soon afterwards. Khālīd then advanced against Kinnasrīn and after he defeated a Byzantine army under Minās the town had to surrender and Khālīd took up his quarters here for the time. He was for a time governor of a part of Syria but was later dismissed. He died in Hims or Medina in the year 21 (641—642). A. Müller (*Der Islam*, i. 257) has admirably described him as follows: "He was one of those characters whose military genius is the whole of their intellectual life; like Napoleon, he cared for nothing but war and did not want to learn anything else."

(K. V. ZETTERSTÉEN)

KHĀLID ZIYĀ, ʿUSHAKI-ZĀDE, the leading writer of prose and fiction in modern Turkish literature. Born in 1282 (1866) in Constantinople of a prominent family which came originally from the carpet town of ʿUshak — hence the epithet ʿUshaki-zāde — he spent his youth in Constantinople and Smyrna. He received his education from the Mechitarists in Smyrna. This laid the foundations of his love for and knowledge of the west. He translated industriously from the French and made literary attempts of his own. The collection called *Nāzil* in 6 volumes contains stories of his own alongside of translations from the most important French writers of fiction. In Constantinople he founded the paper called *Neurūs* and published the introduction (*Medkhal*) of his never finished *Gharbden Sharḳa Siyāle-i Edebiye* (Literary Current from West to East) in Constantinople in 1303 (1888). In Smyrna he continued his literary activity with the foundation of the periodical *Khidmet* in which his novel *Sefile* and his *Menthūr Shīʿrler* ("Poems in Prose") appeared in 1307 (1887); their unusual form aroused a storm of indignation until Ekrem defended them (specimens in Bickerman, *Tureckij sbornik*, St. Petersburg 1909).

In Smyrna he published in five series his *Küçük Kitāblar* which contain various literary productions, e.g. *Bir Mukhlitireniñ soñ Yaprakları* ("The last Leaves of a Notebook"); *Bir İdiwādjiñ Tāriḳh-i Muʿāshakası* ("The Love-story of a Marriage"); *Hikāye, Temāshā* (his *Menthūr Shīʿrler* re-appeared in it) and *Mezārdan Sester* ("Voices from the Grave"), Smyrna 1307 (1889). At the same time he published a whole series of popularly written scientific treatises, with which he endeavoured to spread European learning, for example: *Hamī we-Waḳʿi Hamī*; *Kānūn we-Fenn-i Wilāde*; *Mebhath al-Kihf*; *Mebhath al-Kiyāse*; *ʿIlm-i Simā*; *ʿIlm-i Nudjūm*; *Hisāb Oyunları*; *Hikmet Oyunları*;

Būkalāmūn-i Kīmiyā; *Sīmiyā-i Kīmiyā*; and the anecdotal *Tuhfe-i Letā'if* (1308). It is characteristic of his versatility that he even studied Sanskrit which, however, involved him in difficulties with the ever suspicious government.

Next came the novels *Nümide* ("The Hopeless Woman"), Constantinople 1311 (1893); *Bir Ölü'nün Defteri* ("The Diary of a dead Man", Constantinople 1311), still bearing the imprimatur of the Aidin censor, which has been translated into German by Habīb Edīb in 1918 (*Romane des neuen Orients*, Berlin), and *Ferdi ve Şührekâi* ("Ferdi & Co.", Constantinople 1312; dramatised by Mehmed Re'ûf, Constantinople 1325).

A new period began with his taking over the editorship in 1896 of the periodical *Therwet-i Funûn* to which he with the poet Tewfik Fikret [q.v.] gave an entirely new form. He opened the new period, which is known as the Tewfik Fikret and Khālid Ziyā period, with his masterly novel *Māwī we-Siyāh* ("Blue and Black") (1317 second ed.; 1338 eighth ed.). In the *Edebiyāt-i Djedide Kütüb-khānesi*, a new foundation important for modern literature, appeared his next works, the novels *Bir Yazın Tarihî* ("The Story of a Summer") as No. 3 (Constantinople 1316) and *Aşk-ı Memnūn* ("Forbidden Love"), No. 4 (1316; with *Māwī we-Siyāh* his best novel), and the collection of short stories *Solghun Demet* ("The Withered Wreath"), No. 8 (Constantinople 1317), from which a whole series of stories has been translated into French and German (Kaufmann, *Türkische Erzählungen*, Munich 1916; *Die Neue Türkei*, Constantinople 1908, etc.). The series ended with his *Kırık Hayatlar* ("Broken Lives").

When, as a result of an article by H. Djāhid, the paper was suppressed, Khālid wrote absolutely nothing till the revolution and confined himself to his official work as first secretary to the Tobacco Regie. After the revolution he displayed a feverish literary activity and lent his collaboration to every possible periodical. The novel *Nesli Akhîr* ("The last Family") in the *Şatāh* and many contributions to the *İkdam*, *Therwet-i Funûn*, *Resimli Kitāb*, *Mehāsın* etc. are evidence of this. At the same time for a certain period he lectured at the University of Constantinople on aesthetics and foreign literatures and wrote letters from Germany describing his travels there. His activities in this direction were interrupted by his appointment as first secretary to the palace of Sultān Mehmed V in 1909.

It came as a surprise when in 1918 he suddenly entered the ranks of dramatists with his *Kābus* (1334), in which he demanded the same rights of divorce for women as for men. The play *Furūzān* (1334) is one of the adaptations of the "Francillon" of Dumas fils now so popular in Turkish literature.

A third drama, *Fāre*, is now announced as well as new collections of stories: *Bir Hikāye-i Suvadā* (1338); *Bir Şi'r-i Khatyāl* and *Onu beklerken*, and works on literary history: *Kenārde Kālmış* and *Eski Şeiler*.

With the poets Tewfik Fikret and Djenāb Shehāb ed-Din, Khālid Ziyā is the principal founder of the modern occidentalising literature. Deliberately turning from the East, rejecting the eastern spirit and the Turkish Muslim attitude to life, they sought to create a modern literature with European affinities with the motto "art for art's sake", after the compulsion to write in Persian and Arabic forms had first been cast off by their predecessors.

With Sezāyi, Khālid is the founder of the modern literary novel. He worked especially at the short story, of which he seems to be the greatest master. He is an artist and a poet. He is marked by great sentimentality and a pessimistic outlook, which only later gave place to a more reconciled attitude. He is an acute psychological observer. But he is an absolute Westerner, a Frenchman in Turkish dress. He has not unjustly been called the Turkish Alphonse Daudet. His writings contribute little to our knowledge of the Turks. In spite of the Levantine milieu he is strictly moral. He tells a story, vividly and attractively; his style is clear. But his language is still markedly laden with Persian and Arabic words. He paid most attention to style, which owes much to him, for it is he who created the language of modern Turkish fiction.

He has taken no part in the recent nationalist development in Turkey. He has remained the old cosmopolitan.

AL-KHĀLIDĀT, full form AL-DJAZĀ'IR AL-KHĀLIDĀT, probably with allusion to the Arabic *Āhūd*, the Eternal Islands, are usually called *Djaza'ir al-Sa'āda* "Isles of Bliss" by the astronomers, a translation of the Greek *Μανδύων Νῆσοι* which probably came to the Arabs through the translation of Ptolemy. Al-Bakrī also knows the Latin name *Fortunatae Insulae* in the form *Fortūnātash*. They are the Canary Islands. Al-Berūnī and al-Idrīsī speak of six islands, al-Maḳḳarī of seven, and al-Idrīsī mentions two by name: Masfahān and Laghūs; according to Dozy and de Goeje, the former corresponds to the modern Tenerife, the latter probably to Gran Canaria. According to al-Berūnī, they are nearly 200 parasangs (600 miles) from the mainland, while al-Maḳḳarī says that on a clear day they are visible from Salā.

The meaning of the name given by al-Bakrī points to the flourishing vegetation of the islands. "Trees and shrubs bring forth all kinds of pleasant fruits without it being necessary to plant or tend them, and the soil yields grain instead of weeds

and valuable fragrant herbs instead of thorns". On Masfahān as well as on Laghū, there was a high pillarlike building (*ṣanam*) of hewn stone, a hundred ells high and crowned by a figure of brass pointing backwards with his hand to the high seas. In Masfahān this red column stood on a round hill; the column on Laghū could not be climbed. These were regarded as warnings to shipping to sail farther to the west (al-Maḳḳarī says that each of the seven islands had a similar column; according to him, they were idols [*asnam*] in the form of men. He distinguishes the *Djazā'ir* al-Sa'āda from the *Djazā'ir* al-Khālīdāt and says that the former were north of the latter and the first of them is Britain).

Among legendary features of the Arab descriptions of the islands we may mention the following. Since in Ptolemy and the Arab geographers who follow him the longitudes are calculated from the meridian of one of these islands (cf. the older European calculation from the meridian of Terro), it was thought that there was a race of astronomers living on the island; according to al-Maḳḳarī the "Christian Magicians" came from the *Djazā'ir* al-Sa'ādat, but, as he includes Britain among them, he is apparently thinking of the Druids of the Celts. *Dhu 'l-Karnain* [q. v.], i. e. Alexander the Great, is said to have reached the Khālīdāt. The Hīmyarite As'ad Abū Karīb is said to have built the column in Masfahān and he also is given the epithet *Dhu 'l-Karnain*. The column of Laghū is said to have been built by another South Arabian of the legendary past, Tubba' *Dhu 'l-Marāṭhid*; his tomb is said to exist there in a temple of marble and brilliantly coloured glass. The stories regarding "terrible wild beasts" on the island of Laghū given by the author of the "Book of Marvels", which al-Idrīsī hesitates to repeat, are probably the same as those given by al-Kazwīnī on the authority of Abū Ḥamid al-Andalusī in his description of the Western Sea. There is also a description of a column on an island called Maḳjma' al-Tura'.

We may assume that there was trade (indirect) between the Canary Islands and Arabia even in the days of the ancient Arabs, if '*andam* "dragon's blood" came from *Dracaena Draco*; probably, however, it came from another (Indian) plant.

KHALĪFA, "successor, vicegerent", title of the supreme head of the Muslim community, the *Imām* [q. v.], as successor or vicegerent of the Prophet (*khālīfat rasūl Allāh*).

I. The word appears, frequently both in the singular and the plural (*khālā'if*, *khulafā'*) in the *Kur'ān*; in the latter case, the persons referred to are called "successors" as entering into the blessings enjoyed by their forefathers (e.g. vi. 165; xxiv. 54; xxvii. 63, used of the righteous; vii. 67, 72, of the idolatrous tribes of 'Ad and Thamūd); the singular is used of Adam (ii. 28), either as successor

of the angels who lived on earth before him, or as representative of God, and of David (xxviii. 25). "We have made thee a *khālifa* in the land; then judge between men with the truth, and follow not thy desires, lest they cause thee to err from the path of God." In none of these verses is there any clear indication that the word was intended to serve as the title of the successor of Muḥammad. Muslim historians commonly assert that it was first so used by Abū Bakr; it is doubtful, however, whether he ever assumed it as a title (Caetani, *Annali dell' Islām* 11 A. H., § 63 n. 1). But from the reign of 'Umar, it has been the common designation of the *Amir al-Mu'minin* [q. v.]. The designation *khālīfat rasūl Allāh*, "successor of the apostle of God", implies assumption of the activities and privileges exercised by Muḥammad, — with the exception of the prophetic function, which was believed to have ceased with him; the later phrase, *khālīfat Allāh*, "vicegerent of God", implies a bolder claim, and is said to have excited the indignation of Abū Bakr, but it was used as early as 35 A. H. by Ḥassān b. Thābit in an elegy he wrote on the *Khālifa* 'Uthmān (ed. H. Hirschfeld, xx. 1. 9), and it became quite common under the 'Abbasids and later princes (Goldziher, *Muhammedanische Studien*, ii. 61).

In the course of Muslim history, however, the term *khālifa* has not been confined to such exalted reference. As early as the first century of the Hīdīja, it was used in the Aphroditō papyri for the ἀποκριτάριος or agent at the capital through whom the local official of the finance department made payments of taxes (*Greek Papyri of the British Museum*, vol. iv., pp. xxv. 35; C. H. Becker, *Islamstudien*, i. p. 257). It has frequently been used as a personal name (see Index to Tabari, etc.). In the religious orders, especially among the Kādīfiya, the *Khālifa* is the delegate of the *Shāikh* of the order and is invested with a certain amount of his powers and represents him in countries remote from the parent *zāwiya*. Among the Tidjāniya, the *Khālifa* is the inheritor of the spiritual power (*baraka*) of the founder of the order, to whom alone the title *Shāikh* is applied (O. Depont and X. Coppolani, *Les confréries religieuses musulmanes*, p. 194—195, Alger 1897; L. Rinn, *Marabouts et Khouan*, p. 78, Alger 1884).

In the Mahdist movements, the *Khālifa* is the successor of the Mahdi; Mīr Dilāwar was thus *Khālifa* of Saiyid Muḥammad Mahdi (ob. 910 A. H.) the founder of the Mahdawī [q. v.]; 'Abd Allāh was the *Khālifa* of Muḥammad Aḥmad the Mahdi of the Sūdān; and the son and successor of Ghulam Aḥmad Kādīyānī (s. i. p. 206) is so described by his followers at the present day. Humbler persons have also received this designation, e.g. in the household of the Emperor Bābūr, *khālifa* denoted a woman who exercised surveillance over other women-servants, (Gul-badan Begam, *Humāyūn-nāma*, translated by A. S. Beveridge, p. 136). In more modern times, the word *khālifa* was commonly applied in Turkey to any junior clerk in a public office (C. M. d'Othsson, *Tableau général de l'Empire Ottoman* 2, vii. 271), and is still a title of respect for an assistant teacher in a school. In Morocco it indicates the deputy of the governor of a city (B. Meakin, *The Moorish Empire*, p. 224). In modern India it is used even of such insignificant persons as a working tailor, a barber, a fencing master or a cook (H. A. Rosc, *Glossary of the*

Tribes and Castes of the Punjab, ii. p. 490. Lahore 1911). In Togo and neighbouring parts of W. Africa, *alfa* (= *khalifa*) denotes a Muslim teacher or even Muhammadans generally (*Die Welt des Islams*, ii. p. 200).

Margoliouth, *The sense of the title Khalifah (A Volume of Oriental Studies presented to Edward G. Browne, p. 322—328)*.

II. As a distinction can be drawn between the history of the *Khalīfa*, or of the political institution of which the *Khalīfa* was the head, and the theories connected with it, and as the former was chronologically prior, it is proposed here to deal with it first.

I. History. The immense wealth and power acquired by the early successors of Muḥammad, through the conquest of such provinces of the Roman Empire as Syria and Egypt, together with the dominions of the Persian king, raised them to a status and a dignity which gave to the humble title they bore a new significance; so even before the Arab conquests had reached their limit, the *Khalīfa* had become one of the most powerful and wealthy monarchs in the world. As *Amīr al-Mu'mīnīn* [q.v.] he was commander of these conquering armies and so he described himself on his coins; as *Imām* [q.v.], he took the foremost place in public worship and delivered the *Khuṭba* [q.v.] in the mosque; as *Khalīfa* he claimed from his Muslim subjects some of the reverence that had previously been paid to the founder of their faith. The civil war that broke out in the reign of 'Alī b. Abī Ṭalīb laid the foundation for those rival theories as to the qualifications of the *Khalīfa*, which took definite shape in political and sectarian doctrines. Under the Umayyads [q.v.] the religious associations of the office of the *Khalīfa* were not emphasised, though many of them kept up the practice of leading the public worship, for (with the exception of 'Umar b. 'Abd al-'Azīz [q.v.]) religious considerations appear to have had little weight with them, and it was mainly in Medina that the foundations of Muslim dogma and the systematisation of the *Shari'a* [q.v.] were laid, with little encouragement from the *Khalīfa* in Damascus. The claim of the descendants of 'Alī to the leadership of the Muslim world found expression in the formation of the *Shi'a* party [q.v.], but for some generations their efforts met with no political success. The 'Abbāsids [q.v.] came into power largely through their pretended support of Alid claims, and largely too through their professions of religious zeal. In Baghdād the *Khalīfa* took on a new character; the *Khalīfa* became a generous patron of the 'ulamā' and laid emphasis upon his function as protector of the religion of Islām, and under his fostering care the capital took the place of Medina as the chief centre of theological activity, and the great schools of law (see the art. *FIQH*) received definite shape. The *Khalīfa* was no longer regarded as a mere secular monarch, as many of the Umayyads had appeared to be in the eyes of devout Muslims, and the awe with which he was regarded was enhanced by the elaboration of court etiquette and ceremonial. The Umayyads, especially in their early days, had generally been readily accessible to their subjects; Mu'āwiyā [q.v.] had preserved in a great

measure the frank, familiar manners of an Arab chief of pre-Islamic times, and moved among other Arab chiefs as *primus inter pares*. But in the new capital, the traditions of the Persian monarchy reasserted themselves, the 'Abbāsīd sat on his throne in solemn majesty, surrounded by his guards, the executioner with drawn sword by his side. At the same time he emphasised the religious aspect of his office by wearing the mantle of the Prophet, and his relationship to the Prophet was reiterated in official documents and in the eulogistic and court flatterers.

From the 9th century onwards, the direct control of the *Khalīfa* over the administration weakened in consequence of the increasing delegation of power to the Wazīr [q.v.] and the growing elaboration and efficiency of the government offices (v. art. *ḌIWĀN*). About the same period began the decline of the temporal power of the *Khalīfa*, in consequence of the break-up of the empire and the rise of independent principalities in the various provinces, until at last his authority hardly extended beyond the precincts of the city of Baghdād. Concurrently with this decline of his temporal power, increasing stress was laid on his position in the religious order, as *Imām* [q.v.] and as the defender of religion, and the persecution of heretics and of the adherents of non-Muslim faiths increased. By the year 946 all effective power had passed out of the hands of the *Khalīfa*, and there were to be seen in Baghdād three personages who had held this high office, but now deposed and blinded were dependent for their livelihood upon charity. From this period until 1055 the *Khalīfa* for the time being was but a puppet in the hands of the Būyids [q.v.] and the Seljūqs [q.v.] successively. But in spite of his entire lack of administrative authority, men could not forget the great position once held by his ancestors, and the impotent *Khalīfa* was still regarded by theorists as the source of all authority and power in the Muslim world. Accordingly, there were to be found independent rulers who sought from him titles and diplomas of appointment, e.g. Maḥmūd of Ghazna [q.v.], when he renounced his allegiance to the Sāmānid prince in 997, received from the *Khalīfa* recognition of his independent position, together with the titles *Yamīn al-dawla*, *Amīn al-milla*; and about a century later, Yūsuf b. Ṭāshfīn, the founder of the Almoravid dynasty of Spain, received the title of *Amīr al-Muslimīn* from the *Khalīfa* Muḥtādī. When in 1175 Saladin [q.v.] assumed the sovereignty of Egypt and Syria, he was confirmed in this rank by the *Khalīfa* Mustādī, who sent him a diploma of investiture and robes of honour. The founder of the Rasūlid [q.v.] dynasty in the Yaman, Nūr al-Dīn 'Umar, likewise asked the *Khalīfa* for the title of *Sulṭān* and a diploma of investiture as his lieutenant, and Mustansīr in 1235 sent a special envoy with the required document. This same *Khalīfa* had in 1229 responded to the request of Ilutmish [q.v.], the Turkish ruler of Northern India, for the title of *Sulṭān* and for confirmation in the possession of his dominion; and succeeding kings of Dihlī continued to put the name of Mustā'ṣim, the last *Khalīfa* of Baghdād, upon their coins for more than thirty years after this unfortunate prince had been put to death by the Mongols.

In contrast to this recognition of the *Khalīfa* in Baghdād as the legitimate source of authority,

is the establishment of two rival *Khilāfats*; in 928 'Abd al-Rahmān III of Spain assumed the title of *Khālifa*, which continued to be borne by his descendants; these Umayyads of Spain, like their predecessors in Damascus, were Sunnis; but the Fātimids of Egypt, whose founder styled himself *Khālifa* first in Mahdiyya in 909, were Shi'is, and were serious rivals to the 'Abbāsids in Baghdad until the destruction of their dynasty by Saladin in 1171.

In 1258 Hulagū [q. v.] captured Baghdad and put to death the *Khālifa* Musta'sim, who perished leaving behind him no heir. The catastrophe was without parallel in the history of Islam, and for the first time the Muslim world found itself without a theoretical head whose name could be mentioned in the *Khuṭba* in the mosques on Fridays. Two members of the 'Abbāsīd family, who had escaped the massacre in Baghdad, took refuge one after the other with the Mamlūk Sulṭān of Egypt; the first, an uncle of Musta'sim, was invited by Baibars [q. v.] to Cairo, and was there installed with great pomp as *Khālifa* in 1261. Baibars is said to have conceived the idea of re-establishing the 'Abbāsīd dynasty in Baghdad and left Cairo with a large army, but after he had reached Damascus he provided the *Khālifa* with only a small body of troops, which was destroyed by the Mongols on its way through the desert, and nothing more was ever heard of the *Khālifa*. The second claimant arrived in Cairo in 1262 and was similarly installed as *Khālifa*, but no attempt was made to repeat the rash experiment of regaining Baghdad, and the *Khālifa* was kept a virtual prisoner in Cairo, though treated with outward marks of respect. For more than two centuries and a half, his descendants one after another continued to hold this shadowy office in Cairo, dependent on the bounty of the Mamlūk Sulṭān, who found the *Khālifa* useful as lending a show of legitimacy to his rule. Each new Sulṭān was ceremoniously installed by the *Khālifa*, to whom he in his turn paid allegiance. But not a single one of them (with the exception of Musta'in, who was made the plaything of rival political factions in 1412 and for six months was styled Sulṭān) ever exercised any function of government or enjoyed any political power. Makrizī [q. v.] describes the *Khālifa* as spending his time among the nobles and officials, paying them visits to thank them for the dinners and entertainments to which they had invited him (*Histoire d'Égypte*, ed. E. Blochet, p. 76).

The rest of the Muslim world outside Egypt for the most part ignored the existence of the 'Abbāsīd *Khālifa* in Cairo. From the 13th century there had been Sunni *Khālifa* in the Maghrib, and from time to time various princes in the eastern lands of the Muhammadan world assumed this title, Seljuks, Timūrids, Turkomans, Uzbeks and Ottomans.

But a small number of independent princes, desiring to legitimize their claim to the obedience of their subjects, asked for formal recognition of their position and a grant of titles from the *Khālifa*, e. g. the first two princes of the Muẓaffarid dynasty in southern Persia (1313–1384); Muḥammad ibn Tughlaq (1325–1351) and his successor on the throne of Delhi, Firūz Shāh (1351–1388); even Bāyazīd I [q. v.] is said to have applied in 1394 to the 'Abbāsīd *Khālifa* in Cairo for a formal grant of the title of Sulṭān

(v. Hammer, *Gesch. d. Osman. Reiches*², i. 195), but doubt has been cast upon the accuracy of this report. For, from the latter part of the 14th century, when after the conquest of Adrianople, Philippopolis etc. his father, Murād I, was styled "the chosen *Khālifa* of God" (Firdān, i. 93, l. 22), it became common for the Ottoman Sulṭāns, as for other contemporary Muhammadan potentates, to claim for themselves the *Khilāfa* and to find this claim recognised by their subjects and their correspondents in other lands. The qualification of belonging to the tribe of Quraysh was ignored and sanction was sought for the usage in such verses of the Kur'an as xxxviii. 25: "We have made thee a *Khālifa* on the earth", and this and similar verses (e.g. vi. 165; xxv. 37) are constantly quoted in the diplomatic correspondence of the period. So when Selim [q. v.] made his victorious entry into Cairo in January, 1517, and made an end of the 'Abbāsīd *Khilāfa*, by transporting the last representative of it, Mutawakkil, to Constantinople, he had already been accustomed to the use of the title *Khālifa* as applied to himself, and to his ancestors for a century and a half. The legend that Mutawakkil made a formal transfer of his dignity to Selim was first published by Constantine Mouradgea d'Ohsson in 1788 (*Tableau général de l'Empire Ottoman*, i. 269–270, ed. 8vo., Paris, 1788–1824). None of the contemporary authorities who record the conquest of Egypt make any mention of such a transference of the office, and after the death of Selim, Mutawakkil was allowed to return to Egypt and was *Khālifa* there until his death in 1543. For the next two centuries, there were only two Muhammadan potentates whose extent of territory and power could add dignity to the title of *Khālifa* (in contrast to the indiscriminate use of it by insignificant princes) namely, the Ottoman Sultan and the Mughal Emperor in India. With the fall of the Mughal empire in the 18th century, the Ottoman Sultan became manifestly the greatest figure in the Muslim world; but even his power was being threatened by his aggressive neighbour on the north, and after the war with Russia (1768–1774) he was obliged to surrender territories on the north shore of the Black Sea and recognise the independence of the Tartars of the Crimea. Catherine II claimed to be the patroness of the Christians of the Orthodox Church dwelling in Ottoman territories, and the Ottoman plenipotentiaries who negotiated the treaty of Kučuk Kainardji in 1774, took advantage of the title of *Khālifa*, to make a similar claim for the Sultan, and get inserted in the treaty a clause asserting the religious authority of the *Khālifa* over the Tartars who had ceased to owe him allegiance as a temporal sovereign. From this period onwards, it became a common error in Christian Europe to regard the *Khālifa* as the spiritual head of all Muslims (just as the Pope is the spiritual head of all Catholics), and to credit him with the possession of spiritual authority over his co-religionists, though they might not owe him civil obedience as Sulṭān of Turkey. There is reason to believe that this widespread error in Christian Europe reacted upon opinion in Turkey itself. Particularly in the reign of Sultan 'Abd al-Jamīd II (1876–1909), emphasis was laid on his position as *Khālifa*, and in the Constitution promulgated at the beginning of his reign it was assumed that "H. M. the Sultan, as *Khālifa*, is the protector of the Muslim religion." He appears to have sent emissaries

to different parts of the Muhammadan world to encourage reverence for his own person as *Khalīfa*, and his efforts met with a certain response, since thoughtful Muhammadans (and especially those whose minds were disturbed by the growing control of European Powers over the affairs of the Muhammadan world) recognised that Turkey was the only independent Muslim power left, which was of any account in the civilised world. But the despotic and reactionary character of 'Abd al-Hamīd's government, his cruel suppression of all liberal movements and all efforts for constitutional reform, alienated the more enlightened sections of his own subjects, and when he was deposed in 1909, the affairs of Turkey passed under the control of a body of men who had little sympathy with the Islamic spirit and realised the impossibility of reconciling an autocracy that claimed to be based on divine revelation with modern constitutional methods of government. In November, 1922, Turkey became a republic and abolished the Sultanate, leaving the *Khalīfa* shorn of all temporal power; but it had not become clear what were to be the functions of the new *Khalīfa* before, in March, 1924, his office was abolished altogether.

In the above account, attention has been confined to the historic Sunni *Khalīfa* which has played the most important part in Muhammadan history. The two other Sunni *Khalīfats*, that of Spain and that of the Maghrib, have been only of local importance, and did not inspire loyalty in any other parts of the Muhammadan world; nor has the assumption of the title *Khalīfa* by some of the princes of Java been recognised except by their own subjects.

Among the *Shi'is*, the attempts made from time to time to secure for the *Alids* a position of power and independence, met with but scant success, and the *Fātimids* [q.v.] of Egypt represent the only *Shi'i Khalīfa* of any importance. In Persia the establishment of the *Ṣafawid* [q.v.] dynasty in 1502 did not succeed in making *Shi'ism* the State religion in Persia until long after the doctrine of the hidden *Imām* had become a cardinal doctrine of the *Shi'a* faith in that country.

Bibliography: An enumeration of the sources for the history of the *Khalīfa* would comprise the major part of the historical literature of the whole of the Muhammadan era. For the Arabic sources F. Wustenfeld, *Die Geschichtschreiber der Araber und ihre Werke*, and C. Brockelmann, *Geschichte der arabischen Literatur* may be consulted. Among the more important sources may be mentioned: *Ṭabarī, Annales*; *Ibn al-Athīr, Chronicon*; *al-Suyūṭī, Ta'rikh al-Khulafā'* and *Ḥusn al-Muhādḍara*; *al-Maḥrizī, al-Sulūk li-Mārifat Duwal al-Mulūk* (partly translated by Quatremère in *Histoire des Sultans Mamlouks*); *al-Maḥḥarī, Naṣṣ al-Ṭib*; *Chroniken der Stadt Mekka*, ed. F. Wustenfeld; *Rashid al-Dīn, Dīwān al-Tawārikh*; *Aḥmad Fīrūdū Bey, Munsha'at al-Salāṭīn*; *Mustafā Ṣabrī al-Tūḡārī, al-Nakir 'alā munkiri 'l-ni'mati min al-dīni wa 'l-khalīfati wa 'l-umma*, Bairut, 1924. Among European writers, Cactani, *Annali dell' Islām* (Milano, 1905 sqq.); G. Weil, *Geschichte der Chalifen*, 5 vols. (1846—1862); A. Müller, *Der Islam im Morgen- und Abendland* (1885, 1887). W. Muir, *The Caliphate*; J. von Hammer, *Geschichte des Osmanischen Reiches*; A.

de la Jonquière, *Hist. de l'empire ottoman*, 2nd ed. Paris 1914; *Oriente Moderno* (Rome 1921 sqq.); C. A. Nallino, *La fine del coā del o Calīfato ottomano* (*Oriente Moderno*, iv, 137 sqq.); R. Hartmann, *Wesen u. Ende des osm. Calīfats*, Leipzig 1924; H. Ritter, *Die Abschaffung des Kalīfats* (*Arch. f. Politik und Geschichte*, ii, 343 sqq., Berlin 1924).

2. Political Theory. As stated above, the theory of the *Khalīfa* was largely an outgrowth from the political circumstances of early Muhammadan history, but speculation has elaborated many forms of the doctrine that have failed to secure for themselves expression in actual historical facts. *Al-Shahrastānī* (ed. Cureton, p. 12) says that no article of faith has given rise to such bloodshed and contention in every period of Muslim history as this. (a) The orthodox Sunni doctrine first found expression in the *Hadīth*, which emphasised pre-eminently two essential characteristics of the *Khalīfa*; one, that he must be of the tribe of the *Kuraish* (*Kanz al-'Ummāl*, iii., N^o. 2983; vi., N^o. 3452, 3469), and the other, that he must receive unhesitating obedience, for whosoever rebels against the *Khalīfa*, rebels against God (id. iii., 2580, 2999, 3008). This claim on obedience to the despotic power of the *Khalīfa* as a religious duty was impressed upon the faithful by the designations that were applied to him from an early date, — *Khalīfa* of God, and Shadow of God upon earth. The first systematic exposition of the generally accepted doctrine is found in *Māwardī's al-Aḥkām al-Sulṭāniya* (ed. R. Enger, Bonn 1853; Cairo 1298, 1327; trans. E. Fagnan, Alger 1915). *Māwardī* insists upon the following qualifications in a *Khalīfa*: — membership of the tribe of *Kuraish*, male sex, full age, good character, freedom from physical or mental defects, competency in legal knowledge, administrative ability, and courage and energy in the defence of Muslim territory. In spite of the fact that the office became hereditary in two families successively, the *Umayyad* and the *Abbāsīd*, *Māwardī* maintained that it was elective, and was at pains to reconcile the doctrine of election with the historic fact that from the reign of *Mu'āwiya* (661—680) [q.v.] almost every *Khalīfa* had nominated his successor. The fiction of election was preserved in the practice of *bai'a* [q.v.], the taking of the oath of allegiance, first by the nobles of the court and then by the general assembly before whom the new *Khalīfa* was proclaimed. The functions of the *Khalīfa* were defined by *Māwardī* as follows: the defence and maintenance of religion, the decision of legal disputes, the protection of the territory of Islām, the punishment of wrongdoers, the provision of troops for guarding the frontiers, the waging of *ghihād* [q.v.] against those who refused to accept Islām or submit to Muslim rule, the organisation and collection of taxes, the payment of salaries and the administration of public funds, the appointment of competent officials, and lastly, personal attention to the details of government. About three centuries later *Ibn Khaldūn* [q.v.] approached the subject in a more critical spirit and discussed the institution of the *Khalīfa* in his *Muḥaddima* (chap. 25—8), written between 1375 and 1379; he faced the facts of history and recognised that with the disappearance of the Arab supremacy there was nothing left of the *Khalīfa* but the name. His account of the origin and purpose of the institution agrees with that given by

Māwardī; the *Khalīfa* is the representative (*nā'ib*) of the Prophet, the exponent of the divinely-inspired law (*shari'a*), and his functions are the protection of religion and the government of the world; he must belong to the tribe of the *Kuraish*, and possess the other personal qualifications laid down by Māwardī. But there were other legists who frankly faced the fact that force had taken the place of theory in the Muslim world, and worked out a constitutional theory accordingly; of such writers Badr al-Dīn Ibn Ḥamān (ob. 733 = 1333) is a typical example; in his *Tahrir al-Ahkām fī Tadbīr Millat al-Islām* (K. K. Hofbibl., Wien 1830), he lays it down that the *Imām* may obtain his office either by election or by force; in the latter case allegiance must be paid to an *Imām* who by force of arms seizes the office, and such usurpation is justified in consideration of the general advantage and unity of the Muslim community gained thereby (fol. 7—8). Another school of legists abandoned all such attempts to justify the fluctuating course of Muslim history and based their doctrine on the *Ḥadīth* that the *Khilāfa* endured for only thirty years, i. e. up to the death of 'Alī (*Kānz*, iii., N^o. 3152); this was the view of al-Nasafī [q. v.] (ob. 537 = 1142) (see *al-Nihāl*, ed. Cureton, London 1843, p. 4), and it was adopted by the great Turkish jurist, Ibrāhīm Ḥalabī (ob. 1549), whose *Multaḥḥat al-Abhur* became the authoritative code of Ottoman law. (b) The Shī'ī theologians made the doctrine of the Imamate a cardinal principle of faith; they laid stress on legitimacy, and confined the office of the *Khalīfa* not merely to the *Kuraish* but still further to the family of 'Alī; with the exception of the Zaidīya [q. v.], they rejected the doctrine of election, and held that 'Alī was directly nominated by Muḥammad as his successor and that 'Alī's qualifications were inherited by his descendants, who were pre-ordained by God for this high office. Muḥammad is said to have communicated to 'Alī certain secret knowledge, which was in turn handed on to his son and was thus carried on from generation to generation; each *Imām* possesses superhuman qualities which raise him above the level of the rest of mankind, and he guides the faithful with infallible wisdom, and his decisions are absolute and final. According to some, 'Alī owed this superiority to a difference in his substance, for from the creation of Adam a divine light passed into the substance of one chosen descendant in each generation and has been prescūt in 'Alī and in each one of the *Imām*'s that succeeded him. The sectarian development of Shī'a doctrine was considerable, see art. *ḤANĀ'Ī*, *ASHARĪYA*, *ISMA'ĪLIYA*, *SAB'ĪYA*, *ZAIDĪYA*. (Bibliography: al-Shahrastānī, *Kitāb al-Milal wa 'l-Nihāl*, p. 108 sqq.; Ibn Khaldūn, *Prolegomenes*, i. p. 400 sqq.). (c) The antithesis of Shī'ī doctrine was taught by the *Khawāridj* [see *KHARĪDITES*], who so far from confining the office of *Khalīfa* or *Imām* to any one tribe or family, held that any believer was eligible, even though he were a non-Arab or even a slave; they further separated themselves from other Muslims in maintaining that the existence of an *Imām* is not a matter of religious obligation and that at any particular time the community can fulfil all the obligations imposed upon them by their religion, and have an entirely legitimate form of civil administration, without any *Imām* being in existence at all; when, under special circumstances, it may

be found convenient or necessary to have an *Imām*, then one may be elected, and if he is found to be in any way unsatisfactory, he may be deposed or put to death (al-Shahrastānī, *op. cit.*, i. p. 85 sqq.).

All the above classes of political theory found expression in some form or other of actual political organisation, but there were also statements of the doctrine of the *Khilāfa* that never emerged out of the sphere of speculation, especially those elaborated by thinkers of the Mu'tazila school e. g. that the office of *Imām* should not be filled during periods of civil war but only in times of peace; that no one could be *Imām* except with the unanimous consensus of the whole Muslim community (al-Shahrastānī, *op. cit.*, p. 51; Goldziher, *Hellenistischer Einfluss auf mu'tazilitische Chalīfats-Theorien*, in *Der Islam*, vi. 173—7).

Bibliography: The *Ḥadīth* can be most conveniently studied in al-Suyūṭī's *Kānz al-'Ummāl*, Haidarābād 1312—1314. Muslim expositions: Māwardī (see above); 'Aḍud al-Dīn al-Idjī, *al-Mawāḥiṣ fī 'Ilm al-Kalām* (Constantinople 1239); Ibn Hazm, *Kitāb al-Faṣl fī 'l-Milal wa 'l-Aḥwā' wa 'l-Nihāl*, iv. 87 sqq., Cairo 1320; al-Shahrastānī, *Kitāb al-Milal wa 'l-Nihāl*, ed. W. Cureton, London 1842, 1846; Ibn Khaldūn, *al-Muḥaddima*, ed. Quatremère, Paris 1858; transl. (T. W. ARNOLD)

KHALĪFA SHĀH MUḤAMMAD, author of a collection of letters in Persian, entitled *Djāmi' al-Kawānīn* or *Inshā'ī Khalīfa*, written while he was a student at Kānnūdj and collected by him at the request of his friends in 1035 (= 1674/5); it is much appreciated in India, and has been printed several times.

Bibliography: Rien, *Cat. of Pers. Mss. in the British Museum*, i. 414.

AL-KHALĪL, the ancient Hebron, so called after the "friend of God" (θεοφιλέτος), Abraham (see the art. IBRAHĪM), a town in South Palestine (also called Hābrān, Hābā or Masjdīd Ibrāhīm). It lay in an exceedingly fertile valley between the heights of the Djabal Naṣra (? reading uncertain) noted especially for its richness in fruits. According to a widely disseminated legend, Muḥammad is said to have granted the four districts Hābūn, al-Marṭūm (so Yāqūt, ii. 194; in Nāṣir-i Khusraw, *Safar-nama*, ed. Kawiani 1923, p. 46, 14; Maṭlūn, varr. Marṭūn, Marṭūn; in al-Kāḷkashandī, *Subḥ al-Ashā*, ed. Cairo, xlii. 120, 6; al-Ruṭūm), Bait 'Ainūn (i.e. *Ainūn*, St. John's Gosp., iii. 23 etc., Khirbet Bēt 'Enūn) and Bait Ibrāhīm as a fief to the oil and lamp-dealer Tamīm b. Aws al-Dārī, a convert to Islām, and to his descendants. To Tamīm al-Dārī is traced the custom of having lamps continuously lighted in the mosque (Clermont-Ganneau, *Rec. d'Arch. Orient.*, viii. 216—220). Al-Khalīl is still regarded as the *waḳf* of the Tamīmīs. There is no doubt, however, that the alleged letter of the Prophet to Nu'aim b. Aws al-Dārī, the brother of Tamīm, is a later forgery intended to confirm the claims of the Tamīmīs (Caetani, *An-nalī dell' Islām*, ii/i. 298, 9 A. II., § 69).

Our only information regarding the history of the town in the early centuries A. H. comes from a few scanty Frankish sources of which the most important is the full account of the examination of the sepulchral caves by Christian monks in the year 1119/1120 (publ. by Riant in the *Revue des Hist. des Croisades, Hist. occid.*, v. 302—316). According to this (p. 309), the Jews showed the Arab invaders the entrance to the sanctuary, which had been walled up by the Byzantines, and in return they received permission to live on in peace in al-Khalīl and to build a synagogue before the entrance to the "Abramium". When the Byzantine church was turned into the *Masjdīd Ibrāhīm* cannot be exactly ascertained; the first information regarding the mosque is given by al-Iṣṭakhri and Ibn Hawḳal in the tenth century (not the eighth, as wrongly stated by Le Strange, *Palestine*, p. 309, and Vincent, *Hebron*, p. 160). According to al-Muḳaddasi, who is the first to give us a more detailed description of al-Khalīl, Abraham's tomb was covered over by a dome built in Muslim times (according to Mudjir al-Dīn, translated by Sauvage, p. 11, it was already done under the Umayyads). The tomb of Isaac was in a part covered over (*mughaltā*) and Jacob's was on the opposite side. This writer is also the first to mention the rich endowments which were given to the sanctuary by pious princes from remote lands, and the hospitable reception and provision of oil and lentils which the Tamīmīs in the hospice gave to pilgrims, but he thought for purely religious reasons it better to abstain from them. The Maghribi theologian al-'Abdari of Fās (d. 737 = 1336) later denounced the eating of these lentils (which were known as *adas khālīlī*) and

issued a warning against praying inside the mosque (instead of in front of it), as the exact site of Abraham's grave was not known; he is particularly rigorous against the dances associated with the "parade-music of Khalīl" (from which comes the name *khālīlīya* for a band intended for parades), which one could see every day in the sanctuary (Goldziher, *Z.D.P.V.*, 1894, xvi. 115—120; cf. also Schreiner, *Z.D.M.G.*, liii. 51 sqq.).

Half a century before the beginning of the Crusades Nāṣir-i Khusraw visited the town (1047), which in those days lay on the north side of the Haram only; in his journal he gives a minute description of the sanctuary. According to him, a gate was first made in the middle of the north (east) wall by the Fāṭimid Caliph al-Mahdī (918 A.D.); the Haram had previously been inaccessible. The covered part of the sanctuary (*maḳṣūra*), which contained the graves (cenotaphs) of the patriarchs, was richly decorated and provided with numerous niches (*mīhrāb*).

After the capture of al-Khalīl by the Crusaders, Godfrey de Bouillon granted the seigneurie of Hebron in 1100 to Gérard d'Avesnes (d. 1102). He was followed by Hugo de Rebègue, Rohardus (Rorgius), Galterius Mahomet and lastly Baldwin, in whose time (in 1119) the graves of the patriarchs were discovered (see above). He and his successors were apparently simply governors of Hebron and were at first under the King of Jerusalem, and later, from about 1155, under the Lord of al-Karak. In 1168 Hebron was made a bishopric.

'Alī of Herāt, who visited Jerusalem and al-Khalīl in 567 (1171/1172), says that he made the acquaintance of a Christian knight in Bait Lahm, who had once visited the sepulchral caves of the patriarchs, when a boy of thirteen, with his father; these, he said, were afterwards restored by command of King Bardawil (Baldwin II) by a knight named Djufri b. Djurdj (Godfrey, son of George). It was perhaps at King Baldwin II's instigation that the buildings around the Haram arose, in which the formerly flat roof of the *maḳṣūra* was replaced by a system of arches with sloping roofs (Vincent, *Hebron*, p. 166).

After the battle of Hattīn, al-Khalīl again passed into the hands of the Arabs. According to a supposition of Mudjir al-Dīn (ed. Bālāḳ, p. 56 below; transl. Sauvage, p. 16), which is not quite improbable (cf. Vincent, *op. cit.*, p. 242—250), the *minbar* which stands beside the niche (*mīhrāb*) in the Haram and, according to a still extant Kūfic inscription, was originally donated by the Fāṭimid Caliph al-Mustaṣir in 484 (1091/1092) for the martyrium (*Mashhad*) of al-Ḥusain b. 'Alī in 'Asḳalān, was brought to al-Khalīl by order of Ṣalāḥ al-Dīn (apparently in 588 = 1192 after the razing of the walls of 'Asḳalān) and put up in the Haram (van Berchem in the *Festschrift Eduard Sachau gewidmet*, Berlin 1915, p. 298—310; Vincent, *Hebron*, p. 219—250). After the death of Ṣalāḥ al-Dīn, al-Khalīl passed to al-Nāṣir Dā'ūd of al-Karak; it was, it is true, taken from him with other towns in 1244 by the armies of the Sulṭān al-Sāliḥ Aiyūb but he recaptured it next year with the help of the Khwārizmīs.

To this period belong two full descriptions of the Haram, that of Abu 'l-Fida' Iṣḥāq al-Khalīlī, whose account written in 1351 was copied by al-Suyūṭī (1470) and Mudjir al-Dīn (1496), and

that of Ibn Battūta, who visited al-Khalil in 1355. The latter defends (as al-Idrisi had done previously [*Z.D.P.V.*, viii. 127]) the correctness of the location of the tombs of the patriarchs (which others doubted, like his countryman al-'Abdāī; see above). Ishāk of Hebron quotes, giving a number of intermediate sources, the story handed down by an attendant of the mosque of Abraham, Muḥammad b. Bakrān al-Khaṭīb (c. 320 = 932), which is already found in shorter forms in 'Alī Harawī. In it a benefactor of the sanctuary, Abū Bakr al-'Uskāfi, relates how by his own request he was taken down into the sepulchral cave, to reach which he had to descend 72 steps. The details of the story, however, are obviously invented; the same Muḥammad b. Bakrān is responsible for the fantastic "translation" by a learned Shaikh of Halab of a still extant Greek inscription (Mader, *Altchristl. Basiliken*, p. 135, note 3; Vincent, *Hebron*, p. 160 sq.).

The Mongols took the town in 1260 but were driven out by Baibars the same year. When Sulṭān, the latter visited al-Khalil in May, 1266. Jews and Christians were then strictly forbidden access to the Ḥaram (Rohricht, *Gesch. d. Königr. Jerusalem*, p. 929). In 1267, by command of Baibars, the mosque was rebuilt and in 1268 the town (al-Makrizi, transl. Quatremère, ii. 48, 51); this can only refer to quite unimportant structural alterations at the Ḥaram (Vincent, *op. cit.*, p. 190). Kalā'ūn (1279—1290), as we learn from his inscriptions in al-Khalil, also had decorations and facings for the walls made at different parts of the Ḥaram.

Muḍjir al-Dīn gives us some further information regarding the embellishment and structural alterations in the sanctuary. The viceroy (*nā'ib*) of Syria, Tankiz, Abū 'l-Fidā's contemporary, had the four inner façades of the masjid covered with marble in 732 (1331/32) (van Berchem, *Z.D.P.V.*, 1896, xix. 111 sq.). Considerable alterations took place under Sulṭān Barḳūk at the instigation of Shihāb al-Dīn Aḥmad al-Yaghmurī, governor of Jerusalem and al-Khalil and guardian of the two sanctuaries. In 796 (1394), besides the erection of a new *miḥrāb* for Mālikis in the Women's Mosque, a new door was put on the west side of the former Byzantine church immediately behind the tomb of Abraham and another in the west wall of the Ḥaram (in the so-called "Wall of Solomon"), the latter near the Makām of Joseph. This sanctuary had been built by Sulṭān Nāṣir Ḥasan (1347—61) beside the mediaeval Kal'a (the later Madrasa). Its entrance lay opposite the "well of the eunuchs" (*'Ain al-Tawāshī*). Al-Yaghmurī had a dome built over the Makām which was similar to those over the tombs within the Ḥaram. In the reign of Sulṭān Muḥammad al-Nāṣir (1293—1341), the Amir Sandjar al-Djā'ulī had already built the mosque against the north-east wall of the Ḥaram in 718—720 (1318—1320), which is called Djā'ūliya after him, into the rocky sides of the Djabal Djā'ābira. The Mamlūk Sulṭāns al-Malik al-Ashraf, Ināl (859 = 1454) and al-Zābir Khoshkadam (867 = 1462/63) were also benefactors of the Ḥaram and of the Djā'ūliya Mosque.

We know nothing further of the history of al-Khalil and the architectural history of its Ḥaram after 901 (1496) when Muḍjir al-Dīn wrote his book; probably building in the Ḥaram had finished about this time. From the 400 years of Turkish rule (1517—1917) we only possess a few inscriptions of the years 1008 (1599/1600) to 1313 (1895/1896,

of 'Abd al-Ḥamid, in Vincent, *op. cit.*, p. 206, fig. 79), apart from the notices by western travellers.

The modern al-Khalil consists of the seven quarters Ḥāiet el-Shēkh (scil. Shēkh 'Alī Bakkā), Il. Bāb el-Zāwiye, H. el-Qazzāzin, H. el-'Akkābi, Il. el-Ḥaram, H. el-Mushārīka and H. el-Kūṭūn. It lies in the Wādī 'l-Khalil between the hills of el-Rumaide, on which lay the ancient town, and Dahr Abū 'l-Rummān in the south-west and the Djebel Djā'ābire in the north-east.

The number of its inhabitants was 17,000 in 1922, of whom 1,500 were Jews. Of the buildings in al-Khalil, the Ḥaram is by far the most important. As a result of the fanatical suspicions of the people so far only a very few Europeans have managed to make a brief visit to its interior. It was not till the week from Jan. 26 to Febr. 2, 1920, that, after some preliminary work by Major Richmond, the French archaeologist L. H. Vincent and Capt. E. J. H. Mackay were able to make a more detailed archaeological investigation and to survey the system of buildings. The tombs of the patriarchs, said, according to old tradition, to exist under the Ḥaram, have so far not been explored.

AL-KHALIL B. AḤMAD B. 'AMR B. TAMIM AL-FARĀHIDĪ AL-AZDĪ, Arab grammarian and philologist, a native of 'Umān, died at al-Baṣra, aged 75, between 170 and 175 (786 and 791).

He studied Islāmic traditions and philology with Aiyūb al-Sakhtiyānī, 'Asim al-Aḥwal, al-'Awwām b. Hawshab, etc. On the advice of his master Aiyūb he abandoned the Abāṣī doctrine for Sunnī orthodoxy; he was very pious and lived in poverty. Among his pupils may be mentioned Sibawaih, al-Aṣma', al-Naḍr b. Shumail, al-Laith b.

al-Muzaffar b. Naṣr, etc. All the biographers agree in attributing to him the discovery of Arabic prosody and its rules; and in spite of several other attempts made, it is his system that still holds sway to-day. However, there has only survived to us of his works on the subject the specimen verses reproduced in various treatises.

Al-Khalil was also the first to compile an Arabic dictionary: *Kitāb al-ʿAin*. He seems to have followed the alphabetical order of the Sanskrit grammarians which begins with the gutturals and goes on to the labials: ʿain, ḥā, hā, khā, ghain, kāf, kāf, ḍīm, shīm, dād, fād, sīm, zā, ṣā, dāl, tā, zā, dhāl, thā, zaʿy, lām, mīm, faʿ, nūn, wāw, alif (hamza), yā. It has been asserted that al-Khalil is not the author of the *Kitāb al-ʿAin* but his pupil al-Laith; others say that al-Naḍr compiled it on lines drawn up by his master or that he finished it. We may believe that these are only attempts to minimise the fame of al-Khalil. In any case all that survives of this dictionary is the synopsis *Mukhtaṣar* made by the learned Spanish lexicologist, Abū Bakr al-Zubaidī (Berlin, *Vers.*, No. 6950—6952; Madrid, *Bibl. Nac.*, No. 5; *Bibl. de la Junta*, Nos. 35 and 49; Constantinople, *Koprulu*, No. 1574; *Les manuscrits arabes de l'Escurial*, Derenbourg, No. 569, 570, 571).

Other works attributed to al-Khalil have survived but their authenticity, at least in their present form, is suspect: 1. *Kit. fi Maʿnā l-Hurūf*, *Cat. Cod. Arab.*, i. 81; Berlin, No. 7015/7016; 2. *Kit. Sharḥ Sharf al-Khalil*, fragment Berlin, No. 6909; 3. *Kit. fihī Djumlat Aṭat al-ʿArab*, Aya Sofya, No. 4456; 4. Fragment on the conjugation of the verb, *Bodl.*, i., No. 1067, 4.

(MOH. BEN CHENEB)

KHALIL B. ISHĀK B. MUṢĀ B. SHUʿAIB, ABU 'L-MAWADDĀ DĪYĀ' AL-DĪN, known as (Ibn) al-Djundi, commonly called Sidi Khalil in Algeria, a great Mālikī jurist of Egypt, died in Cairo on Rabīʿ I 13, 776 (= Aug. 22, 1374), according to others in 767 or 769.

He studied under Ibn ʿAbd al-Hādī, al-Rashīdī and notably ʿAbd Allāh al-Manūfī. Born of a Hanafī father, he adopted the Mālikī school at the instance of al-Manūfī. On the latter's death in 749 (1348) Khalil devoted himself to teaching and lectured at the al-Shaikhūniya school.

He also saw service in the victorious guard and in this capacity took part in the capture of Alexandria from the Christians in 767 (1365—1366).

He later lived retired from the world and devoted himself to study and work of piety. He made the pilgrimage to Mekka and spent some time in Medina.

From the legal point of view Khalil, like his model Ibn al-Ḥadjib, represents the school of law a little affected by Shāfiʿism formed by the fusion of Egyptian and Maghribi tendencies in the Mālikī school. His *Mukhtaṣar*, in spite of its conciseness which verges on obscurity, is the manual of law which has been and still is most studied in Algeria. It was printed in Paris in 1855 and again and again till 1883; in 1900 a new edition was brought out in Paris by G. Delphin. E. Fagnan has published *Concordances du Manuel de droit*, Algiers 1889, based on the edition of 1883. Dr. Perron has given a substantial translation in which he has combined the text and the commentary: *Précis de jurispr. musulm. ou Principes de législ. musulm. civile et relig. selon le rite malékite*, Paris 1848—1854. Several partial translations have appeared since: Santayra and Cherbonneau, *Du Statut personnel et des successions*, Paris 1873—1874; Seignette, *Code musulman par Khalil, rite malékite*. — *Statut réel*, Constantine 1878; Fagnan, *Le Djihad ou Guerre Sainte*, Algiers 1908; do., *Mariage et répudiation, trad. avec comment.*, Algiers 1909. — Among other works by Khalil b. Ishāk are mentioned: 1^o. *al-Tawdhīḥ*, commentary on the *Mukhtaṣar* of Ibn al-Ḥadjib, Algiers, *Bibl. Nat.*, Nos. 1077—1084; 2^o. *Kit. al-Manāsik*, *Brit. Mus., Cat.*, No. 259, ii., *Bibl. Khéd.*, *Fihrist*, iii. 184; 3^o. *Manāḳib al-Shaikh ʿAbd Allāh al-Manūfī*, biography of his teacher, *Bibl. Khéd.*, *Fihrist*, v. 159; 4^o. *Ḍaḥl al-Muwadḍiḥāt wa-Taʿrīfuhā*, *Bibl. Khéd.*, *Fihrist*, vii. 278.

(MOH. BEN CHENEB)

KHALIL, AL-MALIK AL-AḤRAFA ŠALĀH AL-DĪN, was the second son of Sulṭān Kaḷāʿūn; his oldest brother is said to have been poisoned by him. As he lay under this suspicion and was also of an immoral and irreligious life (he was accused of pederasty and of drinking wine in Ramaḍān), Kaḷāʿūn could not bring himself to sign Khalil's appointment as heir-apparent. Nevertheless he was regarded as successor to the throne and acclaimed Sulṭān on Kaḷāʿūn's death in 689 (1290). His first official act was to dismiss the high officials of his father's court with whom he was on bad terms and to prosecute them and appoint his favourites to important posts. But he continued his father's foreign policy, the goal of which was the destruction of the Crusaders in Syria, and again took up the plan of besieging Akkā. After

careful preparations he advanced with such superiority against the town that, in spite of a brave defence and help from Cyprus by sea, it could not hold out for long. The town itself was first taken, then the strongly fortified towers of the Knights which formed a kind of donjons within the town. The male inhabitants were put to death and the women and children deported to Egypt; but the women were later permitted to go to Cyprus. The other towns still in possession of the Crusaders offered no resistance worth mentioning. *Ṣaidā* (Sidon), Tyre, *ʿAthluth*, *Ḥaifā* and *Bairūt* fell. The last named alone had surrendered so that it was not destroyed like the others. The Christian inhabitants who did not migrate had to pay poll-tax. Rejoicings were held for a month in Damascus and the Sultān's name became celebrated as that of the final liberator of Syria for all time. *Khalil* afterwards planned a campaign against the Tatars in the *ʿIrāq*, but he contented himself with the occupation of their fortress *Kalʿat al-Rīm*. The king of Armenia, who felt himself threatened, ceded him several towns to secure peace. *Khalil* also carried out his father's plans for the fortification and development of the Syrian cities; in the citadels of Aleppo, *Baʿalbek*, Damascus and the great mosque of Tripoli he found him named as the builder.

He was after his fashion fanatical; for example he demanded that the Christian officials in Damascus should adopt Islām; those who refused were fined up to 1,000 dinārs. He was personally hated by those around him for his evil life and his cruelty. He treated contemptuously even the highest officials, like his Atabek *Baidarā*. The high dignitaries therefore could stand him no longer and conspired against his life in 693 (1293) and took advantage of a hunting expedition in Upper Egypt to murder him. This able and energetic prince thus only ruled four years. As he left only two daughters, the throne passed to his younger brother *Muḥammad* [q. v.].

Bibliography: Weil, *Geschichte der Chalifen*, iv. 174—190; Quatremère, *Histoire des Sultans mamloûks*; M. Reinand, *Extraits des historiens arabes*, Paris 1829, p. 569—576; Ibn Taghribardī, *al-Banḥāl al-Ṣāfi*, Vienna Arabic MS., Mixt. 329^b, i fol. 317^a. (M. SOBERNHEIM)

KHALİL EFENDI ZĀDE, MEHMET SA'ID EFENDI, one of the 'ulamā' of the time of Sultān Maḥmūd I (1730—1754). He was the son of Birgili *Khalil* Efendi who was twice *Kādir-askar* of Anatolia. He studied under his father, then passed through the usual Madrasa course and beginning as mollā of *Yeni-shehir* in 1135 (1722—1723) ascended the various steps of the 'ulamā' hierarchy to the highest office. He was appointed *Shāikh al-Islām* in 1162 (1749) but was dismissed within ten months in 1750 on account of his stern and unyielding disposition and banished to *Brusa* where he died in 1168 (1754/55) and was buried near Amīr Sultān.

He was regarded as a learned man, ready with his pen, and well fitted for all the claims of his office. Besides a commentary, he left the Turkish translation of a part of the history of 'Ainī († 762). Of his sons and grandsons several were notable theologians.

Bibliography: A. Rif'at Efendi, *Devvāhat al-Meshū'ikh*, Constantinople n. d., lithographed, p. 97; Sāmī, *Kāmūs al-ʿAlām*, Constantinople 1308, iii. 2056; Thureiya, *Sidḡill-i ʿOthmāni*, Constantinople 1311, iii. 28. (TH. MENZEL)

KHALİL PASHA, name of three Turkish Grand Viziers.

1) ÇENDREELI *KHALİL PASHA* in the reign of Murād II, vide ÇENDERELI.

2) KAISARIYELI *KHALİL PASHA*, Grand Vizier under Aḥmad I and Murād IV. He was an Armenian by birth, born in a village called *Ruswān* in the neighbourhood of *Kaisariya* (*Munadjjim Bashī*; the statement of the *Sidḡill-i ʿOthmāni*, ii. 286, that he came from *Maʿash* is incorrect). The date of his birth is not given but must be about 1560. Having been educated at court as *ʿlī Qazlan*, he entered the corps of the falconers and became *doghandji bashī*, in which capacity he was in Sultān Muḥammad's II immediate entourage during the Hungarian campaign of 1596. In 1616/1607 he became Agha of the Janissaries and fought bravely under the Grand Vizier Murād in the campaign against the rebels in Anatolia. Next year *Khalil* was appointed *Kapudan Pasha* as a successor of *Hāfiz Aḥmad Pasha* [q. v.]. In this office he was very successful and captured many Maltese and Florentine ships, especially in 1618/1609, when he took, in a battle with the Maltese near Cyprus, a big and famous galleon, called by the Turk *Kara Djehennem* (in Europe known as "the red Galleon"). This success procured him the rank of *wazir*. From the end of 1620/1611 to 1622/1613 he was replaced as *Kapudan* by Öküz Muḥammad Pasha, who had become a *dāmād*, but the latter, having been defeated by the Spanish when convoying Egyptian ships to Constantinople, *Khalil* was made Grand Admiral a second time. In 1623/1614 he went on an important expedition, first raided Malta, and then went to Tripoli in Africa, where he captured and killed a usurper called *Safar Dāʿī*. During his admiralship *Khalil* displayed much diplomatic activity in trying to form a confederation against Spain with Holland and Morocco. Therefore he encouraged the Dutch to enter into relations with the Porte and became a powerful protector to the first Dutch ambassador Haga who arrived in 1612. Ever afterwards he showed himself a friend of the Dutch interests, although the planned confederation did not materialise.

In Muharram 1026/January 1617 he was appointed Grand Vizier in succession to Öküz Muḥammad Pasha, who had been unsuccessful in the war against Persia and to the disappointment of the latter's *Kāʿim maḥām* Atmakdji Zade. In February of that year he showed his liberal-mindedness by protecting the Christian ambassadors in the capital against an attempt of the 'ulamā' to impose the *kharāj* on them. In the same year the Austrian envoy Count Czernin after the failure of his negotiations left Constantinople and in Ramaḍān [September] preliminaries were signed with Poland at *Busa*. *Khalil*, however, seems to have been more interested in entertaining good relations with Venice, Holland, France and England and pacifying the Algerian corsairs. He did not play a prominent part in the course of events, when after Aḥmad's I death (23 Dhu 'l-Kāda 1026/22 Nov. 1617), Muṣṭafā I was placed on the throne and three months afterwards replaced by ʿOthmān II (1 Rab. I 1027/26 Febr. 1618). In the beginning of 1618 he took command of the army sent against Persia. The vanguard of the Turkish army was defeated in the plain of *Suāw*, but *Khalil*, marching against *Ardebil*, induced the *Shāh* to

negotiate a peace treaty, which was signed on the same plain (6 Shawwāl 1027/26 Sept. 1618) on the same conditions as the former treaty. On his return to the capital he was dismissed from the office of Grand Vizier and had even to take refuge with the great Shaikh Mahmūd of Skutari, one of whose adepts he was (1 Šafar 1028/18 Jan. 1619). Sulṭān 'Othmān reproached Khalīl, that he had not helped him to succeed to the throne immediately after Ahmad's death, but, on the intercession of Shaikh Mahmūd the ex-Grand Vizier was appointed *Ḳapudan Pasha* a third time. With an interruption of six months in 1621 he occupied this position successfully. In May 1622 'Othmān II was murdered by the Janissaries and Muṣṭafā restored. During the reign of terror of the Janissaries and their chiefs that followed, Khalīl did not sympathize with them and even refused three times the Grand Vizierate offered to him by al-Wālide Sulṭān (5 Febr. 1623). Two months before, he had been the object of a hostile demonstration by the Janissaries who accused him of protecting their enemy Abāza Pasha [q. v.]. Still he had great influence and protected in December 1622 the Polish ambassador against anti-Polish demonstration. But after Mere Husain Pasha had become Grand Vizier, he was dismissed from the office of *Ḳapudan Pasha* and banished to Malghāra, where he went in April 1623, not without opposition, especially from the Sipāhis, for he was the most popular of the then living viziers. Abāza Pasha, who in Erzerūm had rebelled against the Government claiming revenge for 'Othmān's death, was a former protégé of Khalīl's, who, as *Ḳapudan*, had given him the command of a galley and, as Grand Vizier, had appointed him governor of Marāṣh; his rebellion, however, was contrary to Khalīl's advice. Three years after the removal of Muṣṭafā (4 Dhū 'l-Ka'da 1032/30 Augustus 1623) and the succession of Murād IV, when Abāza's rebellion continued, it was due to this fact, that Khalīl was appointed a second time Grand Vizier — in accession to Iḥāfīz Ahmad Pasha [q. v.] — in a large assembly in presence of the highest 'u'mā', as it was hoped that he would succeed in pacifying his former client (Dec. 1626). Three days afterward, he crossed the Bosphorus, visited his old friend Shaikh Mahmūd, and reached Aleppo in March 1627. In July the army went to Diyār Bekr. At first an expedition was sent against Akhshā, threatened by the Persians, while Khalīl tried to obtain Abāza's submission and collaboration in this enterprise. But Abāza, fearing an ambush, declined and, having at first adopted a conciliatory attitude, he massacred the Janissaries at Erzerum. Khalīl was obliged to march against him and began in September the siege of Erzerum. After 70 days, however, in November, an extremely severe winter began. The army was obliged to retreat to Tokat with heavy losses occasioned by snow and cold. This campaign was the cause of Khalīl's dismissal; he returned to Constantinople, where he kept his position as vizier (1 Shā'abān 1037/6 April 1628). In the next year (1039/1629) he died.

Khalīl Pasha is praised by European as well as by the Turkish authors for his moderation and love of justice. His personality contrasts favourably with the other Turkish statesmen of his time, nearly all of whom died a violent death. He is described as a religious man which accounts for his friendship with Mahmūd of Skutari;

he also built in Constantinople a mosque in the neighbourhood of the mosque of Muḥammad Fātiḥ. There exists an anonymous biography of Khalīl Pasha, the *Tārīkh-i Khālil Pasha* or *Ghazā-name-i Khālil Pasha*. The MS. used by von Hammer is now in the National Library at Vienna (Flügel, *Die Arab. Pers. u. Turk. Handschriften der K. K. Hofbibliothek in Wien*, ii. 253, 254).

(see index); *Bronnen tot de Geschiedenis van den Levantischen Handel*, verzameld door Dr. K. Heeringa, 's-Gravenhage 1910 (see index).

3) ARNĀND KHALİL PASHA, Grand Vizier under Ahmad III. He was an Albanian from Elbasān, born about 1655, and had entered the Bostāndji corps where his elder brother Sinān Agha was Bostāndji Bashi. Having served some time in Baghdād, he returned to Constantinople as *Ābūṣāki* and became *Bostāndji Bashi* in 1123/1711. In Muharram 1128/January 1716, when the war against Austria was in preparation, he was appointed Beylerbey of Erzerūm and sent to Nish to fortify this place. Six months later Khalīl became Beylerbey of Diyār Bekr and in Shā'abān (1st July 1716), when the Grand Vizier Dāmād 'Alī Pasha [q. v.] had entered Belgrade for the Austrian campaign, he became commander of that town. Dāmād 'Alī having been killed in the battle of Peterwardein (Aug. 5, 1716), the Sulṭān appointed Khalīl Grand Vizier, while the Sulṭān's favourite and future Grand Vizier Dāmād Ibrāhīm [q. v.] became his *Kā'im Maḥām*. The latter, however, was by far the more influential. After Temesvár was lost (13 October) a mutiny was feared and the army returned to Adrianople. In the next year the campaign was reopened and Khalīl marched to Belgrad, where the Austrian army under Eugen of Savoy was already awaiting the Turks. In the battle of Belgrade (16 Aug. 1717) Khalīl was completely beaten, which was due for the greater part to his own incapacity and his bad advisers. Belgrade was occupied by the Austrians and the Turks retired to Nish. Khalīl was dismissed in October 1717 and had to hide himself for two years, after which he was restored in the Sulṭān's favour. From 1133–1140 (1721–1727) he was banished to Mytilene, then he was given successively the command of several towns in Greece and Crete and died in 1136/1733. He is described as a mild, pious man, but seems to have had so little reputation, that the European historians writing on the battle of Belgrade were not aware of his existence.

KHALİL SULTĀN, a ruler of the Timūrid dynasty, grandson of Timūr, son of Mirān-shāh and Suyūn-beg Khānzāda, grand-daughter of the Khān of the Golden Horde, Özbeḡ; born in 786

(1384), died Wednesday, Raddjāb 16, 814 (Nov. 4, 1411), reigned in Samarkand 807—812 (1405—1409). His education was entrusted to Timūr's eldest wife, Sarā Mulk Khānīm. He is said to have distinguished himself on Timūr's India campaign (1399) when only 15 years of age; he also took part in the so-called "Seven Years" (actually only 802—807 = 1399—1404) war in the west; in 1402 Timūr gave him supreme command in the east "on the frontier of Turkestan". In 1404 he aroused the wrath of his grandfather by his runaway marriage with a woman of low rank, Shāh Mulk, but was pardoned and in the same year during the preparations for the campaign to China appointed leader of the right wing mobilised in Tashkent and the surrounding country. After the death of Timūr on Feb. 18, 1405, the army acclaimed him as sovereign and he entered Samarkand on Ramaḍān 16, 807 (March 18, 1405). The title of Khān was given to Timūr's minor great-grandson Muḥammad Djahāngir, son of prince Muḥammad Sultān who had been designated Timūr's successor but had died before him. Khalil Sultān held out in Samarkand till 1409 but his rule was nowhere recognised outside of Mā-warāʾ-al-Nahr; to the north of this region, on the Sir Daryā, he had to fight continuously against rebellious generals. The Tatars of the Golden Horde who had conquered Khwārizm in Raddjāb, 808 (Dec., 1405—Jan., 1406), extended their raids up to Bukhārā. Khalil Sultān was generally victorious in open battle against his enemies; even Shāh Rukh's final triumph was not so much won by military successes as by intrigues and skilful diplomacy (including negotiations with the "ulamā" in Bukhārā, at the head of whom was Muḥammad Pārsā). In the spring of 1409, when Shāh Rukh's army was ready for battle in Bādghīs and Khalil Sultān's in Shahr-i Sabz (Kash), a rising again broke out in the north under the leadership of the Amīr Khudāyād; Khalil Sultān was forced to leave his army and attack Khudāyād but could only take 4000 men with him. On Dhū'l-Kaʿda 13, 811 (March 30, 1409), he was taken prisoner north of Samarkand by Khudāyād and taken to Samarkand; later he was taken to Farghāna and his wife, who was left behind, was cruelly treated by Shāh Rukh; in the end he went to Otrār and through the intermediary of the Amīr Shaikh Nūr al-Dīn concluded a treaty with Shāh Rukh by which he renounced his sovereignty over Mā-warāʾ-al-Nahr and received the town of Rayy in exchange where he lived till his death. His wife was also restored to him and on her husband's death put an end to her own existence. On account of this happening, which was embellished with all kinds of romantic touches by his contemporaries, Khalil Sultān is called a "sentimental shepherd" by A. Müller (*Der Islām im Morgen- und Abendland*, Berlin 1887, ii. 315; Khalil Sultān is wrongly described there as the son of ʿUmar Shaikh), a description which hardly fits the able young prince whose military skill was undoubted; his devotion to his wife and the magnanimity which he showed to all his enemies, even to traitors, were, as a matter of fact, in complete contrast to the characters of the other members of his dynasty and the manners of his time.

Bibliography: W. Barthold, *Ulugʻbeg i ego wremya*, Petrograd 1918, Index (with references to the sources, for the most part still in manuscript). (W. BARTHOLD)

KHALİLĪ, Ottoman poet and mystic of the time of Sultān Mehmed II, belonged to the neighbourhood of Diyarbakr and came to Iznik to study theology where he formed an attachment for a youth and so succumbed to this homosexual passion then so prevalent particularly in the most cultured circles that he entirely abandoned his studies and gave expression to his woes in a book which is known as the *Firākāt-nāma* ("book of separation"). The title *Firākāt-nāma* is equally well known, which Sehi gives first and which is also the title of a book by Kādī Ḥasan b. ʿAlī of Monastir. The poem, which reminds one of the *Hewes-nāma* of Djāfar Čelebi (d. 1514) with its sincere unaffected verses, bears witness to Khalilī's deep passion faithfully described. The book was finished in the year 866 (1461/62). It is written in epic and lyric metres, a varied alternation of *mathnawī* and *ghazal*. Many biographers of poets interpret the poem as purely Ṣūfī, which does not seem to be correct.

Khalilī died in 890 (1485) as superior of a monastery in Iznik. His *Diwān* has not yet been printed. A number of his poems are contained in the *Djāmīʿ al-Awqāʿ* compiled by Hādjdjī Kamāl in 918, according to Brusall Tāhir.

Bibliography: Laṭīfī, *Tedhkerē*, Constantinople 1314, p. 147; Sehi, *Tedhkerē*, Constantinople 1325, p. 64; Brusall M. Tāhir, *Othmanī Mīʿellīferī*, Constantinople 1333, ii. 159; Sāmi, *Kāmūs al-ʿAlām*, Constantinople 1308, iii. 2060; v. Hammer, *Geschichte d. osm. Dichtkunst*, i. 225; Gibb, *A History of Ottoman Poetry*, ii. 379; Pertsch, *Katalog der türkischen Handschriften in Göttingen*, p. 370, N^o. 377. (The Berlin manuscript of the year 1485 is contemporary with the poet). (TH. MENZEL)

KHALĪK (A.) is the term applied in the Qurʾān (Sūra ii. 159; xl. 59; lxvii. 3) to God's creative activity, which includes not only the original creation *ex nihilo* but also the making of the world and of man and all that is and happens. The verbal forms *khalaka* and *khalafanū* are of the most frequent occurrence.

Among the most beautiful names of Allāh in the Qurʾān (cf. Sūra lix. 24) are *al-Khalīk* (Sūra vi. 102, et passim), *al-Khalīq* (Sūra xv. 86; xxxvi. 81), *al-Bārī* (besides Sūra lix. 24 only ii. 51) and *al-Musawwir*. Epithets like the Almighty, the All-knowing etc. are also applied to the Creator. Their meaning is as a rule clear. The only obscure expressions are (cf. H. Grimme, *Mohammed*, ii. 44, 47) "Allāh created *bi' l-hakk*" (Sūra xvi. 3; xxxix. 2—7; xlv. 39; xlv. 2) or as "*al-Hakk*" (Sūra xxii. 5 sq.). If we are justified in supposing gnostic speculations in the Qurʾān it may be recalled that in the Gnosis objectified or personified truth coalesces with higher reality (cf. St. John's Gospel, xiv. 6; also S. v. d. Bergh, *Die Epitome der Metaphysik des Averroes*, p. 218 sq.).

Allāh is the Creator of all things (Sūra vi. 101 sq., et passim). He creates what He will (Sūra xxxvi. 82, et passim) but the Qurʾān describes at greatest length the creation of man from dust, earth or clay, drops of semen and congealed blood (Sūra xv. 15 sq.; xxii. 5; xxiii. 12 sq., et passim) and the resurrection of the dead on the day of judgment, a new creation not more wonderful than the first creation (Sūra ii. 26, et passim). How important the creation of man is, is evident from Muḥammad's coming forward (in Sūra xcvi. 1.

generally regarded as the earliest revelation) in the name of his Lord "Who created, created man from congealed blood". Everything on earth was created for man (Sūra ii. 27, et passim), especially the animals (Sūra xvi. 5). The same thing is shown in the stages of the creation; it is regarded as taking place from the lowest upwards. In six days the world was completed, the earth first in two days, all that is in it in two more days and in the last two days the world of the seven heavens. Allāh is only formally called the Creator of heaven and earth (Sūra vi. 101, et passim) and it is announced as a secret (Sūra xl. 59) that the creation of heaven and earth is greater than the creation of man, i. e., according to the usual explanation, heaven and earth were created out of absolutely nothing but man was made from dust.

There is no creator but God. He is the One (Sūra xiii. 7, et passim; Sūra xxiii. 14 is no exception). He has begotten no children, only created things and beings, none of whom are like Him (Sūra cxii). But passages like Sūra xv. 29, xxxviii. 72, where it is said that Allāh, after forming man, breathed of His spirit (*rūḥ*) into him, make the difference between the Creator and creature appear less rigidly marked.

The creation of man is above all a mark of divine power or, in so far as that which has been created is useful to man, of divine goodness. Reference to the harmony of the heavens (Sūra lxvii. 3) and the beauty of the human form (Sūra lxiv. 3) are rare. Finally we may mention that God created all things after one *ḡadar* (Sūra liv. 49 sq.; *ḡadar* is here perhaps a synonym for *amr*?) and heaven and earth "for a definite period" (Sūra xlv. 2) i. e. probably to the last day.

The earlier traditions added very little to this (as Prof. Wensinck kindly informs me). Before the creation Allāh was in the clouds (al-Tirmidhī, *Tafsīr*. Sūra xi. bāb 1) and He created in darkness (do., *Ṭawḥīd*, bāb 18; cf. Sūra xxxix. 8). He wrote a *kitāb* before the creation (al-Bukhārī, *Tawḥīd*, bāb 55). The *ḡalam* was the first thing created (al-Tirmidhī, *ḡadar*, bāb 17). Allāh created man after his own image (Muslim, *Bihar*, Tr. 115; cf. Sūra lxiv. 3; lxxii. 8).

In the later traditions the process of creation is elaborated with speculations regarding God's throne, primeval water etc. and influenced by ideas of Hellenistic and Oriental origin regarding the manifestation or emanation of God in the world. The Neoplatonic expression put in Allāh's mouth is often quoted: "I was a hidden treasure but wished to be known and therefore I created the world". Knowledge (*ilm*) or intelligence (*ʿaql*) is therefore said to have been the first creation.

Just as God's superiority over man and the world is particularly apparent from the Qurʾān, so we find throughout the theology of Sunnī Islām the distance between the Creator and the creature emphasised. In general it is concluded from the transitory character of this world that its Creator is eternal. In favour of God's omnipotence causality in Nature (cf. *Atomic Theory* in Hastings's *Encyclopaedia of Religions and Ethics*) and freedom of action on the part of man, if not absolutely denied, are suppressed as much as possible. Djahm [q. v.], one of the first Djabarīs, wished to define God simply as the omnipotent Creator Ibn Ḥazm (*Kitāb al-Faṣl*, i. 39; ii. 161 sq.) asserts that one can only show with

regard to God that He is the Eternal, the Unique, the True, the Creator (*al-ʿazīz, al-Wāḥid, al-Ḥakk, al-Khālīk*) for only by these qualities is He absolutely distinguished from this world.

But misgivings against this sharp distinction were raised, particularly under the influence of Christian dogmatics and philosophical speculation, from three sides i. e. by the Muʿtazilīs, the mystics and the philosophers. The Muʿtazilīs emphasised the wisdom of God in His creation much more than His omnipotence and His will. According to their teaching, God only creates what is good and man is the creator of his own actions. Naẓām said that God could only create what is good and His creating is thought i. e. not an act of volition in the proper sense. According to others, like Abu ʿl-Hudḡail and Muʿammar, God's will is a kind of intermediary between the Creator and the created world. Al-Djāhīz teaches that God cannot destroy the created world (arguing on Platonic lines, like Philo etc.).

In contrast to this estimation of the world and of human activity, mysticism appears as a depreciation of all that is worldly — but only of the material world. While the mystics regarded this world simply as a ladder to God, they could intensify their spiritual life of the soul up to the feeling of godlike creative activity (cf. L. Massignon, *La Passion d'al-Hallāj*, p. 513 sq.).

Two schools may be distinguished among the philosophers: one older, more neo-Platonic (e.g. the *Ikhwān al-Ṣafāʾ*), according to which the emanation of a series of spirits precedes the creation of a temporal material world, and a second more Aristotelian school (notably Ibn Sīnā and Ibn Rushd) which makes the development of the intellectual and material world proceed by stages, but without beginning and parallel, after the first *ʿaql* has emanated from the divine being. Both schools regard God only as the first cause between Whose activity and this world there are many intermediaries.

The attitude of orthodox Islām to these tendencies developed in very different ways in course of time. The Muʿtazilī doctrine of the *ḡalk al-ʿafʿāl* could only be accepted in a modified form; a *kasb* (Ashʿarīs) or an *ikhṭiyār* (according to al-Māturīdī) was ascribed to man instead of *ḡalk*. The philosophic assumption of a world without beginning was decisively rejected, but the theory of the spheres connected with it was adopted while the spirits of the stars were interpreted as angels of heaven. It was very easy to make common cause with mysticism, which, of course, always insisted that there was no creator except Allāh. The creation of man in God's image and the breathing of the divine spirit into him were of more importance to the mystic than the creation of the physical world and of human activities (see the art. *ḡADĀʾ* and *ḡADAR*) (cf. Massignon, *op. cit.*, p. 599 sqq.).

In the struggle then against the Muʿtaziliya and philosophy, the Sunnī doctrine developed — in part in alliance with mysticism — and with the greatest success in the Ashʿarī school. According to the latter, Allāh is the Omnipotent from eternity, Who can create if and when and what He will but does not need to create, Who with the creation of the material world at the same time places limits of time and space to it and every moment creates the world anew. Allāh is

also the eternally Speaking as regards the word of creation, especially the word of creation in the Qur'ān. If the eternalness of the word is taught contrary to the Ma'tazilī view, there is hesitation, as regards the activity of creation in calling God the eternally creating, and therefore the so-called *ṣifāt al-jī'ī* (*khalk*, *raḥ*, etc.), which are regarded as temporal relations, are distinguished from the eternal qualities of His nature. In this respect the system of al-Matūridī differs from the teaching of the Ash'arī school: he assumes as an eternal quality in the divine being *takwīn*, creative production. This means an approximation to the teaching of the philosophers that, because there is no cause without effect, God as the first cause created the world from eternity, and thus is really an eternal Creator, Whose being and actions are alike unalterable. Some philosophers and certainly many mystics got over the difficulty of this doctrine by the assumption that before the manifestation of His creation "the eternal Creator" was concealed in God (cf. Massignon, *op. cit.*, p. 657).

We find the bond between orthodox Ash'arī beliefs and gnostic-mystic speculation in al-Ghazālī. On the one hand he teaches quite definitely the temporal creation of the world as an act of divine freedom. After eternal but free deliberation out of pure goodness He created this world and He is creating it down to the last day. He is also the originator of human activities; man has only a *kasb*. On the other hand, however, al-Ghazālī is fond of adopting mystic theories of intermediation. God and man are not simply to one another in the relation of Creator and creature. The world is divided (e.g. in *al-Ma'nūn al-Saghir*, on Sūra xvii. 87; cf. Sūra vii. 72) into the *ālam al-khalk*, i.e. the material spatial world, and the *ālam al-amr*, the non-spatial world of the angels and the human spirits (the former in the *Ihyā*, iv. 20 sqq., is also called *ālam al-mulk wa 'l-shahāda*, the latter *ālam al-ghair wa 'l-malakūt*). As a member of the world of spirits (*al-Ma'nūn al-Saghir*, on the tradition that Allāh or *al-Rahmān* created Adam in his own image), man in his being, qualities and actions shows similarity to God. The human will acts in his body (microcosm) like the Creator in the macrocosm. Besides the above-mentioned division into sensible and supersensual world, al-Ghazālī also gives the threefold division (*al-Durra al-fākhira*, p. 2 sqq.; cf. Sūra v. 20 etc., where there is mention of the "kingdom of the heavens and of the earth and what is between"): *ālam dunyawī* (= *al-mulk*), *ālam malakūtī* and *ālam djabarūtī* (cf. the art. DJABARŪT). Man thus appears as a citizen of three worlds, corresponding to the old triad: body, soul, spirit, as it was developed by gnosticism in the system of the heavenly hierarchy. On *mulk*, *malakūt* and *djabarūt* cf. *Κυρίωςτες, ἀρχαί, ἐξουσίαι* in St. Paul, Ep. to Col., i. 16. According to al-Ghazālī, the human spirit, related to God, will survive not only this material world and the spiritual world of the angels and *djinn* but also the spiritual world of the highest angels.

In spite of the authority of this "father of the church in Islām", the development of the idea was not yet finished. Ibn Rushd then advanced against him (*Tahāfūt al-Tahāfūt*) the doctrine that the world had no beginning; many theologians (from al-Rāzī, d. 605 = 1209, onwards) followed more closely the conceptions of the so-called Aristotelians, and extreme mystics, like Ibn

al-ʿArabī, let the distinction between *al-Hakk* (the Creator) and *al-khalk* (the creature) disappear in the absolute primeval being (cf. the art. AL-INSĀN AL-KĀMIL).

Bibliography: There is no comprehensive work on the subject. Besides books mentioned in the text we may mention: M. Worms, *Die Lehre von der Anfangslosigkeit der Welt bei den mittelalterlichen arabischen Philosophen des Orients und ihre Bekämpfung durch die arabischen Theologen* (Beitr. z. Gesch. d. Philos. des M.A., ed. by Baumeister and v. Hertling, iii. 4, Münster 1900); A. Rohner, *Das Schöpfungsproblem bei Moses Maimonides, Albertus Magnus und Thomas von Aquin*, ibid., xi. 5, Münster 1913; Tj. de Boer, *Die Widersprüche der Philosophie nach al-Gazzālī und ihr Ausgleich durch Ibn Rōṣd*, Strassburg 1894; do., *De Wijsbegeerte in den Islam*, in the *Volksuniversiteitsbibliotheek*, xi., Haarlem 1921. See also the articles ALLĀH and ŠIFA. (TJ. DE BOER)

KHALKHA, the name of a lake and of a river flowing from it into the Buyir-Nor on the frontier between Manchuria and Mongolia. The river *Khalkha* is mentioned in the xiiith century in the "Secret History of the Mongols" (Russian translation by Palladius in *Trudī Ross. Dukhovnoi Missii v Pekinie*, iv., St. Petersburg 1866, p. 90, 91, 102 and 118 (the edition of the text promised by Pelliot has not yet appeared); in Rashīd al-Dīn, ed. Berezin, in *Trudī Vost. Otd. Russkago Arkh. Obshch.*, xiii., St. Petersburg 1868, Pers. text, p. 216, vol. xv., ibid. 1889, Pers. text, p. 3 sq.; *Ḳalā*). Since the xvth century the same name *Khalkha* has been given to the north-eastern part of Mongolia (from the western frontier of Manchuria to the eastern frontier of the district of Kobdo and from the Russian frontier to the Gobi desert) and its population. Ssanang Ssetsen (*Gesch. der Ost-Mongolen*, ed. I. J. Schmidt, St. Petersburg 1829, p. 191 and 197) speaks of twelve tribes of the *Khalkha*; a distinction was made between five "nearer" and seven "remoter" tribes (*op. cit.*, p. 205, and p. 191 and 285). Geresen (full name and title Geresentse Djalair Khun Taidji) was considered the ancestor of all the chiefs of the *Khalkha*; he was grandson of the last ruler over all Mongolia, Dayan Khān (d. 1543); on the genealogy see A. Pozdniev, *Mongolia i Mongolī*, i., St. Petersburg 1896, p. 472. The four *aimak* [q. v.] into which the *Khalkha* were nominally divided (the Manchurian emperors long since deprived the chiefs of any power) have taken their names from the different branches of this dynasty; they are the *aimak* (from E. to W.) of Tsetsen-Khān, of Tushetu-Khān, of Sayin-Noyon (after 1725) and of Tsasaktu-Khān. Another division is also mentioned (as early as the occasion of the submission of the *Khalkha* to the Emperor K'ang-Hsi in 1691; Mongol inscription in Dolon-Nor, in text and Russian transl. publ. by A. Pozdniev, *op. cit.*, ii., St. Petersburg 1899, p. 291 sqq.): Geresen is said to have had 7 sons, wherefore the population was divided into seven divisions (*khoshun*, written *khoshūn* in Arabic); it is not known whether there was a connection between this division and the seven "remoter tribes". Since about 1585, Buddhism has been dominant among the *Khalkha*; at that date a grandson of Geresen, Abatai-Khān, was reigning, called Abtai Ghalasagho Taidji in Ssanang Ssetsen, p. 253. (W. BARTHOLO)

KHALKHAL ("anklet"), the name of a place in Adharbaidjan. Its position nearly corresponds to 37° N. Lat. and 49° East. Long. It does not occur on modern maps, but see the map in G. Le Strange, *The Lands*, etc., facing p. 87. It was situated in the mountains which in this region were beset with fortresses. Yāqūt passed through this region when he fled before the Tatars in 617 = 1220/21.

According to Ḥamd Allāh Mustawfī it was formerly a fair sized town, which in his days had sunk into a mere village with about a hundred hamlets belonging to it. It was the seat of the governors of the province, after Firūzābād had gone to ruin.

There is another place of the same name situated at the mouth of the Oxus on the Caspian.

Bibliography: Yāqūt, *Mufaḍḍij*, ed. Wüstenfeld, i. 198; ii. 459; Ḥamd Allāh Mustawfī, *Nuzhat al-Kulūb*, ed. G. Le Strange, Gibb Mem. Ser., vol. xxiii, index; see chiefly p. 81 sq. of the text, p. 84 of the translation; G. Le Strange, *The Lands of the Eastern Caliphate*, Cambridge 1905, index.

KHALWA, KHALWATĪ, etc. [See TAŠAWWUF].

KHAMR (A.), wine. The word, although very common in early Arabic poetry, is probably a loanword from Aramaic. The Hebrew *yain* has in Arabic (*wain*) the meaning of black grapes. The question has been fully treated by I. Guidi in his *Della sede primitiva dei popoli semitici in Memorie della R. Acad. dei Lincei*, series iii, vol. iii. p. 603 sqq.

Arabia and the Syriac desert are, in contradistinction to Palestine and Mesopotamia, not a soil fit for the vine; there are, however, exceptions, among which may be mentioned al-Ṭāʾif (see II. Lammens, *Tāʾif*, p. 35 sqq., *M. F. O. B.*, viii. 146 sqq.), Shibām and other parts of Yaman. Wine, probably of an inferior quality, is also mentioned in Madīna (see below). Usually, however, it seems to have been imported from Syria and Ṭāʾif; in early Arabic poetry the wine-trade is chiefly connected with Jews and Christians, who pitched their tent (*ḥunūt*, also a loanword from Aramaic) among the Beduins and provided it with a sign denoting its character. In it little orgies were held, in the company of female singers who often also belonged to the establishment. The wine was kept in jars or skins, provided with a mouth-piece which was closed by means of a string.

In the days of Muḥammad the people of Mekka and Madīna used to indulge in drinking wine as often as an occasion offered itself, so that drunkenness often became a cause of scandal and of indulgence in a second vice, gambling, which together with wine, incurred Muḥammad's condemnation. Tradition has not refrained from describing how Ḥamza b. ʿAbd al-Muṭṭalib, Muḥammad's uncle, in a fit of drunkenness mutilated ʿAlī's camels (Bukhārī, *Sharḥ*, bāb 13; *Khums*, bāb 1; Muslim, *Ashriba*, Trad. I, 2; *Maghāzī*, bāb 12; Abū Dāʾūd, *Aḥarādī*, bāb 19). And the commentaries on the Qurʾān relate how Muḥammad's companions held drinking-parties which caused them to commit faults in ritual prayer (see al-Ṭabarī, *Tafsīr* ad Sūra xiv. 44; Muslim, *Fadʾīl al-Sahāba*, trad. 44; cf. 45; Aḥmad b. Ḥanbal, i. 185 sq.).

The prohibition of wine was not on Muḥammad's programme from the beginning. In Sūra xvi. 69 we

even find it praised as one of the signs of Allāh's grace unto mankind: "And of the fruit of palm-trees, and of grapes, ye obtain an inebriating liquor, and also good nourishment". But the consequences of drunkenness, manifesting themselves in the way just mentioned are said to have commoved Muḥammad to change his attitude. The first revelation giving vent to these feelings was sūra ii. 216: "They will ask thee concerning wine and gambling (*maisir*). Answer, in both there is great sin and also some things of use unto men: but their sinfulness is greater than their use". This revelation, however, was not considered as a prohibition. As people did not change their customs and the order of prayer happened to be disturbed in consequence thereof, a new revelation was issued, viz. Sūra iv. 46: "O true believers! come not to prayers when ye are drunk, until ye understand what ye say" etc. But neither was this revelation considered as a general prohibition of wine, until Sūra v. 92 made an end to drinking: "O true believers! surely wine and *maisir* and stone pillars and divining arrows, are an abomination, of the work of Satan; therefore avoid them, that ye may prosper".

This sequence of revelations regarding wine is the accepted one among the traditionists and commentators of the Qurʾān (see Aḥmad b. Ḥanbal, *Musnad*, ii. 351 sq.; Ṭabarī, *Tafsīr*, v. 58 ad sūra iv. 46).

The prohibition of wine may, however, also be looked upon from a wider aspect, as Islām is not the only monotheistic religion which has taken a negative attitude towards wine. It is well known that, according to the Old Testament (Numbers vi. 3 sq.) the Nazarite who had wholly devoted himself to Yahwe, had to abstain from wine and spirits, just as the priests before administering the sacred rites (Lev. x. 9). The Nabataeans, according to Diodorus Siculus (xix. 94, 3), likewise abstained from wine and one of their gods is called in their inscriptions "the good god who drinks no wine". Likewise, the abstention from wine belonged to the rule of many Christian monks. All this has its roots in remote Semitic antiquity which ascribed a demoniac character to wine and spirits. The same is true for music, especially singing, which is also prohibited by Islām. It is not improbable that negative feelings of this kind may have worked together with the motives mentioned above, to induce Muḥammad to prohibit wine.

The prohibition of the Qurʾān has been taken over by the doctors of the law; all *madhhabs*, and also the Shiʿa, call wine *ḥarām* and the wine-trade is forbidden. For an exposition of the Shāfiʿi view, see al-Nawawī, *Minhādī*, cd. v. d. Berg, iii. 241; for that of the Ḥanafis, *Fatāwā ʿĀlamgiri*, vi. (Calcutta 1835), 604 sqq.; for that of the Mālikis Zurkānī in his commentary on the *Muwattaʾ* (Cairo 1280), iv. 26; for that of the Shiʿa *Sharḥ al-Islām* (Calcutta 1839), p. 404. Theology reckons the drinking of wine among the gravest sins (*kabāʾir*).

HADITH has many utterances regarding this theme. Wine is the key of all evil (Aḥmad b. Ḥanbal, *Musnad*, v. 238; Ibn Mādjā, *Ashriba*, bāb 1). Who drinks wine in this world without repenting it, shall not drink it in the other world (Bukhārī, *Ashriba*, bāb 1; Muslim, *Ashriba*, trad. 73, 76—78 etc.). Cursed is he who drinks, buys, sells wine or causes others to drink it (Abū Dāʾūd,

Ashriba, bāb 2; Ibn Mādjā, *Ashriba*, bāb 6; Ahmad b. Hanbal, i. 316; ii. 25, 69, 71, 97, 128 etc.). Who drinks a draught of wine on purpose shall have to drink *pus* on Doomsday (Ṭayālisi, N^o. 1134). Prayer of him who drinks wine is not accepted by Allāh (Nasā'i, *Ashriba*, bāb 43; Dārimī, *Ashriba*, bāb 3), and faith is incompatible with drinking it (Bukhārī, *Ashriba*, bāb 1; Nasā'i, *Ashriba*, bāb 42, 44). It is even inadvisable to use it as medicine (Muslim, *Ashriba*, trad. 12; Ahmad b. Hanbal, iv. 311, 317 bis etc.); and it is prohibited to use wine for manufacturing vinegar (Tirmidhī, *Buyū*, bāb 59; Ahmad b. Hanbal iii. 119, 260 bis). But times will become ever worse and there will be people who declare wine allowed (Bukhārī, *Ashriba*, bāb 6; Nasā'i, *Ashriba*, bāb 41 etc.) and so it will be drunk by the generation of the last days (Bukhārī, *Ashriba*, bāb 1; Ahmad b. Hanbal, iii. 176, 202, 213 sq.).

The prohibition of wine, although unanimously accepted, gave rise to dissensions between the juridical schools, dissensions which are reflected in *ḥadīth*, in a historical disguise. The discussions start from the question: what is wine? It is said that, when the use of wine was peremptorily prohibited, the people of Madina poured out in the streets all that they possessed of the appreciated liquor (Ahmad b. Hanbal, ii. 132 sq.; iii. 26, 189 sq., 217, 260 bis; iv. 335 sq.). Ibn 'Umar declares, on the contrary, that at the time of the prohibition, there was no wine in Madina at all (Bukhārī, *Ashriba*, bāb 2). Anas b. Mālik (*ib.*) says that there was scarcely any wine from grapes in Madina, when the prohibition was revealed; people used wine from *busr* and *tamr* (two kinds of dates). In another tradition (*ib.*, bāb 3) wine from *ṣaḍīkh* and *ṣakhw* (two other kinds of dates) is mentioned. 'Umar is represented delivering a *khutba* which was meant to settle the question; according to his son 'Abd Allāh he said: Wine has been prohibited by the Qur'ān; it comes from five kinds of fruits, from grapes, from dates, from honey, from wheat and from barley; wine is what obscures the intellect (*wa 'l-khamr mā khāmara al-'aql*; Bukhārī, *Ashriba*, bāb 2). The question remained, whether beverages prepared from grapes in a different way, were prohibited. There was e. g. a kind of syrup. "When 'Umar visited Syria, the population complained of its unhealthy and heavy climate and they added: This drink alone will heal us. Then 'Umar allowed them to drink honey. Then they said: Honey cannot heal us. Thereupon one of the natives of Syria said to him: May we not prepare something of this drink for you? It has no inebriating power. He said: Well. Then they cooked it till two thirds were evaporated and one third of it remained. They brought it 'Umar, who put his finger into it and licked it. Then he said: This is *ḥilā'* like camels' *ḥilā'* (viz. the pitch with which they smeared their skins). Then he allowed them to drink it" (Mālik, *Ashriba*, bāb 14). According to the first chapter of the same *kitāb*, however, 'Umar punishes a man who had become drunk on *ḥilā'*. Juice from grapes, prepared by pressing them only, is considered as wine. Ṭāriq b. Suwaid al-Haḍrami said to the Prophet: We have in our country grapes which we press. May we drink the juice? He said: No. This negative answer is given three times and when Ṭāriq asks whether the juice may be given the sick to drink,

Muhammad answers: It is no medicine, it is sickness (Ahmad b. Hanbal, v. 292 sq.). And not only those who drink and sell wine are cursed by Muhammad, but also those who press grapes and have them pressed in order to drink the juice (Ibn Mādjā, *Ashriba*, bāb 6).

Another question of importance arose, in connection with spirits: Had they to be considered as wine or not? All the *madhhab*'s, except the Hanafis, have answered the question in the affirmative sense. They have consequently extended the prohibition of wine, in accordance with the intention underlying it. Tradition, which is the best source for the history of the origin of several institutions, shows that the question belongs to the much debated ones. The standard *ḥadīth* which is found very frequently in the classical collections runs as follows (I pick out Muslim's version *Imān*, trad. 26, because it contains important details): "Some men of 'Ald al-Kais went to the Apostle of Allāh and said to him: O Prophet of Allāh, we are a tribe belonging to Rabī'a; between us and yourself dwell the infidels of Muḍar, so that we can only reach you in the sacred month. Tell us therefore what we have to tell our tribespeople which will open Paradise for us if we do cling to it. The Apostle of Allāh answered: I order four things and I forbid four things. Serve Allāh without associating anything with him. Perform *ṣalāt*, deliver *zakāt*, fast the month of Ramaḍān and deliver the fifth part of booty. And I forbid four things: *dubbā'*, *ḥantam*, *mucāffat* and *naḳīr*. They asked: O Apostle of Allāh, how do you know what the *naḳīr* is? He said: Well, it is a palm-trunk which you hollow out; then you pour small dates into it and upon them water. When the process of fermentation has finished, you drink it with the effect that a man hits his cousin with the sword. — Now among these men there was someone who had received a blow of the sword in this way. He says: I had concealed it out of shame before the Apostle of Allāh. Then I said: But from what vessels should we drink then, O Apostle of Allāh? He answered: From leather skins, the mouthpieces of which are smeared with pitch. They answered: O Prophet of Allāh, our country teems with mice so that no single skin can be kept whole. Then the Prophet of Allāh answered: Even though the mice should eat them, even though the mice should eat them, even though the mice should eat them".

This tradition did not meet with general approval. It is said that the Anṣār or other people complained of their difficulty in finding the skins necessary for preserving drinks without their becoming fermented. Thereupon the Prophet is said to have withdrawn his prohibition, wholly or partly (Bukhārī, *Ashriba*, bāb 8; Muslim, *Ashriba*, trad. 63—66 etc.). In some versions of this tradition there occurs the restriction, that all fermented inebriating drinks remain prohibited. Innumerable are the traditions which only contain the rule: All drinks which may cause drunkenness are prohibited in any quantity (*kull muskir ḥarām kathīruhu wa-ḥalīluhu*) and this rule has passed into many books of *fiqh* (Bukhārī, *Maḥḥal*, bāb 60; Muslim, *Ashriba*, trad. 67—75; Ahmad b. Hanbal, i. 145; ii. 15 bis; iii. 38; iv. 87; v. 25 sq.; vi. 36 etc.). Of special traditions prohibiting fermented drinks may be mentioned the following. It is forbidden or disapproved of to

sell raisins if they are to be used for preparing *nabidh* (Nasā'ī, *Ashriba*, bāb 51, 52). It is prohibited to mix together different kinds of fruits so that the mixture should become intoxicating. This tradition occurs frequently; see e.g. Bukhārī, *Ashriba*, bāb 11; Muslim, *Ashriba*, trad. 16—29; Nasā'ī, *Ashriba*, b. 4—17; Ibn Sa'd, viii. 360; Aḥmad b. Ḥanbal, i. 276; ii. 46; vi. 242, 292. But each of these kinds may be used separately for preparing a non-fermented drink (Muslim, *Ashriba*, trad. 81—83; Nasā'ī, *Ashriba*, bāb 14—18 etc.).

It can easily be seen that the difficulty in this matter was caused by two circumstances. People were accustomed to prepare from all kinds of dates, from raisins and other fruits, drinks which only became inebriating if they were preserved a long time and probably also if they were prepared after special methods. Where was the line of demarcation between the allowed and the prohibited kind? Several collections of traditions went so far as to mention *nabidh* among the drinks prepared by Muḥammad's wives and drunk by him (Muslim, *Ashriba*, trad. 79—89; Aḥmad, i. 232 sq., 240, 287, 320 sq., 336, 355, 369, 372; ii. 35; iii. 304, 307, 313 sq., 326, 379, 384 etc.). Abū Dā'ūd (*Ashriba*, bāb 10) and Ibn Maḍja (*Ashriba*, bāb 12) have preserved a tradition on this subject which is instructive. I translate Ibn Maḍja's version: Says 'Ā'isha: "We used to prepare *nabidh* for the Apostle of Allāh in a skin; we took a handful of dates or a handful of raisins, cast it into the skin and poured water upon it. The *nabidh* we prepared in this way in the morning, was drunk by him in the evening; and when we prepared it in the evening he drank it the next morning". In another tradition of the same bāb Ibn 'Abbās says that the Prophet used to drink this *nabidh* even on the third day; but what was left then, was poured out.

All this could, however, not persuade the majority of the *ṣaḥīḥ*'s to declare *nabidh* allowed; three of the *madḥḥab*'s as well as the *Shī'a* prohibit the use of *nabidh*. The Ḥanafī school, on the other hand, allows it, when used with moderation, for medicinal purposes etc.

It would take us too far to give here a detailed survey of the opinions of the *ṣaḥīḥ*'s of all *madḥḥab*'s; it would be superfluous, to some extent at least, because the more important differences regard chiefly *nabidh* only. The following rapid survey is based on the *Fatāwā 'Ālamgīrī*, vi. 604 sqq. (cf. Sha'rānī's *Mizān*, Cairo 1279, p. 192 sq.).

Allowed according to the *idjīmā'* is every non-fermented, sweet drink.

Prohibited (*ḥarām*), according to the *idjīmā'*, are wine and *sakar* of every kind. As to wine there are six cases: to drink it in any quantity or to make use of it is *ḥarām*; to deny this is *kuf'r*; to buy, sell, present it etc. is *ḥarām*; no responsibility (*ḍimān*) rests on him who spoils or destroys wine (*mutlif*); whether wine is a possession (*māl*) is an unsettled point; it is *nadjīs* just as blood and urine; who drinks any quantity of it is liable to punishment.

Several kinds of products prepared by means of grapes (*bādikh*, *munaṣṣaf*, etc.) are prohibited according to the majority ('*amma*') of the *ṣaḥīḥ*'s.

Allowed, according to the majority of the *ṣaḥīḥ*'s are *tilā'* (vide supra) or *muthallath* and *nabidh*

from dates with the restrictions mentioned above. So is juice from grapes when the process of cooking has made it to evaporate two thirds. Muḥammad (viz. al-Shaibānī, q. v.) has a deviating opinion on this point.

As to the punishment of him who drinks wine, ḥadīth tells us that Muḥammad and Abū Bakr were wont to inflict forty blows by means of palmbranches or sandals (Bukhārī, *Hudūd*, bāb 2—4; *Hudūd*, trad. 35—37). Under 'Umar's caliphate, however, Khalid b. al-Walid reported to him that people were indulging in prohibited drinks. Thereupon 'Umar consulted the *ṣaḥāba* who advised him to fix the number of blows at eighty, a number suggested by the Qur'ān which prescribes that those who accuse *muḥṣanāt* of *zinā'*, without being able to prove their accusation by the aid of four witnesses, shall be punished with eighty blows (*sūra* xxiv. 4).

Repeated drinking of wine, according to some traditions, was punished by death at Muḥammad's order (Abū Dā'ūd, *Hudūd*, bāb 36; Ibn Maḍja, *Hudūd*, bāb 17; Aḥmad b. Ḥanbal, ii. 136, 166, 191; iv. 93, etc.). It is, however, added in some traditions that capital punishment in such cases is not according to the *sunna* of the Prophet (Aḥmad b. Ḥanbal, i. 125, 130; cf. Ṭayālīs, N^o. 183).

The different *madḥḥab*'s have adopted 'Umar's view; drinking wine is punished with eighty blows; if the transgressor is a slave this number is however reduced to forty, because in the Qur'ān the punishment of the handmaid's *zinā'* is fixed at half the amount of blows with which the free woman is punished (*sūra* iv. 30). The *Shāfi*ites however cling to the practice ascribed to Muḥammad and Abū Bakr; with them the number of blows is consequently forty, resp. twenty (see Zurkānī, iv. 42; Nawawī in Muslim, iv. 156).

The prohibition of wine and spirits (according to three of the four *madḥḥab*'s) is one of the distinctive marks of the Muslim world; its consequences can hardly be overrated. This is not seriously affected by the fact that transgressors have been numerous, according to literary evidence. The praise of wine, not uncommon in pre-Islamic poetry, remained one of the favourite topics also of Muslim poets (cf. the wine-songs by Ibn al-Mu'tazz, Abū Nuwās etc.) and at the court of the Caliphs wine was drunk at revelling parties as if no prohibition existed at all (see e.g. The 1001 Nights, *passim*). Even the common people could not always and everywhere refrain from their national drink, date-wine of several kinds; the caliph 'Umar b. 'Abd al-'Azīz deemed it necessary to promulgate a special edict in order to abolish this custom (see v. Kremer, *Culturgeschichte der Streifzüge*, Leipzig 1873, p. 68 sq.).

Wine has a special place in the literary products of the mystics, where it is one of the symbols of ecstasy. In this point they only took over the language of their Christian and non-Christian predecessors. As early as Philo of Alexandria ecstasy is compared with intoxication (see especially his *De Vita Contemplativa*). Among the Ibāḥiya, language may have been a reflex of practice; but this cannot be said of Sūfī's in general, who, on the contrary, clung to the ascetic methods of the *via purgativa*. As to Ḥāfiẓ' wine- and lovesongs, it is an unsettled point whether they are merely metaphorical or not.

(A. J. WENSINCK)

KHAMS(A) (A.), the number five. This number has a magical character, from the fact that it is the number of the fingers of the hand and that it is found in certain Muslim dogmas (five foundations of belief, five religious duties, five daily prayers, prescribed by the canon). The hand stretched out with the palm open and the fingers expanded is a symbol that protects against the evil eye; in North Africa we frequently find, among Jews as well as Muslims, a hand painted on the door with the fingers spread out. Amulets in this form are made of gold and silver, called *khams*, *khoms* by the natives and "hands of Fatma" by Europeans. Thursday, the fifth day of the week, is favourable for magic rites against the evil eye and is the day chosen for pilgrimages to the tombs of famous saints to destroy the effects of the evil eye.

(CL. HUART)

KHAMS(A), **KHAMSE**, the same word as the preceding, pronounced in the manner of the Arabs of the East, the Persians and the Turks; the name given to collections of five poems of which the most famous are those of al-Nizāmi, also called *Pandj-gandj* "the five treasures": *Makhsan al-Asrār* (559 = 1164), *Khusraw u-Shirin* (576 = 1180), *Leilā u-Madjnūn* (584 = 1188), *Haft-paīkar* (593 = 1197), *Iskandar-nāma* (597 = 1201); of Amir Khusraw of Dihli: *Maṭla' al-Anwār* (698 = 1299), *Shirin u-Khusraw*, *Madjnūn u-Leilā* (same year), *Āyina-i Sikandari* (699 = 1300), *Hasht-bikisht* (701 = 1302); of Khwādji Kirmāni: *Rawḍat al-Anwār* (finished in 744 = 1343), *Humāi Humāyūn*, *Kamāl-nāma*, *Gul u-Nawrūz*, *Djavarhar-nāma*; of Kātibī, unfinished; we have the *Gulshan-i Abrār* and a *Leilā u-Madjnūn* about 838 = 1434; of Djāmi: selection from the *Haft-awrang*, and including the *Tuhfat al-Ahrār* (886 = 1481), *Subhat al-Abrār*, *Yūsuf u-Zulaikha* (888 = 1483), *Leilā u-Madjnūn* (889 = 1484), *Khirad-nāma-i Sikandari*; of Hāfi, probably unfinished, containing: *Leilā u-*

Madjnūn, *Haft-Manḡar*, *Shūn u-Khusraw*, *Tīmūr-nāma* (between 917 = 1510 and 927 = 1521); of Faiḍī: *Markaz-i Adwār*, *Sulaimān u-Bilqīs*, *Nal-daman*, *Haft-kishwar*, *Akbar-nāma* (1003 = 1595), unfinished; of Ḥasan b. Saiyid Faḥ Allāh: to the glory of Muḥammad and the four first caliphs (of 1038/1628 to 1039/1630). The *Khamsa-i Nāḩa* of Mollā Tughrā'i Mashhadī is a diatribe against five persons at the court of Golconda. The author died at the beginning of the reign of Awrangzēb (about 1069 = 1659).

Turkish poetry also contains a certain number of works of the same kind such as those of Ḥamd Allāh Čelebi, called Ḥamdī, son of *Shaiḫ Aḳ Shams al-Dīn*, d. 914/1509: *Yūsuf u-Zulaikha*, *Leilā u-Madjnūn*, *Mawlid-i Nabī*, *Tuhfat al-Ushshāk*, *Muḥammadiya*; of Fuḍūlī of Baghdad, d. 963/1556 (mentioned by Latīfī and Kinālī-zāde, probably wrongly); of the Albanian Yahyā, bey of Dukagin, d. 983/1576: *Shāh u-Gadā*, *Yūsuf u-Zulaikha*, *Kitāb-i Uzūl*, *Gundina-i Rūz*, *Gulshen-i Anwār*; of Mu'idi of Kalkandilen, contemporary of Bākī; of Bihishti, d. 979/1572: *Wāmīk u-Adhrā*, *Yūsuf u-Zulaikha*, *Husn u-Nigār*, *Suhail u-New-Behār*, *Leilā u-Madjnūn*; of Sinān b. Suleimān, surnamed Aṭā'i and son of New'i, d. 1044/1634 (really only contains four poems, the fifth being the *Dīwān* of the poet): *Subhat al-Abkār*, *Heft-khwān*, *Nafhat al-Azhār*, *Sāḩī-nāma*. The *Khamsa-i Rūmī* of Rewanī of Andrinople, d. 930/1524, mentioned by Sehi, probably never existed. That of Nergisī is in prose.

Mir 'Alī Shīr Nawā'i has also collected under the same title five poetical compositions in Eastern Turki (*Catalogue* Quaritch, Jan., 1916, p. 23; E. Blochet, *J. A.*, 1916, Series II. vol. viii. 400). The name *Khamset al-Mutahayyirīn* is given to a biography of Djāmi in five parts (Belin, *J. A.*, 1861, Series 5, vol. xvii. 303).

Bibliography: Ch. Rieu, *Catalogue of Persian MSS. Brit. Mus.*, p. 504, 611, 615, 620, 637, 645, 652, 671, 680; E. J. W. Gibb, *Ottoman Poetry*, i. 145, ii. 8. (CL. HUART)

KHAMS(A) (abbreviated from *wilāyat-i khamsa* = the five provinces), the name of a province in Persia of which Zēdjan is the capital; Sultāniya also forms part of it. It is a small administrative division, forming quite recently a detached district of 'Irāk 'Adjamī; it lies between the provinces of Adharbaidjān and Kāzwin and has 11,480 inhabitants. It appears in the Budget with the following statistics: revenue in cash 819,880 krāns, in cereals 10,540 kharwār (of 649 lbs.), in straw 9,000 kharwār; value of payments in kind 978,638 krāns. Local expenditure, including the remissions of taxation, 19,129 krāns. The five towns which gave the name of this district are Abhar, Farum, Ghelab, Arman-khāne and Zerin-Ābād. The country is inhabited by the nomad tribe of Afshār.

(CL. HUART)

KHĀN (T.), a Turkish title: originally a contraction of *Qaghan*, Arabic *khāqān* [q.v.]; in this meaning *Kān* occurs alongside of *Qaghan* as early as the Orkhon inscriptions of the viiith century A. D.; cf. the Tonyukuk inscription in W. Radloff, *Die alttürkischen Inschriften der Mongolei*, 2nd Series, St. Petersburg 1899, p. 3, and

the quotations in the glossary, p. 93. In the Muslim period the word *Khān* seems first to appear towards the end of the ivth (xth) century on the coins of the Ilēk-Khāns [q. v., ii. 465] and particularly in the vth (xth) century in the texts relating to this dynasty (cf. the quotations *loc. cit.*) Not till the Mongol period is a distinction made between the *Khaghan* or *Khān* as supreme ruler and the *Khān* as ruler of a separate portion of the whole empire.

In course of time *Khaghan* and *Khākan* were completely ousted from the popular language by *Khān*. In the last centuries before the Mongol conquest, the Turkish *Khān* like the Arabic *Malik* and the Persian *Shāh* was used as a princely title in contrast to the supreme title *Sultān*, *Sultān* only retaining the meaning in Western Asia and Egypt. In Central Asia in the various kingdoms into which the Mongol empire broke up *Khān* was the real sovereign title and *Sultān* the title of each individual member of the dynasties descended from Čingiz Khān. In the administrative system of the modern Persian kingdom founded by the Safawids the *Sultān*, as governor of a smaller district, was under the *Khān*, who was governor of a large province. (W. BARTHOLO)

KHĀN DJAHĀN LŌDĪ. An Afghān favourite of the emperor Djahāngīr [q. v.], who called him his son (*farzand*). His original name was Pīr Khān, and he was a son of Dawlat Khān and descended from the Dawlat Khān Lōdī, who was supreme in the Panjāb when Bābur entered India. Pīr Khān first had the title of Šālābat Khān, and afterward that of Khān Djahān. When Djahāngīr died, he behaved badly, made the mistake of not recognising Šāh Djahān, and of not even answering his autograph letter, and sold the Balāghāt of the Deccan to Nizām al-Mulk. The result was that he was superseded by Mahābat Khān, and though he got another appointment, and came to court, he was no longer a favourite, and became apprehensive that he would be arrested. So he fled at night from Agra with his family and dependents. He was pursued and attacked at the Cambal, and many of his people were killed. He continued his flight towards the Deccan, but eventually was killed in Central India in the fourth year of the reign of Šāh Djahān, to whom his head was sent.

Bibliography: *Tārikh-i Khān Djahān Lōdī*; Djahāngīr, *Memoirs*, transl. by A. Rogers and H. Beveridge, i. 87 etc.; Elliot-Dowson, *Hist. of India*, v. 67, vi., vii.; *Pin-i Akbarī*, transl. Blochmann, p. 502; *Bādshāhnāma*, i. (Elliot-Dowson, vii. 20); *Khawāfi Khān*, *Muntakhab al-Luhūb*. (H. BEVERIDGE)

KHĀN KHĀNĀN, "Lord of Lords", a title given by the Dihli emperors to their highest officer. It corresponds to the Turkish *Beglerbeg*. It was in use in Bābur's time, the title having been given to Dilāwar Khān, son of Dawlat Khān. The most famous *Khān Khānān*'s were Akbar's ministers, Bairām and his son 'Abd al-Rahīm. — *Khān Dawrān*, "Lord of the age", and *Khān Djahān*, "Lord of the world", are similar titles. (H. BEVERIDGE)

KHĀN-I DJAHĀN MAKBŪL KHĀN, originally a Hindu by name Kunnū or Kattū, became a Muslim on entering the service of Muḥammad b. Taghlaq [q. v.], who gave him the title of Kawām al-Mulk and made him governor of Multān; he afterwards became *nāib wazīr* and dis-

tinguished himself by his administrative ability; on the accession of Fīrūz Shāh Taghlaq [q. v.], he was raised to the position of *宰相* and enjoyed the confidence of his royal master for 18 years until his death in 770.

Bibliography: Shams-i Su'ādī 'Afif, *Tārīkh-i Fīrūzshāhī*, (Bibl. Ind.), Calcutta 1888—1891, p. 62 sqq., 211 sqq., 394 sqq.

KHĀNA (f.), house (from the root *khān*, "to dig", aspirated form from *khānan*): hence: "local, a square on a chess-board". It is found in numerous combinations such as *Kitāb-khāna*, *kutub-khāna*, "library"; *mukhtār-khāna*, "regimental band"; *ṭabl-khāna*, "kettledrum band", in the time of the Mamlūk Sultāns of Egypt; *top-khāna*, "arsenal of artillery"; *ab-dast-khāna*, "water-closet", etc. and is also found in Anglo Indian hybrids such as *gym-khāna*, "sports meeting" in which *gym* is an abbreviation for *gymnasium* (Vule. *Hobson-Jobson*, s.v.). (CL. ILIART)

KHĀNBALĪK (usually written Khān Bālīk), the "Khān's town", the name of Peking as capital of the Mongol Emperors after 1264 in Eastern Turki and Mongol and afterwards adopted by the rest of the Muslim world and even by Western Europe (*Cambaluc*, variants in S. Hallberg, *L'Extrême Orient dans la littérature et la cartographie de l'Occident*, Göteborg 1906, p. 105 sq.). According to Rashid al-Dīn (ed. Berzin, *Trudi Vost. Otd. Akh. Obsht.*, xv, Persian text, p. 34), Peking (Chinese then Čingdū, i. e. the middle capital) was called Khānbālīk even earlier by the Mongols, apparently as one of the chief towns of the Kin dynasty (cf. the art ČINGIZ KHĀN). As everywhere in the Mongol Empire, Muḥammadans enjoyed considerable prestige in Khānbālīk also. Maḥmūd Yalawāc b. Muḥammad al-Khawārizmī (W. Barthold, *Turkestan* etc., i. 139), who died there in Rabi' I, 652 (April 21—May 20, 1254), was several times confirmed in office as governor of North China (Rashid al-Dīn, ed. Blochet, p. 85 and 309). On the assassination of the vizier Aḥmad Fanāketi in 1282 and the events that followed see *ibid.*, p. 508 sqq.; Marco Polo, ed. Yule-Cordier, i. 415 sqq. On the town and its situation on the Imperial Canal cf. Rashid al-Dīn, ed. Blochet, p. 455 sqq.; on the distances between Khānbālīk and other towns by the land routes see Waṣṣāf, ed. Hammer, p. 24, Indian ed., p. 12; *N. E.*, xiii. 225 sq. (al-ʿUmari); Sharaf al-Dīn Yazdī, *Zafar Nāme*, Indian ed., ii. 219 sq. The name Khānbālīk for Peking was also retained after the decline of the Mongol empire in Central and Western Asia and also in Europe. On the five months' sojourn (Dec., 1420—May, 1421) of the embassy of Sultān Šāh Rukh in Khānbālīk see *N. E.*, xiv. 320 sqq.; the original narrative, which survives in one MS. only (Elliot 422 in Oxford, Bodleiana = *Zubdat al-Tawārikh* of Ḥāfiz-i Abrū, f. 390b sqq.), has so far not been fully investigated (brief account in W. Barthold, *al-Muzaḥfariya*, p. 27; *M. I.*, p. 107). There was a mosque in Peking even in those days. Khānbālīk is mentioned as late as the early years of the xviiith century in an anonymous history written in Kāshghar (*Zap.*, xv. 251). In the reports of a Russian Ambassador of the xviiith century, the form Kambālīk (with variants) is used, under Western European influence (Ju. Arsenyew, *Puteshestviye . . . ruskago poslannika Nik. Spafariya*, in the *Zap. Geogr. Obsht. zu otd. etnogr.*, x., vip. 1,

Index. Spafari (embassy 1675) is the first to write *Piezīn*, under the influence of the North Chinese pronunciation; this pronunciation also explains the names in the modern literature of Central Asia for Pekin (Bačīn or Bādjīn) (e.g. *Tārīkh-i Amā-niya*, p. 24; cf. *Zap.*, xvii. 188 sqq.).

Bibliography (besides the references in the text): Ch. Schefer, *Notices sur les relations des peuples musulmans avec les Chinois, depuis l'extension de l'islamisme jusqu'à la fin du XV^e siècle, Centenaire de l'École Or. Vie.*, Paris 1895, p. 1—43. (W. BARTHOLO)

KHANDAK (P., A.), ditch, moat. On the etymology of the word see A. Siddiqi, *Studien über die Persischen Fremdwörter im klassischen Arabisch* (Göttingen 1919), p. 73; it was taken over by the Syriac speaking population of Northern Mesopotamia in early times, as it appears already in the *Book of the Himyarites* (first half of the vith cent.; ed. Moberg, p. 30, l. 14) in the form *Kandaḳ*. Consequently it may be an Aramaic loanword in Arabic. Tradition, however, connects its first use in the latter language with Salmān al-Fārisī [q.v.], who, it is said, advised Muḥammad to protect Madīna in the year 6 A.H. against its beleaguers by digging a moat, a means of defence hitherto unknown in Arabia but usual in Persia.

The episode of Madīna's beleaguement in that year has ever since been connected with the term *khandak* or *aḥzāb* (allies). The *sira* as well as other historical works give different reports concerning the extension of the moat and the part of the town it was meant to protect. Still it may be taken as probable that it started from the marketplace and the hull called *Sal'*, and from there extended chiefly to the North and North-East, partly also to the South.

The digging of the *khandak* is often mentioned in tradition because Muḥammad himself took part in the work (Bukhārī, *Ḍiḥād*, b. 33, 34, 161; Muslim, *Ḍiḥād*, trad. 125—130 etc.). He is said to have hewn a large stone-block in pieces, so that flashes of light emanated from it which shone into various parts of the world (Ibn Sa'd iii./i., 59 sq.). Several lines of poetry in *raḍīas* uttered by him or his companions during the work are recorded, amongst them the well-known *du'ā'* in behalf of Muḥādjirūn and Anṣār. For further information see MADĪNA, MUḤAMMAD.

Al-Khandak is also the name of several places; see Balādhurī, *Futūḥ*, ed. de Goeje, p. 85; Yāqūt, *Mu'djam*, s.v.

KHWĀNDAMĪR, Persian historian. His real name was Ghīyāth al-Dīn, and he was the son of Khwādja Hamām al-Dīn b. Khwādja Djalāl al-Dīn b. Khwādja Burhān al-Dīn Muḥammad Shīrāzi. The historian Mīr Khwānd [q.v.] was his maternal grandfather, and Nizām al-Dīn Sulṭān Aḥmad Ṣadr was his maternal uncle. His father was for many years the minister of Sulṭān Maḥmūd of Samarkand, who was Bābur's paternal uncle. Khwāndamīr must have been born about 1475, and probably in Herāt, where his maternal grandfather lived. The *Haft Iklim*, however, enters him under Bukhārā.

His grandfather Mīr Khwānd seems to have been originally an inhabitant of Balkh. He entered the service of Badī' al-Zamān, eldest son of Sulṭān Ḥusain, and was with him in 1502 at Pul Čirāgh and heard him tell of his adventures after his defeat at that place by his father, five or six years before. After Sulṭān Ḥusain's death in May 1506, Khwāndamīr was with Badī' al-Zamān at Maral in northern Persia. In the spring of 1507 when there was an idea of opposing Shāibānī's advance, Badī' al-Zamān and his brother and co-king Muzaḥfar directed Khwāndamīr to go to Kaṇdahār and induce Shāh Beg Arghūn to join them. He got as far as Herāt, but delay was caused by the death of Djudjak Begam, daughter of Badī' al-Zamān, and also by the near approach of Shāibānī, and so he did not go to Kaṇdahār. He also once went on a fruitless embassy to Khusrav Shāh at Kunduz. A feeble attempt was made at Maral to encounter Shāibānī, but the princes ran away, and the gallant Dhu 'l-Nūn Aighūn was slain. The march upon Herāt followed in March 1507, and Khwāndamīr and his brother's son 'Uṭmān, who was inspector (*muḥtasib*) for the city, were deputed by the inhabitants to interview Shāibānī at his camp, and to obtain terms of surrender. The nephew went and succeeded in having an interview, though he was stripped and pillaged on the way. Khwāndamīr remained in Herāt after its capture, and he has given an amusing account of how he and his friends were squeezed by the Uzbeks. He was also in Herāt when Shāh Ismā'īl defeated and killed Shāibānī and took possession of the city in 1510. But in 920 (1514) we find him in retirement at the village of Pasht or Bāshṭ in Ghardjīstān, in northern Persia (not in Georgia, as Elliot has it; see de Sacy on Ghardjīstān in *Mines de l'Orient*, i. 321), where he occupied himself in writing his books. He now attached himself to the worthless Muḥammad Zamān, eldest son of his old master, and shared his fortunes for a while, at Balkh, etc. But when Muḥammad Zamān was preparing to go to Kaṇdahār, Khwāndamīr obtained leave to return to Pasht. He must have afterwards settled in Herāt, for he was there in July 1527, when he left it to go to Kaṇdahār. Nor did he stay long in Afghānistān, for he went off to India in March 1528. He reached Āgra and presented himself before Bābur in September, and in 1529 accompanied him to Bengal and was with him at the *trimohini*, or junction of the Sargdū and Ganges (*Ḥabīb al-Siyar*, lith., ii. 84, end of 4th part of vol. 2). Bābur died in the end of 1530, and Khwāndamīr afterwards served his son, Humāyūn, and wrote a panegyric on the latter's buildings and devices, which he called the *Kānūn-i Humāyūnī*, or the *Humāyūnnāma* (there is a MS. of it in the British Museum), and an account of the book, accompanied by extracts, is given in Elliot's *History of India*, v. 116). It is commonly said that Khwāndamīr died in 941 (1534—1535) during Humāyūn's expedition to Guḍjarat. But Farishta's account shows that the death, caused by dysentery, occurred on the return march from Guḍjarat. This was in 942, and Khwāndamīr was alive in that year, and made a chronogram on the death of his friend and fellow-traveller. Shihāb al-Dīn, the riddle-maker (cf. Badā'ūnī, Ranking's translation, i. 450). Khwāndamīr probably died in 942 or 943 (1535—1537). At his own request he was buried in Dihlī, near the tombs of Niẓām

al-Dīn Awliyā and Amīr Khusraw. His age was then probably about 60.

Khwāndamīr was a voluminous writer. His first work was the *Ḳuḥūṣāt al-Akḥbār* (or, the Perfection of Narratives). It was written in 905 (1499—1500) and dedicated to 'Alī Sher, whose library furnished him with the necessary materials. It is a youthful work, and naturally there is little in it that is derived from personal knowledge. It is in fact a preliminary sketch for the *Ḥabīb*, but in some places, e.g. in the account of the capture and death of Yādgar Muḥammad it is fuller than the latter work. Khwāndamīr's most valuable work, and the only one that has been printed, is the *Ḥabīb al-Siyar*. It was begun in 1521 and substantially finished in 1523—1524, though he made additions to it after visiting India. The *Ḥabīb al-Siyar* — so called after his second patron Ḥabīb Ullāh — is a General History from the earliest times down to near the end of the life of Ismā'īl Ṣafawī I. Naturally, it is chiefly valuable for the author's own time. The best parts are the lives of Sulṭān Ḥusain of Herāt and of Ismā'īl I. Incidentally, he gives much information about Shaibānī and Bābur, and his account of the latter is the best source that we have for the two great gaps in Bābur's "Memoirs". He is a conscientious author, for he wrote the *Ḥabīb al-Siyar* three times over. He is also accurate, and often writes from personal knowledge. His great fault is his style. It is turgid and rhetorical, like the *Anwār-i Suhailī* of his contemporary Ḥusain Wā'iz, and is sprinkled with tags of verse. He bestows too much praise on Sulṭān Ḥusain and Ismā'īl Ṣafawī, and he is also sometimes unnecessarily prolix. For instance, he writes with wearisome detail of the adventures of Muḥammad Zamān. The *Ḥabīb al-Siyar* has been lithographed at Tihārān and Bombay. Khwāndamīr was also the author of 7th vol. of the *Rawḍat al-Ṣafā*.

KHĀNDESH, the region bounded on the north by the Nabadā, on the east by the province or kingdom of Berār, on the south by the Adjanta Hills, and on the west by the kingdom of Guḍjarāt. It became an independent state in 1382, when Aḥmad Fārūqī, entitled Rādjā Aḥmad or Malik Rādjā, having joined the rebellion of Bahrām Khān Māzandarānī against Muḥammad Bahmanī I of the Dakan, was obliged to flee from that country and established himself in Khāndesh, which owes its name to him and his successors, who long eschewed the royal title and were content with that of Khān, whence their principality was known as "the country of the Khāns". The country, surrounded by powerful neighbours, was too small to be entirely independent, and its rulers owed some degree of allegiance at first to Mālwa and afterwards to Guḍjarāt, but the mutual jealousy of these two states preserved Khāndesh from absorption in either. Mirān Muḥammad I, the eleventh of the Fārūqī Khāns, was closely related to the ruling family of Guḍjarāt,

and was elevated to the throne of that kingdom in 1537, but died on his way to Aḥmadābād to assume his new dignity. His promotion encouraged his successors in Khāndesh to use the title of Shāh.

The administrative capital of the country was Burhānpūr, but the fortress of Asir afforded a safe refuge to its rulers when danger threatened. Asir was captured by Akbar in 1601 from Bahādūr Shāh, the seventeenth and last of the long line of Khāns, and when prince Dāniyāl was appointed viceroy of the Mughul Dakan, which included Khāndesh, his father bestowed upon the province, in his honour, the fanciful name of Dāndesh, by which it was known, in official records, as long as the Mughul empire lasted, though the newer name never displaced the older, and is now almost forgotten.

(T. W. HAIG)

KHĀNFŪ, in the third (ixth) and fourth (xth) centuries the Arabic name for the most important seaport of China, the centre of trade by sea with the western Asiatic peoples. As is now generally believed, this town "is undoubtedly Canton" (cf. above, i. 842). On the other hand, it used to be urged (by J. Klaproth, *J. A.*, 1824, v. 40 bis; I. Hallberg, *L'Extrême Orient* etc., Göteborg 1906, p. 213) that Khānfū was not Canton but the Gamfu or Ganfu mentioned by Marco Polo (transl. Yule-Cordier, ii. 189, and note on p. 199) lying much farther north, the harbour of Hang-chéu-fu. This idea is refuted by the fact that, in the Chinese annals of this period also, Canton is mentioned as the most important harbour and centre of foreign trade; in 758 A.D. Canton was plundered by Arab and Persian pirates (e.g. E. Chavannes, *Documents sur les Pou-kin (Turcs) occidentaux*, St. Petersburg 1903, p. 173). This event is not mentioned by the Arabs. Arabic sources (Abū Zaid al-Sirāfī in Reinaud, *Relation des voyages faits par les Arabes et les Persans dans l'Inde et la Chine*, Paris 1845, ii. 63 [text]; al-Mas'ūdī, *Murūdj*, i. 303; Ibn al-Aṭhīr, vii. 221) report the destruction of Khānfū by the Chinese rebel Huang-č'ao in 264 (877—878) when a great number (120,000 or 200,000) of Muslims, Christians, Jews and Zoroastrians perished. According to the Chinese annals, Canton was taken by Huang-č'ao in 879: in this connection also the importance of this town for foreign trade is mentioned (P. Pelliot in *T'oung Pao*, 1923, p. 410). The statements in Ibn Khordādhbeh (*B. G. A.*, vi. 69, text) regarding the location of Khānfū (four days' journey by sea and 20 by land from the most southerly Chinese harbour Lūkin, now Hanoi) can, as F. Hirth and W. W. Rockhill (*Chao Fu-K'ua*, St. Petersburg 1911, p. 22; with support from al-Idrīsī) observe, only refer to Canton. The reading Khānfū (Chinese Kuang [céu] fu) is now regarded as certain although the manuscripts frequently have *k* for *f* and even de Goeje (*B. G. A.*, loc. cit.) was inclined to prefer the reading Khānkū (for Hong-Kong). According to the Arab authorities, the town brought the government 50,000 dinārs a day (about £40,000) (Reinaud, *op. cit.*, text, p. 41). After the arrival of a foreign vessel, eunuchs were sent to it by the

Emperor to pick the finest merchandise (*ibid.*, text, p. 73 *sq.*); the road between Khānfū and the capital Khumdan (Si-ngan-fu) took two months to traverse (*ibid.*, p. 77 and 103). The prince (*malik*), i.e. governor of Khānfū, bore the title *Difū* (*ibid.*, p. 38; according to Reinaud, note 81 = ii. 27, for Chinese *Či-fu*. See also the article CHINA, especially p. 840—842). (W. BARTHOLO)

KHĀNIKĪN, a town in the 'Irāq, on the Hulwān-ḥai. The statement that Nu'mān V, king of al-Hira, was kept here a prisoner till his death by order of his overlord, the Sāsānian Khusrāw II, suggests that there was a fortress here in the Sāsānian period. The bridge of Khānikīn must also go back to Sāsānian times; it is built of brick and plaster in several arches across the river-valley. The number of arches is said to be 24, each 20 ells wide. At the Muslim conquest a battle seems to have been fought at Khānikīn for a "day of Khānikīn" is mentioned in Ibn al-Faḳīh. Under Arab rule Khānikīn was a small town, which made a poor impression on the traveller compared with the splendour of Baghdād, and was an unpretentious station on the road from Baghdād to Khurāsān. Ibn al-Mu'tazz praises the wine of Khānikīn. According to Mi'sār, a naphtha well at Khānikīn yielded a considerable revenue to the state. Lastly the Zutt were deported to (the region of) Khānikīn after their rising in lower Mesopotamia had been suppressed in 219 (834).

The place was often mentioned in recent years as a junction connecting a branch of the Baghdād railway with the railway system proposed by the Russians in Irān.

(P. SCHWARZ)

AL-KHANSĀ' is celebrated as the greatest poetess of the Arabs; her proper name was Tumādir, daughter of 'Amr b. al-Ṣharīd of the tribe of Sulaim, from which tribe originated among others the celebrated poet Zuhair b. Abī Sulma. Her father must have been a man of considerable reputation and wealth, for an account preserved in the *Kitāb al-Azmina* of al-Marzūkī (ed. Haidarabad, ii. 168 *sq.*) tells us that her father visited the fair of 'Ukāz with his sons Mu'āwiya and Ṣakhr in the 35th year of the Elephant and transferred some landed property at al-Wahīda in the Mikhlaḳ of Yathrib to Ma'mar b. al-Hārith, the grandfather of the poet Ḍjamāl, and al-Aṣma'ī says that the document then drawn up was still in the possession of the descendants of Ma'mar in the time of the caliph Hārūn al-Raṣhīd. Assuming the document to be genuine (which I doubt) the brothers of al-Khansā' 15 years before the Hidjra, in 607 A.D., were already old enough to take part in the affairs of their father, but the year of the Elephant was probably much earlier than the date generally assigned to it by Muslim authorities.

The earliest event in the life of al-Khansā' of which her biographers make mention is the proposal of marriage made by the aged Duraid

b. al-Ṣimma, who was killed in the year 9 A.H. The latter was bound in close friendship to her brother Mu'āwiya, both having promised to one another that the one surviving would mourn in an elegy the one who died first. Al-Khansā' was then a young girl and as the proposal came through her brother we may assume that her father was dead. It is significant for those times that the girl was permitted to consider the proposal of marriage, and after seeing Duraid her decision went against him. She even composed some verses against the rejected suitor in which she mocks him and his tribe and incidentally mentions that she had previously refused another man of the family of Badr, who is not otherwise known. After this she married a man of her own tribe of Sulaim named 'Abd al-'Uzzā (or, according to Ibn Kūtaiba, Rawāḥa b. 'Abd al-'Uzzā), who was the father of her son Abū Ṣhadjara 'Abd Allāh, who took a prominent part in the apostasy after the death of the Prophet and did not come into al-Medīna till the reign of 'Umar. This 'Abd al-'Uzzā probably died early and al-Khansā' married another man of her tribe, Mirdās b. Abī 'Āmir, by whom she had three sons, Zaid, Mu'āwiya and 'Amr, and probably her daughter 'Amra, who was her youngest child.

There is considerable difficulty in reconciling the chronological data and to arrive at even an approximate date for the birth of al-Khansā', but as her son Abū Ṣhadjara took a prominent part in the *Ridda* [q. v.] in the year 13 A.H. and may have been 30 years of age we may fairly assume that al-Khansā' was then between 40 and 50, probably even older. Al-'Abbās b. Mirdās, who was one of the poets of the Prophet, was certainly not her son, but the issue of an earlier marriage of Mirdās. Mirdās, an enterprising man, had attempted with some companions to cultivate some swampy ground near a spring, and as a revenge the spirits which inhabited that place contrived to kill him slowly, i.e. he most likely contracted a fever in this unhealthy place.

The turning-point in the life of al-Khansā', however, was the double bereavement, the loss of her two brothers Mu'āwiya and Ṣakhr. Mu'āwiya, in accordance with Arab custom, went out with 18 companions to make a raid upon the tribe of Murra. He had had a quarrel with a man of this tribe, Hāshim b. Ḥarmala, at the fair of 'Ukāz and after one unsuccessful attempt he invaded the land of the Murrites in which he was slain by Duraid, the brother of Hāshim. The duty of avenging the death of his brother fell upon Ṣakhr and he succeeded in murdering first Duraid, who had slain his brother Mu'āwiya and was slowly recovering from the wound he had received in the combat; then another Sulamī killed the former's brother Hāshim. Not content with this double revenge for his brother, Ṣakhr continued his raids upon Murra till he was fatally wounded by a man of Faḳās, an Asadī clan allied with the tribe of Murra. He lingered for a long time in his tent, apparently becoming a burden to his wife, and finally succumbed. All these events happened before the rise of Islām, but al-Khansā' lived long enough to see the final victory of the new faith and she is said to have been reproved both by the caliph 'Umar and by 'Ā'isha for her unreasonable mourning for her brothers, especially Ṣakhr. The new religion had no real influence upon her and her poems.

Fortunately several manuscripts of her elegies have been preserved and the indefatigable labours of Cheikho have put us in possession of a very complete collection of her verses. Naturally we find among the verses recorded in this edition many which have become ascribed to al-Khansā, because of her paramount reputation as a poetess of elegies, but there is no doubt in my mind that we have many poems which are perfectly genuine, especially as the tradition of the undoubtedly genuine pieces emanates from men of her own tribe from whom the poems were collected at a very early date. It is significant that in these genuine poems we find expressed the true sentiments of the *Djāhiliya*; there is no mention of a future life; only the blood of the slain demands retaliation and the despair is over and again expressed that no one can replace the departed, whose many manly virtues are enumerated and extolled.

Both the biography and the merits of her poetry have been critically and elaborately dealt with by Cheikbo, Gabrieli and Rhodokanakis so that it is easy to get a fairly complete estimate of her life and work from these authors. Whether al-Khansā introduced any new features into the *marthiya* or not is very difficult to say, but it is almost certain that her verses inspired many later elegists, among whom figures her own daughter 'Amra. If we contrast her verses with those of other elegists among her contemporaries — I will only to mention Mutammim and Abū Dhū'aib —, we must confess that her verses do not possess the poetical beauties which are found in them, but we have in the contrary in her poems, which are also much shorter, a far more genuine mourning; on the other hand, there is a certain monotony in the repetition of the same thoughts and ideas.

KHANSĀ or **KHINSA** — in Rashid al-Dīn, ed. Blochet, p. 489: *Khinkasāi*; in Waṣṣāf: *Khinzāi*; in the lithogr. edition (Bombay 1869), p. 21 sq.: *Khitrāi*; in the *Nuḥat al-Kulūb* of Ḥamd Allāh al-Kāzwinī (ed. I. e. Strange, p. 10, 7, and 261, 10): *Khinsāi*; vocalised *Khansā* by Ibn Baṭṭūṭa (ed. Defrémery and Sanguinetti, iv. 284 sqq.) and connected with the name of the celebrated poetess [see the art. *AL-KHANSĀ'*] — a town in China, capital of the kingdom of the Sung dynasty overthrown by the Mongols, Chinese formerly King Sheu, now Hang-chou-fu (cf. above, i. 845^a). The town is frequently mentioned in the Mongol period and described as one of the greatest commercial

cities of the world in those days: Muslim and Christian sources agree in saying there were a large number of Muslims there, as many as 40,000.

Bibliography: The Muslim sources are collected in Quatremere, *Histoire des Mongols de la Perse par Raschid-eldin*, p. LXXVII sqq., and in Ch. Schefer, *Centenaire de l'Ecole des Langues Orientales vivantes*, p. 19 sq., 23 sq.; the Christian sources in I. Hallberg, *L'Extrême Orient etc.*, Göteborg 1906, p. 425 sqq. Cf. especially the full description of "Quinsay" in Marco Polo, ed. Yule-Cordier, ii. 185—215. On the foreign colony in Hang-chou-fu see also Hirth and Rockhill, *Chao Fu-kua*, St. Petersburg 1911, p. 16.

(W. BARTHOLD)

KHĀNZĀDA BĒGAM. I. Daughter-in-law of Timūr, of high rank and much esteemed by him. She was wife of Mirān Shāh, and when he became mad, she went from Tibriz to Samarkand to report about him to her father-in-law on his return from India. She is mentioned by Clavigo and by Sharaf al-dīn Yazdi. (See Dawlat Khān, ed. Browne, p. 440).

II. Bābur's full sister and five years his senior. She was with him in Samarkand, and is said to have fallen in love with Shaibānī (see Muḥammad Ṣāliḥ, *Shaibānī-nāma*, ed. Vambéry). Bābur was obliged to allow the marriage in order to escape from Samarkand. Shaibānī divorced her aunt in order to marry her, but he afterwards also divorced her as he suspected her of favouring her brother. She had borne him one son, Khānān Shāh, who became governor of Balkh, but died young. After her divorce she married a Saiyid, Shaikh Hādī, but he, as well as Shaibānī, was killed in the battle of Marw. The emperor, Shāh Ismā'īl, sent her to Bābur. She afterwards married Mahdī (*Ḥabīb al-Siyar*, ii. 372, in account of Muḥammad Zamān). She died in Afghānistān in 1545. She had charge of Akbar, her grand-nephew, when his mother was in Persia. She seems to have been an excellent person, and was greatly respected. She delighted in the resemblance of the child Akbar to her brother Bābur (Gulbadan, *Memoirs of Humāyūn*, transl., p. 37).

(H. BEVERIDGE)

(KHARĀDJ) (A). The word *kharaḍj*, borrowed by the Arabs from the administrative language of the Byzantines, — Greek probably: *χορνήγία*; see P. Schwarz, *Die Herkunft von arabisch kharaḡ*, (*Grundsteuer*, in *Der Islam*, 1916, vi. 97 sqq. — originally meant the tribute in a general sense (just as did *qizya*) to which unbelievers in Muslim lands were liable. In the later *Fikḥ*-works the word *kharaḍj* sometimes still has this general meaning (see e. g. *Faḥ al-Karīb*, ed. van den Berg, p. 620). But by the first century A.H. *kharaḍj* — probably because it was taken to be an original Arabic word in the sense of "yield of the fields" — came to mean particularly the tax paid on landed property as opposed to the *qizya*, which was now used exclusively in the sense of "poll-tax". (When at the time of the great conquests the inhabitants of the newly acquired territory were left in undisturbed possession of their fields, it was, however, ordained that the soil should be liable to taxation. Henceforth the inhabitants were to pay a definite part of the harvest as a tribute to the Muslim treasury and remained bound to pay this *kharaḍj* for all time, even if they became converts to Islām) (see the art. *FAI'*).

They had been previously accustomed to a tax of this kind in these regions under Byzantine and Persian rule and the old methods of administering it were retained by the Arabs in many details. The tribute was paid mainly in kind. Definite contributions of corn or other foodstuffs were levied on villages or in some cases on districts. The Muslim officials turned these into money. Very considerable revenues reached the Muslim treasury in this way, especially in the first century A.H.

At the beginning of the 'Abbāsid period we find different scholars (e.g. Abū Yūsuf, al-Khaṣṣāf and Yahyā b. Ādam) still endeavouring to collect the traditions and legal enactments on the *kharāj* and arranging them in special chapters in their books. The regulations regarding the collection of the *kharāj* in these days were still a very important subject. But after the peoples of the conquered territories had generally adopted Islām they began gradually to drop payment of the *kharāj*. It was thought that with the payment of the tithe of the yield of one's fields (see the art. 'Uṣṣir) enough had been done and the *kharāj* in the end fell everywhere into desuetude. In the later *Fikḥ*-books we therefore only find the regulations regarding the poll-tax still given in detail, while those for the *kharāj* are only dealt with cursorily or even not at all. Only in al-Mawardi's special work on the Muslim system of administration do we find the regulations for the *kharāj* still dealt with in considerable detail.

(TH. W. JUVNBOLL)

KHĀRAK, an island in the Persian Gulf, the Aracia of the classical geographers. In the Arab period the island belonged to the Persian province of Ardashīr Khurra, and it was so still described by al-Balkhī. Al-Mas'ūdī allots it more closely to Djannāba which lies opposite it on the mainland. For shipping it was an important calling-place on the way from al-Baṣra to India and also to 'Uman. Ibn Khordādhbih therefore gives a description of it. In his time Khārak was 50 parasang from al-Baṣra, had an area of a square parasang and was cultivated, yielding cereals, grapes and dates. So recently as the end of the xviiith century, Niebuhr was impressed by the subterranean works partly cut out of the rock. That there was a large number of inhabitants and that they were Muslims is shown by al-Iṣṭakhri's mention of a pulpit-mosque on the island. In Yāqūt's time there was also a place of pilgrimage in Khārak, the alleged tomb of a son of 'Alī. The pearl-fishery of Khārak is often mentioned. The pearl-beds here are very deep; it is therefore natural that complaints of a poor harvest are made but occasionally very valuable specimens are said to have been found here.

In the xviiith century, the island was for a time in the possession of the Dutch East India Co.; a certain Baron von Kniphausen planned fortifications on the island for them and built a factory behind their walls. Later a town grew up in which Arabs and Persians settled. The Dutch E. I. Co. seems to have abandoned the island at the end of 1765 as its occupation proved too costly.

AL-KHARAKĪ, MUHAMMAD B. AHMAD B. ABĪ BISHR ABŪ BAKR BAHA' AL-DIN. He was brought by a Khwārizmshāh (Kutb al-Din Muḥammad [q.v.], 490—521 = 1097—1127, or Atsir, 521—551 = 1127—1156) to Merw and was one of the scholars at the court of this prince. He was also connected with Shams al-Din Abu 'l-Ḥusain 'Alī b. Naṣir al-Din Muḥammad b. al-Muzaṣṣar. For him he wrote the work entitled *al-Taḥsira* etc. (see below). Al-Kharakī died in Merw in 533 (1138/39). According to al-Baihaqi, al-Kharakī devoted much attention to philosophical problems as well as to astronomy.

Al-Kharakī treated of cosmography in two works, extant in numerous manuscripts. The shorter *al-Taḥsira fi 'Ilm al-Ha'a* deals only with astronomy while the fuller *Muntahā 'l-Idrāk fi Taḥṣim al-Aflāk* (on this see Ḥādijī Khālifa, N^o. 13, 124) also deals with conditions on the earth.

Very lucidly and with excellent illustrations al-Kharakī expounds the theory of al-Khāzin, also called Ibn al-Haiṭham, according to which the planets are supported not by imaginary circles but by massive revolving basins. This assumption avoids the difficulty that in the motion of a planet the ether is pressed in front of it and leaves a vacuum behind it.

Al-Kharakī's and Ibn al-Haiṭham's works were drawn upon by later Muslim astronomers and cosmographers while those of the West utilised Ibn al-Haiṭham's work *Fi Ha'at al-'Ālam* in Hebrew and Latin translations.

KHĀRDJE, one of the southern groups of oases in the Libyan desert. The expression *al-Wāḥāt al-Khār(i)dja* recalls the *Ὠάρις ἡ ἐξωτέρω* of the Greek writers, the word *Wāḥ* being a transcription of the Coptic *ⲟⲩⲁⲓ*.

The oasis of Khārdje consists of a large valley which runs from north to south for about 100 miles and averages 12 miles in breadth. Khārdje was reached until quite recently from Esne or Farshūt; from the latter place the journey took four

days by camel. A narrow-gauge railway (100 miles) now connects Farshūt with the little town of Khārdje, the present capital of the Great Oasis. In 1910 the oasis had about 7,000 inhabitants; the principal places, besides the capital, are Bāris, Bulāk and Djanāh. Dates are the principle article of commerce in this region. There are about 70,000 date-palms which produce the best fruit in Egypt. The cultivated area is about 4500 acres, but in recent years artesian wells have been dug with the object of putting a greater area under cultivation.

It is somewhat difficult to get accurate notices of the oases in the Arab writers (see the articles BAHRĪYE, DĀKHLE, AL-ARĀFRA. None of them had visited it and their terminology varies with their informants; we feel nevertheless that the ancient tradition still survived with them, which divided the Oases of the Libyan Desert into Little (= Bahriye), Inner (= Dākhle) and Outer (= Khārdje). In the notice he gives of them, al-Makrīzī is very hazy, for he repeats practically the same generalities for the Inner Oases as for the Outer Oases. One thing that all the geographers emphasise is the remarkable fertility of the Oases in general. Al-Yā'qūbī mentions especially the lands watered by running water at Khārdje, on which the grape and rice were grown in addition to palm-trees. This impression of great prosperity is all that one gains from the fairly long but confused text of Ibn Duqmāq: it is crammed with names of places. Al-Bakrī distinguishes two Inner Oases and al-Makrīzī uses the same expression, *al-Wāḥin al-Khāridjain*, but only when he is using an official document of the reign of Ṣalāḥ al-Dīn. As a matter of fact the oasis of Khārdje may well be divided into two distinct groups.

We are badly informed as to how the oases were settled in the Umayyad and 'Abbāsīd period: one *kūra* bears the name of Abshāya (the present Minshā'a, the ancient Ptolemais-Psoi) and of al-Wāḥāt. It seems very likely that it was the oasis of Khārdje that the Nubians ravaged in 339 (= 950). Abū Ṣālīḥ mentions, for the end of the Fātimīd period, the title *wāḥi al-wāḥāt* but in the course of a notice of the oasis of Bahriye. Under the Mamlūks, according to Ibn Faḍl Allāh, to whom al-Kāḷashandī adds nothing, the Sultān's government was not at first represented by any official. The oases were all granted as benefices (*iqṭā'*) to officers who administered them as best they could. Later the revenues of the oases were earmarked for the Sultān's private purse.

A description of the oasis of Khārdje and more particularly of its ancient temples is given in Brugsch, *Reise nach der grossen Oase al-Khargeh*, Leipzig 1878. The *Survey Department of Egypt* has published a fascicle containing a topographical and geological memoir of the region (Ball, *Kharga Oasis*).

AL-KHĀRID or GHAIL AL-KHĀRID, a valley in al-Djāwf in South Arabia which contains one of the few perennial streams in Arabia. According to J. Halévy, the river rises in the Bilād Arḥab near Shīra' in several springs, some of which are hot and contain minerals, and flows at first through a plain bordered by low hills. About 200 yards from its source, it becomes much broader and exceedingly full of fish. The people of Shīra' supply the market of Ṣan'a' with fish from the Khārid so that it is of considerable importance to them. The river also irrigates the oases of al-Djāwf. The water is held back by great dams and kept for the dry season when it is led off on to the fields every day by numerous channels. The Djāwf owes its rich vegetation mainly to the Khārid; it could hardly retain its verdure without this important water supply. According to E. Glaser, there is no water in the Khārid until Bait Djiḥaili; this place lies in the extreme north of the Bilād Arḥab. It drains the whole district of Ṣan'a', Khawlān and Sanḥān and is the most important stream of the Eastern Sarāt. In the land of Dhū Ḥusain it joins the second great wādi of this region, the Wādi Hirrān, and then flows through the whole of al-Djāwf. The natives told J. Halévy that the Khārid after twisting and turning round the Balad Hamdān disappears in the sand and only reappears again in Ḥadramawt, a feature which the Khārid, however, shares with other rivers of Arabia.

(ADOLF GROHMANN)

KHĀRIDJITES (A., *Khawāridj*, sing. *Khāridjī*), the members of the earliest of the religious sects of Islām, whose importance lies particularly, from the point of view of the development of dogma, in the formulation of questions relative to the theory of the Caliphate and to justification by faith or by works, while from the point of view of political history the principal part they played was disturbing by means of continual insurrections, which often ended in the temporary conquest of entire provinces, the peace of the eastern part of the Muslim empire during the two last years of the Caliphate of 'Alī and during the Umayyad period, and involuntarily facilitating first Mu'āwiya's victory over 'Alī, then that of the 'Abbāsīds over the Umayyads.

I. The Origins of the Khāridjī Movement.

Opportunity for the schism was given by the proposal presented to 'Alī by Mu'āwiya during the battle of Siffin (Safar, 37 = July, 657; cf. above, i. 284a) to settle the differences arising out of the murder of 'Uthmān, which had provoked the war, by referring it to two referees who would pronounce judgment "according to the Qur'ān".

While the majority of 'Alī's army readily adopted this proposal, either because they were tired of war or because the *Ḥurrā* on "Qur'an-readers" hoped there would emerge from this Qur'anic judgment the justification of the furious campaign they had conducted against 'Uthmān which had ended in the latter's assassination, one group of warriors, mainly of the tribe of Tamim, vigorously protested against the setting up of a human tribunal above the divine word. Loudly protesting that "judgment belongs to God alone" (*lā ḥukma illā li-llāhi*) they left the army, and withdrawing to the village of Ḥarūrā [q.v.], not far from Kūfa they elected as their chief an obscure soldier, 'Abd Allāh b. Wahb al-Rāsibi (i. 32). These first dissenters took the name *al-Ḥarūriya* or *al-Muḥakkima* (i. e. those who repeat the above phrase; cf. *R. S. O.*, viii. 789, note 1), which is often applied by an extension of meaning to the later *Khawāridj* also. This little group gradually increased on account of successive defections, especially when the arbitration ended in a verdict quite contrary to what the *Ḥurrā* expected (probably in Ramadān or Shawwāl, 37 = Febr.—March, 658); on this occasion a large number of partisans of 'Alī, including a number of *Ḥurrā* "went out" (*kharaḍja*) secretly from Kūfa (to which the army had gone during the truce) to join the camp of Ibn Wahb, who in the meantime had gone to the *Djūkhā* country on the left bank of the Tigris, to a place which commanded the exits of the roads from Fārs and the bridge-head, at which in those days stood the little village of Baghdādih, which later was to become the capital of the empire. The rebel camp lay along the Nahrawān canal. It is to this episode of the exodus from Kūfa that the sect of the *Khawāridj* owes its name ("those who went out"), more probably than to a general epithet describing them as having gone out of the community of the faithful, as it was later interpreted, probably at quite an early period (cf. the name of the Jewish sect of the Pharisees, which Ed. Meyer, *Ursprung und Anfänge des Christentums*, ii. 283—284, derives from the incident of their separation from the partisans of Judas Macchabeus in 163 B. C., quoting in support of his explanation the name of the *Khawāridj*). Another name given to those first *Khawāridj* (which has also been extended to their successors and seems to be the one which they gave themselves) is *al-Shurāt* (plural of *Shārī*), the "vendors" i. e. those who have sold their soul for the cause of God (this idea is found in several contemporary verses).

The extreme fanaticism of the *Khawāridj* at once manifested itself in a series of extremist proclamations and terrorist actions: they proclaimed the nullity of 'Alī's claims to the Caliphate but equally condemned 'Uthmān's conduct and disclaimed any intention of avenging his murder; they went farther and began to brand everyone infidel and outside the law who did not accept their point of view and disown 'Alī as well as 'Uthmān. They then committed many murders, not even sparing women. Little by little the strength of the *Khāridjī* army grew by the accession of other fanatical and turbulent elements, including a number of non-Arabs, attracted by the principle of equality of races in the faith that the *Khawāridj* proclaimed 'Alī, who had so far tried to avoid dealing with the rebels, in order to avoid a war

in his rear so long as he had to face the army of Mu'āwiya, after the rupture of the preliminaries of peace was obliged to take steps to avert the growing danger. He attacked the *Khawāridj* in their camp and inflicted a terrible defeat on them in which Ibn Wahb and the majority of his followers were slain (battle of Nahrawān, Šafar 9, 38 = July 17, 658). But the victory cost 'Alī dear. Not only was the rebellion not at all suppressed and was prolonged in a series of local risings in 39 and 40, but 'Alī himself perished by the dagger of the *Khāridjī* 'Abd al-Rahmān b. Muljam al-Murādī (cf. i. 284^a), the husband of a woman whose family had lost most of its members at Nahrawān. The tradition that a conspiracy of *Khawāridj* had aimed at killing simultaneously 'Alī, Mu'āwiya and the governor of Egypt, 'Amr b. al-'Ās, is almost certainly apocryphal.

It should be noted that the narratives of Arab historians on the origin of the *Khāridjī* movement are very confused and contradictory, and seem to have lost sight of the real connection between it and the arbitration; on the other hand the nature and date of the latter are quite uncertain. The reconstruction which is given above is that proposed by the writer of this article against the view of Wellhausen (followed by Lammens and Caetani) who thinks that the *Khāridjī* rebellion and the arbitration are independent of one another and even dates the battle of Nahrawān before the verdict of the arbiters.

II. The Wars of the *Khawāridj* under the Umayyads.

The wise and energetic administration of Mu'āwiya succeeding the feeble and vacillating rule of 'Alī prevented the agitation of the *Khāridjīs* from breaking out, but it did not succeed in extinguishing it any more than it succeeded in suppressing the feelings and aspirations of the *Shī'a*. Our sources mention several risings that broke out in Kūfa and Bašra during the twenty years of Mu'āwiya's reign (40—60 = 660—680), but they were promptly put down and only served to increase the roll of martyrs, the worship and avenging of whom became one of the features of the *Khāridjī* movement. It is at Bašra in particular, under the governors Ziyād b. Abihi and his son 'Ubad Allāh, that we find most risings and suppressions of risings. These insurrections, of which the most formidable was that of Mirdās b. Udayya al-Iamīmī Abu Bilāl [q.v.], settled the tactics of the *Khawāridj*, whose raids henceforth took the form of guerilla warfare and owed their successes mainly to the rapidity — which soon became legendary — of their cavalry (the names of some of their horses are preserved in Arabic works on hippology). They mobilised unexpectedly, swept through the country, surprised undefended towns and then retired rapidly to escape the pursuit of the government troops. The centres of concentration of the *Khawāridj* were the marshy country of the Baṭā'ih around Bašra (cf. AL-BATĪHA) and around *Djūkhā*, on the left bank of the Tigris, where their movement had originated, from which they could, if defeated, rapidly gain the mountainous lands of the Iranian plateaus.

It was only with the great civil war that broke out after the death of Yazid I, that in the midst of the general disorder the *Khāridjī* movement assumed serious dimensions and contributed more than anything else to render pre-

carious the pretender 'Abd Allāh b. al-Zubair's [q. v.], hold on the territory that he had at first been able to subdue. After the fall of Ibn Zubair, it was the Umayyad governors who had to wage a hard struggle with these indomitable rebels, enemies alike of victors and vanquished. It is at this time that we begin to distinguish among the Khawāridj half political and half theological subdivisions the origin of which is not at all clear, for the tradition which makes them appear at the same time quite suddenly at Baṣra on the death of Yazid has probably altered the real succession of events. In any case we henceforth find the Khawāridj breaking out throughout the eastern part of the empire (Syria was always free from them and Africa only knew them under the 'Abbāsids) into serious rebellions at the head of which they placed individuals who have given their names to the *Azāriḳa* or *Azraḳis* [see AZRAḲITES], the *Abādīya* or (better) *Ibādīya* [see ABADITES and AL-IBĀDĪYA] and to the *Ṣūfriya* [q. v.]. Of all these movements the most dangerous to the unity of the Muslim Empire and the most terrible on account of its ferociously uncompromising character was without doubt that led by Nāfi' b. al-Azraḳ [q. v.] which gave the Khawāridj temporary control of Kirmān, Fāis and other eastern provinces, constituted a permanent threat to the security of Baṣra and surrounding country, and which al-Muhallab b. Abī Ṣufra at first, and later al-Ḥadjdjad b. Yūsuf only overcame — in 78 or 79 (698 or 699) — after long years of effort which ended in the defeat and death of the last and most remarkable of the Azraḳi leaders, the valiant Kaṭari b. al-Fudjā'a [q. v.]. Less serious and less extensive and prolonged but quite as stubborn as the Azraḳi movement was the insurrection which was called after Shabīb b. Yazīd al-Shaibānī (76—77 = 696—697), although he did not begin it but was only its most distinguished leader; it began in the high Tigris country between Mārdin and Nišibin and its object was the conquest and devastation of Kūfa. The partisans of Shabīb, who advanced only in little bands of several hundred horsemen, but who often gathered round them large bands of malcontents, sowed terror throughout the 'Irāk, and having several times defeated al-Ḥadjdjad's troops were only destroyed by the help of an army of picked troops summoned from Syria. Shabīb himself perished, drowned in the Dujail, while trying to reach the mountains of Kirmān; his successors caused a certain amount of trouble to the governors of Yazīd II and Hishām but never again were a serious danger.

Arabia was another field of Khāridji activity, where during the government of Ibn al-Zubair between the years 65 (684/685) and 72 (691/692) their leaders Abū Tālūt, Nadjba b. 'Amir and Abū Fudaik captured in succession Yamāma, Ḥaḍramawt, Yaman and the town of al-Tā'if, and were only restrained by religious scruples from taking the holy cities. They were only destroyed after the intervention of al-Ḥadjdjad, but they left the seeds of future movements, especially in the eastern part of the peninsula.

Owing mainly to the energy of al-Ḥadjdjad, Khāridjism seemed definitely quelled. Another factor contributed considerably to its failure, namely the fanaticism and intolerance of the rebels, whose religious disputes ended in splitting their ranks

and sometimes resulted in the removal of their ablest leaders on the charge of having on some occasion failed to observe the absolute irreconcilableness of their principles. Another cause of weakness may be recognised in the eternal feud between the Arab element and that of the *Mawālī* which brought fatal consequences along with it, especially among the remnants of the Azraḳis after the death of Kaṭari b. al-Fudjā'a. But under the last Umayyads in the midst of the irreparable collapse of the central government, the Khawāridj again raised their heads, and resumed their exploits, this time not in little bands but in large bodies. While the two most serious risings of this period, those of al-Daḥḥāk b. Kaīs al-Shaibānī [q. v.] in the Dīazira and the 'Irāk and that of 'Abd Allāh b. Yahyā, surnamed *Tālib al-Haḳḳ*, and of Abū Ḥamza in Arabia (in the course of which Medina itself was occupied), ended in defeat, it is nevertheless true that the anarchy which they provoked destroyed the eastern rampart of Umayyad power and enabled the 'Abbāsid insurrection to penetrate more easily to the heart of the empire.

Under the 'Abbāsid Caliphs, the Khāridji movement may be said to be practically extinct in the 'Irāk and adjoining regions. Except for a few local risings, promptly suppressed, Khāridjism no longer presented any serious danger and only survived as a religious sect, without, however, any remarkable vitality or wide dissemination. In Eastern Arabia, on the other hand, in North Africa and later on the eastern coast of Africa, one of the principal branches of the Khawāridj, that of the Ibādīya (Abādīya), played an important part in politics, and even after this role was ended it continued to be of importance from the religious point of view. It survives in our day with its dogmas, its rites and its special laws (cf. IBADITES and AL-IBĀDĪYA).

III. The political and religious theories of the Khawāridj.

The Khawāridj, who, as we have seen, never had any true unity of military and political action, did not have either a uniform body of doctrines. Their teachings seem to us like the particular views of a number of independent sub-sects (the collections of *milal* number not less than a score including principal and subsidiary together), some of which represent theological schools as well as political movements of a collectivist character, while others confine themselves to expressing differences of individual opinions among the theorists of the sect. One article is common to all: it is that which treats of the question of the Caliphate, a question which has been the starting point of all the religious divisions in Islām. On this question the Khawāridj are opposed equally to the legitimism of the Shī'a and the quietism of the Murdjī'a. On the one hand they assert what Wellhausen aptly calls their "non-conformity" i. e. the obligation on believers to proclaim illegitimate and ipso facto deposed the *imām*, who has gone off the right path (this is how they justify their abandonment of 'Alī after his acceptance of the arbitration); on the other hand they declare every believer who is morally and religiously irreproachable to be capable of being raised by the vote of the community to the supreme dignity of the imāmate "even if he were a black slave". The result is that each of their leaders has been re-

cognised by them as *Amīr al-Mu'minin* although none of them had, among other things, the qualification of *Kuraishī* birth. Consequently the only other caliphs besides their own that they recognise as legitimate are Abū Bakr and 'Umar (the latter is particularly venerated by them); 'Uthmān only during the first six years of his reign and 'Alī till the battle of Šiffin.

Another capital article of Khāridjī heterodoxy is the absolute rejection of the doctrine of justification by faith without works. They push their moral strictness to the point of refusing the title of believer to anyone who has committed a mortal sin and regarding him as a *murtadd* (apostate); and their extreme wing, represented by the Azrakīs, says that he who has become an infidel in this way can never re-enter the faith and should be killed for his apostacy along with his wives and children. Of course all non-Khāridjī Muslims are regarded as apostates. Here we have the principle of *istī'rād* (religious murder) which we find applied from the beginning of the Khāridjī movement, even before it had been formulated in theory, and which found its completest application during the war of the Azrakīs. This ferocious principle forms a strange but not illogical contrast with the spirit of tolerance shown by the Khawāridj to non-Muslims and which in some of their schools goes so far as to recognise as equal to Muslims in every way those Jews or Christians who will pronounce the *shahāda* with the modification: "Muḥammad is the Apostle of God to the Arabs and not to us." The tendency to the levelling of the Arabs and the *Mawālī* (which was already a result of their attitude to the problem of the imāmate) was pushed so far by one of the theorists of Khāridjī doctrine, Yazīd b. Abī Anīsā (founder of the *Yazīdiyya*), that he says that God will reveal a new *Qur'ān* to a prophet among the Persians and that he will found a new religion for them, divine in the same sense as Judaism, Christianity and Islām, which will be no other than that of the Šābi'ūn mentioned in the *Qur'ān*.

The same Puritanism which characterises Khāridjism in its conception of the state and of faith is found in its ethical principles: it demands purity of conscience as an indispensable complement to bodily purity for the validity of acts of worship; one of their sects goes so far as to remove *Sūra xii.* from the *Qur'ān* (*Sūra Yūsuf*) because its contents are worldly and frivolous and make it unworthy to be the Word of God. If, on the other hand, they seem to be less strict than the orthodox in the punishment they inflict on adulterers, for whom they do not allow stoning, this is due simply to the fact that they do not recognise the authenticity of the famous verses added by 'Umar to the primitive text of the *Qur'ān* (cf. Nöldeke—Schwally, *Gesch. d. Qorāns*, i. 248—252).

Outside of general principles and a few particular cases, the law and dogmatics of the Khawāridj are not known to us in their totality except for the Ibādiyya, whose survival to the present day has preserved in its integrity their religious tradition. The Ibādiyya represents (as does the Šufriya on the other side) a comparatively moderate school and their present views, in dogma as well as law, have been to some degree influenced by other Muslim schools. Attention has recently been drawn (C. A. Nallino, *R. S. O.*, vii. 455—460) to the very close connection between the dogmatics of the
